American Optical Company. (See Maynard, Albert E., assignor.)
American Phototure Company. (See Pifer, George N., assignor.)
American Pulverizing Company. (See Roebke, Ernest T., assignor.)
American Rolling Mill Company, The. (See Tytus, John B., assignor.)
American Steel and Wire Company of New Jersey, The. (See Pfifer, James S., assignor.)
American Steel and Wire Company of New Jersey, The. (See Robertshaw, James E., assignor.)
American Steel Foundaries. (See Harris, Mark, assignor.)
American Type Founders Company. (See Kelly, William M., assignor.)
Amidon, Ray E., assignor to A C Spark Plug Company, Flint, Mich. Hairspring-adjustment retainer. 1,683,009; Sept. 4.
Amiesite Asphalt Company of America. (See Sadtler, Samuel S., assignor.)
Anderson, Arvid E., Scotia, N. Y., assignor to General Electric Company. System of electrical distribution. 1,683,147; Sept. 4.
Anderson, Arvid E., Scotia, N. Y., assignor to General Electric Company. Electrical distribution system. 1,683,227; Sept. 4.
Anderson, Charles, Seattle, Wash. Apparatus for raising water. 1,683,321; Sept. 4.
Anderson, Joseph M., Elko, Minn. Rotary liquid pump. 1,683,010; Sept. 4.
Anderson, Karl E., Chicago, Ill. Material holder. 1,683,279; Sept. 4.
Anderson, Roland G., New Haven, Conn., and J. Gaines, Woonsocket, R. I., assignors to L. Candee & Co., New Haven, Conn. Sole pattern. 1,682,880; Sept. 4.
Andren, Birger T., assignor to A. O. Smith Corporation, Milwaukee, Wis. Forging. 1,683,011; Sept. 4.
Angell, Robert C., Prince Bay, N. Y., assignor to The S. S. White Dental Manufacturing Company. Flame shield. Des. 76,215; Sept. 4.
Anglo-California Trust Company. (See Eley, Forrest W., assignor.)
Annis, Burton B., Akron, Ohio, assignor to The B. F. Goodrich Company, New York, N. Y. Valve. 1,683,322; Sept. 4.
Appleby, Thomas, Philadelphia, assignor to A. A. Kent, Ardmore, Pa. Control method and apparatus. 1,683,012; Sept. 4.
Archer, Merton T., Pittsburgh, Pa., assignor to The National Supply Company, Toledo, Ohio. Tandem-barrel well pump. 1,683,435; Sept. 4.
Armstrong, Edward R., assignor to F. O. Schoedinger, Columbus, Ohio. Adjustable shelf support. 1,683,228; Sept. 4.
Arnold, Charles L., Bardstown, Ky. Railroad crosstie. 1,683,013; Sept. 4.
Arthur, James L., Anderson, Ind., assignor, by mesne assignments, to Delco-Remy Corporation, Dayton, Ohio. Variable-resistance switch. 1,683,280; Sept. 4.
Asbury, Dorsey F., et al. (See Gibson, Howard S., assignor.)
Asbury, Dorsey F., Washington, D. C. Explosive engine of the rotating-cylinder type. 1,683,229; Sept. 4.
Ashley, George C., San Francisco, Calif. Decorating transparent surfaces. 1,683,282; Sept. 4.
Ashton, James T., assignor to Nichols & Shepard Company, Battle Creek, Mich. Shaker mechanism in agricultural devices. 1,682,733; Sept. 4.
Asire, Horace W., assignor to General Motors Research Corporation, Dayton, Ohio. Intake manifold. 1,683,281; Sept. 4.
Auberlin, William, Northfield, Ohio. Airship anchorage. 1,683,323; Sept. 4.
Austin, John A., San Francisco, assignor of two-thirds to E. A. Seyler, Oakland, Calif. Bumper-actuated control mechanism. 1,682,731; Sept. 4.
Automatic Merchandizer Inc., The. (See Lea, Charles, assignor.)
Autostrop Patents Corporation. (See Galsman, H. J., and Schumacher, assignors.)
Ayars, Charles H., assignor to Ayars Machine Company, Salem, N. J. Liquid-measuring valve. 1,683,120; Sept. 4.
Ayars Machine Company. (See Ayars, Charles H., assignor.)
B. & B. Shoe Company. (See Golden, Louis J., assignor.)
Babcock, Fay L., St. Petersburg, Fla. Puzzle. 1,683,014; Sept. 4.
Babcock & Wilcox Company, The. (See Jacobus, David S., assignor.)
Backstatter, Joseph, Winfield, N. Y. Excess-steam-pressure signal. 1,683,148; Sept. 4.
Baer, Emanuel H. (See Ernest, W., and Baer.)
Baker, Walter R. G., Schenectady, N. Y., assignor to General Electric Company. High-frequency signaling system. 1,683,230; Sept. 4.
Baker, William H., Boston, Mass. Lay motion for looms. 1,683,324; Sept. 4.
Baldwin, Leon F. N., Edgewood, assignor of one-half to B. S. Clark, Providence, R. I. Line marker for roadbeds. 1,683,121; Sept. 4.
Ball, Clarence R., Washington, D. C. Folding twin beds. 1,683,149; Sept. 4.
Barbour, Clifford W., and L. S. Carson, Norman, Okla. Closure seal. 1,683,015; Sept. 4.
Barbour Flax Spinning Co. (See Barbour, Robert, assignor.)
Barbour, Robert, assignor to Barbour Flax Spinning Co., Paterson, N. J. Spinning machine. 1,683,436; Sept. 4.
Barord, Paul J., Dormont Borough, assignor to The Sterling Varnish Company, Pittsburgh, Pa. Coating apparatus. 1,682,823; Sept. 4.
Barron, Grace A. (See Cohen, Samuel, assignor.)
Bassick Manufacturing Company, The. (See Creveling, John L., assignor.)
Bassick Manufacturing Company, The. (See Davis, Ernest W., assignor.)
Bassick Manufacturing Company, The. (See Fesler, Douglas F., assignor.)
Bassick Manufacturing Company, The. (See Piquerez, Emile, assignor.)

Bassick Manufacturing Company, The. (See Robin, John N., assignor.)

Bassick Manufacturing Company, The. (See Thomas, George F., assignor.)

Batle, Joseph E., assignor to Kelsey Wheel Company, Inc., Detroit, Mich. Forming drawn articles. 1,683,437; Sept. 4.

Bauer, Carl, assignor to Doetsch & Bauer Company, Chicago, Ill. Leg of a chair or settee. Des. 76,216; Sept. 4.

Banriedel, Gotthard. (See Otto, G., Hartmann, and Bauriedel.)

Bayne, Alexander H., Windsor, Ontario, Canada. Switch. 1,683,231; Sept. 4.

Beans, John F., and B. Le Roy, Massillon, Ohio. Spring forming and tempering machine. 1,682,734; Sept. 4.

Beard, Clement E., Columbiana, Ohio. Step attachment for stools. 1,682,732; Sept. 4.

Beattie, Arthur E., Manzanillo, Cuba. Antistatic arrangement in wireless receiving apparatus. 1,683,122; Sept. 4.

Beaudry, Leon N., Calgary, Alberta, Canada. Cashier's protector. 1,682,881; Sept. 4.

Beaver, Homer, Chickasha, Okla. Gin brush. 1,682,950; Sept. 4.

Bechtelheimer, Harry A., Rock Island, and H. P. Corbin, Moline, Ill., assignors, by mesne assignments, to Moline Implement Company. Power farming apparatus. 1,683,017; Sept. 4.

Beck, Michael, Minneapolis, Minn. Combination air and electric brake. 1,682,824; Sept. 4.

Becker, John J., New York, N. Y. Mechanical toy. 1,683,232; Sept. 4.

Beebe, Orlando M. (See Bell, E. L., and Beebe.)

Beeby, James, Chicago, Ill. Semaphore and the like for automobiles. 1,682,951; Sept. 4.

Bell, Elva L., and O. M. Beebe, Spokane, Wash. Roofing strip. 1,683,016; Sept. 4.

Bell, John E., Brooklyn, N. Y., assignor to Sinclair Refining Company, Chicago, Ill. Fractional distillation of petroleum. 1,683,150; Sept. 4.

Bell, John E., Brooklyn, N. Y., assignor to Sinclair Refining Company, Chicago, Ill. Method and apparatus for distilling petroleum oils. 1,683,151; Sept. 4.

Bellows, Henry W. (See Bodwell, P. D., and Bellows.)

Bemis Bro. Bag Company. (See Finn, L. J., and Morrill, assignors.)

Bendix Brake Company. (See Bendix, Vincent, assignor.)

Bendix, Vincent, assignor to Bendix Brake Company, Chicago, Ill. Lever. 1,683,378; Sept. 4.

Bentley, Marguerite E., Longfield, England. Dustpan and the like. 1,683,517; Sept. 4.

Berg, Olav, Paterson, N. J. Process and apparatus for washing fabrics. 1,683,325; Sept. 4.

Berger Manufacturing Company, The. (See Haldeman, Walter S., assignor.)

Bergerioux, René, Reuilly, France. Seed and grain distributor. 1,682,735; Sept. 4.

Bergerioux, René, Issoudun, France. Machine for distributing fertilizer, seeds, and grain. 1,682,823; Sept. 4.

Bergmann, Carl, jr., Lynbrook, assignor of one-half to G. R. Thompson, New York, N. Y. Apparatus for drawing metal. 1,683,123; Sept. 4.

Berry, Henry J., assignor of one-third to C. W. Floss, Detroit, Mich. Compressor piston. 1,682,736; Sept. 4.

Berthel, Charles J., assignor to Hackney Brothers, Inc., Wilson, N. C. Cooling tank for refrigerators. 1,683,518; Sept. 4.

Besly, Charles H., and Company. (See Miller, John, jr., assignor.)

Betts, John C., Philadelphia, Pa. Necktie retainer. 1,682,952; Sept. 4.

Bickford, Clarence R., Northwood Narrows, N. H. Chimney cleaner. 1,683,379; Sept. 4.

Biddle & Smart Company. (See Houle, Francis T., assignor.)

Bidwell, George L., Riegelsville, Pa., assignor to The Warren Manufacturing Company, Riegelsville, N. J. Method of and apparatus for making multiply paper. 1,682,826; Sept. 4.

Biegler, Louis T., Aberdeen, S. Dak. Automobile lifter. 1,683,020; Sept. 4.

Biermanns, Josef, Karlshorst, near Berlin, Germany, assignor to General Electric Company. Corona-preventing apparatus. 1,683,152; Sept. 4.

Billings, George P., Albany, Wis. Roof-framing rule. 1,683,438; Sept. 4.

Bishop, James A., deceased, Mascoutah, Ill.; L. H. Bishop, administratrix. Valve. 1,683,153; Sept. 4.

Bishop, James A., deceased, Mascoutah, Ill.; L. H. Bishop, administratrix. Valve. 1,683,154; Sept. 4.

Bishop, Lulu H., administratrix. (See Bishop, James A.)

Biszantz, Fred, assignor, by mesne assignments, to The Central Ohio Steel Products Company, Gallon, Ohio. Dumping body. 1,682,882; Sept. 4.

Bitney, Dewey H., assignor to Union Steel Products Company, Albion, Mich. Structural unit. 1,683,439; Sept. 4.

Black, Lee J., Beaumont, Tex. Steel walking beam. 1,682,883; Sept. 4.

Blackburn, Jasper, Webster Groves, Mo. Cable hanger. 1,682,737; Sept. 4.

Blaine, Joseph R., Oak Park, assignor to The Miehle Printing Press & Manufacturing Company, Chicago, Ill. Printing-press ductor mechanism. 1,683,243; Sept. 4.

Blair, Minnie. (See Blair, O. M., and Williams, assignors.)

Blair, Orville M., and W. E. Williams; said O. M. Blair assignor to M. Blair, San Francisco, Calif. Towel-vending device. 1,683,519; Sept. 4.

Blaslar, Arthur F., Guilford, N. Y. Torpedo. 1,683,124; Sept. 4.

Blauvelt, Frederic D., Montclair, N. J. Plumber's trap. Des. 76,217; Sept. 4.

Blaw-Knox Company. (See Venable, William M., assignor.)

Blum, Harold T., Glenmont, Ohio. Head covering. 1,683,233; Sept. 4.

Blum, Harold T., Glenmont, Ohio. Sweatband for head coverings. 1,683,234; Sept. 4.

Blum, Harold T., Glenmont, Ohio. Sweatband for head coverings. 1,683,326; Sept. 4.

Bodwell, Paul D., and H. W. Bellows, assignors to Deca Disc Phonograph Company, Waynesboro, Pa. Record holder for talking machines. 1,683,440; Sept. 4.

Boman, Claes W., Brooklyn, N. Y., and C. Kalser, Carlstadt, N. J., assignors to Eagle Pencil Company, New York, N. Y. Pencil. 1,683,235; Sept. 4.

Bone, Russell, Milledgeville, Ga. Hollow clay-tile building block. 1,683,441; Sept. 4.

Bonney Forge & Tool Works. (See Durham, J. E., jr., and Hume, assignors.)

Botsford, Claude W., Chicago, Ill., assignor to W. W. Odell, Pittsburgh, Pa. Gas generator. 1,683,155; Sept. 4.

Boda, Joseph E., Moline, Ill., assignor, by mesne assignments, to Moline Implement Company. Universal agricultural implement. 1,683,018; Sept. 4.

Boda, Joseph E., Moline, Ill., assignor, by mesne assignments, to Moline Implement Company. Universal agricultural implement. 1,683,019; Sept. 4.

Bonnard, Georges, Le Touvet, France. Treating crape waste. 1,683,520; Sept. 4.

Botson, René, Auderghem-Brussels, assignor to Société Industrielle des Applications Chimiques, Société Anonyme, Brussels, Belgium. Preparing depilatory substances. 1,683,442; Sept. 4.

Bott, Edgar S., and A. S. Funk, La Crosse, Wis. Overshoe. Des. 76,218; Sept. 4.

Bouharoun, Sliman E., Waterbury, Conn. Folding chair. 1,683,327; Sept. 4.

Bourgognion, Jullanus W. M., and C. L. Phillips, Nijmegen, Netherlands. Treating water. 1,683,521; Sept. 4.

Bowers, Ernest C. (See Rosenbaum, L. F., and Bowers.)

Bowman, Harvey M., Mountain View, Calif. Safety bumper. 1,683,283; Sept. 4.

Boyd, John S., assignor, by mesne assignments, to Boyd Textile Corporation, Williamstown, Mass. Textile fabric. Des. 76,219; Sept. 4.

Boyd John S., assignor, by mesne assignments, to Boyd Textile Corporation, Williamstown, Mass. Textile fabric. Des. 76,220; Sept. 4.

Boyd, John S., assignor, by mesne assignments, to Boyd Textile Corporation, Williamstown, Mass. Textile fabric. Des. 76,221; Sept. 4.

Boyd, John S., assignor, by mesne assignments, to Boyd Textile Corporation, Williamstown, Mass. Textile fabric. Des. 76,222; Sept. 4.

Boyd, John S., assignor, by mesne assignments, to Boyd Textile Corporation, Williamstown, Mass. Textile fabric. Des. 76,223; Sept. 4.

Boyd, John S., assignor, by mesne assignments, to Boyd Textile Corporation, Williamstown, Mass. Textile fabric. Des. 76,224; Sept. 4.

Boyd Textile Corporation. (See Boyd, John S., assignor.)

Brady, Terrice G., and C. Nelkin, New York, N. Y. Fabric grip. 1,683,125; Sept. 4.

Brand, Harry R., New York, N. Y. Commodity control. 1,682,827; Sept. 4.

Brand, Harry R., New York, N. Y. Mechanism and method for controlling business. 1,682,828; Sept. 4.

Brandt, Stella, New York, N. Y., assignor to Waite Carpet Company, Oshkosh, Wis. Rug. Des. 76,225; Sept. 4.

Brandt, Stella, New York, N. Y., assignor to Waite Carpet Company, Oshkosh, Wis. Rug. Des. 76,226; Sept 4.

Bransky, Oscar E. (See Glair, H. F., and Bransky.)

Brasseur, Ernest J., assignor to A. B. Dick Company, Chicago, Ill. Mount for drawing tables and the like. 1,683,443; Sept. 4.

Braun, Carl F., Pasedena, Calif. Heat-exchanging apparatus. 1,683,236; Sept. 4.

Breitenstein, Albert F., assignor to The Geometric Tool Co., New Haven, Conn. Self-opening die head. 1,683,126; Sept. 4.

Breithaupt, Oscar, Detroit, Mich. Nail container and dispenser. 1,683,328; Sept. 4.

Bremer, Norman C., assignor to Morse Chain Company, Ithaca, N. Y. Oiling device for drive chains. 1,682,829; Sept. 4.

Bridge, Herbert H., Detroit, Mich. Priming device. 1,682,953; Sept. 4.

Bridgeport Brass Company. (See Bright, Weston F., assignor.)

Bright, Weston F., Longmeadow, Mass., assignor to Bridgeport Brass Company, Bridgeport, Conn. Automatic flushing valve. 1,683,062; Sept. 4.

Brill, J. G., Company, The. (See Adams, Walter S., assignor.)

Brinton, William C., jr., assignor to Philbrin Corporation, Kennett Square, Pa. Contact maker and interrupter. 1,683,444; Sept. 4.

Broadley, Henry, Walkerville, Ontario, Canada. Advertising and display device. 1,682,884; Sept. 4.

Brock, Edwin C., Minneapolis, Minn. Bread-slicing machine. 1,683,445; Sept. 4.

Brockmeyer, Joseph A., Brookline, Pa. Self-expanding piston. 1,683,380; Sept. 4.

Bronson, Oscar A., Minneapolis, Minn. Cover for an electrical switch box. Des. 76,227; Sept. 4.

Broussouse, Fernand L., Paris, France. Damping oscillations for use with suspension leaf springs and the like. 1,683,522; Sept. 4.

Brown, Chester H., Kopperl, Tex. Lawn swing. 1,683,237; Sept. 4.

Brown Company. (See Richter, G. A., and Schur, assignors.)

Brown, Earl G., Oakland, Calif. Metallic spreader for wood forms. 1,683,446; Sept. 4.

Brown, George A., St. Paul, Minn. Oil-dispensing apparatus. 1,683,021; Sept. 4.

Brown, Herbert D., Schenectady, N. Y., assignor to General Electric Company. Electric discharge device. 1,683,156; Sept. 4.

Brown, Theodore P., et al., trustees. (See Tunstall, William B., assignor.)

Brown, Walter W., Erie, Pa., assignor to General Electric Company. Controller handle. 1,683,157; Sept. 4.

Browning, Raymond E. (See Cocks, S. J., and Browning.)

Brickel, Waldemar, Berlin, Germany, assignor to General Electric Company. Synchronizing apparatus. 1,683,158; Sept. 4.

Brunkow, Almon T., Duluth, Kans. Extracting tool. 1,682,954; Sept. 4.

Brunswick-Balke-Collender Company, The. (See Nystrom, Martin, assignor.)

Bryan, George H. (See Bullock, E. W., and Bryan.)

Buchanan, Stephen N., New York, N. Y., assignor to The Thomas & Betts Co., Elizabeth, N. J. Cable connecter. 1,682,738; Sept. 4.

Buchner, Max, Hanover-Kleefeld, Germany, assignor to A. F. Meyerhofen, Zurich, Switzerland. Production of soluble salts of organic compounds possessing acid character. 1,683,159; Sept. 4.

Buckle, Horace L. T., Iver Heath, England, assignor to Victor Talking Machine Company, Camden, N. J., Talking machine. 1,683,160; Sept. 4.

Buckley, Ernest P., New York, N. Y., assignor, by mesne assignments, to Permex Corporation of America. Valve mechanism. 1,683,523; Sept. 4.

Budd, Edward G., Manufacturing Company. (See Ledwinka, Joseph, assignor.)

Budd Wheel Company. (See Nelson, Emil A., assignor.)

Buffalo Pressed Steel Company. (See MacKenzie, R. J., and Haas, assignors.)

Bühring, Kurt. (See Tengström, H., and Bühring.)

Bulbeck, George, London, England. Demountable hut. 1,683,022; Sept. 4.

Bullock, Edward W., and G. H. Bryan, assignors to Gleason Works, Rochester, N. Y. Indexing mechanism. 1,683,524; Sept. 4.

Bunting, James H., Clifton, N. J., assignor to Susquehanna Silk Mills. Textile fabric. Des. 76,277; Sept. 4.

Burandt, Gustav A., and A. W. Nordgren, assignors to Marquette Manufacturing Company, St. Paul, Minn. Accessory merchandiser. 1,683,525; Sept. 4.

Burdick Corporation, The. (See Lavoisier, Ian J., assignor.)

Burgess, William A. A., Monkseaton, assignor to A. Reyrolle & Company Limited, Hebburn-on-Tyne, England. Starting and synchronizing of alternating-current dynamo-electric machines. 1,683,284; Sept. 4.

Burkett, Obert W., Dallas, Tex. Hosiery. Des. 76,228; Sept. 4.

Burn, Jessie R., San Antonio, Tex. Card-table-cover clamp. Des. 76,229; Sept. 4.

Burrall, Fred E., assignor to McIntyre-Burrall Company, Green Bay, Wis. Harness buckle. Des. 76,230; Sept. 4.

Burroughs Adding Machine Company. (See Muller, Robert L., assignor.)

Burrowes, E. T., Company, The. (See Fields, Harry R., assignor.)

Busby, Ralph B., and L. B. Samanski, Oakland, Calif. Automobile cleaning system. 1,682,830; Sept. 4.

Bush, Harry K., Pottstown, Pa., assignor to Reading Foundry and Supply Co. Water cooler. 1,683,381; Sept. 4.

Butler, Fannie M., Hinsdale, Ill. Apparatus for storing dishes. 1,682,885; Sept. 4.

Butler, John E., Hoosick Falls, N. Y. Separable button. 1,682,771; Sept. 4.

Butterick, Naason Z., Miami, Fla. Composition roofing shingle. 1,683,285; Sept. 4.

Byles, Frank A., Schenectady, N. Y., assignor to General Electric Company. Regulating system. 1,683,161; Sept. 4.

C. G. Spring & Bumper Company, The. (See Jandus, H. S., and Morgan, assignors.)

C-S Engineering Company. (See Casey, W. F. J., and Cavin, assignors.)

Cagan, Samuel, and W. S. Nead, Stillwater, Minn. Garment collar. 1,682,831; Sept. 4.

Cahill, John, Norfolk, Va. Sliding swing door. 1,682,772; Sept. 4.

Caldwell, Frank E., North Mankato, Minn. Weather strip. 1,683,162; Sept. 4.

California Cotton Mills Company. (See Mitchell, Allister S., assignor.)

Campbell, C. H. (See Carpenter, William A., assignor.)

Campbell, Wyatt R., New Castle, Pa. Flower-displaying device for coffin lids. 1,683,526; Sept. 4.

Campus, Cesare C., Santa Monica, Calif. Water-closet fitting. 1,683,063; Sept. 4.

Candee, L., & Co. (See Anderson, R. G., and Gaines, assignors.)

Capicotto, James V., Brooklyn, N. Y., assignor to Dubilier Condenser Corporation. Electric conductor and making same. 1,683,064; Sept. 4.

Caprin, Ilario, San Francisco, Calif. Heater. 1,683,527; Sept. 4.

Cardoza, Antone J., Oakland, Calif. Temporary binder. 1,683,238; Sept. 4.

Carlton, Jack C., assignor to The Carlton Machine Tool Company, Cincinnati, Ohio. Clutch mechanism for reversing gear. 1,683,528; Sept. 4.

Carlton Machine Tool Company, The. (See Carlton, Jack C., assignor.)

Carpenter, William A., assignor of one-half to C. H. Campbell, Hartsville, S. C. Pressure mechanism for roll stands. 1,683,583; Sept. 4.

Carpenter, William J., and F. Shanley, Chicago, Ill. Plumb rule. 1,683,065; Sept. 4.

Carr, Edward G., Shorewood, Wis., assignor to The Lakewood Engineering Company, Lakewood, Ohio. Concrete-road machine. 1,683,382; Sept. 4.

Carrom Company, The. (See Haskell, Henry L., assignor.)

Carson, Lamoine S. (See Barbour, C. W., and Carson.)

Casey, William F. J., and G. Cavin, Kingston, Ontario, Canda, assignors, by mesne assignments, to C-S Engineering Company. Locomotive booster device. 1,683,286; Sept. 4.

Cavanagh, James, Boston, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Making shoes. 1,682,773; Sept. 4.

Cavin, Gustave. (See Casey, W. F. J., and Cavin.)

Central Ohio Steel Products Company. (See Biszantz, Fred, assignor.)

Central Scientific Company. (See Klopsteg, Paul E., assignor.)

Chain Belt Company. (See Shafer, Samuel, jr., assignor.)

Champion, Albert, assignor to A C Spark Plug Company, Flint, Mich. Fexible tube support. 1,683,023; Sept. 4.

Chapel, George L., assignor to W. B. Jarvis Company, Grand Rapids, Mich. Closure for radiators and the like. 1,683,383; Sept. 4.

Charushin, Vladimir. (See Gough, A. C., and Charushin.)

Chemical Machinery Corporation. (See Short, Frank, assignor.)

Chemicolor Wood Preserving Co. (See Lamm, James E., assignor.)

Chemicolor Wood Preserving Co. (See Renner, Herbert, assignor.)

Chemische Fabrik auf Actien (vorm. E. Schering). (See Schoeller, W., and Allardt assignors.)

Cherry, Oscar A. (See Laymand, F. E., Richardson, and Cherry.)

Chicago Cardboard Company. (See Ziemmerman, Henry, assignor.)

Chicago Flexible Shaft Company. (See Kocourek, Henry, assignor.)

Chicago Pneumatic Tool Company. (See Moody, J. C., and Hoffman, assignors.)

Chicago Pneumatic Tool Company. (See Ochs, C., and Hildebrand, assignors.)

Chicago Pneumatic Tool Company. (See Wasson, H. C., and Collins, assignors.)

Chilton, Ralph H., assignor to The Inland Manufacturing Company, Dayton, Ohio. Steering wheel. 1,683,329; Sept. 4.

Chilton, Ralph H., assignor to The Inland Manufacturing Company, Dayton, Ohio. Spring shackle. 1,683,330; Sept. 4.

Chilton, Ralph H., assignor to The Inland Manufacturing Company, Dayton, Ohio. Spring shackle. 1,683,331; Sept. 4.

Chilton, Ralph H., assignor to The Inland Manufacturing Company, Dayton, Ohio. Spring shackle. 1,683,332; Sept. 4.

Chilton, Ralph H., assignor to The Inland Manufacturing Company, Dayton, Ohio. Spring shackle. 1,683,333; Sept. 4.

Chilton Ralph H., assignor to The Inland Manufacturing Company, Dayton, Ohio. Spring shackle. 1,683,334; Sept. 4.

Christman, Peter J., assignor to Paper Converting Machine Co., Inc., Green Bay, Wis. Napkin fold. 1,683,335; Sept. 4.

Chryst, William A., assignor, by mesne assignments, to Delco-Remy Corporation, Dayton, Ohio. Ignition apparatus. 1,683,239; Sept. 4.

Cincinnati Bickford Tool Company, The. (See Klausmeyer, David C., assignor.)

Cincinnati Victor Company, The. (See Ryder, Charles D., assignor.)

Clark, Benjamin S. (See Baldwin, Leon F. N., assignor.)

Clay, Marshall F., Canton, Ohio. Window ventilator. 1,682,739; Sept. 4.

Cleveland Heater Company, The. (See Doen Loran F., assignor.)

Cleveland Trust Company, The, executor. (See Plantinga, Pierre.)
Climer, Quinby, assignor of one-half to C. M. Haynes, Chillicothe, Ohio. Bean-snipping machine. 1,683,024; Sept. 4.
Clutter, Bird C., Akron, Ohio, assignor, by mesne assignments, to Clutter-Wagner, Inc. Excavator. 1,682,774; Sept. 4.
Clutter-Wagner, Inc. (See Clutter, Bird C., assignor.)
Coburn, William H. and C. Kiernan, assignors of one-third to E. H. Gilbert, Morgantown, W. Va. Electric-power truck. 1,683,287; Sept. 4.
Cocks, Sidney J., and R. E. Browning, Vancouver, British Columbia, Canada. Piston ring. 1,682,886; Sept. 4.
Cohelan, Daniel, San Francisco, Calif. Automobile battery. 1,683,529; Sept. 4.
Cohen, Samuel, Brooklyn, assignor to G. A. Barron, New York, N. Y. Electrical connecter. 1,683,066; Sept. 4.
Cohn, Henry, Charlottenburg, near Berlin, assignor to the firm Dr. Erich F. Huth Ges. m. b. H., Berlin, Germany. Thermionic tube. 1,682,775; Sept. 4.
Cohn, Irwin, assignor to Irwin & Company, Inc., New York, N. Y. Doll. 1,682,832; Sept. 4.
Coleman, William W., New York, N. Y. Rail brace. 1,682,887; Sept. 4.
Collins, Lester L. (See Wasson, H. C., and Collins.
Colt, Samuel S., Orange, N. J. Retaining means for concrete forms. 1,682,740.
Colvin, Benjamin F., Fremont, Ohio. Child's vehicle. 1,683,240; Sept. 4.
Cone Gearing Corporation. (See Cone, Samuel I., assignor.)
Cone, Samuel I., Portsmouth, assignor to Cone Gearing Corporation, Norfolk, Va. Precision worm gearing. 1,683,163; Sept. 4.
Conger, Claude M., Kansas City, Kans., assignor to Irving-Pitt Manufacturing Company, Kansas City, Mo. Visible index. 1,683,447; Sept. 4.
Conradson, Conrad M., Madison, Wis., assignor to Joseph T. Ryerson and Son, Chicago, Ill. Selective geared head lathe. 1,683,448; Sept. 4.
Consolidated Steel Strapping Company. (See Swenson, Carl O., assignor.)
Continental Motors Corporation. (See Niven, Archie M., assignor.)
Conway, Carle C., et al., trustees. (See Tunstall, William B., assignor.)
Conway, Earle E., et al., trustees. (See Tunstall, William B., assignor.)
Conwell Graphic Company. (See Hornecker, George, assignor.)
Copeland, Arch G., Rich Hill, assignor of one-half to F. V. Reagel, Jefferson City, Mo. Drilling machine. 1,682,955; Sept. 4.
Corbin, Henry P. (See Bechtelheimer, H. A., and Corbin.)
Corning Glass Works. (See Lebby, States L., assignor.)
Cosby, Eric L. H., Teddington, England. Brush. 1,683,530; Sept. 4.
Cotton, Walter H., assignor to Union Draft Gear Company, Chicago, Ill. Draft gear. 1,683,164; Sept. 4.
Coulombe, Joseph C., Kokomo, Ind. Starter drive for internal-combustion engines. 1,683,165; Sept. 4.
Coulombe, Joseph C., Kokomo, Ind. Carburetor. 1,683,576; Sept. 4.
Crabb, Silas F., assignor to J. M. Selden, Pittsburgh, Pa. Circulating system for steam generators. 1,682,776; Sept. 4.
Craig, William A., Philadelphia, Pa. Power reverse gear for locomotives. 1,682,888; Sept. 4.
Crankless Engines Limited. (See Michell, Anthony G. M., assignor.)
Creed & Company Limited. (See Creed, Frederick G., assignor.)
Creed, Frederick G., assignor to himself and Creed & Company Limited, Croydon, England. Clutch mechanism, specially suitable for use in telegraphic apparatus. 1,682,889; Sept. 4.
Cremean, William F., Toledo, Ohio. Dustguard. 1,683,449; Sept. 4.
Crerar, Adams & Co. (See Rostron, Robert, assignor.)
Creswell, Clifford A. (See Kniseley, H. M., Creswell, and Messer.)
Creveling, John L., Oracle, Ariz., assignor, by mesne assignments, to The Bassick Manufacturing Company, Chicago, Ill. Lubricating means. 1,682,890; Sept. 4.
Crockett, William P., Chicago, Ill. Electromagnetic device. 1,683,450; Sept. 4.
Crompton & Knowles Loom Works. (See Giles, John W., assignor.)
Crompton & Knowles Loom Works. (See Holmes, Elbridge R., assignor.)
Crompton & Knowles Loom Works. (See Turner, Richard G., assignor.)
Crompton & Knowles Loom Works. (See Wakefield, Walter H., assignor.)
Crompton & Knowles Loom Works. (See Wattie, William M., assignor.)
Crossby, William E. J., Harrow, and J. Mellor, assignors to Packs (1925) Limited, Feltham, England. Receptacle. 1,683,166; Sept. 4.
Crossley, Alfred. (See Mirick, C. B., and Crossley.)
Crown Cork & Seal Company. (See Huntley, George J., assignor.)
Cummings, Thomas P., Chicago, Ill. Plumbing device. 1,683,336; Sept. 4.
Cunningham, Sylvester, Evansville, Ind. Expanding mandrel. 1,683,167; Sept. 4.
Cutler-Hammer Mfg. Co., The. (See Layman, F. E., and Richardson, assignors.)
Cutler-Hammer Mfg. Co. (See Layman, F. E., Richardson, and Cherry, assignors.)
Cutler-Hammer Mfg. Co., The. (See Richardson, Linwood T., assignor.)
Cutler-Hammer Mfg. Co., The. (See Simon, Arthur, assignor.)
Cutler, Peirce, Burlingame, assignor to E. J. Judge, Alameda, Calif. Filling container with preserving, flavoring, and condiment liquids. 1,683,241; Sept. 4.
Dake, Charles W., Chicago, Ill. Fire extinguisher. 1,682,833; Sept. 4.
Dallan, Roy M., Fort Dodge, Iowa. Liner block for cement sewer pipes. 1,683,025; Sept. 4.
Dambach, Edward, Co., The. (See Dambach, Ralph A., assignor.)
Dambach, Ralph A., assignor to The Edward Dambach Co., Evans City, Pa. Adjustable mantel shelf. 1,683,168; Sept. 4.
Damon, John H., assignor to Plymouth Cordage Company, Plymouth, Mass. Twine package and its manufacture. 1,682,777; Sept. 4.
Darr, Earl A., et al., executors. (See Kraft, Henry P.)
Davis, Ernest W., Oak Park, assignor to The Bassick Manufacturing Company, Chicago, Ill. Valve. 1,682,891; Sept. 4.
Davis, Thomas M., Washington, D. C., assignor to Wired Radio, Inc., New York, N. Y. Selective signaling system. 1,683,127; Sept. 4.
Dawson, Vernon B., and I. B. Penton, Wilmington, Del. Gripping and pulling implement. 1,682,956; Sept. 4.
Dearing, Edmund R., Birmingham, Ala. Metal plug for pipe joints. 1,682,741; Sept. 4.
Deca Disc Phonograph Company. (See Bodwell, P. D., and Bellows, assignors.)
Deca Disc Phonograph Company. (See Kauffman, Wilbur K., assignor.)
Decker, George, assignor to Realistic Hair Waving Machine Co., Cleveland, Ohio. Hair-waving outfit. 1,683,531; Sept. 4.
Dedrick, Charles H., Drexel Hill, Pa., assignor to Philadelphia Quartz Company. Manufacturing straw pulp and paper. 1,682,834; Sept. 4.
De Forest, Lee, assignor to De Forest Phonofilm Corporation, New York, N. Y. Sound recording and reproducing apparatus. 1,683,451; Sept. 4.
De Forest Phonofilm Corporation. (See de Forest, Lee, assignor.)
De Goll, Louis, Paris, France. Lighter. 1,682,892; Sept. 4.
Deister, Emil, jr., Fort Wayne, Ind. Score device. 1,683,242; Sept. 4.
De la Cierva, Juan, Madrid, Spain. Aircraft with rotative wings. 1,682,893; Sept. 4.
De la Cierva, Juan, Madrid, Spain. Undercarriage or landing gear for aircraft. 1,682,894; Sept. 4.
Delco-Remy Corporation. (See Arthur, James L., assignor.)
Delco-Remy Corporation. (See Chryst, William A., assignor.)
Delco-Remy Corporation. (See Poole, Lora E., assignor.)
Denny, H. C. (See Hughes, Charles H., assignor.)
De Noya, Everett A., Pawhuska, Okla. Golf-bag holder. 1,683,169; Sept. 4.
Derwish, Emen, Fertle, Minn. Folding chair. 1,683,532; Sept. 4.
De Vleg, Gerard A., Rockford, Ill. Tool-spindle fixture. 1,682,835; Sept. 4.
De Witt, Clarence N. (See Gardner, William H., assignor.)
Di Carlo, Donato, Philadelphia, Pa. Lamp. 1,683,170; Sept. 4.
Dick Company, A. B. (See Brasseur, Ernest J., assignor.)
Dickey, Robert T., Del Rio, Tex. Automatic float valve. 1,683,171; Sept. 4.
Diescher, Samuel E., Wilkinsburg, Pa. Gas burner. 1,683,128; Sept. 4.
Dillon, John M., Hutton, La. Shaft coupling. 1,682,895; Sept. 4.
Dilts Machine Works Incorporated. (See Haskell, John D., assignor.)
Directoplate Corporation. (See Koppe, Alexander T., assignor.)
Doane, Leroy C. (See Lucklesh, M., Doane, and Miller.)
Doen, Loran F., assignor to The Cleveland Heater Company, Cleveland, Ohio. Thermostatic valve. 1,683,172; Sept. 4.
Doerschuk, Victor C., Massena, N. Y., assignor to Aluminum Company of America, Pittsburgh, Pa. Carbon electrode and molding the same. 1,683,587; Sept. 4
Doetsch & Bauer Company. (See Bauer, Carl, assignor.)
Donovan, John W., Sunburst, Mont. Card game. 1,683,026; Sept. 4.
Dorogi és Tása Gummigyár R. T., Dr. (See Dorogi, István and L., assignors.)
Dorogi, István and L., Budapest, assignors to Dr. Dorogi É. S. Társa Gummigyár R. T., Budapest-Albertfalva, Hungary. Closure means for inflatable hollow rubber bodies. 1,682,836; Sept. 4.
Dorogi, Lajos. (See Dorogi, István and L.)

Dräger, Alexander B. (See Schröder, Hans, W. C., assignor.)
Dräger, Elfriede, executrix. (See Schröder, Hans W. C.)
Draper Corporation. (See Malloy, James T., assignor.)
Drost, Thomas, assignor to H. Wagner and Adler Co., New York, N. Y. Cue rack or the like. 1,683,533; Sept. 4.
Drying Systems, Inc. (See Sauvage, Herbert J., assignor.)
Dubilier Condenser Corporation. (See Capicotto James V., assignor.)
Dubilier Condenser Corporation. (See Dubilier, William, assignor.)
Dubilier Condenser Corporation. (See Van Deventer, Harry R., assignor.)
Dubilier Condenser Corporation. (See Vawter, Charles E., assignor.)
Dubilier, William, New York, N. Y., assignor to Dubilier Condenser Corporation. Grid-leak resistance. 1,683,067; Sept. 4.
Duncan, William M., Alton, Ill. Disintegrator. 1,683,244; Sept. 4.
Dunham Company, The. (See Dunham, Ray E., assignor.)
Dunham, Ray E., assignor to The Dunham Company, Berea, Ohio. Tillage implement. 1,682,896; Sept. 4.
Dura Company, The. (See Hanson, Miles G., assignor.)
Durham, Joseph E., jr., and D. Hume, assignors to Bonney Forge & Tool Works, Allentown, Pa. Wrench-handle attachment. 1,683,384; Sept. 4.
Durkee-Atwood Company. (See Nielsen, Lauritz F., assignor.)
Eagle Manufacturing Company, The. (See Paull, J., and Miller, assignors.)
Eagle Pencil Company. (See Boman, C. W., and Kaiser, assignors.)
Earnshaw Knitting Company. (See Stockbower, Mabel Y., assignor.)
Eastern Machine Screw Corporation, The. (See Williamson, Edwin O., assignor.)
Eastman Kodak Company. (See Gray, H. L., and Staud, assignors.)
Eastman Kodak Company. (See Reynolds, Frank H., assignor.)
Eastman Kodak Company. (See Riddell, William A., assignor.)
Eastman Kodak Company. (See Stinchfield, Ray L., assignor.)
Eclipse Machine Company. (See Lansing, Raymond P., assignor.)
Edelman, Philip E., Chicago, Ill. Radiochassis. 1,682,778; Sept. 4.
Edelmann, E., & Co. (See Edelmann, Leo, assignor.)
Edelmann, Leo, assignor to E. Edelmann & Co., Chicago, Ill. Hydrometer. 1,683,452; Sept. 4.
Edison Electric Appliance Company. (See Simmons, Albert H., assignor.)
Edwin, Emil, assignor to Aktieselskapet Norsk Staal Elektrisk-Gas-Reduktion, Trondhjem, Norway. Using high-tension electric acrs for treatment of gases. 1,683,534; Sept. 4.
Egloff, Gustav, assignor to Universal Oil Products Company, Chicago, Ill. Process and apparatus for cracking oil. 1,682,742; Sept. 4.
Egloff, Gustav, Independence, Kans., assignor to Universal Oil Products Company, Chicago, Ill. Halogen treatment of oil shale. 1,682,743; Sept. 4.
Egloff, Gustav, assignor to Universal Oil Products Company, Chicago, Ill. Process and apparatus for treating petroleum oil. 1,682,744; Sept. 4.
Ehnborn, Clemens E., Chicago, Ill. Window seat. 1,683,027; Sept. 4.
Electric Vacuum Cleaner Company. (See Lang, Henry T., assignor.)
Elektrizitäts-Gesellschaft "Sanitas" m. b. H. (See Pfeiffer, Adolf, assignor.)
Eley, Forrest W., Newark, Ohio, assignor, by mesne assignments, to Anglo-California Trust Company. Improving mineral oils. 1,683,288; Sept. 4.
Elkington, Vivian, St. Margarets Bay, England. Apparatus for supplying a current of heated air or gas. 1,683,028; Sept. 4.
Ellis, Carleton, Montclair, N. J. Soluble and fusible white acetone resin and making same. 1,683,535; Sept. 4.
Elto Outboard Motor Company. (See Evinrude, Ole, assignor.)
Embossing Company, The. (See Graham, Tom C., assignor.)
Emerson, John C. (See Page, N. L. B., and Emerson.)
Engel, Albert W., Chicago, Ill. Easel. 1,682,837; Sept. 4.
Engler, Walter N. (See Mobius, C. E., and Engler.)
Erie Malleable Iron Company. (See Selah, Howard A., assignor.)
Ernest, William, Martinez, and E. H. Baer, Associated, Calif. Barrel-filling apparatus. 1,683,337; Sept. 4.
Ervin, George B., Weston, W. Va. Temporary well capper. 1,683,173; Sept. 4.
Evinrude, Ole, assignor to Elto Outboard Motor Company, Milwaukee, Wis. Tank closure. 1,683,338; Sept. 4.
Eyrish, Carl, Gig Harbor, Wash. Saw-setting anvil and gnuge. 1,683,174; Sept. 4.
Fagley, Harold L. (See Grothe, Verner G. H., assignor.)
Fallor, Charles W., Pittsburgh, assignor to The Union Switch & Signal Company, Swissvale, Pa. Railway-traffic-controlling apparatus. 1,682,747; Sept. 4.
Falcke, Emil, and K. Lehmann, Berlin, Germany, assignors to General Electric Company. System of control. 1,683,175; Sept. 4.
Fanger, Nathan, New York, N. Y. Wheeled carrying case. 1,683,029; Sept. 4.
Fantum Mirror, Inc. (See Ruckelhaus, John G., assignor)
Farbenfabriken vorm. Friedr. Bayer and Co. (See Meckbach, Ernst, assignor.)
Farr, Burt J., and M. H. Westbrook, Battle Creek, Mich. Machine for reboring or refinishing cylinders. 1,683,339; Sept. 4.
Farrell, Frederick W., assignor to McLaurin-Jones Co., Brookfield, Mass. Coated paper. 1,683,453; Sept. 4.
Faulhaber, Jacob, Siershahn im Westerwald, Germany. Catch drop for bottles. 1,683,176; Sept. 4.
Fayer, Charles, Flushing, and F. H. Wappler, Elmhurst assignors to Wappler Electric Company, Inc., Long Island City, N. Y. Rectifying transformer. 1,682,748; Sept. 4.
Fedders, John M., assignor to Fedders Manufacturing Company, Inc., Buffalo, N. Y. Radiator core. 1,683,340; Sept. 4.
Fedders Manufacturing Company. (See Fedders, John M., assignor.)
Federal Telegraph Company. (See Koister, Frederick A., assignor.)
Feigelman, Herman A., Paterson, N. J. Pluricelled container. 1,682,838; Sept. 4.
Fenaux, Fernand, assignor to Societe Anonyme Chantiers & Ateliers Augustin Normand, Le Havre, France. Mine recess of mine-planting submarines. 1,683,177; Sept. 4.
Ferguson, James E., Cleveland, and H. L. Mooney, East Cleveland, assignors to The Lake Lithograph Company, Cleveland, Ohio. Display device for tires and the like. 1,682,745; Sept. 4.
Ferree, Marvin, New York, N. Y., and J. Wissmar, Cleveland, Ohio, assignors to Picture Transmission Corporation, New York, N. Y. Governor for electric motors. 1,683,536; Sept. 4.
Fesler, Douglas F., assignor to The Bassick Manufacturing Company, Chicago, Ill. Filter element. 1,682,897; Sept. 4.
Fesler, Douglas F., assignor to The Bassick Manufacturing Company, Chicago, Ill. Lubricating system. 1,682,898; Sept. 4.
Fetter, William, Baltimore, Md. Self-healing inner tube. 1,683,454; Sept. 4.
Fields, Harry R., Orlando, Fla., assignor to The E. T. Burrowes Company, Portland, Me. Characterized check protector. 1,682,779; Sept. 4.
Filtrators Company. (See Sanftleben, Joseph F., assignor.)
Finn, Louis J., Peoria, Ill., and P. E. Morrill, assignors to Bemis Bro. Bag Company, St. Louis, Mo. End closure for paper bags. 1,682,839; Sept. 4.
Finn, Sidney J., Beverly, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Trimming machine. 1,682,780; Sept. 4.
Finnessy, James E., Pittsburgh, Pa. Train retarder. 1,682,746; Sept. 4.
Fisher, Charles. (See Thompson, R. J., and Fisher.)
Fisk Rubber Company, The. (See Maynard, Charles E., assignor.)
Fisk Rubber Company, The. (See Weisse, Hugo C., assignor.)
Fletcher, Joseph H., Los Angeles, Calif. Resilient wheel. 1,682,899; Sept. 4.
Floss, Carl W. (See Berry, Henry J., assignor.)
Foerch, John W., jr., Wilkes-Barre, Pa. Gutter joint. 1,682,840; Sept. 4.
Folmar, Robert L., Goshen, Ala. Vault. 1,683,537; Sept. 4.
Foresman, Robert A., Moore, and J. E. Larrabee, East Lansdowne, Pa., assignors to Westinghouse Electric & Manufacturing Company. Stoker. 1,683,341; Sept. 4.
Forrest, Thomas W. W., assignor to Sunland Sales Cooperative Association, Fresno, Calif. Treating dried figs and dried prunes. 1,683,068; Sept. 4.
Foster, Guy T., Dayton, Ohio, assignor to L. Thompson, New York, N. Y. Locomotive structure. 1,683,455; Sept. 4.
Foster, Isaac M., et al. (See Mulligan, Paul C., assignor.)
Fox, John H., Pittsburgh, Pa., assignor to Pittsburgh Plate Glass Company. Apparatus for surfacing plate glass. 1,683,342; Sept. 4.
Francois, Clifford J., sr., assignor of one-half to J. H. Hass, sr., McDonoghville, La. Single-service brush. 1,683,538; Sept. 4.
Frederickson, Otto A., Wethersfield, assignor to The Wire Mold Company, Hartford, Conn. Circular loom. 1,683,385; Sept. 4.
Freed, Horace. (See Weyler, F. P. A., and Freed.)
Frick, Frank E., Flushing, N. Y. Hot-tool rotary cutter. 1,682,900; Sept. 4.
Friden, Carl M. F., Oakland, Calif. Reversing mechanism. 1,682,901; Sept. 4.
Früh, Conrad J., Zurich, Switzerland. Process of and apparatus for cleaning textile goods. 1,682,841; Sept. 4.

Frost, Clinton, E., Chippewa Lake, assignor to The Speciality Manufacturing Company, Cleveland, Ohio. Brush. 1,683,456; Sept. 4.

Funk, Arthur S. (See Bott, E. S., and Funk.)

Fyrac Manufacturing Co. (See Aldeen, Gedor W., assignor.)

Gagné, Augustine, Central Falls, assignor to Hemphill Company, Providence, R. I. Stripping attachment for knitting machines. 1,683,540; Sept. 4.

Gaines, John. (See Anderson, R. G., and Gaines.)

Galsman, Henry J., New York, and C. Schumacher, Lynnbrook, N. Y., assignors to Autostrop Patents Corporation, Dover, Del. Metal-tempering apparatus. 1,683,129; Sept. 4.

Gallagher, Alfred H., Chicago, Ill. Stabilizer and plaster composition containing the same. 1,683,539; Sept. 4.

Gammell-Hanney Mfg. Co. (See Hanney, Angus F., assignor.)

Gardner, John J., New York, N. Y. Motor-vehicle control system. 1,682,781; Sept. 4.

Gardner, William H., assignor of one-fourth to C. N. De Witt, Los Angeles, Calif. Collodion coating composition. 1,682,957; Sept. 4.

Gartner, John H., San Francisco, Calif., assignor of one-fifth to P. S. Higgins, one-fifth to J. D. Skelly, and one-fifth to W. Shackleton. Tire-pressure indicator. 1,683,343; Sept. 4.

Gebhard, Louis A., Washington, D. C., assignor to Wired Radio, Inc., New York, N. Y. Piezo-electric crystal-controlled oscillator. 1,683,130; Sept. 4.

Geddes, David, Berkley, Calif. Feed regulator. 1,682,958; Sept. 4.

Geigy, J. R., S. A. (See Lacuger, Paul, assignor.)

Geiger, William A., assignor to W. H. Miner, Inc., Chicago, Ill. Car construction. 1,683,386; Sept. 4.

General Electric Company. (See Anderson, Arvid E., assignor.)

General Electric Company. (See Baker, Walter R. G., assignor.)

General Electric Company. (See Biermanns, Josef, assignor.)

General Electric Company. (See Brown, Herbert D., assignor.)

General Electric Company. (See Brown, Walter W., assignor.)

General Electric Company. (See Brückel, Waldemar, assignor.)

General Electric Company. (See Byles, Frank A. assignor.)

General Electric Company. (See Falcke, E., and Lehmann, assignors.)

General Electric Company. (See Hall, Chester I., assignor.)

General Electric Company. (See Heisler, Charles L., assignor.)

General Electric Company. (See Hull, Albert W., assignor.)

General Electric Company. (See Kearsley, William K., assignor.)

General Electric Company. (See Kearsley, William K., jr., assignor.)

General Electric Company. (See Kempton, Leslie A., assignor.)

General Electric Company. (See Macloskie, G., and Ives, assignors.)

General Electric Company. (See Runner, Claude C., assignor.)

General Electric Company. (See Tengström, H., and Bühring, assignors.)

General Electric Company. (See Thomson, Elihu, assignor.)

General Electric Company. (See Weber, Louis J., assignor.)

General Electric Company. (See Wilson, C. E., and Huenerkopf, assignors.)

General Motors Corporation. (See Jack, Robert K., assignor.)

General Motors Corporation. (See Scese, John E., assignor.)

General Motors Corporation. (See Tenney, Perry L., assignor.)

General Motors Research Corporation. (See Astre, Horace W., assignor.)

General Motors Research Corporation. (See Hughes, Victor, assignor.)

General Motors Research Corporation. (See Hunt, John H., assignor.)

General Motors Research Corporation. (See Short, C. R., and Hughes, assignors.)

General Motors Research Corporation. (See Short, Charles R., assignor.)

General Motors Research Corporation. (See Summers, Caleb E., assignor.)

General Tire & Rubber Company, The. (See Jahant, Charles J., assignor.)

Geometric Tool Co., The. (See Breitenstein, Albert F., assignor.)

George, Ross F., Seattle, Wash. Pen clamp and reservoir. 1,683,030; Sept. 4.

Germond, Henry S., jr., Bayonne, N. J., and H. Green, Yonkers, N. Y., assignors to said Green. Portable elevator. 1,683,457; Sept. 4.

Gesellschaft für Drahtlose Telegraphie m. b. H. (See Osnos, Mendel, assignor.)

Geyer, Harvey D., assignor to The Inland Manufacturing Company, Dayton, Ohio. Steering wheel. 1,683,344; Sept. 4.

Geyer, Harvey D., assignor to The Inland Manufacturing Company, Dayton, Ohio. Ice-cream-cabinet lid and manufacturing the same. 1,683,345; Sept. 4.

Gibbs, William E., East Orange, N. J. Cone speaker. 1,683,178; Sept. 4.

Gibson, Helen M., et al. (See Gibson, Howard S., assignor.)

Gibson, Howard S., assignor of one-fourth to D. F. Asbury and three-fourths to H. M. Gibson, Washington, D. C. Vehicle washing machine. 1,682,902; Sept. 4.

Gibson, Stephen A., Hereford, Ariz. Motor vehicle. 1,682,782; Sept. 4.

Gilbert, Ernest H. (See Coburn, W. H., and Kiernan, assignors.)

Giles, John W., Greer, S. C., assignor to Crompton & Knowles Loom Works, Worcester, Mass. Reversible loom lobby knife. 1,683,179; Sept. 4.

Gillett, Harry. (See Loucks, James F., assignor.)

Gilson, Robert M., Pittsburgh, assignor to The Union Switch & Signal Company, Swissvale, Pa. Electrical relay. 1,682,749; Sept. 4.

Ginter, Paul A., assignor to The American Bottle Company, Toledo, Ohio. Bottle. Des. 76,231; Sept. 4.

Ginter, Paul A., assignor to The American Bottle Company, Toledo, Ohio. Bottle. Des. 76,232; Sept. 4.

Gits, Remi J., Riverside, Ill. Metal molding. 1,683,346; Sept. 4.

Glair, Harry F., and O. E. Brausky, assignors to Standard Oil Company, Whiting, Ind. Refining oil. 1,683,289; Sept. 4.

Gleason Works. (See Bullock, E. W., and Bryan, assignors.)

Glover, William B., and W. H. Richardson, Subiaco, near Perth, Western Australia, Australia. Spring buffer for motor vehicles. 1,683,541; Sept. 4.

Golden, Louis J., assignor to R. & H. Shoe Company, Chicago, Ill. Baby shoes. Des. 76,233; Sept. 4.

Goldberg, Solomon H. (See Willi, Frederick D., assignor.)

Golfada Company, The. (See Walker, Norman S., assignor.)

Golightly, William J., Kokomo, Ind., assignor to Pittsburgh Plate Glass Company. Apparatus for forming and handling clay pots. 1,683,245; Sept. 4.

Goodman, Henry. (See Remmers, Harry C., assignor.)

Goodrich, B. F., Company, The. (See Annis, Burton B., assignor.)

Goodrich, B. F., Company. (See Waner, Harry E., assignor.)

Gordon, Lawrence E., assignor to Virginia Table Company, Incorporated, Marion, Va. Chair back or similar article. Des. 76,234; Sept. 4.

Gottlieb, Leo R. (See Hatcher, Josh, assignor.)

Goudey Gum Company, The. (See Peterson, Erland F., assignors, by mesne assignments, to Shaw Crane-Putnam Machine Company, Inc. Quartering and thirding attachment. 1,683,290; Sept. 4.

Gough, Arthur C., and V. Charnshin, Fitchburg, Mass., Graham, Tom C., assignor to The Embossing Company, Albany, N. Y. Domino. Des. 76,235; Sept. 4.

Grant, Richard F., et al. (See Wetherbee, Herbert E., assignor.)

Gray, Harry L., and C. J. Staud, assignors to Eastman Kodak Company, Rochester, N. Y. Making chloroform-soluble cellulose acetate. 1,683,347; Sept. 4.

Grayson, Lloyd, Grafton, W. Va. Thermal-circuit closer. 1,682,959; Sept. 4.

Green, Harold. (See Germond, H. S., jr., and Green.)

Greene, J. Oldham. (See Turner, Howard B., assignor.)

Greenhouse, Samuel, Akron, Ohio. Float-controlled valve. 1,683,180; Sept. 4.

Greenwood, George W., Wilmington, Del., assignor to Stephen F. Whitman & Son, Inc., Philadelphia, Pa. Candy package. 1,683,542; Sept. 4.

Griffiths, Richard T., assignor to The Miller Rubber Company, Akron, Ohio. Bottle nipple. 1,683,246; Sept. 4.

Grothe, Verner G. H., assignor to H. L. Fagley, St. Paul, Minn. Screed support. 1,683,247; Sept. 4.

Grotnes, Charles G., Chicago, Ill. Barrel-making machine. 1,683,248; Sept. 4.

Groves, John D., Milltown, assignor of one-third to L. R. Groves, East Millinocket, Me. Automatic box lock for drop-box looms. 1,683,543; Sept. 4.

Groves, Lemuel R. (See Groves, John D., assignor.)

Gruenfeldt, Emil, assignor to The Rail Welding and Bonding Company, Cleveland, Ohio. Fishplate for railway rails. 1,682,960; Sept. 4.

Gsell, Eugène, assignor to Wallace & Co., Brooklyn, N. Y. Box. Des. 76,236; Sept. 4.

Gulbenkian Seamless Rug Company. (See Smith, William E., assignor.)

Gunderman, Lester S., Pittsburgh, Pa. Toy. 1,683,131; Sept. 4.

Gunn, Earl G., assignor to Packard Motor Car Company, Detroit, Mich. Motor-vehicle brake. 1,682,783; Sept. 4.

Guth, Edwin F., Company, The. (See Owen, Raymond V., assignor.)

Guyton & Cumfer Mfg. Co. (See McFarland, Owen D., assignor.)

Gythfeldt, Trygve, Stjordalen, Norway. Dental drilling apparatus. 1,682,784; Sept. 4.

Haas, John H., sr. (See Francois, Clifford J., sr., assignor.)

Haas, Lucien L. (See MacKenzie, R. J., and Haas.)

Hackney Brothers, Inc. (See Berthel, Charles J., assignor.)

Hadaway, William S., jr., New Rochelle, N. Y. Steam press for clothes. 1,682,903; Sept. 4.

Haldeman, Walter S., Chicago, Ill., assignor, by mesne assignments, to The Berger Manufacturing Company, Canton, Ohio. Concrete-floor mold. 1,682,750; Sept. 4.

Hall, Charles S., Oakland, Calif. Pressure, temperature, and volume indicating and controlling means for aircraft. 1,682,961; Sept. 4.

Hall, Chester I., Fort Wayne, Ind., assignor to General Electric Company. Electric switch. 1,683,132; Sept. 4.

Hall Draft Gear Corporation. (See Sherman, C. W., and Hall, assignors.)

Hall, Harry G., Williams, Ariz. Cleaning device for false teeth. 1,683,458; Sept. 4.

Hall, Joseph M. (See Sherman, C. W., and Hall.)

Hallerman, Frank W. A., St. Louis, Mo., assignor to National Lead Company, Jersey City, N. J. Method and apparatus for applying coating to the inside of paint buckets. 1,682,751; Sept. 4.

Halliwell, John J., Tuckahoe, assignor to R. Hoe & Co., Inc., New York, N. Y. Late-news and color printing mechanism. 1,683,133; Sept. 4.

Hamann, Fred, et al. (See Jackson, Merlin M., assignor.)

Hamer, James H., Bolton, assignor to James L. Rushton, Bolton, Lancashire, England. Rotary pump and the like. 1,682,842; Sept. 4.

Hamm, William S., Hubbard Woods, Ill., assignor to The Adams & Westlake Company. Electric lantern. 1,683,348; Sept. 4.

Hammer, Charles, Hollis Court Boulevard, assignor to American Metal Cap Company, Brooklyn, N. Y. Combined cap or closure and liner plate. 1,683,387; Sept. 4.

Hammer, Charles, Hollis Court Boulevard, assignor to American Metal Cap Company, Brooklyn, N. Y. Combined lug cap and liner plate. 1,683,388; Sept. 4.

Hanau, Rudolph L., Buffalo, N. Y. Dental manikin. 1,682,904; Sept. 4.

Handy, Levin G., Mountain View, N. J., assignor, by mesne assignments, to Voices Incorporated, Wilmington, Del. Voice device. 1,682,962; Sept. 4.

Hanks, Marshall W., and M. Mason, Madison, Wis., assignors to Hankscraft Company. Liquid-conductor heater device. 1,683,069; Sept. 4.

Hanks, Marshall W., Madison, Wis. Liquid-conductor heater and operating same. 1,683,070; Sept. 4.

Hanks, Marshall W., and M. Mason, Madison, Wis., assignors to Hankscraft Company. Liquid-conductor heater and operating same. 1,683,071; Sept. 4.

Hankscraft Company. (See Hanks, M. W., and Mason, assignors.)

Hanna, Howard M., et al. (See Wetherbee, Herbert E., assignor.)

Hanney, Angus F., assignor to Gammell-Hanney Mfg. Co., Chicago, Ill. Sorting machine. 1,683,249; Sept. 4.

Hansen, Christian L., Charles City, Iowa. Sectional pipe, conduit, or culvert unit. 1,683,544; Sept. 4.

Hanson, Harry C., St. Paul, Minn. Coveralls. 1,682,785; Sept. 4.

Hanson, Miles G., assignor to The Dura Company, Toledo, Ohio. Connection between closures and control arms of window regulators. 1,683,459; Sept. 4.

Hardy, L. P., Co. (See Hardy, Wade L., assignor.)

Hardy, Wade L., assignor to L. P. Hardy Co., South Bend, Ind. Mailing and display carton. 1,682,963; Sept. 4.

Harris, Gordon D., Freeport, N. Y., assignor to The Industrial Dryer Corporation, Stamford, Conn. Conditioning coated materials. 1,682,752; Sept. 4.

Harris, Gustav L., St. Louis, Mo. Traffic signal. 1,682,753; Sept. 4.

Harris, Mark, Birmingham, Mich., assignor to American Steel Foundries, Chicago, Ill. Connecter for spring brakes. 1,682,786; Sept. 4.

Harris, Ray A., North Windham, Conn. Article of jewelry. 1,683,545; Sept. 4.

Harris, William O., Oklahoma City, Okla. Oil and gas well sand tester. 1,683,031; Sept. 4.

Harrison, Ellen L., New York, N. Y. Pincushion. Des. 76,237; Sept. 4.

Hartmann, August. (See Otto, G., Hartmann, and Bauriedel.)

Hartway, Harvey M., Highland Park, Mich. Miter box. 1,683,460; Sept. 4.

Haseltine, Stacy B., Chicago, Ill., assignor, by mesne assignments, to W. H. Miner, Inc. Hand brake for railway cars. 1,683,461; Sept. 4.

Haseltine, Stacy B., assignor to W. H. Miner, Inc., Chicago, Ill. Antifriction bearing. 1,683,462; Sept. 4.

Haskell, Henry L., assignor to The Carron Company, Ludington, Mich. Folding table. 1,682,754; Sept. 4.

Haskell, John D., assignor to Dilts Machine Works Incorporated, Fulton, N. Y. Beating engine. 1,683,546; Sept. 4.

Hatcher, Josh, assignor of two-thirds to L. R. Gottlieb, Cokedale, Colo. Clothespin bag. 1,683,032; Sept. 4.

Haugh, James G., Bascom, Ohio. Ironing table. 1,683,291; Sept. 4.

Hawley, Charles G., assignor to Locomotive Firebox Company, Chicago, Ill. Locomotive-boiler fire box. 1,682,964; Sept. 4.

Hayes Mfg. Co. (See Reichel, Alvin S., assignor.)

Haymaker, Arthur M., Pittsburgh, Pa. Automatic animal trap. 1,683,181; Sept. 4.

Haynes, Charles M. (See Clier, Quinby, assignor.)

Hazeltine Corporation. (See MacDonald, William A., assignor.)

Hazzard, Oliver T., St. Louis, Mo. Brush. Des. 76,238; Sept. 4.

Healey, Albert. (See Klein, P., and Healey.)

Healy, Ellis C., East Orange, N. J., assignor to International Paper Company. Hoisting mechanism. 1,683,463; Sept. 4.

Hebern, Edward H., Oakland, Calif., assignor, by mesne assignments, to International Code Machine Company, Reno Nev. Electric code machine. 1,683,072; Sept. 4.

Hein, George N., San Francisco, Calif. Hypodermic syringe and means for retaining same. 1,683,349; Sept. 4.

Hein, George N., San Francisco, Calif. Lock for hypodermic needles and the like. 1,683,350; Sept. 4.

Heinitz, Woldemar, Chemnitz, Germany. Straight-knitting frame. 1,682,965; Sept. 4.

Heinke, Alfred J., Towaco, N. J., assignor to H. R. Mallinson & Co. Inc., New York, N. Y. Textile fabric or similar article of manufacture. Des. 76,239; Sept. 4.

Heisler, Charles L., Schenectady, N. Y., assignor to General Electric Company. Compressor. 1,683,182; Sept. 4.

Helgeby, Ralph O., assignor to A C Spark Plug Company, Flint, Mich. Speedometer-drive adapter. 1,683,033; Sept. 4.

Heltzel, Francis O., Youngstown, Ohio. Nonskid mat for pneumatic tires. Des. 76,240; Sept. 4.

Heltzel, Joseph W., Warren, Ohio. Grooving plastic material. 1,683,292; Sept. 4.

Hemphill Company. (See Gagne, Augustine, assignor.)

Henderson, James B., Lee, England. Sighting device. 1,683,073; Sept. 4.

Henricks, Harold H., Chicago, Ill., assignor to The Youngstown Steel Door Company, Cleveland, Ohio. Door-operating mechanism. 1,683,464; Sept. 4.

Herr, Herbert T., Merion, Pa., assignor to Westinghouse Electric & Manufacturing Company. Shaft bearing. 1,683,351; Sept. 4.

Herr, John, near Lebanon, Ind. Seed harvester. 1,683,183; Sept. 4.

Herthel, Eugene C. (See Isom, E. W., and Herthel.)

Herthel, Eugene C., Chicago, Ill., assignor to Sinclair Refining Company, New York, N. Y. Apparatus for cracking hydrocarbons. 1,683,184; Sept. 4.

Hewett, Charles A., Colorado, Tex. Game apparatus. 1,683,185; Sept. 4.

Hicks, John N. (See Sevens, C., and Hicks.)

Hiering, William C., assignor to J. E. Mergott Co., Newark, N. J. Bag fastener. 1,683,074; Sept. 4.

Higgins, Patrick S., et al. (See Gartner, John H., assignor.)

Hilde, Ole L., Minneapolis, Minn. Traffic signal. Des. 76,241; Sept. 4.

Hildebrand, Bud. (See Ochs, C., and Hildebrand.)

Hill, Earl V., Chicago, Ill. Thermostat control for radiator valves. 1,682,905; Sept. 4.

Hill, William L., Leicester, England. Boot or shoe. 1,683,465; Sept. 4.

Hires Auto Awning Company. (See Hires, Joseph D., assignor.)

Hires, Joseph D., Luxora, assignor to Hires Auto Awning Company, Incorporated, Blytheville, Ark. Sun shield. 1,683,186; Sept. 4.

Hirner, Emil A., Allentown, Pa. Wringer. 1,683,352; Sept. 4.

Hitchcock, Halbert K., Pittsburgh, Pa., assignor to Pittsburgh Plate Glass Company. Apparatus for holding glass plates upon grinding and polishing tables. 1,683,250; Sept. 4.

Hoe, R., & Co. (See Halliwell, John J., assignor.)

Hoffman, Leon F. (See Moody, J. C., and Hoffman.)

Hogan, George F., Chicago, Ill. Envelope. 1,683,584; Sept. 4.

Holdsworth, Fred D., Claremont, N. H., assignor to Sullivan Machinery Company. Valve mechanism. 1,682,906; Sept. 4.

Holdsworth, Fred D., Claremont, N. H., assignor to Sullivan Machinery Company. Valve mechanism. 1,682,907; Sept. 4.

Hole, Willis R., Salem, Ohio. Mail-car device. 1,683,547; Sept. 4.

Hollar, William H., jr., Drexel Hill, and W. G. Uhlman, Philadelphia, Pa. Key envelope. 1,682,755; Sept. 4.

Hollenback, George M., Los Angeles, Calif. Paralleling mechanism. 1,683,353; Sept. 4.

Holmes, Elbridge R., assignor to Crompton & Knowles Loom Works, Worcester, Mass. Adjustable loom reed. 1,683,187; Sept. 4.

Holmes, Robert E. L., assignor to Westco-Chippewa Pump Company, Davenport, Ia. Rotary-pump casing. 1,682,756; Sept. 4.

Honstain, Vernon G., and A. Smithson, Minneapolis, Minn. Grinding-machine attachment. 1,683,354; Sept. 4.

Hopkins, Earnest R., Kansas City, Mo. Weather strip. 1,683,355; Sept. 4.

Hopkins, Robert C., Alliance, Ohio. Oil separator. 1,682,757; Sept. 4.

Hopkins, Robert C., Alliance, Ohio. Recuperator. 1,683,577; Sept. 4.

Hoppes, John J., Springfield, Ohio. Water wheel. 1,682,966; Sept. 4.

Horigan, Joseph A., Kansas City, Mo. Capsule. 1,683,466; Sept. 4.

Horlick, William, jr., Racine, Wis. Can closure and sealing means. 1,683,034; Sept. 4.

Hornecker, George, Elmhurst, assignor, by mesne assignments, to Conwell Graphic Company, Incorporated, New York, N. Y. Display device. 1,682,758; Sept. 4.

Hotchkiss, Clifford. (See Phelan, L. A. M., and Hotchkiss.)

Houle, Francis T., assignor to Biddle & Smart Company, Amesbury, Mass. Vehicle body. 1,683,467; Sept. 4.

Howell, James W., assignor to The White Motor Company, Cleveland, Ohio. Bearing puller. 1,683,188; Sept. 4.

Howell, James W., assignor to The White Motor Company, Cleveland, Ohio. Bearing puller. 1,683,189; Sept. 4.

Hoyle, John, and S. T. Short, Buchanan County, Iowa. Rake attachment for cultivators. 1,682,967; Sept. 4.

Huenerkopf, Henry. (See Wilson, C. E., and Huenerkopf.)

Hughes, Charles H., assignor of one-half to H. C. Denny, Denver, Colo. Automobile spring snubber. 1,683,075; Sept. 4.

Hughes, James R., and W. H. Weber, assignors to The Studebaker Corporation, South Bend, Ind. Radiator cap. Des. 76,242; Sept. 4.

Hughes, Victor, assignor to General Motors Research Corporation, Detroit, Mich. Making drag links. 1,683,035; Sept. 4.

Hughes, Victor, assignor to General Motors Research Corporation, Detroit, Mich. Speedometer drive. 1,683,036; Sept. 4.

Hughes, Victor. (See Short, C. R., and Hughes.)

Hughey, Irvin M. (See Hughey, V. D., Mullins, and Hughey.)

Hughey, Richard A., Sprott, Ala. Pipe collar. 1,683,548; Sept. 4.

Hughey, Virgil D., O. R. Mullins, and I. M. Hughey, Calhoun, Ga. Pan lifter. 1,683,190; Sept. 4.

Hull, Albert W., Schenectady, N. Y., assignor to General Electric Company. Amplifier. 1,683,134; Sept. 4.

Hull, Luther J., et al. (See Mulligan, Paul C., assignor.)

Hume, David. (See Durham, J. E., jr., and Hume.)

Hump Hairpin Manufacturing Company, The. (See Will, Frederick D., assignor.)

Hunt, John H., Detroit, Mich., assignor to General Motors Research Corporation, Dayton, Ohio. Ignition system. Re17,074; Sept. 4.

Huntley, George J., Baltimore, Md., assignor, by mesne assignments, to Crown Cork & Seal Company, Inc., New York, N. Y. Liquid gauge. 1,683,191; Sept. 4.

Hurlbut, Ira E., Prairie du Chien, Wis. Core member for casting printing plates. 1,683,356; Sept. 4.

Huth, Dr. Erich F., Ges. m. b. H. (See Cohn, Henry, assignor.)

Huye, Joseph G., New Orleans, La. Box. 1,683,192; Sept. 4.

Hygienic Fibre Company. (See Remley, Ernest, assignor.)

Hygienol Co. Inc., The. (See Raynor, Louis L., assignor.)

Idealite Electric Lamp Shade Mfg. Co. (See Lustig, Alex, assignor.)

Industrial Dryer Corporation, The. (See Harris, Gordon D., assignor.

Inland Manufacturing Company. (See Chilton, Ralph H., assignor.

Inland Manufacturing Company. (See Geyer, Harvey D., assignor.

International Code Machine Company. (See Hebern, Edward H., assignor.)

International Paper Company. (See Healy, Ellis C., assignor.)

Irving-Pitt Manufacturing Company. (See Conger, Claude M., assignor.)

Irwin & Company. (See Cohn, Irwin, assignor.)

Isom, Edward W., Winnetka, assignor to Sinclair Refining Company, Chicago, Ill. Distillation of petroleum. 1,683,135; Sept. 4.

Isom, Edward W., Scarsdale, N. Y., and E. C. Herthel, Chicago, Ill., assignors to Sinclair Refining Company, New York, N. Y. Distillation of crude petroleum. 1,683,193; Sept. 4.

Ives, Charles A. (See Macloskie, G., and Ives.)

Jack, Robert K., Lansing, Mich., assignor to General Motors Corporation, Detroit, Mich. Engine. 1,683,039; Sept. 4.

Jackson, Merlin M., assignor to F. Hamann and G. I. Lang, San Jose, Calif. Clothes washing and wringing machine. 1,683,037; Sept. 4.

Jacob, William G. R. (See Smith, W. S., McLachlan, and Jacob.)

Jacobi, Emil R., and F. H. Le Jeune, Jackson, assignors by mesne assignments, to Kelsey-Hayes Wheel Corporation, Detroit, Mich. Making metal wheels. 1,682,909; Sept. 4.

Jacobus, David S., Jersey City, assignor to The Babcock & Wilcox Company, Bayonne, N. J. Water-level indicator. 1,682,843; Sept. 4.

Jaeger, Alphons O., assignor to The Selden Company, Pittsburgh, Pa. Catalytic apparatus. 1,682,787; Sept. 4.

Jaeger, Gebhard, Columbus, Ohio. Jacking device for vehicle beds. 1,682,910; Sept. 4.

Jahant, Charles J., assignor to The General Tire & Rubber Company, Akron, Ohio. Golf club. Re17,076; Sept. 4.

Jandus, Herbert S., and J. R. Morgan, assignors to The C. G. Spring & Bumper Company, Detroit, Mich. Clamp plate for vehicle bumpers. Des. 76,243; Sept. 4.

Jandus, Herbert S., and J. R. Morgan, assignors to The C. G. Spring & Bumper Company, Detroit, Mich. Clamp plate for vehicle bumpers. Des. 76,244; Sept. 4.

Janette, John T., Chicago, Ill. Mortor and pump. 1,682,788; Sept. 4.

Janette, John T., Chicago, Ill. Controlling apparatus. 1,682,789; Sept. 4.

Janette, John T., Chicago, Ill. Electrical contact. 1,682,790; Sept. 4.

Jarvis, William B., Grand Rapids, Mich. Radiator cap. 1,683,038; Sept. 4.

Jarvis, W. B., Company. (See Chapel, George L., assignor.)

Jefferies, Ernest S., Hamilton, Ontario, Canada. Electric metal-stock heater. 1,682,968; Sept. 4.

Jenkins, Bessie A., administratrix. (See Aarvig, Rasmus.)

Jenkins, Charles F., Washington, D. C. Method of and apparatus for converting light impulses into graphic representations. 1,683,136; Sept. 4.

Jenkins, Charles F., Washington, D. C. Method of and apparatus for converting light impulses into enlarged graphic representations. 1,683,137; Sept. 4.

Johnson, Percy G., and H. R. Morgan, assignors to Victaulic Company Limited, London, England, Spigot and socket pipe joint. 1,683,076; Sept. 4.

Jonas, Richard A., Brooklyn, N. Y. Indexing. 1,683,468; Sept. 4.

Jones, Ernest P., Pulaski, Tenn. Scrubbing mop. 1,683,549; Sept. 4.

Jordan, O. F., Company. (See Protzeller, Harry W., assignor.)

Jorgensen, Edmund N., Chicago, Ill., assignor to Western Electric Company, Incorporated, New York, N. Y. Material-working mechanism. 1,682,911; Sept. 4.

Joyce, Charles S., Brooklyn, N. Y. Valve for internal-combustion engines. 1,683,077; Sept. 4.

Judge, Edward J. (See Cutler, Peirce, assignor.)

Junkers, Hugo. (See Retschy, Curt, assignor.)

Junkers, Hugo, Dessau, Germany. Working oil engine. 1,683,040; Sept. 4.

K-W Ignition Corporation, The. (See Mallory, Marion, assignor.)

K-W Ignition Corporation, The. (See Williams, J. A., and Karkau, assignors.)

Kaehni, Frank J. and W. L., Cleveland, Ohio. Transformer. 1,683,389; Sept. 4.

Kaehni, William L. (See Kaehni, Frank J and W. L.)

Kauffman, Wilbur K., assignor to Deca-Disc Phonograph Company, Waynesboro, Pa. Record holder for talking machines. 1,683,469; Sept. 4.

Kägi, Emil, assignor to the firm Sulzer Freres Societe Anonyme, Winterthur, Switzerland. Compressor. 1,683,390; Sept. 4.

Kaiser, Charles. (See Boman, C. W., and Kaiser.)

Karkau, Albert G. (See Williams, J. A., and Karkau.)

Karn, Mack L., Pontiac, Mich. Fastener for safety calk web. 1,683,041; Sept. 4.

Kautz, William, Willard, Ohio. Fire escape. 1,683,138; Sept. 4.

Kay, Arthur G., Wellesley, assignor to Powdrell & Alexander, Inc., Boston, Mass. Sewing-machine attachment. 1,683,078; Sept. 4.

Kearsley, William K. jr., Schenectady, N. Y., assignor to General Electric Company. Vibrating regulator. 1,683,139; Sept. 4.

Kearsley, William K., Schenectady, N. Y., assignor to General Electric Company. Regulating system for thermionic devices. 1,683,194; Sept. 4.

Keech, Dana E., Los Angeles, Calif. Toast inspector. 1,683,550; Sept. 4.

Keller Mechanical Engineering Corporation. (See Shaw, John C., assignor.)

Keller Mechanical Engineering Corporation. (See Shaw, John C. and R. D., assignors.)

Kelley, Victor H., Madison, Wis. Variety vending machine. 1,683,251; Sept. 4.

Kelly, William M., Westfield, assignor to American Type Founders Company, Jersey City, N. J. Sheet-feeding mechanism. 1,683,195; Sept. 4.

Kelsey-Hayes Wheel Corporation. (See Jacobi, E. R., and Le Jeune, assignors.)

Kelsey Wheel Company. (See Battle, Joseph E., assignor.)

Kempton, Curtis W. (See Moody, V. H., and Kempton.)

Kempton, Leslie A., Bridgeport, Conn., assignor to General Electric Company. Electric heating system. 1,683,196; Sept. 4.

Kendall, William G., Newark, N. J. Vanity case. 1,683,551; Sept. 4.

Kendall, William G., Newark, N. J. Compact-plate-holding ring. 1,683,552; Sept. 4.

Kent, Arthur A. (See Appleby, Thomas, assignor.)

Kenyon, Roland D., Carthage, N. Y. Potato-baking device. 1,683,554; Sept. 4.

Kerr, Alva L., Mansfield, Ohio. Latching mechanism. 1,683,553; Sept. 4.

Kertes, John, Pittsburgh, Pa. Removable fireplace. 1,683,079; Sept. 4.

Kewaskum Aluminum Company. (See Rosenheimer, Adolph L., jr., assignor.)

Key Boiler Equipment Co. (See Key, Frederick E., assignor.)

Key, Frederick E., assignor to Key Boiler Equipment Co., East St. Louis, Ill. Valve. 1,683,555; Sept. 4.

Keyser, Leroy F., Akron, Ohio. Roll garter. 1,682,912; Sept. 4.

Kiernan, Charles. (See Coburn, W. H., and Kiernan.)

Kindervater, Julius, New York, N. Y. Main-rod bearing. 1,682,969; Sept. 4.

Kingman, Russell B., Orange, N. J. Metallic abrasive scouring device. 1,683,357; Sept. 4.

Kingman, Russell B., Orange, assignor to Useful Products Company, West Orange, N. J. Indicator for memory-checking devices. 1,683,358; Sept. 4.

Klausmeyer, David C., assignor to The Cincinnati Bickford Tool Company, Cincinnati, Ohio. Box-column-type upright drill. 1,682,844; Sept. 4.

Klein, Paul, Budapest, Hungary, and A. Healey, Birmingham, England, assignors to The American Anode Incorporated, New York, N. Y. Direct production of rubber goods from rubber dispersions. 1,683,588; Sept. 4.

Klepetko, Ernest. (See Morrow, B. S., and Klepetko.)

Klopsteg, Paul E., assignor to Central Scientific Company, Chicago, Ill. Vacuum oven. 1,683,359; Sept. 4.

Knapp, Ray, Buffalo, N. Y. Mixer. 1,682,970; Sept. 4.

Knisley, Harry M., C. A. Creswell, and H. F. Messer, Lancaster, Pa. Headlight-shifting mechanism. 1,683,556; Sept. 4.

Knopf, Carl, Hamburg, Germany. Production of waterproof textile material, paper, and the like. 1,683,470; Sept. 4.

Kocourek, Henry, assignor to Chicago Flexible Shaft Company, Chicago, Ill. Hand guard for sheep shears. 1,682,759; Sept. 4.

Kohl, Wesley G., Iowa City, Iowa. Poultry-record calendar. 1,683,140; Sept. 4.

Kokemiller, Carl F., Story City, Iowa. Tank gauge. 1,683,557; Sept. 4.

Kolster, Frederick A., Palo Alto, Calif. Variable condenser. 1,683,558; Sept. 4.

Kolster, Frederick A., Palo Alto, assignor to Federal Telegraph Company, San Francisco, Calif. Radio receiving system. 1,683,080; Sept. 4.

Kolster, Frederick A., Palo Alto, assignor to Federal Telegraph Company, San Francisco, Calif. Variable-coupling transformer. 1,683,081; Sept. 4.

Kopp Glass, Inc. (See Kopp, Nicholas, assignor.)

Kopp, Nicholas, Pittsburgh, assignor to Kopp Glass, Inc., Swissvale, Pa. Glass vase. Des. 76,245; Sept. 4.

Koppe, Alexander T., assignor to Directoplate Corporation, Chicago, Ill. Photo-composing machine. 1,682,845; Sept. 4.

Kraft, Henry P., deceased, Ridgewood, N. J.; E. J. Phillips and E. A. Darr, executors. Pressure gauge. 1,683,471; Sept. 4.

Kratz, Howard L., assignor to John Wanamaker Philadelphia, Philadelphia, Pa. Folding screen for a room. Des. 76,246; Sept. 4.

Kremers, Harry C., Urbana, Ill. Electrolytic rectifier. 1,682,846; Sept. 4.

Krogan, Abner H., Stanley, Wis. Corn cutter. 1,683,042; Sept. 4.

Lieuger, Paul, assignor to the firm of J. R. Geigy S. A., Basel, Switzerland. Manufacture of acid dyestuffs of the phenonaphthosafranine series. 1,683,559; Sept. 4.

Laflin, James E., Berlin, N. H., assignor, by mesne assignments to Chemicolor Wood Preserving Co. Treating trees. 1,682,760; Sept. 4.

Lage, Ernst A., Wandsbek, near Hamburg, Germany. Production of photographic plates, films, and the like for indirect three-color photography. 1,683,560; Sept. 4.

Lake Lithograph Company, The. (See Ferguson, J. E., and Mooney, assignors.)

Lakewood Engineering Company, The. (See Carr, Edward G., assignor.)

Lane, Henry M., Detroit, Mich. Ladle crane. 1,683,472; Sept. 4.

Lane Manufacturing Company. (See Pitkin, George D., assignor.)

Lang, Glen I., et al. (See Jackson, Merlin M., assignor.)

Lang, Henry T., assignor to Electric Vacuum Cleaner Company, Inc., Cleveland, Ohio. Handle construction for electric vacuum cleaners and the like. 1,683,197; Sept. 4.

Lansing, Raymond P., Montclair, N. J., assignor, by mesne assignments, to Eclipse Machine Company, New York, N. Y. Engine-starting apparatus. 1,682,971; Sept. 4.

Larrabee, John E. (See Foresman, R. A., and Larrabee.)

Lavoisier, Ian J., New Orleans, La., assignor by mesne assignments, to The Burdick Corporation, Milton, Wis. Electric-arc lamp. 1,682,847; Sept. 4.

Lawrence, George R., Chicago, Ill. Hygrostat. 1,682,915; Sept. 4.

Lawson, Lindley S., assignor to Lawson Manufacturing Company, Pittsburgh, Pa. Heater. 1,683,082; Sept. 4.

Lawson Manufacturing Company. (See Lawson, Lindley S., assignor.)

Layman, Frank E., and L. T. Richardson, assignors to The Cutler-Hammer Mfg. Co., Milwaukee, Wis. Sound-record composition. 1,682,913; Sept. 4.

Layman, Frank E., and L. T. Richardson, Milwaukee, and O. A. Cherry, Wauwatosa, assignors to The Cutler-Hammer Mfg. Co., Milwaukee, Wis. Molding plastic bodies. 1,682,914; Sept. 4.

Lea, Charles, assignor to The Automatic Merchandizer Inc., Boston, Mass. Vending machine. 1,683,360; Sept. 4.

Len, Charles, assignor to The Automatic Merchandizer Inc., Boston, Mass. Coin-controlled mechanism. 1,683,361; Sept. 4.

Lebby, States L., assignor to Corning Glass Works, Corning, N. Y. Electric incandescent lamp. 1,682,916; Sept. 4.

Ledwinka, Joseph, assignor to Edward G. Budd Manufacturing Company, Philadelphia, Pa. Automobile body. Des. 76,247; Sept. 4.

Ledwinka, Joseph, assignor to Edward G. Budd Manufacturing Company, Philadelphia, Pa. Automobile body side. Des. 76,248; Sept. 4.

Ledwinka, Joseph, assignor to Edward G. Budd Manufacturing Company, Philadelphia, Pa. Automobile body front. Des. 76,249; Sept. 4.

Lefranc, Jacques, assignor to Societe des Brevets Etrangers Lefranc & Cie., Paris, France. Extraction of butyric acid and its homologues. 1,683,198; Sept. 4.

Lehmann, Kurt. (See Falcke, E., and Lehmann.)

Le Jeune, Frank H. (See Jacobi, E. R., and Le Jeune.)

Le Mur, S., Company, The. (See Lewis, Wilbur S., assignor.)

Lenfers, Harry, Evansville, Ind. Reversible light for automobiles. 1,683,141; Sept. 4.

Leonard, Foster A., et al. (See Thomas, William M., assignor.)

Le Roy, Bernard L. (See Beans, J. F., and Le Roy.)

Les Petits Fils de Francois de Wendel & Cie. (See Weber, Robert, assignor.)

Letson, Russell C., Los Angeles, Calif. Doll. 1,683,561; Sept. 4.

Lewis, Goodrich Q., Wheaton, assignor to W. H. Miner, Inc., Chicago, Ill. Friction shock-absorbing mechanism. 1,683,473; Sept. 4.

Lewis, John, Brownville, Me. Machine for manufacturing wooden spoons. 1,682,917; Sept. 4.

Lewis, Wilbur S., Lakewood, assignor to The S. Le Mur Company, Cleveland, Ohio. Permanent-waving apparatus. 1,682,972; Sept. 4.

Lilienfeld, Leon, Vienna, Austria. Artificial thread and making same. 1,683,199; Sept. 4.

Lilienfeld, Leon, Vienna, Austria. Artificial material and making same. 1,683,200; Sept. 4.

Lindbloom, Albert C., Chicago, Ill. Packing device for valve stems. 1,683,293; Sept. 4.

Linderman, Garrett B., jr., Erie, Pa., assignor to American Meter Company, Incorporated, New York, N. Y. Blower. 1,683,474; Sept. 4.

Lindquist, Edward, Omaha, Nebr. Sliding-jaw wrench. 1,683,201; Sept. 4.

Linga Company, The. (See Linga, Torbjorn, assignor.)

Linga, Torbjorn, assignor to The Linga Company, Waukegan, Ill. Carburetor. 1,682,761; Sept. 4.

Littell, Nelson, New York, N. Y. Process and apparatus for casting. 1,683,475; Sept. 4.

Locomotive Firebox Company. (See Hawley, Charles G., assignor.)

Löffler, Stephan, Berlin-Charlottenburg, Germany. Fluid-level indicator and leading-in arrangement for electrodes in hot high-pressure rooms. 1,683,362; Sept. 4.

Loftin, Edward H., trustee. (See Loftin, Edward H., assignor.)

Loftin, Edward H., Washington, D. C., assignor to E. H. Loftin, trustee. Amplifier of electrical currents. 1,683,083; Sept. 4.

Lord, Herbert Coventry, England. Gaiter for use on suspension springs. 1,683,363; Sept. 4.

Loucks, James F., Cleveland, assignor of one-half to H. Gillett, Gates Mills, Ohio. Clamping device. 1,683,364; Sept. 4.

Loudenslager, Henry and W. J., Columbus, Ohio. Street-manhole cover. 1,683,365; Sept. 4.

Loudenslager, Walter J. (See Loudenslager, Henry and W. J.)

Low, Archie E., Ottawa, Ontario, Canada. Mail-bag lock. 1,683,294; Sept. 4.

Lucklesh, Matthew, Cleveland, Ohio, L. C. Doane, Meriden, Conn., and A. Miller, Cleveland Ohio; said Doane and said Miller assignors to The Miller Company, Meriden, Conn. Shade holder. 1,682,918; Sept. 4.

Luebbers, Gerhardt L., Parma, Mo. Stump-pulling machine. 1,682,973; Sept. 4.

Lukens, Francis J., Washington, D. C. High-speed trackway. 1,682,974; Sept. 4.

Lustig, Alex, assignor to Idealite Electric Lamp Shade Mfg. Co., Inc., New York, N. Y. Lamp-shade frame. 1,683,585; Sept. 4.

Lyman, Louis, Cleveland, Ohio. Toy boat. Des. 76,250; Sept. 4.

MacDonald, William A., Little Neck, N. Y., assignor to Hazeltine Corporation, Jersey City, N. J. Electron-discharge device. 1,683,202; Sept. 4.

Macomber, Stanley, Massillon, assignor to The Macomber Steel Company, Canton, Ohio. Bar-bending machine. 1,683,366; Sept. 4.

Macomber Steel Company, The. (See Macomber, Stanley, assignor.)

Mackenzie, Fred L. (See Spinney, C. N., and Mackenzie.)

MacKenzie, Roy J., and L. L. Haas, assignors to Buffalo Pressed Steel Company, Buffalo, N. Y. Muffler. 1,683,084; Sept. 4.

Mackert, Charles, St. Anthony, Idaho. Pulley attachment. 1,683,562; Sept. 4.

Maclaren, James G., Mamaroneck, N. Y. Electrically-controlled dumb-waiter. 1,683,391; Sept. 4.
Macloskie, George, and C. A. Ives, Erie, Pa., assignors to General Electric Company. Car-door-control equipment. 1,683,142; Sept. 4.
Madigan, Thomas J., Brooklyn, N. Y. Thermoelectric control device. 1,683,252; Sept. 4.
Mallinson, H. R., & Co. Inc. (See Heinke, Alfred J., assignor.)
Mallory, Marion, Toledo, assignor, by mesne assignments, to The K-W Ignition Corporation, Cleveland, Ohio. Timer. 1,683,392; Sept. 4.
Malloy, James T., Oakland, R. I., assignor to Draper Corporation, Hopedale, Mass. Dobby for looms. 1,682,791; Sept. 4.
Maloney, John F., deceased, Woonsocket, R. I.; M. M. Maloney, administratrix. Knitting machine. 1,683,586; Sept. 4.
Maloney, Mary M., administratrix. (See Maloney, John F.)
Mantor, Inc. (See Oiler, Frank E., assignor.)
Manufacturers' Machine Company. (See Perdue, John C., assignor.)
Marquette Manufacturing Company. (See Burandt, G. A., and Nordgren, assignors.)
Marquette Tool & Mfg. Company. (See Rode, Fredrich J., assignor.)
Mason, Max. (See Hanks, M. W., and Mason.)
Maxim, Hudson, deceased, Hopatcong Borough, N. J.; L. Maxim, executrix. Generating motive fluid. 1,683,083; Sept. 4.
Maxim, Lillian, executrix. (See Maxim, Hudson.)
Maximoff, Alexander T., New York, N. Y., assignor to The Naugatuck Chemical Company, Naugatuck, Conn. Manufacture of erythrene. 1,682,919; Sept. 4.
Maximoff, Alexander T., New York, N. Y., assignor to The Naugatuck Chemical Company, Naugatuck, Conn. Manufacture of thiuram monosulphides. 1,682,920; Sept. 4.
Maynard, Albert E., assignor to American Optical Company, Southbridge, Mass. Lens cutter. 1,683,295; Sept. 4.
Maynard, Charles E., Northampton, assignor to The Fisk Rubber Company, Chicopee Falls, Mass. Producing rubber tubes. 1,682,923; Sept. 4.
McAdams, Harry, Philadelphia, Pa., assignor of one-half to J. W. Starr, 3d, Atlantic City, N. J. Circular-knitting machine. 1,683,203; Sept. 4.
McCahan, Ralph, Canton, Ohio. Printing-press chase. 1,682,762; Sept. 4.
McCaskey, Alfred S., Chicago, Ill. Grave marker. Des. 76,251; Sept. 4.
McConnell, Walter J., Cleveland, Ohio. Work and tool holder. 1,683,253; Sept. 4.
McCreary, Thomas W., assignor to The Phoenix Glass Company, Monaca, Pa. Fish bowl or similar article. Des. 76,252; Sept. 4.
McFarland, Owen D., assignor to Guyton & Cumfer Mfg. Co., Chicago, Ill. Apparatus for producing individual-shingle-simulating elements. 1,682,921; Sept. 4.
McGinnis, Basil W., assignor, by mesne assignments, to Universal Metal Mfg. Co., Birmingham, Ala. Ice-cream freezer. 1,682,976; Sept. 4.
McIntyre-Burrall Company. (See Burrall, Fred E., assignor.)
McKone, Charles W., Canton, Ohio. Rubber-tire-bead construction. 1,682,922; Sept. 4.
McLachlan, Norman W. (See Smith, W. S., McLachlan, and Jacob.)
McLaurin-Jones Co. (See Farrell, Frederick W., assignor.)
McMurdie, Charles L., Ferndale, Mich. Manicuring light. 1,683,476; Sept. 4.
Meckbach, Ernst, Opladen, assignor to Farbenfabriken vorm. Friedr. Bayer and Co., Leverkusen, near Cologne, Germany. Protecting wool and fur from moths. 1,682,975; Sept. 4.
Meehan, Augustus F., Chattanooga, Tenn. Cast iron and making same. 1,683,086; Sept. 4.
Meehan, Augustus F., assignor to Meehanite Metal Corporation, Chattanooga, Tenn. Cast iron and making same. 1,683,087; Sept. 4.
Meehanite Metal Corporation. (See Meehan, Augustus F., assignor.)
Melchor, James T., Mooresville, N. C., assignor to Saco-Lowell Shops, Boston, Mass. Warper. 1,683,367; Sept. 4.
Mellor, John. See Crossby, W. E. J., and Mellor.)
Meltzer, Jack, Brooklyn, N. Y. Bootee. Des. 76,253; Sept. 4.
Merco Nordstrom Valve Company. (See Nordstrom, Sven J., assignor.)
Mergott, J. E., Co. (See Hiering, William C., assignor.)
Merz, Karl E., Oakland, Calif. Permanent-wave heater. 1,683,088; Sept. 4.
Messer, Harry F. See Knisley, H. M., Creswell, and Messer.)
Metzner, Albert W. (See Sherman, J. Q., and Metzner.)
Meyer-Gaus, Karl, Barmen, Germany, assignor to the firm: American Bemberg Corporation, New York, N. Y. Machine for spinning and winding filaments. 1,682,763; Sept. 4.
Meyerhofer, Albert F. (See Buchner, Max, assignor.)
Michell, Anthony G. M., Melbourne, Victoria, assignor to Crankless Engines Limited, Melbourne, Victoria, Australia. Mechanism for the interconversion of reciprocating and rotary motion. 1,682,924; Sept. 4.
Michle Printing Press & Manufacturing Company, The. (See Blaine, Joseph R., assignor.)
Mijares, Anilo, Yonkers, N. Y. Inlet mechanism for carburetors. 1,683,477; Sept. 4.
Milberg, Abraham, Chicago, Ill. Vending machine. 1,683,563; Sept. 4.
Miller, Albert A. (See Paull, J., and Miller.)
Miller, Alice J., Chicago, Ill. Bench standard. Des. 76,254; Sept. 4.
Miller, Arthur. (See Lucklesh, M., Doane, and Miller.)
Miller, Augustus, East Orange, N. J. Weather strip. 1,683,564; Sept. 4.
Miller Company, The. (See Lucklesh, M., Doane, and Miller, assignors.)
Miller Company, The. (See Wolter, Herman H., assignor.)
Miller, John, jr., Beloit, Wis., assignor to Charles H. Besly and Company, Chicago, Ill. Work-feeding device for grinding machines. 1,682,925; Sept. 4.
Miller, Robert A., Pekin, Ill. Plant protector. 1,683,043; Sept. 4.
Miller Rubber Company, The. (See Griffiths, Richard T., assignor.)
Mills, Edgar T., Millville, W. Va. Fly screen. 1,683,204; Sept. 4.
Mills, Gordon B., et al. (See Mills, G. B., Schmiedeskamp, and Skinner, assignors.)
Mills, Gordon B., Oakland, A. J. Schmiedeskamp, Berkeley, and H. E. Skinner, Oakland, Calif.; said Schmiedeskamp assignor to said Mills and Skinner. Game apparatus. 1,682,926; Sept. 4.
Mills, Ray F., Waynesville, Ohio. Reatomizing device. 1,683,089; Sept. 4.
Miner, W. H., Inc. (See Geiger, William A., assignor.)
Miner, W. H., Inc. (See Haseltine, Stacy B., assignor.)
Miner, W. H., Inc. (See Lewis, Goodrich Q., assignor.)
Miner, W. H., Inc. (See O'Connor, John F., assignor.)
Miner, W. H., Inc. (See Olander, Roland J., assignor.)
Minton, Ogden, Greenwich, Conn. Vacuum seal and apparatus. 1,683,254; Sept. 4.
Mirick, Carlos B., Washington, D. C. Electrical system. 1,683,090; Sept. 4.
Mirick, Carlos B., Washington, D. C., assignor to Wired Radio, Inc., New York, N. Y. Piezo-electric crystal holder. 1,683,091 Sept. 4.
Mirick, Carlos B., Washington, D. C., assignor to Wired Radio, Inc., New York, N. Y. Piezo-electric crystal holder. 1,683,092; Sept. 4.
Mirick, Carlos B., and A. Crossley, Washington, D. C., assignors to Wired Radio, Inc., New York, N. Y. Piezo-electric crystal apparatus. 1,683,093; Sept. 4.
Mitchell, Allister S., assignor to California Cotton Mills Company, Oakland, Calif. Apparatus for stuffing plaits. 1,683,296; Sept. 4.
Mix, William J., assignor to A. Mueller, trustee, Decatur, Ill. Receptacle-actuated faucet. 1,683,565; Sept. 4.
Mix, William J., assignor to A. Mueller, trustee, Decatur, Ill. Soap dish. 1,683,566; Sept. 4.
Moblus, Curt E., Brooklyn, and W. N. Engler, assignors to The Western Union Telegraph Company, New York, N. Y. Cable car. 1,683,578; Sept. 4.
Mohr, John D., Newark, N. J. Trick automobile. 1,682,764; Sept. 4.
Moline Implement Company. (See Bechtelheimer, H. A., and Corbin, assignors.)
Moline Implement Company. (See Boda, Joseph E., assignor.)
Mongeau, Fred D., Dearborn, Mich. Burnishing tool. 1,683,044; Sept. 4.
Moody, Julius C., and L. F. Hoffman, Franklin, Pa., assignors to Chicago Pneumatic Tool Company, New York, N. Y. Fluid-pressure-control device. 1,682,848; Sept. 4.
Moody, Lewis F., Philadelphia, Pa. Hydraulic turbine. 1,683,567; Sept. 4.
Moody, Virgil H., and C. W. Kempton, Gloucester, Ohio. Window-curtain fitting. 1,683,568; Sept. 4.
Mooney, Henry L. (See Ferguson, J. E., and Mooney.)
Moore, William G., Lankershim, Calif. Ribbon safety razor. 1,682,794; Sept. 4.
Moorhouse, Alfred, assignor to Packard Motor Car Company, Detroit, Mich. Motor vehicle. 1,682,792; Sept. 4.
Moorhouse, Alfred, assignor to Packard Motor Car Company, Detroit, Mich. Internal-combustion engine. 1,682,793; Sept. 4.
Morey, Harry J., Syracuse, assignor to Pass & Seymour, Inc., Solvay, N. Y. Fixture-body switch. 1,682,849; Sept. 4.
Morgan, Albert, Indianapolis, Ind. Rake. 1,682,795; Sept. 4.
Morgan, David W. R., Swarthmore, Pa., assignor to Westinghouse Electric and Manufacturing Company. Condenser. 1,683,393; Sept. 4.
Morgan, Edmund C., deceased, New York, N. Y.; O. E. Morgan, executrix. Mining and loading apparatus. 1,683,045; Sept. 4.
Morgan, Harold R. (See Johnson, P. G., and Morgan.)
Morgan, John R. (See Jandus, H. S., and Morgan.)
Morgan, Olive E., executrix. (See Morgan, Edmund C.)
Morrill, Philip E. (See Finn, L. J., and Morrill.)

Morrow, Bayard S., and E. Klepetko, Anaconda, Mont. Selective flotation of minerals. 1,683,569; Sept. 4.
Morse Chain Company. (See Bremer, Norman C., assignor.)
Mortenson, Oscar W., G. E. Thelin, and K. F. Norrhagen, Chicago, Ill. Tie press. 1,683,255; Sept. 4.
Moss, Louis N., Cedarhurst, N. Y. Interchangeable sign element. 1,683,570; Sept. 4.
Mueller, Adolph, trustee. (See Mix, William J., assignor.)
Mueller, Adolph, trustee. (See Mueller, Phillip, assignor.)
Mueller, Adolph, trustee. (See Mueller, P., and Schuermann, assignors.)
Mueller, Phillip, assignor to A. Mueller, trustee, Decatur, Ill. Gasoline bucket. 1,683,571; Sept. 4.
Mueller, Phillip, and A. C. Schuermann, deceased, by H. Schuermann, executrix, assignors to A. Mueller, trustee, Decatur, Ill. Pipe-bending mandrel. 1,683,572; Sept. 4.
Mueller, Phillip, and A. C. Schuermann, deceased, by H. Schuermann, executrix, assignors to A. Mueller, trustee, Decatur, Ill. Pipe-bending mandrel or punch. 1,683,573; Sept. 4.
Muller, Robert L., assignor to Burroughs Adding Machine Company, Detroit, Mich. Collating equipment for adding machines and the like. 1,682,765; Sept. 4.
Mulligan, Paul C., Seattle, Wash., assignor to L. J. Hull, I. M. Foster, and himself. Briquetting. 1,683,094; Sept. 4.
Mullins, Oscar R. (See Hughey, V. D., Mullins, and Hughey.)
Murphy, Joseph R., Shelbyville, Tenn. Arrow-shooting gun. 1,683,574; Sept. 4.
Murray, Thomas E. (See Murray, T. E., jr., and Williams, assignors.)
Murray, Thomas E., Brooklyn, N. Y. Boiler. 1,683,046; Sept. 4.
Murray, Thomas E., jr., and H. H. Williams; said Williams assignor to T. E. Murray, Brooklyn, N. Y. Farming axle housings. 1,683,047; Sept. 4.
Myers, William L., St. Louis County, Mo. Carpenter's level. 1,683,256; Sept. 4.
National Carbon Company. (See Smith, Edward C., assignor.)
National Lead Company. (See Hallerman, Frank W. A., assignor.)
National Supply Company, The. (See Archer, Merton T., assignor.)
Naugatuck Chemical Company, The. (See Maximoff, Alexander T., assignor.)
Naugatuck Chemical Company, The. (See Ostromislenesky, Iwan, assignor.)
Naugatuck Chemical Company, The. (See Ostromislensky, I., and Shepard, assignors.)
Nead, William S. (See Cagan, S., and Nead.)
Neidich, Samuel A., Edgewater Park, N. J. Viscose-treating apparatus. 1,683,478; Sept. 4.
Nelkin, Celin. (See Brady, T. G., and Nelkin.)
Nelson, Emil A., Detroit, Mich., assignor to Budd Wheel Company, Philadelphia, Pa. Cap nut. Des. 76,255; Sept. 4.
Nelson, Emil A., Abington, assignor to Budd Wheel Company, Philadelphia, Pa. Machine for rolling wheel disks. 1,683,368; Sept. 4.
Newmyer, Dan K., Houston, Tex. Track level. 1,683,394; Sept. 4.
Newton, Edward C., Los Angeles, Calif. Two-piece piston ring. 1,682,850; Sept. 4.
Newton, William G., East Orange, N. J. Radiator cap. 1,682,766; Sept. 4.
Nichols & Shepard Company. (See Ashton, James T., assignor.)
Nicholson, Fred T., Bloomfield, N. J. Paper receptacle or container and making the same. 1,682,977; Sept. 4.
Nielsen, Lauritz F., assignor to Durkee-Atwood Company, Minneapolis, Minn. Pulley attachment. 1,682,927; Sept. 4.
Niven, Archie M., assignor to Continental Motors Corporation, Detroit, Mich. Cylinder-head construction. 1,682,928; Sept. 4.
Noguchi, Shuhei, New York, N. Y. Shipping tag. 1,682,851; Sept. 4.
Nordgren, Algot W. (See Burandt, G. A., and Nordgren.)
Nordstrom, Sven J., assignor to Merco Nordstrom Valve Company, San Francisco, Calif. Valve. 1,683,257; Sept. 4.
Norling Karl A. P. (See Svensson, K. J., and Norling.)
Norrhagen, Karl F. (See Mortenson, O. W., Thelin, and Norrhagen.)
North American Chemical Company. (See Thoma, Andrew, assignor.)
Northern Equipment and Supply Company. (See Selvig, Gustaf A., assignor.)
Nowalk, Robert F. (See Watson, J. W., and Nowalk.)
Nystrom, Martin, assignor to The Brunswick-Balke-Collender Company, Chicago, Ill. Phonograph-record album. 1,683,479; Sept. 4.
Oakland, Martin, Chicago, Ill. Cultivating implement. 1,683,395; Sept. 4.
O'Brien, Kenneth, Calpine, Calif. Sheet and station indicator. 1,683,575; Sept. 4.
O'Brien, Patrick F., Franklin, Mass. Loom feeler mechanism. 1,683,369; Sept. 4.
Ochs, Clarence, and B. Hildebrand, Long Beach, Calif., assignors to Chicago Pneumatic Tool Company, New York, N. Y. Method of and apparatus for inducing and increasing the flow of wells. 1,682,929; Sept. 4.
O'Connor, John F., Chicago, Ill., assignor, by mesne assignments, to W. H. Miner, Inc. Hand brake. 1,683,396; Sept. 4.
O'Connor, John F., assignor to W. H. Miner, Inc., Chicago, Ill. Friction shock-absorbing mechanism. 1,683,397; Sept. 4.
O'Connor, John F., assignor to W. H. Miner, Inc., Chicago, Ill. Friction shock-absorbing mechanism. 1,683,398; Sept. 4.
O'Connor, John F., assignor to W. H. Miner, Inc., Chicago, Ill. Friction shock-absorbing mechanism. 1,683,399; Sept. 4.
Odell, William W. (See Botsford, Claude W., assignor.)
Offemaria, Engracio P., Chicago, Ill. Valve leak and puncture detector. 1,683,095; Sept. 4.
Ogden, Warren G. (See Terry, Arthur L., jr., assignor.)
O'Hara, Skidmore, assignor to O'Hara Waltham Company, Waltham, Mass. Machine for printing or embossing. 1,682,978; Sept. 4.
O'Hara Waltham Company. (See O'Hara, Skidmore, assignor.)
Ohio Brass Company, The. (See Snyder, Edward B., assignor.)
Oiler, Frank E., Detroit, Mich., assignor to Monitor, Inc., New York, N. Y. Motion-picture-printing mechanism. 1,682,979; Sept. 4.
Olander, Roland J., assignor to W. H. Miner, Inc., Chicago, Ill. Friction shock-absorbing mechanism. 1,683,480; Sept. 4.
Olson, Walter E., Chicago, Ill. Tension device for winding machines. 1,682,796; Sept. 4.
Opelt, Joseph J., Guttenberg, N. J. Piano case. 1,682,767; Sept. 4.
Orange Lighting Fixture Manufacturing Co. (See Seidell, Alfred P., assignor.)
Ormsbee, Willard A., Taunton, Mass. Button. Des. 76,256; Sept. 4.
Osgood, Charles F., Claremont, N. H., assignor to Sullivan Machinery Company. Valve mechanism. 1,682,908; Sept. 4.
Osnos, Mendel, assignor to Gesellschaft für Drahtlose Telegraphie m. b. H., Berlin, Germany. Circuit arrangement for high-frequency systems with frequency amplification. 1,682,768; Sept. 4.
Ostertag, Harry M., Appleton, assignors, by mesne assignments, to Paper Patents Company, Neenah, Wis. Machine for planing suction boxes. 1,682,980; Sept. 4.
Ostromislensky, Iwan, New York, N. Y., assignor to The Naugatuck Chemical Company, Naugatuck, Conn. Polymerized styrol and its homologues and the polymerization of styrol and its homologues. 1,683,402; Sept. 4.
Ostromislensky, Iwan, New York, N. Y., assignor to The Naugatuck Chemical Company, Naugatuck, Conn. Polymerized styrol and its homologues and the polymerization of styrol and its homologues. 1,683,403; Sept. 4.
Ostromislensky, Iwan, New York, N. Y., assignor to The Naugatuck Chemical Company, Naugatuck, Conn. Polymerized styrol and its homologues and the polymerization of styrol and its homologues. 1,683,404; Sept. 4.
Ostromislensky, Iwan, New York, N. Y., assignor to The Naugatuck Chemical Company, Naugatuck, Conn. Making vitreous polymerized styrols and products obtained thereby. 1,683,405; Sept. 4.
Ostromislensky, Iwan, and M. G. Shepard, New York, N. Y. assignors to The Naugatuck Chemical Company, Naugatuck, Conn. Process for making substantially homogeneous masses of polymerized styrol from a nonhomogeneous mass of polymerized styrol. 1,683,401; Sept. 4.
O'Toole, Edward, Gary, W. Va. Mining machine. 1,683,297; Sept. 4.
Otto, Gustav, A. Hartmann, and G. Bauriedel, Barmen, Germany, assignors, by mesne assignments, to American Bemberg Corporation. Apparatus for spinning artificial silk. 1,682,797; Sept. 4.
Outcault, Richard F., jr., Chicago, Ill. Leaf for a bank deposit book. Des. 76,257; Sept. 4.
Owen, Raymond V., assignor to The Edwin F. Guth Company, St. Louis, Mo. Lighting-fixture globe or similar article. Des. 76,258; Sept. 4.
Pacent Electric Company. (See Pacent, Louis G., assignor.)
Pacent, Louis G., Winfield, assignor to Pacent Electric Company, Inc., New York, N. Y. Connecting plug. 1,683,370; Sept. 4.
Packard, Edward S., Holyoke, Mass. Cup-drip attachment. 1,683,205; Sept. 4.
Packard Motor Car Company. (See Gunn, Earl G., assignor.)
Packard Motor Car Company. (See Moorhouse, Alfred, assignor.)
Packard Motor Car Company. (See Vincent, Jesse G., assignor.)
Packard Motor Car Company. (See Woolson, Lionel M., assignor.)
Packs (1925) Limited. (See Crossby, W. E. J., and Mellor, assignors.)
Page, Herbert E., Syracuse, assignor to United States Hoffman Machinery Corporation, New York, N. Y. Garment-pressing machine. 1,682,852; Sept. 4.
Page, Nelson, L. B., and J. C. Emerson, assignors to N. L. Page & Son Co., Auburn, Me. Folding table. 1,683,579; Sept. 4.
Page, N. L., & Son Co. (See Page, N. L. B., and Emerson, assignors.)
Paper Converting Machine Co. (See Christman, Peter J., assignor.)

Paper Patents Company. (See Ostertag, Harry M., assignor.)
Paque, Edward J., Cincinnati, assignor to The Pollak Steel Company, Carthage, Ohio. Double-wheel grinder. 1,683,048; Sept. 4.
Parent, Joseph V., assignor to Worcester Electric Supply Company, Worcester, Mass. Lamp socket. 1,682,930; Sept. 4.
Pass & Seymour, Inc. (See Morey, Harry J., assignor.)
Passmore, Hayes M., Oakland, Calif. Variable-speed transmission. 1,683,258; Sept. 4.
Patrol Valve Company, The. (See Te Pas, Edmund J., assignor.)
Paull, James, and A. A. Miller, assignors to The Eagle Manufacturing Company, Wellsburg, W. Va. Candy container. Des. 76,259; Sept. 4.
Peabody Engineering Corporation. (See Peabody, Ernest H., assignor.)
Peabody, Ernest H., Pelham Manor, assignor to Peabody Engineering Corporation, New York, N. Y. Method and apparatus for control of the burning of liquid fuel. 1,683,371; Sept. 4.
Pease, John W., assignor to W. N. Pease, Rochester, N. Y. Method of and apparatus for seed-celling apples. 1,683,481; Sept. 4.
Pease, Winnifred N. (See Pease, John W., assignor.)
Peck, Jacob G., Portland, Oreg. Ice-cream cabinet and automatically maintaining more than one temperature therein simultaneously. 1,683,406; Sept. 4.
Penley, Lester H., Portland, Me. Clothes clip. 1,683,049; Sept. 4.
Penn, Oscar S., Wandsworth Common, London, assignor to Roadless Traction, Limited, Hounslow, Middlesex, England. Endless-track vehicle. 1,683,407; Sept. 4.
Penton, Ivan B. (See Dawson, V. B., and Penton.)
Penzold, Wilhelm, assignor to the firm Widerstand Aktiengesellschaft für Elektro-Wärme-Technik, Hanover, Germany. Electric resistance for electrically-heated boilers. 1,683,050; Sept. 4.
Perdue, John C., Methuen, assignor to Manufacturers' Machine Company, North Andover, Mass. Centrifugal sprinkler. 1,683,259; Sept. 4.
Permex Corporation of America. (See Buckley, Ernest P., assignor.)
Peterson, Erland F., Everett, assignor to The Goudey Gum Company, Boston, Mass. Kneading machine. 1,683,051; Sept. 4.
Peterson, Francis C., Everett, Wash. Rotary pump. 1,683,143; Sept. 4.
Pfeiffer, Adolf, assignor to the firm Elektrizitäts-Gesellschaft "Sanitas" m. b. H., Berlin, Germany. Surgical motor. 1,683,206; Sept. 4.
Phelan, Louis A. M., and C. Hotchkiss, Beloit, Wis. Electrical switching device. 1,683,408; Sept. 4.
Phifer, James S., Allentown, Pa., assignor to The American Steel and Wire Company of New Jersey. Wire-drawing block. 1,683,482; Sept. 4.
Philadelphia Quartz Company. (See Dedrick, Charles H., assignor.)
Philbrin Corporation. (See Brinton, William C., jr., assignor.)
Phillips, Carl L. (See Bourgognion, J. W. M., and Phillips.)
Phillips, Edgar J., et al., executors. (See Kraft, Henry P.)
Philly, Fernand, Pau, France. Loom for manufacturing nonraveling fabrics. 1,683,052; Sept. 4.
Phoenix Glass Company, The. (See McCreary, Thomas W., assignor.)
Picco, John, New York, N. Y. Life-saving apparatus. 1,683,409; Sept. 4.
Picture Transmission Corporation. (See Ferree, M., and Wissmar, assignors.)
Pifer, George N., Cleveland, Ohio, assignor, by mesne assignments, to American Phototure Company, New York, N. Y. Automatic photographing machine. 1,682,931; Sept. 4.
Pine, Percy S., Salina, Kans. Clarifier. 1,683,483; Sept. 4.
Piquerez, Emile, Paris, France, assignor to The Bassick Manufacturing Company, Chicago, Ill. Double-action lubricant compressor. 1,682,932; Sept. 4.
Pisciotta, Carl C., Highland Park, N. J. Windshield wiper. 1,683,053; Sept. 4.
Pitkin, George D., assignor to Lane Manufacturing Company, Montpelier, Vt. Stoneworking machine. 1,683,298; Sept. 4.
Pitkin, George D., assignor to Lane Manufacturing Company, Montpelier, Vt. Worktable. 1,683,299; Sept. 4.
Pittsburgh Plate Glass Company. (See Fox, John H., assignor.)
Pittsburgh Plate Glass Company. (See Golightly, William J., assignor.)
Pittsburgh Plate Glass Company. (See Hitchcock, Halbert K., assignor.)
Pittsburgh Train Control Company. (See Williamson, Arba G., assignor.)
Plantinga, Pierre, deceased, Cleveland, Ohio; The Cleveland Trust Company, executor. Control means for gas apparatus. 1,683,372; Sept. 4.
Plymouth Cordage Company. (See Damon, John H., assignor.)
Polk, Thomas B., Seattle, Wash., assignor, by mesne assignments, to Trico Products Corporation, Buffalo, N. Y. Combined windshield visor and wiper motor. 1,683,260; Sept. 4.
Pollak Steel Company, The. (See Paque, Edward J., assignor.)
Poole, Lora E., Anderson, Ind., assignor, by mesne assignments, to Delco-Remy Corporation, Dayton, Ohio. Apparatus for spreading the riser bars of commutators. 1,683,261; Sept. 4.
Post, Fred G., Kenmore, N. Y. Revolving-grip screw driver and the like. 1,683,484; Sept. 4.
Potts, Peter T., Chicago, Ill., assignor to The Vortex Mfg. Co. Stack of nested containers and packing the same. 1,682,933; Sept. 4.
Pouget, Louis M., Vailleres, France. Apparatus for use in making extracts, infusions, decoctions, and the like. Re17,077; Sept. 4.
Powdrell & Alexander, Inc. (See Kay, Arthur G., assignor.)
Powell, Frank D., assignor to Acme Card System Company, Chicago, Ill. Flexible index strip. 1,683,207; Sept. 4.
Powell, John, Carlton, Victoria, Australia. Pneumatic tire. 1,683,208; Sept. 4.
Protzeller, Harry W., assignor to O. F. Jordan Company, East Chicago, Ind. Car construction. 1,682,981; Sept. 4.
Protzeller, Harry W., assignor to O. F. Jordan Company, East Chicago, Ind. Automatic make-and-break contactor. 1,682,982; Sept. 4.
Pryor, William M., assignor to Southern Manganese Steel Company, St. Louis, Mo. Drag-chain link. 1,682,983; Sept. 4.
Pyles, Robert M., Fullerton, Calif. Rotary jar. 1,683,096; Sept. 4.
Q & C Company. (See Zimmerman, Emil C., assignor.)
Rail Welding and Bonding Company. (See Gruenfeldt, Emil, assignor.)
Rall, Glen J., Oxford, N. C. Combination implement. 1,683,485; Sept. 4.
Ramsay, Ansil S., Troy, Ala. Dirigible headlight. 1,683,300; Sept. 4.
Ramsey, John A. (See Szekely, Otto E., assignor.)
Rancourt, Walter J., Boston, Mass. Skin cleansing and massaging device. 1,683,410; Sept. 4.
Rassow, Horst, Berlin-Wilmersdorf, assignor to Siemens & Halske, Aktiengesellschaft, Siemensstadt, near Berlin, Germany. Device for synchronizing individually-driven parts at a transmitter and a receiver station. 1,683,301; Sept. 4.
Raynor, Louis L., New Rochelle, assignor, by mesne assignments, to The Hygienol Co. Inc., New York, N. Y. Powder puff. 1,682,984; Sept. 4.
Reading Foundry and Supply Co. (See Bush, Harry K., assignor.)
Reagel, Fred V. (See Copeland, Arch G., assignor.)
Realistic Hair Waving Machine Co. (See Decker, George, assignor.)
Rehfuss, Martin O., Philadelphia, assignor to United States Chain and Forging Company, Pittsburgh, Pa. Chain. 1,683,486; Sept. 4.
Reichel, Alvin S., Matamoras, Pa., assignor to Hayes Mfg. Co., Inc., Port Jervis, N. Y. Motor shears. Re17,075; Sept. 4.
Reliance Company, The. (See Wilms, Gustav O., assignor.)
Remley, Ernest, East Orange, N. J., assignor to Hygienic Fibre Company, Incorporated. First-aid kit. 1,683,487; Sept. 4.
Remmers, Harry C., asignor to H. Goodman, Baltimore, Md. Portable traction device. 1,683,411; Sept. 4.
Renner, Herbert, Philadelphia, Pa., assignor, by mesne assignments, to Chemicolor Wood Preserving Co. Impregnation of wood and the like. 1,683,488; Sept. 4.
Retschy, Curt, assignor to H. Junkers, Dessau, Germany. Oil-feeding device. 1,682,853; Sept. 4.
Reynolds, Frank H., assignor to Eastman Kodak Company, Rochester, N. Y. Camera covering and making same. 1,683,302; Sept. 4.
Reyrolle, A., & Company, Limited. (See Burgess, William A. A., assignor.)
Rice, Cyrus W., Pittsburgh, Pa. Scale and corrosion detector. 1,683,489; Sept. 4.
Richards, Ithiel C., Los Angeles, Calif. Toilet-bowl attachment. 1,682,798; Sept. 4.
Richards, Ithiel C., Los Angeles, Calif. Sanitary cushion apron. 1,682,799; Sept. 4.
Richardson, John F., Pittsburgh, Pa. Brake for motor vehicles. 1,683,097; Sept. 4.
Richardson, Linwood T. (See Layman, F. E., and Richardson.)
Richardson, Linwod T. (See Layman, F. E., Richardson, and Cherry.)
Richardson, Linwood T., New Brunswick, N. J., assignor to The Cutler-Hammer Mfg. Co., Milwaukee, Wis. Synthetic resin and producing the same. 1,682,934; Sept. 4.
Richardson, William H. (See Glover, W. B., and Richardson.)
Richmond, Vincent C., and F. M. Rope, Cardington, England. Construction of airships. 1,683,490; Sept. 4.
Richter, George A., and M. O. Schur, assignors to Brown Company, Berlin, N. H. Chemically treating and washing pulp. 1,683,262; Sept. 4.
Riddell, William A., assignor to Eastman Kodak Company, Rochester, N. Y. Shutter casing. 1,683,303; Sept. 4.
Ridgway, Carl E., Seattle, Wash. Display device. 1,683,098; Sept. 4.
Rippon, Francis F. C., New York, N. Y. Selector. 1,683,491; Sept. 4.
Ritz Woller, Oliver C., Chicago, Ill. Warning light. 1,682,948; Sept. 4.

Roadless Traction, Limited. (See Penn, Oscar S., assignor.)
Roberts, William T. B., Leicester, England, assignor to United Shoe Machinery Corporation, Paterson, N. J. Machine for operating on blanks. 1,682,800; Sept. 4.
Robertshaw, James E., Bedford, Ohio, assignor to The American Steel and Wire Company of New Jersey. Apparatus for annealing. 1,682,801; Sept. 4.
Robin, John N., assignor to The Bassick Manufacturing Company, Chicago, Ill. Lubricant compressor. 1,682,935; Sept. 4.
Robinson, Joseph, New York, N. Y. Automatic train-pipe coupling. 1,682,854; Sept. 4.
Robinson, Joseph, New York, N. Y. Automatic train-pipe coupling. 1,682,936; Sept. 4.
Rode, Frederich J., assignor to Marquette Tool & Mfg. Company, Chicago, Ill. Sheet-metal press. 1,682,937; Sept. 4.
Roebke, Ernest T., assignor to American Pulverizer Company, St. Louis, Mo. Pulverizing machine. 1,683,304; Sept. 4.
Rollins, Harry T., Des Moines, Iowa. Needle for repairing runs in knitted fabrics. 1,682,985; Sept. 4.
Root, Lemma J., Seattle, Wash. Hydraulic or vacuum clutch. 1,683,054; Sept. 4.
Rope, Frederic M. (See Richmond, V. C., and Rope.)
Rose, Louis P., Arnold, Nebr. Linoleum-vending machine. 1,682,802; Sept. 4.
Rose, William H., Jersey City, N. J. Garment support. 1,682,855; Sept. 4.
Rosenbaum, Lester F., and E. C. Bowers, Kalamazoo, Mich.; said Bowers assignor to said Rosenbaum. Pressing machine. 1,683,412; Sept. 4.
Rosenheimer, Adolph L., jr., assignor to Kewaskum Aluminum Company, Kewaskum, Wis. Waterless cooker. 1,683,305; Sept. 4.
Ross, Edward. (See Ross, William and E.)
Ross, William and E., Brooklyn, N. Y. Jointer. 1,683,273; Sept. 4.
Rostron, Robert, assignor to Crorar, Adams & Co., Chicago, Ill. Track liner. 1,683,099; Sept. 4.
Roto Tray Company. (See Schneider, Gustav E. and A. B., assignors.)
Rouge, Octave, Paris, France. Amusement device. 1,682,803; Sept. 4.
Roux, John A., Tenafly, N. J. Process and apparatus for producing filaments. 1,683,055; Sept. 4.
Roux, John A., Aenafly, N. J. Process and apparatus for producing filaments. 1,683,056; Sept. 4.
Rozowsky, Alfred, Brooklyn, N. Y. Box. 1,683,100; Sept. 4.
Ruben, Samuel, New York, N. Y. Increasing the conductivity of metals. 1,683,209; Sept. 4.
Ruckelshaus, John G., Newark, N. J., assignor, by mesne assignments, to Fantuar Mirror, Inc., New York, N. Y. Display device. 1,683,263; Sept. 4.
Runner, Claude C., Schenectady, N. Y., assignor to General Electric Company, Motor-control apparatus. 1,683,210; Sept. 4.
Rushmore, Samuel W., Plainfield, N. J. Combined engine-cooling and car-heating system. 1,683,101; Sept. 4.
Rushton, James L. (See Hamer, James H., assignor.)
Ruth, C. W., Engineering Company. (See Ruth, Conant W., assignor.)
Ruth, Conant W., assignor to The C. W. Ruth Engineering Company, Chicago, Ill. Multistory garage. 1,683,492; Sept. 4.
Ryan, Charles E., and T. J. Schuetz, Tulsa, Okla. Attachment for motor vehicles. 1,683,306; Sept. 4.
Ryan, Charles E., and T. J. Schuetz, Tulsa, Okla. Attachment in motor vehicles. 1,683,307; Sept. 4.
Ryder, Charles D., Covington, Ky., assignor to The Cincinnati Victor Company, Cincinnati, Ohio. Aeroplane lamp. 1,683,580; Sept. 4.
Ryerson, Joseph T., and Son. (See Conradson, Conrad M., assignor.)
Rymarczick, Lyal B., Los Angeles, Calif. Sound-absorbing surface and producing same. 1,682,986; Sept. 4.
Sacco-Lowell Shops. (See Melchor, James T., assignor.)
Sadler, Samuel S., Springfield Township, Montgomery County, assignor to Amlesite Asphalt Company of America, Philadelphia, Pa. Road composition and making same. 1,683,493; Sept. 4.
St. Joseph Iron Works. (See Schmidtke, Albert H., assignor.)
Salkind, Samuel M., Brooklyn, N. Y. Vehicle jack. 1,682,856; Sept. 4.
Samanski, Lee B. (See Busby, R. B., and Samanski.)
Samstag, Henry R., assignor to Samstag & Hilder Bros., Inc., New York, N. Y. Blank of leather. Des. 76,260; Sept. 4.
Samstag & Hilder Bros., Inc. (See Samstag, Henry R., assignor.)
Sanftleben, Joseph F., assignor to Filtrators Company, Inc., New York, N. Y. Container for extracting apparatus. 1,683,102; Sept. 4.
Santos y Suarez, Isaac, and A. Acosta y Velo, Habana, Cuba. Tracklaying device. 1,683,498; Sept. 4.
Sargent & Company. (See Shaw, John H., assignor.)
Sauvage, Herbert J., assignor to Drying Systems, Inc., Chicago, Ill. Thermostat. 1,683,264; Sept. 4.
Saxon, Hilda M., Bellingham, Wash. Paper cover for toilet seats. 1,682,987; Sept. 4.
Scese, John E., Pontiac, assignor to General Motors Corporation, Detroit, Mich. Brake adjustment. 1,683,057; Sept. 4.
Scheel, Otto E., Detroit, Mich. Concrete burial box. 1,683,265; Sept. 4.
Schidrowitz, Philip, London, assignor to Vultex Limited, Jersey, Channel Islands, England. Manufacture of rubber and the like. 1,682,857; Sept. 4.
Schlaich, Herman, Long Island City, N. Y. Indicating instrument. 1,683,103; Sept. 4.
Schmidtke, Albert H., assignor to St. Joseph Iron Works, St. Joseph, Mich. Apparatus for making baskets and the like. 1,682,769; Sept. 4.
Schmidtke, Albert H., assignor to St. Joseph Iron Works, St. Joseph, Mich. Basket-making machine. 1,682,770; Sept. 4.
Schmiedeskamp, August J. (See Mills, G. B., Schmiedeskamp, and Skinner.)
Schneider, Arthur B. (See Schneider, Gustav E. and A. B.)
Schneider, Gustav E. and A. B., Chicago, Ill., assignors to Roto Tray Company. Smoker's tray. Des. 76,261; Sept. 4.
Schoedinger, F. O. (See Armstrong, Edward R., assignor.)
Schoeller, Walter, Berlin-Westend, and H. G. Allardt, Berlin-Reinickendorf-West, assignors to the firm Chemische Fabrik auf Actien (vorm. E. Schering), Berlin, Germany. Auro mercapto carboxylic acid and making same. 1,683,104; Sept. 4.
Schoeller, Walter, Berlin-Westend, and H. G. Allardt, Berlin-Reinickendorf-West, assignors to the firm Chemische Fabrik auf Actien (vorm. E. Schering), Berlin, Germany. Metallo mercapto compounds and making same. 1,683,105; Sept. 4.
Schrank, Fred J., Akron, Ohio. Gun sight. 1,683,106; Sept. 4.
Schröder, Hans W. C., assignor to A. B. Dräger, Lubeck, Germany; E. Dräger, née Stange, executrix of said Dräger, deceased. Inhaling apparatus for narcotics. 1,683,144; Sept. 4.
Schuermann, Anton C., deceased. (See Mueller, P., and Schuermann.)
Schuermann, Helena, executrix. (See Mueller, P., and Schuermann.)
Schuetz, Thomas J. (See Ryan, C. E., and Schuetz.)
Schumacher, Conrad. (See Galsman, H. J., and Schumacher.)
Schur, Milton O. (See Richter, G. A., and Schur.)
Schwab, Maurice M. and S. S., Toledo, Ohio. Cleansing-liquid-restoring means. 1,682,939; Sept. 4.
Schwab, Samuel S. (See Schwab, Maurice M. and S. S.)
Schweiker, Roy W., Lansdale, Pa. Lighting fixture. Des. 76,262; Sept. 4.
Scranton, Eugene L., Hughson, Calif. Wooden outlet-box frame. 1,683,308; Sept. 4.
Searight, John R., Birmingham, Mich. Salt shaker. 1,682,804; Sept. 4.
Sederholm, John E., assignor to American Hoist & Derrick Company, St. Paul, Minn. Loud speaker. Des. 76,263; Sept. 4.
Seidell, Alfred P., Bloomfield, N. J., assignor to Orange Lighting Fixture Manufacturing Co. Arm for wall brackets or the like. Des. 76,264; Sept. 4.
Selah, Howard A., assignor to Erie Malleable Iron Company, Erie, Pa. Conduit fitting. 1,683,413; Sept. 4.
Selah, Howard A., assignor to Erie Malleable Iron Company, Erie, Pa. Conduit fitting. 1,683,414; Sept. 4.
Selah, Howard A., assignor to Erie Malleable Iron Company, Erie, Pa. Conduit fitting. 1,683,415; Sept. 4.
Selah, Howard A., assignor to Erie Malleable Iron Company, Erie, Pa. Conduit fitting. 1,683,416; Sept. 4.
Selden Company, The. (See Jaeger, Alphons O., assignor.)
Selden, James M. (See Crabb, Silas F., assignor.)
Selliez, Victor, St.-Ghislain, Belgium. Tunnel kiln for ceramic industry. 1,683,309; Sept. 4.
Selvig, Gustaf A., assignor, by mesne assignments, to Northern Equipment and Supply Company, Minneapolis, Minn. Cover holder. 1,682,805; Sept. 4.
Severns, Clayton, and J. N. Hicks, Los Angeles, Calif. Oil saver. 1,683,107; Sept. 4.
Seyler, Ernest A. (See Austin, John A., assignor.)
Shackleton, William, et al. (See Gartner, John H., assignor.)
Shafer, Samuel, jr., assignor to Chain Belt Company, Milwaukee, Wis. Concrete-mixing machine. 1,683,417; Sept. 4.
Shanley, Francis. (See Carpenter, W. J., and Shanley.)
Shaw Crane-Putnam Machine Company. (See Gough, A. C., and Charushin, assignors.)
Shaw, John C., assignor to Keller Mechanical Engineering Corporation, Brooklyn, N. Y. Electrical operation and control of machine tools. 1,683,581; Sept. 4.
Shaw, John C. and R. D., assignors to Keller Mechanical Engineering Corporation, Brooklyn, N. Y. Terminal for conductors. 1,683,418; Sept. 4.
Shaw, John H., assignor to Sargent & Company, New Haven, Conn. Lock. 1,682,988; Sept. 4.
Shaw, Robert D. (See Shaw, John C. and R. D.)
Shepard, Morris G. (See Ostromislensky, I., and Shepard.)
Sherman, Clifton W., and J. M. Hall, Hamilton, Ontario, Canada, assignors to Hall Draft Gear Corporation, Buffalo, N. Y. Friction draft gear. 1,682,806; Sept. 4.
Sherman, John Q., and A. W. Metzner, Dayton, Ohio; said Metzner assignor to said Sherman. Manifolding register. 1,682,991; Sept. 4.
Shipman, Lewis H., Boston, Mass. Solar heating apparatus. 1,683,266; Sept. 4.
Short, Charles R., Dayton, Ohio, assignor to General Motors Research Corporation, Detroit, Mich. Hinge. 1,682,993; Sept. 4.

Short, Charles R., Dayton, Ohio, and V. Hughes, assignors to General Motors Research Corporation, Detroit, Mich. Differential gearing for motor vehicles. 1,682,871; Sept. 4.
Short, Frank, Poughkeepsie, N. Y., assignor to Chemical Machinery Corporation. Apparatus for the generation and distribution of mercury vapor and sealing means therefor. 1,683,310; Sept. 4.
Short, Stephen T. (See Hoyle, J., and Short.)
Shoudy, Chester P., assignor to Shoudy Manufacturing and Developing Company, Spokane, Wash. Centrifugal casting machine. 1,683,267; Sept. 4.
Shoudy Manufacturing and Developing Company. (See Shoudy, Chester P., assignor.)
Siemens & Halske Aktiengesellschaft. (See Rassow, Horst, assignor.)
Siemens-Schuckertwerke Gesellschaft mit beschränkter Haftung. (See Altenkirch, Edmund, assignor.)
Sikorski, Frank, Bridesburg, Pa. Brush. 1,683,494; Sept. 4.
Siller, Lenhart G., Sacramento, Calif. Sliding and pivoted window. 1,683,419; Sept. 4.
Simmons, Albert H., Wheaton, assignor to Edison Electric Appliance Company, Incorporated, Chicago, Ill. Electric heater. 1,683,211; Sept. 4.
Simms, Frederick R., assignor of one-half to Simms Motor Units Ltd., London, England. Tool or appliance for facilitating the mounting of shaft couplings. 1,683,311; Sept. 4.
Simms Motor Units Ltd. (See Simms, Frederick R., assignor.)
Simon, Aaron, Brooklyn, and L. Yentis, Jackson Heights, N. Y. Cigar lighter or similar article. Des. 76,265; Sept. 4.
Simon, Arthur, assignor to The Cutler-Hammer Mfg. Co., Milwaukee, Wis. Electric controller. 1,682,938; Sept. 4.
Simon, Charles L., Beardsley, Minn. Rope holder. 1,682,994; Sept. 4.
Simplex Player Action Company. (See White, Frank C., assignor.)
Sinclair Refining Company. (See Bell, John E., assignor.)
Sinclair Refining Company. (See Herthel, Eugene C., assignor.)
Sinclair Refining Company. (See Isom, Edward W., assignor.)
Sinclair Refining Company. (See Isom, E. W., and Herthel, assignors.)
Sinning, Henry F., Grundy Center, Iowa. Crank-case-heating device. 1,683,312; Sept. 4.
Sipe, Harry E., New York, N. Y. Bumper and fender guard. 1,682,858; Sept. 4.
Skelly, James D., et al. (See Gartner, John H., assignor.)
Skinner, Henry E. (See Mills, G. B., Schmiedeskamp, and Skinner.)
Skuhe, Mathias J., jr., Seattle, Wash. Fireplace guard. 1,683,420; Sept. 4.
Slonaker, William H., Detroit, Mich. Steam-supply device for electric irons. 1,683,145; Sept. 4.
Small, James H., jr., Cleveland, Ohio. Concrete-pile follower and mounting for same. 1,683,108; Sept. 4.
Smelker, Le Roy, Germantown, Ohio. Automobile seat and the like. 1,682,989; Sept. 4.
Smith, A. O., Corporation. (See Andren, Birger T., assignor.)
Smith, A. O., Corporation. (See Smith, Lloyd R., assignor.)
Smith, Bert H., Horton, Kans. Flexible pipe-sealing means. 1,682,940; Sept. 4.
Smith, Edward C., Lakewood, Ohio, assignor to National Carbon Company, Inc. Dry cell. 1,682,995; Sept. 4.
Smith, Lloyd R., assignor to A. O. Smith Corporation, Milwaukee, Wis. Making pipe couplings. 1,682,996; Sept. 4.
Smith, Oliver P., Chicago, Ill. Toilet set. 1,682,990; Sept. 4.
Smith, Orin L., Swampscott, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Machine for removing projecting tacks from the interior of boots and shoes. 1,682,807; Sept. 4.
Smith, William E., Milltown, assignor to Gulbenkian Seamless Rug Company, New Brunswick, N. J. Hook mounting for pile-wire-controlling mechanism for looms. 1,683,495; Sept. 4.
Smith, Willoughby S., Newton Poppleford, N. W. McLachlan and W. G. R. Jacob, London, England. Telegraphy. 1,682,941; Sept. 4.
Smithson, Arthur. (See Honstain, V. G., and Smithson.)
Snyder, Edward B., assignor to The Ohio Brass Company, Mansfield, Ohio. Conductor support. 1,683,109; Sept. 4.
Societe Anonyme Chantiers & Ateliers Augustin Normand. (See Fenaux, Fernand, assignor.)
Societe des Brevets Etrangers Lefranc & Cie. (See Lefranc, Jacques, assignor.)
Société Industrielle des Applications Chimiques, Société Anonyme. (See Botson, René, assignor.)
Sodergren, John E., Minneapolis, Minn. Screen frame. 1,683,421; Sept. 4.
Soderstrom, Nels J., Burtrum, Minn. Vehicle pole tip. 1,682,859; Sept. 4.
Sorensen, Andrew J., Wilkinsburg, assignor to The Union Switch & Signal Company, Swissvale, Pa. Railway-traffic-controlling apparatus. 1,682,997; Sept. 4.
Soss, Joseph, Brooklyn, N. Y. Invisible hinge. 1,682,860; Sept. 4.
Southern Manganese Steel Company. (See Pryor, William M., assignor.)
Specialty Manufacturing Company, The. (See Frost, Clinton E., assignor.)
Spinney, Cleveland N., Harrisbur,g Pa., and F. L. Mackenzie, Beverly, Mass., assignors to United Shoe Machinery Corporation, Paterson, N. J. Tack-pulling machine. 1,682,808; Sept. 4.
Standard Oil Company. (See Glair, H. F., and Bransky, assignors.)
Star Drilling Machine Company. (See Yeaton, Alton F., assignor.)
Starkey, Lewis P., Fort Collins, Colo., assignor, by mesne assignments, to R. E. Starkey. Vending machine. 1,682,942; Sept. 4.
Starkey, Rose E. (See Starkey, Lewis P., assignor.)
Starr, Jesse W., 3d. (See McAdams, Harry, assignor.)
Staud, Cyril J. (See Gray, H. L., and Staud.)
Sterling Varnish Company, The. (See Barord, Paul J., assignor.)
Stevens, John L., Chandler, Ariz. Signal. 1,683,496; Sept. 4.
Stevens, Leslie, Glen Ridge, N. J., assignor to Stevens Manufacturing Corporation, New York, N. Y. Loud-speaker diaphragm. Des. 76,266; Sept. 4.
Stevens, Leslie, Glen Ridge, N. J., assignor to Stevens Manufacturing Corporation, New York, N. Y. Loud-speaker diaphragm. Des. 76,267; Sept. 4.
Stevens Manufacturing Corporation. (See Stevens, Leslie, assignor.)
Stevenson, James W., Riverside, Calif. Ladder. 1,683,422; Sept. 4.
Stewart Manufacturing Company. (See Stewart, Roy N., assignor.)
Stewart, Roy N., Natick, assignor to Stewart Manufacturing Company, Boston, Mass. Bottle cap. 1,683,313; Sept. 4.
Stewart, William C., Swampscott, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Sorting machine. 1,682,809; Sept. 4.
Stickney, Burnham C., Portsmouth, N. H., assignor to Underwood Elliott Fisher Company, New York, N. Y. Typewriting machine. 1,683,582; Sept. 4.
Stiles, Lorren, Woodbury, N. J. Beater. 1,683,497; Sept. 4.
Stinchfield, Ray L., assignor to Eastman Kodak Company, Rochester, N. Y. Power-driven camera with motor signal. 1,683,314; Sept. 4.
Stinchfield, Ray L., assignor to Eastman Kodak Company, Rocester, N. Y. Making antistatic nitrocellulose films. 1,683,315; Sept. 4.
Stockbower, Mabel Y., Hollis Gardens, N. Y., assignor to Earnshaw Knitting Company, Newton, Mass. Wash cloth. 1,683,110; Sept. 4.
Stover, Paul A., assignor to The Stover Signal Engineering Co., Racine, Wis. Directional signal. Des. 76,268; Sept. 4.
Stover Signal Engineering Co., The. (See Stover, Paul A., assignor.)
Stratford, Frank B., Montclair, N. J. Apparatus for washing fibrous materials. 1,682,861; Sept. 4.
Streeter, Albert B., New York, N. Y. Engine head. 1,683,268; Sept. 4.
Strickland, Frank, Oklahoma City, Okla. Trap nest. 1,683,423; Sept. 4.
Studebaker Corporation, The. (See Hughes, J. R., and Weber, assignors.)
Sullivan Machinery Company. (See Holdsworth, Fred D., assignor.)
Sullivan Machinery Company. (See Osgood, Charles F., assignor.)
Sullivan Machinery Company. (See Wyman, Charles W., assignor.)
Sullivan Printing Works Company, The. (See Sullivan William S., assignor.)
Sullivan, William S., assignor to The Sullivan Printing Works Company, Cincinnati, Ohio. Daily calendar or similar article. Des. 76,269; Sept. 4.
Sulzer Freres Societe Anonyme. (See Kägi, Emil, assignor.)
Summers, Caleb E., assignor to General Motors Research Corporation, Detroit, Mich. Ventilating device for engine crank cases. 1,682,992; Sept. 4.
Summers, Caleb E., assignor to General Motors Research Corporation, Dayton, Ohio. Internal-combustion engine. 1,682,998; Sept. 4.
Sunland Sales Cooperative Association. (See Forrest, Thomas W. W., assignor.)
Susquehanna Silk Mills. (See Bunting, James H., assignor.)
Svensson, Karl J., Lidongo Villastad, and K. A. P. Norling, Sodertorns Villastad, Sweden. Centrifugal separating machine. 1,683,424; Sept. 4.
Swain, Harold S., Brockton, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Machine for operating on shoes. 1,682,810; Sept. 4.
Swenson, Carl O., assignor to Consolidated Steel Strapping Company, Chicago, Ill. Machine for making corrugated fasteners. 1,682,862; Sept. 4.
Swenson, Carl O., assignor to Consolidated Steel Strapping Company, Chicago, Ill. Making corrugated fasteners. 1,682,863; Sept. 4.
Swenson, Carl O., assignor to Consolidated Steel Strapping Company, Chicago, Ill. Machine for making corrugated fasteners. 1,682,864; Sept. 4.

Szekely, Otto E., Molin, Ill., assignor to J. A. Ramsey, St. Louis, Mo. Piston-ring spring. 1,683,169; Sept. 4.
Tandy, Albert W., Los Angeles, Calif. Selling booth. Des. 76,270; Sept. 4.
Taylor, John B. (See Taylor, Marcia E. and J. B.)
Taylor, Marcia E., and J. Taylor, Schenectady, N. Y. Radiation receiving conductor. 1,683,270; Sept. 4.
Teeter, Cyrus O., Denver, Colo. Combined merchandise-display case and advertising signboard. Des. 76,271; Sept. 4.
Tengström, Hans, and K. Bübring, Berlin, Germany, assignors to General Electric Company. Motor-control system. 1,683,212; Sept. 4.
Tenney, Perry L., Muncie, Ind., assignor to General Motors Corporation, Detroit, Mich. Transmission. 1,682,999; Sept. 4.
Te Pas, Edmund J., Lakewood, assignor to The Patrol Valve Company, Cleveland, Ohio. Fluid-fuel-control system. 1,683,213; Sept. 4.
Terry, Arthur L., jr., Wellesley Hills, assignor to W. G. Ogden, Quincy, Mass. Electrical condenser. 1,682,811; Sept. 4.
Thatcher, Linden A., Belleville, N. J., assignor to Underwood Elliott Fisher Company, New York, N. Y. Typewriting machine. 1,683,425; Sept. 4.
Thelin, Gunnar E. (See Mortenson, O. W., Thelin, and Norrhagen.)
Thoma, Andrew, Cambridge, assignor to North American Chemical Company, Boston, Mass. Shoe-bottom-filling machine. 1,682,865; Sept. 4.
Thomas, Adolph A., New York, N. Y. Electrical instrument of the telephone type. 1,682,866; Sept. 4.
Thomas, August, Berlin-Baumschulenweg, assignor of one-half to C. von Haryes, Berlin, Germany. Shock absorber. 1,683,499; Sept. 4.
Thomas & Betts Co., The. (See Buchanan, Stephen N., assignor.)
Thomas, George F., Berwyn, assignor to The Bassick Manufacturing Company, Chicago, Ill. Filter. 1,682,867; Sept. 4.
Thomas, William M., assignor, by mesne assignments, to W. M. Thomas and F. A. Leonard, Los Angeles, Calif. Apparatus for treating films. 1,682,943; Sept. 4.
Thomas, William M., et al. (See Thomas, William M., assignor.)
Thompson, Eugene C., Los Angeles, Calif. Film-feeding means for cameras. 1,682,812; Sept. 4.
Thompson, Eugene C., Los Angeles, Calif. Camera. 1,682,813; Sept. 4.
Thompson, Gustave R. (See Bergmann, Carl, jr., assignor.)
Thompson, Leroy. (See Foster, Guy T., assignor.)
Thompson, Robert J., Paris, France, and C. Fisher, New York, N. Y. Flowerpot device. 1,683,271; Sept. 4.
Thomson, Elihu, Swampscott, Mass., assignor to General Electric Company. High-frequency induction apparatus. 1,683,146; Sept. 4.
Thordarson, William, New York, N. Y. Emulsifier. 1,683,500; Sept. 4.
Thrasher, Ray H., Ferndale, Mich. Door latch and opener. 1,683,426; Sept. 4.
Tobeler, Max F., Detroit, Mich. Removable stripper appliance. 1,683,501; Sept. 4.
Touché, Jorge S., Monterey, Mex. Manufacturing shoes. 1,682,868; Sept. 4.
Trauger, Guy A., Livermore, Iowa. Remote control for tractors. 1,683,000; Sept. 4.
Trico Products Corporation. (See Polk, Thomas B., assignor.)
Trifelos, George, Canton, Ohio. Candy cooling and packing machine. 1,682,814; Sept. 4.
Tucker, Morton, Philadelphia, Pa. Dustproof hinge. 1,683,272; Sept. 4.
Tunnell, Herbert R., Butte, Mont. Rotary drill bit. 1,683,502; Sept. 4.
Tunstall, William B., Worcester, assignor to E. E. Conway, Boston, Mass., C. C. Conway, Scarboro, N. Y., and T. P. Brown, Worcester, Mass, trustees. Player grand piano. 1,682,869; Sept. 4.
Turner, Howard B., assignor of one-half to J. O. Greene, Mount Sterling, Ky. Decorative belt. 1,683,427; Sept. 4.
Turner, Richard G., assignor to Crompton & Knowles Loom Works, Worcester, Mass. Weft detector in regularly-moving transferrer. 1,683,214; Sept. 4.
Tyden, Emil, Evanston, Ill. Valve construction. 1,683,002; Sept. 4.
Tytus, John B., assignor to The American Rolling Mill Company, Middletown, Ohio. Metal rolling. 1,683,001; Sept. 4.
Tytus, John B., assignor to The American Rolling Mill Company, Middletown, Ohio. Rolling sheet metal. 1,683,003; Sept. 4.
Uberto, Henry, New York, N. Y. Aquatic amusement device. 1,683,058; Sept. 4.
Uffert, Walter B., Freeport, N. Y. Automatic shaft lock for automobiles. 1,683,428; Sept. 4.
Uhlman, Walter G. (See Hollar, H., jr., and Uhlman.)
Underwood Elliott Fisher Company. (See Stickney, Burnham C., assignor.)
Underwood Elliott Fisher Company. (See Thatcher, Linden A., assignor.)
Union Draft Gear Company. (See Cotton, Walter H., assignor.)
Union Steel Products Company. (See Bitney, Dewey H., assignor.)
Union Switch & Signal Company, The. (See Failor, Charles W., assignor.)
Union Switch & Signal Company, The. (See Gilson, Robert M., assignor.)
Union Switch & Signal Company, The. (See Sorensen, Andrew J., assignor.)
United Shoe Machinery Corporation. (See Cavanagh, James, assignor.)
United Shoe Machinery Corporation. (See Finn, Sidney J., assignor.)
United Shoe Machinery Corporation. (See Roberts, William T. B., assignor.)
United Shoe Machinery Corporation. (See Smith, Orin L., assignor.)
United Shoe Machinery Corporation. (See Spinney, C. N., and Mackenzie, assignors.)
United Shoe Machinery Corporation. (See Stewart, William C., assignor.)
United Shoe Machinery Corporation. (See Swain, Harold S., assignor.)
United Shoe Machinery Corporation. (See Winkley, Erastus E., assignor.)
United States Chain and Forging Company. (See Rebfuss, Martin O., assignor.)
United States Hoffman Machinery Corporation. (See Page, Herbert E., assignor.)
Universal Metal Mfg. Co. (See McGinnis, Basil W., assignor.)
Universal Oil Products Company. (See Egloff, Gustav, assignor.)
Useful Products Company. (See Kingman, Russell B., assignor.)
Van Deventer, Harry R., New York, N. Y., assignor to Dubilier Condenser Corporation. Resistor. 1,683,059; Sept. 4.
Van Gale, Louis, Astoria, N. Y. Lamp socket. 1,682,944; Sept. 4.
Van Heusen, John M., Boston, Mass. Fabric hat and making the same. 1,682,870; Sept. 4.
Van Lith, Edward A. P., Holyoke, Mass. Headlight closure for motor vehicles. 1,683,503; Sept. 4.
Vawter, Charles E., Philadelphia, Pa., assignor to Dubilier Condenser Corporation, New York, N. Y. Resistance device and making same. 1,683,060; Sept. 4.
Venable, William M., Pittsburgh, Pa., assignor to Blaw-Knox Company. Method of and apparatus for handling, storing, and measuring bulk material into batches. 1,682,872; Sept. 4.
Vermont Spool & Bobbin Co. (See Wilson, William H., assignor.)
Vertrees, John J., jr., Nashville, Tenn. Air-vent valve for combustion engines. 1,683,504; Sept. 4.
Victaulic Company. (See Johnson, P. G., and Morgan, assignors.)
Victor, Alexander F., Davenport, Iowa. Camera. 1,682,873; Sept. 4.
Victor Talking Machine Company. (See Buckle, Horace L., T., assignor.)
Vincent, Jesse G., assignor to Packard Motor Car Company, Detroit, Mich. Boat. 1,682,815; Sept. 4.
Virginia Table Company. (See Gordon, Lawrence E., assignor.)
Voices Incorporated. (See Handy, Levin G., assignor.)
Voigt, Albert P. J., Galveston, Tex. Machine for husking nuts. 1,683,004; Sept. 4.
Von Haryes, Carl. (See Thomas, August, assignor.)
Von Suchorzynski, Anton, Breslau, Germany. Hearing apparatus. 1,683,316; Sept. 4.
Vortex Mfg. Co., The. (See Potts, Peter T., assignor.)
Vreeland Corporation. (See Vreeland, Frederick K., assignor.)
Vreeland, Frederick K., Montclair, assignor to Vreeland Corporation, Hoboken, N. J. Radiofrequency amplifier. 1,682,874; Sept. 4.
Vreeland, George W., Steubenville, Ohio. Tuyère. 1,682,816; Sept. 4.
Vultex Limited. (See Schidrowitz, Philip, assignor.)
Wagner, H., and Adler Co. (See Drost, Thomas, assignor.)
Waite Carpet Company. (See Brandt, Stella, assignor.)
Wakefield, Richard E. B., Chester, Pa., assignor to Westinghouse Electric and Manufacturing Company. Device for controlling the flow of fluids. 1,683,317; Sept. 4.
Wakefield, Walter H., assignor to Crompton & Knowles Loom Works, Worcester, Mass. Separator for warp stop motions. 1,683,215; Sept. 4.
Wakefield, Walter H., assignor to Crompton & Knowles Loom Works, Worcester, Mass. Reed adjustment for looms. 1,683,216; Sept. 4.
Walker, Edmund H., New York, N. Y. Draft gear. 1,682,817; Sept. 4.
Walker, Edmund H., New York, N. Y. Draft gear. 1,682,818; Sept. 4.
Walker, Edward, Grantwood, N. J. Plug for cleaning tubes. 1,683,429; Sept. 4.
Walker, Norman S., assignor to The Golfada Company, New York, N. Y. Golf binder. 1,683,505; Sept. 4.
Wallace & Co. (See Gaell, Eugéne, assignor.)
Wanamaker, John, Philadelphia. (See Kratz, Howard L., assignor.)
Wanders, Hans H., Boston, Mass. Spool and the like. 1,683,273; Sept. 4.
Waner, Harry E., Akron, Ohio, assignor to The B. F. Goodrich Company, New York, N. Y. Speed-controlling device for continuous-strip-feeding means. 1,683,318; Sept. 4.
Wappler Electric Company. (See Fayer, C., and Wappler, assignors.)

Wappler, Frederick H. (See Fayer, C., and Wappler.)
Ward, James H., jr., assignor to James H. Ward & Son, Inc., Buchanan, Mich. Mail box. 1,683,217; Sept. 4.
Ward, James H., jr., assignor to James H. Ward & Son, Inc., Buchanan, Mich. Mail box. 1,683,218; Sept. 4.
Ward, James H., & Son, Inc. (See Ward, James H., jr., assignor.)
Warren Manufacturing Company, The. (See Bidwell, George L., assignor.)
Washington, Julules, Ravena, N. Y. Hand starter for automobiles. 1,683,111; Sept. 4.
Wasson, Harry C., and L. L. Collins, Franklin, Pa., assignors to Chicago Pneumatic Tool Company, New York, N. Y. Control apparatus for oil engines. 1,682,875; Sept. 4.
Waters, Harry J., San Francisco, Calif. Saxophone. 1,683,219; Sept. 4.
Watson, John W., Wayne, and R. F. Nowalk, assignors to John Warren Watson Company, Philadelphia, Pa. Shock-absorber casing. Des. 76,272; Sept. 4.
Watson, John Warren, Company. (See Watson, J. W., and Nowalk, assignors.)
Wattle, William M., assignor to Crompton & Knowles Loom Works, Worcester, Mass. Cylinder for Knowles heads. 1,683,220; Sept. 4.
Weaver, Joseph W., Lebanon, Pa. Batter and candy measure. 1,683,506; Sept. 4.
Weber, Louis J., Schenectady, N. Y., assignor to General Electric Company. Motor control. 1,683,221; Sept. 4.
Weber, Richard, Dresden-Uebigau, Germany. Producing baskets and other basketwork structures. 1,683,507; Sept. 4.
Weber, Robert, Hayange, Moselle, assignor to Les Petits Fils de François de Wendel & Cie., Paris, France. Gas-supplying apparatus. 1,683,112; Sept. 4.
Weber, William H. (See Hughes, J. R., and Weber.)
Weiner, Edwin M. R., Three Rivers, and F. F. Woods, Battle Creek, Mich. Centrifugal vacuum pump. 1,682,945; Sept. 4.
Weintraud, Alfred, London, England. Cigarette or cigar mouthpiece or holder. 1,683,508; Sept. 4.
Weisse, Hugo C., Milwaukee, Wis., assignor to The Fisk Rubber Company, Chicopee Falls, Mass. Cooling rubber-tire treads. 1,682,876; Sept. 4.
Wescott, Harvey M., Brooklyn, N. Y. Mechanic's level. 1,683,509; Sept. 4.
Westbrook, Moses H. (See Farr, B. J., and Westbrook.)
Westco-Chippewa Pump Company. (See Holmes, Robert E. L., assignor.)
Westerfield, Samuel, New York, N. Y. Electric table lamp. Des. 76,273; Sept. 4.
Westerfield, Samuel, New York, N. Y. Electric table lamp. Des. 76,274; Sept. 4.
Western Electric Company. (See Jorgensen, Edmund N., assignor.)
Western Union Telegraph Company, The. (See Mobius, C. E., and Engler, assignors.)
Westinghouse Electric & Manufacturing Company. (See Foresman, R. A., and Larrabee, assignors.)
Westinghouse Electric & Manufacturing Company. (See Herr, Herbert T., assignor.)
Westinghouse Electric and Manufacturing Company. (See Morgan, David W. R., assignor.)
Westinghouse Electric & Manufacturing Company. (See Wakefield, Richard E. B., assignor.)
Westman, Adolf, A. J., Montreal, Quebec, Canada. Rotary valve for internal-combustion engines. 1,683,275; Sept. 4.
Wetherbee, Herbert E., assignor of one-third to R. F. Grant and one-third to H. M. Hanna, Cleveland, Ohio. Treating and forming artificial fuels. 1,683,061; Sept. 4.
Wevier Ferdinand P. A., and H. Freed, Philadelphia, Pa. Electrical police signal. 1,683,274; Sept. 4.
Whelan, Howard J., Baltimore, Md. Oyster-opening machine. 1,683,113; Sept. 4.
White, Frank C., Meriden, Conn., assignor, by mesne assignments, to Simplex Player Action Company, Incorporated, New York, N. Y. Adjustable player attachment for pianos. 1,682,877; Sept. 4.
White, John, Edinburgh, Scotland. Driving mechanism for paper and other machines. 1,683,374; Sept. 4.
White Motor Company, The. (See Howell, James W., assignor.)
White, S. S., Dental Manufacturing Company, The. (See Angell, Robert C., assignor.)
Whitman, Stephen F., & Son, Inc. (See Greenwood, George W., assignor.)
Widerstand Aktiengesellschaft für Elektro-Wärme-Technik. (See Penzold, Wilhelm, assignor.)
Wiederhold, Oscar, Philadelphia, Pa. Radiant for heaters and the like. 1,683,375; Sept. 4.
Wiese, Otto C., Newton, Mass. Corset. 1,685,510; Sept. 4.
Wiggins, John H., Bartlesville, Okla. Gas holder. 1,683,005; Sept. 4.
Willi, Frederick D., assignor to The Hump Hairpin Manufacturing Company, Chicago, Ill. Hairpin-box machine. 1,682,810; Sept. 4.
Willi, Frederick D., assignor, by mesne assignments, to S. H. Goldberg, Chicago, Ill. Process and apparatus for nesting partition blanks. 1,682,878; Sept. 4.
Williams, Herbert H. (See Murray, T. E., jr., and Williams.)
Williams, Joseph A., and A. G. Karkau, assignors to The K-W Ignition Corporation, Cleveland, Ohio. Ignition apparatus. 1,683,376; Sept. 4.
Williams, William E. (See Blair, O. M., and Williams.)
Williamson, Arba G., Carnegie, asignor to Pittsburgh Train Control Company, Pittsburgh, Pa. Track-circuit system. 1,683,222; Sept. 4.
Williamson, Charles D., Fort Worth, Tex. Bib construction for overalls. 1,683,511; Sept. 4.
Williamson, Edwin O., assignor to The Eastern Machine Screw Corporation, New Haven, Conn. Thread-correcting device. 1,683,114; Sept. 4.
Wilms, Gustav O., assignor to The Reliance Company, Milwaukee, Wis. Switch-box cover. Des. 76,275; Sept. 4.
Wilson, Charles E., and H. Huenerkopf, Bridgeport, Conn., assignors to General Electric Company. Metal-tubing machine. 1,683,223; Sept. 4.
Wilson, Charles H., Pelham, N. Y. Water barrier for windows and the like. 1,683,377; Sept. 4.
Wilson, William G., West New Brighton, N. Y. Lead-pipe seal. 1,682,879; Sept. 4.
Wilson, William H., assignor to Vermont Spool & Bobbin Co., Burlington, Vt. Spool for Axminster looms. 1,683,224; Sept. 4.
Wine, William E., Toledo, Ohio. Car-door-locking device. 1,682,946; Sept. 4.
Winkley, Erastus E., Lynn, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Heel press. 1,683,115; Sept. 4.
Wire Mold Company, The. (See Frederickson, Otto A., assignor.)
Wire, Wesley M., Newberg, Oreg. Chain-pull double-socket lamp plug. 1,682,947; Sept. 4.
Wired Radio, Inc. (See Davis, Thomas M., assignor.)
Wired Radio, Inc. (See Gebhard, Louis A., assignor.)
Wired Radio, Inc. (See Mirick, Carlos B., assignor.)
Wired Radio, Inc. (See Mirick, C. B., and Crossley, assignors.)
Wired Radio, Inc. (See Young, Leo C., assignor.)
Wisbauer, Howard, Buffalo, N. Y. Rope clip. 1,683,512; Sept. 4.
Wissmar, Joseph. (See Ferree, M., and Wissmar.)
Wolf, Philippe, Paris, France. Washing apparatus for coals. 1,682,820; Sept. 4.
Wolf, Thomas, Union City, N. J. Reclining couch. 1,683,513; Sept. 4.
Wolter, Herman H., assignor to The Miller Company, Meriden, Conn. Lamp. Des. 76,276; Sept. 4.
Wood, Glendon T., Philadelphia, Pa. Carton. 1,683,116; Sept. 4.
Woods, Charles L., Alton, Ill. Boat. 1,683,276; Sept. 4.
Woods, Floyd F. (See Weiner, E. M. R., and Woods.)
Woolson, Lionel M., assignor to Packard Motor Car Company, Detroit, Mich. Internal-combustion engine. 1,682,821; Sept. 4.
Worcester Electric Supply Company. (See Parent, Joseph V., assignor.)
Wright, Edward A., Fresno, Calif. Bathtub attachment. 1,683,430; Sept. 4.
Wyatt, Joseph W., Redcar, England. Electric-lamp holder. 1,683,514; Sept. 4.
Wyman, Charles W., Claremont, N. H., assignor to Sullivan Machinery Company. Controlling apparatus. 1,683,225; Sept. 4.
Yeaton, Alton F., assignor to The Star Drilling Machine Company, Akron, Ohio. Drilling machine. 1,683,006; Sept. 4.
Yentis, Louis. (See Simon, A., and Yentis.)
Yngve, Victor, Lakewood, Ohio. Making bleach liquor as by-product in salt purification. 1,683,431; Sept. 4.
Yoas, Harvey L., Du Bois, Pa. Advertising device. 1,683,117; Sept. 4.
Young, L. A., Industries, Inc. (See Ziler, Corban H., assignor.)
Young, Leo C., Washington, D. C., assignor to Wired Radio, Inc., New York, N. Y. Radio telegraph keying system. 1,683,118; Sept. 4.
Youngstown Steel Door Company, The. (See Hendricks, Harold H., assignor.)
Ziegler, Charles E., Pittsburgh, Pa. Umbilical clamp tool. 1,683,119; Sept. 4.
Ziemmerman, Henry, assignor to Chicago Cardboard Company, Chicago, Ill. Folding-shelf display card. 1,683,007; Sept. 4.
Ziler, Corban H., Carthage, Mo., assignor to L. A. Young Industries, Inc., Detroit, Mich. Wire-spring-making machine. 1,682,949; Sept. 4.
Zimmerman, Emil C., assignor to Q & C Company, New York, N. Y. Insulated rail joint. 1,683,432; Sept. 4.
Zimmerman, Harry C., Washington, D. C. Brake mechanism. 1,683,515; Sept. 4.
Zottoli, Frank M., Boston, Mass. Tidewater system. 1,683,277; Sept. 4.
Zuck, Nicholas, Rochester, N. Y. Garment construction. 1,683,226; Sept. 4.

ALPHABETICAL LIST OF INVENTIONS

FOR WHICH

PATENTS WERE ISSUED ON THE 4TH DAY OF SEPTEMBER, 1928.

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice). Includes patents, reissues, and designs.

Abrasive scouring device, Metallic. R. B. Kingman. 1,683,357; Sept. 4.
Acid and making same, Auro mercapto carboxylic. W. Schoeller, and H. G. Allardt. 1,683,104; Sept. 4.
Adding machines and the like, Collating equipment for. R. L. Muller. 1,682,765; Sept. 4.
Advertising and display device. H. Broadley. 1,682,884; Sept. 4.
Advertising device. H. L. Yoas. 1,683,117; Sept. 4.
Agricultural implement, Universal. J. E. Boda. 1,683,018–19; Sept. 4.
Air and electric brake, Combination. M. Beck. 1,682,824; Sept. 4.
Aircraft, Pressure, temperature, and volume indicating and controlling means for. C. S. Hall. 1,682,961; Sept. 4.
Aircraft, Undercarriage or landing gear for. J. de la Cierva. 1,682,894; Sept. 4.
Aircraft with rotative wings. J. de la Cierva. 1,682,893; Sept. 4.
Airships, Construction of. V. C. Richmond. 1,683,490; Sept. 4.
Album, Phonograph-record. M. Nystrom. 1,683,479; Sept. 4.
Amplifier. A. W. Hull. 1,683,134; Sept. 4.
Amplifier of electrical currents. E. H. Loftin. 1,683,083; Sept. 4.
Amplifier, Radiofrequency. F. K. Vreeland. 1,682,874; Sept. 4.
Amusement device. O. Rouge. 1,682,803; Sept. 4.
Amusement device, Aquatic. H. Uberto. 1,683,058; Sept. 4.
Anchorage, Airship. W. Auberlin. 1,683,323; Sept. 4.
Animal trap, Automatic. A. M. Haymaker. 1,683,181; Sept. 4.
Annealing, Apparatus for. J. E. Robertshaw. 1,682,801; Sept. 4.
Anvil and gauge, Saw-setting. C. Eyrich. 1,683,174; Sept. 4.
Apron, Sanitary cushion. I. C. Richards. 1,682,799; Sept. 4.
Automobile battery. D. Cohelan. 1,683,529; Sept. 4.
Automobile body. J. Ledwinka. Des. 76,247; Sept. 4.
Automobile body front. J. Ledwinka. Des. 76,249; Sept. 4.
Automobile body side. J. Ledwinka. Des. 76,248; Sept. 4.
Automobile lifter. L. T. Biegler. 1,683,020; Sept. 4.
Automobile, Trick. J. D. Mohr. 1,682,764; Sept. 4.
Automobiles, Hand starter for. J. Washington. 1,683,111; Sept. 4.
Axle Housings, Forming. T. E. Murray, jr. 1,683,047; Sept. 4.
Bag: *See*—
Clothespin bag.
Bag lock, Mail-. A. E. Low. 1,683,294; Sept. 4.
Baking device, Potato-. R. D. Kenyon. 1,683,554; Sept. 4.
Bar-bending machine. S. Macomber. 1,683,366; Sept. 4.
Barrel-making machine. C. G. Grotnes. 1,683,248; Sept. 4.
Basket-making machine. A. H. Schmidtke. 1,682,770; Sept. 4.
Baskets and other basketwork structures, Producing. R. Weber. 1,683,507; Sept. 4.
Baskets and the like, Apparatus for making. A. H. Schmidtke. 1,682,769; Sept. 4.
Bathtub attachment. E. A. Wright. 1,683,430; Sept. 4.
Battery: *See*—
Automobile battery.
Beam, Steel walking. L. J. Black. 1,682,883; Sept. 4.
Bean-sniping machine. Q. Climer. 1,683,024; Sept. 4.
Bearing, Antifriction. S. B. Haseltine. 1,683,462; Sept. 4.
Bearing, Main-rod. J. Kindervater. 1,682,969; Sept. 4.
Bearing puller. J. W. Howell. 1,683,188–9; Sept. 4.
Bearing, Shaft. H. T. Herr. 1,683,351; Sept. 4.
Beater. L. Stiles. 1,683,497; Sept. 4.
Beating engine. J. D. Haskell. 1,683,546; Sept. 4.
Beds, Folding twin. C. E. Ball. 1,683,149; Sept. 4.
Belt, Decorative. H. B. Turner. 1,683,427; Sept. 4.
Bench standard. A. J. Miller. Des. 76,254; Sept. 4.
Binder, Temporary. A. J. Cardoza. 1,683,238; Sept. 4.
Bit: *See*—
Drill bit.
Block: *See*—
Building block. Wire-drawing block.
Block for cement sewer pipes, Liner. R. M. Dallam. 1,683,025; Sept. 4.
Blower. G. B. Linderman, jr. 1,683,474; Sept. 4.
Boat. C. L. Woods. 1,683,276; Sept. 4.
Boat. J. G. Vincent. 1,682,815; Sept. 4.
Boat, Toy. L. Lyman. Des. 76,250; Sept. 4.
Boiler. T. E. Murray. 1,683,046; Sept. 4.
Boot or shoe. W. L. Hill. 1,683,465; Sept. 4.
Bootee. J. Meltzer. Des. 76,253; Sept. 4.
Booth, Selling. A. W. Tandy. Des. 76,270; Sept. 4.
Bottle. P. A. Ginter. Des. 76,231-2; Sept. 4.
Bottle cap. R. N. Stewart. 1,683,313; Sept. 4.
Bottles, Catch drop for. J. Faulhaber. 1,683,176; Sept. 4.
Box: *See*—
Burial box. Mail box.
Fire box. Miter box.
Box. E. Gsell. Des. 76,236; Sept. 4.
Box. J. G. Huye. 1,683,192; Sept. 4.
Box. A. Rozowsky. 1,683,100; Sept. 4.
Box frame, Wooden outlet-. E. L. Scranton. 1,683,308; Sept. 4.
Box machine, Hairpin. F. D. Willi. 1,682,819; Sept. 4.
Bowl or similar article, Fish. T. W. McCreary. Des. 76,252; Sept. 4.
Brace: *See*—
Rail brace.
Brackets or the like, Arm for wall. A. P. Seidell. Des. 76,264; Sept. 4.
Brake: *See*—
Air and electric brake. Vehicle brake.
Hand brake.
Brake adjustment. J. E. Seese. 1,683,057; Sept. 4.
Brake for motor vehicles. J. F. Richardson. 1,683,097; Sept. 4.
Brake for railway cars, Hand. S. B. Haseltine. 1,683,461; Sept. 4.
Brake mechanism. H. C. Zimmermann. 1,683,515; Sept. 4.
Brake rod. W. S. Adams. 1,683,516; Sept. 4.
Briquetting. P. C. Mulligan. 1,683,094; Sept. 4.
Brush. E. L. H. Cosby. 1,683,530; Sept. 4.
Brush. C. E. Frost. 1,683,456; Sept. 4.
Brush. O. T. Hazzard. Des. 76,238; Sept. 4.
Brush. F. Sikorski. 1,683,494; Sept. 4.
Brush, Gin. H. Beaver. 1,682,950; Sept. 4.
Brush, Single-service. C. J. Francola, sr. 1,683,538; Sept. 4.
Bucket, Gasoline. P. Mueller. 1,683,571; Sept. 4.
Buckle, Harness. F. E. Burrall. Des. 76,230; Sept. 4.
Buffer for motor vehicles, Spring. W. B. Glover and W. H. Richardson. 1,683,541; Sept. 4.
Building block, Hollow clay-tile. E. G. Bone. 1,683,441; Sept. 4.
Bulk materials into batches, Method of and apparatus for handling, storing, and measuring. W. M. Venable. 1,682,872; Sept. 4.
Bumper and fender guard. H. E. Sipe. 1,682,858; Sept. 4.
Bumper, Safety. H. M. Bowman. 1,683,283; Sept. 4.
Bumpers, Clamp plate for vehicle. H. S. Jandus and J. R. Morgan. Des. 76,243–4; Sept. 4.
Burial box, Concrete. O. E. Scheel. 1,683,265; Sept. 4.
Burner: *See*—
Gas burner.
Button. W. A. Ormsbee. Des. 76,256; Sept. 4.
Button, Separable. J. E. Butler. 1,682,771; Sept. 4.
Cabinet and automatically maintaining more than one temperature therein simultaneously, Ice-cream. J. G. Peck. 1,683,406; Sept. 4.
Cable connecter. S. N. Buchanan. 1,682,738; Sept. 4.
Cable hanger. J. Blackburn. 1,682,737; Sept. 4.
Calendar or similar article, Daily. W. S. Sullivan. Des. 76,239; Sept. 4.
Calendar, Poultry-record. W. G. Kohl. 1,683,140; Sept. 4.
Camera. E. C. Thompson. 1,682,813; Sept. 4.
Camera. A. F. Victor. 1,682,873; Sept. 4.
Camera covering and making same. F. H. Reynolds. 1,683,302; Sept. 4.
Camera with motor signal, Power-driven. R. L. Stinchfield. 1,683,314; Sept. 4.
Cameras, Film-feeding means for. E. C. Thompson. 1,682,812; Sept. 4.
Candy package. G. W. Greenwood. 1,683,542; Sept. 4.
Cap or closure and liner plate, Combined. C. Hammer. 1,683,387; Sept. 4.
Capsule. J. A. Horigan. 1,683,466; Sept. 4.
Car, Cable. C. E. Mobius and W. N. Engler. 1,683,578; Sept. 4.

Car construction. W. A. Geiger. 1,683,386; Sept. 4.
Car construction. H. W. Protzeller. 1,682,981; Sept. 4.
Car device, mail-. W. R. Hole. 1,683,547; Sept. 4.
Carburetor. J. C. Coulombe. 1,683,576; Sept. 4.
Carburetor. T. Linga. 1,682,761; Sept. 4.
Carburetors, Inlet mechanism for. A. Mijares. 1,683,477; Sept. 4.
Card, Folding-self display. H. Ziemmerman. 1,683,007; Sept. 4.
Carrying case, Wheeled. N. Fanger. 1,683,029; Sept. 4.
Carton. G. T. Wood. 1,683,116; Sept. 4.
Carton, Mailing and display. W. L. Hardy. 1,682,963; Sept. 4.
Case: *See*—
Carrying case. Vanity case.
Piano case.
Cashier's protector. L. N. Beaudry. 1,682,881; Sept. 4.
Casing, Shock-absorber. J. W. Watson and R. F. Nowalk. Des. 76,272; Sept. 4.
Casing, Shutter. W. A. Riddell. 1,683,303; Sept. 4.
Casting machine, Centrifugal. C. P. Shoudy. 1,683,267; Sept. 4.
Casting, Process and apparatus for. N. Littell. 1,683,475; Sept. 4.
Catalytic apparatus. A. O. Jaeger. 1,682,787; Sept. 4.
Cell, Dry. E. C. Smith. 1,682,995; Sept. 4.
Centrifugal sprinkler. J. C. Perdue. 1,683,259; Sept. 4.
Chain. M. O. Rehfuss. 1,683,486; Sept. 4.
Chain link, Drag-. W. M. Pyor. 1,682,983; Sept. 4.
Chair: *See*—
Folding chair.
Chair back or similar article. L. E. Gordon. Des. 76,234; Sept. 4.
Chair or settee, Leg of a. C. Bauer. Des. 76,216; Sept. 4.
Check protector, Characterized. H. R. Fields. 1,682,779; Sept. 4.
Chimney cleaner. C. R. Bickford. 1,683,379; Sept. 4.
Chloroform-soluble cellulose acetate, Making. H. L. Gray and C. J. Staud. 1,683,347; Sept. 4.
Circuit arrangement for high-frequency systems with frequency amplification. M. Osnos. 1,682,768; Sept. 4.
Circuit system, Track. A. G. Williamson. 1,683,222; Sept. 4.
Clamp and reservoir, Pen. R. F. George. 1,683,030; Sept. 4.
Clamping device. J. F. Loucks. 1,683,364; Sept. 4.
Clarifier. P. S. Pine. 1,683,483; Sept. 4.
Cleaner: *See*—
Chimney cleaner.
Cleaning device for false teeth. H. G. Hall. 1,683,458; Sept. 4.
Cleaning system, Automobile. R. B. Busby and L. B. Samanski. 1,682,830; Sept. 4.
Cleansing-liquid-restoring means. M. M. and S. S. Schwab. 1,682,939; Sept. 4.
Clip: *See*—
Clothes clip. Rope clip.
Closure and sealing means, Can. W. Horlick, jr. 1,683,034; Sept. 4.
Closure for paper bags, End. L. J. Finn and P. E. Morrill. 1,682,839; Sept. 4.
Closure means for inflatable hollow rubber bodies. I. and L. Dorogi. 1,682,836; Sept. 4.
Closure, Tank. O. Evinrude. 1,683,338; Sept. 4.
Cloth, Wash. M. Y. Stockbower. 1,683,110; Sept. 4.
Clothes clip. L. H. Penley. 1,683,049; Sept. 4.
Clothespin bag. J. Hatcher. 1,683,032; Sept. 4.
Clutch, Hydraulic or vacuum. L. J. Root. 1,683,054; Sept. 4.
Clutch mechanism for reversing gear. J. C. Carlton. 1,683,528; Sept. 4.
Clutch mechanism, specially suitable for use in telegraphic apparatus. F. G. Creed. 1,682,889; Sept. 4.
Coated materials, Conditioning. G. D. Harris. 1,682,752; Sept. 4.
Coating apparatus. P. J. Barord. 1,682,823; Sept. 4.
Coating to the inside of paint buckets, Method and apparatus for applying. F. W. A. Hallerman. 1,682,751; Sept. 4.
Code machine, Electric. E. H. Hebern. 1,683,072; Sept. 4.
Coin-controlled mechanism. C. Lea. 1,683,361; Sept. 4.
Collar, Garment. S. Cagan and W. S. Nead. 1,682,831; Sept. 4.
Collodion coating composition. W. H. Gardner. 1,682,957; Sept. 4.
Commodity control. H. R. Brand. 1,682,827; Sept. 4.
Compact-plate-holding ring. W. G. Kendall. 1,683,552; Sept. 4.
Compounds and making same, Metallo mercapto. W. Schoeller and H. G. Allardt. 1,683,105; Sept. 4.
Compressor. C. L. Heisler. 1,683,182; Sept. 4.
Compressor. E. Kägi. 1,683,390; Sept. 4.
Compressor, Double-action lubricant. E. Piquerez. 1,682,932; Sept. 4.
Compressor, Lubricant. J. N. Robin. 1,682,935; Sept. 4.
Concrete forms, Retaining means for. S. S. Colt. 1,682,740; Sept. 4.
Concrete-pile follower and mounting the same. J. H. Small, jr. 1,683,108; Sept. 4.
Concrete-road machine. E. G. Carr. 1,683,382; Sept. 4.
Condenser. D. W. R. Morgan. 1,683,393; Sept. 4.
Condenser, Electrical. A. L. Terry, jr. 1,682,811; Sept. 4.
Condenser, Variable. F. A. Kolster. 1,683,558; Sept. 4.
Conduit fitting. H. A. Selah. 1,683,413–16; Sept. 4.
Cone speaker. W. E. Gibbs. 1,683,178; Sept. 4.
Connecter for spring brakes. M. Harris. 1,682,786; Sept. 4.
Contact maker and interrupter. W. C. Brinton, jr. 1,683,444; Sept. 4.
Contactor, Automatic make-and-break. H. W. Protzeller. 1,682,982; Sept. 4.
Container and dispenser, Nail. O. Breithaupt. 1,683,328; Sept. 4.
Container, Candy. J. Paull and A. A. Miller. Des. 76,259; Sept. 4.
Container for extracting apparatus. J. F. Sanftleben. 1,683,102; Sept. 4.
Container, Pluricelled. H. A. Feigelman. 1,682,838; Sept. 4.
Container with preserving, flavoring, and condiment liquids, Filling. P. Cutler. 1,683,241; Sept. 4.
Containers and packing the same, Stack of nested. P. T. Potts. 1,682,933; Sept. 4.
Control apparatus, Motor-. C. C. Runner. 1,683,210; Sept. 4.
Control device, Fluid-pressure-. J. C. Moody and L. F. Hoffman. 1,682,848; Sept. 4.
Control mechanism, Bumper-actuated. J. A. Austin. 1,682,731; Sept. 4.
Control method and apparatus. T. Appleby. 1,683,012; Sept. 4.
Control system, Fluid-fuel-. E. J. Te Pas. 1,683,213; Sept. 4.
Control, System of. E. Falcke and K. Lehmann. 1,683,175; Sept. 4.
Controller handle. W. W. Brown. 1,683,157; Sept. 4.
Controlling apparatus. J. T. Janette. 1,682,789; Sept. 4.
Controlling apparatus. C. W. Wyman. 1,683,225; Sept. 4.
Controlling business, Mechanism and method for. H. R. Brand. 1,682,828; Sept. 4.
Controlling the flow of fluids, Device for. R. E. B. Wakefield. 1,683,317; Sept. 4.
Cooker, Waterless. A. L. Rosenheimer, jr. 1,683,305; Sept. 4.
Cooler: *See*—
Water cooler.
Cooling and car-heating system, Combined engine. S. W. Rushmore. 1,683,101; Sept. 4.
Cooling and packing machine, Candy. G. Trifelos. 1,682,814; Sept. 4.
Cooling rubber-tire treads. H. C. Weisse. 1,682,876; Sept. 4.
Corn cutter. A. H. Krogan. 1,683,042; Sept. 4.
Corona-preventing apparatus. J. Biermanns. 1,683,152; Sept. 4.
Corset. O. C. Wiese. 1,683,510; Sept. 4.
Couch, Reclining. T. Wolf. 1,683,513; Sept. 4.
Coupling: *See*—
Pipe coupling. Train-pipe coupling.
Shaft coupling.
Couplings, Making pipe. L. R. Smith. 1,682,996; Sept. 4.
Cover clamp, Card-table-. J. R. Burn. Des. 76,229; Sept. 4.
Cover for an electrical switch box. O. A. Bronson. Des. 76,227; Sept. 4.
Cover for toilet seats, Paper. H. M. Saxon. 1,682,987; Sept. 4.
Cover, Street-manhole. H. and W. J. Loudenslager. 1,683,365; Sept. 4.
Cover, Switch-box. G. O. Wilms. Des. 76,275; Sept. 4.
Coveralls. H. C. Hanson. 1,682,785; Sept. 4.
Covering, Head. H. T. Blum. 1,683,233; Sept. 4.
Crane, Ladle. H. M. Lane. 1,683,472; Sept. 4.
Crystal apparatus, Piezo-electric. C. B. Mirick and A. Crossley. 1,683,093; Sept. 4.
Crystal holder, Piezo-electric. C. B. Mirick. 1,683,091–2; Sept. 4.
Cue rack or the like. T. Drost. 1,683,533; Sept. 4.
Cultivating implement. M. Oakland. 1,683,395; Sept. 4.
Cultivator. R. Aarvig. 1,683,008; Sept. 4.
Cultivators, Rake attachment for. J. Hoyle and S. T. Short 1,682,967; Sept 4.
Cutter: *See*—

Extraction of butyric acid and its homologues. J. Lefranc. 1,683,198; Sept. 4.
Extracts, Infusions, decoctions, and the like, Apparatus for use in making. L. M. Pouget. Re17,077; Sept. 4.
Fabric grip. T. G. Brady and C. Nelkin. 1,683,125; Sept. 4.
Farming apparatus, Power. H. A. Bechtelheimer and H. P. Corbin. 1,683,017; Sept. 4.
Fastener, Bag. W. C. Hiering. 1,683,074; Sept. 4.
Fastener for safety calk webs. M. I. Karn. 1,683,041; Sept. 4.
Fasteners, Making corrugated. C. O. Swenson. 1,682,863; Sept. 4.
Faucet, Receptacle-actuated. W. J. Mix. 1,683,565; Sept. 4.
Feed regulator. D. Geddes. 1,682,958; Sept. 4.
Feeding device, Oil-. C. Retschy. 1,682,853; Sept. 4.
Feeding mechanism, Sheet-. W. M. Kelly. 1,683,195; Sept. 4.
Filaments, Process and apparatus for producing. J. A. Roux. 1,683,055–6; Sept. 4.
Filling apparatus, Barrel-. W. Ernest and E. H. Baer. 1,683,337; Sept. 4.
Film, Making antistatic nitrocellulose. R. L. Stinchfield. 1,683,315; Sept. 4.
Filter. G. F. Thomas. 1,682,867; Sept. 4.
Filter element. D. F. Fesler. 1,682,879; Sept. 4.
Fire box, Locomotive-boiler. C. G. Hawley. 1,682,964; Sept. 4.
Fire escape. W. Kautz. 1,683,138; Sept. 4.
Fireplace guard. M. J. Skube, jr. 1,683,420; Sept. 4.
Fireplace, Removable. J. Kertes. 1,683,079; Sept. 4.
Fitting, Water-closet. C. C. Campus. 1,683,036; Sept. 4.
Fixture-body switch. H. J. Morey. 1,682,849; Sept. 4.
Flame shield. R. C. Angell. Des. 76,215; Sept. 4.
Floor mold, Concrete. W. S. Haldeman, 1,682,750; Sept. 4.
Flowerpot device. R. J. Thompson, and C. Fisher. 1,683,271; Sept. 4.
Fly screen. T. Mills. 1,683,204; Sept. 4.
Folding chair. S. E. Bouharoun. 1,683,327; Sept. 4.
Folding chair. E. Derwish. 1,683,532; Sept. 4.
Folding table. H. L. Haskell. 1,682,754; Sept. 4.
Folding table. L. B. Page, and J. C. Emerson. 1,683,579; Sept. 4.
Forging. B. T. Andren. 1,683,011; Sept. 4.
Forming and handling clay pots, Apparatus for. W. J. Golightly. 1,683,245; Sept. 4.
Forming drawn articles. J. E. Batie. 1,683,437; Sept. 4.
Frame: *See*—
Box frame. Lamp-shade frame.
Knitting frame. Screen frame.
Freezer, Ice-cream. B. W. McGinnis. 1,682,976; Sept. 4.
Fuel. Method and apparatus for control of the burning of liquid. E. H. Peabody. 1,683,371; Sept. 4.
Gaiter for use on suspension springs. H. Lord. 1,683,363; Sept. 4.
Game. M. Alland. 1,682,822; Sept. 4.
Game apparatus. C. A. Hewett. 1,683,185; Sept. 4.
Game apparatus. G. B. Mills, A. J. Schmiedeskamp, and H. E. Skinner. 1,682,926; Sept. 4.
Game, Card. J. W. Donovan. 1,683,026; Sept. 4.
Garage, Multistory. C. W. Ruth. 1,683,492; Sept. 4.
Garment construction. N. Zuck. 1,683,226; Sept. 4.
Garter, Roll. L. F. Keyser. 1,682,912; Sept. 4.
Gas apparatus, Control means for. P. Plantinga. 1,683,372; Sept. 4.
Gas burner. S. E. Diescher. 1,683,128; Sept. 4.
Gas generator. C. W. Botsford. 1,683,155; Sept. 4.
Gas holder. J. H. Wiggins. 1,683,005; Sept. 4.
Gas-supplying apparatus. R. Weber. 1,683,112; Sept. 4.
Gases, Using high-tension electric arcs for treatment of. E. Edwin. 1,683,534; Sept. 4.
Gauge: *See*—
Liquid gauge. Tank gauge.
Pressure gauge.
Gear, Draft. W. H. Cotton. 1,683,164; Sept. 4.
Gear, Draft. E. H. Walker. 1,682,817–18; Sept. 4.
Gear for locomotives, Power reverse. W. A. Craig. 1,682,888; Sept. 4.
Gear, Friction draft. C. W. Sherman and J. M. Hall. 1,682,806; Sept. 4.
Gearing for motor vehicles, Differential. C. R. Short and N. Hughes. 1,682,871; Sept. 4.
Gearing, Precision worm. S. I. Cone. 1,683,163; Sept. 4.
Generating motive fluid. H. Maxim. 1,683,085; Sept. 4.
Generation and distribution of mercury vapor and sealing means therefor, Apparatus for the. F. Short. 1,683,310; Sept. 4.
Generator: *See*—
Gas generator.
Generators, Circulating system for steam. S. F. Crabb. 1,682,776; Sept. 4.
Golf blinder. N. S. Walker. 1,683,505; Sept. 4.
Golf club. C. J. Jahant. Re17,076; Sept. 4.
Governor for electric motors. M. Ferree and J. Wissmar. 1,683,536; Sept. 4.
Grinder, Double-wheel. E. J. Paque. 1,683,048; Sept. 4.
Grinding-machine attachment. V. G. Honstain and A. Smithson. 1,683,354; Sept. 4.
Grinding machines, Work-feeding device for. J. Miller, jr. 1,682,925; Sept. 4.
Gripping and pulling implement. V. B. Dawson and I. B. Penton. 1,682,956; Sept. 4.
Grooving plastic material. J. W. Heltzel. 1,683,292; Sept. 4.
Guard, Dust. W. F. Cremean. 1,683,449; Sept. 4.
Guard for sheep shears, Hand. H. Kocourek. 1,682,759; Sept. 4.
Gun, Arrow-shooting. J. R. Murphy. 1,683,574; Sept. 4.
Gun sight. F. J. Schrank. 1,683,106; Sept. 4.
Gutter joint. J. W. Foerch, jr. 1,682,840; Sept. 4.
Hairspring-adjustment retainer. R. E. Amidon. 1,683,009; Sept. 4.
Hair-waving outfit. G. Decker. 1,683,531; Sept. 4.
Hand brake. J. F. O'Connor. 1,683,396; Sept. 4.
Handle: *See*—
Controller handle.
Handle construction for electric vacuum cleaners and the like. H. T. Lang. 1,683,197; Sept. 4.
Hanger: *See*—
Cable hanger.
Harvester, Seed. J. Herr. 1,683,183; Sept. 4.
Hat and making the same, Fabric. J. M. van Heusen. 1,682,870; Sept. 4.
Headlight closure for motor vehicles. E. A. P. van Lith. 1,683,503; Sept. 4.

Headlight, Dirigible. A. S. Ramsay. 1,683,300; Sept. 4.
Headlight-shifting mechanism. H. M. Knisley, C. A. Creswell, and H. F. Messer. 1,683,556; Sept. 4.
Hearing apparatus. A. von Suchorzynski. 1,683,316; Sept. 4.
Heat-exchanging apparatus. C. F. Braun. 1,683,236; Sept. 4.
Heated air or gas, Apparatus for supplying a current of. V. Elkington. 1,683,028; Sept. 4.
Heater: *See*—
Electric heater. Wave heater.
Electric metal-stock heater.
Heater. I. Caprin. 1,683,527; Sept. 4.
Heater. L. S. Lawson. 1,683,082; Sept. 4.
Heater and operating same, Liquid-conductor. M. W. Hanks. 1,683,070; Sept. 4.
Heater and operating same, Liquid-conductor. M. W. Hanks and M. Mason. 1,683,071; Sept. 4.
Heater device, Liquid-conductor. M. W. Hanks and M. Mason. 1,683,069; Sept. 4.
Heating apparatus, Solar. L. H. Shipman. 1,683,266; Sept. 4.
Heating buildings. E. Altenkirch. 1,683,434; Sept. 4.
Heating device, Crank-case-. H. F. Sinning. 1,683,312; Sept. 4.
Heating system, Electric. L. A. Kempton. 1,683,196; Sept. 4.
Heel press. E. E. Winkley. 1,683,115; Sept. 4.
Hinge. C. R. Short. 1,682,993; Sept. 4.
Hinge, Dustproof. M. Tucker. 1,683,272; Sept. 4.
Hinge, Invisible. J. Soss. 1,682,860; Sept. 4.
Hoisting mechanism. E. C. Healy. 1,683,463; Sept. 4.
Holder, Cover-. G. A. Selvig. 1,682,805; Sept. 4.
Holder, Electric-lamp. J. W. Wyatt. 1,683,514; Sept. 4.
Holder for talking machines, Record. P. D. Bodwell and H. W. Bellows. 1,683,440; Sept. 4.
Holder for talking machine, Record. W. K. Kauffman. 1,683,469; Sept. 4.
Holder, Golf-bag. E. A. De Noya. 1,683,169; Sept. 4.
Holder, Material. K. E. Anderson. 1,683,279; Sept. 4.
Holder, Rope. C. L. Simon. 1,682,994; Sept. 4.
Holder, Shade. M. Lucklesch, H. C. Doane, and A. Miller. 1,682,918; Sept. 4.
Holder, Work and tool. W. J. McConnell. 1,683,253; Sept. 4.
Holding glass plates upon grinding and polishing tables, Apparatus for. H. K. Hitchcock. 1,683,250. Sept. 4.
Hosiery. O. W. Burkett. Des. 76,288; Aug. 21.
Husking nuts, Machine for A. P. J. Voight. 1,683,004; Sept. 4.
Hut, Demountable. G. Bulbeck. 1,683,022; Sept. 4.
Hydrocarbons, Apparatus for cracking. E. C. Harthel. 1,683,184; Sept. 4.
Hydrometer. L. Edelmann. 1,683,452; Sept. 4.
Hygrostat. G. R. Lawrence. 1,682,915; Sept. 4.
Ignition apparatus. W. A. Chryst. 1,683,239; Sept. 4.
Ignition apparatus. J. A. Williams and A. G. Karkau. 1,683,376; Sept. 4.
Ignition system. J. H. Hunt. Re17,074; Sept. 4.
Implement, Combination. G. J. Rall. 1,683,485; Sept. 4.
Implement, Tillage. R. E. Dunham. 1,682,896; Sept. 4.
Improving mineral oils. F. W. Eley. 1,683,288; Sept. 4.
Index strip, Flexible. F. D. Powell. 1,683,207; Sept. 4.
Index, Visible. C. M. Conger. 1,683,447; Sept. 4.
Indexing. R. A. Jonas. 1,683,468; Sept. 4.
Indexing mechanism. E. W. Bullock and G. H. Bryan. 1,683,524; Sept. 4.
Indicating instrument. H. Schleich. 1,683,103; Sept. 4.
Indicator: *See*—
Pressure indicator. Water-level indicator.
Street and station indicator.
Indicator for memory checking devices. R. B. Kingman. 1,683,358; Sept. 4.
Inducing and increasing the flow of wells, Method of and apparatus for. C. Ochs and B. Hildebrand. 1,682,929; Sept. 4.
Induction apparatus, High-frequency. E. Thomson. 1,683,146; Sept. 4.
Inhaling apparatus for narcotics. H. W. C. Schröder. 1,683,144; Sept. 4.
Inner tube, Self-healing. W. Fetter. 1,683,454; Sept. 4.
Interconversion of reciprocating and rotary motion, Mechanism for the. A. G. M. Michell. 1,682,924; Sept. 4.
Internal-combustion engine. A. Moorhouse. 1,682,793; Sept. 4.
Internal-combustion engine. C. E. Summers. 1,682,998; Sept. 4.
Internal-combustion engine. L. M. Woolson. 1,682,821; Sept. 4.
Iron and making same, Cast. A. F. Meehan. 1,683,086–7; Sept. 4.
Irons, Steam-supply device for electric. W. H. Slonaker. 1,683,145; Sept. 4.
Ironing table. J. G. Haugh. 1,683,291; Sept. 4.
Jack: *See*—
Vehicle jack.
Jacking device for vehicle beds. G. Jaeger. 1,682,910; Sept. 4.
Jar: *See*—
Rotary jar.
Jewelry, Article of. R. A. Harris. 1,683,545; Sept. 4.
Joint: *See*—
Gutter joint. Rail joint.
Jointer. W. and E. Ross. 1,683,378; Sept. 4.
Kiln for ceramic industry, Tunnel. V. Sellier. 1,683,309; Sept. 4.
Kit, First-aid. E. Remley. 1,683,487; Sept. 4.
Kneading machine. E. F. Peterson. 1,683,051; Sept. 4.
Knife, Reversible loom dobby. J. W. Giles. 1,683,179; Sept. 4.
Knitting frame, Straight-. W. Heinitz. 1,682,965; Sept. 4.
Knitting machine. J. F. Maloney. 1,683,586; Sept. 4.
Knitting machine, Circular-. H. McAdams. 1,683,203; Sept. 4.
Knitting machines, Striping attachment for. A. Gagné. 1,683,540; Sept. 4.
Ladder. J. W. Stevenson. 1,683,422; Sept. 4.
Lamp. D. Di Carlo. 1,683,170; Sept. 4.
Lamp. H. H. Wolter. Des. 76,276; Sept. 4.
Lamp, Aeroplane. C. D. Ryder. 1,683,580; Sept. 4.
Lamp, Electric-arc. I. J. Lavoisier. 1,682,847; Sept. 4.
Lamp, Electric incandescent. S. L. Lebby. 1,682,916; Sept. 4.
Lamp, Electric table. S. Westerfield. Des. 76,273–4; Sept. 4.
Lamp-shade frame. A. Lustig. 1,683,585; Sept. 4.
Lantern, Electric. W. S. Hamm. 1,683,348; Sept. 4.
Latch and opener, Door. R. H. Thrasher. 1,683,426; Sept. 4.
Latching mechanism. A. L. Kerr. 1,683,553; Sept. 4.
Lathe, Selective geared head. C. M. Conradson. 1,683,448; Sept. 4.
Leaf for a bank deposit book. R. F. Ontcault, jr. Des. 76,257; Sept. 4.
Leather, Blank of. H. R. Samstag. Des. 76,260; Sept. 4.
Lens cutter. A. E. Maynard. 1,683,295; Sept. 4.
Level, Carpenter's. W. L. Myers. 1,683,256; Sept. 4.
Level, Mechanic's. H. M. Wescott. 1,683,509; Sept. 4.
Lever. V. Bendix. 1,683,378; Sept. 4.
Lid and manufacturing the same, Ice-cream-cabinet. H. D. Geyer. 1,683,345; Sept. 4.
Life-saving apparatus. J. Picco. 1,683,409; Sept. 4.
Lifter: *See*—
Automobile lifter. Pan lifter.
Light: *See*—
Manicuring light. Warning light.
Light for automobiles, Reversible. H. Lenfers. 1,683,141; Sept. 4.
Light impulses into enlarged graphic representations, Method of and apparatus for converting. C. F. Jenkins. 1,683,137; Sept. 4.
Light impulses into graphic representations, Method of and apparatus for converting. C. F. Jenkins. 1,683,136; Sept. 4.
Lighter. L. de Goll. 1,682,892; Sept. 4.
Lighter or similar article, Cigar. A. Simon and L. Yentis. Des. 76,265; Sept. 4.
Lighting fixture. R. W. Schweiker. Des. 76,262; Sept. 4.
Lighting-fixture globe or similar article. R. V. Owen. Des. 76,258; Sept. 4.
Line marker for roadbeds. L. F. N. Baldwin. 1,683,121; Sept. 4.
Links, Making drag. V. Hughes. 1,683,035; Sept. 4.
Liquid gauge. G. J. Huntley. 1,683,191; Sept. 4.
Liquor as by-product in salt purification, Making bleach. V. Yngve. 1,683,431; Sept. 4.
Lock: *See*—
Bag lock.
Lock. J. H. Shaw. 1,682,988; Sept. 4.
Lock for automobiles, Automatic shaft. W. B. Uffert. 1,683,428; Sept. 4.
Lock for drop-box looms, Automatic box. J. D. Groves. 1,683,543; Sept. 4.
Lock for hypodermic needles and the like. G. N. Hein. 1,683,350; Sept. 4.
Locking device, Car-door-. W. E. Wine. 1,682,946; Sept. 4.
Locomotive booster device. W. F. J. Casey and G. Cavin. 1,683,286; Sept. 4.
Locomotive structure. G. T. Foster. 1,683,455; Sept. 4.
Loom, Circular. O. A. Frederickson. 1,683,385; Sept. 4.
Loom feeler mechanism. P. F. O'Brien. 1,683,369; Sept. 4.
Loom for manufacturing nonraveling fabrics. F. Philly. 1,683,052; Sept. 4.
Loom reed, Adjustable. E. R. Holmes. 1,683,187; Sept. 4.
Looms, Dobby for. J. T. Malloy. 1,682,791; Sept. 4.
Looms, Hook mounting for pile-wire-controlling mechanism for. W. E. Smith. 1,683,495; Sept. 4.
Looms, Lay motion for. W. H. Baker. 1,683,324; Sept. 4.
Looms, Reed adjustment for. W. H. Wakefield. 1,683,216; Sept. 4.
Looms, Spool for Axminster. W. H. Wilson. 1,683,224; Sept. 4.
Loud speaker. J. E. Sederholm. Des. 76,263; Sept. 4.
Loud-speaker diaphragm. L. Stevens. Des. 76,266–7; Sept. 4.
Lubricating means. J. L. Creveling. 1,682,890; Sept. 4.
Lubricating system. D. F. Fesler. 1,682,898; Sept. 4.
Lug cap and liner plate, Combined. C. Hammer. 1,683,388; Sept. 4.
Machine for distributing fertilizer, seeds, and grain. R. Bergerioux. 1,682,825; Sept. 4.
Machine for making corrugated fasteners. C. O. Swenson. 1,682,862; Sept. 4.

Machine for making corrugated fasteners. C. O. Swenson. 1,682,864; Sept. 4.
Machine for manufacturing wooden spoons. J. Lewis. 1,682,917; Sept. 4.
Machine for operating on blanks. W. T. B. Roberts. 1,682,800; Sept. 4.
Machine for operating on shoes. H. S. Swain. 1,682,810; Sept. 4.
Machine for planing suction boxes. H. M. Ostertag. 1,682,980; Sept. 4.
Machine for removing projecting tacks from the interior of boots and shoes. O. L. Smith. 1,682,807; Sept. 4.
Machine for rolling wheel disks. E. A. Nelson. 1,683,368; Sept. 4.
Machine for spinning and winding filaments. K. Meyer-Gaus. 1,682,763; Sept. 4.
Machines, Driving mechanism for paper and other. J. White. 1,683,374; Sept. 4.
Mail box. J. H. Ward, jr. 1,683,217–18; Sept. 4.
Mandrel, Expanding. S. Cunningham. 1,683,167; Sept. 4.
Mandrel or punch, Pipe-bending. P. Mueller and A. C. Schuermann. 1,683,573; Sept. 4.
Mandrel, Pipe-bending. P. Mueller and A. C. Schuermann. 1,683,572; Sept. 4.
Manicuring light. C. L. McMurdie. 1,683,476; Sept. 4.
Manifold, Intake. H. W. Aslre. 1,683,281; Sept. 4.
Manifolding register. J. Q. Sherman and A. W. Metzner. 1,682,991; Sept. 4.
Marker, Grave. A. S. McCaskey. Des. 76,251; Sept. 4.
Material and making same, Artificial. L. Lilienfeld. 1,683,200; Sept. 4.
Measure, Batter and candy. J. W. Weaver. 1,683,506; Sept. 4.
Merchandiser, Accessory. G. A. Burandt and A. W. Nordgren. 1,683,525; Sept. 4.
Metal, Apparatus for drawing. C. Bergmann, jr. 1,683,123; Sept. 4.
Metal rolling. J. B. Tytus. 1,683,001; Sept. 4.
Metal, Rolling sheet. J. B. Tytus. 1,683,003; Sept. 4.
Metal-tempering apparatus. H. J. Gaisman and C. Schumacher. 1,683,129; Sept. 4.
Metal-tubing machine. C. E. Wilson and H. Huenerkopf. 1,683,223; Sept. 4.
Metals, Increasing the conductivity of. S. Ruben. 1,683,209; Sept. 4.
Minerals, Selective flotation of. B. S. Morrow and E. Klepetko. 1,683,569; Sept. 4.
Mining and loading apparatus. E. C. Morgan. 1,683,045; Sept. 4.
Mining machine. E. O'Toole. 1,683,297; Sept. 4.
Miter box. H. M. Hartway. 1,683,460; Sept. 4.
Mixer. R. Knapp. 1,682,970; Sept. 4.
Mixing machine, Concrete-. S. Shafer, jr. 1,683,417; Sept. 4.

Muffler. R. J. MacKenzie and L. L. Haas. 1,683,084; Sept. 4.
Napkin fold. P. J. Christman. 1,683,335; Sept. 4.
Necktie retainer. J. C. Betts. 1,682,952; Sept. 4.
Needle for repairing runs in knitted fabrics. H. T. Rollins. 1,682,985; Sept. 4.
Nesting partition blanks, Process and apparatus for. F. D. Willi. 1,682,878; Sept. 4.
Nipple, Bottle. R. T. Griffiths. 1,683,246; Sept. 4.
Nut, Cap. E. A. Nelson. Des. 76,255; Sept. 4.
Oil engine, Working. H. Junkers. 1,683,040; Sept. 4.
Oil, Process and apparatus for cracking. G. Egloff. 1,682,742; Sept. 4.
Oil Saver. C. Severns, and J. N. Hicks. 1,683,107; Sept. 4.
Oil separator. R. C. Hopkins. 1,682,757; Sept. 4.
Oil shale, Halogen treatment of. G. Egloff. 1,682,743; Sept. 4.
Oiling device for drive chains. N. C. Bremer. 1,682,829; Sept. 4.
Oscillations for use with suspension leaf springs and the like, Damping. F. L. Broussouse. 1,683,522; Sept. 4.
Oscillator, Piezo-electric crystal-controlled. L. A. Gebhard. 1,683,130; Sept. 4.
Oven, Vacuum. P. E. Klopsteg. 1,683,359; Sept. 4.
Overalls, Bib construction for. C. D. Williamson. 1,683,511; Sept. 4.
Overshoe. E. S. Bott and A. S. Funk. Des. 76,218; Sept. 4.
Oyster-opening machine. H. J. Whelan. 1,683,113; Sept. 4.
Packing device for valve stems. A. C. Lindbloom. 1,683,293; Sept. 4.
Pan lifter. V. D. Hughey, O. R. Mullins and L. M. Hughey. 1,683,190; Sept. 4.
Paper, Coated. F. W. Farrell. 1,683,453; Sept. 4.
Paper, Method and apparatus for making multiply. G. L. Bidwell. 1,682,826; Sept. 4.
Paralleling mechanism. G. M. Hollenback. 1,683,353; Sept. 4.
Pattern: *See*—
Sole pattern.
Pencil. C. W. Boman and C. Kaiser. 1,683,235; Sept. 4.
Petroleum, Distillation of. E. W. Isom. 1,683,135; Sept. 4.
Petroleum, Fractional distillation of. J. E. Bell. 1,683,150; Sept. 4.
Petroleum oil, Process and apparatus for treating. G. Egloff. 1,682,744; Sept. 4.
Petroleum oils, Method and apparatus for distilling. J. E. Bell. 1,683,151; Sept. 4.
Photo-composing machine. A. T. Koppe. 1,682,845; Sept. 4.
Photographic plates, films, and the like for indirect three-color photography, Production of. E. A. Lage. 1,683,560; Sept. 4.
Photographing machine, Automatic. G. N. Pifer. 1,682,931; Sept. 4.
Piano case. J. J. Opelt. 1,682,767; Sept. 4.
Piano, Player grand. W. B. Tunstall. 1,682,869; Sept. 4.
Pianos, Adjustable player attachment for. F. C. White. 1,682,877; Sept. 4.
Pincushion. E. L. Harrison. 76,237; Sept. 4.
Pipe collar. R. A. Hughey. 1,683,548; Sept. 4.
Pipe, conduit, or culvert unit, Sectional. C. L. Hansen. 1,683,544; Sept. 4.
Pipe coupling, Automatic train-. J. Robinson. 1,682,936; Sept. 4.
Pipe-sealing means, Flexible. B. H. Smith. 1,682,940; Sept. 4.
Piston, Compressor. H. J. Berry. 1,682,736; Sept. 4.
Piston ring. S. J. Cocks and R. E. Browning. 1,682,886; Sept. 4.
Piston-ring spring. O. E. Szekely. 1,683,269; Sept. 4.
Piston ring, Two-piece. E. C. Newton. 1,682,850; Sept. 4.
Piston, Self-expanding. J. A. Brockmeyer. 1,683,380; Sept. 4.
Plug, Chain-pull double-socket lamp. W. M. Wire. 1,682,947; Sept. 4.
Plug, Connecting. L. G. Pacent. 1,683,370; Sept. 4.
Plug for cleaning tubes. E. Walker. 1,683,429; Sept. 4.
Plug for pipe joints, Metal. E. R. Dearing. 1,682,741; Sept. 4.
Plumber's trap. F. D. Blauvelt. Des. 76,217; Sept. 4.
Plumbing device. T. P. Cummings. 1,683,336; Sept. 4.
Police signal, Electrical. F. P. A. Weyler and H. Freed. 1,683,274; Sept. 4.
Portable elevator. H. S. Germond, jr. 1,683,457; Sept. 4.
Powder puff. L. L. Raynor. 1,682,984; Sept. 4.
Press: *See*—
Heel press. Tie press.
Sheet-metal press.
Press ductor mechanism, Printing-. J. R. Blaine. 1,683,243; Sept. 4.
Press for clothes, Steam. W. S. Hadaway, jr. 1,682,903; Sept. 4.
Pressing machine. L. F. Rosenbaum and E. C. Bowers. 1,683,412; Sept. 4.
Pressing machine, Garment-. H. E. Page. 1,682,852; Sept. 4.
Pressure gauge. H. P. Kraft. 1,683,471; Sept. 4.
Pressure indicator, Tire-. J. H. Gartner. 1,683,343; Sept. 4.
Pressure mechanism for roll stands. W. A. Carpenter. 1,683,583; Sept. 4.
Priming device. H. H. Bridge. 1,682,953; Sept. 4.
Printing mechanism, Late-news and color. J. J. Halliwell. 1,683,133; Sept. 4.
Printing mechanism, Motion-picture-. F. E. Oiler. 1,682,979; Sept. 4.
Printing or embossing machine. S. O'Hara. 1,682,978; Sept. 4.
Printing plates, Core member for casting. I. E. Huribut. 1,683,356; Sept. 4.
Printing-press chase. R. McCahan. 1,682,762; Sept. 4.
Protecting wool and fur from moths. E. Meckbach. 1,682,975; Sept. 4.
Protector, Plant. R. A. Miller. 1,683,043; Sept. 4.
Puller: *See*—
Bearing puller.
Pulley attachment. C. Mackert. 1,683,562; Sept. 4.
Pulley attachment. L. F. Nielsen. 1,682,927; Sept. 4.
Pulverizing machine. E. T. Roebke. 1,683,304; Sept. 4.
Pump and the like, Rotary. J. H. Hamer. 1,682,842; Sept. 4.
Pump casing, Rotary-. R. B. L. Holmes. 1,682,756; Sept. 4.
Pump, Centrifugal vacuum. E. M. R. Weiner and F. F. Woods. 1,682,945; Sept. 4.
Pump, Rotary. F. C. Peterson. 1,683,143; Sept. 4.
Pump, Rotary liquid. J. M. Anderson. 1,683,010; Sept. 4.
Pump, Tandem-barrel well. M. T. Archer. 1,683,435; Sept. 4.
Puzzle. F. L. Babcock. 1,683,014; Sept. 4.
Quartering and thirding attachment. A. C. Gough and V. Charushin. 1,683,290; Sept. 4.
Radiant for heaters and the like. O. Wiederhold. 1,683,375; Sept. 4.
Radiation receiving conductor. M. E. Taylor and J. B. Taylor. 1,683,270; Sept. 4.

Radiator cap. J. R. Hughes and W. H. Weber. Des. 76,242; Sept. 4.
Radiator cap. W. B. Jarvis. 1,683,038; Sept. 4.
Radiator cap. W. G. Newton. 1,682,766; Sept. 4.
Radiator core. J. M. Fedders. 1,683,340; Sept. 4.
Radiator shutters, Device for controlling. W. A. Allen. 1,683,433; Sept. 4.
Radiators and the like, Closure for. G. L. Chapel. 1,683,383; Sept. 4.
Radiochassis. P. E. Edelman. 1,682,778; Sept. 4.
Radio receiving system. F. A. Kolster. 1,683,080; Sept. 4.
Radio telegraph keying system. L. C. Young. 1,683,118; Sept. 4.
Rail brace. W. W. Coleman. 1,682,887; Sept. 4.
Rail joint, Insulated. E. C. Zimmerman. 1,683,432; Sept. 4.
Rails, Fishplate for railway. E. Gruenfeldt. 1,682,960; Sept. 4.
Railroad crosstie. C. L. Arnold. 1,683,013; Sept. 4.
Raising water, Apparatus for. C. Anderson. 1,683,321; Sept. 4.
Rake. A. Morgan. 1,682,795; Sept. 4.
Razor, Ribbon safety. W. G. Moore. 1,682,794; Sept. 4.
Reatomizing device. R. F. Mills. 1,683,089; Sept. 4.
Reboring or refinishing cylinders, Machine for. B. J. Farr and M. H. Westbrook. 1,683,339; Sept. 4.
Receptacle. W. E. J. Crossby and J. Mellor. 1,683,166; Sept. 4.
Receptacle or container and making the same, Paper. F. T. Nicholson. 1,682,977; Sept. 4.
Record composition, Sound-. F. E. Layman and L. T. Richardson. 1,682,913; Sept. 4.
Recuperator. R. C. Hopkins. 1,683,577; Sept. 4.
Refining oil. H. F. Glair and O. E. Bransky. 1,683,289; Sept. 4.
Refrigerators, Cooling tank for. C. J. Berthel. 1,683,518; Sept. 4.
Register: *See*—
Manifolding register.
Regulating system. F. A. Byles. 1,683,161; Sept. 4.
Regulating system for thermionic devices. W. K. Kearsley. 1,683,194; Sept. 4.
Regulator: *See*—
Feed regulator. Vibrating regulator.
Relay, Electrical. R. M. Gilson. 1,682,749; Sept. 4.
Resilient wheel. J. H. Fletcher. 1,682,899; Sept. 4.
Resin and making same, Soluble and fusible white acetone. C. Ellis. 1,683,535; Sept. 4.
Resin and producing the same, Synthetic. L. T. Richardson. 1,682,934; Sept. 4.
Resistance device and making same. C. E. Vawter. 1,683,060; Sept. 4.
Resistance for electrically-heated boilers, Electric. W. Penzold. 1,683,050; Sept. 4.
Resistance, Grid-leak. W. Dubilier. 1,683,067; Sept. 4.
Resistance switch, Variable. J. L. Arthur. 1,683,280; Sept. 4.
Resistor. H. R. Van Deventer. 1,683,059; Sept. 4.
Reversing mechanism. C. M. F. Friden. 1,682,901; Sept. 4.
Ring: *See*—
Compact-plate-holding ring. Piston ring.
Road composition and making same. S. S. Sadtler. 1,683,493; Sept. 4.
Rod: *See*—
Brake rod.
Roofing strip. E. L. Bell and O. M. Beebe. 1,683,016; Sept 4.
Rose clip. H. Wisbauer. 1,683,512; Sept. 4.
Rotary cutter, Hot-tool. F. E. Frick. 1,682,900; Sept. 4.
Rotary jar. R. M. Pyles. 1,683,096; Sept. 4.
Rubber and the like, Manufacture of. P. Schidrowitz. 1,682,857; Sept. 4.
Rubber goods from rubber dispersions, and direct production of. P. Klein. 1,683,588; Sept. 4.
Rug. S. Brandt. Des. 76,225–6; Sept. 4.
Rule, Plumb. W. J. Carpenter and F. Shanley. 1,683,065; Sept. 4.
Rule, Roof-framing. G. P. Billings. 1,683,438; Sept. 4.
Salts of organic compounds possessing acid character, Production of soluble. M. Buchner. 1,683,159; Sept. 4.
Saxophone. H. J. Waters. 1,683,219; Sept. 4.
Scale and corrosion detector. C. W. Rice. 1,683,489; Sept. 4.
Score device. E. Deister, jr. 1,683,242; Sept. 4.
Screen: *See*—
Fly screen.
Screen for a room, Folding. H. L. Kratz. Des. 76,246; Sept. 4.
Screen frame. J. E. Sodergren. 1,683,421; Sept. 4.
Screw driver and the like, Revolving-grip. F. G. Post. 1,683,484; Sept. 4.
Seal and apparatus, Vacuum. O. Minton. 1,683,254; Sept. 4.
Seal, Closure. C. W. Barbour, and L. S. Carson. 1,683,015; Sept. 4.
Seal, Lead-pipe. W. G. Wilson. 1,682,879; Sept. 4.
Seat: *See*—
Window seat.
Seat and the like, Automobile. L. Smelker. 1,682,989; Sept. 4.
Seed and grain distributor. R. Bergerioux. 1,682,735; Sept. 4.
Seed-celling apples, Method of and apparatus for. J. W. Pease. 1,683,481; Sept. 4.
Selector. F. F. C. Rippon. 1,683,491; Sept. 4.
Semaphore and the like for automobiles. J. Beeby. 1,682,951; Sept. 4.
Separating machine, Centrifugal. K. J. Svensson and K. A. P. Norling. 1,683,424; Sept. 4.
Separator: *See*—
Oil separator.
Separator for warp stop motions. W. H. Wakefield. 1,683,215; Sept. 4.
Sewing-machine attachment. A. G. Kay. 1,683,078; Sept. 4.
Shackle, Spring. R. H. Chilton. 1,683,330–4; Sept. 4.
Shaft coupling. J. M. Dillon. 1,682,895; Sept. 4.
Shaker mechanism in agricultural devices. J. T. Ashton. 1,682,733; Sept. 4.
Shaker, Salt. J. R. Seabright. 1,682,804; Sept. 4.
Shears: *See*—
Motor shears.
Sheet-metal press. F. J. Rode. 1,682,937; Sept. 4.
Shelf, Adjustable mantel. R. A. Dambach. 1,683,168; Sept. 4.
Shelf support, Adjustable. E. R. Armstrong. 1,683,228; Sept. 4.
Shield, Sun. J. D. Hies. 1,683,186; Sept. 4.
Shingle, Composition roofing. N. Z. Butterick. 1,683,285; Sept. 4.
Shingle-simulating elements, Apparatus for producing individual-. O. D. McFarland. 1,682,921; Sept. 4.
Shock absorber. A. Thomas. 1,683,499; Sept. 4.
Shock-absorbing mechanism, Friction. G. Q. Lewis. 1,683,473; Sept. 4.
Shock-absorbing mechanism, Friction. J. F. O'Connor. 1,683,397–9; Sept. 4.
Shock-absorbing mechanism, Friction. R. J. Olander. 1,683,480; Sept. 4.
Shoe, Baby. L. J. Golden. Des. 76,233; Sept. 4.
Shoe-bottom-filling machine. A. Thoma. 1,682,865; Sept. 4.
Shoes, Making. J. Cavanagh. 1,682,773; Sept. 4.
Shoes, Manufacturing. J. S. Touché. 1,682,868; Sept. 4.
Sighting device. J. B. Henderon. 1,683,073; Sept. 4.
Sign element, Interchangeable. L. N. Moss. 1,683,570; Sept. 4.
Signal: *See*—
Police signal. Traffic signal.
Steam-pressure signal. Vehicle signal.
Signal. J. L. Stevens. 1,683,496; Sept. 4.
Signaling system, High-frequency. W. R. G. Baker. 1,683,230; Sept. 4.
Signaling system, Selective. T. M. Davis. 1,683,127; Sept. 4.
Skin cleansing and massaging device. W. J. Rancourt. 1,683,410; Sept. 4.
Slicing machine, Bread-. E. C. Brock. 1,683,445; Sept. 4.
Sliding-jaw wrench. E. Lindquist. 1,683,201; Sept. 4.
Snubber, Automobile spring. C. H. Hughes. 1,683,075; Sept. 4.
Socket, Lamp. J. V. Parent 1,682,930; Sept 4.
Socket, Lamp L. Van Gale. 1,682,944; Sept. 4.
Sole pattern. R. G. Anderson, and J. Gaines. 1,682,880; Sept. 4.
Sorting machine. A. F. Hanney. 1,683,249; Sept. 4.
Sorting machine. W. C. Stewart. 1,682,809; Sept. 4.
Sound-absorbing surface and producing same. L. B. Rymarczick. 1,682,986; Sept. 4.
Sound recording and reproducing apparatus. L. de Forest. 1,683,451; Sept. 4.
Speed-controlling device for continuous-strip-feeding means. H. E. Waner. 1,683,318; Sept. 4.
Speedometer drive. V. Hughes. 1,683,036; Sept. 4.
Speedometer-drive adapter. R. O. Helgeby. 1,683,033; Sept. 4.
Speed transmission, Variable-. H. M. Passmore. 1,683,258; Sept. 4.
Spigot and socket pipe joint. P. G. Johnson, and H. R. Morgan. 1,683,076; Sept. 4.
Spinning artificial silk, Apparatus for. G. Otto, A. Hartmann and G. Bauriedel. 1,682,797; Sept. 4.
Spinning machine. R. Barbour. 1,683,436; Sept. 4.
Spool and the like. H. H. Danders. 1,683,273; Sept. 4.
Spotlight switch. G. Aldeen. 1,683,320; Sept. 4.
Spreader for wood forms, Metallic. E. G. Brown. 1,683,446; Sept. 4.
Spreading the riser bars of commutators, Apparatus for. L. E. Poole. 1,683,261; Sept. 4.
Spring: *See*—
Piston-ring spring.
Spring forming and tempering machine. J. F. Beans and B. L. Le Roy. 1,682,734; Sept. 4.
Spring-making machine, Wire-. C. H. Ziler. 1,682,949; Sept. 4.
Sprinkler: *See*—
Centrifugal sprinkler.
Stabilizer and plaster composition containing the same. A. H. Gallagher. 1,683,539; Sept. 4.
Stamp, Time. J. W. Adion. 1,683,319; Sept. 4.
Starting and synchronizing of alternating-current dynamo-electric machines. W. A. A. Burgess. 1,683,284; Sept. 4.
Steam-pressure signal, Excess-. J. Backstatter. 1,683,148; Sept. 4.
Steering wheel. R. H. Chilton. 1,683,329; Sept. 4.

Steering wheel. H. D. Geyer. 1,683,344; Sept. 4.
Step attachment for stools. C. E. Beard. 1,682,732; Sept. 4.
Stoker. R. A. Foresman and J. E. Larrabee. 1,683,341; Sept. 4.
Stoneworking machine. G. D. Pitkin. 1,683,298; Sept. 4.
Storing dishes, Apparatus for. F. M. Butler. 1,682,885; Sept. 4.
Straw pulp and paper, Manufacturing. C. H. Dedrick. 1,682,834; Sept. 4.
Street and station indicator. K. O'Brien. 1,683,575; Sept. 4.
Stripper appliance, Removable. M. E. Tobeler. 1,683,501; Sept. 4.
Structural unit. D. H. Bitney. 1,683,439; Sept. 4.
Stuffing plaits, Apparatus for. A. S. Mitchell. 1,683,296; Sept. 4.
Stump-pulling machine. G. L. Luebbers. 1,682,973; Sept. 4.
Styrol and its homologues and the polymerization of styrol and its homologues, Polymerized. I. Ostromislensky. 1,683,402–4; Sept. 4.
Styrol from a nonhomogeneous mass of polimerized styrol, Making substantially homogeneous masses of polymerized. I. Ostromislensky and M. G. Shepard. 1,683,401; Sept. 4.
Styrols and products obtained thereby, Making vitreous polymerized. I. Ostromislensky. 1,683,405; Sept. 4.
Submarines, Mine recess of mine-planting. F. Fenaux. 1,683,177; Sept. 4.
Support, Conductor. E. B. Snyder. 1,683,109; Sept. 4.
Support, Garment. W. H. Rose. 1,682,855; Sept. 4.
Support, Screed. V. G. H. Grothe. 1,683,247; Sept. 4.
Surfacing plate glass, Apparatus for. J. H. Fox. 1,683,342; Sept. 4.
Surgical motor. A. Pfeiffer. 1,683,206; Sept. 4.
Sweatband for head coverings. H. T. Blum. 1,683,234; Sept. 4.
Sweatband for head coverings. H. T. Blum. 1,683,326; Sept. 4.
Swing, Lawn. C. H. Brown. 1,683,237; Sept. 4.
Switch: *See*—
Electric switch. Resistance switch.
Fixture-body switch. Spotlight switch.
Switch. A. H. Bayne. 1,683,231; Sept. 4.
Synchronizing apparatus. W. Brückel. 1,683,158; Sept. 4.
Synchronizing individually-driven parts at a transmitter and a receiver station, Device for H. Rassow. 1,683,301; Sept. 4.
Syringe and retaining same, Hypodermic. G. N. Hein. 1,683,349; Sept. 4.
Table: *See*—
Folding table. Ironing table.
Tack-pulling machine. C. N. Spinney and F. L. Mackenzie. 1,682,808; Sept. 4.

Traffic-controlling apparatus, Railway-. C. W. Failor. 1,682,747; Sept. 4.
Traffic-controlling apparatus, Railway-. A. J. Sorensen. 1,682,997; Sept. 4.
Traffic signal. G. L. Harris. 1,682,753; Sept. 4.
Traffic signal. O. L. Hilde. Des. 76,241; Aug. 21.
Train-pipe coupling, Automatic. J. Robinson. 1,682,854; Sept. 4.
Train retarder. J. E. Finnessy. 1,682,746; Sept. 4.
Transformer. F. J. and W. L. Kaehni. 1,683,389; Sept. 4.
Transformer, Rectifying. C. Fayer and F. H. Wappler. 1,682,748; Sept. 4.
Transformer, Variable-coupling. F. A. Kolster. 1,683,081; Sept. 4.
Transmission. P. L. Tenney. 1,682,999; Sept. 4.
Trap: *See*—
Animal trap.
Trap nest. F. Strickland. 1,683,423; Sept. 4.
Tray, Smoker's. G. E. and A. B. Schneider. Des. 76,261; Sept. 4.
Treating and forming artificial fuels. H. E. Wetherbee. 1,683,061; Sept. 4.
Treating and washing pulp, Chemically. G. A. Richter and M. O. Schur. 1,683,262; Sept. 4.
Treating crape waste. G. Bonnard. 1,683,520; Sept. 4.
Treating dried figs and dried prunes. T. W. W. Forrest. 1,683,068; Sept. 4.
Treating films, Apparatus for. W. M. Thomas. 1,682,943; Sept. 4.
Treating trees. J. E. Laffin. 1,682,760; Sept. 4.
Treating water. J. W. M. Bourgognion and C. L. Philips. 1,683,521; Sept. 4.
Trimming machine. S. J. Finn. 1,682,780; Sept. 4.
Truck, Electric-power. W. H. Coburn and C. Kiernan. 1,683,287; Sept. 4.
Tube: *See*—
Inner tube. Thermionic tube.
Tube support, Flexible. A. Champion. 1,683,023; Sept. 4.
Tubes, Producing rubber. C. E. Maynard. 1,682,923; Sept. 4.
Turbine, Hydraulic. L. F. Moody. 1,683,567; Sept. 4.
Tuyère. G. W. Vreeland. 1,682,816; Sept. 4.
Twine package and its manufacture. J. H. Damon. 1,682,777; Sept. 4.
Typewriting machine. B. C. Stickney. 1,683,582; Sept. 4.
Typewriting machine. L. A. Thatcher. 1,683,425; Sept. 4.
Upright drill, Box-column-type. D. C. Klausmeyer. 1,682,844; Sept. 4.
Valve. B. B. Annis. 1,683,322; Sept. 4.
Valve. J. A. Bishop. 1,683,153–4; Sept. 4.
Valve. E. W. Davis. 1,682,891; Sept. 4.
Valve. F. E. Key. 1,683,555; Sept. 4.
Valve. S. J. Nordstrom. 1,683,257; Sept. 4.
Valve, Automatic float. R. T. Dickey. 1,683,171; Sept. 4.
Valve, Automatic flushing. W. F. Bright. 1,683,062; Sept. 4.
Valve construction. E. Tyden. 1,683,002; Sept. 4.
Valve, Float-controlled. S. Greenhouse. 1,683,180; Sept. 4.
Valve for internal-combustion engines. C. S. Joyce. 1,683,077; Sept. 4.
Valve for internal-combustion engines, Air-vent. J. J. Vertrees, jr. 1,683,504; Sept. 4.
Valve for internal-combustion engines, Rotary. A. A. J. Westman. 1,683,275; Sept. 4.
Valve, Liquid-measuring. C. H. Ayars. 1,683,120; Sept. 4.
Valve mechanism. E. P. Buckley. 1,683,523; Sept. 4.
Valve mechanism. F. D. Holdsworth. 1,682,906–7; Sept. 4.
Valve mechanism. C. F. Osgood. 1,682,908; Sept. 4.
Valve, Thermostatic. L. F. Doen. 1,683,172; Sept. 4.
Vanity case. W. G. Kendall. 1,683,551; Sept. 4.
Vase, Glass. N. Kopp. Des. 76,245; Sept. 4.
Vault. R. L. Folmar. 1,683,537; Sept. 4.
Vehicle body. F. T. Houle. 1,683,467; Sept. 4.
Vehicle brake, Motor-. E. G. Gunn. 1,682,783; Sept. 4.
Vehicle, Child's. B. F. Colvin. 1,683,240; Sept. 4.
Vehicle control system, Motor-. J. J. Gardner. 1,682,781; Sept. 4.
Vehicle, Endless-track. O. S. Penn. 1,683,407; Sept. 4.
Vehicle jack. S. M. Salkind. 1,682,856; Sept. 4.
Vehicle, Motor. S. A. Gibson. 1,682,782; Sept. 4.
Vehicle, Motor. A. Moorhouse. 1,682,792; Sept. 4.
Vehicle pole tip. N. J. Soderstrom. 1,682,859; Sept. 4.
Vehicle signal. V. Altman. 1,683,278; Sept. 4.
Vehicles, Attachment for motor. C. E. Ryan and T. J. Schuetz. 1,683,306; Sept. 4.
Vehicles, Attachment for motor. C. E. Ryan and T. J. Schuetz. 1,683,307; Sept. 4.
Vending device, Towel-. O. M. Blair and W. E. Williams. 1,683,519; Sept. 4.

Vending machine. C. Lea. 1,683,360; Sept. 4.
Vending machine. A. Milberg. 1,683,563; Sept. 4.
Vending machine. L. P. Starkey. 1,682,942; Sept. 4.
Vending machine, Linoleum-. L. P. Rose. 1,682,802; Sept. 4.
Vending machine, Variety. V. H. Kelley. 1,683,251; Sept. 4.
Ventilating device for engine crank cases. C. E. Summers. 1,682,992; Sept. 4.
Ventilator: *See*—
Window ventilator.
Vibrating regulator. W. K. Kearsley, jr. 1,683,139; Sept. 4.
Viscose-treating apparatus. S. A. Neidich. 1,683,478; Sept. 4.
Visor and wiper motor, Combined windshield. T. B. Polk. 1,683,260; Sept. 4.
Voice device. L. G. Handy. 1,682,962; Sept. 4.
Warning light. O. C. Ritz Woller. 1,682,948; Sept. 4.
Warper. J. T. Melchor. 1,683,367; Sept. 4.
Washing and wringing machine, Clothes. M. M. Jackson. 1,683,037; Sept. 4.
Washing apparatus for coals. P. Wolf. 1,682,820; Sept. 4.
Washing fabrics, Process and apparatus for. O. Berg. 1,683,325; Sept. 4.
Washing fibrous materials, Apparatus for. F. B. Stratford. 1,682,861; Sept. 4.
Washing machine, Vehicle. H. S. Gibson. 1,682,902; Sept. 4.
Water cooler. H. K. Bush. 1,683,381; Sept. 4.
Water heater, Permanent-. K. E. Merz. 1,683,008; Sept. 4.
Water-level indicator. D. S. Jacobus. 1,682,843; Sept. 4.
Waterproof textile material, paper, and the like, Production of. C. Knopf. 1,683,470; Sept. 4.
Water system, Tide-. F. M. Zottoli. 1,683,277; Sept. 4.
Water wheel. J. J. Hoppes. 1,682,966; Sept. 4.
Waving apparatus, Permanent-. W. S. Lewis. 1,682,972; Sept. 4.
Weather strip. F. E. Caldwell. 1,683,162; Sept. 4.
Weather strip. E. R. Hopkins. 1,683,355; Sept. 4.
Weather strip. A. Miller. 1,683,564; Sept. 4.
Weft detector in regularly-moving transferrer. R. G. Turner. 1,683,214; Sept. 4.
Well capper, Temporary. G. B. Ervin. 1,683,173; Sept. 4.
Wheel: *See*—
Resilient wheel.
Steering wheel.
Water wheel.
Wheels, Making metal. E. R. Jacobi and F. H. Le Jeune. 1,682,909; Sept. 4.
Winding machines, Tension device for. W. E. Olson. 1,682,796; Sept. 4.
Window-curtain fitting. V. H. Moody and C. W. Kempton. 1,683,568; Sept. 4.
Window regulators, Connection between closures and control arms of. M. G. Hanson. 1,683,459; Sept. 4.
Window seat. C. E. Ehnborn. 1,683,027; Sept. 4.
Window, Sliding and pivoted. L. G. Siller. 1,683,419; Sept. 4.
Window ventilator. M. F. Clay. 1,682,739; Sept. 4.
Windows and the like, Water barrier for. C. H. Wilson. 1,683,377; Sept. 4.
Wiper, Windshield. C. C. Pisciotta. 1,683,053; Sept. 4.
Wire-drawing block. J. S. Phifer. 1,683,482; Sept. 4.
Wireless receiving apparatus, Antistatic arrangement in. A. E. Beattie. 1,683,122; Sept. 4.
Wood and the like, Impregnation of. H. Renner. 1,683,488; Sept. 4.
Working mechanism, Material-. E. N. Jorgensen 1,682,911; Sept. 4.
Worktable. G. D. Pitkin. 1,683,299; Sept. 4.
Wrench: *See*—
Sliding-jaw wrench.
Wrench-handle attachment. J. E. Durham, jr., and D. Hume. 1,683,384; Sept. 4.
Wringer. E. A. Hirner. 1,683,352; Sept. 4.

CLASSIFICATION OF PATENTS

ISSUED SEPTEMBER 4, 1928.

NOTE.—First number=class, second number=subclass, third number=patent number.

1— 13.6: 1,682,769
1,682,770
49.7: 1,683,328
2— 14: 1,683,505
37: 1,683,510
79: 1,682,785
98: 1,682,831
137: 1,682,952
190: 1,683,233
1,683,234
1,683,326
194: 1,682,870
227: 1,683,511
272: 1,683,226
4— 7: 1,683,063
100: 1,683,062
185: 1,683,430
237: 1,682,798
1,682,799
243: 1,682,987
5— 8: 1,683,149
73: 1,683,513
8— 19: 1,682,841
1,683,325
20: 1,683,470
9— 4: 1,683,409
18: 1,683,058
10— 1: 1,683,114
28: 1,682,862
34: 1,682,863
42: 1,682,864
95: 1,683,126
12— 16: 1,682,808
17: 1,682,810
42: 1,683,115
84: 1,682,807
142: 1,682,773
1,682,868
13— 38: 1,682,937
15— 21: 1,683,458
92: 1,683,497
104.06: 1,683,429
173: 1,683,494
176: 1,683,530
179: 1,683,456
208: 1,683,357
226: 1,683,538
229: 1,683,549
249: 1,683,379
253: 1,683,260
255: 1,683,053
16— 164: 1,682,860
168: 1,682,903
17— 9: 1,683,113

Underlay fabric for rugs. P. T. Stoffel. 246,531; Sept. 11; Serial No. 264,922; published June 26, 1928.
Zinc and copper printing plates, electrotypes. Pontiac Engraving & Electrotype Co. 246,708–9; Sept. 11; Serial Nos. 256,637–8; published June 5, 1928.
Zinc and copper printing plates, electrotypes. Pontiac Engraving & Electrotype Co. 246,710; Sept. 11; Serial No. 256,640; published June 5, 1928.

ALPHABETICAL LIST OF LABELS.

Banner Milk. For Unsweetened Evaporated Milk. Challenge Cream and Butter Association. 34,546; Sept. 11.
Brav Shoe Co. Inc. For Boxes. Hoague-Sprague Corporation. 34,548; Sept. 11.
Butter Bakt. For Bread. Zakas Bakery. 34,580; Sept. 11.
C. E. Stone Co. For Boxes. Hoague-Sprague Corporation. 34,559; Sept. 11.
Carcion Manfre & Co. For Boxes. Hoague-Sprague Corporation. 34,563; Sept. 11.
Crowley Milner & Co. For Boxes. Hoague-Sprague Corporation. 34,564; Sept. 11.
Dickson-Ives Company. For Boxes. Hoague-Sprague Corporation. 34,550; Sept. 11.
Dixie Made Rolls. For Rolls. Texas Bread Company. 34,578; Sept. 11.
Dr. Shibe's. For Boxes. Hoague-Sprague Corporation. 34,549; Sept. 11.
80 and 20—100%. Prepared Paint. J. F. Kurfees Paint Company. 34,566; Sept. 11.
55 Brand. For General Merchandise. L. P. Lewandowski. 34,567; Sept. 11.
Frisch Process. For Bread. E. Frisch. 34,547; Sept. 11.
Gilchrist's. For Boxes. Hoague-Sprague Corporation. 34,551; Sept. 11.
Great Covering Power. For Paints. Old Gold Combination White Lead & Color Corporation. 34,570; Sept. 11.
Hageman's. For Boxes. Hoague-Sprague Corporation. 34,557; Sept. 11.
Henri Boot Shop. For Boxes. Hoague-Sprague Corporation; 34,555; Sept. 11.
Litvack Shoe Co. For Boxes. Hoague-Sprague Corporation. 34,553; Sept. 11.
Lush'us Brand Peas. For Peas. Lush'us Products Co. 34,568; Sept. 11.
Nopco Cod Liver Oil. For Cod-Liver Oil For Poultry and Animal Feeding. National Oil Products Company. 34,569; Sept. 11.
Old Gold White Lead. For Paint. Old Gold Combination White Lead & Color Corporation. 34,571; Sept. 11.
Old Gold Zinc Lead. For Paint. Old Gold Combination White Lead & Color Corporation. 34,572; Sept. 11.
Parisian Style By Maurice. For Boxes. Hoague-Sprague Corporation. 34,560; Sept. 11.
Perfect Nutrition. For a Preparation of Dehydrated Vegetables. Perfect Nutrition Company. 34,574; Sept. 11.
Prosperity Shoe Co. Inc. For Boxes. Hoague-Sprague Corporation. 34,552; Sept. 11.
Queen's Dessert. For a Dessert Preparation. Queens Laboratories. 34,575; Sept. 11.
Sardinola. For Canned Sardines. K. Hovden Co. 34,565; Sept. 11.
Saxon Cullum Shoe Co. For Boxes. Hoague-Sprague Corporation. 34,558. Sept. 11.
Skovbo For Honey. J. J. Skovbo. 34,576; Sept. 11.
Tex Sandwich Loaf. For Bread. Texas Bread Company. 34,577; Sept. 11.
Thayer McNeil Company. For Boxes. Hoague-Sprague Corporation. 34,562; Sept. 11.
The French Bootery. For Boxes. Hoague-Sprague Corporation. 34,556; Sept. 11.
The Guarantee Shoe Co. For Boxes. Hoague-Sprague Corporation. 34,561; Sept. 11.
Trump Cookies. For Cookies. Pacific Coast Biscuit Company. 34,573; Sept. 11.
Whiddon's. For Boxes. Hoague-Sprague Corporation. 34,554; Sept. 11.
Whiting's Cranford Vellum. For Stationery. Whiting Paper Company. 34,579; Sept. 11.

ALPHABETICAL LIST OF PRINTS.

Dynamique Creations. For Wooden Household Furniture. Johnson-Handley-Johnson Company. 11,209; Sept. 11.
For the Hot Days Ahead. For Wheat Breakfast Food. Cream of Wheat Co. 11,207; Sept. 11.
Here's Why Hanover Shirts Are Superior. For Shirts. Hanover Shirt Company. 11,208; Sept. 11.
Say Kecks. For a Beverage—Namely, Cocoa. W. G. Keck. 11,210; Sept. 11.
Syfo. For Valves. United Products Company. 11,211; Sept. 11.
The King's Messenger Rode Far Bearing the Illuminated Scrolls of His Royal Master. For Personal Stationery. Black, Starr & Frost. 11,206; Sept. 11.

ALPHABETICAL LIST OF PATENTEES

TO WHOM

PATENTS WERE ISSUED ON THE 11TH DAY OF SEPTEMBER, 1928.

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice). **Includes patents, reissues, and designs.**

Aalborg, Christian, Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company. Circuit breaker. 1,683,589; Sept. 11.

Abbey, Orville E., Corning, Iowa. Automobile license-certificate holder. 1,683,645; Sept. 11.

Abbott, Charles M., Watertown, Mass., assignor to Samuel Cabot, Inc. Making imitation hand-rift shingles. 1,683,751; Sept. 11.

Adams, Harry F. Greenport N. Y. Building block. 1,684,050; Sept. 11.

Adams, Walter S., assignor to The J. G. Brill Company, Philadelphia, Pa. Car seat. 1,684,301; Sept. 11.

Aeolian Company, The. (See Zaiser, William, assignor.)

Ajax Electrothermic Corporation. (See Northrup, Edwin F., assignor.)

Akers, Herbert S., Montvale N. J., assignor to The Kny-Scheerer Corporation of America, New York, N. Y. Therapy and infra-red-ray lamp. 1,684,081; Sept. 11.

Aktiengesellschaft Brown, Boveri & Cie. (See Haller, Arnold, assignor.)

Alexander, Paul P., Worcester, Mass. Spark plug. 1,683,596; Sept. 11.

Allan, William, Dundee, Scotland. Internal-combustion engine. 1,684,293; Sept. 11.

Allen John W., Burnley, England. Wiping device for window screens, windows, and the like. 1,683,943; Sept. 11.

Allen, Robert C., Swartmore, Pa., assignor to Westinghouse Electric & Manufacturing Company. Power plant. 1,684,082; Sept. 11.

Alox Chemical Corporation. (See Burwell, Arthur W., assignor.)

Altgelt, Herman E., assignor to Oliver Chilled Plow Works, South Bend, Ind. Planter. 1,684,211; Sept. 11.

American Can Company. (See Lindgren, Stanley H., assignor.)

American Electric Motor Company. (See Daun, C. L., and Keller, assignors.)

American Electric Motor Company. (See Keller, Paul E., assignor.)

American Glue Company. (See Campbell, Charles H., assignor.)

American Laundry Machinery Company, The. (See Johnson, George W., assignor.)

American Multigraph Company, The. (See Morse, Lawrence H., assignor.)

American Piano Company. (See Dudley, Boyd, jr., assignor.)

American Radiator Company. (See Mertzanoff, André M., assignor.)

American Sheet and Tin Plate Company. (See McArthur, Arthur R., assignor.)

American Telephone and Telegraph Company. (See Espenschied, Lloyd, assignor.)

American Telephone and Telegraph Company. (See Nyquist, Harry, assignor.)

American Telephone and Telegraph Company. (See Stone, John S., assignor.)

Amsler-Morton Company, The. (See Morton, William A., assignor.)

Amstutz, Noah S. (See Sievers, Arthur W., assignor.)

Anderson, Alfred G., New York, N. Y. Bridge-lamp display fixture. Des. 76,278; Sept. 11.

Anderson, Francis W., Seattle, Wash. Spacer. 1,684,051; Sept. 11.

Andronowicz, John, assignor of one-half to B. Bikin, Chicago, Ill. Pottery-forming die. 1,683,855; Sept. 11.

Aplin, Ole F., Culbertson, Mont. Grain-bin feed. 1,684,338; Sept. 11.

Arndt, Franklin E., assignor to The Galion Iron Works & Mfg. Co., Galion, Ohio. Bolster. 1,684,302; Sept. 11.

Ashtabula Bow Socket Company, The. (See Leach, S. J., and Eberle, assignors.)

Asiatic Petroleum Company. (See Lawson, Joseph, assignor.)

Atherton, Alfred L., Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company. Impulse lightning arrester. 1,683,590; Sept. 11.

Atlantic Aircraft Corporation. (See Fokker, Anthony H. G., assignor.)

Austin, Dwight E., assignor to The Pickwick Corporation, Los Angeles, Calif. Valve means. 1,683,813; Sept. 11.

Austin, Harry A., Kalamazoo, Mich. Plug for electric-light sockets. 1,684,166; Sept. 11.

Automatic Electric Inc. (See Bellamy, J. I., and Gardner, assignors.)

Automatic Motor Control Corporation. (See Zitzmann, George, assignor.)

Avenson, Lorenzo M., St. Paul, Minn. Pulp beater. 1,683,597; Sept. 11.

Babcock, William H., Groton, Conn. Dirigible headlight for automobiles. 1,684,294; Sept. 11.

Baetz, Lester, Detroit, assignor to The Beals & Selkirk Trunk Co., Wyandotte, Mich. Traveling bag. Des. 76,279; Sept. 11.

Bailey, Allen E., jr. (See Brown, W. H., and Bailey.)

Bailey, Joseph O., Atlanta, Ga. Endless spiral conveyor. 1,684,254; Sept. 11.

Bailey, Rufus W., Kansas City, Mo. Automotive bus. 1,684,303; Sept. 11.

Baily, Thaddeus F., Alliance, Ohio. Automatic control device. 1,683,856; Sept. 11.

Bakelite Gesellschaft mit beschränkter Haftung. (See Seebach, Fritz, assignor.)

Baker Brothers. (See Hallenbeck, George E., assignor.)

Baker, Edward A., Mansfield, Ohio. Guard cage. 1,684,122; Sept. 11.

Balch, John L., Potlatch, Idaho. Tray. 1,683,944; Sept. 11.

Baldwin, Nathaniel, East Mill Creek, Utah. Telephone receiver. 1,683,945; Sept. 11.

Baldwin, Nathaniel, East Mill Creek, Utah. Loud speaker. 1,683,946; Sept. 11.

Banner, Otto A., assignor to The Falk Corporation, Milwaukee, Wis. Oil engine. 1,683,752; Sept. 11.

Barchfeld, Martin J., Pittsburgh, Pa. Brush for cleaning artificial dentures. 1,683,947; Sept. 11.

Barclay, Earle H. (See Patrick, W. A., and Barclay.)

Barnhart, Edwin. (See Bent, Q., Barnhart, and Wood.)

Barry, Donald S., Cedar Rapids, Iowa. Loader. 1,683,646; Sept. 11.

Barth, Joseph L., Bismarck, N. Dak. Pedograph and metatarsal-pad locator. 1,684,330; Sept. 11.

Barton, Charles W., Portsmouth, Ohio. Automatic injector. 1,683,647; Sept. 11.

Bartz, Ernst. (See Boelter, R., and Bartz.)

Bassick Manufacturing Company, The. (See Zerk, Oscar, assignor.)

Bauer, Carl, assignor to Doetsch & Bauer Company, Chicago, Ill. Settee frame or similar article. Des. 76,280; Sept. 11.

Bauer, Carl, assignor to Doetsch & Bauer Company, Chicago, Ill. Settee frame or similar article. Des. 76,281; Sept. 11.

Bauer, Carl, assignor to Doetsch & Bauer Company, Chicago, Ill. Settee frame or similar article. Des. 76,282; Sept. 11.

Bauer, Carl, assignor to Doetsch & Bauer Company, Chicago, Ill. Settee frame or similar article. Des. 76,283; Sept. 11.

Baumann, Adolph, and W. van Rijswijk, Baden, Switzerland. Closed-circuit cooling for electrical machines. 1,683,591; Sept. 11.

Bay State Fishing Company. (See Gallison, Ernest A., assignor.)

Baynard, William H., Boston, assignor to H. H. Beckwith, Brookline, Mass. Apparatus for assembling stiffeners in shoe uppers. 1,684,052; Sept. 11.

Beals & Selkirk Trunk Co., The. (See Baetz, Lester, assignor.)

Beasley, Clifford H., assignor of one-half to Parkinson and W. & B. Cowan Limited, Birmingham, England. Escapement-controlling mechanism. 1,683,648; Sept. 11.

Beauchamp, Robert B., East Cleveland, Ohio. Speed-changing mechanism. 1,684,167; Sept. 11.

Becker, Joseph, assignor of twenty-five per cent to J. Nisbet and twenty-five per cent to H. C. Woodward, Shelby, Mont. Shock absorber for drilling rigs. 1,683,948; Sept. 11.

Becker, Rudolph, North Plainfield, assignor to The Singer Manufacturing Company, Elizabeth, N. J. Chain-stitch sewing machine. 1,684,004; Sept. 11.

Beckwith, Harry H. (See Baynard, William H., assignor.)

Beckwith Manufacturing Company. (See Clapp, Albert L., assignor.)

Beeneken, Adolf, Berlin, Germany. Apparatus for obtaining synchronism between picture and music in cinematographic performances. 1,683,753; Sept. 11.

Bell, William M., Portsmouth, Ohio. Auxiliary container for toilets. 11,683,754; Sept. 11.

Beliak, Charles M., New York, N. Y. Cigarette holder. 1,684,005; Sept. 11.

Bellamy, John I., Brookfield, and J. E. Gardner, assignors, by mesne assignments, to Automatic Electric Inc., Chicago, Ill. Automatic telephone system. 1,683,857; Sept. 11.

Belote, Massie M., Valdosta, Ga. Lock for service cocks. 1,683,649; Sept. 11.
Belt, William O. (See French, Robert G., assignor.)
Benade, Walther. (See Siebert, O., Thiess, Schöner, Schmidlin, Benade, and Deicke.)
Benoit, Harold W., Watertown, N. Y. Socket and fuse plug. 1,683,598; Sept. 11.
Bent, Quincy, Bethlehem, Pa., E. Barnhart, Sparrows Point, Md., and F. W. Wood, Philadelphia, assignors to Bethlehem Steel Company, Bethlehem, Pa. Treatment of ores. 1,684,006; Sept. 11.
Berg, Boris J., New York, N. Y. Coling and fire-prevention apparatus for motion-picture projectors. 1,684,304; Sept. 11.
Bergdoll, John G., assignor, by mesne assignments, to York Ice Machinery Corporation, York, Pa. Brine circulator. 1,683,949; Sept. 11.
Berger, Christian, Brooklyn, N. Y., assignor, by mesne assignments, to Dayton Scale Company, Dayton, Ohio. Indicating chart and viewing the same. 1,684,212; Sept. 11.
Bergman, Sven R., Nahant, Mass., assignor to General Electric Company. Magnetic wedge. 1,684,255; Sept. 11.
Berke, Raymond O., Albuquerque, N. Mex. Display stand. 1,684,340; Sept. 11.
Berry, Percy W., Reading, England, assignor, by mesne assignments, to Holophane Company, Inc., New York, N. Y. Luminair. 1,683,599; Sept. 11.
Bethel, Claude, Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Rotary oiler. 1,684,341; Sept. 11.
Bethel, Claude, Wilkinsburg, and F. W. McCloskey, Edgewood, Pa., assignors to Westinghouse Electric and Manufacturing Company. Rotary oiler and ventilation. 1,684,168; Sept. 11.
Bethlehem Steel Company. (See Bent, Q., Barnhart and Wood, assignors.)
Bethlehem Steel Company. (See Cort, Stewart J., assignor.)
Bethlehem Steel Company. (See Schenck, C., and Fine, assignors.)
Betts, Arthur L., Cincinnati, Ohio, assignor to A. Davis, jr., Covington, Ky. Static eliminator. 1,683,592; Sept. 11.
Bigelow, Frank M., Jeannette, Pa. Glass mold. 1,683,755; Sept. 11.
Bikin, Bruno. (See Andronowicz, John, assignor.)
Bischof, Ulrich, Horgen, Switzerland, assignor, by mesne assignments, to Smyth Manufacturing Company, Hartford, Conn. Saddle for the tables of thread-stitching machines. 1,684,342; Sept. 11.
Blache, Hans H., Hellerup, near Copenhagen, Denmark. Stuffing box for propeller shafts. 1,683,756; Sept. 11.
Black, Archibald, Garden City, N. Y. Building construction. 1,683,600; Sept. 11.
Black, Millard S., Huntington Park, Calif. Casing perforator. 1,683,858; Sept. 11.
Blaisdell, William W., New York, N. Y. Treating oil shales and other bituminous materials. 1,684,007; Sept. 11.
Bliss, Donald M., assignor to Bodine Electric Company, Chicago, Ill. Alternating-current commutator motor. 1,683,601; Sept. 11.
Bliss, Donald M., assignor to Bodine Electric Company, Company. Control system. 1,684,256; Sept. 11.
Blizoitis, George E., Newark, N. J., assignor to Westinghouse Electric & Manufacturing Company. Microphone system. 1,684,053; Sept. 11.
Block, Leslie W., Webster Groves, Mo. Hinge. 1,683,814; Sept. 11.
Bloom, Samuel C., Chicago, Ill. Refrigerating coil. 1,684,083; Sept. 11.
Blunt, James G., Schenectady, N. Y. Locomotive-driving-box cellar. 1,684,213; Sept. 11.
Boardman, David W., Los Angeles, Calif. Ladder. 1,684,123; Sept. 11.
Bodine Electric Company. (See Bliss, Donald M., assignor.)
Boelter, Richard, and E. Bartz, Berlin, Germany, assignors to General Electric Company. Snap-switch movement. 1,684,257; Sept. 11.
Boetticher, Gustav A., assignor to Multi-Needle Engineering Corporation, Jamaica, N. Y. Mechanical movement and regulating device. 1,683,650; Sept. 11.
Boggs, Atwood L., Stoughton, Mass. Dispensing apparatus. 1,684,258; Sept. 11.
Bolinders, J. & C. G., Mekaniska Verkstads Aktiebolag. (See de Waern, Bror A., assignor.)
Borchert, Fred L., Rockford, Ill. Cup dispenser. 1,683,950; Sept. 11.
Bouslog, John G., Anaheim, Calif. Rod rack. 1,684,008; Sept. 11.
Bovard, Fritz, Bern, Switzerland. Manufacturing match packages. 1,683,651; Sept. 11.
Boyd, Elton L., and J. T. Johnson, Healdton, Okla. Combination working barrel and sand trap. 1,684,295; Sept. 11.
Brackett, Francis W., Colchester, England. Screening apparatus. 1,684,305; Sept. 11.
Brandstetter, Josef, Chicago, Ill. Automatic stop for electrically-driven phonographs. 1,684,084; Sept. 11.
Brandt, Stella, New York, N. Y., assignor to Waite Carpet Company, Oshkosh, Wis. Rug. Des. 76,284; Sept. 11.
Brauer, Walter, Seminole, Okla. Valve-seat puller. 1,683,757; Sept. 11.
Bray, Mellen N., assignor to Tubular Rivet & Stud Company, Boston, Mass. Fastener-inserting machine. 1,683,652; Sept. 11.
Bremer, Frederick G., assignor to United States Chain & Forging Company, Pittsburgh, Pa. Automobile bumper. 1,684,259; Sept. 11.
Bridgeport Brass Company. (See Oakley, Erastus G., assignor.)
Briggs Manufacturing Company. (See Lundberg, Everett E., assignor.)
Brill, J. G., Company, The. (See Adams, Walter S., assignor.)
Brill, J. G., Company, The. (See Brooks, James A., assignor.)
British Synthetics Limited. (See Higgins, Eric B., assignor.)
Brockway, Carl P., assignor to Industrial Research Corporation, Toledo, Ohio. Engine-cooling system. 1,683,602; Sept. 11.
Brodsky, Gregory, Worcester, Mass. Pressing or punching machine. 1,684,296; Sept. 11.
Brooks, James A., Kirklyn, assignor to The J. G. Brill Company, Philadelphia, Pa. Car seat. 1,684,306; Sept. 11.
Brown & Sharpe Manufacturing Company. (See Brown, Francis P., assignor.)
Brown Company. (See Johnson, Charles A., assignor.)
Brown Company. (See Richter, George A., assignor.)
Brown, Francis P., assignor to Brown & Sharpe Manufacturing Company, Providence, R. I. Grinding machine. 1,683,859; Sept. 11.
Brown, Gra C., and G. F. McNulty, assignors to The Reynolds Machine Company, Massillon, Ohio. Screw-driving machine. 1,683,815; Sept. 11.
Brown, Harold M., Elmhurst, Ill. Antenna. 1,684,009; Sept. 11.
Brown, Harold W., and A. E. Bailey, jr., Schenectady, N. Y., assignors to General Electric Company. Vibratory device. 1,684,260; Sept. 11.
Brown, Peter, Chicago, Ill., assignor to O-Cedar Corp'n. Mop. 1,683,816; Sept. 11.
Brown, Peter, Chicago, Ill., assignor to O-Cedar Corp'n. Mop head. 1,683,817; Sept. 11.
Brown, William M., Johnston, Pa. Conveyer. 1,683,653; Sept. 11.
Brown, William W., Schenectady, N. Y., assignor to General Electric Company. Automatic antenna regulator. 1,684,261; Sept. 11.
Bruce, E. (See Gray, James L., assignor.)
Brueckne, Julius R., and H. L. Clark, assignors to Gibb Welding Machines Company, Bay City, Mich. Apparatus for lap welding. 1,684,169; Sept. 11.
Buckeye Steel Castings Company, The. (See Whitridge, J. C., and Johnson, assignors.)
Budd, Howard L., Brooklyn, N. Y. Shaker or similar article. Des. 76,285; Sept. 11.
Buel, Walter, St. Louis, Mo. Grave cover. 1,683,654; Sept. 11.
Bulova, Adolph, assignor to Bulova Watch Company, Inc., New York, N. Y. Wrist-strap device. 1,684,054; Sept. 11.
Bulova Watch Company. (See Bulova, Adolph, assignor.)
Burgess, Joseph E., Astoria, assignor to The United States Printing & Lithograph Company, Brooklyn, N. Y. Display stand. 1,684,124; Sept. 11.
Burroughs Adding Machine Company. (See Butler, Thomas M., assignor.)
Burwell, Arthur W., Niagara Falls, assignor to Alox Chemical Corporation, New York, N. Y. Atomizable mobile fuel product. 1,684,125; Sept. 11.
Burwell, Ray F., Alexandria, assignor of forty-nine one-hundredths to F. Theanders, Marion, Ind. Table. 1,683,711; Sept. 11.
Busch-Sulzer Bros.-Diesel Engine Co. (See Rotter, Max, assignor.)
Busch-Sulzer Bros.-Diesel Engine Company. (See Schaeren, Ernst, assignor.)
Bush, A. G. (See Criner, Harry J., assignor.)
Butler, Thomas M., assignor to Burroughs Adding Machine Company, Detroit, Mich. Cash register. Des. 76,286; Sept. 11.
Butterfield, Andrew M., Bath, Me. Ship's steering gear. 1,684,307; Sept. 11.
Buttron, Willard C., Albany, N. Y. Traffic-signal observer. 1,683,951; Sept. 11.
Cabot Samuel, Inc. (See Abbott, Charles M., assignor.)
Cadenhead, Arnold L. (See Henry, M. B., and Cadenhead.)
Cadman, Wilson K., Eureka, Kans. Phantograph. 1,683,952; Sept. 11.
Cady, Walter H., and C. E. Rahr, Brookline, assignors to The Flintkote Company, Boston, Mass. Apparatus for handling asphalt and similar material. 1,683,604; Sept. 11.
Cage, Leland A. (See Etheredge, John H., assignor.)
Cahill, Thomas E., Ardmore, Pa. Game. 1,683,860; Sept. 11.
Cameron, Hugh M., New York, N. Y., assignor to Elder & Robinson, Chicago, Ill. Counter scale. 1,683,861; Sept. 11.
Campbell, Argyle, assignor to Enterprise Railway Equipment Company, Chicago, Ill. Railway-car construction. 1,684,010; Sept. 11.
Campbell, Charles H., Pittsburgh, Pa., assignor to American Glue Company, Boston, Mass. Rubber composition. 1,683,862; Sept. 11.

Campbell, Charles H., Pittsburgh, Pa., assignor to American Glue Company, Boston, Mass. Rubber composition. 1,683,863; Sept. 11.
Campbell, Charles H., Pittsburgh, Pa., assignor to American Glue Company, Boston, Mass. Rubber composition and process relating thereto. 1,683,864; Sept. 11.
Candee, Allan H., and E. Wildhaber, assignors to Gleason Works, Rochester, N. Y. Gear. 1,683,758; Sept. 11.
Canfield, Edith B., Holton, Kans. Picnic service kit. 1,683,603; Sept. 11.
Carborundum Company, The. (See Manley, Ralph B., assignor.)
Cardellino, Michelangelo M., Turin, Italy. Ignition apparatus for internal-combustion engines. 1,684,343; Sept. 11.
Carlson, Oscar, Minneapolis, Minn. Combined mop head and wringer. 1,683,655; Sept. 11.
Carlton, Jack C., assignor to The Carlton Machine Tool Company, Cincinnati, Ohio. Transmission for radial drill arms, elevating mechanism, and drill spindles. 1,684,344; Sept. 11.
Carlton Machine Tool Company, The. (See Carlton, Jack C., assignor.)
Caro Cloth Corporation. (See Walsh, Patrick H., assignor.)
Caron, Samuel U., Chicago, Ill. Combined mirror and support. Des. 76,289; Sept. 11.
Carr, Frank T., Hardwick, Vt. Vehicle lamp closure plate. Des. 76,290; Sept. 11.
Carr, Thomas B., Midwest, Wyo. Multiple template. 1,683,953; Sept. 11.
Carrey, John O., assignor to Carrey-Morse Engineering Company, St. Louis, Mo. Multiple fly wheel and centrifugal clutching mechanism therefor. 1,683,954; Sept. 11.
Carrey, John O., assignor to Carrey-Morse Engineering Company, St. Louis, Mo. Belt drive for refrigerating machines. 1,683,955; Sept. 11.
Carrey-Morse Engineering Company. (See Carrey, John O., assignor.)
Carson, Clarence M., assignor to The Goodyear Tire & Rubber Company, Akron, Ohio. Fabric and treating same. 1,683,759; Sept. 11.
Carter, Joseph P., Los Angeles, Calif. Vehicle signaling means. 1,683,818; Sept. 11.
Cary, Elmer E., Hollywood, Calif. Cooker. 1,684,297; Sept. 11.
Cash, Robert W., Hannibal, Mo. Child's vehicle. 1,684,298; Sept. 11.
Cast Steel Devices Company, The. (See Pierce, Elwood K., assignor.)
Centeno V. Melchor, Chicago, Ill. Safety appliance for tools. 1,684,345; Sept. 11.
Central Alloy Steel Corporation. (See O'Brien, William C., assignor.)
Centrifix Corporation. (See Hawley, Charles G., assignor.)
Chain Products Company, The. (See Hodell, Frederick G., assignor.)
Chamberlain, Ernest B. (See Chamberlain, Frederic W. and E. B.)
Chamberlain, Frederic W., Three Oaks, Mich., and E. B. Chamberlain, New York, N. Y., assignors to The Warren Featherbone Co., Three Oaks, Mich. Toy bow. 1,683,865; Sept. 11.
Chandler, Jermain, Toledo, Ohio. Tooth scrubber. 1,683,866; Sept. 11.
Chapman Valve Manufacturing Company, The. (See Nickerson, Elmer K., assignor.)
Chicago Pneumatic Tool Company. (See Davenport, Ransom W., assignor.)
Chievitz, William J., assignor to The Timken Roller Bearing Company, Canton, Ohio. Bearing. 1,683,593; Sept. 11.
Chievitz, William J., assignor to The Timken Roller Bearing Company, Canton, Ohio. Shaft bearing. 1,683,594; Sept. 11.
Chocolat Tobler Holding Co., Aktiengesellschaft. (See Egli, Arnold A., assignor.)
Christensen, Lewis H. (See D'Ardenne, W. H., Landis, and Christensen.)
Cichon, Albert J., San Antonio, Tex. Filing fixture. 1,684,011; Sept. 11.
Cieslewics, Stanislaus J. (See Paluck, Alexander E., assignor.)
Cincinnati Grinders Incorporated. (See Heim, Lewis R., assignor.)
Clapp Albert L., Danvers, assignor to Beckwith Manufacturing Company, Boston, Mass. Button board and manufacture. 1,683,605; Sept. 11.
Clark, Charles C., Indianapolis, Ind., assignor to Continental Optical Corporation, New York, N. Y. Holder for optical lenses. 1,683,712; Sept. 11.
Clark, Earl K., Mansfield, Ohio, assignor to Westinghouse Electric & Manufacturing Company. Thermal plug cut-out. 1,684,170; Sept. 11.
Clark, Homer L. (See Brueckner, J. R., and Clark.)
Clark, Irwin A. (See Kauffman, H. L., and Clark.)
Clement, Frederick C., Philadelphia, Pa. Receptacle closure. 1,684,214; Sept. 11.
Clinker, Reginald C., Bilton, near Rugby, England, assignor to General Electric Company. Antenna. 1,684,262; Sept. 11.
Clouse, William L., assignor to The National Machinery Co., Tiffin, Ohio. Gripping slide for forging machines. 1,683,956; Sept. 11.
Clouse, William L., assignor to The National Machinery Co., Tiffin, Ohio. Delivering mechanism for bolt-trimming machines. 1,683,957; Sept. 11.
Coates, William A., Chorlton-cum-Hardy, England, assignor to Westinghouse Electric & Manufacturing Company. Fluid-pressure tank. 1,683,595; Sept. 11.
Cole, Henry, Company. (See Mayer, Leo, assignor.)
Collway Laboratories, Inc. (See O'Brien, Robert J., jr., assignor.)
Columbia Woolen Company. (See McIlroy, Ronald C., assignor.)
Commonwealth Steel Company. (See Howard, Karl S., assignor.)
Concealed Door Check Company. (See Eastman, Floyd K., assignor.)
Conceale Fixture Company. (See Noack, William A., assignor.)
Condit Electrical Manufacturing Corporation. (See Dunn, William N., assignor.)
Conhaim, Fred, and L. Sweningson, Cleveland, Ohio, assignors to Conhaim Patents Corporation, New York, N. Y. Folding bed. 1,683,958; Sept. 11.
Conhaim Patents Corporation. (See Conhaim, F., and Sweningson, assignors.)
Connell, Harry W., Baldwinsville, N. Y. Nut. 1,684,215; Sept. 11.
Conners, George H., Hartford, Conn. Advertising apparatus. 1,683,760; Sept. 11.
Consolidated Ashcroft Hancock Company. (See Winslow, Sewell E., assignor.)
Consolidated Car-Heating Company. (See Hynes, Lee P., assignor.)
Continental Optical Corporation. (See Clark, Charles C., assignor.)
Coolidge, William D., Schenectady, N. Y., assignor to General Electric Company. Hot-cathode device. 1,684,263; Sept. 11.
Cope, Joseph H., Denver, Colo. Push off for sweep rakes. 1,684,264; Sept. 11.
Copland, Alexander W., Birmingham, assignor to Detroit Trust Company, Detroit, Mich. Process and apparatus for lapping gears and other objects. 1,683,869; Sept. 11.
Copland, Alexander W., Birmingham, Mich., and M. I. Mathewson, Providence, R. I., assignors to Detroit Trust Company, Detroit, Mich. Truing gears. 1,683,867; Sept. 11.
Copland, Alexander W., Birmingham, Mich., and M. I. Mathewson, Providence, R. I., assignors to Detroit Trust Company, Detroit, Mich. Machine for truing gears. 1,683,868; Sept. 11.
Copple, Oliver A., Cushing, Okla. Vehicle signal. Des. 76,287; Sept. 11.
Coppock, Frederick D., Greenville, Ohio. Textile fabric. Des. 76,288; Sept. 11.
Corman, Edward L., Upland, Calif. Fuel-control mechanism for internal-combustion engines. 1,684,126; Sept. 11.
Cort, Stewart J., assignor to Bethlehem Steel Company, Bethlehem, Pa. Regenerative open-hearth furnace. 1,683,656; Sept. 11.
Coyne, John T., Tacoma, Wash. Pipe. 1,683,959; Sept. 11.
Craig, Edward, St. Joseph, assignor to Saranac Automatic Machine Corporation, Benton Harbor, Mich. Berry basket or box. 1,683,761; Sept. 11.
Crain, John J., Waterbury, Conn. Carburetor. 1,684,085; Sept. 11.
Crawford, David F., Pittsburgh, Pa., assignor to Locomotive Stoker Company. Locomotive stoker. 1,683,960; Sept. 11.
Crawford, Frank, sr., assignor to The Crawford Manufacturing Company, New Brunswick, N. J. Stop motion for knitting machines. 1,684,308; Sept. 11.
Crawford Manufacturing Company, The. (See Crawford, Frank, sr., assignor.)
Criner, Harry J., Burlington, Iowa, assignor to L. V. Kokes and E. L. Vogeltanz, Ord, Nebr. Combined driving mechanism for washing machines and wringers. 1,683,961; Sept. 11.
Criner, Harry J., Clarinda, assignor of one-half to A. G. Bush, Davenport, Iowa. Controlling mechanism for wringers and other machinery. 1,684,265; Sept. 11.
Croft, Hiram D. (See Oakley, J., and Croft.)
Croft, Hiram D. (See Perkins, J. L., and Croft.)
Crown, William F., Aberdeen, assignor of one-fourth to V. E. Hansen, Hoquiam, and one-eighth to H. H. Wilt, Cosmopolis, Wash. Pump. 1,683,962; Sept. 11.
Currier, Hiram D., assignor to Kellogg Switchboard and Supply Company, Chicago, Ill. Radiocoil. 1,683,606; Sept. 11.
Curtis, Harry, Kemmerer, Wyo. Watch-jewel-setting polisher. 1,683,871; Sept. 11.
Curtis, Will E., Evanston, Ill. Traction apparatus. 1,683,870; Sept. 11.
D'Ardenne, Walter H., Lawndale, J. O. Landis, Fox Chase, and L. H. Christensen, assignors to Heintz Manufacturing Company, Philadelphia, Pa. Work holder for welding. 1,683,762; Sept. 11.

Daun, Carl L., and P. E. Keller, assignors, by mesne assignments, to American Electric Motor Company, Milwaukee, Wis. Bearing. 1,683,608; Sept. 11.
Davenport, Ransom W., Detroit, Mich., assignor to Chicago Pneumatic Tool Company, New York, N. Y. Heat engine. Re17,078; Sept. 11.
Davidson, Claude W. (See Wiegner, S. P., Davidson, and Gordon.)
Davis, Augustine, jr. (See Betts, Arthur L., assignor.)
Davis, Ernest, assignor to The Prosperity Company, Incorporated, Syracuse, N. Y. Heat-distributing means. 1,683,607; Sept. 11.
Davis, John H., Boston, Mass. Liquid-dispensing device. 1,684,171; Sept. 11.
Davis, Nathan H., Philadelphia, Pa., assignor to Keystone Lantern Company. Child's vehicle. 1,683,872; Sept. 11.
Dayton, James M., Torrington, Conn. Intermittent ball clutch. 1,684,172; Sept. 11.
Dayton Pump & Mfg. Company, The. (See Eickmeyer, Earl E., assignor.)
Dayton Scale Company. (See Berger, Christian, assignor.)
Dayton Scale Company. (See Hopkinson, Joseph, assignor.)
De Baun, John E., Saddle River, N. J. Building construction. 1,684,127; Sept. 11.
De Bracht, Joseph, assignor of one-half to P. Epringt, Altoona, Pa. Indicator or prompter for household or other purposes. 1,684,346; Sept. 11.
De Forest Phonofilm Corporation. (See Kaufmann, John, assignor.)
Deicke, Bernhard. (See Siebert, O., Thiess, Schöner, Schmidlin, Benade, and Deicke.)
Deicke, Bernhard. (See Thiess, K., Deicke, and Schmidlin.)
Delco-Remy Corporation. (See Turnquist, Edward, assignor.)
Dennison, Robert L., New York, N. Y. Thurst bearing. 1,684,012; Sept. 11.
De Pue, James C., assignor of one-half to C. A. Meyer, San Antonio, Tex. Variable inductance. 1,684,013; Sept. 11.
D'Escayrac, Bernard, New York, N. Y., assignor to Guerlain Perfumery Corporation of New York. Bottle. Des. 76,291; Sept. 11.
Detroit Trust Company. (See Copland, Alexander W., assignor.)
Detroit Trust Company. (See Copland, A. W., and Mathewson, assignors.)
Detroit Vapor Stove Co., The. (See Sherman, A. G., Smith, Ramig, and Roose, assignors.)
De Waern, Bror A., assignor to J. & C. G. Bolinders Mekaniska Verkstads Aktiebolag, Stockholm, Sweden. Starting and controlling device for internal-combustion motors. 1,684,299; Sept. 11.
De Walt, Raymond E., Leola, Pa. Drill or mortising machine. 1,683,763; Sept. 11.
Diamond, Jacob. (See Diamond, Marcus, S., and J.)
Diamond, Marcus, S., and J., New York, N. Y. Removable card-table cover. 1,684,173; Sept. 11.
Diamond Match Company, The. (See Wright, Charles F., assignor.)
Diamond, Samuel. (See Diamond, Marcus, S., and J.)
Dieterle, Frank, assignor to A. J. Reach Company, Philadelphia, Pa. Adjustable strap connection. 1,683,657; Sept. 11.
Dirkes, Robert F., Jamaica, assignor to The Western Union Telegraph Company, New York, N. Y. Feeding tape and projecting data therefrom. 1,684,309; Sept. 11.
Dobbs, Adna S., New Brunswick, N. J. Holder. 1,684,347; Sept. 11.
Doehler Die-Casting Co. (See Morin, Louis H., assignor.)
Doering, Charles and H. H., Chicago, Ill. Butter-print machine. 1,683,873; Sept. 11.
Doering, Henry H. (See Doering, Charles and H. H.)
Doetsch & Bauer Company. (See Bauer, Carl, assignor.)
Dolbear, Samuel H., New York, N. Y., assignor to Selective Treatment Company Limited, Montreal, Canada. Treating asbestos ore. 1,684,365; Sept. 11.
Dolbear, Samuel H., San Francisco, Calif., assignor to Selective Treatment Company Limited, Montreal, Canada. Treating asbestos ores. 1,684,366; Sept. 11.
Domore Chain Company, The. (See Olson, Percy W.)
Donovan, William J., assignor to Engravers & Printers Machinery Company, Inc., Sag Harbor, N. Y. Engraving machine. 1,684,216; Sept. 11.
Doody, Ray N., Caribou, Me. Rail joint. 1,683,874; Sept. 11.
Dorey, William A., and W. A. Ingler, Newark, Ohio, assignors, by mesne assignments, to Holophane Company, Inc., New York, N. Y. Luminair. 1,683,609; Sept. 11.
Dörr, Wilhelm E., Uberlingen, assignor to Luftschiffbau Zeppelin Gesellschaft mit Beschränkter Haftung, Friedrichshafen, Germany. Gas-inflated airship. 1,683,764; Sept. 11.
Dreux, René. (See Valentin, Paul, assignor.)
Droll, Joseph W., assignor to Droll Patents Corporation, Chicago, Ill. Mattress-beating machine. 1,683,658; Sept. 11.
Droll Patents Corporation. (See Droll, Joseph W., assignor.)
Dryden Rubber Company. (See Kinsley, Richard F., assignor.)
Dudley, Boyd, jr., Syracuse, assignor to American Piano Company, New York, N. Y. Adjusting valve throw. 1,684,014; Sept. 11.
Dudley, Boyd, jr., Syracuse, assignor to American Piano Company, New York, N. Y. Apparatus for adjusting valve throw. 1,684,015; Sept. 11.
Duffy, Charles H. and E. H., Miami, Fla. Golf practicing device. 1,683,875; Sept. 11.
Duffy, Eugene H. (See Duffy, Charles H. and E. H.)
Dunbeck, Joseph R., Rochester, assignor to The Symington Company, New York, N. Y. Mold-jarring device. 1,684,174; Sept. 11.
Dunn, William N., Medford, assignor, by mesne assignments, to Condit Electrical Manufacturing Corporation, Boston, Mass. Electric switch. 1,684,016; Sept. 11.
Durepo, Joseph E., Presque Isle, Me. Potato hiller. 1,684,017; Sept. 11.
Duspiva, Václav, Prague, Czechoslovakia. Horizontal-card system. 1,683,765; Sept. 11.
Duthie, William E., Indianapolis, Ind. Valve grinder and mechanical movement. 1,683,876; Sept. 11.
Duquenne, Camille, Paris, France. Furnace arch. 1,683,963; Sept. 11.
Dyde, Gerald R., Portland, Oreg. Waterproofing paste. 1,684,086; Sept. 11.
Eagle Manufacturing Company. (See Paull, John J., assignor.)
Eastman, Floyd K., assignor to Concealed Door Check Company, Kokomo, Ind. Doorcheck. 1,683,713; Sept. 11.
Eaton, George M., Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company. Rotary oiler. 1,684,175; Sept. 11.
Eberle, Alfred C. (See Leach, S. J., and Eberle.)
Economy Products Corporation. (See Voight, George F., assignor.)
Economy Screw Corporation. (See McCain, Paul H., assignor.)
Edblom, Lester A., and E. K. Knott, Portland, Oreg. Treating blood-stream infections. 1,683,877; Sept. 11.
Edelman, Philip E., Chicago, Ill. Oriented electrical contactor. 1,683,819; Sept. 11.
Edelmann, Emil O., Elberfeld, Germany. Device for bringing and holding heavy welding pieces in a suitable position during the welding process. 1,684,128; Sept. 11.
Edison Electric Appliance Company. (See Kelly, William D., assignor.)
Edison Electric Appliance Company. (See Randolph, Charles P., assignor.)
Edwards, Charles R., Houston, Tex. Pipe puller. 1,684,018; Sept. 11.
Edwards, William, Altaville, Calif. Hammer handle. 1,683,878; Sept. 11.
Egli, Arnold A., Klein Guemmenen, assignor, by mesne assignments, to Chocolat Tobler Holding Co., Aktiengesellschaft, Schaffhausen, Switzerland. Line-by-line typewriting machine. 1,683,964; Sept. 11.
Egloff, Gustav, assignor to Universal Oil Products Company, Chicago, Ill. Treating oils. 1,683,767; Sept. 11.
Egloff, Gustav, Chicago, Ill., and W. R. Howard, Washington, D. C., assignors to Universal Oil Products Company, Chicago, Ill. Apparatus for cracking oil. 1,683,766; Sept. 11.
Eichner, Robert F., assignor to Hickok Manufacturing Company, Inc., Rochester, N. Y. Belt buckle. Des. 76,292; Sept. 11.
Eickhoff, Theodore H., Cleveland Heights, Ohio, assignor to Pittsburgh Steel Company, Pittsburgh, Pa. Machine for forming reenforcement supports. 1,683,610; Sept. 11.
Eickmeyer, Earl E., assignor to The Dayton Pump & Mfg. Company, Dayton, Ohio. Gasoline pump. 1,684,130; Sept. 11.
Eisenberg, William, Evansville, Ind. Machine for forming helical channels. 1,684,310; Sept. 11.
Elder & Robinson. (See Cameron, Hugh M., assignor.)
Elevator Company of America. (See Rice, Joseph, assignor.)
Elevator Supplies Company. (See Shonnard, Harold W., assignor.)
Elger, Joseph C., Pittsfield, Mass. Aeroplane. 1,684,087; Sept. 11.
Elliott Core Drilling Company. (See Grainger, Reid B., assignor.)
Ellison Bronze Company. (See Ellison, Edward H., assignor.)
Ellison, Edward H., Jamestown, N. Y., assignor to Ellison Bronze Company, Inc., Falconer, N. Y. Ventilator. 1,683,820; Sept. 11.
Emmel, Karl, and H. Walbert, Mulheim-Ruhr, Germany; said Walbert assignor to said Emmel. Production of iron castings with a low carbon content. 1,683,714; Sept. 11.
Engineering Development Company. (See Johnsen, Elnor A., assignor.)
Engravers & Printers Machinery Company. (See Donovan, William J., assignor.)
Ensign Carburetor Company. (See Ensign, Roy F., assignor.)
Ensign, Roy F., South Pasadena, assignor to Ensign Carburetor Company, Los Angeles, Calif. Carburetor. 1,684,055; Sept. 11.
Enterprise Railway Equipment Company. (See Campbell, Argyle, assignor.)
Eppler, Andrew, Lynn, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Sewing machine. 1,683,659; Sept. 11.
Eppler, Andrew, Lynn, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Sewing machine. 1,683,660; Sept. 11.
Epright, Paul. (See De Bracht, Joseph, assignor.)

Erban, Richard, Vienna, Austria. Pressure device for friction gears, brakes, couplings, and the like. 1,683,715; Sept. 11.
Espenschied, Lloyd, Queens, N. Y., assignor to American Telephone and Telegraph Company. Antenna for radiotelegraphy. 1,683,716; Sept. 11.
Etheredge, John H., assignor of one-half to L. A. Cage, Taft, Tex. Cotton chopper. 1,683,768; Sept. 11.
Evans, Joseph, Youngstown, Ohio. Dipping spoon. Des. 76,293; Sept. 11.
Evans, Robert D., Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Electrical measuring instrument. 1,684,056; Sept. 11.
Everitt, James A. (See Trimpe, Emmett H., assignor.)
Ewald, Wolfgang F., assignor to Gesellschaft für Drahtlose Telegraphie m. b. H., Berlin, Germany. Loud speaker. 1,683,879; Sept. 11.
Eynon, Thomas M., Philadelphia, Pa. Operating means for liquid-level indicators. 1,683,769; Sept. 11.
Fairbairn Lawson Combe Barbour Limited. (See Moorhouse, Samuel, assignor.)
Fairbanks, E. and T., and Company. (See Hadley, Harlan A., assignor.)
Fairchild, Charles N., Milford, Conn., assignor to Fairchild Lock Corporation, New York, N. Y. Lock housing. 1,684,311; Sept. 11.
Fairchild Lock Corporation. (See Fairchild, Charles N., assignor.)
Falk Corporation, The. (See Banner, Otto A., assignor.)
Falk Corporation, The. (See Jury, Frank W., assignor.)
Fallon, John. (See Harr, F. D., and Fallon.)
Farley, Preston J., Califon, N. J. Spool. 1,684,019; Sept. 11.
Fayer, Charles. (See Wappler, F. H., Hultman, and Fayer.)
Fayer, Charles, Flushing, N. Y., assignor to Wappler Electric Company, Inc. Electrically-operated hair-curling machine. 1,683,717; Sept. 11.
Felding, William H., Pittsburgh, Pa., assignor to National Tube Company. Upsetting device. 1,683,661; Sept. 11.
Felton & Guilleaume Carlswerk Actien-Gesellschaft. (See Schürer, Eugen, assignor.)
Ferris, William S. (See Olson, Percy W., assignor.)
Fest, Herman P., San Diego, Calif. Holder for photographs, cards, plates, or similar articles. 1,683,880; Sept. 11.
Fetzer, Heinrich, Pforzheim, Germany. Earring with clamping bow. 1,684,348; Sept. 11.
Fick, Otto W. (See Kantor, J., Fick, and Traxel.)
Field, Burnham E. (See Franks, R., and Field.)
Findlay, Robert Manufacturing Company. (See Schwartz, Frederick, assignor.)
Fine, Lewis. (See Schenck, C., and Fine.)
Firth, James F., New York, N. Y. Gas-heated steam radiator. 1,684,371; Sept. 11.
Fischer, Albert C., Chicago, Ill. Expansion joint. 1,683,881; Sept. 11.
Fischer, Erich. (See Hoffa, E., and Fischer.)
Fischer, John J., Marion, Ind., and W. R. Payne, Denoya, Okla. Electrical insulator. 1,684,312; Sept. 11.
Fisher, John J., assignor of one-half to T. Wittemann, Milwaukee, Wis. Tensioning device for metal strings for musical instruments. 1,684,057; Sept. 11.
Fisher, Ralph D., and E. M. Reardon, Long Beach, Calif. Bridging plug. 1,684,266; Sept. 11.
Fisk Rubber Company, The. (See Hennessy, Daniel E., assignor.)
Fitzpatrick, John, Astoria, N. Y. Radiator inclosure. Des. 76,294; Sept. 11.
Flintkote Company, The. (See Cady, W. H., and Rahr, assignors.)
Foft, Veryl G., et al. (See White, William J., assignor.)
Fokker, Anthony H. G., Amsterdam, Netherlands, assignor to Atlantic Aircraft Corporation, Hasbrouck Heights, N. J. Tail shaft for aircraft. 1,683,965; Sept. 11.
Ford, Robert L., St. Louis, Mo. Toy pistol. 1,683,662; Sept. 11.
Forshee, Frank F., Mansfield, Ohio, assignor to Westinghouse Electric & Manufacturing Company. Range vent. 1,684,088; Sept. 11.
Forshee, Frank F., Mansfield, Ohio, assignor to Westinghouse Electric & Manufacturing Company. Waffle-iron heating element. 1,684,176; Sept. 11.
Förster, Frigyes, Budapest, Hungary. Portable building. 1,683,966; Sept. 11.
Foster, Walter, L., Whittier, Calif. Line control. 1,684,367; Sept. 11.
Foster, Wolcott C., Rutherford, N. J., and A. S. Garrett, Drexel Hill, Pa. Increasing the efficiency of zeolites in the treatment of water. 1,683,967; Sept. 11.
Franklin Development Corporation. (See Murphy, Ralph, assignor.)
Franks, Russell, Elmhurst, and B. E. Field, Douglaston, N. Y., assignors to Haynes Stellite Company. Alloy. 1,684,131; Sept. 11.
Frederick Engineering Company, The. (See Raun, Peter H., assignor.)
Frederick Iron & Steel Company, The. (See Riddell, William A., assignor.)
French, Robert G., Oak Park, assignor to W. O. Belt, Chicago, Ill. Combined radiophone and phonograph. Re17,081; Sept. 11.
Freysinger, John B., assignor to North & Judd Manufacturing Company, New Britain, Conn. Latch. 1,684,217; Sept. 11.
Fried. Krupp Aktiengesellschaft. (See Herrmann, Heinrich, assignor.)
Friedrich, Fritz R., New York, N. Y. Typewriter construction. 1,683,770; Sept. 11.
Frisk, John A., Chicago, Ill. Cream separator. 1,683,882; Sept. 11.
Gallon Iron Works & Mfg. Co., The. (See Arndt, Franklin E., assignor.)
Gallagher, Arthur D., assignor to Oliver Chilled Plow Works, South, Bend, Ind. Cultivator. 1,684,218; Sept. 11.
Gallison, Ernest A., Watertown, assignor to Bay State Fishing Company, Boston, Mass. Machine for removing scales from fish. 1,683,968; Sept. 11.
Gammeter, Harry C., Cleveland Heights, Ohio. Sign. Des. 76,295; Sept. 11.
Gangler, Paul, Esslingen, Germany, assignor to the firm: Fr. Hesser Maschinenfabrik-Aktiengesellschaft, Stuttgart-Cannstatt, Germany. Closing bag. 1,683,771; Sept. 11.
Gardner, John E. (See Bellamy, J. I., and Gardner.)
Garlock, Edward A., Baltimore, Md. Machine for pasting battery grids. 1,683,969; Sept. 11.
Garner, Ernest P., Charlotte, N. C. Window screen. 1,684,349; Sept. 11.
Garrett, Arthur S. (See Foster, W. C., and Garrett.)
Gartin, Elmer G., Claremont, N. H., assignor to Sullivan Machinery Company. Tool retainer. 1,684,177; Sept. 11.
Gebhart Folding Box Company, The. (See Gebhart, Louis H., assignor.)
Gebhart, Louis H., assignor to The Gebhart Folding Box Company, Dayton, Ohio. Box blank or similar article. Des. 76,296; Sept. 11.
Gegenheimer, William, Baldwin, N. Y. Paper-feeding means for printing presses. 1,683,718; Sept. 11.
General Electric Company. (See Bergman, Sven R., assignor.)
General Electric Company. (See Bliss, Elmer F., assignor.)
General Electric Company. (See Boelter, R., and Bartz, assignors.)
General Electric Company. (See Brown, H. W., and Bailey, assignors.)
General Electric Company. (See Brown, William W., assignor.)
General Electric Company. (See Clinker, Reginald C., assignor.)
General Electric Company. (See Coolidge, William D., assignor.)
General Electric Company. (See Hamilton, William S. H., assignor.)
General Electric Company. (See Hays, David, assignor.)
General Electric Company. (See Hewlett, E. M., and Willard, assignors.)
General Electric Company. (See Kjolseth, Ole K., assignor.)
General Electric Company. (See Love, Joseph E., assignor.)
General Electric Company. (See Macmillan, Campbell, assignor.)
General Electric Company. (See Mittag, Albert H., assignor.)
General Electric Company. (See Nixdorff, Samuel P., assignor.)
General Electric Company. (See Pratt, W. H., and Price, assignors.)
General Electric Company. (See Rich, Theodore A., assignor.)
General Electric Company. (See Ruete, William T., assignor.)
General Electric Company. (See Schiebeler, Carl, assignor.)
General Electric Company. (See Stevenson, Alexander R., jr., assignor.)
General Electric Company. (See Whitaker, Frank P., assignor.)
Gesellschaft für Drahtlose Telegraphie m. b. H. (See Ewald, Wolfgang F., assignor.)
Gesellschaft für Drahtlose Telegraphie m. b. Hallesches. (See Kummenich, Richard, assignor.)
Gesellschaft für Drahtlose Telegraphie m. b. H. (See von Arco, Georg, assignor.)
Geyer, Bertram B., Oakwood, Ohio. Display stand. Des. 76,297; Sept. 11.
Geyer, John, and J. Switzer, Michigan City, Ind. Direction-indicating switch mechanism. 1,683,970; Sept. 11.
Gibb Welding Machines Company. (See Brueckner, J. R., and Clark, assignors.)
Gibson, Hugo C., Philadelphia, Pa. Resilient wheel. 1,684,219; Sept. 11.
Gibson, John L., Brooklyn, N. Y. Check valve. 1,684,220; Sept. 11.
Gibson, William L., Camden, N. J. Device for handling containers. 1,683,772; Sept. 11.
Gidley, Columbus M. (See Taylor, W. A., and Gidley.)
Gilbert, William H., et al. (See White, William J., assignor.)
Gleason Works. (See Candee, A. H., and Wildhaber, assignors.)
Goheen, Clarence E., South Bend, Ind. Automobile signal. 1,683,663; Sept. 11.
Goldman, Alvin D. (See Methudy, Eugene R., assignor.)

Goldsmith, Alfred N., Mount Vernon, N. Y., assignor to Radio Corporation of America. Antenna. 1,683,773; Sept. 11.

Gooding, Arthur T., London, England. Combined baby's high chair and cot. 1,684,058; Sept. 11.

Goodyear Tire & Rubber Company, The. (See Carson, Clarence M., assignor.)

Goodyear Tire & Rubber Company, The. (See Haase, Jorgen I., assignor.)

Goodyear Tire & Rubber Company, The. (See Maas, Elov F., assignor.)

Goodyear Tire & Rubber Company, The. (See Snyder, Robert W., assignor.)

Gordon, Henry R. See Wiegner, S. P., Davidson, and Gordon.)

Gougnard, Henri, assignor to Société Belge des Produits Rationnels, Societe Anonyme, Ahin-lez-Huy, Belgium. Respiration gymnastic apparatus. 1,684,221; Sept. 11.

Gouty, Clarence A., Bushnell, Ill. Trolley. 1,684,178; Sept. 11.

Grabelsky, Abraham, Bronx, N. Y. Combined fountain pen and watchcase. Des. 76,298; Sept. 11.

Graham, Albert R., Toronto, Ontario, Canada. Combined cigarette box and match container. 1,683,664; Sept. 11.

Graham, Ronald V., Yonkers, N. Y. Measuring and dispensing device. 1,684,313; Sept. 11.

Grainger, Reid B., Redondo Beach, Calif., assignor to Elliott Core Drilling Company. Coring device. 1,684,089; Sept. 11.

Grasselli Dyestuff Corporation. (See Herz, R., and Zerweck, assignors.)

Grasselli Dyestuff Corporation. (See Hoffa, E., and Fischer, assignors.)

Grasselli Dyestuff Corporation. (See Mieg, W., and Job, assignors.)

Grasselli Dyestuff Corporation. (See Siebert, O., Thiess, Schöner, Schmidlin, Benade, and Diecke, assignors.)

Grasselli Dyestuff Corporation. (See Thiess, K., Deicke, and Schmidlin, assignors.)

Gray, James L., Port Arthur, assignor of one-fourth to E. Bruce, Goose Creek, Tex. Pressure and vacuum relief valve. 1,684,377; Sept. 11.

Greene, John S., Rochester, N. Y., assignor to Photostat Corporation. Photographic-print-drying apparatus. 1,683,883; Sept. 11.

Greenfield, William H., Seattle, Wash. Miter jack and coping cutter. 1,684,090; Sept. 11.

Griffith, Stanley E., Olean, N. Y. Vehicle brake. 1,683,665; Sept. 11.

Griffiths, William U., Philadelphia, Pa. Flush-control means for water-closet hoppers. 1,683,884; Sept. 11.

Griswold, Albert A., Providence, R. I. Roll roofing. 1,684,179; Sept. 11.

Grossman, Samuel, assignor to D. Klebanoff and S. Grossman, copartners trading under the firm name and style of Klebanoff and Grossman, New York, N. Y. Finger ring. Des. 76,229; Sept. 11.

Grossman, Samuel, et al. (See Grossman, Samuel, assignor.)

Gstyr, Joseph. (See Wildhaber, E., and Gstyr.)

Guerin, Louis H. (See Miotin, F. S., and Guerin.)

Guerlain Perfumery Corporation. (See d'Escayrac, Bernard, assignor.)

Guernsey, Charles O., Philadelphia, Pa. Driving mechanism for vehicles. 1,684,314; Sept. 11.

Gunn, Charles H., San Francisco, Calif. Resilient automobile seat. 1,683,885; Sept. 11.

Gunn, Gilbert, Pollokshaws, Scotland. Preserving wood and wood preservative. 1,684,222; Sept. 11.

Gurney, Erving R. (See Masury, A. F., and Gurney.)

Guyer, Elsie. (See Ross, James G., assignor.)

Haase, Jorgen I., assignor to The Goodyear Tire & Rubber Company, Akron, Ohio. Printing machine. 1,683,744; Sept. 11.

Hadaway, John B., Swampscott, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Welt-attaching mechanism. 1,683,666; Sept. 11.

Hadfield, Robert A., Westminster, England. Manufacture of steel. 1,683,886; Sept. 11.

Hadley, Harlan A., assignor to E. and T. Fairbanks and Company, St. Johnsbury, Vt. Scale casing. Des. 76,300; Sept. 11.

Hadley, Idale. (See Tavender, Walter K., assignor.)

Hager, Eugen, Oerlikon, near Zurich, Switzerland. Baking and roasting appliance. 1,683,611; Sept. 11.

Hahn, Johann, Cleveland, Ohio. Bloom shears. Re17,079; Sept. 11.

Haik, Louis W., Hackensack, N. J., assignor to Northam Warren Corporation, New York, N. Y. Box. 1,684,091; Sept. 11.

Hall, Frank A. (See Thomson, Archibald, assignor.)

Hallenbeck, George E., assignor, by mesne assignments, to Baker Brothers, Toledo, Ohio. Multiple-tool drill 1,683,667; Sept. 11.

Haller, Arnold, assignor to Aktiengesellschaft Brown, Boveri & Cie., Baden, Switzerland. Electric control apparatus. 1,684,315; Sept. 11.

Hallowell, Clifton C., Drexel Hill, Pa., assignor to The S. S. White Dental Manufacturing Company. Artificial tooth. 1,683,613; Sept. 11.

Hallowell, Clifton C., Drexel Hill, Pa., assignor to The S. S. White Dental Manufacturing Company. Artificial tooth. 1,683,614; Sept. 11.

Hallowell, Louis S., Kansas City, Mo., assignor to The Prosperity Company Inc., Syracuse, N. Y. Ironing machine. 1,683,612; Sept. 11.

Hamill, William W., Birmingham, England. Fluid-flow meter. 1,684,316; Sept. 11.

Hamill, William W., Birmingham, England. Rotary-type flow meter. 1,684,350; Sept. 11.

Hamilton, William S. H., Schenectady, N. Y., assignor to General Electric Company. Motor controller. 1,684,267; Sept. 11.

Hanak, Edward, Houston, Tex. Traveling conveyer tray. 1,684,092; Sept. 11.

Hansen, Carl, Esbjerg, and P. Leth, Copenhagen, Denmark; said Leth assignor to said Hansen. Vane for fishery. 1,683,668; Sept. 11.

Hansen, Gustav, Victoria, British Columbia, Canada. Ship rat guard. 1,683,615; Sept. 11.

Hansen, Victor E., et al. (See Crown, William F., assignor.)

Hardsocg, Lester C., assignor to Hardsocg Manufacturing Company, Ottumwa, Iowa. Drill boxing. 1,684,351; Sept. 11.

Hardsocg Manufacturing Company. (See Hardsocg, Lester C., assignor.)

Harmouth, Gust, Yale, Okla. Coin card. 1,683,971; Sept. 11.

Harms, Johannes F. K., Amsterdam, assignor to Jonkheer Meester Doctor Jelle Roelof Clifford Kocq van Breugel, Driebergen, Netherlands. Arc welding system. 1,684,317; Apr. 11.

Harr, Forest D., Boulder, and J. Fallon, Fort Collins, Colo.; said Harr assignor to G. O. Ritcheson, Pendleton, Oreg. Wire-splicing-sleeve wrench. 1,683,887; Sept. 11.

Harralson, Edward, Washington, D. C. Machine for dispensing paper towels. 1,683,719; Sept. 11.

Harris, Carl C., Orange, Mass. Stamp box. 1,684,318; Sept. 11.

Harris, Joseph D., assignor to McCord Radiator & Mfg. Co., Detroit, Mich. Radiator core. 1,683,821; Sept. 11.

Harris, Louis, Birmingham, Ala. Mail box. Des. 76,301; Sept. 11.

Harrison, Charles D., and P. D. Lindsey, Hominy, Okla. Receptacle closure. 1,683,888; Sept. 11.

Harshbarger, Lincoln E. (See Smith, James O., assignor.)

Hart, William E., San Jose, Calif. Automobile bumper. 1,684,093; Sept. 11.

Hartford-Empire Company. (See Howard, George E., assignor.)

Hartford-Empire Company. (See Miller, William J., assignor.)

Haseltine, Stacy B., assignor to W. H. Miner, Inc., Chicago, Ill. Shock-absorbing mechanism. 1,683,822; Sept. 11.

Hatmaker, James R., Paris, France. Ice cream and making same. 1,684,094; Sept. 11.

Hawley, Charles G., Chicago, Ill. Steepled radiant-heat steam boiler. 1,683,972; Sept. 11.

Hawley, Charles G., Chicago, Ill., assignor to Centrifix Corporation, Cleveland, Ohio. Centrifugal fixture. 1,684,020; Sept. 11.

Hawley, Charles G., Chicago, Ill., assignor to Centrifix Corporation, Cleveland, Ohio. Separator. 1,684,021; Sept. 11.

Hawley, Charles G., Chicago, Ill., assignor to Centrifix Corporation, Cleveland, Ohio. Receiver separator. 1,684,022; Sept. 11.

Hawley, Charles G., Chicago, Ill., assignor to Centrifix Corporation, Cleveland, Ohio. Automobile air cleaner. 1,684,023; Sept. 11.

Hawley, Charles G., Chicago, Ill., assignor to Centrifix Corporation, Cleveland, Ohio. Steam purifier. 1,684,024; Sept. 11.

Hawley, Charles G., Chicago, Ill., assignor to Centrifix Corporation, Cleveland, Ohio. Line filter. 1,684,025; Sept. 11.

Hawley, Charles G., Chicago, Ill., assignor to Centrifix Corporation, Cleveland, Ohio. Roof ventilator. 1,684,026; Sept. 11.

Hayne, William G., Brooklyn, N. Y. Food container and heater. 1,683,889; Sept. 11.

Haynes Stellite Company. (See Franks, R., and Field, assignors.)

Hays, David, Bridgeport, Conn., assignor to General Electric Company. Incandescent-lamp socket. 1,684,268; Sept. 11.

Heaton, Herman C., Chicago, Ill. Dumping vehicle. 1,684,095; Sept. 11.

Hebner, George J., Rochester, N. Y. Fastening device for ladders. 1,684,269; Sept. 11.

Heichert, Herman S., Pittsburgh, Pa., assignor to Pittsburgh Plate Glass Company. Leer construction. 1,683,973; Sept. 11.

Heiden, Simon, Detroit, Mich. Locomotive-tender-tank feeder. 1,684,319; Sept. 11.

Heil Co., The. (See Heil, Julius P., assignor.)

Heil, Julius P., assignor to The Heil Co., Milwaukee, Wis. Manhole cover. 1,683,823; Sept. 11.

Heim, Lewis R., Danbury, Conn., assignor, by mesne assignments, to Cincinnati Grinders Incorporated, Cincinnati, Ohio. Grinding apparatus. 1,683,974; Sept. 11.

Heintz Manufacturing Company. (See D'Ardenne, W. H., Landis, and Christensen, assignors.)

Heitmiller, Herbert W., Seattle, Wash. Trolling spoon. 1,683,890; Sept. 11.

Henderson, Albert E., Toronto, Ontario, Canada. Manufacturing tire tubes. 1,683,669; Sept. 11.

Henderson, Ralph I., Charleston, W. Va. Tool. 1,683,775; Sept. 11.

Hennessy, Daniel E., Akron, Ohio, assignor to The Fisk Rubber Company, Chicopee Falls, Mass. Fabric handling. 1,683,777; Sept. 11.

Hennessy, James J., New York, N. Y. Lubricator distributor. 1,683,616; Sept. 11.

Hennessy, James J., New York, N. Y. Pump for lubricators or the like. 1,683,617; Sept. 11.

Henny, Arnold L., Portland, Oreg. Oil reclaimer. 1,684,270; Sept. 11.

Henry, Mack B., and A. L. Cadenhead, Norphlet, Ark. Belt fastener. 1,684,271; Sept. 11.

Henselman, Otto, Canton, Ohio. Antifriction bearing. 1,684,352; Sept. 11.

Hermsdorf, Ewald, Brunswick, Germany. Apparatus for feeding powdered fuel to a furnace. 1,684,320; Sept. 11.

Herrmann, Heinrich, Essen, assignor to Fried. Krupp Aktiengesellschaft, Essen-on-the-Rhur, Germany. Power-driven vehicle. 1,683,776; Sept. 11.

Herz, Richard, Frankfort-on-the-Main, and W. Zerweck, Fechenheim, near Frankfort-on-the-Main, Germany, assignors to Grasselli Dyestuff Corporation, New York, N. Y. Dinaphthyl-Dicarboxylic acid and making same. 1,684,272; Sept. 11.

Hess, Francis M., Chicago, Ill. Distillate distributor for hydrocarbon distillation systems. 1,683,778; Sept. 11.

Hesser, Fr., Maschinenfabrik-Aktiengesellschaft. (See Gangler, Paul, assignor.)

Hewlett, Edward M., and W. W. Willard, Schenectady, N. Y., assignors to General Electric Company. Reproducing position. 1,684,132; Sept. 11.

Hickok Manufacturing Company. (See Eichner, Robert F., assignor.)

Hicks, William W. (See Mooney, H. V., and Hicks.)

Higgins, Eric B., Brentford, assignor of one-half to British Synthetics Limited, Manchester, England. Manufacture of chlorides of aromatic ortho-hydroxy-carboxylic acids. 1,684,273; Sept. 11.

Hill, Leland H., Wilkingsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Tank structure. 1,684,059; Sept. 11.

Hill, Nikolai, Melien, Wis. Railway tie. 1,683,824; Sept. 11.

Hinckley-Myers Company. (See Holton, George E., assignor.)

Hinds, Sherwood, assignor to St. Louis Pump & Equipment Company, St. Louis, Mo. Rotary pump. 1,684,274; Sept. 11.

Hinman, Laura B., Syracuse, N. Y. Screen for windows of automobiles. 1,684,027; Sept. 11.

Hodell, Frederick G., assignor to The Chain Products Company, Cleveland, Ohio. Cabinet. 1,683,891; Sept. 11.

Hoeftman, Charles M. (See Mylius, W. G., and Hoeftman.)

Hufbuchdruckerei Von C. Dunnhaupt G. m. b. H. (See Lingner, Carl, assignor.)

Hoffa, Erwin, and E. Fischer, Hochst-on-the-Main, Germany, assignors to Grasselli Dyestuff Corporation, New York, N. Y. Azo dye and preparing the same. 1,684,275; Sept. 11.

Hoffman, Arthur L., Pittsburgh, Pa. Brush. 1,683,618; Sept. 11.

Hole, Sidney, Albourne, Hassocks, England. Coding and decoding apparatus and code-changing device therefor. 1,684,028; Sept. 11.

Holland, Walter E., assignor to Philadelphia Storage Battery Company, Philadelphia, Pa. Replenishing electrolytic cells. 1,684,276; Sept. 11.

Holland, Walter E., assignor to Philadelphia Storage Battery Company, Philadelphia, Pa. Battery-reenforcing handle. 1,684,277; Sept. 11.

Holophane Company. (See Berry, Percy W., assignor.)

Holophane Company. (See Dorey, W. A., and Ingler, assignors.)

Holton, George E., assignor to Hinckley-Myers Company, Jackson, Mich. Piston and connecting rod testing and aligning machine. 1,684,321; Sept. 11.

Honey, George, Canuck, Saskatchewan, Canada. Belt-lacing tool. 1,683,825; Sept. 11.

Hopkins, Arthur C., assignor to National Standard Company, Niles, Mich. Lifting jack. 1,684,180; Sept. 11.

Hopkins, Arthur C., assignor to National-Standard Company, Niles, Mich. Lifting jack. 1,684,181; Sept. 11.

Hopkins, Edwin, New York, N. Y. Phonodyne. 1,684,129; Sept. 11.

Hopkinson, Joseph, assignor to Dayton Scale Company, Dayton, Ohio. Meat clamp. 1,684,223; Sept. 11.

Horn, Henry S., South Orange, assignor to W. C. Horn, Bro. & Co., Newark, N. J. Loose-leaf binder. 1,683,975; Sept. 11.

Horn, W. C., Bro. & Co. (See Horn, Henry S., assignor.)

Horne, Archibald B., Springfield, Mass. Golf club. 1,684,278; Sept. 11.

Horstkotte, Frederick W., Portland, Oreg. Unloading machine. 1,683,779; Sept. 11.

Horton, Robert T., Greenwood, Ind. Firing door. 1,683,892; Sept. 11.

Hosoi, Isamu, Tochigi-ken, assignor of one-half to K. Takei, Tokyo, Japan. Phonograph. 1,683,670; Sept. 11.

Howard, George E., Butler, Pa., assignor to Hartford-Empire Company, Hartford, Conn. Method and apparatus for polishing glass. 1,684,029; Sept. 11.

Howard, George E., Butler, Pa., assignor to Hartford-Empire Company, Hartford, Conn. Method of and apparatus for forming plate glass. 1,684,030; Sept. 11.

Howard, Karl S., St. Louis, Mo., assignor to Commonwealth Steel Company, Granite City, Ill. Locomotive structure. 1,683,671; Sept. 11.

Howard, Karl S., St. Louis, Mo., assignor to Commonwealth Steel Company, Granite City, Ill. Locomotive structure. 1,683,672; Sept. 11.

Howard, Karl S., St. Louis, Mo., assignor to Commonwealth Steel Company, Granite City, Ill. Locomotive structure. 1,683,673; Sept. 11.

Howard, Karl S., St. Louis, Mo., assignor to Commonwealth Steel Company, Granite City, Ill. Locomotive structure. 1,683,674; Sept. 11.

Howard, William R. (See Egloff, G., and Howard.)

Howden, Walter E., Edwardsville, Ill. Adjustable drafting instrument. 1,684,224; Sept. 11.

Howe-Anderson Company. (See Howe, Bartlett G., assignor.)

Howe, Bartlett G., assignor to Howe-Anderson Company, Galesburg, Ill. Bread-basket rack. 1,683,675; Sept. 11.

Howe, Thomas. (See Peteler, Adolph, assignor.)

Hubbard, Robert L., New York, N. Y. Ash tray. Des. 76,302; Sept. 11.

Hubble, Grover C., Bonners Ferry, Idaho. Automatic voltage control. 1,684,182; Sept. 11.

Huff, Lyman C., assignor to Universal Oil Products Company, Chicago, Ill. Treating residual oils. 1,683,826; Sept. 11.

Hughes, James W., Philadelphia, Pa. Cap nut. 1,684,096; Sept. 11.

Hülsmeyer, Christian, Dusseldorf, Germany. Method of and apparatus for purifying water. 1,683,780; Sept. 11.

Hultman, George H. (See Wappler, F. H., Hultman, and Fayer.)

Humphrey, Herbert S., assignor to Ruud Manufacturing Company, Kalamazoo, Mich. Combined drain cock and relief valve. 1,684,097; Sept. 11.

Humphrey, Vonnie D., Bishopville, S. C. Insect guard for furniture. 1,684,279; Sept. 11.

Hynes, Lee P., assignor, by mesne assignments, to Consolidated Car-Heating Company, Inc., Albany, N. Y. Valve engine for steam heating. 1,684,225; Sept. 11.

Iceless Automatic Refrigerator Company. (See Otto, Stuart, assignor.)

Ile, William, Little Falls, N. J., assignor to Ilelte Electric Manufacturing Corporation, Tuckahoe, N. Y. Electric plug. 1,684,183; Sept. 11.

Ilelte Electric Manufacturing Company. (See Ile, William, assignor.)

Independent Pneumatic Tool Company. (See Levedahl, Axel, assignor.)

Industrial Research Corporation. (See Brockway, Carl P., assignor.)

Ingler, William A. (See Dorey, W. A., and Ingler.)

Ingram, Harold E., Burlingame, Calif. Analysis chart. 1,683,827; Sept. 11.

Ingram, Oscar L., Walla Walla, Wash. Air-supply system. 1,684,031; Sept. 11.

International Combustion Engineering Corporation. (See Reed, Carl S., assignor.)

International Motor Company. (See Josephs, Lyman C., jr., assignor.)

International Motor Company. (See Masury, A. F., and Gurney, assignors.)

Intertype Corporation. (See Norwood, Joseph C., assignor.)

Ireland, George B., assignor to Taylor Instrument Companies, Rochester, N. Y. Recording pen. 1,683,828; Sept. 11.

Irgens, Finn T., assignor to Lockwood Ash Motor Co., Jackson, Mich. Outboard motor. 1,683,893; Sept. 11.

Itjen, Martin, Skagway, Alaska. Snap hook. 1,684,322; Sept. 11.

Ives, Herbert E., Montclair, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Reproducing pictures transmitted electrically. 1,683,894; Sept. 11.

Ives, Herbert E., Montclair, N. J., assignor, by mesne assignments, to Western Electric Company, Incorporated. Transmission of pictures by electricity. 1,683,976; Sept. 11.

Iwwerks, Eert U., Kansas City, Mo. Sound-reproducing mechanism. 1,684,098; Sept. 11.

Jacob, Alfred P., New York, N. Y. Drawing-board attachment. 1,684,353; Sept. 11.

Jacob, George F., Evanston, Ill. Automobile lamp. 1,683,895; Sept. 11.

Jacob, George F., Evanston, Ill. Headlamp for motor vehicles. 1,683,896; Sept. 11.

Jacob, William G. R. (See Smith, W. S., McLachlan, and Jacob.)

James, Henry D., Edgewood Park, Pa., assignor to Westinghouse Electric & Manufacturing Company. Magnetic switch. 1,684,060; Sept. 11.

Jennings, James W., Providence, R. I., assignor to Quaker Silver Company, Attleboro, Mass. Salt and pepper shaker or similar article. Des. 76,303; Sept. 11.

Jennings, James W., Providence, R. I., assignor to Quaker Silver Company, Attleboro, Mass. Salt and pepper shaker or similar article. Des. 76,304; Sept. 11.
Jennings, James W., Providence, R. I., assignor to Quaker Silver Company, Attleboro, Mass. Salt and pepper shaker or similar article. Des. 76,305; Sept. 11.
Jennings, James W., Providence, R. I., assignor to Quaker Silver Company, Attleboro, Mass. Salt and pepper shaker or similar article. Des. 76,306; Sept. 11.
Jennings, James W., Providence, R. I., assignor to Quaker Silver Company, Attleboro, Mass. Salt and pepper shaker or similar article. Des. 76,307; Sept. 11.
Jennings, James W., Providence, R. I., assignor to Quaker Silver Company, Attleboro, Mass. Salt and pepper shaker or similar article. Des. 76,308; Sept. 11.
Jennings, James W., Providence, R. I., assignor to Quaker Silver Company, Attleboro, Mass. Salt and pepper shaker or similar article. Des. 76,309; Sept. 11.
Jessop, George A., assignor to S. Morgan Smith Company, York, Pa. Plate-steel wicket gate for turbines. 1,683,781; Sept. 11.
Job, Albert. (See Mieg, W., and Job.)
Johnson, Charles A., La Tuque, Quebec, Canada, assignor to Brown Company, Berlin, N. H. Method and apparatus for washing pulp. 1,683,782; Sept. 11.
Johnson, David C., Carbon Hill, Ala. Wheel puller. 1,684,226; Sept. 11.
Johnson, Einar A., Mountain Lakes, N. J., assignor to Engineering Development Company, New Brunswick, N. J. Condenser. 1,684,227; Sept. 11.
Johnson, George T. (See Whitridge, J. C., and Johnson.)
Johnson, George W., assignor to The American Laundry Machinery Company, Norwood, Ohio. Pressing machine. 1,683,897; Sept. 11.
Johnson, James T. (See Boyd, E. L., and Johnson.)
Johnson, Leonard W., Batavia, Ill. Flue cleaner. 1,683,619; Sept. 11.
Johnson, William C., Providence, R. I. Tensioning device for braiding machines. 1,683,898; Sept. 11.
Jones, Don F., Beloit, Wis. Electric switch. 1,684,280; Sept. 11.
Jonkheer Meester Doctor Jelle Roelof Clifford Kocq Van Breugel. (See Harms, Johannes F. K., assignor.)
Joron, Rodolphe E., Chicoutimi, Quebec, Canada. Alarm system. 1,684,032; Sept. 11.
Josephs, Lyman C., jr., Allentown, Pa., assignor to International Motor Company, New York, N. Y. Control means for throttle valves and the like. 1,684,033; Sept. 11.
Jungk, Herbert G., Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company. Dynamo-electric machine. 1,683,676; Sept. 11.
Junior Monarch Hay Press Company. (See Toffelmier, L. J., and Miller, assignors.)
Junoform Company, The. (See Smith, Goodwin B., assignor.)
Jury, Frank W., assignor to The Falk Corporation, Milwaukee, Wis. Gear-cutting machine. 1,684,099; Sept. 11.
Kadel, Byers W., Baltimore, Md., assignor, by mesne assignments, to The Symington Company. Draft rigging. 1,683,899; Sept. 11.
Kalayjian, Jacob, Pasadena, Calif. Ironing board. 1,684,034; Sept. 11.
Kane, Thomas H., assignor to Truscon Steel Company, Youngstown, Ohio. Spacer for concrete reenforcement. 1,683,829; Sept. 11.
Kantor, James, O. W. Fick, and W. J. Traxel, assignors to Liquid Carbonic Co., Chicago, Ill. Filling mechanism. 1,683,677; Sept. 11.
Karollus, Edmund, Vienna, Austria. Safety device for blasting or explosive cartridges. 1,683,900; Sept. 11.
Kauffman, Harold L. (See Kauffman, H. L., and Clark, assignors.)
Kauffman, Harold L., and I. A. Clark, Parco, Wyo., assignors, by mesne assignments, to H. L. Kauffman, Decolorizing, clarifying, and purifying petroleum oils. 1,684,035; Sept. 11.
Kaufmann, John, assignor to De Forest Phonofilm Corporation, New York, N. Y. Slotting and slitted light transmitter. 1,683,620; Sept. 11.
Kaufmann, John, assignor to De Forest Phonofilm Corporation, New York, N. Y. Fine-slit construction. 1,683,621; Sept. 11.
Keiner, Henry A., Kew Gardens, N. Y. Protective device. 1,683,977; Sept. 11.
Keller, Paul E. (See Daun, C. L., and Keller.)
Keller, Paul E., assignor, by mesne assignments, to American Electric Motor Company, Milwaukee, Wis. Motor support. 1,683,622; Sept. 11.
Kellogg Switchboard and Supply Company. (See Currier, Hiram D., assignor.)
Kelloway, Charles J., Wilmington, N. C. Combined lightning arrester and resistance unit. 1,683,783; Sept. 11.
Kelly, William D., Western Springs, assignor to Edison Electric Appliance Company, Incorporated, Chicago, Ill. Temperature regulator for electric heaters. 1,684,281; Sept. 11.
Kelso, William, assignor to The McConway & Torley Company, Pittsburgh, Pa. Car-coupling mechanism. 1,683,901; Sept. 11.
Kennedy, Howard L., assignor to Kennedy Manufacturing Company, Van Wert, Ohio. Cantilever kit. 1,684,036; Sept. 11.
Kennedy Manufacturing Company. (See Kennedy, Howard L., assignor.)
Keystone Lantern Company. (See Davis, Nathan H., assignor.)
Kliesig, Harry R., San Diego, Calif. Poppet-valve self-correcting means. 1,683,902; Sept. 11.
Kindervater, Julius, New York, N. Y. Steam-engine-valve reversing gear. 1,684,228; Sept. 11.
King, William R., Mansfield, Ohio, assignor to Westinghouse Electric & Manufacturing Company. Making heater units. 1,684,184; Sept. 11.
Kinsley, Richard F., assignor to Dryden Rubber Company, Chicago, Ill. Manufacturing rubber articles. 1,684,100; Sept. 11.
Kirschberg, Sigmund, San Francisco, Calif. Adjustable awning fixture. 1,683,903; Sept. 11.
Kitterman, Willie B., and F. H. Mills, New York, N. Y. Utility bag. 1,683,678; Sept. 11.
Kittredge, John W., Akron, Ohio. Hoisting block. 1,684,185; Sept. 11.
Kjolseth, Ole K., Scotia, N. Y., assignor to General Electric Company. Railway truck. 1,684,282; Sept. 11.
Klebanoff and Grossman. (See Grossman, Samuel.)
Klebanoff, David, et al. (See Grossman, Samuel, assignor.)
Kneass, Strickland L., and I. P. Pedrick, assignors to William Sellers & Company, Incorporated, Philadelphia, Pa. Injector. 1,683,784; Sept. 11.
Knoblock, Phillip J., Passaic, N. J. Suspension-chain coupling. 1,683,904; Sept. 11.
Knott, Emmet K. (See Edblom, L. A., and Knott.)
Knowlton, Eugene W., assignor to John E. Smith's Sons Co., Buffalo, N. Y. Meat and food grinder. 1,683,679; Sept. 11.
Kny-Scheerer Corporation of America, The. (See Akers, Herbert S., assignor.)
Koenigsberger, Johann, Freiburg, Germany. Measuring instrument. 1,684,229; Sept. 11.
Kohn, Milton M., New York, N. Y. Apparatus for producing dentures. 1,683,978; Sept. 11.
Kokes, L. V., et al. (See Criner, Harry J., assignor.)
Krass, Mitchell. (See Krasiavsky, Michel.)
Krasiavsky, Michel, New York, N. Y., now by change of name Mitchell Krass. Motion-picture film. 1,683,830; Sept. 11.
Krause, Arthur R., Woodhaven, N. Y., assignor to Max Schaffer Co., Inc. Chandelier or article of analogous nature. Des. 76,310; Sept. 11.
Krause, Arthur R., Woodhaven, N. Y., assignor to Max Schaffer Co., Inc. Wall bracket or article of analogous nature. Des. 76,311; Sept. 11.
Krause, Arthur R., Woodhaven, N. Y., assignor to Max Schaffer Co., Inc. Lantern or article of analogous nature. Des. 76,312; Sept. 11.
Krause, Arthur R., Woodhaven, N. Y., assignor to Max Schaffer Co., Inc. Chandelier body or article of analogous nature. Des. 76,313; Sept. 11.
Krause, Arthur R., Woodhaven, N. Y., assignor to Max Schaffer Co., Inc. Combined candle cup and bobèche. Des. 76,314; Sept. 11.
Kreisel, Paul, Newark, N. J., assignor to Westinghouse Electric & Manufacturing Company. Electrical measuring instrument. 1,684,061; Sept. 11.
Krobitzsch, Robert W., assignor to Sunset Feather Company, San Francisco, Calif. Feather-cleaning machine. 1,683,905; Sept. 11.
Kubelka, Jerry, Ridgewood, N. Y. Weatherproof concealed hinge and jamb construction. 1,684,323; Sept. 11.
Kummenich, Richard, Berlin, Germany, assignor to Gesellschaft fur Drahtlose Telegraphie m. b. Hallesches, Berlin, Germany. Voltage regulator. 1,683,785; Sept. 11.
Kurowski, Alfred G. F., Brooklyn, assignor to Underwood Elliott Fisher Company, New York, N. Y. Combined typewriting and card-perforating machine. 1,683,979; Sept. 11.
Kwartin, Bernard, Philadelphia, Pa. Combined safety razor, hair trimmer, and comb. 1,683,980; Sept. 11.
Kysor, Walter A., Allegan, Mich. Combined muffler and heater. 1,684,186; Sept. 11.
Lach, Joseph S., assignor to The Yale & Towne Manufacturing Company, Stamford, Conn. Securing or clamping means for lock cylinders. 1,684,230; Sept. 11.
La Chapelle, Fred M., Beverly, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Coating machine. 1,683,680; Sept. 11.
Laessig, William. (See Saal, Christian L., assignor.)
Lahti, Wilho E., Windsor, Calif. Music-leaf turner. 1,684,283; Sept. 11.
Landis, J. Olin. (See D'Ardenne, W. H., Landis, and Christensen.)
Lane, Munson H. (See Rushton, Arthur L., assignor.)
Larson, Hilda M., Tacoma, Wash. Reproducer. 1,684,133; Sept. 11.
Larsonneur, David L. A., Chicago, Ill. Governor for internal-combustion engines. 1,683,720; Sept. 11.
Lavell, Lulu V., Minneapolis, Minn. Curtain holdback. Des. 76,315; Sept. 11.
Lawson, Edward W., West Palm Beach, Fla. Weather vane. Des. 76,316; Sept. 11.
Lawson, Joseph, Great St. Helens, London, assignor to Asiatic Petroleum Company, Limited, St. Helen Court, London, England. Indicating mechanism. 1,684,101; Sept. 11.
Leach, Sagito J., and A. C. Eberle, assignor to The Ashtabula Bow Socket Company, Ashtabula, Ohio. Back for automobile seats and the like. 1,684,062; Sept. 11.
Lease, Art A. (See Wright, L. B., Yates, and Lease.)

Leeds & Northrup Company. (See Schofield, William R., jr., assignor.)
Leedy, Elmer E., Newark, Ohio. Wire reel. 1,684,037; Sept. 11.
Leibowitz, Meyer N., et al. (See Ruttenberg, Samuel, assignor.)
Le Mesurier, Charles, Campbellton, New Brunswick, Canada. Storm-window fastener. 1,684,184; Sept. 11.
Leth, Paul. (See Hansen, C., and Leth.)
Leustig, Benno B., and J. D. Petsche, Cleveland, Ohio. Wire-drawing apparatus. 1,684,102; Sept. 11.
Levedahl, Axel, Aurora, Ill., assignor to Independent Pneumatic Tool Company, Chicago, Ill. Stud driver. 1,684,231; Sept. 11.
Levit, Max, Shenandoah, Pa. Shoe and locker bag. 1,684,232; Sept. 11.
Levy, Lucien, Paris, France. Elimination of wireless parasitic currents. 1,684,103; Sept. 11.
Lewis, Harry A., Norristown, Pa. Differential release transmission. 1,684,233; Sept. 11.
Liebergeld, Paul, Bad Thal, Germany. Mechanical time fuse with clockwork. 1,684,354; Sept. 11.
Lightship Cloth Board Corporation. (See Smith, Harry B., assignor.)
Lilienfeld, Leon, Vienna, Austria. Making cellulose ethers and alkali cellulose. 1,683,681; Sept. 11.
Lilienfeld, Leon, Vienna, Austria. Preparation of alkali cellulose and cellulose ethers. 1,683,682; Sept. 11.
Lilienfeld, Leon, Vienna, Austria. Cellulose ether and making same. 1,683,831; Sept. 11.
Lindgren, Stanley H., Maywood, Ill., assignor to American Can Company, New York, N. Y. Dredge can. 1,683,832; Sept. 11.
Lindsey, Parren D. (See Harrison, C. D., and Lindsey.)
Lingner, Carl, Dessau in Anhalt, assignor to Hofbuchdruckerei Von C. Dunnbaupt G. m. b. H., Dessau, Germany. Register sheet for printing presses and the like. 1,684,324; Sept. 11.
Lloud, Frank, St. Etienne, France. Carburetor. 1,684,355; Sept. 11.
Lipps, Morris, New York, N. Y. Spring-cushion construction. 1,684,234; Sept. 11.
Lipscomb, James H., Bokchito, Okla. Knockdown coop. 1,684,135; Sept. 11.
Liquid Carbonic Co. (See Kantor, J., Fick, and Traxel, assignors.)
Lister, James F., and H. W. Smallwood, Birmingham, England. Automatically-oscillating electric fan. 1,684,325; Sept. 11.
Livergood, Gerald R., Houston, assignor of one-fourth to W. L. Pearson, Harris County, Tex. Detachable pilot for pump plungers. 1,683,683; Sept. 11.
Lockwood Ash Motor Co. (See Irgens, Finn T., assignor.)
Locomotive Stoker Company. (See Crawford, David F., assignor.)
Loening, Grover, New York, N. Y. Construction for airplane floats. 1,684,187; Sept. 11.
Long, Charles T., Eureka, Calif. Coffee-making device. 1,683,786; Sept. 11.
Long, Clyde R., Smethport, Pa. Golf-ball marker. 1,684,038; Sept. 11.
Love, Joseph E., Schenectady, N. Y., assignor to General Electric Company. Automatic antenna regulator. 1,684,235; Sept. 11.
Lovegrove, Clara S. (See Lovegrove, Thomas G., assignor.)
Lovegrove, Thomas G., assignor to C. S. Lovegrove, Philadelphia, Pa. Magnetic sharpener for razor blades. 1,683,981; Sept. 11.
Luftschiffbau Zeppelin Gesellschaft mit beschränkter Haftung. (See Dorr, Wilhelm E., assignor.)
Lundberg, Everett E., assignor to Briggs Manufacturing Company, Detroit, Mich. Adjustable striker plate. Re17,083; Sept. 11.
Lynch, James A., Los Angeles, Calif. Tie lug. 1,684,136; Sept. 11.
Maas, Elov F., assignor to The Goodyear Tire & Rubber Company, Akron, Ohio. Machine for unwrapping tubes. 1,683,787; Sept. 11.
MacGregor, R. L. (See Vaile, Pembroke A., assignor.)
MacInerney, James L., Grand Rapids, Mich. Spring mat for upholstered articles. 1,683,684; Sept. 11.
MacInerney, James L., Grand Rapids, Mich. Spring mat for upholstered articles. 1,683,685; Sept. 11.
Mackie, George O., J. S., and J. C., Winnipeg, Manitoba, Canada. Combination luggage carrier, table, and bench. 1,684,039; Sept. 11.
Mackie, James C. (See Mackie, George O., J. S., and J. C.)
Mackie, John S. (See Mackie, George O., J. S., and J. C.)
MacMillan, Campbell, Schenectady, N. Y., assignor to General Electric Company. System of electric ship propulsion. 1,684,236; Sept. 11.
Madison, Harry, Council Bluffs, Iowa. Bath-curtain support. 1,684,284; Sept. 11.
Maennlein, Max, Vienna, Austria. Metallic playing card. 1,684,372; Sept. 11.
Mahoney, Patrick J., Sharon, Pa. Wire-drawing mechanism. 1,683,906; Sept. 11.
Maneschi, Egidio E., La Grange, Ill., assignor to Western Electric Company, Incorporated, New York, N. Y. Method of and apparatus for determining the energy losses in dielectric materials. 1,683,833; Sept. 11.
Manley, Ralph B., Newark, N. J., assignor to The Carborundum Company, Niagara Falls, N. Y. Abrasive paper or cloth. 1,683,623; Sept. 11.
Mann, John E., Snohomish, Wash. Indicating device. 1,683,907; Sept. 11.
Mann, Zolectus T., Caviness, Tex. Weevil destroyer. 1,684,040; Sept. 11.
Marathon Paper Mills Company. (See Merrin, Samuel A., assignor.)
Marbury, Harbert B., Atlanta, Ga. Tent. 1,684,237; Sept. 11.
Marsh, Jas. P., & Company. (See Thompson, Orville W., assignor.)
Marshall Field & Company. (See Nelson, Daniel, assignor.)
Martin, Perry S., Harrisonburg, Va. Thermostat. 1,683,908; Sept. 11.
Martinson, Andrew E., New York, N. Y. Skee handle. 1,684,326; Sept. 11.
Masury, Alfred F., and E. R. Gurney, Beechhurst, assignors to International Motor Company, New York, N. Y. Vehicle spring construction. 1,684,041; Sept. 11.
Mathewson, Maxwell I. (See Copland, A. W., and Mathewson.)
Matthael, Frederick C. (See Snell, Samuel A., assignor.)
Mauser, Alfons, Cologne-Marienburg, Germany. Container such as barrel, drum, or the like. 1,683,788; Sept. 11.
Mavis, Firn C., and G. B. Sampair, Tacoma, Wash. Sawyer's indicator for sawmill log carriages. 1,683,909; Sept. 11.
Mavrogenis, Aristote, Milwaukee, Wis. Electron-discharge device. 1,684,104; Sept. 11.
May Hosiery Mills. (See Perry, Napoleon J., assignor.)
Mayer, Leo, assignor to Henry Cole Company, Boston, Mass. Electric-lamp socket. 1,684,356; Sept. 11.
Mayhew, Sanford B., Marietta Township, Whatcom County, Wash. Spits used in preparing salmon for barbecue. 1,683,834; Sept. 11.
Maze, Augustus E., Orange, N. J. Resinous composition of matter and making same. 1,683,835; Sept. 11.
McArthur, Arthur R., Gary, Ind., assignor to American Sheet and Tin Plate Company, Pittsburgh, Pa. Apparatus for packing doubled sheets and plates. 1,683,982; Sept. 11.
McCain, Paul H., assignor to Economy Screw Corporation, Chicago, Ill. Making nuts. 1,684,238; Sept. 11.
McCloskey, Frederick W. (See Bethel, Claude, and McCloskey.)
McConway & Torley Company, The. (See Kelso, William, assignor.)
McCord Radiator & Mfg. Co. (See Harris, Joseph D., assignor.)
McCord Radiator & Mfg. Co. (See Pickhard, George H., assignor.)
McDonald, John H., Hamberg, N. Dak. Bottle-cap receiver. 1,684,285; Sept. 11.
McGarvin, Luther R. (See Strafus, Anton F., assignor.)
McIlroy, Ronald C., Lewiston, Me., assignor to Columbia Woolen Company. Weaving. 1,683,983; Sept. 11.
McLachlan, Norman W. (See Smith, W. S., and McLachlan.)
McLachlan, Norman W. (See Smith, W. S., McLachlan, and Jacob.)
McMillan Book Company. (See Unger, Paul O., assignor.)
McMillan, John L., Syracuse, N. Y. Loose-leaf binder. 1,684,373; Sept. 11.
McMillan, John W., Muncie, Ind. Inhaling device. 1,683,686; Sept. 11.
McNulty, Gregory F. (See Brown, G. C., and McNulty.)
Meitzler, Charles R. (See Pieper, O. H., and Meitzler.)
Merrimack Man'f'g Co. (See Robinson, Charles A., assignor.)
Merrin, Samuel A., Chicago, Ill., assignor, by mesne assignments, to Marathon Paper Mills Company, Rothschild, Wis. Dispensing container. 1,684,188; Sept. 11.
Mertzanoff, André M., assignor to American Radiator Company, New York, N. Y. Boiler. 1,683,836; Sept. 11.
Mertzanoff, André M., assignor to American Radiator Company, New York, N. Y. Boiler. 1,683,837; Sept. 11.
Methlin, Nicolas E., assignor to Schneider & Cie., Paris, France. Apparatus for controlling the positioning of devices from a distance. 1,684,042; Sept. 11.
Methudy, Carl E., St. Louis, Mo., assignor to Methudy Enamel Range Co., East St. Louis, Ill. Gas range. Des. 76,318; Sept. 11.
Methudy Enamel Range Co. (See Methudy, Carl E., assignor.)
Methudy, Eugene R., assignor to A. D. Goldman, St. Louis, Mo. Gas range. Des. 76,317; Sept. 11.
Meyer, Albert, Chicago, Ill. Baseball game. 1,684,189; Sept. 11.
Meyer, Charles A. (See De Pue, James C., assignor.)
Meyer, Gustave E., New Meadows, Idaho. Leaf turner. 1,684,043; Sept. 11.
Meyers, Clem B. (See Smith, R. H., and Meyers.)
Mezger, Charles A. (See Weiland, A., Russell, and Mezger.)
Mieg, Walter, and A. Job, Elberfeld, Germany, assignors to Grasselli Dyestuff Corporation, New York, N. Y. Vat dyestuffs from dianthraquinonylamine-phenanthrenequinone. 1,684,327; Sept. 11.
Mijer, Pieter, assignor, by mesne assignments, to The Two-Tone Corporation, New York, N. Y. Dyeing. 1,683,687; Sept. 11.
Milan, Horace R., New York, N. Y. Cigar and cigarette lighter. 1,683,688; Sept. 11.

Miller, Charles. (See Toffelmier, L. J., and Miller.)
Miller, Ernest B. (See Patrick, W. A., and Miller.)
Miller, Thomas S., South Orange, N. J. Fluid-pressure-operated device. 1,684,063; Sept. 11.
Miller, William J., Swissvale, Pa., assignor to Hartford-Empire Company, Hartford, Conn. Timing mechanism. 1,684,064; Sept. 11.
Mills, Florence H. (See Kitterman, W. B., and Mills.)
Miner, Douglas F., East Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company. Electrical measuring instrument. 1,684,065; Sept. 11.
Miner, Douglas F., East Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company. Insulator. 1,684,066; Sept. 11.
Miner, W. H., Inc. (See Haseltine, Stacy B., assignor.)
Minnix, William S., Washington, D. C. Combined sounding figure toy and return ball. 1,683,910; Sept. 11.
Mioton, Fitzhugh S., New Orleans, and L. H. Guerin, Covington, La. Plastering machine. 1,684,357; Sept. 11.
Mittag, Albert H., Schenectady, N. Y., assignor to General Electric Company. Reproducing position. 1,684,137; Sept. 11.
Molinelli, Charles M., New York, N. Y. Stair-covering apparatus. 1,684,328; Sept. 11.
Mollins, Walter E., Deptford, London, England. Wrapping machinery. 1,683,789; Sept. 11.
Moon, John C., St. Louis, Mo. Dust collector. 1,684,067; Sept. 11.
Moon, John C., St. Louis, Mo. Dust collector. 1,684,068; Sept. 11.
Mooney, Frank H., Chicago, Ill. Golf bag. 1,683,838; Sept. 11.
Mooney, Harry V., Seattle, Wash., and W. W. Hicks, San Francisco, Calif. Drying system. 1,683,984; Sept. 11.
Moorhouse, Samuel, assignor to Fairbairn Lawson Combe Barbour Limited, Leeds, England. Doffing apparatus for spinning, doubling, twisting, and like machines. 1,683,839; Sept. 11.
Morin, Louis H., New York, N. Y., assignor to Doehler Die-Casting Co. Die-casting machine. 1,683,721; Sept. 11.
Morin, Louis H., New York, N. Y., assignor to Doehler Die-Casting Co. Vending machine. 1,683,722; Sept. 11.
Morrill, Alfred R., Swampscott, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Wax-thread sewing machine. 1,683,689; Sept. 11.
Morris, Joseph F., West Lafayette, Ind. Water supply for automobile radiators. 1,683,911; Sept. 11.
Morrison, John A., Seattle, Wash., assignor to Safety Signal Company. Crossing signal. 1,683,690; Sept. 11.
Morse, Lawrence H., assignor to The American Multigraph Company, Cleveland, Ohio. Inking attachment for printing machines. 1,683,840; Sept. 11.
Morton, William A., assignor to The Amsler-Morton Company, Pittsburgh, Pa. Glass leer. 1,684,239; Sept. 11.
Moser, Charles, Los Angeles, Calif. Device for holding toilet-paper rolls. 1,684,190; Sept. 11.
Mosquera, Leoncio L., Buenos Aires, Argentine. Demountable brush. 1,684,358; Sept. 11.
Mullen, James J., and F. M. Stambaugh, St. Louis, Mo.; said Stambaugh assignor to said Mullen. Ribbed or corrugated sheet-metal member. 1,683,841; Sept. 11.
Mullen, James J., and F. M. Stambaugh, St. Louis, Mo.; said Stambaugh assignor to said Mullen. Forming ribbed or corrugated sheet metal members. 1,683,842; Sept. 11.
Müller, Ernst, Berlin, Germany. Fur testing and cutting device. 1,684,359; Sept. 11.
Muller, Rudolph G., Irvington, N. J. Fur-hat-blocking machine. 1,683,790; Sept. 11.
Mulock, William R., Winnipeg, Manitoba, Canada. Belt. 1,683,691; Sept. 11.
Multi-Needle Engineering Corporation. (See Boettcher, Gustav A., assignor.)
Munch, Walter, Superior, Wis., assignor to Syphonix Refrigerator Company. Show case. 1,683,791; Sept. 11.
Murphy, Ralph, assignor, by mesne assignments, to Franklin Development Corporation, Syracuse, N. Y. Clutch construction. 1,683,624; Sept. 11.
Murray, Thomas E. (See Phelps, George H., assignor.)
Muzzio, James A., assignor to R. S. Muzzio, Cleveland, Ohio. Padlock. 1,683,985; Sept. 11.
Muzzio, Rosa S. (See Muzzio, James A., assignor.)
Myers, John S. (See Schwendner, A. F., and Myers.)
Myllus, Walter G., Wilkinsburg, Pa., and C. M. Hoeftman, Newark, N. J., assignors to Westinghouse Electric and Manufacturing Company. Electrical measuring instrument. 1,684,191; Sept. 11.
Myres, Robert W., assignor to Vattenborg Systems Inc., Seattle, Wash. Colonic mobile unit. 1,683,723; Sept. 11.
Naamlooze Vennootschap Machinefabriek "Reineveld". (See Tol, Hermanus F., assignor.)
National Machinery Co., The. (See Clouse, William L., assignor.)
National Standard Company. (See Hopkins, Arthur C., assignor.)
National Tube Company. (See Felding, William H., assignor.)
Naumburg, Robert E., Winchester, Mass. Container for disinfectants. 1,683,792; Sept. 11.
Neblett, Charlie C., Norfolk, Va. Pipe cutter. 1,683,912; Sept. 11.
Nelson Bros. and Strom. (See Strom, C. O., and Nelson, assignor.)
Nelson, Daniel, Oak Park, assignor to Marshall Field & Company, Chicago, Ill. Packaging merchandise for shipment. 1,683,843; Sept. 11.
Nelson, Herbert M., jr. (See Strom, C. O., and Nelson.)
Nemeth, Bert C. (See Nemeth, Steffen P., assignor.)
Nemeth, Steffen P., assignor, by mesne assignments, of one-half to B. C. Nemeth, Chicago, Ill. Putter attachment. 1,684,192; Sept. 11.
Neveu, Frank A., Los Angeles, Calif. Window shade. 1,683,844; Sept. 11.
New Haven Clock Co., The. (See Whitehead, Richard H., assignor.)
Ney, Adolphe H., New York, N. Y. Flotation of ores. 1,683,724; Sept. 11.
Nickerson, Elmer K., Springfield, assignor to The Chapman Valve Manufacturing Company, Indian Orchard, Mass. Valve construction. 1,683,825; Sept. 11.
Nisbet, John, et al. (See Becker, Joseph, assignor.)
Nixdorff, Samuel P., Schenectady, N. Y., assignor to General Electric Company. Reproducing position. 1,684,138; Sept. 11.
Noack, William A., Oakland, Calif., assignor to Conceal o Fixture Company, Inc. Combination shelf and drop door. 1,684,193; Sept. 11.
Noggins, David C., New Haven, Conn. Combined table and lamp. Des. 76,319; Sept. 11.
Nordling, William G., Newark, N. J. Electric hot plate. 1,684,374; Sept. 11.
North & Judd Manufacturing Company. (See Freysinger, John B., assignor.)
Northam Warren Corporation. (See Haik, Louis W., assignor.)
Northrup, Edwin F., near Princeton, assignor to Ajax Electrothermic Corporation, Trenton, N. J. Induction pressure or vacuum furnace. 1,683,986; Sept. 11.
Northwestern Paper Goods Company. (See Olm, Oscar J., assignor.)
Norwood, Joseph C., San Francisco, Calif., assignor to Intertype Corporation. Mold. 1,684,360; Sept. 11.
Nowosielski, Edward B., Bloomfield, N. J., assignor to Splitdorf Electrical Company, Newark, N. J. Automatic governor. 1,683,626; Sept. 11.
Nyman, John O., assignor to The United Metal Products Company, Canton, Ohio. Bumper for sliding doors. 1,683,793; Sept. 11.
Nyquist, Harry, Millburn, N. J., assignor to American Telephone and Telegraph Company. Phase-regulating system. 1,683,725; Sept. 11.
Oakley, Erastus G., Southport, assignor to Bridgeport Brass Company, Bridgeport, Conn. Making tire-valve stems and the like. 1,684,194; Sept. 11.
Oakley, John, and H. D. Croft, assignors to Perkins Machine and Gear Company, Springfield, Mass. Broach mechanism. 1,684,139; Sept. 11.
O'Brien, Robert J., jr., Belleville, assignor to Collway Laboratories, Inc., Newark, N. J. Weighting silk and the product thereof. 1,684,286; Sept. 11.
O'Brien, William C., Canton, Ohio, assignor to Central Alloy Steel Corporation, New York, N. Y. Electric hammer. 1,683,794; Sept. 11.
O-Cedar Corp'n. (See Brown, Peter, assignor.)
Ogden, Amos, Barrow-in-Furness, assignor to Vickers Limited, Westminster, England. Depth charge, bomb, projectile, and other explosive bodies. 1,683,692; Sept. 11.
Ohm, Emil K., deceased, Athens, Ohio; R. J. Studer, administrator. Sorting and binding desk. 1,683,795; Sept. 11.
Oliver Chilled Plow Works. (See Altgelt, Herman E., assignor.)
Oliver Chilled Plow Works. (See Gallagher, Arthur D., assignor.)
Olm, Oscar J., Minneapolis, assignor to Northwestern Paper Goods Company, St. Louis, Minn. Envelope. 1,684,105; Sept. 11.
Olmsted, Russell C., Hudson Heights, N. J. Reenforcement for concrete structures. 1,684,195; Sept. 11.
Olson, Percy W., St. Paul, Minn., assignor to W. S. Ferris, Elkhart, Ind., trading as The Domore Chair Company. Adjustable back rest for chairs. 1,684,106; Sept. 11.
Osgood, Charles F., Claremont, N. H., assignor to Sullivan Machinery Company. Mining machine. 1,684,375; Sept. 11.
O'Sullivan, Patrick J., Woodside, N. Y., assignor to United Shoe Machinery Corporation, Paterson, N. J. Safety device. 1,683,693; Sept. 11.
Otto, Stuart, Scranton, Pa., assignor to Iceless Automatic Refrigerator Company. Refrigerating apparatus. 1,684,196; Sept. 11.
Ovestrud, Melvin, assignor to Twin City Forge & Foundry Company, Stillwater, Minn. Forming tie plates. 1,684,107; Sept. 11.
Paige, Arthur E., Philadelphia, Pa. Vehicle lock and signaling device. 1,683,913; Sept. 11.
Paluck, Alexander E. Belfield, N. Dak., assignor of one-half to S. J. Cieslewicz, Wibaux, Mont. Figure toy. 1,684,287; Sept. 11.
Parker, Harry W. Brooklyn, N. Y. Ash tray. Des. 76,320; Sept. 11.
Parkinson and W. & B. Cowan Limited. (See Beasley, Clifford H., assignor.)

Patent-Treerhand-Gesellschaft fur elektrische Gluhlampen m. b. H. (See Thomas, Max, assignor.)
Patrick, Walter A., and E. B. Miller, assignors to The Silica Gel Corporation, Baltimore, Md. Manufacturing sulphuric acid. 1,683,694; Sept. 11.
Patrick, Walter A., and E. H. Barclay, assignors to The Silica Gel Corporation, Baltimore, Md. Preparing tungsten oxide gel. 1,683,695; Sept. 11.
Paull, John J., assignor to Eagle Manufacturing Company, Wellsburg, W. Va. Flowerpot holder. Des. 76,321; Sept. 11.
Payne, Warren R. (See Fischer, J. J., and Payne.)
Payton & Kelley Co. (See Rowan, Albert J., assignor.)
Pearce, David, Los Angeles, Calif. Broken-tap extractor. 1,683,796; Sept. 11.
Pearson, W. L. (See Livergood, Gerald R., assignor.)
Pedrick, Irenee P. (See Kneass, S. L., and Pedrick.)
Pennington, Gordon R., Cleveland, Ohio. Belt driving mechanism. 1,684,069; Sept. 11.
Pennington, Gordon R., Cleveland, Ohio. Motor vehicle. 1,684,070; Sept. 11.
Pereyra, Armando J., San Francisco, Calif. Apparatus for forming and thereafter releasing tortilla. 1,683,797; Sept. 11.
Perkins, Julian L., West Springfield, and H. D. Croft, assignors to Perkins Machine and Gear Company, Springfield, Mass. Broach mechanism. 1,684,140; Sept. 11.
Perkins, Julian L., West Springfield, and H. D. Croft, assignors to Perkins Machine and Gear Company, Springfield, Mass. Feed mechanism. 1,684,141; Sept. 11.
Perkins Machine and Gear Company. (See Oakley, J., and Croft, assignors.)
Perkins Machine and Gear Company. (See Perkins, J. L., and Croft, assignors.)
Perry, Napoleon J., assignor to May Hosiery Mills, Nashville, Tenn. Pattern mechanism for knitting machines. 1,683,798; Sept. 11.
Peteler, Adolph, Freeport, assignor to T. Howe, White Plains, N. Y. Vernier dial for radio adjustments. 1,683,845; Sept. 11.
Peter, Leslie H., London, England, assignor, by mesne assignments, to The Union Switch & Signal Company, Swissvale, Pa. Alternating-current relay. 1,683,696; Sept. 11.
Peterson, Ernest E., South Hibbing, Minn. Track-tamping machine. 1,684,109; Sept. 11.
Petroff, Grigori, Moscow, Russia, and P. Shestakoff, Paris, France. Preparing phenol-formaldehyde condensation products. 1,684,142; Sept. 11.
Petsch, Everett C., Pleasant Dale, Nebr. System for preventing liquids from freezing. 1,684,197; Sept. 11.
Petsche, Joseph D. (See Leustig, B. B., and Petsche.)
Pettit, Walter, Clare, Mich. Display device. 1,684,198; Sept. 11.
Pfiffer, Fred J., Los Angeles, Calif. Window-operating mechanism. 1,683,914; Sept. 11.
Phelps, George H., Warehouse Point, Conn., assignor to T. E. Murray, Brooklyn, N. Y. Electric welding. 1,684,108; Sept. 11.
Philadelphia Storage Battery Company. (See Holland, Walter E., assignor.)
Photostat Corporation. (See Greene, John S., assignor.)
Pickhard, George H., assignor to McCord Radiator & Mfg. Co., Detroit, Mich. Attachment for punch presses. 1,683,799; Sept. 11.
Pickles, Albert S., Providence, R. I. Baby harness. 1,684,110; Sept. 11.
Pickwick Corporation, The. (See Austin, Dwight E., assignor.)
Pieper, Alphonse F., et al. (See Pieper, O. H., and Meitzler, assignors.)
Pieper, Oscar H., and C. R. Meitzler, assignors to O. H. Pieper and A. F. Pieper, Rochester, N. Y. Dental instrument. 1,684,143; Sept. 11.
Pieper, Oscar H., et al. (See Pieper, O. H., and Meitzler, assignors.)
Pierce, Elwood K., Springfield, assignor to The Cast Steel Devices Company, Lima, Ohio. Boiler plug. 1,683,726; Sept. 11.
Pigeon, Joseph E., Hollywood, Calif. Aeronautics. 1,684,240; Sept. 11.
Pitt, Harry, Elisabeth, N. J. Amusement racing device. 1,684,199; Sept. 11.
Pittsburgh Plate Glass Company. (See Heichert, Herman S., assignor.)
Pittsburgh Steel Company. (See Eickhoff, Theodore H., assignor.)
Platt, Joseph, Detroit, Mich. Bank-protecting device. 1,683,800; Sept. 11.
P & M Company, The. (See Warr, Harold G., assignor.)
Pollock, James, New York, N. Y. Apparatus for burning fine fuel in suspension. 1,684,200; Sept. 11.
Pollock, James, New York, N. Y. Boiler for utilizing fine coal. 1,684,201; Sept. 11.
Pollock, Robert T., New York, N. Y., assignor to The Universal Oil Products Company, Chicago, Ill. Apparatus for treating oil. 1,683,801; Sept. 11.
Potter, Leo, Malba, assignor to Potter Products Corporation, New York, N. Y. Lighter. Des. 76,322; Sept. 11.
Potter Products Corporation. (See Potter, Leo, assignor.)
Povel, Hyacinthe A., Paris, France. Vanity case. 1,684,202; Sept. 11.
Powell, Winfred T., assignor to The Stromberg-Carlson Telephone Manufacturing Company, Rochester, N. Y. Radio receiving system. 1,684,361; Sept. 11.
Pratt, William H., and D. R. Price, Lynn, Mass., assignors to General Electric Company. Telemetric impulse summation system. 1,684,241; Sept. 11.
Price, David R. (See Pratt, W. H., and Price.)
Price, John R., Charlottesville, Va. Electric-circuit control system. 1,684,071; Sept. 11.
Prince, Joseph E., and J. E. Schooley, Seattle, Wash. Spotlight-mounting device. 1,683,915; Sept. 11.
Prosperity Company, Inc., The. (See Davis, Ernest, assignor.)
Prosperity Company Inc., The. (See Hallowell, Louis S., assignor.)
Pullets, George, New York, N. Y. Mounted automobile jack. 1,683,987; Sept. 11.
Quaker Silver Company. (See Jennings, James W., assignor.)
Radio Corporation of America. (See Goldsmith, Alfred N., assignor.)
Radio Corporation of America. (See Ranger, Richard H., assignor.)
Rahr, Chester E. (See Cady, W. H., and Rahr.)
Ramig, George H. (See Sherman, A. G., Smith, Ramig, and Roose.)
Ramsay, Warren A., Jersey City, N. J. Waterproof container. 1,684,289; Sept. 11.
Randolph, Charles P., Oak Park, assignor to Edison Electric Appliance Company, Chicago, Ill. Percolator. 1,684,242; Sept. 11.
Ranger, Richard H., Brooklyn, N. Y., assignor to Radio Corporation of America. Interference-reducing means for radio receiving apparatus. 1,683,916; Sept. 11.
Rangiertechnische Gesellschaft m. b. H. (See Wenzel, Karl E., assignor.)
Rankin, David P., Kearney, Nebr. Spirally-wound metallic belt. 1,683,697; Sept. 11.
Rath, Lewis G., Pine Lawn, Mo. Dirigible headlight. 1,683,802; Sept. 11.
Rathjen, William L., Portland, Oreg. Thread holder and cutter. 1,683,803; Sept. 11.
Rau, Gustav, Kansas City, Mo. Air-cooled block for lining walls. 1,684,329; Sept. 11.
Rau, Henry V., Brooklyn, assignor to A. G. Spalding & Bros. Inc., New York, N. Y. Golf-bag bottom. 1,684,111; Sept. 11.
Raun, Peter H., assignor to The Frederick Engineering Company, Frederick, Md. Apparatus for handling ashes and other materials. 1,683,917; Sept. 11.
Reach, A. J., Company. (See Dieterle, Frank, assignor.)
Read, Alexander M., Columbus, Ohio. Pulverizing machine. 1,683,627; Sept. 11.
Reading, Walter J., Easton, Pa. Direction-indicator switch for automobiles. 1,683,988; Sept. 11.
Reardon, Edwin M. (See Fisher, R. D., and Reardon.)
Reed, Carl S., Yonkers, assignor to International Combustion Engineering Corporation, New York, N. Y. Air preheater. 1,683,804; Sept. 11.
Reed, Charles E., McHenry Township, McHenry County, Ill. Lathe. 1,684,072; Sept. 11.
Regall, Bruno, et al. (See Schugerl, Louis, assignor.)
Regall, John, et al. (See Schugerl, Louis, assignor.)
Reichelt, Bruno, Nutley, N. J. Airplane. 1,683,805; Sept. 11.
Remington Rand Inc. (See Welland, A., Russell, and Mezger, assignors.)
Rettig, Bruce C., Fort Worth, Tex. Ceiling-fan hanger. 1,684,144; Sept. 11.
Reynolds Machine Company, The. (See Brown, G. C., and McNulty, assignors.)
Rice, Joseph, assignor to Elevator Company of America, Chicago, Ill. Elevator platform. Re17,080; Sept. 11.
Rich, Theodore A., East Lynn, Mass., assignor to General Electric Company. Measuring device. 1,684,243; Sept. 11.
Richards, John W., jr., Essexville, Mich. Shoe for transmission-clutch-drum lugs. 1,683,806; Sept. 11.
Richardson, Bess E., Los Angeles, Calif. Carton. 1,684,244; Sept. 11.
Richter, George A., assignor to Brown Company, Berlin, N. H. Recovery of waste gases in the production of sulphite pulp. 1,683,628; Sept. 11.
Richter, Max, assignor to Textile Machine Works, Wyomissing, Pa. Tension-take-up device for knitting machines. 1,683,989; Sept. 11.
Richter, Wolfgang D., Philadelphia, Pa. Welt mechanism for full-fashioned-knitting machines. 1,683,698; Sept. 11.
Riddell, William A., assignor to The Frederick Iron & Steel Company, Frederick, Md. Separating or classifying machine. 1,683,918; Sept. 11.
Riek, Rudolph A., Rhinelander, Wis. Shield for refrigerating units. 1,683,919; Sept. 11.
Riek, Rudolph A., Rhinelander, Wis. Refrigerator lining and method of making. 1,684,145; Sept. 11.
Ripley, Charles T., assignor to S. & T. Metal Company, Chicago, Ill. Railway journal bearing. 1,684,146; Sept. 11.
Ritcheson, Guy O. (See Harr, F. D., and Fallon, assignor.)
Roberts, Eugene, assignor to The Western States Machine Company, Salt Lake City, Utah. Brake for gyratory centrifugals. 1,684,868; Sept. 11.
Roberts, Flossie, executrix. (See Roberts, William C.)

Roberts, Richard J., San Francisco, Calif. Preheater for type and lead casting machines. 1,684,112; Sept. 11.
Roberts, William C., deceased, Duquoin, Ill.; F. Roberts, executrix. Stripping. 1,684,147; Sept. 11.
Robertson, Harry M., Cleveland, Ohio. Kiln. 1,683,807; Sept. 11.
Robertson, William J., Winnipeg, Manitoba, Canada. Sleigh. 1,683,846; Sept. 11.
Robey, Guy M. (See Smyth, C. D., and Robey.)
Robinson, Charles A., assignor to Merrimack Man'fg Co., Lowell, Mass. Pile-cutting machine. 1,684,113; Sept. 11.
Robinson, John G., Blackwell, Okla. Well tubing. 1,683,629; Sept. 11.
Robinson, Joseph, New York, N. Y. Automatic train-pipe-connecter head. 1,684,376; Sept. 11.
Rohne, Even J. (See Rohne, Jens E., assignor.)
Rohne, Jens E., assignor to E. J. Rohne, Minneapolis, Minn. Water heater for internal-combustion engines. 1,683,920; Sept. 11.
Ronneberger, Fritz, Berlin, Germany, assignor to Westinghouse Electric & Manufacturing Company. Disconnecting switch. 1,684,148; Sept. 11.
Roos, Oscar C., Rockland, Me. Electromagnetic wave receiving system. 1,683,847; Sept. 11.
Roose, Cyriel A. (See Sherman, A. G., Smith, Ramig, and Roose.)
Rose, William H., Jersey City, N. J. Liquid valve. 1,683,727; Sept. 11.
Ross, James G., assignor of 40 per cent to E. Guyer, Seattle, Wash. Street sign. 1,683,921; Sept. 11.
Rotter, Max, Milwaukee, Wis., assignor to Busch-Sulzer Bros.-Diesel Engine Co., St. Louis, Mo. Electrical power equipment. 1,684,073; Sept. 11.
Rowan, Albert J., assignor to Payton & Kelley Co., Providence, R. I. Decorated tube. Des. 76,323; Sept. 11.
Rowe, Ardello M. and C. O., Bellingham, Wash. Automatic-moving-target shooting gallery. 1,683,808; Sept. 11.
Rowe, Claude O. (See Rowe, Ardello M. and C. O.)
Roxana Petroleum Corporation. (See Tijmstra, Sijbren, assignor.)
Royle, Vernon, Paterson, N. J. Strainer head for tubing machines. 1,684,203; Sept. 11.
Rubenstein, Harry, Brooklyn, N. Y. Apparatus and method for producing knitted fabrics. 1,683,609; Sept. 11.
Ruete, William T., New York, N. Y., assignor to General Electric Company. Ceiling box. 1,684,245; Sept. 11.
Rushton, Arthur L., Omaha, Nebr., assignor of one-half to M. H. Lane, Washington, D. C. Separation of butter fat from buttermilk and buttermilk whey. 1,683,728; Sept. 11.
Rushton, Arthur L., Omaha, Nebr., assignor of one-half to M. H. Lane, Washington, D. C. Recovering butter from buttermilk. 1,683,729; Sept. 11.
Rusk, Carl, Astoria, Oreg. Hauling-in device. 1,683,922; Sept. 11.
Russell, Harold R. (See Weiland, A., Russell, and Metzger.)
Russell, Silas B., St. Louis, Mo. Furnace. 1,683,730; Sept. 11.
Ruttenberg, Samuel, Brooklyn, assignor to S. Ruttenberg and M. N. Leibowitz, New York, N. Y. Constructing ballast resistances. 1,684,204; Sept. 11.
Ruttenberg, Samuel, et al. (See Ruttenberg, Samuel, assignor.)
Rutter, Argyle R., Forest Hills, Pa., assignor to Westinghouse Electric & Manufacturing Company. Watthour meter. 1,684,149; Sept. 11.
Ruud Manufacturing Company. (See Humphrey, Herbert S., assignor.)
S. & T. Metal Company. (See Ripley, Charles T., assignor.)
Saal, Christian L., assignor of one-fourth to W. Laessig, Paterson, N. J. Winding machine. 1,684,114; Sept. 11.
Safety Signal Company. (See Morrison, John A., assignor.)
St. Louis Pump & Equipment Company. (See Hinds, Sherwood, assignor.)
Salva Carbureter Company, The. (See Salva, John S., assignor.)
Salva, John S., Latonia, assignor to The Salva Carbureter Company, Covington, Ky. Carburetor. 1,684,246; Sept. 11.
Sampair, Guy B. (See Mavis, F. C., and Sampair.)
Samstag, Henry R., assignor to Samstag & Hilder Bros., Inc., New York, N. Y. Blank of leather. Des. 76,324; Sept. 11.
Samstag & Hilder Bros., Inc. (See Samstag, Henry R., assignor.)
Saranac Automatic Machine Corporation. (See Craig, Edward, assignor.)
Sawyer, Lester T., Fitchburg, Mass. Hair retainer or comb. 1,684,362; Sept. 11.
Schachter, Max, New York, N. Y. Adjustable length tie. 1,684,150; Sept. 11.
Schaelchlin, Walter, Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Voltage regulator. 1,684,151; Sept. 11.
Schaeren, Ernst, Winterthus, Switzerland, assignor to Busch-Sulzer Bros.-Diesel Engine Company, St. Louis, Mo. Injection device for internal-combustion engines. 1,684,074; Sept. 11.
Schaffer, Max Co. (See Krause, Arthur R., assignor.)
Schenck, Charles, and L. Fine, assignors to Bethlehem Steel Company, Bethlehem, Pa. Metal wheel for elastic tires. 1,683,700; Sept. 11.
Schettler, Gustav A., Bramley, Leeds, England, assignor to The Turner Tanning Machinery Company, Portland, Me. Leather-working machine. 1,683,704; Sept. 11.
Schick, Adolph M., Wheeling, W. Va. Mechanical display apparatus. 1,683,990; Sept. 11.
Schiebeler, Carl, Berlin, Germany, assignor to General Electric Company. Motor-control system. 1,684,247; Sept. 11.
Schleicher, Frank J., St. Louis, Mo. Box. Des. 76,325; Sept. 11.
Schleicher, Frank J., St. Louis, Mo. Box. Des. 76,326; Sept. 11.
Schmidlin, Robert. See Siebert, O., Thiess, Schöner, Schmidlin, Benade, and Deicke.)
Schmidlin, Robert. (See Thiess, K., and Deicke, and Schmidlin.)
Schmidt, John, assignor to Sprague-Sells Corporation, Hoopeston, Ill. Vegetable-pulping machine. 1,683,705; Sept. 11.
Schneider & Cie. (See Methlin, Nicolas E., assignor.)
Schofield, William R., jr., assignor to Leeds & Northrup Company, Philadelphia, Pa. Control system. 1,683,809; Sept. 11.
Schon, Lester. (See Shoenberg, M. H., and Schon.)
Schöner, Bernhard. (See Siebert, O., Thiess, Schöner, Schmidlin, Benade, and Deicke.)
Schooley, James E. (See Prince, J. E., and Schooley.)
Schramm, Walter H., Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company. Insulator. 1,684,152; Sept. 11.
Schugerl, Louis, assignor of forty-eight per cent to B. Regall and J. Regall, New Kensington, Pa. Window-sash construction. 1,683,991; Sept. 11.
Schuman, Leland M. H., Savannah, Ga. Radius rod for motor vehicles. 1,683,923; Sept. 11.
Schürer, Eugen, assignor to Felton & Guilleaume Carlswerk Actien-Gesellschaft, Cologne-Mulheim, Germany. Lead-sheathed telephone cable. 1,684,363; Sept. 11.
Schuster, Karl R., Hopatcong, N. J. Mixing concrete and transporting the same. Re17,082; Sept. 11.
Schuster, Karl R., Hopatcong, N. J. Transporting mixed materials. 1,684,370; Sept. 11.
Schwab, James W., Gulf, assignor to Texas Gulf Sulphur Company, Bay City, Tex. Treating sulphur. 1,683,731; Sept. 11.
Schwartz, Frederick, assignor to Robert Findlay Manufacturing Company, Inc., Brooklyn, N. Y. Table. Des. 76,328; Sept. 11.
Schwarz, Carl, Rostock, Germany, and H. Schwarz, Chicago, Ill. Boat water-closet. 1,683,924; Sept. 11.
Schwarz, Hugo. (See Schwarz, Carl and H.)
Schwendner, Anthony F., Essington, and J. S. Myers, Philadelphia, Pa., assignors to Westinghouse Electric & Manufacturing Company. Hydraulic transmission system. 1,684,075; Sept. 11.
Scott, Charles W., Minneapolis, Minn. Savings bank. Des. 76,327; Sept. 11.
Scott, Thomas S., Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company. Hollow-shaft collector-lead support. 1,683,706; Sept. 11.
Seckel, Gerrit J., Enschede, Netherlands. Weaving textile fabrics. 1,684,364; Sept. 11.
See, Adolf A., Lake Charles, La. Chair or similar article of furniture. Des. 76,337; Sept. 11.
Seebach, Fritz, Gotha, assignor to Bakelite Gesellschaft mit beschränkter Haftung, Berlin-Charlottenburg, Germany. Artificial resin and making the same. 1,683,701; Sept. 11.
Seebach, Fritz, Erkner, near Berlin, assignor to Bakelite Gesellschaft mit beschränkter Haftung, Berlin, Germany. Purifying phenol formaldehyde resins. 1,683,702; Sept. 11.
Selective Treatment Company Limited. (See Dolbear, Samuel H., assignor.)
Selin, Charles H., Brooklyn, N. Y. Snow and street cleaning shovel. 1,683,732; Sept. 11.
Sellers, William, & Company. (See Kneass, S. L., and Pedrick, assignors.)
Sells, Ogden S., assignor to Sprague-Sells Corporation, Hoopeston, Ill. Separating thistle buds from peas. 1,683,703; Sept. 11.
Sewall, Frank J., Columbiana, Ohio. Educational device. 1,683,733; Sept. 11.
Sharp, John, Cleveland, Ohio. Sifter. 1,683,848; Sept. 11.
Sheasley, Charles H., Franklin, Pa. Automotive hoisting engine. 1,683,734; Sept. 11.
Sherman, Alvin G., G. Smith, G. H. Ramig, Detroit, and C. A. Roose, Grosse Pointe Farms, assignors to The Detroit Vapor Stove Co., Detroit, Mich. Heat-control device for ovens. 1,684,205; Sept. 11.
Shestakoff, Peter. (See Petroff, G., and Shestakoff.)
Shoenberg, Milton H., and L. Schon, San Francisco, Calif.; said Schon assignor to said Shoenberg. Circuit interrupter and socket. 1,683,992; Sept. 11.
Shoenberg, Milton H., and L. Schon, San Francisco, Calif.; said Schon assignor to said Shoenberg. Electrical cigar lighter. 1,683,993; Sept. 11.
Shonnard, Harold W., Upper Montclair, assignor to Elevator Supplies Company, Inc., Hoboken, N. J. Elevator-control apparatus. 1,683,925; Sept. 11.

Shonnard, Harold W., Upper Montclair, N. J., assignor to Elevator Supplies Company. Closure operator for sliding doors. 1,684,115; Sept. 11.
Siebert, Otto, Dessau, K. Thiess, Hochst-on-the-Main, B. Schöner, Wolfen, near Bitterfeld, R. Schmidlin, Hochst-on-the-Main, W. Benade, Dessau, and B. Deicke, Hochst-on-the-Main, Germany, assignors to Grasselli Dyestuff Corporation, New York, N. Y. Water-soluble dyestuff and producing same. 1,684,330; Sept. 11.
Sievers, Arthur W., Valparaiso, Ind., assignor to N. S. Amstutz. Scintillating sign. 1,684,369; Sept. 11.
Silica Gel Corporation, The. (See Patrick, W. A., and Barclay, assignors.)
Silica Gel Corporation, The. (See Patrick, W. A., and Miller, assignors.)
Simpson, William G., Ferndale, Mich. Hydrocarbon turbine engine. 1,683,994; Sept. 11.
Singer Manufacturing Company, The. (See Becker, Rudolph, assignor.)
Sjostrom, Agnes, Cherokee, Iowa. Chicken brooder. 1,683,926; Sept. 11.
Skelding, Louis, Vancouver, British Columbia, Canada. Hot-air heating system. 1,684,044; Sept. 11.
Slagle, William F., Putneyville, Pa. Horseshoe. 1,684,045; Sept. 11.
Smallwood, Horace W. (See Lister, J. F., and Smallwood.)
Smith, Charles F., Tacoma, Wash. Clothes-drying rack. 1,684,153; Sept. 11.
Smith, George. (See Sherman, A. G., Smith, Ramig, and Roose.)
Smith, George A., Baltimore, Md. Hydrometer chamber. 1,683,735; Sept. 11.
Smith, Goodwin B., assignor to The Junoform Company, Philadelphia, Pa. Coil-controlled device. 1,683,995; Sept. 11.
Smith, Harry B., assignor to Lightship Cloth Board Corporation, Brooklyn, N. Y. Cloth board and similar article. 1,683,707; Sept. 11.
Smith, Howard F. (See Weise, Edmund F., assignor.)
Smith, James O., assignor of one-half to L. E. Harshbarger, Kiefer Okla. Valve. 1,683,927; Sept. 11.
Smith, Jesse A. B., Stamford, Conn., assignor to Underwood Elliott Fisher Company, New York, N. Y. Typewriting machine. 1,684,155; Sept. 11.
Smith, John H., Philadelphia, Pa., assignor to Westinghouse Electric and Manufacturing Company. Condenser. 1,684,154; Sept. 11.
Smith, John M., Chihuahua, Mex. Digit guard. 1,684,076; Sept. 11.
Smith, John W., Philadelphia, Pa. Rolling thin sections. 1,684,206; Sept. 11.
Smith, Maud E., El Reno, Okla. Baby pants. 1,684,046; Sept. 11.
Smith, Raymond H., and C. B. Meyers, Richmond, Ind. Oil burner. 1,684,288; Sept. 11.
Smith, S. Morgan, Company. (See Jessop, George A., assignor.)
Smith, Samuel T. G., St. Louis, Mo. Making smooth castings. 1,683,630; Sept. 11.
Smith, Willoughby S., Benchams, Newton Poppleford, and N. W. McLachlan, London, England. Cable telegraphy and the like. 1,684,116; Sept. 11.
Smith, Willoughby S., Newton Poppleford, N. W. McLachlan, and W. G. R. Jacob, London, England. Telegram system and circuit arrangement therefor. 1,684,117; Sept. 11.
Smith, Willoughby S., Benchams, Newton Poppleford, N. W. McLachlan, and W. G. R. Jacob, London, England. Cable telegraphy and the like and circuit therefor. 1,684,248; Sept. 11.
Smith's, John E., Sons Co. (See Knowlton, Eugene W., assignor.)
Smyth, Clarence D., Rox, Nev., and G. M. Robey, Los Angeles, Calif. Traffic signal. 1,684,207; Sept. 11.
Smyth, Cornelius M., Chicago, Ill. Ear guard. 1,683,928; Sept. 11.
Smyth Manufacturing Company. (See Bischof, Ulrich, assignor.)
Snell, Samuel A., assignor to F. C. Matthael, Detroit, Mich. Automobile heater. 1,684,118; Sept. 11.
Snow, Walter A., New York, N. Y. Filling container. 1,683,996; Sept. 11.
Snyder, Robert W., assignor to The Goodyear Tire & Rubber Company, Akron, Ohio. Air-bag stripper. 1,683,736; Sept. 11.
Société Belge des Produits Rationnels, Societe Anonyme. (See Gougnard, Henri, assignor.)
Solomon, Arthur, New York, N. Y. Textile fabric. Des. 76,329; Sept. 11.
Soulé, Edward L., Berkeley, Calif. Column clamp. 1,683,929; Sept. 11.
Spalding, A. G., & Bros. Inc. (See Rau, Henry V., assignor.)
Spear, Elliot N., Auburn, Me. Chair. Des. 76,330; Sept. 11.
Specht, Harry M., Pelham, N. Y. Impregnating fabrics with substantially permanent fragrance and the product. 1,683,849; Sept. 11.
Speedometer Lock-Seal Company. (See Summers, Arthur D., assignor.)
Spittal, David, Chambly Basin, Quebec, Canada. Golf club. 1,683,810; Sept. 11.
Splitdorf Electrical Company. (See Nowosielski, Edward B., assignor.)
Sprague-Sells Corporation. (See Schmidt, John, assignor.)
Sprague-Sells Corporation. (See Sells, Ogden S., assignor.)
Sprung, Edwin G., Detroit, Mich., assignor to The Studebaker Corporation, South Bend, Ind. Brake. 1,684,156; Sept. 11.
Staege, Stephen A., Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company. Speed-regulator system. 1,684,077; Sept. 11.
Staggs, Horace M., Dallas, Tex. Air-lift pump. 1,683,930; Sept. 11.
Stambaugh, Francis M. (See Mullen, J. J., and Stambaugh.)
Stancliffe, Cecil W., Stamford, Conn., assignor to Valveless Oil Burner Corporation, New York, N. Y. Air-governed destination control for liquids. 1,683,737; Sept. 11.
Standard Fibre Company. (See White, William W., assignor.)
Stanley, Arthur M., Lynn, assignor to Stanley Steel Welded Wheel Corporation, Boston, Mass. Disk wheel and making the same. 1,683,738; Sept. 11.
Stanley, Henry, Galveston, Tex. Egg-preserving compound. 1,683,631; Sept. 11.
Stanley Steel Welded Wheel Corporation. (See Stanley, Arthur M., assignor.)
Stanley Works Gesellschaft mit beschränkter Haftung. (SeeVom Bruck, Friedrich C., assignor.)
Starling, William J., Chicago, Ill. Balancing means for vehicle wheels. 1,684,290; Sept. 11.
Sterling, George H. (See Sterling, Laurence B., assignor.)
Sterling, Laurence B., assignor to G. H. Sterling, Minneapolis, Minn. Motor heater. 1,684,157; Sept. 11.
Stevenson, Alexander R., jr., Schenectady, N. Y., assignor to General Electric Company. Automatic circuit controller. 1,684,249; Sept. 11.
Stone, Herbert G., Bristol, Tenn. Subliming apparatus. 1,683,931; Sept. 11.
Stone, John S., San Diego, Calif., assignor to American Telephone and Telegraph Company. Directive antenna array. 1,683,739; Sept. 11.
Stoven, Detlef W., Park City, Utah. Dairy utensil. 1,684,047; Sept. 11.
Strafus, Anton F., assignor of one-half to L. R. McGarvin, Los Angeles, Calif. Oil can. 1,683,997; Sept. 11.
Strom, Clifton O., and H. M. Nelson, jr., assignors to Nelson Bros. and Strom, Racine, Wis. Rubber-strip-cutting machine. 1,684,158; Sept. 11.
Stromberg-Carlson Telephone Manufacturing Company. (See Powell, Winfred T., assignor.)
Studebaker Corporation, The. (See Sprung, Edwin G., assignor.)
Studer, Robert J., administrator. (See Ohm, Emil K.)
Suits, Seymour, Philadelphia, Pa. Headlight. 1,683,998; Sept. 11.
Sullivan Machinery Company. (See Gartin, Elmer G., assignor.)
Sullivan Machinery Company. (See Osgood, Charles F., assignor.)
Summers, Arthur D., assignor to Speedometer Lock-Seal Company, Los Angeles, Calif. Combined locking device and seal. 1,683,932; Sept. 11.
Summers, Frank, assignor of one-half to L. Urbancic, Memphis, Tenn. Auger. 1,684,291; Sept. 11.
Sunset Feather Company. (See Krobitzsch, Robert W., assignor.)
Sweningson, Louis. (See Conhaim, F., and Sweningson.)
Switzer, Joseph. (See Geyer, J., and Switzer.)
Sykes, William E., Buffalo, N. Y. Flexible shaft coupling. 1,683,999; Sept. 11.
Symington Company, The. (See Dunbeck, Joseph R., assignor.)
Symington Company, The. (See Kadel, Byers W., assignor.)
Syphonix Refrigerator Company. (See Munch, Walter, assignor.)
Taggart Brothers Company. (See Taggart, Joseph W., assignor.)
Taggart, Joseph W., assignor to Taggart Brothers Company, Watertown, N. Y. Paper bag. 1,683,632; Sept. 11.
Tait, Edward B., Colchester, England. Rotary pump. 1,683,633; Sept. 11.
Takei, Kakutaro. (See Hosoi, Isamu, assignor.)
Tavender, Walter K., Haworth, N. J., assignor to I. Hadley. Electrical heater. 1,683,740; Sept. 11.
Taylor, George A., Boston, Mass. Match. 1,684,000; Sept. 11.
Taylor Instrument Companies. (See Ireland, George B., assignor.)
Taylor, William A., and C. M. Gidley, Borger, Tex. Tank-car placard. 1,684,048; Sept. 11.
Taylor, William P., Buffalo, N. Y. Carburetor. 1,683,634; Sept. 11.
Tegelberg, Gilbert H., Inglewood, Calif. Rocking-horse toy. 1,684,250; Sept. 11.
Teshima, Tadataka, Portland, Oreg. Artificial bait. 1,683,933; Sept. 11.
Texas Gulf Sulphur Company. (See Schwab, James W., assignor.)
Textile Machine Works. (See Richter, Max, assignor.)
Thatcher, Linden A., Belleville, N. J., assignor to Underwood Elliott Fisher Company, New York, N. Y. Stenciling machine. 1,683,635; Sept. 11.
Thatcher, Linden A., Belleville, N. J., assignor to Underwood Elliott Fisher Company, New York, N. Y. Stenciling machine. 1,683,741; Sept. 11.

Theanders, Fingo. (See Burwell, Ray F., assignor.)
Thiess, Karl. (See Siebert, O., Thiess, Schöner, Schmidlin, Benade, and Deicke.)
Thiess, Karl, B. Deicke, and R. Schmidlin, Hochst-on-the-Main, Germany, assignors to Grasselli Dyestuff Corporation, New York, N. Y. Polyarylamine dyestuff and producing the same. 1,684,331; Sept. 11.
Thomas & Betts Co., The. (See Thomas, George C., jr., assignor.)
Thomas, Charles E., Long Beach, Calif. Safety carriage for derricks. 1,684,251; Sept. 11.
Thomas, George C., jr., assignor to The Thomas & Betts Co., Elizabeth, N. J. Outlet-box construction. 1,683,742; Sept. 11.
Thomas, Max, Weisswasser, Oberlausitz, assignor to Patent-Treuhand-Gesellschaft fur elektrische Gluhlampen m. b. H., Berlin, Germany. Producing glass. 1,684,332; Sept. 11.
Thompson, Orville W., assignor to Jas. P. Marsh & Company, Chicago, Ill. Combined gauge and thermometer. 1,683,743; Sept. 11.
Thomson, Archibald, assignor to F. A. Hall, Peoria, Ill. Water circulator and air moistener for internal-combustion engines. 1,683,811; Sept. 11.
Tijmstra, Sijbren, Madison County, Ill., assignor to Roxana Petroleum Corporation. Refining oils. 1,684,159; Sept. 11.
Timken Roller Bearing Company, The. (See Chievitz, William J., assignor.)
Timmons, William D., Coshocton, Ohio. Cutting die. 1,683,934; Sept. 11.
Tinker, Herbert R., Lankershim, assignor of one-half to S. M. White, San Francisco, Calif. Combination spare-tire and accessory carrier. 1,684,160; Sept. 11.
Todd, George W., assignor to R. Todd, Omaha, Nebr. Dental instrument. 1,684,252; Sept. 11.
Todd, Rhena. (See Todd, George W., assignor.)
Toffelmier, Lance J., San Leandro, and C. Miller, Oakland, assignors to Junior Monarch Hay Press Company, San Leandro, Calif. Follower-operating mechanism for hay presses. 1,683,935; Sept. 11.
Tol, Hermanus F., The Hague, assignor to Naamloose Vennootschap: Machinefabriek "Reineveld," Delft, Netherlands. Ironing machine. 1,684,333; Sept. 11.
Toope, Robert F., New Haven, Conn. Automatic poultry feeder. 1,684,334; Sept. 11.
Tootbaker, Fred E., Swampscott, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Manufacture of shoes. 1,683,636; Sept. 11.
Townsend, George H., Greenwich, Conn. Light casing. Des. 76,331; Sept. 11.
Traublitz, Sydney M., New York, N. Y. Electrical outlet. 1,684,161; Sept. 11.
Traxel, William J. (See Kantor, J., Fick, and Traxel.)
Trimpe, Emmett H., assignor to J. A. Everitt, Indianapolis, Ind. Artificial tree. 1,683,637; Sept. 11.
Trumpler, William E., Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Transmission. 1,684,162; Sept. 11.
Truscon Steel Company. (See Kane, Thomas H., assignor.)
Tubal Boiler Company. (See White, Raymond E., assignor.)
Tubular Rivet & Stud Company. (See Bray, Mellen N., assignor.)
Turner Tanning Machinery Company, The. (See Schettler, Gustav A., assignor.)
Turner, William, Louisville, Ky. Combined mop and wringer. 1,683,638; Sept. 11.
Turnquist, Edward, Anderson, Ind., assignor to Delco-Remy Corporation, Dayton, Ohio. Electric lamp. 1,684,292; Sept. 11.
Twin City Forge & Foundry Company. (See Ovestrud, Melvin, assignor.)
Two-Tone Corporation, The. (See Mijer, Pieter, assignor.)
Ulrich, Carl J., Minneapolis, Minn. Juice extractor. 1,683,850; Sept. 11.
Umbriaco, Frank, New York, N. Y. Accordion-locking means. 1,684,119; Sept. 11.
Underwood Elliott Fisher Company. (See Kurowski, Alfred G. F., assignor.)
Underwood Elliott Fisher Company. (See Smith, Jesse A. B., assignor.)
Underwood Elliott Fisher Company. (See Thatcher, Linden A., assignor.)
Unger, Paul O., assignor to McMillan Book Company, Syracuse, N. Y. Cover for books, binders, and the like. 1,684,335; Sept. 11.
Union Switch & Signal Company, The. (See Peter, Leslie H., assignor.)
United Metal Products Company, The. (See Nyman, John O., assignor.)
United Shoe Machinery Corporation. (See Eppler, Andrew, assignor.)
United Shoe Machinery Corporation. (See Hadaway, John B., assignor.)
United Shoe Machinery Corporation. (See La Chapelle, Fred M., assignor.)
United Shoe Machinery Corporation. (See Morrill, Alfred R., assignor.)
United Shoe Machinery Corporation. (See O'Sullivan, Patrick J., assignor.)
United Shoe Machinery Corporation. (See Toothaker, Fred E., assignor.)
United States Chain & Forging Company. (See Bremer, Frederick G., assignor.)
United States Printing & Lithograph Company, The. (See Burgess, Joseph E., assignor.)
Universal Oil Products Company. (See Egloff, Gustav, assignor.)
Universal Oil Products Company. (See Egloff, G., and Howard, assignors.)
Universal Oil Products Company. (See Huff, Lyman C., assignor.)
Universal Products Company, The. (See Pollock, Robert T., assignor.)
Urbancic, Leopold. (See Summers, Frank, assignor.)
Valle, Pembroke A., Chicago, assignor to B. L. MacGregor, Hollywood, Ill. Golf club. 1,683,639; Sept. 11.
Valentin, Paul, assignor to R. Dreux, Paris, France. Flying machine. 1,684,163; Sept. 11.
Valveless Oil Burner Corporation. (See Stancliffe, Cecil W., assignor.)
Van Hoozer, Cora M., Ioia, Kans. Statuette. Des. 76,332; Sept. 11.
Van Rijswijk, Willem. (See Baumann, A., and van Rijswijk.)
Vattenborg Systems Inc. (See Myres, Robert W., assignor.)
Vickers Limited. (See Ogden, Amos, assignor.)
Vogeltanz, E. L., et al. (See Criner, Harry J., assignor.)
Voight, George F., Oakland, Calif., assignor to Economy Products Corporation. Wire fastener. 1,684,120; Sept. 11.
Vom Bruck, Friedrich C., Dusseldorf, assignor, by mesne assignments, to the firm Stanley Works Gesellschaft mit beschränkter Haftung, Velbert, Germany. Universal lock. 1,683,744; Sept. 11.
Von Arco, Georg, assignor to Gesellschaft für Drahtlose Telegraphie m. b. H., Berlin, Germany. Arrangement for avoiding reflections of sound inside buildings. 1,684,078; Sept. 11.
Von Kornatzki, Hans H., Ziegenhagen, Post Reets, Germany. Medicinal soap. 1,684,336; Sept. 11.
Waite Carpet Company. (See Brandt, Stella, assignor.)
Walbert, Hans. (See Emmel, K., and Walbert.)
Wallace, R., & Sons Mfg. Co. (See Warren, William S., assignor.)
Walsh, Patrick H., Newton, Mass., assignor to Caro Cloth Corporation, Carolina, R. I. Method of and apparatus for manufacturing textile fleece. 1,683,812; Sept. 11.
Wappler Electric Company. (See Fayer, Charles, assignor.)
Wappler Electric Company. (See Wappler, F. H., Hultman, and Fayer, assignors.)
Wappler, Frederick H., Flushing, G. H. Hultman, Queens Village, and C. Fayer, Flushing, assignors to Wappler Electric Company, Inc., Long Island City, N. Y. Electrosurgical instrument. 1,683,708; Sept. 11.
Warr, Harold G., Park Ridge, assignor to The P & M Company, Chicago, Ill. Rail anchor. 1,684,208; Sept. 11.
Warren Featherbone Co., The. (See Chamberlain, Frederic W. and E. B., assignors.)
Warren, William S., Meriden, assignor to R. Wallace & Sons Mfg. Co., Wallingford, Conn. Spoon or similar article. Des. 76,333; Sept. 11.
Warren, William S., Meriden, assignor to R. Wallace & Sons Mfg. Co., Wallingford, Conn. Spoon or similar article. Des. 76,334; Sept. 11.
Watson, George D., Torrance, Calif. Oil-well apparatus. 1,683,745; Sept. 11.
Weiland, Alfred, Neshanic, N. J., H. R. Russell, Douglaston, N. Y., and C. A. Mezger, New Brunswick, N. J., assignors, by mesne assignments, to Remington Rand Inc., New York, N. Y. Alphabetical keyboard punch. 1,684,001; Sept. 11.
Weiller, Paul G., East Orange, N. J., assignor to Wired Radio, Inc., New York, N. Y. Radio reception. 1,684,164; Sept. 11.
Weise, Edmund F., Houston, assignor to H. F. Smith, Harris County, Tex. Sealing device. 1,683,640; Sept. 11.
Weldy, Arthur S., Canton, Ohio. Pipe seal. 1,683,746; Sept. 11.
Wells, Walter T., Canton, Ohio. Vanity case. 1,683,851; Sept. 11.
Welsh, Albert E., Lewiston, Idaho. Calendar. 1,683,936; Sept. 11.
Wentzell, Amos W., Salem, N. J. Screen device for casement windows. 1,684,121; Sept. 11.
Wenzel, Karl E., assignor to Rangiertechnische Gesellschaft m. b. H., Hamborn, Germany. Safety contrivance on permanent railway tracks. 1,683,709; Sept. 11.
West, Abe, St. Cloud, Minn. Tobacco-baling press. 1,684,300; Sept. 11.
Western Electric Company. (See Ives, Herbert E., assignor.)
Western Electric Company. (See Maneschi, Egidio E., assignor.)
Western States Machine Company, The. (See Roberts, Eugene, assignor.)
Western Union Telegraph Company, The. (See Dirkes, Robert F., assignor.)
Westinghouse Electric & Manufacturing Company. (See Aalborg, Christian, assignor.)
Westinghouse Electric & Manufacturing Company. (See Allen, Robert C., assignor.)
Westinghouse Electric & Manufacturing Company. (See Atherton, Alfred L., assignor.)

Westinghouse Electric and Manufacturing Company. (See Bethel, C., and McCloskey, assignors.)
Westinghouse Electric & Manufacturing Company. (See Bethel, Claude, assignor.)
Westinghouse Electric & Manufacturing Company. (See Bliziotis, George E., assignor.)
Westinghouse Electric & Manufacturing Company. (See Clark, Earl K., assignor.)
Westinghouse Electric & Manufacturing Company. (See Coates, William A., assignor.)
Westinghouse Electric & Manufacturing Company. (See Eaton, George M., assignor.)
Westinghouse Electric & Manufacturing Company. (See Evans, Robert D., assignor.)
Westinghouse Electric & Manufacturing Company. (See Forshee, Frank F., assignor.)
Westinghouse Electric & Manufacturing Company. (See Hill, Leland H., assignor.)
Westinghouse Electric & Manufacturing Company. (See James, Henry D., assignor.)
Westinghouse Electric & Manufacturing Company. (See Jungk, Herbert G., assignor.)
Westinghouse Electric & Manufacturing Company. (See King, William R., assignor.)
Westinghouse Electric & Manufacturing Company. (See Kreisel, Paul, assignor.)
Westinghouse Electric & Manufacturing Company. (See Miner, Douglas F., assignor.)
Westinghouse Electric & Manufacturing Company. (See Mylius, W. G., and Hoeftman, assignors.)
Westinghouse Electric & Manufacturing Company. (See Ronneberger, Fritz, assignor.)
Westinghouse Electric & Manufacturing Company. (See Rutter, Argyle R., assignor.)
Westinghouse Electric & Manufacturing Company. (See Schaelchlin, Walter, assignor.)
Westinghouse Electric & Manufacturing Company. (See Schramm, Walter H., assignor.)
Westinghouse Electric & Manufacturing Company. (See Schwendner, A. F., and Myers, assignors.)
Westinghouse Electric & Manufacturing Company. (See Scott, Thomas S., assignor.)
Westinghouse Electric and Manufacturing Company. (See Smith, John H., assignor.)
Westinghouse Electric & Manufacturing Company. (See Staege, Stephen A., assignor.)
Westinghouse Electric & Manufacturing Company. (See Trumpler, William E., assignor.)
Wheeler, Lawrence N., Monrovia, Calif. Exhaust-gas water heater. 1,683,747; Sept. 11.
Whitaker, Frank P., Rugby, England, assignor to General Electric Company. Dynamo-electric machine. 1,684,253; Sept. 11.
White, Alfred E., Pasedena, Calif. Radio equipment. 1,683,748; Sept. 11.
White, Edwin H., New York, N. Y. Method and construction for storing motor vehicles. 1,683,937; Sept. 11.
White, Raymond E., assignor to Tubal Boiler Company, Chicago, Ill. Liquid-fuel burner and control mechanism therefor. 1,684,079; Sept. 11.
White, S. S., Dental Manufacturing Company, The. (See Hallowell, Clifton C., assignor.)
White, Stephen M. (See Tinker, Herbert R., assignor.)
White, William J., assignor of one-half to W. H. Gilbert and one-half to V. G. Foft, San Francisco, Calif. Razor-blade holder. 1,683,853; Sept. 11.
White, William W., assignor to Standard Fibre Company, Kenneth Square, Pa. Tool box for automobiles. 1,684,002; Sept. 11.
Whitehead, Richard H., assignor to The New Haven Clock Co., New Haven, Conn. Clock case. Des. 76,335; Sept. 11.
Whitney, Fred A., Leominster, Mass. Toilet-paper holder. 1,683,641; Sept. 11.
Whitridge, John C., and G. T. Johnson, assignors to The Buckeye Steel Castings Company, Columbus, Ohio. Coupler shank and yoke connection. 1,684,209; Sept. 11.
Wiegner, Simon P., C. W. Davidson, and H. E. Gordon, Los Angeles, Calif. Signal awitch for vehicles. 1,683,852; Sept. 11.
Wildhaber, Ernest. (See Candee, A. H., and Wildhaber.)
Wildhaber, Ernest, and J. Gatyr, Rochester, N. Y. Differential mechanism. 1,683,938; Sept. 11.
Wiley, Samuel, Metuchen, N. J. Aeroplane flare or signal. 1,683,939; Sept. 11.
Wiley, Samuel, Metuchen, N. J. Illuminating aero bomb or flare. 1,683,940; Sept. 11.
Willard, Waldo W. (See Hewlett, E. M., and Willard.)
Williston, Samuel H., Maracaibo, Venezuela. Side-wall sampler. 1,683,642; Sept. 11.
Wilson, James C., Winnipeg, Manitoba, Canada. Heat economizer. 1,684,049; Sept. 11.
Wilt, Harry H., et al. (See Crown, William F., assignor.)
Winslow, Sewell E., Bridgeport, Conn., assignor, by mesne assignments, to Consolidated Ashcroft Hancock Company, New York, N. Y. Alloy. 1,683,749; Sept. 11.
Wired Radio, Inc. (See Weiller, Paul G., assignor.)
Wirfs, E. J., Organization, Incorporated. (See Wirfs, Edward J., assignor.)
Wirfs, E. J., Organization, Inc. (See Wirfs, Edward J., jr., assignor.)
Wirfs, Edward J., assignor to E. J. Wirfs Organization, Incorporated, St. Louis, Mo. Gasket. 1,683,941; Sept. 11.
Wirfs, Edward J., jr., Glendale, assignor to E. J. Wirfs Organization, Inc., St. Louis, Mo. Gasket. 1,683,942; Sept. 11.
Wittemann, Theodore. (See Fisher, John J., assignor.)
Wittmask, Harold S., Erie, Pa. Playing piece. 1,683,643; Sept. 11.
Wood, Frederick W. (See Bent, Q., Barnhart, and Wood.)
Woodard, William B., Forest Hills, N. Y. Locomotive. 1,683,750; Sept. 11.
Woods, Leila P., administratrix. (See Woods, Norman E.)
Woods, Norman E., deceased, Paterson, N. J.; L. P. Woods, administratrix. Motor. 1,684,210; Sept. 11.
Woods, Oliver E. C., Toronto, Ontario, Canada. Oil-burning heater. 1,683,644; Sept. 11.
Woodward, Harry C., et al. (See Becker, Joseph, assignor.)
Wright, Charles F., Akron, Ohio, assignor to The Diamond Match Company, Chicago, Ill. Machine for making matches from sheet material. 1,684,165; Sept. 11.
Wright, Lawrence B., A. B. Yates, and A. A. Lease, Lead, S. Dak. Instrument for surveying bore holes. 1,684,337; Sept. 11.
Wright, McKay, Seattle, Wash. Radioantenna. 1,684,003; Sept. 11.
Yale & Towne Manufacturing Company, The. (See Lach, Joseph S., assignor.)
Yates, Arthur B. (See Wright, L. B., Yates, and Lease.)
York Ice Machinery Corporation. (See Bergdoll, John G., assignor.)
Zaiser, William, Rockville Center, N. Y., assignor to The Aeolian Company. Grand piano. Des. 76,336; Sept. 11.
Zerk, Oscar, now by judicial change of name O. U. Zerk, Chicago, Ill., assignor, by mesne assignments, to The Bassick Manufacturing Company. Automatic grease gun and the like. 1,684,080; Sept. 11.
Zerk, Oscar U. (See Zerk, Oscar.)
Zerweck, Werner. (See Herz, R., and Zerweck.)
Zitzmann, George, New York, N. Y., assignor to Automatic Motor Control Corporation. Engine-testing gauge. 1,683,710; Sept. 11.
Zukor, Arnold, New York, N. Y. Combined door fastener and alarm. 1,683,854; Sept. 11.

ALPHABETICAL LIST OF INVENTIONS

FOR WHICH

PATENTS WERE ISSUED ON THE 11TH DAY OF SEPTEMBER, 1928.

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice). **Includes patents, reissues, and designs.**

Abrasive paper or cloth. R. B. Manley. 1,683,623; Sept. 11.
Accordion-locking means. F. Umbriaco. 1,684,119; Sept. 11.
Acid, Manufacturing sulphuric. W. A. Patrick and E. B. Miller. 1,683,694; Sept. 11.
Acids, Manufacture of chlorides of aromatic ortho-hydroxy-carboxylic. E. B. Higgins. 1,684,273; Sept. 11.
Adjustable-length tie. M. Schachter. 1,684,150; Sept. 11.
Advertising apparatus. G. H. Conners. 1,683,760; Sept. 11.
Aeronautics. J. E. Pigeon. 1,684,240; Sept. 11.
Aeroplane. J. C. Elger. 1,684,087; Sept. 11.
Air-bag stripper. R. W. Snyder. 1,683,736; Sept. 11.
Air cleaner, Automobile. C. G. Hawley. 1,684,023; Sept. 11.
Air-cooled block for lining walls. G. Rau. 1,684,329; Sept. 11.
Aircraft, Tail shaft for. A. H. G. Fokker. 1,683,965; Sept. 11.
Airplane. B. Reichelt. 1,683,805; Sept. 11.
Airplane floats, Construction for. G. Loening. 1,684,187; Sept. 11.
Airship, Gas-inflated. W. E. Dörr. 1,683,764; Sept. 11.
Air-supply system. O. L. Ingram. 1,684,031; Sept. 11.
Alarm system. R. E. Joron. 1,684,032; Sept. 11.
Alkali cellulose and cellulose ethers, Preparation of. L. Lilienfeld. 1,683,682; Sept. 11.
Alloy. R. Franks and B. E. Field. 1,684,131; Sept. 11.
Alloy. S. E. Winslow. 1,683,749; Sept. 11.
Anchor, Rail. H. G. Warr. 1,684,208; Sept. 11.
Antenna. H. M. Brown. 1,684,009; Sept. 11.
Antenna. R. C. Clinker. 1,684,202; Sept. 11.
Antenna. A. N. Goldsmith. 1,683,773; Sept. 11.
Antenna array, Directive. J. S. Stone. 1,683,739; Sept. 11.
Antenna for radiotelegraphy. L. Espenschied. 1,683,716; Sept. 11.
Antenna regulator, Automatic. W. W. Brown. 1,684,261; Sept. 11.
Antenna regulator, Automatic. J. E. Love. 1,684,235; Sept. 11.
Artificial tree. E. H. Trimpe. 1,683,637; Sept. 11.
Ashes and other materials, Apparatus for handling. P. H. Raun. 1,683,917; Sept. 11.
Asphalt and similar material, Apparatus for handling. W. H. Cady and C. E. Rahr. 1,683,604; Sept. 11.
Auger. F. Summers. 1,684,291; Sept. 11.
Automobile heater. S. A. Snell. 1,684,118; Sept. 11.
Automobile jack, Mounted. G. Pullets. 1,683,987; Sept. 11.
Automobile seat, Resilient. C. H. Gunn. 1,683,885; Sept. 11.
Automobile signal. C. E. Goheen. 1,683,663; Sept. 11.
Avoiding reflections of sound inside a building, Arrangement for. G. von Arco. 1,684,078; Sept. 11.
Awning fixture, Adjustable. S. Kirschberg. 1,683,903; Sept. 11.
Back rest for chairs, Adjustable. P. W. Olson. 1,684,106; Sept. 11.
Bag: *See*—
Closing bag. Shoe and locker bag.
Golf bag. Utility bag.
Paper bag.
Bait, Artificial. T. Teshima. 1,683,933; Sept. 11.
Baking and roasting appliance. E. Hager. 1,683,611; Sept. 11.
Balancing means for vehicle wheels. W. J. Starling. 1,684,290; Sept. 11.
Baling press, Tobacco-. A. West. 1,684,300; Sept. 11.
Ballast resistances, Constructing. S. Ruttenberg. 1,684,204; Sept. 11.
Bank, Savings. C. W. Scott. Des. 76,327; Sept. 11.
Barrel and sand trap, Combination working. E. L. Boyd and J. T. Johnson. 1,684,295; Sept. 11.
Basket or box, Berry. E. Craig. 1,683,761; Sept. 11.
Battery-reenforcing handle. W. E. Holland. 1,684,277; Sept. 11.
Bearing. W. J. Chlevitz. 1,683,593; Sept. 11.
Bearing. C. L. Daun and P. E. Keller. 1,683,608; Sept. 11.
Bearing, Antifriction. O. Henselman. 1,684,352; Sept. 11.
Bearing, Railway journal. C. T. Ripley. 1,684,146; Sept. 11.
Bearing, Thrust. R. L. Dennison. 1,684,012; Sept. 11.
Bed, Folding. F. Conhaim and L. Sweningson. 1,683,958; Sept. 11.
Belt. W. R. Mulock. 1,683,691; Sept. 11.
Belt drive for refrigerating machines. J. O. Carrey. 1,683,955; Sept. 11.
Belt driving mechanism. G. R. Pennington. 1,684,069; Sept. 11.
Belt-lacing tool. G. Honey. 1,683,825; Sept. 11.
Belt, Spirally-wound metallic. D. P. Rankin. 1,683,697; Sept. 11.
Binder, Loose-leaf. H. S. Horn. 1,683,975; Sept. 11.
Binder, Loose-leaf. J. L. McMillan. 1,684,373; Sept. 11.
Block: *See*—
Building block. Hoisting block.
Bloom shears. J. Hahn. Re17,079; Sept. 11.
Board: *See*—
Ironing board.
Boiler: *See*—
Steam boiler.
Boiler. A. M. Merizanoff. 1,683,836–7; Sept. 11.
Boiler for utilizing fine coal. J. Pollock. 1,684,201; Sept. 11.
Bolster. F. E. Arndt. 1,684,302; Sept. 11.
Bomb or flare, Illuminating aero. S. Wiley. 1,683,940; Sept. 11.
Bottle. B.d'Escayrac. Des. 76,291; Sept. 11.
Bottle-cap receiver. J. H. McDonald. 1,684,285; Sept. 11.
Box: *See*—
Ceiling box. Stamp box.
Box. L. W. Halk. 1,684,091; Sept. 11.
Box. F. T. Schleicher. Des. 76,325–6; Sept. 11.
Box blank or similar article. L. H. Gebhart. Des. 76,296; Sept. 11.
Bracket or article of analogous nature, Wall. A. R. Krause. Des. 76,311; Sept. 11.
Brake: *See*—
Vehicle brake.
Brake. E. G. Sprung. 1,684,156; Sept. 11.
Brake for gyratory centrifugals. E. Roberts. 1,684,368; Sept. 11.
Bread-basket rack. B. G. Howe. 1,683,675; Sept. 11.
Brine circulator. J. G. Bergdoll. 1,683,940; Sept. 11.
Bringing and holding heavy welding pieces in a suitable position during the welding process, Device for. E. O. Edelmann. 1,684,128; Sept. 11.
Broach mechanism. J. Oakley and H. D. Croft. 1,684,139; Sept. 11.
Broach mechanism. J. L. Perkins and H. D. Croft. 1,684,140; Sept. 11.
Brooder, chicken. A. Sjostrom. 1,683,926; Sept. 11.
Brush. A. L. Hoffman. 1,683,618; Sept. 11.
Brush, Demountable. L. L. Mosquera. 1,684,358; Sept. 11.
Brush for cleaning artificial dentures. M. J. Barchfeld. 1,683,947; Sept. 11.
Buckle, Belt. R. F. Eichner. Des. 76,292; Sept. 11.
Building block. H. F. Adams. 1,684,050; Sept. 11.
Building construction. A. Black. 1,683,600; Sept. 11.
Building construction. J. E. De Baun. 1,684,127; Sept. 11.
Building, Portable. F. Förster. 1,683,966; Sept. 11.
Bumper, Automobile. F. G. Bremer. 1,684,259; Sept. 11.
Bumper, Automobile. W. E. Hart. 1,684,093; Sept. 11.
Bumper for sliding doors. J. O. Nyman. 1,683,793; Sept. 11.
Burner: *See*—
Oil burner.
Burner and control mechanism therefor, Liquid-fuel. R. E. White. 1,684,079; Sept. 11.
Burning fine fuel in suspension, Apparatus for. J. Pollock. 1,684,200; Sept. 11.
Bus, Automotive. R. W. Bailey. 1,684,303; Sept. 11.
Butter from buttermilk, Recovering. A. L. Rushton. 1,683,729; Sept. 11.
Butterfat from buttermilk and buttermilk whey, Separation of. A. L. Rushton. 1,683,728; Sept. 11.
Butter-print machine. C. and H. H. Doering. 1,683,873; Sept. 11.
Button board and process of manufacture. A. L. Clapp. 1,683,605; Sept. 11.
Cabinet. F. G. Hodell. 1,683,891; Sept. 11.
Cable, Lead-sheathed telephone. E. Schürer. 1,684,368; Sept. 11.
Cable telegraphy and the like and circuit therefor. W. S. Smith, N. W. McLachlan, and W. G. R. Jacob. 1,684,248; Sept. 11.
Cage, Guard. E. A. Baker. 1,684,122; Sept. 11.
Calendar. A. E. Welsh. 1,683,936; Sept. 11.
Can: *See*—
Dredge can. Oil can.
Candle cup and bobèche, Combined. A. R. Krause. Des. 76,314; Sept. 11.
Carburetor. J. J. Crain. 1,684,085; Sept. 11.
Carburetor. R. F. Ensign. 1,684,055; Sept. 11.
Carburetor. F. Lioud. 1,684,355; Sept. 11.

Carburetor. J. S. Salva. 1,684,246; Sept. 11.
Carburetor. W. P. Taylor. 1,683,634; Sept. 11.
Car construction, Railway-. A. Campbell. 1,684,010; Sept. 11.
Car-coupling mechanism. W. Kelso. 1,683,901; Sept. 11.
Car seat. W. S. Adams. 1,684,301; Sept. 11.
Car seat. J. A. Brooks. 1,684,306; Sept. 1.
Card, Coin. G. Harmouth. 1,683,971; Sept. 11.
Card, Metallic playing. M. Maennlein. 1,684,372; Sept. 11.
Card system, Horizontal. V. Duspiva. 1,683,765; Sept. 11.
Carriage for derricks, Safety. C. E. Thomas. 1,684,251; Sept. 11.
Carton. B. E. Richardson. 1,684,244; Sept. 11.
Cartridges, Safety device for blasting or explosive. E. Karolius. 1,683,900; Sept. 11.
Case: *See*—
Show case. Vanity case.
Cash register. T. M. Butler. Des. 76,286; Sept. 1.
Casing, Light. G. H. Townsend. Des. 76,331; Sept. 11.
Castings, Making smooth. S. T. G. Smith. 1,683,630; Sept. 11.
Castings with a low carbon content, Production of iron. K. Emmel and H. Walbert. 1,683,714; Sept. 11.
Cathode device, Hot-. W. D. Coolidge. 1,684,263; Sept. 11.
Ceiling box. W. T. Ruete. 1,684,245; Sept. 11.
Chain coupling, Suspension-. P. J. Knoblock. 1,683,904; Sept. 11.
Chair. E. N. Spear. Des. 76,330; Sept. 11.
Chair or similar article of furniture. A. A. See. Des. 76,337; Sept. 11.
Chandelier body or article of analogous nature. A. R. Krause. Des. 76,313; Sept. 11.
Chandelier or article of analogous nature. A. R. Krause. Des. 76,310; Sept. 11.
Chart, Analysis. H. E. Ingram. 1,683,827; Sept. 11.
Chart and viewing the same, Indicating. C. Berger. 1,684,212; Sept. 11.
Chopper: *See*—
Cotton chopper.
Cigarette box and match container, Combined. A. R. Graham. 1,683,664; Sept. 11.
Circuit breaker. C. Aalborg. 1,683,589; Sept. 11.
Circuit control system, Electric. J. R. Price. 1,684,071; Sept. 11.
Circuit controller, Automatic. A. R. Stevenson, jr. 1,684,249; Sept. 11.
Circuit cooling for electrical machines, Closed-. A. Baumann and W. van Rijswijk. 1,683,591; Sept. 11.
Circuit interrupter and socket. M. H. Shoenberg and L. Schon. 1,683,992; Sept. 11.
Circulator and air moistener for internal-combustion engines, Water. A. Thomson. 1,683,811; Sept. 11.
Clamp: *See*—
Column clamp. Meat clamp.
Cleaner: *See*—
Air cleaner. Flue cleaner.
Clock case. R. H. Whitehead. Des. 76,335; Sept. 11.
Closet: *See*—
Water-closet.
Closing bag. P. Gangler. 1,683,771; Sept. 11.
Closure operator for sliding doors. H. W. Shonnard. 1,684,115; Sept. 11.
Closure, Receptacle. F. C. Clement. 1,684,214; Sept. 11.
Cloth board and similar article. H. B. Smith. 1,683,707; Sept. 11.
Clutch construction. R. Murphy. 1,683,624; Sept. 11.
Clutch, Intermittent ball. J. M. Dayton. 1,684,172; Sept. 11.
Coating machine. F. M. La Chapelle. 1,683,680; Sept. 11.
Cock and relief valve, Combined drain. H. S. Humphrey. 1,684,097; Sept. 11.
Cocks, Lock for service. M. M. Belote. 1,683,649; Sept. 11.
Coding and decoding apparatus and code-changing device therefor. S. Hole. 1,684,028; Sept. 11.
Coffee-making device. C. T. Long. 1,683,786; Sept. 11.
Coil, Refrigerating. S. C. Bloom. 1,684,083; Sept. 11.
Coin-controlled device. G. B. Smith. 1,683,995; Sept. 11.
Colonic mobile unit. R. W. Myres. 1,683,723; Sept. 11.
Column clamp. E. L. Soule. 1,683,929; Sept. 11.
Commutator motor, Alternating-current. D. M. Bliss. 1,683,601; Sept. 11.
Concrete and transporting the same, Mixing. K. R. Schuster. Re17,082; Sept. 11.
Concrete structures, Reenforcement for. R. C. Olmsted. 1,684,195; Sept. 11.
Condenser. E. A. Johnsen. 1,684,227; Sept. 11.
Condenser. J. H. Smith. 1,684,154; Sept. 11.
Contactor, Oriented electrical. P. E. Edelman. 1,683,819; Sept. 11.
Container and heater, Food. W. G. Hayne. 1,683,889; Sept. 11.
Container, Dispensing. S. A. Merrin. 1,684,188; Sept. 11.
Container, Filling. W. A. Snow. 1,683,996; Sept. 11.
Container for disinfectants. R. E. Naumburg. 1,683,792; Sept. 11.
Container for toilets, Auxiliary. W. M. Bell. 1,683,754; Sept. 11.
Container such as barrel, drum, or the like. A. Mauser. 1,683,788; Sept. 11.
Container, Waterproof. W. A. Ramsey. 1,684,289; Sept. 11.
Containers, Device for handling. W. L. Gibson. 1,683,772; Sept. 11.
Control device, Automatic. T. F. Baily. 1,683,856; Sept. 11.
Control for liquids, Air-governed destination. C. W. Stanclige. 1,683,737; Sept. 11.
Control system. E. F. Bliss. 1,684,256; Sept. 11.
Control system. W. R. Schofield, jr. 1,683,809; Sept. 11.
Controlling mechanism for wringers and other machinery. H. J. Criner. 1,684,265; Sept. 11.
Controlling the positioning of devices from a distance, Apparatus for. N. E. Methlin. 1,684,042; Sept. 11.
Conveyer. W. M. Brown. 1,683,643; Sept. 11.
Cooker. E. E. Cary. 1,684,297; Sept. 11.
Cooling and fire-prevention apparatus for motion-picture projectors. B. J. Berg. 1,684,304; Sept. 11.
Cooling system, Engine. C. P. Brockway. 1,683,602; Sept. 11.
Coop, Knockdown. J. H. Lipscomb. 1,684,135; Sept. 11.
Coring device. R. B. Grainger. 1,684,089; Sept. 11.
Cotton chopper. J. H. Etheredge. 1,683,768; Sept. 11.
Coupler shank and yoke connection. J. C. Whitridge and G. T. Johnson. 1,684,209; Sept. 11.
Coupling: *See*—
Chain coupling. Shaft coupling.
Cover for books, binders, and the like. P. O. Unger. 1,684,335; Sept. 11.
Cover, Grave. W. Buel. 1,683,654; Sept. 11.
Cover, Manhole. J. P. Heil. 1,683,823; Sept. 11.
Cover, Removable card-table. M. S. and J. Diamond. 1,684,173; Sept. 11.
Cracking oil, Apparatus for. G. Egloff and W. R. Howard. 1,683,766; Sept. 11.
Cream separator. J. A. Frisk. 1,683,882; Sept. 11.
Crossing signal. J. A. Morrison. 1,683,690; Sept. 11.
Cultivator. A. D. Gallagher. 1,684,218; Sept. 11.
Cup dispenser. F. L. Borchert. 1,683,950; Sept. 11.
Curtain holdback. L. V. Lavell. Des. 76,315; Sept. 11.
Curtain support, Bath-. H. Madison. 1,684,284; Sept. 11.
Cutter: *See*—
Pipe cutter.
Cutting die. W. D. Timmons. 1,683,934; Sept. 11.
Decolorizing, clarifying, and purifying petroleum oils. H. L. Kauffman and I. A. Clark. 1,684,035; Sept. 11.
Decorated tube. A. J. Rowan. Des. 76,323; Sept. 11.
Delivering mechanism for bolt-trimming machines. W. L. Clouse. 1,683,957; Sept. 11.
Dental instrument. O. H. Pieper and C. R. Meitzler. 1,684,143; Sept. 11.
Dental instrument. G. W. Todd. 1,684,252; Sept. 11.
Dentures, Apparatus for producing. M. M. Kohn. 1,683,978; Sept. 11.
Depth charge, bomb, projectile, and other explosive bodies. A. Ogden. 1,683,692; Sept. 11.
Desk, Sorting and binding. E. K. Ohm. 1,683,795; Sept. 11.
Dial for radio adjustments, Vernier. A. Peteler. 1,683,845; Sept. 11.
Die: *See*—
Cutting die. Pottery-forming die.
Die-casting machine. L. H. Morin. 1,683,721; Sept. 11.
Dielectric materials, Method of and apparatus for determining the energy losses in. E. E. Maneschi. 1,683,833; Sept. 11.
Differential mechanism. E. Wildhaber and J. Gstyr. 1,683,938; Sept. 11.
Di Naphthyl-di carboxylic acids and making same. R. Herz and W. Zerweck. 1,684,272; Sept. 11.
Direction-indicator switch for automobiles. W. J. Reading. 1,683,988; Sept. 11.
Disconnecting switch. F. Ronneberger. 1,684,148; Sept. 11.
Disk wheel and making same. A. M. Stanley. 1,683,738; Sept. 11.
Dispensing apparatus. A. L. Boggs. 1,684,258; Sept. 11.
Display apparatus, Mechanical. A. M. Schick. 1,683,990; Sept. 11.
Display device. W. Pettit. 1,684,198; Sept. 11.
Display fixture, Bridge-lamp. A. G. Anderson. Des. 76,278; Sept. 11.
Display stand. R. O. Berke. 1,684,340; Sept. 11.
Display stand. J. E. Burgess. 1,684,124; Sept. 11.
Display stand. B. B. Geyer. Des. 76,297; Sept. 11.
Distributor for hydrocarbon distillation systems, Distillate. F. M. Hess. 1,683,778; Sept. 11.
Distributor, Lubricator, J. J. Hennessy. 1,683,616; Sept. 11.
Doffing apparatus for spinning, doubling, twisting, and like machines. S. Moorhouse. 1,683,939; Sept. 11.
Doorcheck. F. K. Eastman. 1,683,713; Sept. 11.
Draft rigging. B. W. Kadel. 1,683,899; Sept. 11.
Drafting implement, Adjustable. W. E. Howden. 1,684,224; Sept. 11.
Drawing-board attachment. A. P. Jacob. 1,684,353; Sept. 11.
Dredge can. S. H. Lindgren. 1,683,832; Sept. 11.
Drill: *See*—
Tool drill.
Drill boxing. L. C. Hardsocg. 1,684,351; Sept. 11.
Drill or mortising machine R. E. De Walt. 1,683,763; Sept. 11.
Driving mechanism for vehicles. C. O. Guernsey. 1,684,314; Sept. 11.
Driving mechanism for washing machines and wringers, Combined. H. J. Criner. 1,683,961; Sept. 11.
Drying rack, Clothes-. C. F. Smith. 1,684,153; Sept. 11.
Drying system. H. V. Mooney and W. W. Hicks. 1,683,984; Sept 11.
Dust collector. J. C. Moon. 1,684,067–8; Sept. 11.

Dye and preparing the same, Azo. E. Hoffa and E. Fischer. 1,684,275; Sept. 11.
Dyeing. P. Mijer. 1,683,687; Sept. 11
Dyestuff and producing same, Water-soluble. O. Siebert. K. Thiess, B. Schöner, R. Schmidlin, W. Benade, and B. Deicke. 1,684,330; Sept. 11.
Dyestuff and producing the same, Polyarylamine. K. Thiess, B. Deicke, and R. Schmidlin. 1,684,331; Sept. 11.
Dyestuff from dianthraquinonylamine-phenanthrenequinone, Vat. W. Melg and A. Job. 1,684,327; Sept. 11.
Ear guard. C. M. Smyth. 1,683,928; Sept. 11.
Earring with clamping bow. H. Fetser. 1,684,348; Sept. 11.
Educational device. F. J. Sewall. 1,683,733; Sept. 11.
Egg-preserving compound. H. Stanley. 1,683,631; Sept. 11.
Electric control apparatus. A. Haller. 1,684,315; Sept. 11.
Electric machine, Dynamo-. H. G. Jungk. 1,683,676; Sept. 11.
Electric machine, Dynamo-. F. P. Whitaker. 1,684,253; Sept. 11.

Gears, brakes, couplings, and the like, Pressure device for friction. R. Erban. 1,683,715; Sept. 11.
Gears, Truing. A. W. Copland and M. I. Mathewson. 1,683,867; Sept. 11.
Glass, Method of and apparatus for polishing. G. E. Howard. 1,684,029; Sept. 11.
Glass, Method of and apparatus for forming plate. G. E. Howard. 1,684,030; Sept. 11.
Glass mold. F. M. Bigelow. 1,683,755; Sept. 11.
Glass, Producing. M. W. Thomas. 1,684,332; Sept. 11.
Golf bag. F. H. Mooney. 1,683,838; Sept. 11.
Golf-bag bottom. H. V. Rau. 1,684,111; Sept. 11.
Golf club. A. B. Horne. 1,684,278; Sept. 11.
Golf club. D. Spittal. 1,683,810; Sept. 11.
Golf club. P. A. Vaile. 1,683,639; Sept. 11.
Golf practicing device. C. H. and E. H. Duffy. 1,683,875; Sept. 11.
Governor, Automatic. E. B. Nowosielski. 1,683,626; Sept. 11.
Governor for internal-combustion engines. D. L. A. Larsonneur. 1,683,720; Sept. 11.
Grain-bin feed. O. F. Aplin. 1,684,338; Sept. 11.
Grease gun and the like, Automatic. O. Zerk. 1,684,080; Sept. 11.
Grinder, Meat and food. E. W. Knowlton. 1,683,679; Sept. 11.
Grinding apparatus. L. R. Heim. 1,683,974; Sept. 11.
Grinding machine. F. P. Brown. 1,683,859; Sept. 11.
Gripping slide for forging machines. W. L. Clonse. 1,683,956; Sept. 11.
Guard, Digit. J. M. Smith. 1,684,076; Sept. 11.
Guard for furniture, Insect. V. D. Humphrey. 1,684,279; Sept. 11.
Gymnastic apparatus, Respiration. H. Gougnard. 1,684,221; Sept. 11.
Hair-curling machine, Electrically-operated. C. Fayer. 1,683,717; Sept. 11.
Hair retainer or comb. L. T. Sawyer. 1,684,362; Sept. 11.
Hammer, Electric. W. C. O'Brien. 1,683,794; Sept. 11.
Hammer handle. W. Edwards. 1,683,878; Sept. 11.
Handle: *See*—
Battery-reenforcing handle. Ski handle.
Hammer handle.
Hanger: *See*—
Fan hanger.
Harness, Baby. A. S. Pickles. 1,684,110; Sept. 11.
Hat-blocking machine, Fur. R. G. Muller. 1,683,790; Sept. 11.
Hauling-in device. C. Rusk. 1,683,922; Sept. 11.
Hay presses, Follower-operating mechanism for. L. J. Tonkelmier and C. Miller. 1,683,935; Sept. 11.
Headlight. S. Suits. 1,683,998; Sept. 11.
Headlight, Dirigible. L. G. Rath. 1,683,802; Sept. 11.
Headlight for automobiles, Dirigible. W. H. Babcock. 1,684,294; Sept. 11.
Heat-control device for ovens. A. G. Sherman, G. Smith, G. H. Ramig, and C. A. Roose. 1,684,205; Sept. 11.
Heat-distributing means. E. Davis. 1,683,607; Sept. 11.
Heat economiser. J. C. Wilson. 1,684,049; Sept. 11.
Heat engine. R. W. Davenport. Re17,078; Sept. 11.
Heater: *See*—
Automobile heater. Oil-burning heater.
Electrical heater. Water heater.
Motor heater.
Heater for internal-combustion engines, Water. J. E. Rohne. 1,683,920; Sept. 11.
Heater units, Making. W. R. King. 1,684,184; Sept. 11.
Heating system, Hot-air. L. Skelding. 1,684,044; Sept. 11.
High chair and cot, Combined baby's. A. T. Gooding. 1,684,058; Sept. 11.
Hinge. L. W. Block. 1,683,814; Sept. 11.
Hinge and jamb construction, Weatherproof concealed. J. Kubelka. 1,684,323; Sept. 11.
Hoisting block. J. W. Kittredge. 1,684,185; Sept. 11.
Hoisting engine, Automotive. C. H. Sheasley. 1,683,784; Sept. 11.

Holder. A. S. Dobbs. 1,684,347; Sept. 11.
Holder and cutter, Thread. W. L. Rathjen. 1,683,803; Sept. 11.
Holder, Automobile license-certificate. O. E. Abbey. 1,683,645; Sept. 11.
Holder, Cigarette. C. M. Bellak. 1,684,005; Sept. 11.
Holder, Flowerpot. J. J. Paull. Des. 76,321; Sept. 11.
Holder for optical lenses. C. C. Clark. 1,683,712; Sept. 11.
Holder for photographs, cards, plates, or similar articles. H. P. Fest. 1,683,880; Sept. 11.
Holder for welding, Work. W. H. d'Ardenne, J. O. Landis, and L. H. Christensen. 1,683,762; Sept. 11.
Holder, Razor-blade. W. J. White. 1,683,853; Sept. 11.
Holder, Toilet-paper. F. A. Whitney. 1,683,641; Sept. 11.
Holding toilet-paper rolls, Device for. C. Moser. 1,684,190; Sept. 11.
Hook: *See*—
Snap hook.
Horseshoe. W. F. Slagle. 1,684,045; Sept. 11.
Hot plate, Electric. W. G. Nordling. 1,684,374; Sept. 11.
Hydrometer chamber. G. A. Smith. 1,683,735; Sept. 11.
Ice cream and making same. J. R. Hatmaker. 1,684,094; Sept. 11.
Ignition apparatus for internal-combustion engines. M. M. Cardellino. 1,684,343; Sept. 11.
Impregnating fabric with substantially permanent fragrance and the product. H. M. Specht. 1,683,849; Sept. 11.
Indicating device. J. E. Mann. 1,683,907; Sept. 11.
Indicating mechanism. J. Lawson. 1,684,101; Sept. 11.
Indicator or prompter for household or other purposes. J. de Bracht. 1,684,346; Sept. 11.
Inductance, Variable. J. C. De Pue. 1,684,013; Sept. 11.
Induction pressure or vacuum furnace. E. F. Northrup. 1,683,986; Sept. 11.
Inhaling device. J. W. McMillan. 1,683,686; Sept. 11.
Injector. S. L. Kneass and I. P. Pedrick. 1,683,783; Sept. 11.
Injector, Automatic. C. W. Barton. 1,683,647; Sept. 11.
Inking attachment for printing machines. L. H. Morse. 1,683,840; Sept. 11.
Instrument, Electrosurgical. F. H. Wappler, G. H. Hultman, and C. Fayer. 1,683,708; Sept. 11.
Insulator. D. F. Miner. 1,684,066; Sept. 11.
Insulator. W. H. Schramm. 1,684,152; Sept. 11.
Insulator, Electrical. J. J. Fischer and W. R. Payne. 1,684,312; Sept. 11.
Interference-reducing means for radio receiving apparatus. R. H. Ranger. 1,683,916; Sept. 11.
Internal-combustion engine. W. Allan. 1,684,293; Sept. 11.
Ironing board. J. Kalayjian. 1,684,034; Sept. 11.
Ironing machine. L. S. Hallowell. 1,683,612; Sept. 11.
Ironing machine. H. F. Tol. 1,684,333; Sept. 11.
Jack: *See*—
Automobile jack. Lifting jack.
Joint: *See*—
Expansion joint. Rail joint.
Juice extractor. C. J. Ulrich. 1,683,850; Sept. 11.
Keyboard punch, Alphabetical. A. Weiland, H. R. Russell, and C. A. Meager. 1,684,001; Sept. 11.
Kiln. H. M. Robertson. 1,683,807; Sept. 11.
Kit, Cantilever. H. L. Kennedy. 1,684,036; Sept. 11.
Kit, Picnic service. E. B. Canfield. 1,683,603; Sept. 11.
Knitted fabrics, Apparatus and method for producing. H. Rubenstein. 1,683,699; Sept. 11.
Knitting machines, Stop motion for. F. Crawford, sr. 1,684,308; Sept. 11.
Ladder. D. W. Boardman. 1,684,123; Sept. 11.
Lamp, Automobile. G. F. Jacob. 1,683,895; Sept. 11.
Lamp-closure plate, Vehicle. F. T. Carr. Des. 76,290; Sept. 11.
Lamp, Electric. E. Turnquist. 1,684,292; Sept. 11.
Lamp for motor vehicles, Head. G. F. Jacob. 1,683,896; Sept. 11.
Lamp, Therapy and infra-red-ray. H. S. Akers. 1,684,081; Sept. 11.
Lantern or article of analogous nature. A. R. Krause. Des. 76,312; Sept. 11.
Latch. J. B. Freysinger. 1,684,217; Sept. 11.
Lathe. C. E. Reed. 1,684,072; Sept. 11.
Leaf turner. G. E. Meyer. 1,684,043; Sept. 11.
Leather, Blank of. H. R. Samstag. Des. 76,324; Sept. 11.
Leather-working machine. G. A. Schettler. 1,683,704; Sept. 11.
Leer construction. H. S. Heichert. 1,683,973; Sept. 11.
Leer, Glass. W. A. Morton. 1,684,239; Sept. 11.
Lifting jack. A. C. Hopkins. 1,684,180–1; Sept. 11.
Light transmitter, Slotting and slitted. J. Kaufmann. 1,683,620; Sept. 11.
Lighter. L. Potter. Des. 76,322; Sept. 11.
Lighter, Cigar and cigarette. H. R. Milan. 1,683,688; Sept. 11.
Lighter, Electrical cigar. M. H. Shoenberg and L. Schon. 1,683,993; Sept. 11.
Lightning arrester and resistance unit, Combined. C. J. Kelloway. 1,683,783; Sept. 11.
Lightning arrester, Impulse. A. L. Atherton. 1,683,590; Sept. 11.
Line control. W. L. Foster. 1,684,367; Sept. 11.
Liquid-dispensing device. J. H. Davis. 1,684,171; Sept. 11.
Liquid-level indicators, Operating means for. T. M. Eynon. 1,683,769; Sept. 11.
Liquids from freezing, System for preventing. E. C. Petsch. 1,684,197; Sept. 11.
Loader. D. S. Barry. 1,683,646; Sept. 11.
Lock: *See*—
Universal lock.
Lock and signaling device, Vehicle. A. E. Paige. 1,683,913; Sept. 11.
Lock housing. C. N. Fairchild. 1,684,311; Sept. 11.

Radiophone and phonograph, Combined. R. G. French. Re17,081; Sept. 11.
Radio receiving system. W. T. Powell. 1,684,361; Sept. 11.
Radioreception. P. G. Weiller. 1,684,164; Sept. 11.
Radius rod for motor vehicles. L. M. H. Schuman. 1,683,923; Sept. 11.
Rail joint. R. N. Doody. 1,683,874; Sept. 11.
Railway tie. N. Hill. 1,683,824; Sept. 11.
Range, Gas. E. R. Methudy. Des. 76,317–18; Sept. 11.
Range vent. F. F. Forshee. 1,684,008; Sept. 11.
Rat guard, Ship. G. Hansen. 1,683,615; Sept. 11.
Receiver separator. C. G. Hawley. 1,684,022; Sept. 11.
Receiving system, Electromagnetic wave. O. C. Roos. 1,683,847; Sept. 11.
Receptacle closure. C. D. Harrison and P. D. Lindsey. 1,683,888; Sept. 11.
Recovery of waste gases in the production of sulphite pulp. G. A. Richter. 1,683,628; Sept. 11.
Reel: *See*—
Wire reel.
Refrigerating apparatus. S. Otto. 1,684,196; Sept. 11.
Refrigerating units, Shield for. R. A. Riek. 1,683,919; Sept. 11.
Refrigerator lining and method of making. R. A. Riek. 1,684,145; Sept. 11.
Register sheet for printing presses and the like. C. Lingner. 1,684,324; Sept. 11.
Regulator: *See*—
Antenna regulator. Voltage regulator.
Relay, Alternating-current. L. H. Peter. 1,683,696; Sept. 11.
Reproducing position. E. M. Hewlett and W. W. Willard. 1,684,132; Sept. 11.
Reproducing position. A. H. Mittag. 1,684,137; Sept. 11.
Reproducing position. S. P. Nixdorff. 1,684,138; Sept. 11.
Reproducer. H. M. Larson. 1,684,133; Sept. 11.
Resilient wheel. H. C. Gibson. 1,684,219; Sept. 11.
Resin and making the same, Artificial. F. Seebach. 1,683,701; Sept. 11.
Resins, Purifying phenol formaldehyde. F. Seebach. 1,683,702; Sept. 11.
Resinous composition of matter and making same. A. E. Maze. 1,683,835; Sept. 11.
Rod rack. J. C. Bouslog. 1,684,008; Sept. 11.
Rolling thin sections. J. W. Smith. 1,684,206; Sept. 11.
Roof ventilator. C. G. Hawley. 1,684,026; Sept. 11.
Roofing, Roll. A. A. Griswold. 1,684,179; Sept. 11.
Rubber articles, Manufacturing. R. F. Kinsley. 1,684,100; Sept. 11.
Rubber composition. C. H. Campbell. 1,683,862–3; Sept. 11.
Rubber composition and process relating thereto. C. H. Campbell. 1,683,864; Sept. 11.
Rubber-strip-cutting machine. C. O. Strom and H. M. Nelson, jr. 1,684,158; Sept. 11.
Rug. S. Brandt. Des. 76,284; Sept. 11.
Saddle for the tables of thread-stitching machines. U. Bischof. 1,684,342; Sept. 11.
Safety contrivance on permanent railway tracks. K. E. Wenzel. 1,683,709; Sept. 11.
Safety device. P. J. O'Sullivan. 1,683,093; Sept. 11.
Safety razor, hair trimmer, and comb, Combined. B. Kwartin. 1,683,980; Sept. 11.
Salt and pepper shaker or similar article. J. W. Jennings. Des. 76,303–9; Sept. 11.
Sash construction, Window-. L. Schugerl. 1,683,991; Sept. 11.
Sawyer's indicator for swamill log carriages. F. C. Mavis and G. B. Sampair. 1,683,909; Sept. 11.
Scale casing. H. A. Hadley. Des. 76,300; Sept. 11.
Scale, Counter. H. M. Cameron. 1,683,861; Sept. 11.
Screen: *See*—
Window screen.
Screen device for casement windows. A. W. Wentzell. 1,684,121; Sept. 11.
Screen for windows of automobiles. L. B. Hinman. 1,684,027; Sept. 11.
Screening apparatus. F. W. Brackett. 1,684,305; Sept. 11.
Screw-driving machine. G. C. Brown and G. F. McNulty. 1,683,815; Sept. 11.
Scrubber, Tooth. J. Chandler. 1,683,866; Sept. 11.
Sealing device. E. F. Weise. 1,683,640; Sept. 11.
Seat: *See*—
Automobile seat. Car seat.
Seats and the like, Back for automobile. S. J. Leach and A. C. Eberle. 1,684,062; Sept. 11.
Securing or clamping means for lock cylinders. J. S. Lach. 1,684,230; Sept. 11.
Separating or classifying machine. W. A. Riddell. 1,683,918; Sept. 11.
Separator: *See*—
Cream separator. Receiver separator.
Separator. C. G. Hawley. 1,684,021; Sept. 11.

Settee frame or similar article. C. Bauer. Des. 76,280–83; Sept. 11.
Sewing machine. A. Eppler. 1,683,659–60; Sept. 11.
Sewing machine, Chain-stitch. R. Becker. 1,684,004; Sept. 11.
Sewing machine, Wax-thread. A. R. Morrill. 1,683,689; Sept. 11.
Shade, Window. F. A. Neveu. 1,683,844; Sept. 11.
Shaft bearing. W. J. Chlevitz. 1,683,594; Sept. 11.
Shaft coupling, Flexible. W. E. Sykes. 1,683,999; Sept. 11.
Shaker or similar article. H. L. Budd. Des. 76,285; Sept. 11.
Sharpener for razor blades, Magnetic. T. G. Lovegrove. 1,683,981; Sept. 11.
Shears: *See*—
Bloom shears.
Sheet-metal member, Ribbed or corrugated. J. J. Mullen and F. M. Stambaugh. 1,683,841; Sept. 11.
Sheet-metal members, Forming ribbed or corrugated. J. J. Mullen and F. M. Stambaugh. 1,683,842; Sept. 11.
Shelf and drop door, Combination. W. A. Noack. 1,684,193; Sept. 11.
Shingles, Making imitation hand-rift. C. M. Abbott. 1,683,751; Sept. 11.
Shock absorber for drilling rigs. J. Becker. 1,683,948; Sept. 11.
Shock-absorbing mechanism. S. B. Haseltine. 1,683,822; Sept. 11.
Shoe and locker bag. M. Levit. 1,684,232; Sept. 11.
Shoe uppers, Apparatus for assembling stiffeners in. W. H. Baynard. 1,684,052; Sept. 11.
Shoes, Manufacture of. F. E. Toothaker. 1,683,636; Sept. 11.
Shooting gallery, Automatic-moving-target. A. M. Rowe and C. O. Rowe. 1,683,808; Sept. 11.
Shovel: *See*—
Snow and street-cleaning shovel.
Show case. W. Munch. 1,683,791; Sept. 11.
Side-wall sampler. S. H. Williston. 1,683,642; Sept. 11.
Sifter. J. Sharp. 1,683,848; Sept. 11.
Sign. H. C. Gammeter. Des. 76,295; Sept. 11.
Sign, Scintillating. A. W. Sievers. 1,684,369; Sept. 11.
Sign, Street. J. G. Ross. 1,683,921; Sept. 11.
Signal: *See*—
Automobile signal. Traffic signal.
Crossing signal.
Signal observer, Traffic-. W. C. Buttron. 1,683,951; Sept. 11.
Signal switch for vehicles. S. P. Wiegner, C. W. Davidson, and H. R. Gordon. 1,683,852; Sept. 11.
Signaling means, Vehicle. J. P. Carter. 1,638,818; Sept. 11.
Ski handle. A. E. Martinson. 1,684,326; Sept. 11.
Sleigh. W. J. Robertson. 1,683,846; Sept. 11.
Slit construction, Fine-. J. Kaufmann. 1,683,621; Sept. 11.
Snap hook. M. Itjen. 1,684,322; Sept. 11.
Snow and street-cleaning shovel. C. H. Selin. 1,683,732; Sept. 11.
Soap, Medicinal. H. H. von Kornatzki. 1,684,336; Sept. 11.
Socket and fuse plug. H. W. Benoit. 1,683,598; Sept. 11.
Socket, Electric-lamp. L. Mayer. 1,684,356; Sept. 11.
Socket, Incandescent lamp. D. Hays. 1,684,268; Sept. 11.
Sound-reproducing mechanism. E. U. Iwwerks. 1,684,098; Sept. 11.
Spacer. F. W. Anderson. 1,684,051; Sept. 11.
Spacer for concrete reenforcement. T. H. Kane. 1,683,829; Sept. 11.
Spark plug. P. P. Alexander. 1,683,596; Sept. 11.
Speed-changing mechanism. R. B. Beauchamp. 1,684,167; Sept. 11.
Speed-regulator system. S. A. Staege. 1,684,077; Sept. 11.
Spiral conveyer, Endless. J. O. Bailey. 1,684,254; Sept. 11.
Spits used in preparing salmon for barbecue. S. B. Mayhew. 1,683,834; Sept. 11.
Splicing-sleeve wrench, Wire-. F. D. Harr and J. Fallon. 1,683,887; Sept. 11.
Spool. P. J. Farley. 1,684,019; Sept. 11.
Spoon, Dipping. J. Evans. Des. 76,293; Sept. 11.
Spoon or similar article. W. S. Warren. Des. 76,333–4; Sept. 11.
Spotlight-mounting device. J. E. Prince and J. E. Schooley. 1,683,915; Sept. 11.
Spring-cushion construction. M. Lipps. 1,684,234; Sept. 11.
Spring mat for upholstered articles. J. L. MacInerney. 1,683,684–5; Sept. 11.
Stair-covering apparatus. C. M. Molinelli. 1,684,328; Sept. 11.
Stamp box. C. C. Harris. 1,684,318; Sept. 11.
Stand: *See*—
Display stand.
Starting and controlling device for internal-combustion motors. B. A. De Waern. 1,684,299; Sept. 11.
Static eliminator. A. L. Betts. 1,683,592; Sept. 11.
Statuette. C. M. Van Hoozer. Des. 76,332; Sept. 11.
Steam boiler, Steepled radiant-heat. C. G. Hawley. 1,683,972; Sept. 11.
Steel, Manufacture of. R. A. Hadfield. 1,683,886; Sept. 11.
Steering gear, Ship's. A. M. Butterfield. 1,684,307; Sept. 11.
Stenciling machine. L. A. Thatcher. 1,683,635; Sept. 11.
Stenciling machine. L. A. Thatcher. 1,683,741; Sept. 11.
Stoker, Locomotive. D. F. Crawford. 1,683,960; Sept. 11.
Storing motor vehicles, Method and construction for. E. H. White. 1,683,937; Sept. 11.
Strainer head for tubing machines. V. Royle. 1,684,203; Sept. 11.
Strap connection, Adjustable. F. Dieterle. 1,683,657; Sept. 11.
Striker plate, Adjustable. E. E. Lundberg. Re17,083; Sept. 11.
Stripping. W. C. Roberts. 1,684,147; Sept. 11.
Stud driver. A. Levedahl. 1,684,231; Sept. 11.
Stuffing box for propeller shafts. H. H. Blache. 1,683,756; Sept. 11.
Subliming apparatus. H. G. Stone. 1,683,931; Sept. 11.
Support, Hollow-shaft collector-lead. T. S. Scott. 1,683,706; Sept. 11.
Surveying bore holes, Instrument for. L. B. Wright, A. B. Yates, and A. A. Lease. 1,684,337; Sept. 11.
Sweep rakes, Push off for. J. H. Cope. 1,684,264; Sept. 11.
Switch: *See*—
Disconnecting switch. Magnetic switch.
Electric switch.
Switch mechanism, Direction-indicating. J. Geyer and J. Switzer. 1,683,970; Sept. 11.
Switch movement, Snap-. R. Boelter and E. Bartz. 1,684,257; Sept. 11.
Synchronism between picture and music in cinematographic performances, Apparatus for obtaining. A. Beeneken. 1,683,753; Sept. 11.
Table. R. F. Burwell. 1,683,711; Sept. 11.
Table. F. Schwartz. Des. 76,328; Sept. 11.
Table and lamp, Combined. D. C. Noggins. Des. 76,319; Sept. 11.
Tank: *See*—
Pressure tank.
Tank structure. L. H. Hill. 1,684,059; Sept. 11.
Tap extractor, Broken-. D. Pearce. 1,683,796; Sept. 11.
Telegraph system and circuit arrangement therefor. W. S. Smith, N. W. McLachlan, and W. G. R. Jacob. 1,684,117; Sept. 11.
Telegraphy and the like, Cable. W. S. Smith and N. W. McLachlan. 1,684,116; Sept. 11.
Telemetric impulse summation system. W. H. Pratt and D. R. Price. 1,684,241; Sept. 11.
Telephone receiver. N. Baldwin. 1,683,945; Sept. 11.
Telephone system, Automatic. J. I. Bellamy and J. E. Gardner. 1,683,857; Sept. 11.
Temperature regulator for electric heaters. W. D. Kelly. 1,684,281; Sept. 11.
Template, Multiple. T. B. Carr. 1,683,953; Sept. 11.
Tension-take-up device for knitting machines. M. Richter. 1,683,989; Sept. 11.
Tensioning device for braiding machines. W. C. Johnson. 1,683,898; Sept. 11.
Tent. H. B. Marbury. 1,684,237; Sept. 11.
Textile fabric. F. D. Coppock. Des. 76,288; Sept. 11.
Textile fabric. A. Solomon. Des. 76,239; Sept. 11.
Textile fleece, Method of and apparatus for manufacturing. P. H. Walsh. 1,683,812; Sept. 11.
Thermal plug cut-out. E. K. Clark. 1,684,170; Sept. 11.
Thermostat. P. S. Martin. 1,683,908; Sept. 11.
Thistle buds from peas, Separating. O. S. Sells. 1,683,703; Sept. 11.
Tie: *See*—
Adjustable-length tie. Railway tie.
Tie plates, Forming. M. Ovestrud. 1,684,107; Sept. 11.
Timing mechanism. W. J. Miller. 1,684,064; Sept. 11.
Tire and accessory carrier, Combination spare-. H. R. Tinker. 1,684,160; Sept. 11.
Tire tubes, Manufacturing. A. E. Henderson. 1,683,669; Sept. 11.
Tool. R. I. Henderson. 1,683,775; Sept. 11.
Tool box for automobiles. W. W. White. 1,684,002; Sept. 11.
Tool drill, Multiple-. G. E. Hallenbeck. 1,683,667; Sept. 11.
Tool retainer. E. G. Gartin. 1,684,177; Sept. 11.
Tools, Safety appliance for. M. Centeno V. 1,684,345; Sept. 11.
Tooth, Artificial. C. C. Hallowell. 1,683,613–14; Sept. 11.
Tortilla, Apparatus for forming and thereafter releasing. A. J. Pereyra. 1,683,797; Sept. 11.
Toy and return ball, Combined sounding figure. W. S. Minnix. 1,683,910; Sept. 11.
Toy bow. F. W. and E. B. Chamberlain. 1,683,865; Sept. 11.
Toy, Figure. A. E. Paluck. 1,684,287; Sept. 11.
Toy pistol. R. L. Ford. 1,683,662; Sept. 11.
Toy, Rocking-horse. G. H. Tegelberg. 1,684,250; Sept. 11.
Track-tamping machine. E. E. Peterson. 1,684,109; Sept. 11.
Traction apparatus. W. E. Curtis. 1,683,870; Sept. 11.
Traffic signal. C. D. Smyth and G. M. Robey. 1,684,207; Sept. 11.
Train-pipe-connecter head, Automatic. J. Robinson. 1,684,376; Sept. 11.
Transmission. W. E. Trumpler. 1,684,162; Sept. 11.
Transmission-clutch-drum lugs, Shoe for. J. W. Richards, jr. 1,683,806; Sept. 11.

Transmission, Differential release. H. A. Lewis. 1,684,233; Sept. 11.
Transmission for radial drill arms, elevating mechanism, and drill spindles. J. C. Carlton. 1,684,344; Sept. 11.
Transmission of pictures by electricity. H. E. Ives. 1,683,976; Sept. 11.
Transmission system, Hydraulic. A. F. Schwendner and J. S. Myers. 1,684,075; Sept. 11.
Transporting mixed materials. K. R. Schuster. 1,684,370; Sept. 11.
Traveling bag. L. Baetz. 76,279; Sept. 11.
Tray. J. L. Balch. 1,683,944; Sept. 11.
Tray, Ash. R. L. Hubbard. 76,302; Sept. 11.
Tray, Ash. H. W. Parker. 76,320; Sept. 11.
Tray, Traveling conveyer. E. Hanak. 1,684,092; Sept. 11.
Treating asbestos ore. S. H. Dolbear. 1,684,365; Sept. 11.
Treating asbestos ores. S. H. Dolbear. 1,684,366; Sept. 11.
Treating blood-stream infections. L. A. Edblom and E. K. Knott. 1,683,877; Sept. 11.
Treating oil, Apparatus for. R. T. Pollock. 1,683,801; Sept. 11.
Treating oil shales and other bituminous materials. W. W. Blaisdell. 1,684,007; Sept. 11.
Treating oils. G. Egloff. 1,683,767; Sept. 11.
Treating residual oils. L. C. Huff. 1,683,826; Sept. 11.
Treating sulphur. J. W. Schwab. 1,683,731; Sept. 11.
Treatment of ores. Q. Bent, E. Barnhart, and F. W. Wood. 1,684,006; Sept. 11.
Tree: *See*—
Artificial tree.
Trolley. C. A. Gouty. 1,684,178; Sept. 11.
Trolling spoon. H. W. Heitmiller. 1,683,890; Sept. 11.
Truck, Railway. O. K. Kjolseth. 1,684,282; Sept. 11.
Tubing, Well. J. G. Robinson. 1,683,629; Sept. 11.
Tungsten oxide gel, Preparing. W. A. Patrick and E. H. Barclay. 1,683,695; Sept. 11.
Turbine engine, Hydrocarbon. W. G. Simpson. 1,683,994; Sept. 11.
Type flow meter, Rotary-. W. W. Hamill. 1,684,350; Sept. 11.
Typewriter construction. F. R. Friedrich. 1,683,770; Sept. 11.
Typewriting and card-perforating machine, Combined. A. G. F. Kurowski. 1,683,979; Sept. 11.
Typewriting machine. J. A. B. Smith. 1,684,155; Sept. 11.
Typewriting machine, Line-by-line. A. A. Egli. 1,683,964; Sept. 11.
Universal lock. F. C. Vom Bruck. 1,683,744; Sept. 11.
Unloading machine. F. W. Horstkotte. 1,683,779; Sept. 11.
Upsetting device. W. H. Felding. 1,683,661; Sept. 11.
Utensil, Dairy. D. W. Stoven. 1,684,047; Sept. 11.
Utility bag. W. B. Kitterman and F. H. Mills. 1,683,678; Sept. 11.
Valve. J. O. Smith. 1,683,927; Sept. 11.
Valve, Check. J. L. Gibson. 1,684,220; Sept. 11.
Valve construction. E. K. Nickerson. 1,683,625; Sept. 11.
Valve grinder and mechanical movement. W. E. Duthie. 1,683,876; Sept. 11.
Valve, Liquid. W. H. Rose. 1,683,727; Sept. 11.
Valve means. D. E. Austin. 1,683,813; Sept. 11.
Valve, Pressure and vacuum relief. J. L. Gray. 1,684,377; Sept. 11.
Valve-seat puller. W. Brauer. 1,683,757; Sept. 11.
Valve self-correcting means, Poppet-. H. R. Kiessig. 1,683,902; Sept. 11.
Valve stems and the like, Making tire-. E. G. Oakley 1,684,194; Sept. 11.
Valve throw, Adjusting. B. Dudley, jr. 1,684,014; Sept. 11.
Valve throw, Apparatus for adjusting. B. Dudley, jr. 1,684,015; Sept. 11.
Valves and the like, Control means for throttle. L. C. Josepha, jr. 1,684,033; Sept. 11.
Vane for fishery. C. Hansen and P. Leth. 1,683,668; Sept. 11.
Vanity case. H. A. Povel. 1,684,202; Sept. 11.
Vanity case. W. T. Wells. 1,683,851; Sept. 11.
Vegetable-pulping machine. J. Schmidt. 1,683,705; Sept. 11.

Vehicle, Dumping. H. C. Heaton. 1,684,095; Sept. 11.
Vehicle, Motor. G. R. Pennington. 1,684,070; Sept. 11.
Vehicle, Power-driven. H. Herrmann. 1,683,776; Sept. 11.
Vehicle, Signal. O. A. Copple. Des. 76,287; Sept. 11.
Vehicle spring construction. A. F. Masury and E. R. Gurney. 1,684,041; Sept. 11.
Vending machine. L. H. Morin. 1,683,722; Sept. 11.
Ventilator: *See*—
Roof ventilator.
Ventilator. E. H. Ellison. 1,683,820; Sept. 11.
Vibratory device. H. W. Brown and A. E. Bailey, jr. 1,684,260; Sept. 11.
Voltage control, Automatic. G. C. Hubble. 1,684,182; Sept. 11.
Voltage regulator. R. Kummenich. 1,683,785; Sept. 11.
Voltage regulator. W. Schaelchlin. 1,684,151; Sept. 11.
Waffle-iron heating element. F. F. Forshee. 1,684,176; Sept. 11.
Washing pulp, Method of and apparatus for. C. A. Johnson. 1,683,782; Sept. 11.
Water-closet, Boat. C. Schwarz. 1,683,924; Sept. 11.
Water heater, Exhaust-gas. L. M. Wheeler. 1,683,747; Sept. 11.
Water supply for automobile radiators. J. F. Morris. 1,683,911; Sept. 11.
Watthour meter. A. R. Rutter. 1,684,149; Sept. 11.
Weather vane. E. W. Lawson. Des. 76,316; Sept. 11.
Weaving. R. C. McIlroy. 1,683,983; Sept. 11.
Weaving textile fabrics. G. J. Seckel. 1,684,364; Sept. 11.
Wedge, Magnetic. S. R. Bergman. 1,684,255; Sept. 11.
Weevil destroyer. Z. T. Mann. 1,684,040; Sept. 11.
Weighting silk and the product thereof. R. J. O'Brien, jr. 1,684,286; Sept. 11.
Welding, Apparatus for lap. J. R. Brueckner and H. L. Clark. 1,684,169; Sept. 11.
Welding, Electric. G. H. Phelps. 1,684,108; Sept. 11.
Welding system, Arc. J. F. K. Harms. 1,684,317; Sept. 11.
Welt-attaching mechanism. J. B. Hadaway. 1,683,666; Sept. 11.
Welt mechanism for full-fashioned-knitting machines. W. D. Richter. 1,683,698; Sept. 11.
Wheel: *See*—
Resilient wheel.
Wheel for elastic tires, Metal. C. Schenck and L. Fine. 1,683,700; Sept. 11.
Wheel puller D. C. Johnson. 1,684,226; Sept. 11.
Winding machine. C. L. Saal. 1,684,114; Sept. 11.
Window-operating mechanism. F. J. Pfiffer. 1,683,914; Sept. 11.
Window screen. E. P. Garner. 1,684,349; Sept. 11.
Wiping device for wind screens, windows, and the like. J. W. Allen. 1,683,943; Sept. 11.
Wire-drawing apparatus. B. B. Leustig and J. D. Petsche. 1,684,102; Sept. 11.
Wire-drawing mechanism. P. J. Mahoney. 1,683,906; Sept. 11.
Wire reel. E. E. Leedy. 1,684,037; Sept. 11.
Wireless parasitic currents, Elimination of. L. Levy. 1,684,103; Sept. 11.
Wrapping machinery. W. E. Molins. 1,683,789; Sept. 11.
Wrench: *See*—
Splicing-sleeve wrench.
Wrist-strap device. A. Bulova. 1,684,054; Sept. 11.
Zeolites in the treatment of water, Increasing the efficiency of. W. C. Foster. 1,683,967; Sept. 11.

CLASSIFICATION OF PATENTS

ISSUED SEPTEMBER 11, 1928.

NOTE.—First number—class, second number—subclass, third number—patent number.

2— 2: 1,683,657
155: 1,684,150
4— 8: 1,683,754
60: 1,683,684
90: 1,683,924
152: 1,684,294
5— 320: 1,683,958
351: 1,684,234
353: 1,683,684
1,683,685
7— 17: 1,683,825
8— 5: 1,683,687
13: 1,684,286
10— 22: 1,683,956
36: 1,684,238
11— 1: 1,683,795
12— 51: 1,684,052
80: 1,683,680
15— 97: 1,683,871
104.19: 1,683,619
119: 1,683,638
1,683,655
133: 1,684,358
179: 1,683,618
188: 1,683,866
206: 1,683,947
229: 1,683,816
1,683,817
251: 1,683,943
16— 85: 1,683,713
86: 1,683,793
125: 1,684,277
144: 1,683,814
17— 5: 1,683,968
18— 2: 1,683,736
6: 1,683,978
59: 1,684,100
19— 106: 1,683,812
20— 1.01: 1,683,800
2: 1,683,966
49: 1,683,991
69: 1,683,941
1,683,942

CLASSIFIED LIST OF TRADE-MARKS REGISTERED.

CLASS 1.

Coal. Lackey Coal Company. 246,836; Sept. 18; Serial No. 262,855; published June 26, 1928.

Coal. A. S. Nowlin & Company. 246,885; Sept. 18; Serial No. 246,219; published May 24, 1927.

CLASS 2.

Containers for wearing apparel, Foldable cardboard. I. Appelbaum. 246,832; Sept. 18; Serial No. 262,786; published July 3, 1928.

Containers, Shipping. A. C. Scott. 247,172; Sept. 18.

CLASS 3.

Cases and school bags, Brief. Rex Leather Goods Corp. 247,003–4; Sept. 18; Serial Nos. 265,808–9; published July 10, 1928.

Satchels, hand bags, valises, etc. A. Perugia. 247,076; Sept. 18; Serial No. 260,134; published July 3, 1928.

Trunks and hand luggage. Derco Trunk Co. 246,856; Sept. 18; Serial No. 261,950; published July 3, 1928.

CLASS 4.

Abrasive grinding stones. E. P. Mars. 246,918; Sept. 18; Serial No. 265,441; published June 26, 1928.

Aluminum silver-cleaning plates. Aluminum Goods Manufacturing Co. 247,105; Sept. 18; Serial No. 263,849; published June 19, 1928.

Cleaner, Neutral paste. Clean Surface Products Company. 247,085; Sept. 18; Serial No. 255,230; published Dec. 6, 1927.

Cleaning fluid. A. H. Beggs. 247,021; Sept. 18; Serial No. 249,039; published Oct. 25, 1927.

Cleaning fluid. E. G. Turcotte. 247,070; Sept. 18; Serial No. 266,061; published June 26, 1928.

Cleaning liquid. Bonide Chemical Co. 247,136; Sept. 18; Serial No. 266,121; published June 19, 1928.

Cleaning preparation in liquid form. L. Caskin. 247,135; Sept. 18; Serial No. 266,125; published June 19, 1928.

Cleaning preparation of soap and other ingredients. Midland Chemical Laboratories, Inc. 247,100; Sept. 18; Serial No. 259,011; published Feb. 14, 1928.

Cleansing preparation, Household. W. E. Bauer. 247,082–3; Sept. 18; Serial Nos. 259,706–7; published July 3, 1928.

Dressing, Automobile top and fabric. Standard Drug Company. 247,138; Sept. 18; Serial No. 266,108; published June 26, 1928.

Dressing, Belt. Webb Belting Co. 246,926; Sept. 18; Serial No. 265,708; published July 3, 1928.

Dry cleaner and a polish and cleaner. Old Master Laboratories, Inc. 246,954; Sept. 18; Serial No. 257,890; published Jan. 17, 1928.

Polishing and cleaning preparations for glass. Reckitt & Sons, Limited. 246,952; Sept 18; Serial No. 266,440; published July 3, 1928.

Polishing cloths impregnated with mild abrasives. J. C. Kough, Jr. 246,833; Sept. 18; Serial No. 262,809; published June 19, 1928.

Preparation for cleaning hands. J. L. McFall. 247,013; Sept. 18; Serial No. 264,897; published June 26, 1928.

Shaving cream and soap shampoo. Mentholatum Company. 246,955; Sept. 18; Serial No. 257,808; published July 3, 1928.

Soap. Mart Guild Incorporated. 246,999; Sept. 18; Serial No. 265,850; published June 19, 1928.

Soap flakes. Procter & Gamble Company. 246,898; Sept. 18; Serial No. 265,561; published June 19, 1928.

Soap, Shaving. McKesson & Robbins, Incorporated. 247,134; Sept. 18; Serial No. 266,140; published June 19, 1928.

Soap, Toilet. C. A. Crary. 247,026; Sept. 18; Serial No. 264,362; published June 26, 1928.

Soaps and shaving soaps, Toilet. Societe Anonyme Donge. 246,939; Sept. 18; Serial No. 266,280; published June 19, 1928.

Soaps including shaving sticks. Die Eau de Cologne- & Parfümerie-Fabrik "Glockengasse No. 4711" gegenüber der Pferdepost von Ferd. Mülhens. 246,893; Sept. 18; Serial No. 242,102; published July 3, 1928.

Soaps including toilet soaps and shaving sticks. Die Eau de Cologne- & Parfümerie-Fabrik "Glockengasse No. 4711" gegenüber der Pferdepost von Ferd. Mülhens. 246,894; Sept. 18; Serial No. 242,048; published July 3, 1928.

Washing and cleansing fluid. B. R. M. Company. 246,982; Sept. 18; Serial No. 228,731; published June 19, 1928.

Washing solution with bleaching properties. T. M. Messier. 246,961; Sept. 18; Serial No. 264,379; published June 26, 1928.

CLASS 6.

Chemical composition for stopping runs in hosiery. J. D. Lippy, jr. 246,917; Sept. 18; Serial No. 265,436; published June 26, 1928.

Chemical compound. J. A. Well. 246,974; Sept. 18; Serial No. 257,647; published June 19, 1928.

Cream, skin lotion, etc., Cold and face. John Heiland Co. 247,162; Sept. 18.

Disinfectants. F. B. Nobrega. 246,942; Sept. 18; Serial No. 266,327; published June 26, 1928.

Liquid preparation. Clinical Laboratories Company. 246,892; Sept. 18; Serial No. 242,281; published May 8, 1928.

Medicinal preparations. Bradigan Tablet Concern. 246,980; Sept. 18; Serial No. 235,360; published July 3, 1928.

Oils, photographic chemicals, etc., Natural or synthetic. Rhodia Chemical Company. 246,888–9; Sept. 18; Serial Nos. 243,885–6; published Mar. 13, 1928.

Ointments. L. P. Philippi. 246,886; Sept. 18; Serial No. 244,179; published July 12, 1927.

Oxides, Combination of, Metallic. E. M. & F. Waldo, Inc. 246,987; Sept. 18; Serial No. 265,999; published June 19, 1928.

Perfume. J. L. Lombardo. 246,862; Sept. 18; Serial No. 257,172; published Dec. 13, 1927.

Pills, Laxative. Nature's Products Company. 247,048; Sept. 18; Serial No. 264,733; published May 29, 1928.

Salve ointment. I. Masarsky. 246,873; Set. 18; Serial No. 264,113; published June 12, 1928.

Tonic, General. H. & J. Laboratories. 247,166; Sept. 18.

CLASS 7.

Twine, White fibre. Hanover Cordage Company. 247,147; Sept. 18; Serial No. 266,807; published July 3, 1928.

CLASS 8.

Pipes, cigar and cigarette holders, etc., Tobacco. Tiffany & Company. 247,061; Sept. 18; Serial No. 267,156; published July 10, 1928.

Trays and cigar and cigarette extinguishers, Ash. R. C. Thomas. 246,963; Sept. 18; Serial No. 254,366; published July 10, 1928.

Trays or receivers, cigar and cigarette tubes, etc., Ash. H. A. Kline. 246,864; Sept. 18; Serial No. 264,309; published July 10, 1928.

CLASS 10.

Fertilizing material. E. Reinau. 247,139; Sept. 18; Serial No. 266,099; published July 3, 1928.

CLASS 12.

Asphalt compounds. Union Products Company. 246,875; Sept. 18; Serial No. 263,985; published June 26, 1928.

Asphalt emulsion. Emulsion Process Corporation. 246,874; Sept. 18; Serial No. 264,027; published June 26, 1928.

Binder, Road. Trinidad Lake Petroleum Company. 247,093; Sept. 18; Serial No. 259,263; published June 19, 1928.

Bituminous composition. Amber Size & Chemical Co. 246,848; Sept. 18; Serial No. 261,600; published June 19, 1928.

Blocks for furnaces, Refractory. Corhart Refractories Company. 246,879; Sept. 18; Serial No. 263,926; published June 19, 1928.

Brick and building tile. Acme Brick Company. 247,024; Sept. 18; Serial No. 265,248; published June 26, 1928.

Bricks and blocks, Refractory, etc. McLeod & Henry Co. 246,869; Sept. 18; Serial No. 264,246; published June 12, 1928.

Building materials, Composition. Continental Building Specialties. 246,880; Sept. 18; Serial No. 263,925; published June 19, 1928.

Doors and partitions, Folding. P. Horn. 247,121; Sept. 18; Serial No. 263,320; published June 12, 1928.

Doors, windows, sashes, and trims. General Woodcraft Co. 246,870; Sept. 18; Serial No. 264,227; published June 5, 1928.

Doors, Wood. Cadillac Flushlite Door Company. 247,113; Sept. 18; Serial No. 263,534; published June 5, 1928.

Lumber, dimension core stock, trim for windows and doors, and moldings. Cortrim Lumber Company. 246,867; Sept. 18; Serial No. 264,290; published June 26, 1928.

Roofing in rolls, Composition. Chatfield Manufacturing Corporation. 246,882; Sept. 18; Serial No. 263,858; published June 5, 1928.

Tile building blocks, Hollow. Universal Tile Corporation of America. 247,032; Sept. 18; Serial No. 264,928; published June 19, 1928.

Tiles and foundation sheets prepared for the cementing of tiles thereto. Porcelain Tile Company. 246,871; Sept. 18; Serial No. 264,196; published June 5, 1928.

Tiles of sheet metal. C. F. Burgess Laboratories, Inc. 247,114; Sept. 18; Serial No. 263,533; published June 12, 1928.

CLASS 13.

Metal bowls, candy dishes, flower holders, etc., Base-. I. Shainin & Co. 246,847; Sept. 18; Serial No. 261,462; published July 3, 1928.

Metal shanks for shoes. F. G. Delbon. 246,831; Sept. 18; Serial No. 262,704; published July 3, 1928.

Thermosiphon discharge fittings for fluid-holding tanks. Sands Manufacturing Company. 247,118; Sept. 18; Serial No. 263,429; published July 3, 1928.

Valves, Pressure control and relief. J. A. Campbell. 246,937; Sept. 18; Serial No. 265,193; published July 3, 1928.

Wire, wire gauze, barbed wire, etc., Fence. Vereinigte Stahlwerke Aktiengesellschaft. 246,845; Sept. 18; Serial No. 261,293; published July 3, 1928.

CLASS 14.

Alloy, Metal. Stoody Company. 247,133; Sept. 18; Serial No. 266,153; published July 3, 1928.

Markers, Traffic. Kilborn & Bishop Co. 247,046; Sept. 18; Serial No. 264,688; published July 3, 1928.

Steel. Vulcan Crucible Steel Co. 247,008; Sept. 18; Serial No. 264,785; published July 3, 1928.

Steel, steel bars, etc., Tool. Darwin & Milner, Inc. 247,163; Sept. 18.

CLASS 15.

Oils, Lubricating. Sinclair Refining Company. 247,014; Sept. 18; Serial No. 266,223; published July 3, 1928.

Oils, Lubricating. Zin Abrasive Company. 246,991; Sept. 18; Serial No. 265,938; published July 3, 1928.

CLASS 16.

Paint, Ready-mixed. L. Follman. 247,025; Sept. 18; Serial No. 264,370; published July 3, 1928.

Paints and painter's materials. Old Gold Combination White Lead and Color Corporation. 247,120; Sept. 18; Serial No. 263,336; published July 3, 1928.

Paints, varnishes, floor dressings, and fillers. J. C. Shepard. 246,928; Sept. 18; Serial No. 265,699; published July 3, 1928.

CLASS 17.

Cigarettes. Batt Brothers. 246,966; Sept. 18; Serial No. 255,047; published July 3, 1928.

Cigars. J. H. Craney. 247,036; Sept. 18; Serial No. 266,302; published July 10, 1928.

Cigars. Grumbine-O'Donnell Corp. 247,164; Sept. 18.

Cigars. Minerva Cigar Corporation, Inc. 247,059; Sept. 18; Serial No. 267,201; published July 10, 1928.

Cigars. Philippine Tobacco Co. 247,058; Sept. 18; Serial No. 267,206; published July 10, 1928.

Cigars. C. Richter. 247,145; Sept. 18; Serial No. 266,884; published July 10, 1928.

Cigars, cigarettes, and cut tobacco. Cifuentes, Pego y Compañia. 246,838; Sept. 18; Serial No. 262,897; published July 10, 1928.

Tobacco, Smoking and chewing. Brown & Williamson Tobacco Corporation. 247,045; Sept. 18; Serial No. 264,669; published July 3, 1928.

CLASS 21.

Batteries. R. G. Lafite. 247,050; Sept. 18; Serial No. 264,760; published July 3, 1928.

Batteries and battery plates. Arco Battery & Plate Co. 246,896; Sept. 18; Serial No. 265,608; published July 3, 1928.

Electric lamps, and lanterns, searchlights, and signs. Perkins Marine Lamp Corporation. 246,863; Sept. 18; Serial No. 264,325; published July 3, 1928.

Electric motors. Triumph Electric Corporation. 246,927; Sept. 18; Serial No. 265,707; published July 3, 1928.

Electric sadirons, percolators, toasters, etc. Malda Electric Manufacturing Company. 246,972–3; Sept. 18; Serial Nos. 256,951–2; published July 3, 1928.

Electric toasters. Beardsley & Wolcott Mfg. Co. 246,990; Sept. 18; Serial No. 265,940; published July 3, 1928.

Flash lights. Blake Manufacturing Co. 246,830; Sept. 18; Serial No. 262,646; published July 3, 1928.

Radio vacuum tubes. Gold Seal Electrical Company. 247,023; Sept. 18; Serial No. 260,997; published June 19, 1928.

Sadirons, percolators, and toasters, etc., Electric. Malda Electric Manufacturing Company. 247,101–2; Sept. 18; Serial Nos. 256,953–4; published July 3, 1928.

CLASS 22.

Artificial bait. Enterprise Manufacturing Company. 246,912; Sept. 18; Serial No. 265,329; published July 3, 1928.

Fish lures. C. W. Wynn. 246,883; Sept. 18; Serial No. 246,800; published July 3, 1928.

Game, Modified checker. T. E. Cahill. 247,077; Sept. 18; Serial No. 259,994; published July 3, 1928.

Toy vehicles. C. C. Alles. 247,010; Sept. 18; Serial No. 264,859; published July 3, 1928.

Velocipedes. Colson Company. 246,872; Sept. 18; Serial No. 264,144; published July 3, 1928.

CLASS 23.

Benters. White and Hallock, Inc. 246,922; Sept. 18; Serial No. 257,209; published July 3, 1928.
Blowers, crushers, and cupel machines, Air. Denver Fire Clay Company. 246,822; Sept. 18; Serial No. 262,157; published July 10, 1928.
Blowers, crushers, and cupel machines, Air. Denver Fire Clay Company. 246,823; Sept. 18; Serial No. 262,159; published July 10, 1928.
Cutters, Grass and weed. Village Blacksmith Folks. 247,098; Sept. 18; Serial No. 258,052; published July 3, 1928.
Drills, pneumatic brushing machines, etc., Pneumatic rock hammer. Compagnie Belge Goliath. 247,109; Sept. 18; Serial No. 263,643; published July 3, 1928.
Fire-extinguishing apparatus. Portable hand. General Carbonic Company. 247,056; Sept. 18; Serial No. 251,438; published Oct. 25, 1927.
Gears, Distributor and oil-pump. J. A. Fischer Company. 246,857; Sept. 18; Serial No. 261,953; published July 3, 1928.
Grading machines and parts thereof. Little Red Wagon Mfg. Co. 246,861; Sept. 18; Serial No. 262,098; published July 10, 1928.
Knives and forks, pocketknives, tongs, etc., Table. H. Herkenrath. 246,835; Sept. 18; Serial No. 262,847; published July 10, 1928.
Machine needles, Hosiery. Louis Hirsch, Inc. 247,090; Sept. 18; Serial No. 259,113; published July 3, 1928.
Machines, Textile. O. F. von Kohorn zu Kornegg. 247,074; Sept. 18; Serial No. 260,543; published July 10, 1928.
Machinery, Flour-handling, dough-handling, etc. Baker Perkins Company. 247,103; Sept. 18; Serial No. 257,089; published July 10, 1928.
Mechanical devices for rewinding ribbons. Tybon Corporation. 247,043; Sept. 18; Serial No. 264,545; published July 10, 1928.
Mills, for grinding or pulverizing. Conquest Mill Engineering Company. 247,111–12; Sept. 18; Serial Nos. 263,539–40; published July 3, 1928.
Oil-well specialties. H. L. Lowe. 246,890; Sept. 18; Serial No. 243,225; published July 10, 1928.
Pipe pushers, windmills, and repair and replacement parts, etc. C. D. Ammon. 246,949; Sept. 18; Serial No. 266,413; published July 10, 1928.
Rakes and hoes, Hand. A. F. Dinwiddie. 247,127; Sept. 18; Serial No. 266,203; published July 3, 1928.
Razor blades. Ruble Blade Corporation. 246,846; Sept. 18; Serial No. 261,458; published July 3, 1928.
Razor blades. I. J. Shapiro. 246,988; Sept. 18; Serial No. 265,988; published July 3, 1928.
Razor blades, Safety. L. Whitcup. 247,060; Sept. 18; Serial No. 267,171; published July 10, 1928.
Scissors, shears, and razors. J. A. Henckels, Inc. 247,153; Sept. 18; Serial No. 266,731; published July 10, 1928.
Scrapers. G. Garst. 246,852; Sept. 18; Serial No. 261,751; published July 3, 1928.
Shears, Metal. National Machine Tool Company. 246,929; Sept. 18; Serial No. 265,676; published July 10, 1928.
Tools, pipe wrenches, pipe tongs, etc., Pipe cutting-off and threading. Armstrong Bros. Tool Co. 247,009; Sept. 18; Serial No. 264,860; published July 10, 1928.
Wrenches and socket-wrench sets. Bonney Forge & Tool Works. 246,827; Sept. 18; Serial No. 262,547; published July 10, 1928.

CLASS 24.

Ironing tables. Federal Washboard Company. 246,901; Sept. 18; Serial No. 265,528; published July 3, 1928.

CLASS 26.

Brake-testing machines. Taylor Manufacturing Corporation. 246,859; Sept. 18; Serial No. 262,043; published July 10, 1928.
Films, etc., Motion-picture. First National Pictures, Inc. 247,144; Sept. 18; Serial No. 266,921; published July 10, 1928.
Gauges, Tire. Handy Tire Gauge Manufacturing Company. 246,937; Sept. 18; Serial No. 265,046; published July 3, 1928.
Indicator, Ship's shaft-revolution. G. Walker. 247,142; Sept. 18; Serial No. 262,274; published July 3, 1928.
Lenses, Optical. Titmus Optical Company. 247,106; Sept. 18; Serial No. 263,840; published July 10, 1928.
Pictures reproduced in copies for sale, Motion. W. E. Disney. 247,156; Sept. 18; Serial No. 266,717; published July 3, 1928.
Registering device for golf, Score-. Golf Score Watch Company. 246,865; Sept. 18; Serial No. 264,296; published July 10, 1928.
Sieves of metal and wire cloth, graphite crucibles (melting type), assay clay goods, etc. Denver Fire Clay Company. 247,149; Sept. 18; Serial No. 266,854; published July 3, 1928.
Sieves of metal, graphite crucibles, etc. Denver Fire Clay Company. 246,824; Sept. 18; Serial No. 262,160; published July 10, 1928.

CLASS 27.

Watches, watch movements, and parts of the same. Hipp. Didisheim Co. 247,174; Sept. 18.
Watches, watch movements, watchcases, and parts of watches. Federal Mail Order Corporation. 247,042; Sept. 18; Serial No. 264,974; published July 3, 1928.

CLASS 28.

Badges, lapel buttons, cuff links, etc., Fraternity. Kappa Phi Kappa. 246,844; Sept. 18; Serial No. 261,260; published July 3, 1928.
Rings, belt buckles, etc., Finger and napkin. S. Buchsbaum & Co. 246,853; Sept. 18; Serial No. 261,857; published July 3, 1928.

CLASS 29.

Mops and mop heads. W. A. Ballinger. 246,986; Sept. 18; Serial No. 266,013; published July 3, 1928.
Paintbrushes. Pohlmeyer, Inc. 247,078; Sept. 18; Serial No. 259,871; published July 3, 1928.

CLASS 31.

Refrigerating machines, Domestic. Williams Oil-O-Matic Heating Corporation. 246,834; Sept. 18; Serial No. 262,834; published July 3, 1928.
Refrigerators, Electric. Hanford Produce Company. 246,841; Sept. 18; Serial No. 263,040; published July 10, 1928.

CLASS 32.

Cabinet for greeting cards, Display. W. A. Swanson. 247,161; Sept. 18; Serial No. 266,630; published July 3, 1928.
Cabinets and cupboards, kitchenette units, etc., Steel. Pro-steel Company. 246,996; Sept. 18; Serial No. 265,028; published July 3, 1928.
Desks, chairs, and book ends. Majestic Co. 247,031; Sept. 18; Serial No. 264,526; published July 10, 1928.
Furniture attached to buildings. Clearwater Lumber Company. 247,169; Sept. 18.
Pillows. Chas. Emmerich and Co. 247,065; Sept. 18; Serial No. 266,983; published July 10, 1928.
Radiocabinets, loud-speaker cabinets, etc. Splitdorf Radio Corporation. 246,994; Sept. 18; Serial No. 265,934; published July 10, 1928.

CLASS 33.

Glass vigil-light cups. Wright Manufacturing Company. 247,137; Sept. 18; Serial No. 266,113; published July 3, 1928.

CLASS 34.

Burners, Oil. Grant Oil Burner Corporation. 246,981; Sept. 18; Serial No. 230,623; published July 3, 1928.

ALPHABETICAL LIST OF PATENTEES

TO WHOM

PATENTS WERE ISSUED ON THE 18TH DAY OF SEPTEMBER, 1928.

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice). **Includes patents, reissues, and designs.**

Abrechcinski, Peter, Buffalo, N. Y. Automobile tire. 1,685,013; Sept. 18.

Acheson, James M., Los Angeles, Calif. Brush structure. 1,684,855; Sept. 18.

Ackerman, Charles L., assignor to Lima Sheet Metal Products Company, Lima, Ohio. Ironing board. 1,684,378; Sept. 18.

Adamston Flat Glass Company. (See Hart, Thomas B., assignor.)

Ad-Tape Co. Inc. (See Close, Wilmot S., assignor.)

Advertisers Service Bureau. (See Pickett, R. C., and Thompson, assignors.)

Adye, John F., Hilton, England. Spring suspension for motor vehicles. 1,684,692; Sept. 18.

Agfa Ansco Corporation. (See Bornmann, Carl A., assignor.)

Ajax-Brand Lock Corporation. (See Brand, Charles, assignor.)

Ajax Metal Company, The. (See Northrup, Edwin F., assignor.)

Albers, George, Seattle, Wash. Soya-bean flour and producing the same. 1,684,654; Sept. 18.

Alert Products, Inc. (See Norton, Arthur G., assignor.)

Alexander, Arthur A., New York, N. Y. Flywheel. 1,684,568; Sept. 18.

Allegheny Steel Company. (See Hostettler, Leigh W., assignor.)

Allemeier, Henry, assignor to The Woodcraft Company, Toledo, Ohio. Article of furniture. 1,684,936; Sept. 18.

Allis-Chalmers Manufacturing Company. (See Pfau, Arnold, assignor.)

Aluminum Company of America. (See Sharp, John E., assignor.)

American Automotive Corporation. (See Werby, A. Benjamin, assignr.)

American Can Company. (See Leighton, George A., assignor.)

American Can Company. (See Young, John M., assignor.)

American Cyanamid Company. (See Cox, George E., assignor.)

American Flyer Mfg. Co. (See Becker, Harry S., assignor.)

American Sales Book Company. (See Rice, Willis B., assignor.)

American Telephone and Telegraph Company. (See Honaman, Richard K., assignor.)

American Telephone and Telegraph Company. (See Nyquist, Harry, assignor.)

American Telephone and Telegraph Company. (See Thomey, John F., assignor.)

Amon, Josef, New York, N. Y., assignor to The Cutler-Hammer Mfg. Co., Milwaukee, Wis. Electric terminal. 1,684,383; Sept. 18.

Anderson, Abram A., New York, N. Y. Aircraft. 1,685,014; Sept. 18.

Anderson, Jesse I., assignor to J. I. Holcomb Mfg. Co., Indianapolis, Ind. Mop. 1,684,379; Sept. 18.

Anthony, Herman R. C., assignor to French Battery Company, Madison, Wis. Dry-battery package. 1,684,856; Sept. 18.

Apelt, Charles, Comfort, Tex. Wall pocket. Des. 76,338; Sept. 18.

Appleby, Charles R., Bolivar, N. Y. Power winch for tractors. 1,684,857; Sept. 18.

Arden, Harry B., New York, N. Y. Building monolithic concrete underground structures. 1,684,816; Sept. 18.

Armstrong, Clifford G., assignor of one-half to H. C. Armstrong, Meriden, Conn. Safety device for foot-power presses. 1,684,569; Sept. 18.

Armstrong, Herbert C. (See Armstrong, Clifford G., assignor.)

Artistic Brass & Bronze Works, Inc. (See Perlmutter, Henry A., assignor.)

Ashcraft, Clarence S., Los Angeles, Calif. Arc lamp. 1,684,655; Sept. 18.

Ashenburst, Harold S., assignor, by mesne assignments, to Insulex Corporation, Chicago, Ill. Insulated roof. 1,684,527; Sept. 18.

Atherton, Alfred L. (See Smith, B. H. Atherton, and Greibach.)

Autopoint Products Company. (See Lynn, John P., assignor.)

Aycock, Francis M., assignor of forty-nine one-hundredths to J. Marsh, Soldiers Home, Los Angeles, Calif. Jack. 1,685,015; Sept. 18.

Babbitt, Edwin V., Fairhaven, assignor to International Toy Corporation, New Bedford, Mass. Toy sea scooter. Des. 76,339; Sept. 18.

Baetz, Henry, St. Louis, Mo. Air heater. 1,684,380; Sept. 18.

Bahr, John F., New York, N. Y. Cigarette case. 1,684,381; Sept. 18.

Bailey, Claude B., Wyandotte, Mich. Spark-plug gasket. 1,685,059; Sept. 18.

Bailey, Claude B., Wyandotte, assignor to McCord Radiator & Mfg. Co., Detroit, Mich. Gasket. 1,684,656; Sept. 18.

Baker, Edwin M. (See Leslie, E. H., and Baker.)

Baker, George F., Cincinnati, Ohio. Safety danger signal for railroad tracks. 1,684,904; Sept. 18.

Baker, Joseph W. (See Nitsch, C. H., and Baker.)

Baker Perkins Company. (See Tugendhat, Robert G., assignor.)

Ballman, Edwin C., St. Louis, Mo., assignor to Valley Electric Company, Wilmington, Del. Motor-starting device. 1,684,937; Sept. 18.

Baltzer, Henry P., Hamburg, N. Y. Buckle. 1,684,786; Sept. 18.

Bankson, William R., Pittsburgh, Pa. Mail box. 1,684,384; Sept. 18.

Barber Asphalt Company, The. (See Hayden, Harold P., assignor.)

Barber-Colman Company. (See Colman, Howard D., assignor.)

Barbieri, Cesare, New York, N. Y., assignor to The Vortex Mfg. Co., Chicago, Ill. Sundae-dish-forming machine. 1,684,465; Sept. 18.

Bard, Francis N. (See Marsh, Joseph R. C., assignor.)

Barr, John H., Ithaca, N. Y., assignor to Barr-Morse Corporation. Back-space mechanism. 1,684,428; Sept. 18.

Barr, John H., Ithaca, N. Y., assignor to Barr-Morse Corporation. Platen-adjusting mechanism. 1,684,429; Sept. 18.

Barr, John H., Ithaca, N. Y., assignor to Barr-Morse Corporation. Universal bar. 1,684,430; Sept. 18.

Barr-Morse Corporation. (See Barr, John H., assignor.)

Barrett Company, The. (See Eckert, Clarence R., assignor.)

Barrows, Donald S., Rochester, N. Y. Side frame. 1,684,787; Sept. 18.

Bartley, John M., assignor to General Combustion Company, Long Beach, Calif. Apparatus for supplying fuel to internal-combustion engines. 1,684,528; Sept. 18.

Barton, Francis M., assignor to Barton Spider Web System, Chicago, Ill. Form for concrete. 1,684,614; Sept. 18.

Barton Spider Web System. (See Barton, Francis M., assignor.)

Bartosh, Joseph F., assignor of one-half to F. Kablik, Weimar, Tex. Filing cabinet for prescriptions, etc. 1,684,761; Sept. 18.

Basmadjian, Paul K., Philadelphia, Pa. Grocer's helper. 1,684,529; Sept. 18.

Bass, Archie E., Baltimore, Md., assignor of forty-nine per cent to E. Strasmich, New York, N. Y. Wire tying or twisting device. 1,684,723; Sept. 18.

Bass, E. & J., Inc. (See Tennhardt, Elsa, assignor.)

Bassett, Preston R., assignor to The Sperry Gyroscope Company, Brooklyn, N. Y. Feed-governing means for arc lamps. 1,684,817; Sept. 18.

Bassick Manufacturing Company, The. (See Davis, Ernest W., assignor.)

Bast, Frank J., New York, assignor to Charles J. Tagliabue Mfg. Co., Brooklyn, N. Y. Pressure-controlled device. 1,684,530; Sept. 18.

Bastian, William B., Los Angeles, Calif. Quick-throw valve. 1,684,905; Sept. 18.

Batkin, Hyman, Brooklyn, N. Y. Carton. 1,684,385; Sept. 18.

Baumberger, Walter E., San Francisco, Calif. Wall-form tie structure. 1,684,382; Sept. 18.

Bayer, A. J., Company. (See Kauth, Nicholas, assignor.)

Bead Chain Manufacturing Company, The. (See Bryant, Waldo G., assignor.)

Bead Chain Manufacturing Company, The. (See Gagnon, William J., assignor.)

Beal, George E., Pasadena, Calif. Safety steering mechanism for automobiles. 1,684,657; Sept. 18.

Beardsley, Robert, Chicago Ill. Article-forming device. 1,684,466; Sept. 18.

Beardsley, Robert, Chicago Ill. Method of and apparatus for forming articles. 1,684,658; Sept. 18.

Becker, Harry S., River Forest, assignor to American Flyer Mfg. Co., Chicago, Ill. Bell-ringing toy locomotive. 1,684,764; Sept. 18.

Beckman, Arnold O., Pasadena Calif. Signaling device. 1,684,659; Sept. 18.
Behee, Joseph H., jr., Independence, Mo. Lettering on stone monuments and other hard substances. 1,684,431; Sept. 18.
Bell, John W., Ogdensburg, N. Y. Inclination indicator. 1,684,788; Sept. 18.
Beloit Iron Works. (See Berry, Earl E., assignor.)
Bendix Brake Company. (See Sanford, Roy S. assignor.)
Berry, Earl E., assignor to Beloit Iron Works, Beloit, Wis. Vacuum pipe connection for cylinder machines. 1,684,615; Sept. 18.
Bestehorn, Rudolf. (See Haeusser, F., and Bestehorn.)
Bicek, Frank J., Le Sueur Center, Minn. Sickle-bar section. 1,684,616; Sept. 18.
Bickford, Frederick E., Rochester, N. Y. Container for food products. 1,684,938; Sept. 18.
Biggert, Florence C., jr., Crafton, assignor to United Engineering and Foundry Company, Pittsburgh, Pa. Flying shears. 1,684,617; Sept. 18.
Bilharts, Charles, Strasbourg, France. Loom. 1,684,789; Sept. 18.
Billig, Fred W. (See Sparks, W., Scofield, Johnson, and Billig.)
Billig, Fred W., assignor to The Sparks-Withington Company, Jackson, Mich. Signaling device. 1,684,906; Sept. 18.
Binder, Peter E. (See Cullen, F. J., Binder, and Harshman.)
Bing-Werke, vorm. Gebr. Bing Aktiengesellschaft. (See Habicht, Georg, assignor.)
Binkele, Herman C., Tigard, Oreg. Copyholder. 1,685,041; Sept. 18.
Blair, George W., assignor to Mishawaka Rubber & Woolen Manufacturing Company Mishawaka, Ind. Shoe. 1,684,660; Sept. 18.
Blair, Robert S., Stamford, Conn. Railway signaling. 1,684,386; Sept. 18.
Blake, Francis H., 2d, Clayton, N. Y. Windshield cleaner. 1,684,907; Sept. 18.
Blake, Isabelle B., New York, N. Y. Folding box. 1,685,016; Sept. 18.
Blatterman, Albert S., Asbury Park, N. J., assignor to Ware Radio, Inc. Radiofrequency amplifier and making and operating the same. 1,684,939; Sept. 18.
Bloch, L. D., & Company. (See Simon, William J., assignor.)
Blomgren, Henry E., Brooklyn, N. Y. Spring-shackle anti-rattle attachment. 1,684,724; Sept. 18.
Bobbs, Arthur L., Chappaqua, assignor to Kenneth N. Woodward, trustee, Chappaqua, New Castle, N. Y. Building construction. 1,684,387; Sept. 18.
Boeye, Paul F., St. Paul, Minn., assignor to Waldorf Paper Products Company. Constructing shipping cases. 1,684,725; Sept. 18.
Bohlman, Ernest A., assignor to Kellogg Switchboard and Supply Company, Chicago, Ill. Lighting and ignition switch. 1,684,940; Sept. 18.
Böhm, Georg, Kiel, assignor to Fried. Krupp Germaniawerft Aktiengesellschaft, Kiel Gaarden, Germany. Thrust bearing with fluid friction. 1,684,693; Sept. 18.
Boosey, Edward W. N., Detroit, Mich. Closet flange. 1,684,570; Sept. 18.
Boosey, Edward W. N., Detroit, Mich. Ferrule for connecting plumbing fittings with piping. 1,684,571; Sept. 18.
Boosey, Edward W. N., Detroit, Mich. Clean-out fitting for plumbing systems. 1,684,572; Sept. 18.
Boothe, Albert, Colfax, Iowa. Stringed musical instrument. 1,684,467; Sept. 18.
Bornmann, Carl A., assignor by mesne assignments, to Agfa Ansco Corporation, Binghamton, N. Y. Finder. 1,684,531; Sept. 18.
Borough, Willard L. (See McLaine, W. L., and Borough.)
Both, Tonjes A., Stratford, assignor to The Connecticut Electric Manufacturing Company, Bridgeport, Conn. Electric switch. 1,684,982; Sept. 18.
Bound Brook Oil-Less Bearing Company. (See Claus, Carl, assignor.)
Bouvier, George A., Oak Park, Ill., assignor to Western Electric Company, Incorporated, New York, N. Y. Method of and apparatus for forming stranded articles. 1,684,532; Sept. 18.
Bouvier, George A., Oak Park, Ill., assignor to Western Electric Company, Incorporated, New York, N. Y. Strand-twisting apparatus. 1,684,533; Sept. 18.
Bowen, Charles O., Dora, Ala., assignor to W. B. Miller, trustee, Wallins Creek, Ky. Electric locomotive. 1,684,779; Sept. 18.
Bowlus, Claude A., Birmingham, Mich. Arc welding machine. 1,684,726; Sept. 18.
Bowman, John G., assignor of one-half to W. C. Haseltine, Kansas City, Mo. Valved spark plug. 1,685,017; Sept. 18.
Bowmaster, John O., Orbisonia, Pa. Screening machine. 1,685,018; Sept. 18.
Boyd, John, Byron, Calif. Hay rake and buncher. 1,684,573; Sept. 18.
Boye Needle Company, The. (See Flannery, John L., assignor.)
Boyle Manufacturing Company. (See Newman, Henry R., assignor.)
Braddock, Edward I., deceased, Cleveland, Ohio; R. H. Montgomery, executor. Gear chain. 1,685,019; Sept. 18.
Brand, Charles, White Plains, assignor to Ajax-Brand Lock Corporation, New York, N. Y. Safety door fastener. 1,684,790; Sept. 18.
Brandes Laboratories, Inc. (See Gerns, William H., assignor.)
Brayton, Ernest, et al. (See Harris, Marie, assignor.)
Breen, Emma B., Houston, Tex. Lingerie clasp. 1,685,020; Sept. 18.
Bretslaff, W. Herbert. (See Donley, Harold B., assignor.)
Brogden, Joah, Melrose Park, assignor to David Lupton's Sons Company, Philadelphia, Pa. Window. 1,685,060; Sept. 18.
Brown, Colin, Rochester, N. Y. Spraying device. 1,684,661; Sept. 18.
Brown-Lipe Gear Company. (See Carhart, George C., assignor.)
Brown, Warren G., Detroit, Mich. Pump. 1,684,468; Sept. 18.
Browne-Morse Company. (See Morse, Frank C., assignor.)
Broyles, Samuel G., Battle Mountain, Nev. Honey rick. 1,685,021; Sept. 18.
Brunelle, Frank O., Meriden, Conn. Lock. 1,684,908; Sept. 18.
Bryant, Waldo G., assignor to The Bead Chain Manufacturing Company, Bridgeport, Conn. Jump-ring coupling. 1,685,042; Sept. 18.
Buchanan, William C. (See Hall, W. O., and Buchanan.)
Buchwalter, Marguerite A., New York, N. Y. Lamp. Des. 76,340; Sept. 18.
Buda, Pasquale, New York, N. Y., assignor of one-fourth to F. Horowit, St. Louis, Mo. Stream motor. 1,684,469; Sept. 18.
Budd, Edward G., Manufacturing Company. (See Mayer, William J., assignor.)
Buente, Charles F., assignor to Concrete Products Company of America, Pittsburgh, Pa. Method of and apparatus for forming concrete pipe. 1,684,858; Sept. 18.
Bullivant, Francis J., assignor to Valley Electric Company, St. Louis, Mo. Short-circuiting device. 1,684,941; Sept. 18.
Burgess Battery Company. (See Hodge, Howard D., assignor.)
Burnelli, Vincent J., New York, N. Y. Retractable float for flying boats. 1,684,818; Sept. 18.
Burrowes, J. Boyd, et al. (See Harris, Marie, assignor.)
Bush, Robert R., and C. W. Dake, assignors to Pyle-National Company, Chicago, Ill. Duplex nozzle for locomotives. 1,684,791; Sept. 18.
Butler, George P., Boston, Mass. Sign. 1,684,470; Sept. 18.
Byers, John A. (See Smotzer, M. C., and Byers.)
C. G. Spring & Bumper Company, The. (See Homan, Clayton H., assignor.)
Cady, George B., Canastota, N. Y. Cross-chain link. 1,684,909; Sept. 18.
California Transit Company. (See McAbee, Louis U., assignor.)
Campbell, Horace L., St. Louis, Mo. Advertising device. 1,684,534; Sept. 18.
Campbell, Sterling H., St. Louis, Mo. Hanger for trousers and cravats. Des. 76,341; Sept. 18.
Carhart, George C., assignor to Brown-Lipe Gear Company, Syracuse, N. Y. Clutch. 1,684,471; Sept. 18.
Carleton, Robert A., Newton, Mass. Electrical heating apparatus. 1,684,942; Sept. 18.
Carlsson, Ernst H., Oscarshamn, Sweden. Paving rammer. 1,684,574; Sept. 18.
Carpenter, Paul. (See Dellenbarger, Charles E., assignor.)
Carr Fastener Company. (See Carr, Fred S., assignor.)
Carr Fastener Company. (See Johnson, Gustav, assignor.)
Carr, Fred S., Newton, assignor to Carr Fastener Company, Cambridge, Mass. Separable fastener. 1,685,061; Sept. 18.
Carr, Fred S., Newton, assignor to Carr Fastener Company, Cambridge, Mass. Separable fastener. 1,685,062; Sept. 18.
Carr, Fred S., Newton, assignor to Carr Fastener Company, Cambridge, Mass. Fastener. 1,685,063; Sept. 18.
Carrell, Hammel H., assignor of one-half to S. N. Jackson, Lubbock, Tex. Gas burner. 1,684,575; Sept. 18.
Carroll, James H. (See Myers, J. T., and Carroll.)
Carroll, William M. (See Pierce, E. M., and Carroll.)
Cartlidge, Frank, Claremont, N. H., assignor to Sullivan Machinery Company. Mining machine. 1,684,943; Sept. 18.
Cartwright, James M., Clarksdale, Miss. Radio receiving circuit. 1,685,043; Sept. 18.
Cathcart, Harry G. Cleveland, Ohio. Electric heater. 1,684,472; Sept. 18.
Catlin, De Forest B., Boston, Mass. Diathermy and galvanic ear set. 1,684,859; Sept. 18.
Catlin, De Forest B., Boston, Mass. Eye-treating apparatus. 1,684,860; Sept. 18.
Cederstrom, Harold. (See Rosholt, T. W., and Cederstrom.)
Centofanti, Sam, Youngstown, Ohio. Fountain pen. 1,685,044; Sept. 18.
Cerny, Edward. (See Cerny, John, assignor.)

Cerny, John, St. Anthony, Idaho, assignor of one-half to E. Cerny, Spokane, Wash. Chair-leg brace. 1,684,727; Sept. 18.
Chapman, Arthur W., London, England. Slidable seat for vehicles and the like. 1,684,944; Sept. 18.
Chapman, Ulysses S., Carthage, Mo. Needle holder. 1,684,473; Sept. 18.
Chase, George C., South Orange, assignor to Monroe Calculating Machine Company, Orange, N. J. Multiplier mechanism for calculating machines. 1,685,074; Sept. 18.
Chatham, Frank L., Orleans, Ind. Cooling and ventilating device. 1,684,474; Sept. 18.
Chausse, Francis W. (See Luck, William F., assignor.)
Chisum, Earl D. (See Collier, J. H., and Chisum.)
Churchill's, Incorporated. (See Kunal, Andrew E., assignor.)
Cincinnati Bickford Tool Company, The. (See Klausmeyer, David C., assignor.)
Cincinnati Butchers' Supply Company, The. (See Fritz, Rudolph A., jr., assignor.)
Cincinnati Grinders Incorporated. (See Einstein, Sol, assignor.)
Clapp, Albert L., Danvers, Mass. Synthetic resin fiber board. 1,684,755; Sept. 18.
Clark, Horace W., Mattoon, Ill. Box or casing cover with fastener. 1,684,983; Sept. 18.
Clarke, Clement S., assignor to Oil City Iron Works, Shreveport, La. Core-drilling head. 1,685,045; Sept. 18.
Claus, Carl, Plainfield, assignor to Bound Brook Oil-Less Bearing Company, Boundbrook, N. J. Self-aligning bearing and making same. 1,684,984; Sept. 18.
Cleaver, George E., assignor to Penn Hardware Company, Inc., Reading, Pa. Pin-tumbler lock. 1,685,022; Sept. 18.
Clemens, John G., Eggertsville, assignor to Pierce Renewable Fuses, Inc., Buffalo, N. Y. Renewable fuse. 1,684,432; Sept. 18.
Cleveland Folding Machine Company, The. (See Olson, A., and Tufts, assignors.)
Cleveland Trust Company, The. (See Ryan, Daniel J., assignor.)
Climax Rock Drill & Engineering Works Limited, The. (See Penberthy, Ernest, assignor.)
Close, Wilmot S., Brooklyn, assignor to Ad-Tape Co. Inc., New York, N. Y. Shipping by parcel post. 1,684,756; Sept. 18.
Clow, James B., & Sons. (See Smotzer, M. C., and Byers, assignors.)
Coates, Frank, Cleadon, assignor to A. Reyrolle & Company Limited, Hebburn-on-Tyne, England. Electrical switch gear. 1,684,694; Sept. 18.
Coleman, William B., Philadelphia, Pa. Automatic humidifying device. 1,684,757; Sept. 18.
Collier, John H., and E. D. Chisum, Altus, Okla.; said Chisum assignor to said Collier. Fuel-tank attachment. 1,684,475; Sept. 18.
Colman, Howard D., assignor to Barber-Colman Company, Rockford, Ill. Thread-handling mechanism. 1,684,945; Sept. 18.
Colombo, Anselmo. (See Lorenzi, L., and Colombo.)
Concrete Engineering Company. (See Ochiltree, Ned A., assignor.)
Concrete Products Company of America. (See Buente, Charles F., assignor.)
Connecticut Electric Manufacturing Company, The. (See Both, Tonjes A., assignor.)
Conner, Harry G., Detroit, Mich. Golf indicating mechanism. 1,684,576; Sept. 18.
Cooper, Erwin C., assignor to Packard Motor Car Company, Detroit, Mich. Internal-combustion engine. 1,684,910; Sept. 18.
Copeland Products, Inc. (See Litle, Thomas J., jr., assignor.)
Cotton, Walter H., assignor to Union Draft Gear Company, Chicago, Ill. Draft gear. 1,684,388; Sept. 18.
Cowan, Frank, Rochester, Minn. Doorcheck. 1,685,023; Sept. 18.
Cox, George E., Niagara Falls, assignor to American Cyanamid Company, New York, N. Y. Cyanamide oven. 1,684,758; Sept. 18.
Crane Co. (See Wayman, C. A. G., and Gartz, assignors.)
Crawford, Carl H. (See Thompson, Willis D., assignor.)
Creamery Package Mfg. Company, The. (See Hippenmeyer, Irving R., assignor.)
Creamery Package Mfg. Company, The. (See Larsen, Olaf, assignor.)
Crofoot, John B., Arlington Heights, Ill. Staple. 1,684,728; Sept. 18.
Crook, Louis H. (See Wragg, Charles A., assignor.)
Crouse-Hinds Company. (See Olley, Raymond H., assignor.)
Crowell, William B., New York, N. Y. Elevator-door-operating mechanism. 1,684,433; Sept. 18.
Cullen, Frank J., Culver City, P. E. Binder, El Segundo, and C. C. Harshman, Los Angeles, assignors to Standard Oil Company of California, San Francisco, Calif. Rotary acetylene torch. 1,684,476; Sept. 18.
Cutler-Hammer Mfg. Co., The. (See Amon, Josef, assignor.)
Dabelow, Martin. (See Philips, A., and Dabelow.)
Dake, Charles W. (See Bush, R. R., and Dake.)
Daubek, Georg, et al. (See Mislin, Eugen, assignor.)
Daubek, Joseph F., et al. (See Mislin, Eugen, assignor.)
Daumann, Wilhelm, assignor to C. H. F. Müller, Röntgenröhrenfabrik, Hamburg, Germany. Vacuum discharge apparatus. 1,684,947; Sept. 18.
Davis, Augustine, jr. (See Pierce, E. M., and Carroll, assignors.)
Davis, Ernest, assignor to The Prosperity Company, Inc., Syracuse, N. Y. Pressing-machine element. 1,684,819; Sept. 18.
Davis, Ernest W., Oak Park, assignor to The Bassick Manufacturing Company, Chicago, Ill. Lubricant compressor. 1,684,946; Sept. 18.
Davis, William, St. Louis, Mo., assignor of one-half to Italian Swiss Colony, San Francisco, Calif. Safety plug. 1,684,911; Sept. 18.
Davis, William C., jr., Jasper, Ala. Safety switch system. 1,684,618; Sept. 18.
Davison, Dorsett A., Richmond, Va. Internal-combustion engine. 1,684,434; Sept. 18.
Davison, Dorsett A., Richmond, Va. Internal-combustion engine. 1,684,435; Sept. 18.
Day, Jack L., and E. L. Deschler, Sacramento, Calif. Antirattling device for automobile doors. 1,684,662; Sept. 18.
Deacon, George B., Los Angeles, Calif. Shooting game. 1,684,577; Sept. 18.
De Costa, Maria S., née Vincent. (See Maximoff, J., and De Costa.)
Degling, Alexander, Philadelphia, Pa. Metatarsal pad. 1,684,948; Sept. 18.
De Laval Separator Company, The. (See Hapgood, Cyrus H., assignor.)
Dellenbarger, Charles E., Philadelphia, Pa., assignor to P. Carpenter, Glenview, Ill. Sheet-forming machine. 1,684,436; Sept. 18.
Demand, Joseph, New York, N. Y. Squeegee and the mounting thereof. 1,684,477; Sept. 18.
Demuth, William, & Company. (See Shoemaker, Bernard M., assignor.)
Denio, Robert. (See Denio, Robert J., assignor.)
Denio, Robert J., Oakland, assignor to R. Denio, Modesto, Calif. Automobile elevating apparatus. 1,684,729; Sept. 18.
Dentists' Supply Company, The. (See Gysi, Alfred, assignor.)
De Reign, Robert W., Santa Barbara, Calif. Music-leaf turner. 1,685,024; Sept. 18.
Derk, Joseph, assignor to The Derk Manufacturing Company, Doylestown, Pa. Table scarf. Des. 76,342; Sept. 18.
Derk Manufacturing Company, The. (See Derk, Joseph, assignor.)
Deschler, Edward L. (See Day, J. L., and Deschler.)
Detroit Concrete Receptacle Company. (See Urban, Joseph P., assignor.)
Deutsche Gold- und Silberscheideanstalt. (See Riefenstahl, Gustav, assignor.)
Dewes, Arthur B., St. Louis, Mo. Amusement device. 1,684,535; Sept. 18.
Dilks, John H., Philadelphia, Pa. Switch apparatus. 1,685,070; Sept. 18.
Dilks, John H., assignor to Electric Power Equipment Corporation, Philadelphia, Pa. Switch-operating mechanism. 1,685,069; Sept. 18.
Dill, John C., Vancouver, British Columbia, Canada. Grain-stowage device. 1,684,478; Sept. 18.
Dill, Richard E., Alexandria, Nebr. Manufacture of reenforced concrete. 1,684,663; Sept. 18.
Dirschauer, Jacob A., Evansville, Ind. Agricultural machine. 1,684,861; Sept. 18.
Dobson, William A., Bridgeport, Conn., assignor to The Underwood Elliott Fisher Company, New York, N. Y. Typewriting machine. 1,684,820; Sept. 18.
Donley, Harold B., Columbus, Ohio, assignor of one-third to W. H. Bretzlaff, Indianapolis, Ind. Incandescent-lamp bulb. 1,684,949; Sept. 18.
Dornseif, Hugo, Radevormwald, Germany. Manufacture of skate blades with thickened edges. 1,684,950; Sept. 18.
Dorsey, Herbert G., Gloucester, Mass. Device for the reproduction of wave motion. 1,684,759; Sept. 18.
Dowdall, James T., Glen Morris, N. Y. Spool-holding device. 1,684,951; Sept. 18.
Doxford, Robert P. (See Keller, Karl O., assignor.)
Dräger, Alexander B., deceased, Lubeck, Germany; E. Dräger, née Stange, executrix. Self-contained breathing apparatus. 1,684,664; Sept. 18.
Dräger, Elfriede, née Stange, executrix. (See Dräger, Alexander B.)
Draper Corporation. (See Heard, Nathan, assignor.)
Draper, Frank N., Denver, Colo. Lighting device for vehicles. 1,684,695; Sept. 18.
Dubilier Condenser Corporation. (See Houck, Harry W., assignor.)
Dubilier Condenser Corporation. (See Van Deventer, Harry R., assignor.)
Duluth Show Case Company. (See Ostram, R. A., and Frykdahl, assignors.)
Duncan, Arthur. (See Jackson, Nelson, assignor.)
Dunklau, Casper T., Los Angeles, Calif. Musical-instrument stand. 1,684,912; Sept. 18.
Duplex Gas Turbine Company, The. (See Hawthorn, James M., assignor.)
Dwight & Lloyd Metallurgical Company. (See Hyde, Reed W., assignor.)

Earl, Harley J. (See Seaholm, E. W., and Earl.)
Eastman, Thomas F., Berkeley, Calif. View finder for cameras. 1,684,821; Sept. 18.
Eckert, Clarence R., Highwood, N. J., assignor to The Barrett Company. Shingle holder. 1,684,479; Sept. 18.
Edwards, William K., Big Spring, Tex. Gate-closing device. 1,684,578; Sept. 18.
Edwards, William W., Los Angeles, Calif. Radial drill. 1,684,665; Sept. 18.
Eize, Jacob, assignor to The Fisher Governor Company, Inc., Marshalltown, Iowa. Bearing construction for float-arm shafts. 1,685,046; Sept. 18.
Einstein, Sol, assignor, by mesne assignments, to Cincinnati Grinders Incorporated, Cincinnati, Ohio. Grinding machine having balanced spindle. 1,684,792; Sept. 18.
Eisner, Joseph, et al. (See Newmark, Aaron S. assignor.)
Electric Boat Company. (See Nibbs, Ernest, assignor.)
Electric Machinery Mfg. Company. (See Hibbard, Charles T., assignor.)
Electric Power Equipment Corporation. (See Dilks, John H., assignor.)
Electro Metallurgical Company. (See Feild, Alexander L., assignor.)
Electro Metallurgical Company. (See Read, William C., assignor.)
Elevator Supplies Company. (See Shonnard, Harold W., assignor.)
Elliott-Fisher Company. (See Pitman, Henry L., assignor.)
Endsley, Louis E. assignor to Verona Tool Works, Pittsburgh, Pa. Rail-joint spring. 1,684,619; Sept. 18.
Engineering Development Company. (See Johnsen, Einer A., assignor.)
Esleck, William C., Whitestone, N. Y. Transmission device for marine motors. 1,684,952; Sept. 18.
Evans, Marshall W., Detroit, Mich. Mixing device for internal-combustion engines. 1,684,480; Sept. 18.
Evans, William L., Washington, Ind. Ring-joint machine. 1,684,760; Sept. 18.
Everett, Edward A., New York, N. Y. Supporting bracket for railway signals. 1,684,953; Sept. 18.
Exley, Leo F., Johnson City, N. Y. Brush. 1,684,481; Sept. 18.
Eze Cushion Corporation. (See Horn, Jacque E., assignor.)
Fairbanks, E. Hayward. (See Haag, Alfred H., assignor.)
Fanner Mfg. Co., The. (See Gibson, Samuel H., assignor.)
Faulkner, David S., and E. Timbs, Los Angeles, Calif., assignors to The National Supply Company of Delaware, New York, N. Y. Draw-works drum and locking the drums and flange sections thereof. 1,684,482; Sept. 18.
Federal Abrasive Company. (See White, Harold E., assignor.)
Federal Manufacturing Company. (See Olinger, Thomas, assignor.)
Federal Telegraph Company. (See Kolster, F. A., and Sollie, assignors.)
Feild, Alexander L., New York, N. Y., assignor to Electro Metallurgical Company. Alloy and making the same. 1,684,696; Sept. 18.
Feller, Albert. (See Schmidt, O., Seydel, and Feller.)
Ferguson, James E., Cleveland, and H. L. Mooney, East Cleveland, assignors to The Lake Lithograph Company, Cleveland, Ohio. Display carton. 1,684,579; Sept. 18.
Ferngren, Enoch T., assignor to The Libbey-Owens Sheet Glass Company, Toledo, Ohio. Sheet-drawing apparatus. 1,684,437; Sept. 18.
Ferngren, Enoch T., assignor to The Libbey-Owens Sheet Glass Company, Toledo, Ohio. Process and apparatus for maintaining sheet glass to width. 1,684,438; Sept. 18.
Finney, James M. (See Schroeder, Anthony, assignor.)
Fischer, Arthur H., assignor to Guggenheim Brothers, New York, N. Y. Flotation process. 1,684,536; Sept. 18.
Fisher Governor Company, The. (See Eize Jacob, as-Germany, assignors to Grasselli Dyestuff Corporation, New York, N. Y. Yellow azo dyestuff and preparing the same. 1,684,762; Sept. 18.
Fisher Governor Company, The. (See Eize Jacob, assignor.)
Fishwick, Albert B., Cincinnati, Ohio. Bag closure. 1,684,793; Sept. 18.
Flannery, John L., assignor to The Boye Needle Company, Chicago, Ill. Commodity cabinet. 1,684,913; Sept. 18.
Flath, Otto S., Chicago, Ill. Switch and signal-rod-carrier support. 1,684,954; Sept. 18.
Flowers, Henry F., Findlay, Ohio. Snowplow. 1,684,439; Sept. 18.
Forbes, Samuel L., Mount Vernon, N. Y., assignor to The Globe-Wernicke Company. Card index. 1,684,620; Sept. 18.
Ford, Eugene A., Scarsdale, assignor to The Tabulating Machine Company, Endicott, N. Y. Card feeding and handling device. 1,684,389; Sept. 18.
Fox, Ralph P., Harrisburg, Pa. Dirigible airship. 1,684,730; Sept. 18.
Frambach, Mathew J. Hartley, Iowa. Chain coupler. 1,684,580; Sept. 18.
Franklin, H. H., Manufacturing Company. (See Marks, Edward S., assignor.)
Frantz, Harry F., Cleveland, Ohio. Crutch attachment. 1,684,697; Sept. 18.
Fraser, Frank, assignor to The Libbey-Owens Sheet Glass Company, Toledo, Ohio. Sheet-glass-edge-forming means. 1,684,440; Sept. 18.
Frazier, Charles A., Fair Oaks, Calif. Pipe band. 1,684,666; Sept. 18.
Freeman, Benjamin W. (See Thomas, Alfred J., assignor.)
Freeman, Beryl, Cambridge, Ohio. Polishing attachment for vacuum cleaners. 1,684,698; Sept. 18.
French Battery Company. (See Anthony, Herman R. C., assignor.)
French, Harry W., Syracuse, N. Y. Warm-air furnace. 1,684,914; Sept. 18.
Frenette, Harry E., Duluth, Minn. Radius tool. 1,684,667; Sept. 18.
Fried. Krupp Aktiengesellschaft. (See Hauptmeyer, Friedrich, assignor.)
Fried. Krupp Germaniawerft Aktiengesellschaft. (See Böhm, Georg, assignor.)
Fritts, Wilfred G., Lexington, N. C. Tire-splitting machine. 1,684,763; Sept. 18.
Fritz, Rudolph A., jr., assignor to The Cincinnati Butchers' Supply Company, Cincinnati, Ohio. Shelving. 1,685,064; Sept. 18.
Froesch, Charles. (See Masury, A. F., and Froesch.)
Frye, Ezra H., trustee. (See Lavoie, Joseph, assignor.)
Frykdahl, Carl E. (See Ostrum, R. A., and Frykdahl.)
Fuller, Claud E., assignor to New York Brick Handling Corporation, New York, N. Y. Open-top drier. 1,685,047; Sept. 18.
Fulton, Jean M., Detroit, Mich. Apparatus for rectal, vaginal, and surgical uses. 1,684,621; Sept. 18.
Gagnon, William J., assignor to The Bead Chain Manufacturing Company, Bridgeport, Conn. Coupling for bead chains. 1,685,048; Sept. 18.
Galloway, Robert M., assignor to The National Automatic Tool Company, Richmond, Ind. Oil-gear control for machine tools. 1,685,049; Sept. 18.
Garner, Samuel R., sr., Cleveland, Ohio. Battery terminal and cable clamp. 1,684,985; Sept. 18.
Gartin, Elmer G., Claremont, N. H., assignor to Sullivan Machinery Company. Lubricating mechanism. 1,684,668; Sept. 18.
Gartin, Elmer G., Claremont, N. H., assignor to Sullivan Machinery Company. Drilling mechanism. 1,684,669; Sept. 18.
Gartz, Adolph F., jr. (See Wayman, C. A. G., and Gartz.)
Gasstrom, Herman, Mount Vernon, N. Y. Joint for extension rules. 1,684,483; Sept. 18.
Gay, Alfred F., assignor to H. J. Lupien, Brockton, Mass. Joint for pistons and connecting rods, etc. 1,684,862; Sept. 18.
Geiger, William A., assignor to W. H. Miner, Inc., Chicago, Ill. Car construction. 1,684,537; Sept. 18.
General Combustion Company. (See Bartley, John M., assignor.)
General Motors Corporation. (See Seaholm, E. W., and Earl, assignors.)
General Zeolite Company. (See Green, Walter H., assignor.)
Gerns, William H., East Orange, assignor to Brandes Laboratories, Inc., Newark, N. J. Electromagnetic sound reproducer. 1,685,050; Sept. 18.
Gibson, Samuel H., assignor to The Fanner Mfg. Co., Cleveland, Ohio. Metal-bending machine. 1,684,794; Sept. 18.
Giles, Isaac F., Malone, and J. A. Roberts, Bronxville, assignors, to Ilelte Electric Manufacturing Corporation, Tuckahoe, N. Y. Multiple-socket electric plug. 1,684,915; Sept. 18.
Gilkey, Augustine H., Chicago, Ill. Animal trap. 1,684,484; Sept. 18.
Gillies, Matthew C., Walkerville, Ontario, Canada. Overhead runway turntable. 1,684,986; Sept. 18.
Girardet, Jacques, Paris, France. Liquid-level indicator. 1,685,051; Sept. 18.
Glemby's, S., Sons Co. (See Hitzigrath, Paul E., assignor.)
Globe-Wernicke Company, The. (See Forbes, Samuel L., assignor.)
Globe-Wernicke Company. (See Ringler, William A., assignor.)
Globe-Wernicke Company, The. (See Smiley, Samuel, jr., assignor.)
Gnudi, Alfonso, Bologna, Italy. Display method. 1,684,795; Sept. 18.
Goddu, George, Winchester, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Fastening-inserting machine. 1,684,390; Sept. 18.
Goerz, C. P., Optische Anstalt, Aktiengesellschaft, Akciova Spolecnost K. P. Goerz Opticky Ustav. (See Petschenig, Karl, assignor.)
Goodwin, William M., Central Square, N. Y. Poppet-valve-actuating device. 1,684,955; Sept. 18.
Gordon, Barnett D., Boston, Mass. Stocking. Des. 76,343; Sept. 18.
Goshikaisha Jidosha Kyujoki Seisakusho. (See Nishida, S., Ota, and Inose, assignors.)

Gouverneur, Minor F. H., assignor to Locke Insulator Corporation, Baltimore, Md. High-tension insulator. 1,684,441; Sept. 18.
Grant, Garnet P., New York, N. Y. Coin-propelling device for vending machines. 1,684,863; Sept. 18.
Grasselli Dyestuff Corporation. (See Fischer, E., and Müller, assignors.)
Grasselli Dyestuff Corporation. (See Philips, A., and Dabelow, assignors.)
Grasselli Dyestuff Corporation. (See Schweitzer, H., and Neelmeier, assignors.)
Green, Harry J. (See Ward, J. P., and Hyde, assignors.)
Green, J Birchard, Chicago, Ill. Container for annealing and similar purposes. 1,684,391; Sept. 18.
Green, Walter H., assignor, by mesne assignments, to General Zeolite Company, Chicago, Ill. Water-treatment apparatus. 1,684,822; Sept. 18.
Greenberg, William, Bronx, assignor of one-half to E. Kaufman, Brooklyn, N. Y. Clasp jaw for fur scarfs or the like. Des. 76,344; Sept. 18.
Greene, Benjamin H., Canton, Ohio. Automatic electric control system. 1,685,052; Sept. 18.
Greibach, Emil H. (See Smith, B. H., Atherton, and Greibach.)
Grer, John A. (See Guerrero, E., and Grey.)
Grimshaw, Frederick H. (See Guild, W. J., and Grimshaw.)
Grohn, Henry P., Chicago, Ill. Cylinder and tire gauge. 1,684,864; Sept. 18.
Gruse, William A. (See Souther, B. L., and Gruse.)
Gulf Refining Company. (See Souther, B. L., and Gruse, assignors.)
Guerrero, Enrique, and J. A. Grey, Quito, Ecuador. Direction indicator for automobiles. 1,684,916; Sept. 18.
Guggenheim Brothers. (See Fischer, Arthur H., assignor.)
Guild, Waldo J., and F. H. Grimshaw, assignors to The Heald Machine Company, Worcester, Mass. Grinding machine. 1,684,485; Sept. 18.
Guild, Waldo J., Worcester, Mass., and L. C. Kenyon, New York, N. Y., assignors to The Heald Machine Company, Worcester, Mass. Grinding machine. 1,684,486; Sept. 18.
Gulf Refining Company. (See Souther, B. L., and Gruse, assignors.)
Gulick, Edward J., Elkhart, Ind. Horn bell. 1,684,892; Sept. 18.
Gysi, Alfred, Zurich, Switzerland, assignor to The Dentists' Supply Company. Dental articulator. 1,684,393; Sept. 18.
Haag, Alfred H., Baltimore, Md., assignor of fifteen one-hundredths to E. H. Fairbanks, Merchantville, N. J. Loud speaker for radio receiving apparatus. 1,684,956; Sept. 18.
Haase, Max, Buchschlag, Germany. Sign controller. 1,684,394; Sept. 18.
Habib, Vita (now by court decree Vita Habif), Cincinnati, Ohio. Headgear. 1,684,670; Sept. 18.
Habicht, Georg, Nuremberg, Germany, assignor to the firm Bing-Werke, vorm. Gebr. Bing Aktiengesellschaft. Toy roundabout. 1,684,796; Sept. 18.
Habif, Vita (by court decree). (See Habib, Vita.)
Habighorst, August H., Marinette, Wis. Rural mail box. 1,684,823; Sept. 18.
Hadley Company, The. (See Tost, Charles R., assignor.)
Haeusser, Friedrich, and R. Bestehorn, Dortmund, Germany. Atomizer for liquids. 1,684,488; Sept. 18.
Hall, Walter O., and W. C. Buchanan, Franklin, Mass. Printing press. 1,684,781; Sept. 18.
Halloran, Ralph A., Berkeley, assignor, by mesne assignments to Standard Oil Company of California, San Francisco, Calif. Counterflow treatment of petroleum oils. 1,684,489; Sept. 18.
Hamblin, Fred B., assignor to The Weightograph Company, St. Louis, Mo. Scale. 1,684,957; Sept. 18.
Hammerlund, Lloyd A., Rockville Center, N. Y., assignor to The Hammerlund Manufacturing Company, Incorporated. Adjustable condenser. 1,684,917; Sept. 18.
Hammerlund Manufacturing Company, The. (See Hammerlund, Lloyd A., assignor.)
Haney William J., North Vernon, Ind. Tapper and protector for toe-dancing shoes. 1,684,442; Sept. 18.
Hansen, Bertram, and P. J. Ramion, Syracuse, N. Y. Ham-curing device. 1,684,865; Sept. 18.
Hansen, Charles P., Evan, Minn. Radio dial escutcheon plate. Des. 76,345; Sept. 18.
Hapgood, Cyrus H., Nutley, N. J., assignor to The De Laval Separator Company, New York, N. Y. Vacuum pump. 1,684,395; Sept. 18.
Harker, Ferris P., Bridgeport, Conn. Combination kitchen utensil. 1,684,622; Sept. 18.
Harris, Henry J., Youngstown, Ohio. Device for preventing collection of grease on rolls. 1,684,581; Sept. 18.
Harris, Marie, New York, N. Y., assignor of one-third to J. B. Burrowes, Washington, D. C., and one-third to R. Brayton, New York N. Y. Bedclothes clamp. 1,684,443; Sept. 18.
Harrison, William, Manchester, England. Manufacture of carbohydrate derivatives. 1,684,732; Sept. 18.
Harshman, Clarence C. (See Cullen, F. J., Binder, and Harshman.)
Harsin, Frank M., Nampa, Idaho, assignor of one-half to A. D. Leedy, Portland, Oreg. Tire carrier and tool kit. 1,684,699; Sept. 18.
Hart, Thomas B., Libow, assignor of one-half to Adamston Flat Glass Company, Clarksburg, W. Va. Glass furnace. 1,685,053; Sept. 18.
Hartwig, Charles W., Hastings-upon-Hudson, N. Y. Dispensing device. 1,684,623; Sept. 18.
Haseltine, Stacy B., assignor to W. H. Miner, Inc., Chicago, Ill. Friction shock-absorbing mechanism. 1,684,538; Sept. 18.
Haseltine, Stacy B., assignor to W. H. Miner, Inc., Chicago, Ill. Friction shock-absorbing mechanism. 1,684,539; Sept. 18.
Haseltine, William C. (See Bowman, John G., assignor.)
Hasler A.-G. vormals Telegraphenwerkstatte von G. Hasler. (See Zbinden, Ernst, assignor.)
Hauptmeyer, Friedrich, Essen assignor to Fried. Krupp Aktiengesellschaft, Essen-on-the-Ruhr, Germany. Casting articles of corrosionproof steel. 1,684,700; Sept. 18.
Haven, Harry M. (See Pierini, A., Hopkins, and Haven.)
Hawthorn, James M., assignor to The Duplex Gas Turbine Company, Inc., Everett, Wash. Gas turbine. 1,684,824; Sept. 18.
Hayden, Alfred J., Daytona Beach, Fla. Hoe weeder. 1,684,444; Sept. 18.
Hayden, Harold P., Woodbridge, N. J., assignor to The Barber Asphalt Company, Philadelphia, Pa. Concrete construction. 1,684,624; Sept. 18.
Hayden, Harold P., Woodbridge, N. J., assignor to The Barber Asphalt Company, Philadelphia, Pa. Preventing evaporation from concrete during curing. 1,684,671; Sept. 18.
Hayman, Charles M. Brooklyn, N. Y. Diaphragm-control mounting. 1,684,701; Sept. 18.
Hazard, George E., assignor to Kellogg Manufacturing Co., Rochester, N. Y. Check valve. 1,684,987; Sept. 18.
Heald Machine Company, The. (See Guild, W. J., and Grimshaw, assignors.)
Heald Machine Company, The. (See Guild, W. J., and Kenyon, assignors.)
Heald Machine Company, The. (See Heald, R. A., Highberg, and Taylor, assignors.)
Heald, Richard A., C. J. Highberg, and E. M. Taylor, assignors to The Heald Machine Company, Worcester, Mass. Grinding machine. 1,684,487; Sept. 18.
Heard, Nathan, Newton, assignor to Draper Corporation Hopedale, Mass. Loom dobby. 1,685,065; Sept. 18.
Hedeen, Elmer, assignor to The Hughes-Keenan Company, Mansfield, Ohio. Stair construction. 1,684,764; Sept. 18.
Hedeen, Elmer, assignor to The Hughes-Keenan Company, Mansfield, Ohio. Stair construction. 1,684,765; Sept. 18.
Hedeen, Elmer assignor to The Hughes-Keenan Company, Mansfield, Ohio. Metallic stair. 1,684,766; Sept. 18.
Heffelbower, George F., Flint, Mich. Safety-razor-blade holder. 1,684,830; Sept. 18.
Helmers, Rudolf, Tacubaya, Mex. Locking device for typewriters. 1,684,702; Sept. 18.
Henderson, James B., Lee, England. Gun sight. 1,684,825; Sept. 18.
Henderson, Nelson H., assignor to Syracuse Industrial Gas Co., Syracuse, N. Y. Pump. 1,684,490; Sept. 18.
Hetherington, Benjamin, Fall River, Mass. Harness hook for looms. 1,684,733; Sept. 18.
Heyman, Joseph J., assignor to Milano Furniture Company, Chicago, Ill. Radiocabinet or similar article. Des. 76,346; Sept. 18.
Heywood-Wakefield Company. (See Stinson, Richard, assignor.)
Hibbard, Charles T., assignor to Electric Machinery Mfg. Company, Minneapolis, Minn. Dynamo-electric machine. 1,685,054; Sept. 18.
Highberg, Carle J. (See Heald, R. A., Highberg, and Taylor.)
Hilgedick, Rudy, Chicago, Ill. Ironer. 1,684,584; Sept. 18.
Hill, David, West Barrington, R. I. Motor-vehicle beater. 1,684,672; Sept. 18.
Hill, Joseph E., Detroit, Mich. Conduit connecter. 1,684,826; Sept. 18.
Hill, Leonard J., Grand Rapids, Mich. Extension table. 1,684,831; Sept. 18.
Hillyard, Newton S., St. Joseph, Mo. Wiper. 1,684,625; Sept. 18.
Hinneken, Florent, Paterson, N. J. Reenforced flange. 1,684,396; Sept. 18.
Hintermann, Theodor, Bern, Switzerland. Harvesting machine with scatterer. 1,684,626; Sept. 18.
Hippenmeyer, Irving R., Waukegan, assignor to The Creamery Package Mfg. Company, Chicago, Ill. Bottle-washing apparatus. 1,684,827; Sept. 18.
Hippenmeyer, Irving R., Waukegan, assignor to The Creamery Package Mfg. Company, Chicago, Ill. Case-washing machine. 1,684,828; Sept. 18.
Hitzigrath, Paul E., Rockville Center, assignor to S. Glemby's Sons Co., Inc., New York, N. Y. Hair net. 1,684,734; Sept. 18.
Hoaglund, Earnest E., Minneapolis, Minn. Sanitary well cap and pipe clamp. 1,684,582; Sept. 18.
Hodge, Elvira W., administratrix. (See Hodge, Howard D.)
Hodge, Howard D., deceased, New York, N. Y.; E. W. Hodge, administratrix, Bridgeport, Conn., assignor to Burgess Battery Company, Madison, Wis. Dry-cell electrode. 1,684,735; Sept. 18.

Hoelle, John J., Sydney, New South Wales, Australia. Domestic hand tool. 1,684,829; Sept. 18.
Hoffman, Rudolph, Cleveland, Ohio. Burner. 1,684,585; Sept. 18.
Holbeach, Mary G., Portsmouth, England. Apparatus for indicating the direction or angle of stream lines in fluids particularly applicable for use in designing counter-propeller devices. 1,685,025; Sept. 18.
Holcomb, J. I., Mfg. Co. (See Anderson, Jesse I., assignor.)
Hollnagel, Theodore C., Milwaukee, Wis., assignor, by mesne assignments, to The Hughes-Keenan Company, Mansfield, Ohio. Truck. 1,684,673; Sept. 18.
Homan, Clayton H., Cleveland, Ohio, assignor to The C. G. Spring & Bumper Company, Detroit, Mich. Hoist. 1,684,988; Sept. 18.
Honaman, Richard K., Bloomfield, N. J., assignor to American Telephone and Telegraph Company. Signaling system. 1,684,445; Sept. 18.
Honohan, Herbert L., assignor to W. D. Honohan, Chicago, Ill. Automobile alarm. 1,685,073; Sept. 18.
Honohan, William D. (See Honohan, Herbert L., assignor.)
Hooper, James P., Ruxton, assignor to William E. Hooper & Sons Company, Baltimore, Md. Package. 1,684,540; Sept. 18.
Hooper, William E., & Sons Company. (See Hooper, James P., assignor.)
Hoover Company, The. (See Lucke, Charles E., assignor.)
Hope, John F. and J. T., Kansas City, Mo. Apparatus for drying wood. 1,684,627; Sept. 18.
Hope, John T. (See Hope, John F. and J. T.)
Hopkins, Arthur T. (See Pierini, A., Hopkins, and Haven.)
Horn, Jacque E., assignor to Eze Cushion Corporation, New York, N. Y. Chair cushion. 1,684,989; Sept. 18.
Horowit, Frederick. (See Buda, Pasquale, assignor.)
Hostettler, Leigh W., Tarentum, assignor to Allegheny Steel Company, Brackenridge, Pa. Journal-box lid. 1,684,541; Sept. 18.
Hostettler, Leigh W., Tarentum, assignor to Allegheny Steel Company, Brackenridge, Pa. Journal-box lid. 1,684,542; Sept. 18.
Hottenstein, George E., jr. (See Hottenstein, George E., and G. E., jr.)
Hottenstein, George E. and G. E., jr., Spokane, Wash. Rotary valve mechanism for internal-combustion engines. 1,684,767; Sept. 18.
Houck, Harry W., East Orange, N. J., assignor, by mesne assignments, to Dubilier Condenser Corporation, New York, N. Y. Arrangement of electrical appliances. 1,684,703; Sept. 18.
Howie, Kenneth, assignor to Wildman Mfg. Co., Norristown, Pa. Spring-beard knitting machine. 1,684,583; Sept. 18.
Howie, Kenneth, assignor to Wildman Mfg. Co., Norristown, Pa. Needle-selector jacquard for knitting machines. 1,684,586; Sept. 18.
Howson, Thomas J., Marshfield, Oreg. Wire puller and twister for concrete framework. 1,684,797; Sept. 18.
Hoyt, Reginald H., Roslindale, assignor to Wireless Specialty Apparatus Company, Boston, Mass. Electrostatic condenser. 1,684,491; Sept. 18.
Hubbard, Francis A., Wyoming, N. J., assignor to Western Electric Co., Incorporated, New York, N. Y. Electrical testing. 1,684,397; Sept. 18.
Hubbell, Harvey, deceased, Bridgeport, Conn.; L. E. Hubbell, executrix. Door control. 1,684,704; Sept. 18.
Hubbell, Louie E., executrix. (See Hubbell, Harvey.)
Huff, Hulah U. (See Turner, G. P., and Huff.)
Huffman, Louis, Toronto, Ontario, Canada, assignor to Schlage Lock Company, San Francisco, Calif. Knob lock. Re17,084; Sept. 18.
Hughes-Keenan Company, The. (See Hedeen, Elmer, assignor.)
Hughes-Keenan Company, The. (See Hollnagel, Theodore C., assignor.)
Hultgren, Christian, parish of Svinhult, Sweden. Tone post. 1,684,492; Sept. 18.
Hultman, Edgar W., Los Angeles, Calif. Carbon-monoxide-testing means and methods. 1,684,587; Sept. 18.
Hults, Eugene A., Saltville, Va. Drier. 1,685,026; Sept. 18.
Humble Oil & Refining Company. (See Nixon, Jeddy D., assignor.)
Humphreys, Walter G., Omaha, Nebr. Variable-speed mechanism. 1,684,705; Sept. 18.
Huttinger, William R., Philadelphia, Pa. High-voltage switch. 1,685,066; Sept. 18.
Huttinger, William R., Philadelphia, Pa. High-voltage switch. 1,685,067; Sept. 18.
Huttinger, William R., Philadelphia, Pa. Switch mechanism. 1,685,068; Sept. 18.
Hyde, Reed W., Summit, N. J., assignor to Dwight & Lloyd Metallurgical Company, New York, N. Y. Treating fines of earthly minerals. 1,684,958; Sept. 18.
Hyde, Robert E. (See Ward, J. P., and Hyde.)
Hydraulic Brake Company. (See Sherbino, Morton R., assignor.)
I. G. Farbenindustrie Aktiengesellschaft. (See Luther, M., Pieroh, and Kranepuhl, assignors.)
I. G. Farbenindustrie Aktiengesellschaft. (See Nüssiein, Joseph, assignor.)
I. G. Farbenindustrie Aktiengesellschaft. (See Schmidt, O., Seydel, and Feller, assignors.)
Ilcite Electric Manufacturing Corporation. (See Giles, I. F., and Roberts, assignors.)
Iler, George A., Cleveland, Ohio. Live-line-testing device. 1,684,768; Sept. 18.
Iler, George A., Youngstown, Ohio. Live-line and insulator testing device. 1,684,798; Sept. 18.
Independent Pneumatic Tool Company. (See Levedahl, Axel, assignor.)
Ingersoll-Rand Company. (See Wilhelm, Russell H., assignor.)
Inglis, Bruce K., assignor of one-half to C. W. Inglis, Milwaukee, Wis. Oil burner. 1,684,990; Sept. 18.
Inglis, Bruce K., assignor of one-half to C. W. Inglis, Milwaukee, Wis. Oil burner. 1,684,991; Sept. 18.
Inglis, Clement W. (See Inglis, Bruce K., assignor.)
Inglis, Newton R., Duluth, Minn. Stand. 1,684,446; Sept. 18.
Inoue, Gensuke. (See Nishida, S., Ota, and Inoue.)
Insulex Corporation. (See Ashenburst, Harold S., assignor.)
International Motor Company. (See Masury, A. F., and Froesch, assignors.)
International Time Recording Company of New York. (See Larrabee, Clinton E., assignor.)
International Toy Corporation. (See Babbitt, Edwin V., assignor.)
Italian-Swiss Colony. (See Davis, William, assignor.)
Jackson, Lester P., El Paso, Tex. Container for testing devices. 1,684,769; Sept. 18.
Jackson, Nelson, assignor of one-fourth to A. Duncan, Saskatoon, Saskatchewan, Canada. Rotary rod weeder. 1,684,992; Sept. 18.
Jackson, Solomon N. (See Carrell, Hammel H., assignor.)
Jaeschke, Alfred, Los Angeles, Calif. Can-spout-seal cutter. 1,684,447; Sept. 18.
Jansky, Charles G., Berwyn, Ill. Electrical connecter. 1,684,588; Sept. 18.
Jarboe, Grant, Findlay, Ohio. Shears sharpener. 1,684,866; Sept. 18.
Jaroch, Antonl, Yorkville, Ohio. Window screen. 1,685,027; Sept. 18.
Jassen, Bern and H., Brooklyn, N. Y. Bracket carrier for windshield deflectors. 1,684,493; Sept. 18.
Jassen, Harry. (See Jassen, Bern and H.)
Jeffrey Manufacturing Company, The. (See Lemmon, Alexis W., assignor.)
Jenkins, Charles F., Washington, D. C. Radio vision studio equipment. 1,684,736; Sept. 18.
Jenkins, Ralph W., Daleville, Ind. Combination door jamb and handhold. 1,684,832; Sept. 18.
Jensen, Olaus, Seattle, Wash. Umbrella. 1,684,628; Sept. 18.
Jenssen, G. D., Company. (See Jenssen, Jacob D., assignor.)
Jenssen, Jacob D., assignor to G. D. Jenssen Company, New York, N. Y. Apparatus for making bisulphite liquor. 1,684,494; Sept. 18.
Jereczek, Viktor, Weissensee, near Berlin, assignor to Stock Motorpflug Aktiengesellschaft, Berlin, Germany. Chain track for motor vehicles. 1,684,918; Sept. 18.
Johnsen, Einar A., Mountain Lakes, assignor to Engineering Development Company, New Brunswick, N. J. Condenser. 1,684,959; Sept. 18.
Johnson, Felix G., Clarinda, Iowa. Animal trap. 1,685,028; Sept. 18.
Johnson, Gustav, West Roxbury, assignor to Carr Fastener Company, Cambridge, Mass. Separable fastener. 1,685,055; Sept. 18.
Johnson, Lane, Ingram, assignor to United Engineering & Foundry Company, Pittsburgh, Pa. Method and apparatus for handling strips. 1,684,867; Sept. 18.
Johnson, Lloyd E. (See Sparks, W., Scofield, Johnson, and Billig.)
Johnston, Clarence S., Glendive, Mont. Disk wheel. 1,684,398; Sept. 18.
Jolly, James, Bolton, England. Drawing or drafting mechanism. 1,684,993; Sept. 18.
Jones, Irvin H., Manhattan, Ill., assignor to The Koppers Company, Pittsburgh, Pa. Production of resins. 1,684,868; Sept. 18.
Jorgen-Jensen, Erik, Edgbaston, Birmingham, England. Apparatus for casting under pressure. 1,684,994; Sept. 18.
Joy, Frank. (See Laterra, J., and Joy.)
Kahlik, Frank. (See Bartosh, Joseph F., assignor.)
Kaminsky, Rubin, Jersey City, N. J., assignor to Melrose Slipper Co. Inc., New York, N. Y. Turn shoe. 1,684,543; Sept. 18.
Kanné, Alexander R., Brooklyn, assignor to Kanné & Bessant, Inc., New York, N. Y. Lamp. Des. 76,347; Sept. 18.
Kanné & Bessant, Inc. (See Kanné, Alexander R., assignor.)
Karfiol, Edward, Brooklyn, N. Y. Dolly. Des. 76,348; Sept. 18.
Kaufman, Emil. (See Greenberg, William, assignor.)
Kauth, Nicholas, Los Angeles, Calif., assignor to A. J. Bayer Company. Adjustable guide for sliding doors. 1,684,706; Sept. 18.
Kay, William H., Lynn, Mass. Last-engaging dog for last lathes. 1,684,960; Sept. 18.
Keeler, Earl A. (See Smith, I. B., and Keeler.)

Keller, Karl O., assignor to R. P. Doxford, Sunderland, England. Piston for internal-combustion engines. 1,684,629; Sept. 18.
Kellogg Manufacturing Co. (See Hazard, George E., assignor.)
Kellogg Switchboard and Supply Company. (See Bohlman, Ernest A., assignor.)
Kelly, Thomas D., London, England. Aircraft. 1,685,029; Sept. 18.
Kennard, Roy W., Harper, Wash. Milk-bottle carrier. 1,684,995; Sept. 18.
Kenyon, Lewis C. (See Guild, W. J., and Kenyon.)
Keyser, Johann J., Aarau, Switzerland. Spinning shafting. 1,684,919; Sept. 18.
Kharasch, Morris S., College Park, Md., assignor to Eli Lilly and Company, Indianapolis, Ind. Water-soluble organic compound of antimony and producing it. 1,684,920; Sept. 18.
Kinkel, Revere P., Buffalo, N. Y. Treating garbage and the like. 1,684,448; Sept. 18.
Kirts, Owen C., Marion, Ohio. Smoking stand. 1,684,589; Sept. 18.
Klausmeyer, David C., Cincinnati, assignor to The Cincinnati Bickford Tool Company, Oakley, Cincinnati, Ohio. Mobile radial drill. 1,685,072; Sept. 18.
Kleinman, Jacob L., New York, N. Y. Tennis racket. 1,684,449; Sept. 18.
Knapp, James H., assignor to James H. Knapp Company, Los Angeles, Calif. Electric heater. 1,684,450; Sept. 18.
Knapp, James H., Company. (See Knapp, James H., assignor.)
Kochendorfer, Frederic S., River Forest, Ill., assignor to Western Electric Company, Incorporated, New York, N. Y. Thread-rolling machine. 1,684,799; Sept. 18.
Kolster, Frederick A., and S. A. Sollie, Palo Alto, assignors to Federal Telegraph Company, San Francisco, Calif. Electromagnetic sound reproducer. Re17,086; Sept. 18.
Konell, Fred E., Wagner, Wis. Plow wheel. 1,684,833; Sept. 18.
Koppers Company, The. (See Jones, Irvin H., assignor.)
Kozak, Andrew, Lilly, Pa. Water and carbide can. 1,684,996; Sept. 18.
Kraetsch, Carl H., Des Moines, Iowa. Golf practice apparatus. 1,684,674; Sept. 18.
Kraft, Walter V., Clinton, Ill. Water heater. 1,684,997; Sept. 18.
Kramer, Max L. (See Quick, Frank J., assignor.)
Kranepuhl, Erich. (See Luther M., Pieroh, and Kranepuhl.)
Krueger, Ferdinand H., Milwaukee, Wis. Placer-mining machine. 1,684,869; Sept. 18.
Krume, Elbert C. (See Madison, B. F., and Krume.)
Kuhn, Wilfred H., Detroit, Mich. Steam trap. 1,684,961; Sept. 18.
Kunzi, Andrew E., assignor to Churchill's, Incorporated, Chicago, Ill. Dispensing container. 1,684,495; Sept. 18.
La Hatte, Cicero, Vicksburg, Miss. Merchandise support. 1,684,707; Sept. 18.
Lake Lithograph Company, The. (See Ferguson, J. E., and Mooney, assignors.)
Lamb, Joseph F., and F. W. Schade, New Britain, assignors to Landers, Frary & Clark, Hartford, Conn. Container. 1,684,899; Sept. 18.
Lamb, Leslie J., Oakland, Calif. Artificial leg. 1,684,921; Sept. 18.
Lambert, Albert J., assignor of one-half to The Lambert Heater & Engineering Company Limited, London, England. Liquid-heating device. 1,684,630; Sept. 18.
Lambert Heater & Engineering Company Limited, The. (See Lambert, Albert J., assignor.)
Lamont, Lewis H., Oak Park, Ill. Thermostatically-controlled heating element. 1,684,544; Sept. 18.
Land, Charles H., Detroit, Mich. Hydraulic brake and coupling device for tractor trailers. 1,684,836; Sept. 18.
Landers, Frary & Clark. (See Lamb, J. F., and Schade, assignors.)
Lapinoja, William, Enumclaw, Wash. Brush. 1,684,631; Sept. 18.
La Plant, Edward, Arlee, Mont. Link for antiskid chains. 1,684,632; Sept. 18.
Lappas, Nikitas, Peabody, Mass. Fortune-telling device. 1,684,998; Sept. 18.
Larrabee, Clinton E., Binghamton, assignor to International Time Recording Company of New York, Endicott, N. Y. Multicolored ribbon-control device for time recorders. 1,684,400; Sept. 18.
Larsen, Olaf, Fort Atkinson, Wis., assignor to The Creamery Package Mfg. Company, Chicago, Ill. Deaerating apparatus. 1,684,834; Sept. 18.
Larsen, Olaf, Fort Atkinson, Wis., assignor to The Creamery Package Mfg. Company, Chicago, Ill. Flow regulator. 1,684,835; Sept. 18.
Larsson, Thure, Worcester, Mass. Segmental grinding wheel. 1,684,770; Sept. 18.
Lasker, William W., Brooklyn, assignor, by mesne assignments, to Remington Rand Inc., New York, N. Y. Numbering and counting device. 1,684,545; Sept. 18.
Lasker, William W., Brooklyn, assignor, by mesne assignments, to Remington Rand Inc., New York, N. Y. Carriage-return and normalizing mechanism for card-perforating machines. 1,684,546; Sept. 18.
Laterra, John, and F. Joy, Paterson, N. J. Banjo hand rest. 1,684,962; Sept. 18.
Latham Machinery Company. (See Leschhorn, Ernest, assignor.)
Lautenschlager, William F., Cincinnati, Ohio. Spark intensifier. 1,684,496; Sept. 18.
Lavole, Joseph, assignor to E. H. Frye, trustee, Detroit, Mich. Combined sadiron and heater. 1,685,030; Sept. 18.
Lawlor, Simeon C., Chicago, Ill. Valve. 1,684,837; Sept. 18.
Lawrence, Winthrop S., New York, N. Y. Textile dye. 1,684,401; Sept. 18.
Lawser, Charles W., Bala, assignor to Wicaco Screw & Machine Works, Inc., Philadelphia, Pa. Spinning pump. 1,684,871; Sept. 18.
Leeds & Northrup Company. (See Smith, I. B., and Keeler, assignors.)
Leedy, A. D. (See Harsin, Frank M., assignor.)
Leighton, George A., Roslindale, Mass., assignor to American Can Company, New York, N. Y. Device for removing friction plugs from containers. 1,684,708; Sept. 18.
Lemmon, Alexis W., assignor to The Jeffrey Manufacturing Company, Columbus, Ohio. Automatic feeder. 1,684,675; Sept. 18.
Lemmon, Rees H. (See Yerkes, J. A., and Lemmon.)
L'Enfant, Charles, New York, N. Y. Cardcase and making same. 1,684,737; Sept. 18.
Leschhorn, Ernest, Chicago, Ill., assignor to Latham Machinery Company. Wireworking device for stitching. 1,684,838; Sept. 18.
Leslie, Eugene H., and E. M. Baker, Ann Arbor, Mich. Treating and fractionating cracking-plant vapors. 1,684,771; Sept. 18.
Levedahl, Axel, Aurora, assignor to Independent Pneumatic Tool Company, Chicago, Ill. Screw or nut driving device for portable power-driven rotary tools. 1,684,633; Sept. 18.
Levy, Sydney, jr., Suva, Fiji Islands. Medicine-administering device. 1,684,999; Sept. 18.
Lewis, Ernest C., Meriden, assignor to The Tubular Products Company, Southington, Conn. Ash receptacle or similar article. Des. 76,349; Sept. 18.
Lewis, Frank D. (See Widmann, E. A., and Lewis.)
Lewis, Frank D., Denver, Colo. Centrifugal concentrating and amalgamating apparatus of the vertical type. 1,684,870; Sept. 18.
Libbey-Owens Sheet Glass Company, The. (See Ferngren, Enoch T., assignor.)
Libbey-Owens Sheet Glass Company, The. (See Fraser, Frank, assignor.)
Libbey-Owens Sheet Glass Company, The. (See Recce, Joseph A., assignor.)
Lilly, Eli, and Company. (See Kharasch, Morris S., assignor.)
Lima Sheet Metal Products Company. (See Ackerman, Charles L., assignor.)
Lindas, Henry E., Colorado Springs, Colo. Collapsible conduit core. 1,684,497; Sept. 18.
Lindenblad, Nils E., Shoreham, N. Y., assignor to Radio Corporation of America. Intertransposition of sound and electrical energy. 1,685,075; Sept. 18.
Link, Vincent, Detroit, Mich., assignor to The Studebaker Corporation, South Bend, Ind. Brake. 1,684,547; Sept. 18.
Liquid Dispensing Systems, Inc. (See Stedwell, George W., assignor.)
Litle, Thomas J., jr., assignor to Copeland Products, Inc., Detroit, Mich. Refrigerator freezing device. 1,684,590; Sept. 18.
Locke, Albert V., Belmont, Mass. Vehicle alarm. 1,684,591; Sept. 18.
Locke Insulator Corporation. (See Gouverneur, Minor F. H., assignor.)
Locomotive Finished Material Company, The. (See Muchnic, Henry E., assignor.)
Locomotive Stoker Company. (See Lower, Nathan M., assignor.)
Loetscher, Emil C., Dubuque, Iowa. Power clamp. 1,684,548; Sept. 18.
Logue, Charles H., Syracuse, N. Y. Gear-lapping machine. 1,684,872; Sept. 18.
Lord, Erskine D., Cambridge, assignor to McLaurin-Jones Co., Brookfield, Mass. Meltable adhesive. 1,684,873; Sept. 18.
Lorenzi, Luigi, and A. Colombo, San Francisco, Calif. Sole construction for rubber boots. 1,684,676; Sept. 18.
Love, John H., Pawhuska, and K. C. Love, Muskogee, Okla. Bottle. Des. 76,350; Sept. 18.
Love, Kit C. (See Love, John H. and K. C.)
Lowe, Joseph N., New York, N. Y. Hand bag. 1,684,839; Sept. 18.
Lowe Machinery Company, The. (See Lowe, Thomas L., assignor.)
Lowe, Thomas L., Devon, assignor to The Lowe Machinery Company, Bridgeport, Conn. Automatic feeder for laundry machinery. 1,684,451; Sept. 18.
Lowe, Thomas L., Devon, assignor to The Lowe Machinery Company, Bridgeport, Conn. Laundry-distributing apparatus. 1,684,452; Sept. 18.
Löwenstein, Harry F., Washington, D. C. Intermittent thermal switch. 1,684,709; Sept. 18.
Lower, Nathan M., Pittsburgh, Pa., assignor to Locomotive Stoker Company. Locomotive stoker. 1,684,874; Sept. 18.
Lubin, Joseph I., et al. (See Newmark, Aaron S., assignor.)

Luck, William F., Portland, assignor, by mesne assignments, to F. W. Chausse, Salem, Oreg. Printing press. 1,684,592; Sept. 18.

Lucke, Charles E., New York, N. Y., assignor to The Hoover Company. Refrigerator construction. 1,684,549; Sept. 18.

Luehrs, Daniel M., Cleveland, Ohio. Heater for liquid heat-transmission systems. 1,684,963; Sept. 18.

Lupien, Henry J. (See Gay, Alfred F., assignor.)

Lupton's, David, Sons Company. (See Brogden, Joah, assignor.)

Luther, Martin, K. Pieroh, and E. Kranepuhl, Mannheim, assignors to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany. Catalytic dehydrogenation. 1,684,634; Sept. 18.

Lynn, John P., assignor to Autopoint Products Company, Chicago, Ill. Pencil. 1,684,635; Sept. 18.

Lyons, James, jr., assignor to self and L. H. Schwabacher, trustees, New York, N. Y. Variable condenser. 1,684,964; Sept. 18.

Lyons, Robert L., Waltham, Mass., assignor to Frederick Osann Company, New York, N. Y. Needle guard for sewing machines. 1,684,453; Sept. 18.

Macy, R. H., & Co., Inc. (See Wilmot, Ruth, assignor.)

Madison, Benjamin F., and E. C. Krume, Council Bluffs, Iowa. Feed-water-heating system. 1,684,965; Sept. 18.

Maibay, Raphaël, Paris, France. Apparatus for the carbonization and distillation of wood. 1,684,875; Sept. 18.

Malcolm, Thomas J., Natchez, Miss. Piano-bridle-strap fastener. 1,685,001; Sept. 18.

Mallory, Marion, Toledo, Ohio. Carburetor. 1,684,550; Sept. 18.

Mallory, Marion, Toledo, Ohio. Carburetor. 1,684,840; Sept. 18.

Mammen, Lawrence W., Chicago, Ill. Ornamental light. 1,684,922; Sept. 18.

Manning, Howard H., assignor to McCrosky Tool Corporation, Meadville, Pa. Boring bar. 1,684,772; Sept. 18.

Manning, Sanford E., Smackover, Ark. Cementing apparatus. 1,684,551; Sept. 18.

Marin, Joseph M. I., Jersey City, N. J. Wearing apparel. 1,684,876; Sept. 18.

Marks, Edward S., assignor to H. H. Franklin Manufacturing Company, Syracuse, N. Y. Vibration-absorbing element. 1,684,773; Sept. 18.

Marschalk, Charles H., Paris, France. Manufacture of perylene. 1,684,738; Sept. 18.

Marsden, John E., Philadelphia, Pa. Molded-glass receptacle. 1,684,498; Sept. 18.

Marsh, James. (See Aycock, Francis M., assignor.)

Marsh, Jas. P., & Company. (See Rose, Alexander D., assignor.)

Marsh, Joseph R. C., Arlington Heights, assignor to F. N. Bard, Chicago, Ill. Steel and its manufacture. 1,684,841; Sept. 18.

Marshall, Clinton E., Brooklyn, N. Y. Fountain pen. 1,684,402; Sept. 18.

Mason, Warren P., East Orange, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Electrical testing system and method. 1,684,403; Sept. 18.

Masury, Alfred F., and C. Froesch, assignors to International Motor Company, New York, N. Y. Brake mechanism. 1,684,404; Sept. 18.

Matranga, Vincent J., Elizabeth, N. J. Weatherproof hinge. 1,685,002; Sept. 18.

Maximoff, Juvenal, and M. S. de Costa, née Vincent, Hunlingue, France. Centrifugal liquid crucible. 1,684,800; Sept. 18.

Mayer, Herman, Philadelphia, Pa. Apparatus for softening silk, yarn, and the like. 1,684,923; Sept. 18.

Mayer, William J., Roxborough, assignor to Edward G. Budd Manufacturing Company, Philadelphia, Pa. Latch-mechanism handle. 1,684,499; Sept. 18.

McAbee, Louis U., Oakland, assignor to California Transit Company, Stockton, Calif. Body and chassis construction for motor vehicles. 1,684,677; Sept. 18.

McCord Radiator & Mfg. Co. (See Bailey, Claude B., assignor.)

McCormick, Fred W., Grand Rapids, Mich. Cupboard latch. Des. 76,351; Sept. 18.

McCoy, William C. (See Russon, Harry R., assignor.)

McCrosky Tool Corporation. (See Manning, Howard H., assignor.)

McElrath William W., Louisville, Ky. Bucket for rotary pumps. 1,685,003; Sept 18.

McGowen, William R., McKees Rocks, assignor to United States Chain & Forging Company, Pittsburgh, Pa. Vehicle bumper. Des. 76,352; Sept. 18.

McGowen, William R., McKees Rocks, assignor to United States Chain & Forging Company, Pittsburgh, Pa. Vehicle bumper. Des. 76,353; Sept. 18.

McKee, Garnet W., Rockford, Ill. Apparatus for proportionately mixing fluids. 1,684,500; Sept. 18.

McLaine William L., and W. L. Borough, Los Angeles, Calif. Sealing casing head. 1,684,678; Sept. 18.

McLaurin-Jones Co. (See Lord, Erskine D., assignor.)

McRae, Frederick W., Eagle Rock, assignor to McRae Paint Products, Inc., Los Angeles, Calif. Paint or waterproofing material and producing the same. 1,684,593; Sept. 18.

McRae Paint Products, Inc. (See McRae, Frederick W., assignor.)

McWhirter, John S., Southport, Conn. Journal-bearing construction. 1,684,405; Sept. 18.

Meldrum, Alexander, Syracuse, N. Y. Sectional wheel. 1,684,552; Sept. 18.

Melrose Slipper Co., Inc. (See Keminsky, Rubin, assignor.)

Mendenhall, James H., Nottingham, Pa. Antirattling device for windows. 1,684,636; Sept. 18.

Menking, Ferdinand W. (See Speir, Seaborn J., assignor.)

Mercadante, Joseph. (See Thompson, Alfred M., assignor.)

Methfessel, Carl Sulzbach-on-the-Murr, Germany. Wax-melting apparatus. 1,684,710; Sept. 18.

Mewborne, Robert G., Clarkesville, Tenn. Cleansing nicotine vapors. 1,684,740; Sept. 18.

Midway Railway Equipment Co. (See Wright, William, assignor.)

Milano Furniture Company. (See Heyman, Joseph J., assignor.)

Milewski, Marion, Lebanon, Pa. Game. 1,685,076; Sept. 18.

Miller, Lou E. (See Parker, L., and Miller.)

Miller, Walter B., trustee. (See Bowen, Charles O., assignor.)

Miner, W. H., Inc. (See Geiger, William A., assignor.)

Miner, W. H., Inc. (See Haseltine, Stacy B., assignor.)

Miner, W. H., Inc. (See O'Connor, John F., assignor.)

Minton, Le Roy H., Metuchen, N. J. Manufacture of zircon refractories. 1,684,739; Sept. 18.

Mishawaka Rubber & Woolen Manufacturing Company (See Blair, George W., assignor.)

Mislin, Eugen, Prague-Vrsovice, assignor to J. F. Daubek and G. Daubek, Bruence, Czechoslovakia. Increasing the usefulness of fodder and food. 1,685,004; Sept. 18.

Monroe Calculating Machine Company. (See Chase, George C. assignor.)

Montealegre, Hasel M., Iola, Kans. Hair waver. 1,684,774; Sept. 18.

Montgomery, Robert H., executor. (See Braddock, Edward I.)

Mooney, Henry L. (See Ferguson, J. E., and Mooney.)

Moore, Richard S., Snyder, Tex. Cotton chopper. 1,684,711; Sept. 18.

Morgan, David W. R., Swarthmore, Pa., assignor to Westinghouse Electric & Manufacturing Company. Air-ejector apparatus. 1,684,406; Sept. 18.

Morris, Elmer C., Chicago, Ill., assignor, by mesne assignments, to Servo-Paper Corporation. Sanitary dispensing device. 1,684,877; Sept. 18.

Morris, Elmer C., Chicago, Ill., assignor, by mesne assignments, to Servo-Paper Corporation. Folded-sheet object and forming same. 1,684,878; Sept. 18.

Morse, Frank C., assignor to Brown-Morse Company, Muskegon, Mich. Filing drawer. 1,684,842; Sept. 18.

Muchnic, Henry E., assignor to The Locomotive Finished Material Company, Atchison, Kans. Railway highway crossing. 1,684,924; Sept. 18.

Müller, C. H. F., Röntgenröhrenfabrik. (See Daumann, Wilhelm, assignor.)

Müller, Carl E. (See Fischer, E., and Müller.)

Muller, Charles A. (See Whaley, W. B. S., Muller, and Tursky.)

Myers, John T., and J. H. Carroll, West Palm Beach, Fla. Self-service store fixtures for vending merchandise. 1,684,637; Sept. 18.

National Automatic Tool Company, The. (See Galloway, Robert M., assignor.)

National Supply Company of Delaware, The. (See Faulkner, D. S., and Timbs, assignors.)

National Watch & Jewelry Co. (See Ritholz, Benjamin D., assignor.)

Naylor Radio Corporation. (See Sears, Sterling G., assignor.)

Neelmeier, Wilhelm. (See Schweitzer, H., and Neelmeier.)

Neikirk, Walter M., assignor to Southern Textile Machinery Company, Paducah, Ky. Pliers. 1,684,775; Sept. 18.

Nemcovsky, Louis A., assignor, by mesne assignments, to Sun Typewriter Company, New York, N. Y. Typewriting machine. 1,684,801; Sept. 18.

Newcomb, Edward C., assignor to The Studebaker Corporation, South Bend, Ind. Brake. 1,684,501; Sept 18.

Newman, Henry R., assignor to Boyle Manufacturing Company, Los Angeles, Calif. Apparatus for dispensing lubricating oil. 1,684,879; Sept. 18.

Newmark, Aaron S., Brooklyn, assignor to J. Elsner and J. I. Lubin, New York, N. Y. Window cornice. 1,684,843; Sept. 18.

New York Brick Handling Corporation. (See Fuller, Claud E., assignor.)

Nibbs, Ernest, New London, assignor to Electric Boat Company, Groton, Conn. Internal-combustion engine. 1,684,407; Sept. 18.

Nicolson, Alexander M., assignor to Western Electric Company, Incorporated, New York, N. Y. Acoustic system. 1,684,408; Sept. 18.

Nilson, Gustaf A., Glencoe, Ill. Shower receptor. 1,684,502; Sept. 18.

Nilson, Gustaf A., Chicago, Ill. Shower receptor. 1,684,503; Sept. 18.

Nishida, Shinkichi, M. Ota, Tokyo, and G. Inose, Takinogawa-machi, near Tokyo, assignor to Goshikaisha Jidosha Kyujoki Seisakusho, Tokyo, Japan. Safety device for motor cars. 1,684,776; Sept 18.

Nitsche, Max P., Dresden, Germany. Production of fertilizers. 1,684,712; Sept. 18.

Nitsch, Charles H., and J. W. Baker, assignors to Stokes and Smith Company, Philadelphia, Pa. Sheet-feeding mechanism. 1,684,741; Sept. 18.

Nixon, Jeddy D., Houston, Tex., assignor to Humble Oil & Refining Company. Power-transmitting apparatus. 1,684,679; Sept 18.

Noland, Barton H., Brooklyn, N. Y. Air-regulating means for liquid-fuel furnaces. 1,685,031; Sept. 18.

Norgren, Carl A., Denver, Colo. Hose clamp. 1,684,713; Sept. 18.

Northrup, Edwin F., Princeton, N. J., assignor to The Ajax Metal Company, Philadelphia, Pa. Submerged-channel induction furnace. 1,684,504; Sept. 18.

Norton, Arthur G., assignor to Alert Products, Inc., Holley, N. Y. Pump. 1,684,880; Sept. 18.

Noyes, Harry W., West Haven, assignor of one-half to A. G. Shields, New Haven, Conn. Vanity case. 1,684,454; Sept. 18.

Nüsslein, Joseph, Ludwigshafen-on-the-Rhine, assignor to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany. Dyeing fibrous materials. 1,684,881; Sept. 18.

Nyquist, Harry, Millburn, N. J., assignor to American Telephone and Telegraph Company. Multiplex carrier-current signaling. 1,684,455; Sept. 18.

Ochiltree, Ned A., assignor to Concrete Engineering Company, Omaha, Nebr. Fence post. 1,684,802; Sept. 18.

O'Connor, John F., Chicago, Ill., assignor, by mesne assignments to W. H. Miner, Inc. Hand brake for railway cars. 1,684,505; Sept. 18.

O'Connor, John F., Chicago, Ill., assignor, by mesne assignments, to W. H. Miner, Inc. Antifriction bearing. 1,684,506; Sept. 18.

O'Connor, John F., Chicago, Ill., assignor, by mesne assignments, to W. H. Miner, Inc. Antifriction roller bearing. 1,684,507; Sept. 18.

O'Connor, John F., Chicago, Ill., assignor, by mesne assignments, to W. H. Miner, Inc. Antifriction bearing. 1,684,508; Sept. 18.

O'Connor, John F., assignor to W. H. Miner, Inc., Chicago, Ill. Antifriction bearing. 1,684,509; Sept. 18.

O'Connor, John F., assignor to W. H. Miner, Inc., Chicago, Ill. Friction shock-absorbing mechanism. 1,684,510; Sept. 18.

O'Conor, Cornelius C., assignor to Simmons Company, Kenosha, Wis. Metal table. 1,684,966; Sept. 18.

O'Donnell, Thomas E., Riverside, Ill., assignor to Western Electric Company, Incorporated, New York, N. Y. Strand-twisting apparatus. 1,684,511; Sept. 18.

Oess, Gustav., Essen, Germany. Construction of tracks of street railways. 1,684,680; Sept. 18.

Ohio Brass Company, The. (See Pipes, Pliny P., assignor.)

Ohio Foundry and Manufacturing Co., The. (See Sharp, William L., assignor.)

Oil City Iron Works. (See Clarke, Clement S., assignor.)

Olinger, Thomas, assignor to Federal Manufacturing Company, Holland, Mich. Furnace register. 1,684,512; Sept. 18.

Olley, Raymond H., assignor to Crouse-Hinds Company, Syracuse, N. Y. Unitary conduit and switch support for gasoline-serving stations. 1,684,777; Sept. 18.

Olsen, Hans, Alslov, near Karlse, Denmark. Soil-working implement. 1,684,594; Sept. 18.

Olson, Andrew, Cleveland, and L. R. Tufts, East Cleveland, assignors to The Cleveland Folding Machine Company, Cleveland, Ohio. Folding machine. 1,684,803; Sept. 18.

Olson, Nels, Superior, Wis. Heater and draft-governing means therefor. 1,684,844; Sept. 18.

Olund, Nels A., Cambridge, Minn. Automobile heater. 1,684,967; Sept. 18.

O'Neil, Matthew G., Dallas, Tex., assignor, by mesne assignments, to Standard Vending Corporation, Wilmington, Del. Vending machine. 1,684,409; Sept. 18.

O'Neill, John H., Springfield, Mo. Air spring with non-elastic fluid shock absorber. 1,685,077; Sept. 18.

Osann, Frederick, Company. (See Lyons, Robert L., assignor.)

Ostrum, Roy A., and C. E. Frykdahl, assignors to Duluth Show Case Company, Duluth, Minn. Shelving. 1,684,410; Sept. 18.

Ota, Mineru. (See Nishida, S., Ota, and Inose.)

Owens, Freeman H., New York, N. Y. Motion-picture apparatus. 1,684,968; Sept. 18.

Pabst, William E., Anderson, Ind. Counterboring head. 1,684,804; Sept. 18.

Packard Electric Company, The. (See Tuttle, George H., assignor.)

Packard Motor Car Company. (See Cooper, Erwin C., assignor.)

Packard Motor Car Company. (See Woolson, Lionel M., assignor.)

Panunzi, Riziero, Geneva, Ill. Attachment for sinks. 1,684,805; Sept. 18.

Parke, William, New York, N. Y. Oven and broiler rack handling device. 1,684,595; Sept. 18.

Parker, Leroy, Utica, and L. E. Miller, New Hartford, N. Y. Electric water heater for water-coloed internal-combustion engines. 1,684,845; Sept. 18.

Parker, Thomas L., assignor to The Standard Electric Manufacturing Co., Chicago, Ill. Mail box. 1,684,513; Sept. 18.

Parsons, Charles A., Newcastle-on-Tyne, England. Mirror, reflector, and the like. 1,685,032; Sept. 18.

Patch, Harry M., Seattle, Wash. Resilient wheel. 1,684,596; Sept. 18.

Pathe Phonograph & Radio Corporation. (See Widmann, E. A., and Lewis, assignors.)

Pearson, Herman E., Wayzata, Minn. Power-driven skis. 1,684,846; Sept. 18.

Penberthy, Ernest, Redruth, Cornwall, assignor to The Climax Rock Drill & Engineering Works Limited, London, England. Percussive rock drill. 1,684,638; Sept. 18.

Penn Hardware Company. (See Cleaver, George E., assignor.)

Penote, Augustus J., Cleveland, Ohio. Tamping machine. 1,684,882; Sept. 18.

Perlmutter, Henry A., Brooklyn, assignor to Artistic Brass & Bronze Works, Inc., New York, N. Y. Adjustable base. 1,684,925; Sept. 18.

Perry, Ira D., Chicago, Ill. Swimming apparatus. 1,684,714; Sept. 18.

Petschenig, Karl, Vienna, Austria, assignor to C. P. Goerz Optische Anstalt, Aktiengesellschaft, Akciova Spolecnost K. P. Goerz Opticky Ustav, Bratislava, Czechoslovakia. Breech sight for ordnance and machine guns. 1,684,681; Sept. 18.

Pettis, Clifton D., New York, N. Y. Brake shoe and making the same. 1,684,883; Sept. 18.

Pfau, Arnold, assignor to Allis-Chalmers Manufacturing Company, Milwaukee, Wis. Prime-mover-controlling means. 1,684,884; Sept. 18.

Phillips, Alfred, Frankfort-on-the-Main, and M. Dabelow, Hochst-on-the-Main, Germany, assignors to Grasselli Dyestuff Corporation, New York, N. Y. Mordant azo dyestuffs and preparing them. 1,684,778; Sept. 18.

Phillips, John H., Chicago, Ill. Hammer. 1,684,514; Sept. 18.

Pickett, Roswell C., Warrenville, and H. W. Thompson, assignors to Advertisers Service Bureau, Chicago, Ill. Form-roller control and timing device. 1,685,033; Sept. 18.

Picklesimer, James E., Atlanta, Ga. Lamp attachment for sadirons. 1,684,742; Sept. 18.

Pierce, Edward M., and W. M. Carroll, Dayton, assignors to A. Davis, jr., Cincinnati, Ohio. Predeterminer and indicator. 1,684,926; Sept. 18.

Pierce Renewable Fuses, Inc. (See Clemens, John G., assignor.)

Pierini, Attilio, Springfield, Gardens, N. Y., A. T. Hopkins, Cambridge, and H. M. Haven, Winchester, Mass. Apparatus for drying fur pelts. 1,684,927; Sept. 18.

Pieroh, Kurt. (See Luther, M., Pieroh, and Kranepuhl.)

Pipes, Pliny P., assignor to The Ohio Brass Company, Mansfield, Ohio. Rail-connecting device. 1,684,885; Sept. 18.

Pitman, Henry L., Westfield, N. J., assignor, by mesne assignments, to Elliott-Fisher Company, New York, N. Y. Computing machine. 1,684,515; Sept. 18.

Praszkewiz, Frank, Detroit, Mich. Secondary-tractor-propelling device. 1,684,969; Sept. 18.

Prettyman, Hugh W., Inwood, W. Va. Map holder. 1,684,682; Sept. 18.

Prosperity Company, The. (See Davis, Ernest, assignor.)

Pyle-National Company. (See Bush, R. R., and Dake, assignors.)

Quick, Frank J., Arlington, assignor of 40 per cent to M. L. Kramer, Cranston, R. I. Flower holder. 1,685,056; Sept. 18.

Rable, Udege A., Yakima, Wash. Divider. 1,684,886; Sept. 18.

Radio Corporation of America. (See Lindenblad, Nils E., assignor.)

Radke, William J., Marmarth, N. Dak. Speedometer and indicator. 1,684,683; Sept. 18.

Rae, John, Ocean Falls, British Columbia, Canada. Wood-chipping machine. 1,684,411; Sept. 18.

Ramlon, Peter J. (See Hansen, B., and Ramlon.)

Ramsay, Erskine, Birmingham, Ala. Long-wall mining shield. 1,684,597; Sept. 18.

Ratcliffe, John N. (See Watkinson, Frederick J., assignor.)

Raymond, Lambert L., Minneapolis, Minn. Christmas-tree reflector with projections. 1,684,847; Sept. 18.

Read, William C., Niagara Falls, N. Y., assignor to Electro Metallurgical Company. Electrolytic rectifier. 1,684,684; Sept. 18.

Records, Elmer H., Spokane, Wash. Liquid fuel. 1,684,685; Sept. 18.

Records, Elmer H., Spokane, Wash. Aqueous liquid fuel. 1,684,686; Sept. 18.

Reece, Joseph A., assignor to The Libbey-Owens Sheet Glass Company, Toledo, Ohio. Draw pot. 1,684,456; Sept. 18.

Reed, Arthur W., assignor of one-half to W. B. Tanner, Boston, Mass. Motor-vehicle surface sander. 1,684,806; Sept. 18.

Reid, Robert A., David City, Nebr. Bottle or similar article of manufacture. Des. 76,354; Sept. 18.

Reilly, Frank C., New York, N. Y. Brake system. 1,684,743; Sept. 18.

Reiner, Leo A., Detroit, Mich. Radiator-cap-locking device. 1,684,412; Sept. 18.

Remington Rand Inc. (See Lasker, William W., assignor.)

Renle, Gotthilf J., Lehi, N. Dak. Strain equalizer. 1,684,687; Sept. 18.

Republic Box Company, The. (See Trautman, Ernest, assignor.)
Resch, Oskar, Neustadt, near Coburg, Germany. Device for moving the eyes of dolls. 1,685,000; Sept. 18.
Reutter, Philip A., assignor to Scovill Manufacturing Company, Waterbury, Conn. Spring catch for vanity boxes. 1,684,413; Sept. 18.
Reynolds, John F., Pasadena, Calif. Grass catcher. 1,684,744; Sept. 18.
Reyrolle, A., & Company Limited. (See Coates, Frank, assignor.)
Ricard, Christy, Woonsocket, R. I. Self-threading shuttle. 1,684,780; Sept. 18.
Ricard, Christy, Woonsocket, R. I. Self-threading shuttle. 1,684,781; Sept. 18.
Rice, Harold G., Chicago, Ill. Christmas-tree stand. 1,684,970; Sept. 18.
Rice, Willis B., New York, N. Y., assignor to American Sales Book Company, Limited, Toronto, Canada. Autographic register. 1,684,553; Sept. 18.
Rider, Douglas, assignor to Thermal Industrial and Chemical (T. I. C.) Research Company Limited, London, England. Dehydration and distillation of tars or oils. 1,685,034; Sept. 18.
Ridgway, Lat, Canon, Ga. Pantograph. 1,684,887; Sept. 18.
Riefenstahl, Gustav, Berlin-Treptow, assignor to Deutsche Gold- und Silberscheideanstalt, Frankfort-on-the-Main, Germany. Protective sheath for flexible shafts. 1,684,554; Sept. 18.
Ringler, William A., Philadelphia, Pa., assignor to Globe-Wernicke Company, Cincinnati, Ohio. Visible index-card system. 1,684,807; Sept. 18.
Ritholz, Benjamin D., assignor to National Watch & Jewelry Co., Chicago, Ill. Eye tester. 1,684,555; Sept. 18.
Ritz Woller, Olive C., Chicago, Ill. Automobile step plate. 1,684,613; Sept. 18.
Roach, Finis E., Chicago, Ill. Coupling for conduits. 1,684,516; Sept. 18.
Roberts, Charles W., jr., Nyack, N. Y. Adjustable locking device for valves and the like. 1,684,745; Sept. 18.
Roberts, Jack A. (See Giles, I. F., and Roberts.)
Roberts, Thomas, Haverhill, Mass. Shoe. Des. 76,355; Sept. 18.
Robertson, Douglas, Nuriootpa, South Australia, Australia. Attachment of motor-vehicle road springs. 1,685,005; Sept. 18.
Robertson, William E., Reading, Pa. High-speed transportation system. 1,685,035; Sept. 18.
Rogers, Walter F., Chicago, Ill. Oven door. 1,684,808; Sept. 18.
Rose, Alexander D., assignor to Jas. P. Marsh & Company, Chicago, Ill. Dial. 1,684,598; Sept. 18.
Rosenberg, David H., Medford, Oreg. Fruit-box pad and lining. 1,684,556; Sept. 18.
Rosholt, Thorman W., Company. (See Rosholt, T. W., and Cederstrom, assignors.)
Rosholt, Thorman W., and H. Cederstrom, assignors to Thorman W. Rosholt Company, Minneapolis, Minn. Measuring apparatus for paving machines. 1,684,971; Sept. 18.
Rubinstein, Hans, Vienna, Austria. Manufacture of double carbonate of sodium and magnesium. 1,684,782; Sept. 18.
Rudolph, Wilhelm, and G. Wolff, assignors to Signal Gesellschaft mit beschränkter Haftung, Kiel, Germany. Submarine direction finder. 1,684,848; Sept. 18.
Rüggeberg, Carl E., Remscheid, Germany. Device for firmly attaching exchangeable blades to hose, mattocks, or the like. 1,684,849; Sept. 18.
Rundqvist, Thore R. E., Claremont, N. H., assignor to Sullivan Machinery Company. Drilling mechanism. 1,684,888; Sept. 18.
Russ, Charles L., Little Rock, Ark. Double-acting drawer and slide therefor. 1,684,889; Sept. 18.
Russon, Harry R., Akron, assignor of one-half to W. C. McCoy, Cleveland, Ohio. Variometer dial. 1,684,972; Sept. 18.
Ryan, Daniel J., assignor to The Cleveland Trust Company, Cleveland, Ohio. Mold. 1,684,715; Sept. 18.
Ryan, Walter D., Schenectady, N. Y. Headlight. 1,684,688; Sept. 18.
Ryder, Elmer, Berwyn, Ill. Motor-vehicle heater. 1,684,599; Sept. 18.
Rydquist, Adolph, Rochester, N. Y. Can-opening machine. 1,684,414; Sept. 18.
Sakurai, Sueo. (See Suzuki, T., and Sakurai.)
Salt Production Syndicate Limited, The. (See Zalocostas, Demetrius G., assignor.)
Samson, Henry L., New York, N. Y. Paper-napkin holder. 1,684,517; Sept. 18.
Sandin, Maurits J., Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Fuse mechanism. 1,684,518; Sept. 18.
Sanford, Roy S., South Bend, Ind., assignor to Bendix Brake Company, Chicago, Ill. Brake-pressure gauge. 1,684,639; Sept. 18.
Saunders, Addison T., Akron, Ohio, assignor to A. G. Spalding & Bros., New York, N. Y. Game ball. 1,684,557; Sept. 18.
Schade, Frank W. (See Lamb, J. F., and Schade.)
Schaf, Joseph C., jr., Indianapolis, Ind. Universal holding carriage for test stands and lathes. 1,684,600; Sept. 18.
Scheerbarth, Friedrich W. M. L., Altona-Bahrenfeld, Germany. Apparatus for automatic regulation of different wave-lengths for wireless receivers. 1,684,519; Sept. 18.
Schimek, Joseph F., Worcester, assignor, by mesne assignments, to Whitin Machine Works, Whitinsville, Mass. Method of and apparatus for transferring carded material. 1,684,890; Sept. 18.
Schlage Lock Company. (See Huffman, Louis, assignor.)
Schmidt, Otto, K. Seydel, and A. Feller, Ludwigshafen-on-the-Rhine, assignors to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany. Purifying organic compounds containing oxygen. 1,684,640; Sept. 18.
Schriver, Flavius R., Wilkinsburg Borough, Pa. Container closure. 1,684,415; Sept. 18.
Schroeder, Anthony, assignor of one-half to J. M. Finney, Cleveland, Ohio. Metal container. 1,684,891; Sept. 18.
Schultz, Fred M., Detroit, Mich. Automatic safety latch. 1,685,057; Sept. 18.
Schultz, George W., Bowers, Pa. Engine exhaust. 1,685,006; Sept. 18.
Schwabacher, Leo H., et al., trustees. (See Lyons, James, jr., assignor.)
Schwartz, William, St. Louis, Mo. Skylight. 1,684,641; Sept. 18.
Schwarz, Emil P., St. Paul, Minn., assignor to Seeger Refrigerator Company. Removable drain pan for refrigerators. 1,684,558; Sept. 18.
Schweitzer, Edmund O., Chicago, Ill. Lighting fixture. 1,684,416; Sept. 18.
Schweitzer, Hugo, Wiesdorf, near Cologne, and W. Neelmeier, Leverkusen, near Cologne, Germany, assignors to Grasselli Dyestuff Corporation, New York, N. Y. Aminodiarylsulphonpyrazolone azodyestuffs. 1,685,071; Sept. 18.
Schweyer, Daniel H., Easton, Pa. Air-brake apparatus. 1,684,559; Sept. 18.
Schwindenhammer, Albert, Peoria, Ill. Wire reel. 1,685,007; Sept. 18.
Scofield, Theodore J. (See Sparks, W., Scofield, Johnson, and Billig.)
Scott, Harry T., Los Angeles, Calif. Rear-sight mirror. 1,684,560; Sept. 18.
Scovill Manufacturing Company. (See Reutter, Philip A., assignor.)
Seaholm, Ernest W., and H. J. Earl, assignors to General Motors Corporation, Detroit, Mich. Radiator shell. Des. 76,356; Sept. 18.
Sears, Sterling G., Brooklyn, assignor, by mesne assignments, to Naylor Radio Corporation, New York, N. Y. Contact-protecting means for vacuum tubes. 1,684,973; Sept. 18.
Seeger, Gustave R. (See Seeger, Walter G. and G. R.)
Seeger Refrigerator Company. (See Schwarz, Emil P., assignor.)
Seeger Refrigerator Company. (See Seeger, Walter and G. R., assignors.)
Seeger Refrigerator Company. (See Swedman, Enoch, assignor.)
Seeger, Walter G. and G. R., St. Paul, Minn., assignors to Seeger Refrigerator Company. Refrigerator. 1,684,716; Sept. 18.
Servo-Paper Corporation. (See Morris, Elmer C., assignor.)
Seydel, Karl. (See Schmidt, O., Seydel, and Feller.)
Shaffer, Ernest J., Tulsa, Okla. Spider for sucker rods and the like. 1,684,974; Sept. 18.
Sharp, John E., New Kensington, assignor to Aluminum Company of America, Pittsburgh, Pa. Applying closure caps to containers. 1,684,892; Sept. 18.
Sharp, William L., assignor to The Ohio Foundry and Manufacturing Co., Steubenville, Ohio. Gas burner. 1,684,457; Sept. 18.
Shelton, William G., St. Louis, Mo. Hair-waving equipment. 1,684,642; Sept. 18.
Shepard, Oscar F., Cincinnati, Ohio. Chain transmission for elevator devices. 1,684,520; Sept. 18.
Sherbino, Morton R., Detroit, Mich., assignor to Hydraulic Brake Company, Los Angeles, Calif. Nonexpansible hose. 1,684,717; Sept. 18.
Sherbino, Morton R., Detroit, Mich., assignor to Hydraulic Brake Company, Los Angeles, Calif. Making nonexpansible hose. 1,684,718; Sept. 18.
Shields, A. Graham. (See Noyes, Harry W., assignor.)
Shoemaker, Bernard M., Jamaica, assignor to William Demuth & Company, New York, N. Y. Pen stand. Des. 76,357; Sept. 18.
Shonnard, Harold W., Upper Montclair, N. J., assignor to Elevator Supplies Company. Elevator door. 1,684,719; Sept. 18.
Shonnard, Harold W., Montclair, N. J., assignor to Elevator Supplies Company, Inc. Door opening and closing means. 1,684,893; Sept. 18.
Shpater, David, Brooklyn, N. Y. Fan attachment for sewing machines. 1,684,601; Sept. 18.
Signal Gesellschaft mit beschränkter Haftung. (See Rudolph, W., and Wolff, assignors.)
Silberman, Harry A., Jersey City, N. J. Dentist's kit and instrument support. 1,684,417; Sept. 18.
Simmons Company. (See O'Conor, Cornelius C., assignor.)
Simmons Glare Shield Company. (See Simmons, William A., assignor.)
Simmons, William A., assignor to Simmons Glare Shield Company, Eldon, Mo. Glare shade. 1,684,418; Sept. 18.

Simon, William J., Brooklyn, assignor to L. D. Bloch & Company, New York, N. Y. Handle for a smoking table. Des. 76,358; Sept. 18.
Simonds-Dayton, A. A., Company, The. (See Simonds, Herbert R., assignor.)
Simonds, Herbert R., assignor to The A. A. Simonds-Dayton Company, Dayton, Ohio. Roll for beating engines. 1,684,521; Sept. 18.
Simpson, Robert M., jr., Chicago, Ill. Odometer. 1,684,928; Sept. 18.
Skinner Automotive Device Co. (See Woodward, Arthur A., assignor.)
Skinner, Stephen G., Los Angeles, Calif., assignor, by mesne assignments, to Trico Products Corporation, Buffalo, N. Y. Windshield cleaner. 1,684,850; Sept. 18.
Slepian, Joseph, Swissvale, Pa., assignor to Westinghouse Electric & Manufacturing Company. Sound-generating device. 1,684,975; Sept. 18.
Slick, Edwin E., Pittsburgh, Pa. Making cold-rolled articles. 1,684,643; Sept. 18.
Sloan, John F., Peoria, Ill. Thermal-cut-out construction. 1,684,522; Sept. 18.
Smiley, Samuel, jr., assignor to The Globe-Wernicke Company, Cincinnati, Ohio. Post anchor. 1,684,894; Sept. 18.
Smith, Andrew W., Des Moines, Iowa. Toilet-powder applicator. 1,684,644; Sept. 18.
Smith, Archibald G., Buffalo, N. Y. Partition for containers. 1,684,458; Sept. 18.
Smith, Benjamin H., Swissvale, A. L. Atherton, and E. H. Greibach, Pittsburgh, Pa. Toy transformer. 1,684,746; Sept. 18.
Smith, Irving B., Ambler, and E. A. Keeler, Norristown, assignors to Leeds & Northup Company, Philadelphia, Pa. Ion concentration control. 1,684,645; Sept. 18.
Smotzer, Michael C., Coshocton, Ohio, and J. A. Byers, assignors to James B. Clow & Sons, Chicago, Ill. Centrifugal casting machine and method of casting. 1,684,419; Sept. 18.
Snavely, Clarence S., Pittsburgh, assignor to The Union Switch & Signal Company, Swissvale, Pa. Magnetic apparatus. 1,684,929; Sept. 18.
Snavely, Frank B., Santa Monica, Calif. Weather strip. 1,684,646; Sept. 18.
Snyder, Garlen I., Indianapolis, Ind. Paper holding and advancing mechanism. 1,684,689; Sept. 18.
Sollie, Sigurd A. (See Kolster, F. A., and Sollie.)
Sonner, Philip J., Winfield, Kans. Gas burner. 1,684,647; Sept. 18.
Souther, Benjamin L., Pittsburgh, and W. A. Gruse, Wilkinsburg, assignors to Gulf Refining Company, Pittsburgh, Pa. Treating slack wax. 1,685,008; Sept. 18.
Souther, Benjamin L., Pittsburgh, and W. A. Gruse, Wilkinsburg, assignors to Gulf Refining Company, Pittsburgh, Pa. Treating slack wax. 1,685,058; Sept. 18.
Southern Textile Machinery Company. (See Neikirk, Walter M., assignor.)
Spalding, A. G., & Bros. (See Saunders, Addison T., assignor.)
Sparks, William, T. J. Scofield, L. E. Johnson, and F. W. Billig, assignors to the Sparks-Withington Company, Jackson, Mich. Signaling device. 1,684,895; Sept. 18.
Sparks-Withington Company The. (See Billig, Fred W., assignor.)
Sparks-Withington Company, The. (See Sparks, W., Scofield, Johnson, and Billig, assignors.)
Spear, Roy, Titusville, Fla. Ear ornament. 1,684,783; Sept. 18.
Speir, Seaborn J., Austin, assignor of one-half to F. W. Menking, Fayetteville, Tex. Wire clamp and insulator holder. 1,685,009; Sept. 18.
Sperry Development Company. (See Sperry, Elmer A., assignor.)
Sperry, Elmer A., Brooklyn, N. Y., assignor to Sperry Development Company, Dover Green, Del. Cooling means for internal-combustion engines. 1,684,809; Sept. 18.
Sperry Gyroscope Company, The. (See Bassett, Preston R., assignor.)
Spilman, Oliver P., Houston, Tex. Tension and physiotherapy table. 1,684,459; Sept. 18.
Spitzer, Alexander, Brooklyn N. Y. Toy game device. 1,684,602; Sept. 18.
Sprinkle, Lake H., Brooklyn, N. Y. Artificial tooth. 1,685,523; Sept. 18.
Stanczyk, Stanley, Lynn, Mass. Torch. 1,684,524; Sept. 18.
Standard Electric Manufacturing Co., The. (See Parker, Thomas L., assignor.)
Standard Oil Company of California. (See Cullen, F. J., Binder, and Harshman, assignors.)
Standard Oil Company of California. (See Halloran, Ralph A., assignor.)
Standard Vending Corporation. (See O'Neil, Matthew G., assignor.)
Stebler, Fred, Riverside, Calif. Fruit scrubber. 1,684,896; Sept. 18.
Stedwell, George W., Brooklyn, N. Y., assignor to Liquid Dispensing Systems, Inc. Liquid-delivery system. 1,685,036; Sept. 18.
Steger, Alex., Vining, Minn. Antiglare shield for vehicles. 1,684,690; Sept. 18.
Steinmüller, Firma L. & C. (See Steinmüller, Lebrecht, assignor.)
Steinmüller, Lebrecht, Gummersbach, assignor to Firma L. & C. Steinmüller, Gummersbach, Rheinland, Germany. Water-tube boiler. 1,684,691; Sept. 18.
Stennard, Dorothy, Palo Alto, Calif. Doll. Des. 76,359; Sept. 18.
Stephenson, Henry L., Buffalo, N. Y. Valve. 1,684,603; Sept. 18.
Stickley, Leopold, and G. I. Taylor, Syracuse, assignors to Stickley Manufacturing Company, Eastwood, N. Y. Convertible bed. 1,684,851; Sept. 18.
Stickley Manufacturing Company. (See Stickley, L., and Taylor, assignors.)
Stimpson, Edwin B., assignor to Edwin B. Stimpson Company, Brooklyn, N. Y. Feed mechanism. 1,684,747; Sept. 18.
Stimpson, Edwin B., Company. (See Stimpson, Edwin B., assignor.)
Stinson, Richard, Gardner, assignor to Heywood-Wakefield Company, Boston, Mass. Baby carriage. 1,684,930; Sept. 18.
Stock Motorpflug Aktiengesellschaft. (See Jereczek, Viktor, assignor.)
Stoessel, Loretta, Ottumwa, Iowa. Cushion covering for mop handles. 1,684,604; Sept. 18.
Stokes and Smith Company. (See Nitsch, C. H., and Baker, assignors.)
Strasmich, Ethel. (See Bass, Archie E., assignor.)
Stratford, Herbert R., assignor to The Stratmore Company, Cleveland, Ohio. Surfacing disk. 1,684,748; Sept. 18.
Stratmore Company, The. (See Stratford, Herbert R., assignor.)
Studebaker Corporation, The. (See Link, Vincent, assignor.)
Studebaker Corporation, The. (See Newcomb, Edward C., assignor.)
Sullivan, Charles T., Cassody, Kans. Corn binder. 1,684,561; Sept. 18.
Sullivan Machinery Company. (See Cartlidge, Frank, assignor.)
Sullivan Machinery Company. (See Gartin, Elmer G., assignor.)
Sullivan Machinery Company. (See Rundqvist, Thore R. E., assignor.)
Sun Typewriter Company. (See Nemcovsky, Louis A., assignor.)
Sutherland, William T., Chicago, Ill. Tire cover. 1,684,420; Sept. 18.
Suzuki, Tsuneo, and S. Sakurai, assignors to Zaidan Hojin Rikagaku Kenkyujo, Tokyo, Japan. Producing a new acid and its salts strongly absorbing ultra-violet rays. 1,684,562; Sept. 18.
Swedman, Enoch, St. Paul, Minn., assignor to Seeger Refrigerator Company. Refrigerator. 1,684,563; Sept. 18.
Syracuse Industrial Gas Co. (See Henderson, Nelson H., assignor.)
Tabulating Machine Company, The. (See Ford, Eugene A., assignor.)
Tagliabue, Charles J., Mfg. Co. (See Bast, Frank J., assignor.)
Tait, John, Port Chalmers, New Zealand. Steam generator and the like. 1,684,976; Sept. 18.
Tanner, Walter B. (See Reed, Arthur W., assignor.)
Taylor, Edward M. (See Heald, R. A., Highberg, and Taylor.)
Taylor, Grant I. (See Stickley, L., and Taylor.)
Techmer, Ewald F., Chicago, Ill. Building construction. 1,684,605; Sept. 18.
Teich, Maurice, Peekskill, N. Y. Device for inspecting tires. 1,685,038; Sept. 18.
Tennhardt, Elsa, New York, N. Y., assignor to E. & J. Bass, Inc. Mirror back or similar article. Des. 76,360; Sept. 18.
Tennhardt, Elsa, New York, N. Y., assignor to E. & J. Bass, Inc. Mirror back or similar article. Des. 76,361; Sept. 18.
Tennhardt, Elsa, New York, N. Y., assignor to Alfred Vester Sons Inc., Providence, R. I. Cigar lighter. Des. 76,362; Sept. 18.
Tennhardt, Elsa, New York, N. Y., assignor to Alfred Vester Sons Inc., Providence, R. I. Cigar lighter. Des. 76,363; Sept. 18.
Theobalds, Reginald O. P., St. Mary Bourne, near Andover, England. Domestic fireplace. 1,684,749; Sept. 18.
Thermal Industrial and Chemical (T. I. C.) Research Company Limited. (See Rider, Douglas, assignor.)
Thielen, Edward A., Dorrance, Kans. Hoist. 1,684,606; Sept. 18.
Thielen, Edward A., Dorrance, Kans. Hoist. 1,684,607; Sept. 18.
Thomas, Alfred J., Braintree, Mass., assignor, by mesne assignments, to B. W. Freeman, Cincinnati, Ohio. Die press. Re17,085; Sept. 18.
Thomasson, Charles H., Richmond, Va. Heater. 1,684,750; Sept. 18.
Thompson, Harry W. (See Pickett, R. C., and Thompson.)
Thompson, Ross C., Englewood, Colo. Mop. 1,684,460; Sept. 18.
Thompson, Willis D., assignor of one-fourth to C. H. Crawford, Spokane, Wash. Incasing edibles and incased edibles. 1,684,421; Sept. 18.
Thomson, Alfred M., Newark, N. J., assignor to J. Mercadante, New York, N. Y. Refrigerating apparatus. 1,684,810; Sept. 18.

Thornton, John E., West Hampstead, London, England. Spool case for cameras and for cinematograph and similar projection apparatus. 1,685,010; Sept. 18.
Thumann, Henry F., Redfield, Ark. Roost. 1,684,608; Sept. 18.
Thurston, Herman B., Cleveland Heights, Ohio. Low-water alarm. 1,684,897; Sept. 18.
Timbs, Edward. (See Faulkner, D. S., and Timbs.)
Tingberg, Anders, Skien, Norway. Hair-undulating tongs. 1,684,648; Sept. 18.
Tocchio, Michele, Hammersmith, London, England. Kettle and the like. 1,684,811; Sept. 18.
Tolman, Edgar B., jr., Chicago, Ill. Conveying apparatus. 1,684,649; Sept. 18.
Tomarin, Marcus, Chicago, Ill. Forming cement blocks. 1,684,525; Sept. 18.
Toomey, John F., New York, N. Y., assignor to American Telephone and Telegraph Company. Monitoring and controlling circuits for program distribution. 1,684,422; Sept. 18.
Toppe, Friedrich W. H., Schwartau, near Lubeck, Germany. Weel made of netting. 1,684,564; Sept. 18.
Tost, Charles R., Centerdale, assignor to The Hadley Company, Providence, R. I. Link strap. 1,684,977; Sept. 18.
Trautman, Ernest, Lakewood, assignor to The Republic Box Company, Cleveland, Ohio. Bottle crate. 1,684,898; Sept. 18.
Trico Products Corporation. (See Skinner, Stephen G., assignor.)
Tubular Products Company, The. (See Lewis, Ernest C., assignor.)
Tucker, Emmitt M. (See Tucker, Jesse D. and E. M.)
Tucker, Jesse D. and E. M., Sacramento, Calif. Shim drift. 1,684,526; Sept. 18.
Tufts, Lesley R. (See Olson, A., and Tufts.)
Tugeddhat, Robert G., assignor, by mesne assignments, to Baker Perkins Company, Inc., Saginaw, Mich. Baking apparatus. 1,684,751; Sept. 18.
Turner, Griffin P., and H. U. Huff, Chattanooga, Tenn. Booster plate for automobile radiator ornament or similar articles. Des. 76,364; Sept. 18.
Tursky, Charles M. (See Whaley, W. B. S., Muller, and Tursky.)
Tuttle, George H., assignor to The Packard Electric Company, Warren, Ohio. Tap changer. 1,684,650; Sept. 18.
Tweedie, Charles, Jefferson City, Mo. Overgaiter. 1,684,812; Sept. 18.
U. S. Tool Company. (See Woods, Walter T., assignor.)
Underwood Elliott Fisher Company, The. (See Dobson, William A., assignor.)
Union Draft Gear Company. (See Cotton, Walter H., assignor.)
Union Special Machine Company. (See Willis, Harry L., assignor.)
Union Switch & Signal Company, The. (See Snavely, Clarence S., assignor.)
United Engineering and Foundry Company. (See Biggert, Florence C., jr., assignor.)
United Engineering & Foundry Company. (See Johnson, Lane, assignor.)
United Shoe Machinery Corporation. (See Goddu, George, assignor.)
United States Chain & Forging Company. (See McGowen, William R., assignor.)
Urban, Joseph P., assignor to Detroit Concrete Receptacle Company, Detroit, Mich. Mold. 1,684,978; Sept. 18.
Valentour, August, McDonald, Pa. Acetylene-gas generator. 1,684,979; Sept. 18.
Valley Electric Company. (See Ballman, Edwin C., assignor.)
Valley Electric Company. (See Bullivant, Francis J., assignor.)
Van Bloem, Paul S., Great Neck, assignor to Viking Products Corporation, New York, N. Y. Elevator signal panel. Des. 76,365; Sept. 18.
Van Derbeck, Stephen G., Hackensack, N. J. Windshield wiper. 1,685,037; Sept. 18.
Van Deventer, Harry R., assignor to Dubilier Condenser Corporation, New York, N. Y. Electrical device. 1,684,461; Sept. 18.
Vellasaropulos, John, executor. (See Zalocostas, Demetrius G.)
Verona Tool Works. (See Endsley, Louis E., assignor.)
Vester, Alfred Sons, Inc. (See Tennhardt, Elsa, assignor.)
Viking Products Corporation. (See Van Bloem, Paul S., assignor.)
Voorhees, Gardner T., Boston, Mass. Process and apparatus for refrigeration. 1,684,423; Sept. 18.
Vortex Mfg. Co., The. (See Barbieri, Cesare, assignor.)
Wagner, Lawson L., Baltimore, Md. Automobile headlight. 1,684,720; Sept. 18.
Waldorf Paper Products Company. (See Boeye, Paul F., assignor.)
Walker, William D., Sacramento, Calif. Set of dice. 1,684,609; Sept. 18.
Waller, Colby C., New York, N. Y. Coated metallic articles such as stereotypic plates and producing same. 1,684,565; Sept. 18.
Walper, Curry O., Detroit, Mich. Wall-board reenforcement. 1,684,899; Sept. 18.
Ward, John P., Cleveland, and R. E. Hyde, Cleveland Heights, assignors of one-third to H. J. Green, Cleveland, Ohio. Car-door lock. 1,684,980; Sept. 18.
Ward, Willis C., Orchard Lake, Mich. Game. 1,684,813; Sept. 18.
Ware Radio, Inc. (See Blatterman, Albert S., assignor.)
Warner, Frank E., Seattle, Wash. Folding box. 1,684,931; Sept. 18.
Waters, Charles B., Montclair, N. J. Automobile circulation and heating system. 1,684,900; Sept. 18.
Watkinson, Frederick J., assignor of one-half to J. N. Ratcliffe, Strathroy, Ontario, Canada. Door fastener. 1,684,814; Sept. 18.
Wayman, Charles A. G., and A. F. Gartz, jr., assignors to Crane Co., Chicago, Ill. Valve. 1,684,651; Sept. 18.
Weatherhead, Albert J., jr., Cleveland, Ohio. Uniting metal parts together. 1,684,932; Sept. 18.
Webking, Roy F. M., Bondi, near Sydney, New South Wales, Australia. Liquid-measuring apparatus. 1,684,785; Sept. 18.
Weightograph Company, The. (See Hamblin, Fred B., assignor.)
Weir, Lela B., Los Angeles, Calif. Adjustable hat lining. 1,684,610; Sept. 18.
Weller, Charles J., Coulee, Wash. Wire clamp. 1,684,784; Sept. 18.
Wells, William F., Chicago, Ill. Bone saw. 1,684,815; Sept. 18.
Werby, A. Benjamin, Newton, assignor to American Automotive Corporation, Boston, Mass. Electrolyte for storage batteries. 1,684,852; Sept. 18.
Western Electric Company. (See Bouvier, George A., assignor.)
Western Electric Company. (See Hubbard, Francis A., assignor.)
Western Electric Company. (See Kochendorfer, Frederic S., assignor.)
Western Electric Company. (See Mason, Warren P., assignor.)
Western Electric Company. (See Nicolson, Alexander M., assignor.)
Western Electric Company. (See O'Donnell, Thomas E., assignor.)
Western Supplies Co. (See Woodworth, Roy V., assignor.)
Westinghouse Electric & Manufacturing Company. (See Morgan, David W. R., assignor.)
Westinghouse Electric & Manufacturing Company. (See Sandin, Maurits J., assignor.)
Westinghouse Electric & Manufacturing Company. (See Slepian, Joseph, assignor.)
Whaley Engine Patents, Inc. (See Whaley, W. B. S., Muller, and Tursky, assignors.)
Whaley, William B. S., New York, C. A. Muller, Brooklyn, and C. M. Tursky, assignors of two-thirds to Whaley Engine Patents, Inc., New York, N. Y., and one-third to said Muller. Valve mechanism. 1,684,424; Sept. 18.
Wheeler, Wellington B., El Segundo, Calif. Semirigid airship. 1,684,425; Sept. 18.
White, Edward A., Lewiston, Idaho. Motion storage apparatus. 1,684,853; Sept. 18.
White, Harold E., Anniston, assignor to Federal Abrasives Company, Birmingham, Ala. Electric furnace for producing silicon carbide. 1,684,611; Sept. 18.
White, John W., Detroit, Mich. Axle and bearing therefor. 1,684,652; Sept. 18.
White, Paul H., Indianapolis, Ind. Cotton picker. 1,684,981; Sept. 18.
Whitin Machine Works. (See Schimek, Joseph F., assignor.)
Wicaco Screw & Machine Works, Inc. (See Lawser, Charles W., assignor.)
Widmann, Eugene A., Brooklyn, N. Y., and F. D. Lewis, West Orange, N. J., assignors, by mesne assignments, to Pathe Phonograph & Radio Corporation, Radio attachment for talking machines. 1,684,933; Sept. 18.
Wildman Mfg. Co. (See Howie, Kenneth, assignor.)
Wiles, Everett R., Barnsdall, Okla. Treating petroleum products. 1,684,426; Sept. 18.
Wilhelm, Russell H., Easton, Pa., assignor to Ingersoll-Rand Company, Jersey City, N. J. Blowing device. 1,684,752; Sept. 18.
Willett, Benedict E., Dayton, Ohio. Foldable table. 1,684,653; Sept. 18.
Willis, Harry L., assignor to Union Special Machine Company, Chicago, Ill. Thread cutter for sewing machines. 1,684,612; Sept. 18.
Wilmot, Ruth, assignor to R. H. Macy & Co., Inc., New York, N. Y., Box-wrapping paper. Des. 76,366; Sept. 18.
Winkler, Moses H., Meridian, Miss. Ten-yard line. 1,684,566; Sept. 18.
Wireless Specialty Apparatus Company. (See Hoyt, Reginald H., assignor.)
Wolff, Gustav. (See Rudolph, W., and Wolff.)
Wood, Andrew T., San Francisco, Calif. Clothespin. 1,684,721; Sept. 18.
Wood, Henry A. W., assignor to Wood Newspaper Machinery Corporation, New York, N. Y. Folder. 1,684,901; Sept. 18.
Wood Newspaper Machinery Corporation. (See Wood, Henry A. W., assignor.)
Wood, Rodney J., Dayton, Ohio. Filing cabinet. 1,685,011; Sept. 18.

Woodcraft Company, The. (See Allemeier, Henry, assignor.)
Woods, Walter T., assignor to U. S. Tool Company, Long Beach, Calif. Mounting for cutters of rotary well-drilling disk bits. 1,684,462; Sept. 18.
Woodward, Arthur A., assignor to Skinner Automotive Device Co., Inc., Detroit, Mich. Lubrication of single-sleeve engines. 1,684,463; Sept. 18.
Woodward, Kenneth N., trustee. (See Bobbs, Arthur L., assignor.)
Woodworth, Roy V., assignor to Western Supplies Co., St. Louis, Mo. Cutting die. 1,684,984; Sept. 18.
Woolson, Lionel M., assignor to Packard Motor Car Company, Detroit, Mich. Mixture-forming means for internal-combustion engines. 1,684,902; Sept. 18.
Wragg, Charles A., assignor of one-half to L. H. Crook, Washington, D. C. Propeller. 1,684,567; Sept. 18.
Wright, William, assignor to Midway Railway Equipment Co., Chicago, Ill. Pipe-hanger anchor and the like. 1,685,039; Sept. 18.
Yager, Harvey J., Seattle, Wash. Collapsible and portable core form. 1,685,012; Sept. 18.
Yates-American Machine Company. (See Young, Earl R., assignor.)
Yerkes, John A., and R. H. Lemmon, Long Beach, Calif. Valve-seat-grinding machine. 1,684,854; Sept. 18.
Yosgatt, Apcar, Hoboken, N. J. Sole clamp. 1,684,427; Sept. 18.
Young, Arthur L., Providence, R. I. Blank-bending machine. 1,684,903; Sept. 18.
Young, Earl R., assignor to Yates-American Machine Company, Beloit, Wis. Sanding machine. 1,684,464; Sept. 18.
Young, John M., Brooklyn, assignor to American Can Company, New York, N. Y. Container. 1,684,722; Sept. 18.
Zaidan Hojin Rikagaku Kenkyujo. (See Suzuki, T., and Sakural, assignors.)
Zalocostas, Andrianne, executrix. (See Zalocostas, Demetrius G.)
Zalocostas, Demetrius G., deceased, by A. Zalocostas, Bondi, near Sydney, executrix, and J. Velissaropulos, Belleview Hill, near Sydney, executor, assignors to The Salt Production Syndicate Limited, Sydney, New South Wales, Australia. Extraction of salts from aqueous solutions. 1,684,935; Sept. 18.
Zareko, Walter, Natural Bridge, N. Y. Merchandise-display device. 1,684,753; Sept. 18.
Zbinden, Ernst, assignor to Hasler A.-G. vormals Telegraphenwerkstatte von G. Hasler, Bern, Switzerland. Lubricating apparatus for flanged wheels. 1,685,040; Sept. 18.

ALPHABETICAL LIST OF INVENTIONS

FOR WHICH

PATENTS WERE ISSUED ON THE 18TH DAY OF SEPTEMBER, 1928.

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice). **Includes patents, reissues, and designs.**

Acetylene-gas generator. A. Valentour. 1,684,979; Sept. 18.
Acid and its salts strongly absorbing ultra-violet rays, Producing a new. T. Suzuki and S. Sakurai. 1,684,562; Sept. 18.
Acoustic system. A. M. Nicolson. 1,684,408; Sept. 18.
Adhesive, Meltable. E. D. Lord. 1,684,873; Sept. 18.
Advertising device. H. L. Campbell. 1,684,534; Sept. 18.
Agricultural machine. J. A. Dirschauer. 1,684,861; Sept. 18.
Air-brake apparatus. D. H. Schweyer. 1,684,559; Sept. 18.
Aircraft. A. A. Anderson. 1,685,014; Sept. 18.
Aircraft. T. D. Kelly. 1,685,029; Sept. 18.
Air-ejector apparatus. D. W. R. Morgan. 1,684,406; Sept. 18.
Air heater. H. Baetz. 1,684,380; Sept. 18.
Air-regulating means for liquid-fuel furnaces. B. H. Noland. 1,685,031; Sept. 18.
Airship, Dirigible. R. P. Fox. 1,684,730; Sept. 18.
Airship, Semirigid. W. B. Wheeler. 1,684,425; Sept. 18.
Airspring with nonelastic fluid shock absorber. J. H. O'Neill. 1,685,077; Sept. 18.
Alarm: *See*—
Automobile alarm. Vehicle alarm.
Low-water alarm.
Alloy and making the same. A. L. Feild. 1,684,696; Sept. 18.
Aminodiarylsulphonpyrazolone azodyestuffs. H. Schweitzer. 1,685,071; Sept. 18.
Amusement device. A. B. Dewes. 1,684,535; Sept. 18.
Anchor and the like, Pipe-hanger. W. Wright. 1,685,039; Sept. 18.
Anchor, Post. S. Smiley, jr. 1,684,894; Sept. 18.
Animal trap. A. H. Gilkey. 1,684,484; Sept. 18.
Animal trap. F. G. Johnson. 1,685,028; Sept. 18.
Antirattling device for automobile doors. J. L. Day and E. L. Deschler. 1,684,662; Sept. 18.
Antirattling device for windows. J. H. Mendenhall. 1,684,636; Sept. 18.
Antiskid chains, Link for. E. La Plant. 1,684,632; Sept. 18.
Apparel, Wearing. J. M. I. Marin. 1,684,876; Sept. 18.
Article-forming device. R. Beardsley. 1,684,466; Sept. 18.
Ash receptacle or similar article. E. C. Lewis. Des. 76,349; Sept. 18.
Atomizer for liquids. F. Haeusser and R. Bestehorn. 1,684,488; Sept. 18.
Autographic register. W. B. Rice. 1,684,553; Sept. 18.
Automobile alarm. H. L. Honohan. 1,685,073; Sept. 18.
Automobile heater. N. A. Olund. 1,684,967; Sept. 18.
Axle and bearing therefor. J. W. White. 1,684,652; Sept. 18.
Back-space mechanism. J. H. Barr. 1,684,428; Sept. 18.
Bag: *See*—
Hand bag.
Bag closure. A. B. Fishwick. 1,684,793; Sept. 18.
Baking apparatus. R. G. Tugendhat. 1,684,751; Sept. 18.
Ball: *See*—
Game ball.
Banjo hand rest. J. and F. J. Laterra. 1,684,962; Sept. 18.
Bar: *See*—
Boring bar. Universal bar.
Base, Adjustable. H. A. Perlmutter. 1,684,925; Sept. 18.
Battery package, Dry-. H. R. C. Anthony. 1,684,856; Sept. 18.
Battery terminal and cable clamp. S. R. Garner, sr. 1,684,985; Sept. 18.
Bearing, Antifriction. J. F. O'Connor. 1,684,506; Sept. 18.
Bearing, Antifriction. J. F. O'Connor. 1,684,508–9; Sept. 18.
Bearing, Antifriction roller. J. F. O'Connor. 1,684,507; Sept. 18.
Bearing construction for float-arm shafts. J. Elge. 1,685,046; Sept. 18.
Bearing construction, Journal-. J. S. McWhirter. 1,684,405; Sept. 18.
Bearing structure and making same, Self-aligning. C. Claus. 1,684,984; Sept. 18.
Bearing with fluid friction, Thrust. G. K. Böhm. 1,684,693; Sept. 18.
Beating engines, Roll for. H. R. Simonds. 1,684,521; Sept 18.
Bed, Convertible. L. Stickley and G. I. Taylor. 1,684,851; Sept. 18.
Bell, Horn. E J. Gulick. 1,684,392; Sept. 18.
Binder, Corn. C. T. Sullivan. 1,684,561; Sept. 18.
Bisulphite liquor, Apparatus for making. J. D. Jenssen. 1,684,494; Sept. 18.
Blades to hoes, mattocks, or the like, Device for firmly attaching exchangeable. C. E. Rüggeberg. 1,684,849; Sept. 18.
Blank-bending machine. A. L. Young. 1,684,903; Sept. 18.
Blowing device. R. H. Wilhelm. 1,684,752; Sept. 18.
Board: *See*—
Ironing board.
Boats, Retractable float for flying. V. J. Burnelli 1,684,818; Sept. 18.
Body and chassis construction for motor vehicles. L. U. McAbee. 1,684,677; Sept. 18.
Boiler: *See*—
Water-tube boiler.
Booster plate for automobile radiator ornament or similar articles. G. P. Turner and H. U. Huff. Des. 76,364; Sept. 18.
Boring bar. H. H. Manning. 1,684,772; Sept. 18.
Bottle. J. H. Love. Des. 76,350; Sept. 18.
Bottle or similar article of manufacture. R. A. Reid. Des. 76,354; Sept. 18.
Bottle-washing apparatus. I. R. Hippenmeyer. 1,684,827; Sept. 18.
Box: *See*—
Folding box. Mail box.
Brace: *See*—
Chair-leg brace.
Bracket carrier for windshield deflectors. B. and H. Jassen. 1,684,493; Sept. 18.
Bracket for railway signals, Supporting. E. A. Everett. 1,684,953; Sept. 18.
Brake. V. Link. 1,684,547; Sept. 18.
Brake. E. C. Newcomb. 1,684,501; Sept. 18.
Brake and tractor device for tractor trailers, Hydraulic. C. H. Land. 1,684,836; Sept. 18.
Brake for railway cars, Hand. J. F. O'Connor. 1,684,505; Sept. 18.
Brake mechanism. A. F. Masury. 1,684,404; Sept. 18.
Brake pressure gauge. R. S. Sanford. 1,684,639; Sept. 18.
Brake shoe and making the same. C. D. Pettis. 1,684,883; Sept. 18.
Brake system. F. C. Reilly. 1,684,743; Sept. 18.
Breathing apparatus, Self-contained. A. B. Dräger. 1,684,664; Sept. 18.
Breech sight for ordnance and machine guns. K. Petschenig. 1,684,681; Sept. 18.
Brush. L. F. Exley. 1,684,481; Sept. 18.
Brush. W. Lapinoja. 1,684,631; Sept. 18.
Brush structure. J. M. Acheson. 1,684,855; Sept. 18.
Bucket for rotary pumps. W. W. McElrath. 1,685,003; Sept. 18.
Buckle. H. P. Baltzer. 1,684,786; Sept. 18.
Building construction. A. L. Bobbs. 1,684,387; Sept. 18.
Building construction. E. F. Techmer. 1,684,605; Sept. 18.
Building monolithic concrete underground structures. H. B. Arden. 1,684,816; Sept. 18.
Bumper, Vehicle. W. R. McGowen. Des. 76,352–3; Sept. 18.
Burner: *See*—
Gas burner. Oil burner.
Burner. R. Hoffman. 1,684,585; Sept. 18.
Cabinet, Commodity. J. L. Flannery. 1,684,913; Sept. 18.
Cabinet, Filing. R. J. Wood. 1,685,011; Sept. 18.
Cabinet for prescriptions, etc., Filing. J. F. Bartosh. 1,684,761; Sept. 18.
Cameras and for cinematograph and similar projection apparatus, Spool case for. J. E. Thornton. 1,685,010; Sept. 18.
Cameras, View finder for. T. F. Eastman. 1,684,821; Sept. 18.
Can-opening machine. A. Rydquist. 1,684,414; Sept. 18.
Can-spout-seal cutter. A. Jaeschke. 1,684,447; Sept. 18.
Cap and pipe clamp, Sanitary well. E. E. Honglund. 1,684,582; Sept. 18.
Car construction. W. Geiger. 1,684,537; Sept. 18.
Car-door lock. J. P. Ward and R. E. Hyde. 1,684,980; Sept. 18.
Cars, Safety device for motor. S. Nishida, M. Ota, and G. Inose. 1,684,776; Sept. 18.
Carrier: *See*—
Milk-bottle carrier.
Case: *See*—
Cigarette case. Vanity case.

Carbohydrate derivatives, Manufacture of. W. Harrison. 1,684,732; Sept. 18.
Carbon-monoxide-testing means and method. E. W. Hultman. 1,684,587; Sept. 18.
Carbonate of sodium and magnesium, Manufacture of double. H. Rubinstein. 1,684,782; Sept. 18.
Carbonization and distillation of wood, Apparatus for the. R. Malbay. 1,684,875; Sept. 18.
Carburetor. M. Mallory. 1,684,550; Sept. 18.
Carburetor. M. Mallory. 1,684,840; Sept. 18.
Cardcase and making the same. C. L'Enfant. 1,684,737; Sept. 18.
Card feeding and handling device. E. A. Ford. 1,684,389; Sept. 18.
Card-perforating machines, Carriage return and normalizing mechanism for. W. W. Lasker. 1,684,546; Sept. 18.
Carriage, Baby. R. Stinson. 1,684,930; Sept. 18.
Carriage for test stands and lathes, Universal holding. J. C. Schaf, jr. 1,684,600; Sept. 18.
Carton. H. Batkin. 1,684,385; Sept. 18.
Carton, Display. J. E. Ferguson and H. L. Mooney. 1,684,579; Sept. 18.
Case-washing machine. I. R. Hippenmeyer. 1,684,828; Sept. 18.
Cases, Constructing shipping. P. F. Boeye. 1,684,725; Sept. 18.
Casting articles of corrosionproof steel. F. Hauptmeyer. 1,684,700; Sept. 18.
Casting machine and casting, Centrifugal. M. C. Smotzer. 1,684,419; Sept. 18.
Casting under pressure, Apparatus for. E. Jorgen-Jensen. 1,684,994; Sept. 18.
Catalytic dehydrogenation. M. Luther, K. Pierch, and E. Kranepuhl. 1,684,634; Sept. 18.
Catch for vanity boxes, Spring. P. A. Reutter. 1,684,413; Sept. 18.
Cement blocks, Forming. M. Tomarin. 1,684,525; Sept. 18.
Cementing apparatus. S. E. Manning. 1,684,551; Sept. 18.
Chain track for motor vehicles. V. Jereczek. 1,684,918; Sept. 18.
Chain transmission for elevator devices. O. F. Shepard. 1,684,520; Sept. 18.
Chair cushion. J. E. Horn. 1,684,989; Sept. 18.
Chair-leg brace. J. Cerny. 1,684,727; Sept. 18.
Channel induction furnace Submerged. E. F. Northrup. 1,684,504; Sept. 18.
Chopper: *See*—
Cotton chopper.
Christmas-tree stand. H. G. Rice. 1,684,970; Sept. 18.
Cigarette case. J. F. Bahr. 1,684,381; Sept. 18.
Circulation and heating system, Automobile. C. B. Waters. 1,684,900; Sept. 18.
Clamp: *See*—
Clothes clamp. Sole clamp.
Hose clamp. Wire clamp.
Power clamp.
Clasp: *See*—
Lingerie clasp.
Clasp jaw for fur scarfs or the like. W. Greenberg. Des. 76,344; Sept. 18.
Cleaner: *See*—
Windshield cleaner.
Cleansing nicotine vapors. R. G. Newborne. 1,684,740; Sept. 18.
Closure caps to containers, Applying. J. E. Sharp. 1,684,892; Sept. 18.
Closure, Container. F. R. Schriver. 1,684,415; Sept. 18.
Clothes clamp, Bed. M. Harris. 1,6844,443; Sept. 18.
Clothespin. A. T. Wood. 1,684,721; Sept. 18.
Clutch. G. C. Carhart. 1,684,471; Sept. 18.
Coin-propelling device for vending machines. G. P. Grant. 1,684,863; Sept. 18.
Cold-rolled articles, Making. E. E. Slick. 1,684,643; Sept. 18.
Compressor, Lubricant, E. W. Davis. 1,684,946; Sept. 18.
Computing machine. H. L. Pitman. 1,684,515; Sept. 18.
Concentrating and amalgamating apparatus of the vertical type, Centrifugal. F. D. Lewis. 1,684,870; Sept. 18.
Concrete construction. H. P. Hayden. 1,684,624; Sept. 18.
Concrete during curing, Preventing evaporation from. H. P. Hayden. 1,684,671; Sept. 18.
Concrete, Manufacture of reenforced. R. E. Dill. 1,684,663; Sept. 18.
Concrete pipe, Method of and apparatus for forming. C. F. Buente. 1,684,858; Sept. 18.
Condenser. E. A. Johnsen. 1,684,959; Sept. 18.
Condenser, Adjustable. L. A. Hammarlund. 1,684,917; Sept. 18.
Condenser, Electrostatic. R. H. Hoyt. 1,684,491; Sept. 18.
Condenser, Variable. J. Lyons, jr. 1,684,964; Sept. 18.
Conduit and switch support for gasoline serving stations, Unitary. R. H. Olley. 1,684,777; Sept. 18.
Conduit connecter. J. E. Hill. 1,684,826; Sept. 18.
Conduit core, Collapsible. H. E. Lindas. 1,684,497; Sept. 18.
Container. J. F. Lamb and F. W. Schade. 1,684,899; Sept. 18.
Container. J. M. Young. 1,684,722; Sept. 18.
Container, Dispensing. A. E. Kunsl. 1,684,495; Sept. 18.
Container for annealing and similar purposes. J. B. Green. 1,684,391; Sept. 18.
Container for food products. F. E. Bickford. 1,684,938; Sept. 18.
Container for testing devices. L. P. Jackson. 1,684,769; Sept. 18.
Container, Metal. A. Schroeder. 1,684,891; Sept. 18.
Containers, Partition for. A. G. Smith. 1,684,458; Sept. 18.
Control and timing device, Form-roller. R. C. Pickett and H. W. Thompson. 1,685,033; Sept. 18.
Control, Door. H. Hubbell. 1,684,704; Sept. 18.
Control system, Automatic electric. B. H. Greene. 1,685,052; Sept. 18.
Controlling means, Prime-mover-. A. Pfau. 1,684,884; Sept. 18.
Conveying apparatus. E. B. Tolman, jr. 1,684,649; Sept. 18.
Cooling and ventilating device. F. L. Chatham. 1,684,474; Sept. 18.
Cooling means for internal-combustion engines. E. A. Sperry. 1,684,809; Sept. 18.
Copyholder. H. C. Binkele. 1,685,041; Sept. 18.
Core-drilling head. C. S. Clarke. 1,685,045; Sept. 18.
Core form, Collapsible and portable. H. J. Yager. 1,685,012; Sept. 18.
Cotton chopper. R. S. Moore. 1,684,711; Sept. 18.
Cotton picker. P. H. White. 1,684,981; Sept. 18.
Counterboring head. W. E. Pabst. 1,684,804; Sept. 18.
Counterflow treatment of petroleum oils. R. A. Halloran. 1,684,489; Sept. 18.
Coupler, Chain. M. J. Frambach. 1,684,580; Sept. 18.
Coupling: *See*—
Jump-ring coupling.
Coupling for bead chains. W. J. Gagnon. 1,685,048; Sept. 18.
Coupling for conduits. F. E. Roach. 1,684,516; Sept. 18.
Cover, Tire. W. T. Sutherland. 1,684,420; Sept. 18.
Cover with fastener, Box or casing. H. W. Clark. 1,684,983; Sept. 18.
Covering for mop handles, Cushion. L. Stoessel. 1,684,604; Sept. 18.
Crate, Bottle. E. Trantman. 1,684,898; Sept. 18.
Crossing, Railway highway. H. E. Muchnic. 1,684,924; Sept. 18.
Crucible, Centrifugal liquid. J. Maximoff and M. S. de Costa. 1,684,800; Sept. 18.
Crutch attachment. H. F. Frantz. 1,684,697; Sept. 18.
Curing device, Ham-. B. Hansen and P. J. Ramlon. 1,684,865; Sept. 18.
Cushion: *See*—
Chair cushion.
Cutter: *See*—
Can-spout-seal cutter.
Cutter of rotary well-drilling disk bits, Mounting for. W. T. Woods. 1,684,462; Sept. 18.
Cutting die. R. V. Woodworth. 1,684,934; Sept. 18.
Cylinder and tire gauge. H. P. Grohn. 1,684,864; Sept. 18.
Deaerating apparatus. O. Larsen. 1,684,834; Sept. 18.
Dehydration and distillation of tars or oils. D. Rider. 1,685,034; Sept. 18.
Dental articulator. A. Gysi. 1,684,393; Sept. 18.
Dentist's kit and instrument support. H. A. Silberman. 1,684,417; Sept. 18.
Dial. A. D. Rose. 1,684,598; Sept. 18.
Dial, Variometer. H. R. Russon. 1,684,972; Sept. 18.
Diaphragm-control mounting. C. M. Hayman. 1,684,701; Sept. 18.
Diathermy and galvanic ear set. D. B. Catlin. 1,684,859; Sept. 18.
Dice, Set of. W. D. Walker. 1,684,609; Sept. 18.
Die: *See*—
Cutting die.
Die press. A. J. Thomas. Re17,085; Sept. 18.
Direction indicator for automobiles. E. Guerrero and A. Grey. 1,684,916; Sept. 18.
Dish-forming machine, Sundae-. C. Barbieri. 1,684,465; Sept. 18.
Disk, Surfacing. H. R. Stratford. 1,684,748; Sept. 18.
Disk wheel. C. S. Johnston. 1,684,398; Sept. 18.
Dispensing device. C. W. Hartwig. 1,684,623; Sept. 18.
Dispensing device, Sanitary. E. C. Morris. 1,684,877; Sept. 18.
Dispensing lubricating oils, Apparatus for. H. R. Newman. 1,684,879; Sept. 18.
Display device, Merchandise-. W. Zareko. 1,684,753; Sept. 18.
Display method. A. Gnudi. 1,684,795; Sept. 18.
Divider. U. A. Rabie. 1,684,886; Sept. 18.
Dolly. E. Karfiol. Des. 76,348; Sept. 18.
Doll. D. Stennard. Des. 76,359; Sept. 18.
Dolls, Device for moving the eyes of. O. Resch. 1,685,000; Sept. 18.
Doorcheck. F. Cowan. 1,685,023; Sept. 18.
Door, Elevator. H. W. Shonnard. 1,684,719; Sept. 18.
Door jamb and handhold, Combination. R. W. Jenkins. 1,684,532; Sept. 18.
Door opening and closing means. H. W. Shonnard. 1,684,893; Sept. 18.
Door, Oven. W. F. Rogers. 1,684,808; Sept. 18.
Draw pot. J. A. Reece. 1,644,456; Sept. 18.

Drawer and slide therefor, Double-acting. C. L. Russ. 1,684,889; Sept. 18.
Drawing or drafting mechanism. J. Jolly. 1,684,993; Sept. 18.
Drier: *See*—
Open-top drier.
Drier. E. A. Hults. 1,685,026; Sept. 18.
Drill: *See*—
Radial drill. Rock drill.
Drilling mechanism. E. G. Gartin. 1,684,669; Sept. 18.
Drilling mechanism. T. R. E. Rundqvist. 1,684,888; Sept. 18.
Drum, and method of locking the drums and flange sections thereof, Draw-works. D. S. Faulkner and E. Timbs. 1,684,482; Sept. 18.
Drying fur pelts, Apparatus for. A. Pierini, A. T. Hopkins, and H. M. Haven. 1,684,927; Sept. 18.
Dye, Textile. W. S. Lawrence. 1,684,401; Sept. 18.
Dyeing fibrous materials. J. Nüsslein. 1,684,881; Sept. 18.
Dyestuff and preparing the same, Yellow azo. E. Fischer and C. E. Miller. 1,684,762; Sept. 18.
Dyestuffs and preparing them, Mordant azo. A. Phillips and M. Dabelow. 1,684,778; Sept. 18.
Edibles and the incased edible, Incasing. W. D. Thompson. 1,684,421; Sept. 18.
Electric furnace for producing silicon carbide. H. E. White. 1,684,611; Sept. 18.
Electric heater. H. G. Catheart. 1,684,472; Sept. 18.
Electric heater. J. H. Knapp. 1,684,450; Sept. 18.
Electric machine, Dynamo-. C. T. Hibbard. 1,685,054; Sept. 18.
Electric plug, Multiple-socket. I. F. Giles and J. A. Roberts. 1,684,915; Sept. 18.
Electric switch. T. A. Both. 1,684,982; Sept. 18.
Electrical appliances, Arrangement of. H. W. Houck. 1,684,703; Sept. 18.
Electrical connecter. C. G. Jansky. 1,684,588; Sept. 18.
Electrical device. H. R. Van Deventer. 1,684,461; Sept. 18.
Electrical testing. F. A. Hubbard. 1,684,588; Sept. 18.
Electrode, Dry-cell. H. D. Hodge. 1,684,735; Sept. 18.
Electrolyte for storage batteries. A. B. N. Werby. 1,684,852; Sept. 18.
Electrolytic rectifier. W. C. Read. 1,684,684; Sept. 18.
Elevating apparatus, Automobile. R. J. Denio. 1,684,729; Sept. 18.
Elevator-door-operating mechanism. W. B. Crowell. 1,684,438; Sept. 18.
Elevator-signal panel. P. S. Van Bloem. Des. 76,365; Sept. 18.
Engine: *See*—
Internal-combustion engine.
Engine exhaust. G. W. Schultz. 1,685,006; Sept. 18.
Extension table. L. J. Hill. 1,684,831; Sept. 18.
Eye-treating apparatus. De F. B. Catlin. 1,684,860; Sept. 18.
Fan attachment for sewing machines. D. Shpater. 1,684,601; Sept. 18.
Fastener. F. S. Carr. 1,685,063; Sept. 18
Fastener, Door. F. J. Watkinson. 1,684,814; Sept. 18.
Fastener, Plano-bridle-strap. T. J. Malcolm. 1,685,001; Sept. 18.
Fastener, Safety door. C. Brand. 1,684,790; Sept. 18.
Fastener, Separable. F. S. Carr. 1,685,061–2; Sept. 18.
Fastener, Separable. G. Johnson. 1,685,055; Sept. 18.
Fastening-inserting machine. G. Goddu. 1,684,390; Sept. 18.
Feed-governing means for arc lamps. P. R. Bassett. 1,684,817; Sept. 18.
Feed mechanism. E. B. Stimpson. 1,684,747; Sept. 18.
Feeder, Automatic. A. Lemmon. 1,684,675; Sept. 18.
Feeder for laundry machinery, Automatic. T. L. Lowe. 1,684,451; Sept. 18.
Feeding mechanism, Sheet-. C. H. Nitsch and J. W. Baker. 1,684,741; Sept. 18.
Fence post. N. A. Ochiltree. 1,684,802; Sept. 18.
Ferrule for connecting plumbing fittings with piping. E. W. N. Boosey. 1,684,571; Sept. 18.
Fertilizer production. M. P. Nitsche. 1,684,712; Sept. 18.
Fiber board, Synthetic resin. A. L. Clapp. 1,684,755; Sept. 18.
Filing drawer. F. C. Morse. 1,684,842; Sept. 18.
Finder. C. A. Bornmann. 1,684,531; Sept. 18.
Fireplace, Domestic. R. O. P. Theobalds. 1,684,749; Sept. 18.
Fitting for plumbing systems, Clean-out. E. W. M. Boosey. 1,684,572; Sept. 18.
Flange, Closet. E. W. N. Boosey. 1,684,570; Sept. 18.
Flange, Reenforced. F. Hinneken. 1,684,396; Sept. 18.
Flotation process. A. H. Fischer. 1,684,536; Sept. 18.
Flour and producing the same, Soya-bean. G. Albers. 1,684,654; Sept. 18.
Flow regulator. O. Larsen. 1,684,835; Sept. 18.
Fluids, Apparatus for proportionately mixing. G. W. McKee. 1,684,500; Sept. 18.
Flying shears. F. C. Biggert, jr. 1,684,617; Sept. 18.
Flywheel. A. A. Alexander. 1,684,568; Sept. 18.
Foldable table. B. E. Willett. 1,684,653; Sept. 18.
Folded-sheet object and forming same. E. C. Morris. 1,684,878; Sept. 18.
Folder. H. A. W. Wood. 1,684,901; Sept. 18.
Folding box. I. B. Blake. 1,685,016; Sept. 18.
Folding box. F. E. Warner. 1,684,931; Sept. 18.
Folding machine. A. Olson and L. R. Tufts. 1,684,803; Sept. 18.
Form for concrete. F. M. Barton. 1,684,614; Sept. 18.
Forming articles, Method of and apparatus for. R. Beardsley. 1,684,658; Sept. 18.
Fortune-telling device. N. Lappas. 1,684,998; Sept. 18.
Fountain pen. S. Centofanti. 1,685,044; Sept. 18.
Frame: *See*—
Side frame.
Friction plugs from containers, Device for removing. G. A. Leighton. 1,684,708; Sept. 18.
Fruit scrubber. F. Stebler. 1,684,896; Sept. 18.
Fuel to internal-combustion engines, Apparatus for supplying. J. M. Bartley. 1,684,528; Sept. 18.
Furnace: *See*—
Channel induction furnace. Warm-air furnace.
Glass furnace.
Furnace register. T. Olinger. 1,684,512; Sept. 18.
Furniture, Article of. H. Allemeier. 1,684,936; Sept. 18.
Fuse mechanism. M. J. Sandin. 1,684,518; Sept. 18.
Fuse, Renewable. J. G. Clemens. 1,684,432; Sept. 18.
Game. M. Milewski. 1,685,076; Sept. 18.
Game. W. C. Ward. 1,684,813; Sept. 18.
Game ball. A. T. Saunders. 1,684,557; Sept. 18.
Game, Shooting. G. B. Deacon. 1,684,577; Sept. 18.
Gas burner. H. H. Carroll. 1,684,575; Sept. 18.
Gas burner. W. L. Sharp. 1,684,457; Sept. 18.
Gas burner. P. J. Sonner. 1,684,647; Sept. 18.
Gasket. C. B. Bailey. 1,684,656; Sept. 18.
Gasket, Spark-plug. C. B. Bailey. 1,685,050; Sept. 18.
Gate-closing device. W. K. Edwards. 1,684,578; Sept. 18.
Gauge: *See*—
Brake pressure gauge. Cylinder and tire gauge.
Gear chain. E. I. Braddock. 1,685,019; Sept. 18.
Gear control for machine tools, Oil-. R. M. Galloway. 1,685,049; Sept. 18.
Gear, Draft. W. H. Cotton. 1,684,388; Sept. 18.
Gear, Electrical switch. F. C. Coates. 1,684,604; Sept. 18.
Gear-lapping machine. C. H. Logue. 1,684,872; Sept. 18.
Generator: *See*—
Acetylene-gas generator.
Generator and the like, Steam. J. Tait. 1,684,976; Sept. 18.
Glass-edge-forming means, Sheet-. F. Fraser. 1,684,440; Sept. 18.
Glass furnace. T. B. Hart. 1,685,053; Sept. 18.
Glass to width, Process and apparatus for maintaining sheet. E. T. Ferngren. 1,684,438; Sept. 18.
Golf indicating mechanism. H. G. Conner. 1,684,576; Sept. 18.
Golf practice apparatus. C. H. Kraetsch 1,684,674; Sept. 18.
Grain-stowage device. J. C. Dill. 1,684,478; Sept. 18.
Grass catcher. J. F. Reynolds. 1,684,744; Sept. 18.
Grease on rolls, Device for preventing collection of. H. J. Harris. 1,684,581; Sept. 18.
Grinding machine. W. J. Guild and F. H. Grimshaw. 1,684,485; Sept. 18.
Grinding machine. W. J. Guild and L. C. Kenyon. 1,684,486; Sept. 18.
Grinding machine. R. A. Heald, C. J. Highberg, and E. M. Taylor. 1,684,487; Sept. 18.
Grinding machine having balanced spindle. S. Einstein. 1,684,792; Sept. 18.
Grinding machine, Valve-seat. J. A. Yerkes and R. H. Lemmon. 1,684,854; Sept. 18.
Grinding wheel, Segmental. T. Larsson. 1,684,770; Sept. 18.
Grocer's helper. P. K. Basmadjian. 1,684,529; Sept. 18.
Guide for sliding doors, Adjustable. N. Kauth. 1,684,706; Sept. 18.
Gun sight. J. B. Henderson. 1,684,823; Sept. 18.
Hair net. P. E. Hitzigrath. 1,684,734; Sept. 18.
Hair-undulating tong. A. Tingberg. 1,684,646; Sept. 18.
Hair waver. H. M. Montealegre. 1,684,774; Sept. 18.
Hair-waving equipment. W. G. Shelton. 1,684,642; Sept. 18.
Hammer. J. H. Phillips. 1,684,514; Sept. 18.
Hand bag. J. N. Lowe. 1,684,339; Sept. 18.
Handle: *See*—
Latch-mechanism handle.
Handle for smoking table. W. J. Simon. Des. 76,358; Sept. 18.
Handling strips, Method and apparatus for. L. I. Johnson. 1,684,867; Sept. 18.
Hanger for trousers and cravats. S. H. Campbell. Des. 76,341; Sept. 18.
Harvesting machine with scatterer. T. Hintermann. 1,684,626; Sept. 18.
Hay rake and buncher. J. Boyd. 1,684,573; Sept. 18.
Headgear. V. Habib. 1,684,670; Sept. 18.
Headlight. W. D. Ryan. 1,684,688; Sept. 18.
Headlight, Automobile. L. L. Wagner. 1,684,720; Sept. 18.
Heater: *See*—
Air heater. Vehicle heater.
Automobile heater. Water heater.
Electric heater.
Heater. C. H. Thomasson. 1,684,750; Sept. 18.
Heater and draft-governing means therefor. N. Olson. 1,684,844; Sept. 18.
Heater for liquid-heat-transmission systems. D. M. Luehrs. 1,684,963; Sept. 18.

Sept. 25, 1928

ALPHABETICAL LIST OF REGISTRANTS OF TRADE-MARKS.

ABC Service, Chicago, Ill. Partially-printed forms, memorandum pads, note paper, etc. 247,479; Sept. 25; Serial No. 259,786; published July 17, 1928. Class 37.
Abbott, Emerson N., Baldwin, N. Y. Dyes. 247,372; Sept. 25; Serial No. 266,774; published July 10, 1928. Class 6.
Albrecht-Bechtold, Inc., Philadelphia, Pa. Paper and cloth boxes of all descriptions and merchandise folders. 247,438; Sept. 25; Serial No. 265,822; published July 10, 1928. Class 2.

Anderson, John A., Port Arthur, Ontario, Canada. Highway-crossing gate. 1,685,623; Sept. 25.
Anderson, John H., St. Paul, Minn. Cuff construction. 1,685,305; Sept. 25.
Anderson, William, Hebburn-on-Tyne, and H. W. Clothier, Wallsend-on-Tyne, assignors to A. Reyrolle & Company Limited, Hebburn-on-Tyne, England. Control mechanism for electric switch gear. 1,685,531; Sept. 25.
Andrews, Chester E., assignor to The Selden Company, Pittsburgh, Pa. Purification. 1,685,624; Sept. 24.
Angeletti, Joseph M., New York, N. Y. Typewriter. 1,685,391; Sept. 25.
Arden, Thomas R., Forest Hills, assignor to J. Chein, New York, N. Y. Chassis. 1,685,592; Sept. 25.
Armstrong Cork Company. (See Humphreys, Eric J., assignor.)
Armstrong, Edwin J., Erie, Pa., assignor, by mesne assignments, to Bucyrus-Erie Company, South Milwaukee, Wis. Steering apparatus for motor-driven vehicles. 1,685,306; Sept. 25.
Arnold, Carl, Nuremberg, Germany. Interchangeable transparent disk on spark-producing toys with changing pictures. 1,685,411; Sept. 25.
Arnold, Carl, Nuremberg, Germany. Spark-producing toy. 1,685,412; Sept. 25.
Ashley, Frank M., Brooklyn, N. Y. Fountain pen. 1,685,413; Sept. 25.
Ashley, Frank M., Brooklyn, N. Y. Fountain pen. 1,685,414; Sept. 25.
Asiatic Petroleum Company. (See Lawson, Joseph, assignor.)
Aspinwall, Robert S., Detroit, Mich. Combined porch lantern and supporting bracket. Des. 76,367; Sept. 25.
Associated Merchandising Corporation. (See Lavault, André, assignor.)

Atkinson, William H., Washington, D. C. Automobile body. 1,685,264; Sept. 25.
Atwell, Harold V., assignor to Standard Oil Company, Whiting, Ind. Liquid seal. 1,685,516; Sept. 25.
Auble, Lawrence, assignor of one-third to C. E. McCarthy and one-third to K. F. Kapff, Toledo, Ohio. Mail-carrier mechanism. 1,685,593; Sept. 25.
Auchincloss, William K., assignor to American Car and Foundry Company, New York, N. Y. Placard and holder therefor. 1,685,080; Sept. 25.
Austin, Ain, De Kalb, Ill. Elevator and support for wall boards and the like. 1,685,144; Sept. 25.
Austin, Arthur O., Barberton, assignor, by mesne assignments, to The Ohio Brass Company, Mansfield, Ohio. Terminal for bushing insulators. 1,685,662; Sept. 25.
Austin, Arthur O., Barberton, assignor, by mesne assignments, to The Ohio Brass Company, Mansfield, Ohio. Insulated perch for preventing bird trouble in connection with electric transmission lines. 1,685,663; Sept. 25.
Automatic Electric Inc. (See Lomax, Clarence E., assignor.)
Automatic Electric Inc. (See Ruggles, Leonard L., assignor.)
Automatic Electric Inc. (See Stehlik, Rudolph F., assignor.)
Bahnson, Frederic F., Winston-Salem, N. C. Humidifier. 1,685,221; Sept. 25.
Bailey, James, assignor to Corning Glass Works, Corning, N. Y. Temperature-controlling means. 1,685,348; Sept. 25.
Bailey, James, assignor to Corning Glass Works, Corning, N. Y. Apparatus for and process of finishing blown-glass articles. 1,685,349; Sept. 25.
Baker Casing Shoe Company. (See Baker, Reuben C., assignor.)
Baker, George B. (See Paterson, J. C., and Baker.)
Baker, Harold U. (See Jones, W. S., and Baker.)
Baker, Harold U., et al. (See Jones, W. S., and Baker, assignors.)
Baker Perkins Company Incorporated. (See Paterson, J. C., and Baker, assignors.)
Baker, Reuben C., Coalinga, Calif., assignor to Baker Casing Shoe Company. Cementing and floating shoe. 1,685,307; Sept. 25.
Baker, Sylvester A., San Francisco, Calif. Street-light globe. Des. 76,368; Sept. 25.
Baldwin, Harry G., New Haven, assignor to The New Departure Manufacturing Company, Bristol, Conn. Bearing mounting. 1,685,517; Sept. 25.
Balls, Carl R., et al. (See Schenk, Otto, assignor.)
Balmer, John H., Maplewood, N. J. Towel-bar bracket. Des. 76,369; Sept. 25.
Barber, William J., assignor to The E. & N. Manufacturing Company, Delphos, Ohio. Cleaning implement. 1,685,265; Sept. 25.
Barchoff, Abraham, New York, N. Y. Tray and making same. 1,685,116; Sept. 25.
Barrett Company, The. (See Adams, Floyd W., assignor.)
Barrows, Donald S., Rochester, N. Y. Draft rigging. 1,685,209; Sept. 25.
Bartenbach, Herman, Pittsburgh, Pa., and A. E. Freeman, Andover, N. J., assignors to American Telephone and Telegraph Company. Hook. 1,685,145; Sept. 25.
Basch, David, Schenectady, N. Y., assignor to General Electric Company. Cable terminal. 1,685,625; Sept. 25.
Bash, Linus, Tulsa, Okla. Adjustable-scaffold jack. 1,685,445; Sept. 25.
Bassick Manufacturing Company, The. (See Davis, Ernest W., assignor.)
Bassick Manufacturing Company, The. (See Fesler, Douglas F., assignor.)
Bassick Manufacturing Company, The. (See Herb, Otto J., assignor.)
Bassick Manufacturing Company, The. (See Johnson, Gustav, assignor.)
Bassick Manufacturing Company, The. (See Murphy, Howard J., assignor.)
Bassick Manufacturing Company, The. (See Raeburn, William, assignor.)
Battle Creek Bread Wrapping Machine Company. (See Beckman, Henry F., assignor.)
Bauerschmidt, Kuno, Karlshorst, Germany, assignor to General Electric Company. Electric switch. 1,685,664; Sept. 25.
Baum, Gustav, Weissenstein-on-the-Drau, Karnten, Austria, assignor to The Niagara Electro Chemical Company, Inc., New York, N. Y. Apparatus for electrically heating liquids. 1,685,210; Sept. 25.
Baum, Gustav, Karnten, Austria, assignor to The Niagara Electro Chemical Company, Inc., New York, N. Y. Heating liquids by electrical energy for distillation, concentration, provocation of chemical reactions, etc. 1,685,266; Sept. 25.
Bauwens, Seraphine F., Chicago, Ill., assignor to Wire-bound Patents Company. Machine for use in making boxes. 1,685,626; Sept. 25.
Beadle, George W., Rye, N. Y., assignor to The Cellacote Company, Inc. Preservative packing and making the same. 1,685,392; Sept. 25.
Beadle, Harold I., New York, N. Y., assignor to The Cellacote Company, Inc. Covering articles and the product resulting therefrom. 1,685,393; Sept. 25.
Beckman, Henry F., assignor to Battle Creek Bread Wrapping Machine Company, Battle Creek, Mich. Bread-wrapping machine. 1,685,146; Sept. 25.
Beckman, Henry F., assignor to Duplex Printing Press Company, Battle Creek, Mich. Knife bar for paper cutting and folding machines. 1,685,532; Sept. 25.
Beck, August B., Cranford, N. J., assignor of one-half to S. E. Rizzuto, Brooklyn, N. Y. Corset. 1,685,477; Sept. 25.
Beck, Lester E., Kelly Station, Pa. Heat or pressure responsive circuit closer. 1,685,211; Sept. 25.
Becker, Harry S., River Forest, assignor to American Flyer Manufacturing Company, Chicago, Ill. Headlight and mounting for toy railway cars. 1,685,691; Sept. 25.
Beckwith, Joseph H., Pine Bluff, Ark. Brick mold. 1,685,188; Sept. 25.
Beiffos, Anton, Newark, N. J. Collar-button clasp. 1,685,595; Sept. 25.
Beiger, Fred S. (See Eustis, R. I., and Beiger.)
Bell, Joseph B., et al. (See Adams, Ervin, assignor.)
Beloit Iron Works. (See Berry, Earl E., assignor.)
Benedict, George W., assignor to Mid-West Manufacturing Company, Minneapolis, Minn. Universal joint. 1,685,446; Sept. 25.
Benjamin Bert R., Oak Park, assignor to International Harvester Company, Chicago, Ill. Tractor plow. 1,685,267; Sept. 25.
Benjamin, Bert R., Oak Park, Ill., assignor to International Harvester Company. Cultivator blade. 1,685,268; Sept. 25.
Benner, Harry F. (See Egloff, G., and Benner.)
Bennett, John F., London, England. Calendar. 1,685,692; Sept. 25.
Benson, Jared C. (See Stevens, H. R., Parker, Shupert, and Benson.)
Berg, Hart O. (See Michel, Gilbert, assignor.)
Berger, Isadore, Newark, N. J., assignor to E. H. Chein, New York, N. Y. Toy body formed of sheet material. 1,685,594; Sept. 25.
Berry, Earl E., assignor to Beloit Iron Works, Beloit, Wis. Paper-unwinding stand with water-cooled drum. 1,685,117; Sept. 25.
Berry, George W., Leeds, assignor of one-half to C. J. Rhodes, Wakefield, England. Press for drawing sheet metal. 1,685,308; Sept. 25.
Bethenod, Joseph, Paris, France, assignor to Motor Industries, Inc., Chicago, Ill. Declutching. 1,685,596; Sept. 25.
Bieler, William W., Hays, Kans. Power hammer. 1,685,447; Sept. 25.
Billingsley, P. L., Company, The. (See Billingsley, Percy L., assignor.)
Billingsley, Percy L., Orlando, Fla., assignor to The P. L. Billingsley Company, Cincinnati, Ohio. Sawing device. Re17,987; Sept. 25.
Bingay, Robert V., Pittsburgh, Pa., assignor to Pittsburgh Transformer Company. Electrical apparatus. 1,685,223; Sept. 25.
Binns, Edward H., et al. (See De Hart, William A., assignor.)
Binns, Ralph H., et al. (See De Hart, William A., assignor.)
Bishop, Joseph W., Muskegon, Mich., assignor to The Brunswick-Balke-Collender Company, Wilmington, Del. Combined phonograph and radio apparatus. 1,685,394; Sept. 25.
Bjorge, Oscar B., Portland, Oreg., assignor to Clyde Iron Works, Duluth, Minn. Demountable winding drum. 1,685,519; Sept. 25.
Bjorkman, Axel W., Brooklyn, assignor to Otis Elevator Company, New York, N. Y. Coil-winding device. 1,685,597; Sept. 25.
Black Rock Manufacturing Company, The. (See Hammond, G. L., Messinger, and Nicholas, assignors.)
Blackhawk Manufacturing Company. (See Pfauser, Edward M., assignor.)
Blackman, Albert E., Mount Vernon, N. Y. Mail box. 1,685,222; Sept 25.
Blanchard, Joseph, Sydney, New South Wales, Australia. Exhaust-gas muffler for internal-combustion engines. 1,685,701; Sept. 25.
Bliss, E. W., Company. (See Strout, Robert W., assignor.)
Blomstrom, Lowell C., assignor to Federal Mogul Corporation, Detroit, Mich. Holding block for broaching half bearings. 1,685,224; Sept. 25.
Bloom, Nathan P., Louisville, Ky. Cabinet for a sound-reproducing instrument or the like. Des. 76,370; Sept. 25.
Blunt, James G., Schenectady, N. Y. Locomotive driving box. 1,685,212; Sept. 25.
Boehringer, John A., Springfield, assignor to Star Chandelier Co., Inc., New York, N. Y. Ceiling Plate for Lighting Fixtures or Similar Articles. Des. 76,371; Sept. 25.
Bond, Leslie W., Schenectady, N. Y., assignor to General Electric Company. Mechanism for operating electric switches. 1,685,065; Sept. 25.
Borgwardt, Erich. (See Schoeller, W., Feldt, Gehrke, and Borgwardt.)
Borroughs, Joseph N., Oakland, Calif. Towel cabinet. 1,685,395; Sept. 25.
Bottome, Edgar M., assignor to Fostoria Glass Company, Moundsville, W. Va. Goblet. Des. 76,372; Sept. 25.

Bottome, Edgar M., assignor to Fostoria Glass Company, Moundsville, W. Va. Goblet. Des. 76,373; Sept. 25.
Boyce, Edwin D., Norristown, Pa. Tool guard. 1,685,213; Sept. 25.
Boyd, John S., assignor to John S. Boyd Co., Inc., Williamstown, Mass. Textile fabric. Des. 76,374; Sept. 25.
Boyd, John S., Co. (See Boyd, John S., assignor.)
Boyes, Estella M., New York, N. Y. Dress or Similar Article. Des. 76,375; Sept .25.
Boylan, Edward R., Los Angeles, Calif. Dieing-out machine. 1,685,309; Sept. 25.
Brady, Thomas, East Orange, N. J., assignor, by mesne assignments, to Otis Elevator Company, New York, N. Y. Door-closure mechanism. 1,685,081; Sept. 25.
Brady, Thomas, East Orange, assignor to Otis Elevator Company, Jersey City, N. J. Gate mechanism. 1,685,225; Sept. 25.
Breen, Frederick P., Springfield, Mass. Spiral drive device. 1,685,702; Sept. 25.
Brennels, Louis, Oxnard, Calif., assignor to Brennels Manufacturing Company. Cultivator. 1,685,478; Sept. 25.
Brennels Manufacturing Company. (See Brennels, Louis, assignor.)
Briody, Bernard, assignor to Truscon Steel Company, Youngstown, Ohio. Reenforced-concrete roadway. 1,685,562; Sept. 25.
Broadmeyer, Albert, assignor to The W. O. Hickok Manufacturing Company, Harrisburg, Pa. Inspecting apparatus. 1,685,761; Sept. 25.
Brophy, Dorothy H., and W. A. Ruggles, Schenectady, N. Y., assignors to General Electric Company. Method and apparatus for storing alkali metals. 1,685,666; Sept. 25.
Brown, Arthur J., assignor to Allis-Chalmers Manufacturing Company, Milwaukee, Wis. Rotor for dynamo-electric machines. 1,685,739; Sept. 25.
Brown Company. (See Richter, George A., assignor.)
Brown, Millard D., assignor to Continental Mills, Inc., Philadelphia, Pa. Knitted fabric. Des. 76,376; Sept. 25.
Brown, Robert F., Dayton, Ohio, assignor, by mesne assignments to Oxford Varnish Corporation, Detroit, Mich. Reproducing artistic designs. 1,685,396; Sept. 25.
Browning, George, Computing machine. 1,685,583; Sept. 25.
Brunswick-Balke-Collender Company, The. (See Bishop, Joseph W., assignor.)
Brynelson, Arthur W., Augusta, Ga. Roundabout. 1,685,627; Sept. 25.
Bucher & Gibbs Plow Company, The. (See Groenke, John H., assignor.)
Buchet, Conrad R., Long Beach, Calif. Toy speed boat. 1,685,350; Sept. 25.
Buchner, Max, Hanover-Kleefeld, Germany, assignor to A. Meyerhofer, Zurich, Switzerland. Manufacturing complex hydrofluoric salt. 1,685,628; Sept. 25.
Buckley, Thomas F., Scranton, Pa. Spring-forming machine. 1,685,415; Sept. 25.
Bucyrus-Erie Company. (See Armstrong, Edwin J., assignor.)
Bulletin Co. (See Kearney, George F., assignor.)
Bundy, Harry W., Detroit, Mich. Method and apparatus for making tubing. 1,685,269; Sept. 25.
Bundy, Harry W., Detroit, Mich. Making finned tubing. 1,685,270; Sept. 25.
Bunker, Ralph A., Yarmouth, Me. Footwear. 1,685,561; Sept. 25.
Burdick, Charles L., assignor to Guggenheim Brothers, New York, N. Y. Heating high-temperature apparatus. 1,685,226; Sept. 25.
Burrell, Edward P., Shaker Heights, and G. W. Drake, Cleveland Heights, assignors to The Warner and Swasey Company, Cleveland, Ohio. Controlling lever for machine tools. 1,685,310; Sept. 25.
Burrows, William J., St. Paul, Minn. Making lead cames. 1,685,518; Sept. 25.
Butterworth, Thomas C., Mill Valley, Calif. Filing structure. 1,685,448; Sept. 25.
By-Products Coke Corporation. (See Waggoner, C. L., and Thacher, assignors.)
C. & C. Engineering Company. (See Carrey, John O., assignor.)
C. G. Spring & Bumper Company, The. (See Jandus, H. S., and Morgan, assignors.)
C-S Engineering Company. (See Schellens, E. L., and Coffin, assignors.)
California Six Wheel Company. (See Rodin, Charles F., assignor.)
Campbell, Robert C., Millburn, N. J., assignor to United Filters Corporation, Hazleton, Pa. Recovering sugar values. 1,685,118; Sept. 25.
Campbell, William J., Indianapolis, Ind., assignor to American Slicing Machine Company, Chicago, Ill. Slicing machine. 1,685,271; Sept. 25.
Campbell, William J., Indianapolis, Ind., assignor to American Slicing Machine Company, Chicago, Ill. Slicing machine. 1,685,272; Sept. 25.
Candee, Allan H. (See Wildhaber, E., and Candee.)
Carliss, Albert E., Floral Park, N. Y., assignor to Acme Air Appliance Co., Inc. Air-pressure gauge. 1,685,273; Sept 25.
Carns, Edmund B., New York, N. Y. Landing gear for flying machines. 1,685,119; Sept. 25.
Carns, Edmund B., New York, N. Y. Nut lock. 1,685,120; Sept. 25.
Carns, Edmund B., New York, N. Y. Fuselage. 1,685,121; Sept. 25.
Carns, Edmund B., New York, N. Y. Aircraft chassis. 1,685,122; Sept. 25.
Carrey, John O., assignor to C. & C. Engineering Company, Inc., St. Louis, Mo. Gyratory pump. 1,685,397; Sept. 25.
Carter, George H., Boston, Mass. Dish holder. Des. 76,377; Sept. 25.
Carter-Mayhew Manufacturing Co. (See Varusky, John J., assignor.)
Carvalho, Leslie R. N., Toledo, Ohio. Closure device. 1,685,227; Sept. 25.
Carveth, Hector R., Niagara Falls, assignor to The Roessler & Hasslacher Chemical Company, New York, N. Y. Controlling rate of oxidation. 1,685,520; Sept. 25.
Case, Oscar B., Williamsport, Pa. Container. 1,685,147; Sept. 25.
Castles, Thomas R., Portland, Oreg. Burglar alarm. 1,685,416; Sept. 25.
Cellacote Company, The. (See Beadle, George W., assignor.)
Cellacote Company, The. (See Beadle, Harold I., assignor.)
Chance, Thomas M., Merion, Pa. Separation of materials of different specific gravities. 1,685,521; Sept. 25.
Chase Companies, The. (See Wellington, Arthur W., assignor.)
Cheathum Electric Switching Device Company. (See Milton, John L., assignor.)
Chein, Elizabeth H. (See Berger, Isadore, assignor.)
Chein, Julius. (See Arden, Thomas R., assignor.)
Chemische Fabrik auf Actien (vorm. E. Schering). (See Schoeller, W., Feldt, Gehrke, and Borgwardt, assignors.)
Chemische Fabrik Ludwig Meyer. (See Molz, Emil, assignor.)
Chicago Pneumatic Tool Company. (See Kimman, Theodore P., assignor.)
Chicago Steel & Wire Company. (See Green, J. Birchard, assignor.)
Childers, George P., San Francisco, Calif. Drip pan. Des. 76,378; Sept. 25.
Christianson, Chris A., Ulen, Minn. Ventilating sash. 1,685,311; Sept. 25.
Cincinnati Bickford Tool Company, The. (See Klausmeyer, David C., assignor.)
Clark, Cyrus A., Claremont, Calif. Razor-blade holder. 1,685,703; Sept. 25.
Clark, James E. (See Clark, Thomas E. and J. E.)
Clark, Thomas E., assignor to Continuous Train Control Corporation, Detroit, Mich. Safety installation for grade crossings. 1,685,480; Sept. 25.
Clark, Thomas E. and J. E., assignors to Continuous Train Control Corporation, Detroit, Mich. Train-control apparatus. 1,685,479; Sept. 25.
Claus, Bruno, Magdeburg, Germany. Bed bidet. 1,685,693; Sept. 25.
Click, Samuel A., assignor to C. G. Conn, Ltd., Elkhart, Ind. Musical-instrument case. 1,685,123; Sept. 25.
Clothier, Henry W. (See Anderson, W., and Clothier.)
Clyde Iron Works. (See Bjorge, Oscar B., assignor.)
Coen Company. (See Voorhels, Joseph T., assignor.)
Coffin, Joel S., jr. (See Schellens, E. L., and Coffin.)
Cohen, Louis, Washington, D. C. Radio receiving system. 1,685,763; Sept. 25.
Cole, Lyndon C., Hamilton, Ohio, assignor to Niles-Bement-Pond Company, New York, N. Y. Car-wheel boring and facing machine. 1,685,417; Sept. 25.
Collins, Abraham L. Sr., Amite, La. Rail joint. 1,685,704; Sept. 25.
Columbia Metal Box Co. (See Katcher, Morris, assignor.)
Combes, Abbott L., and H. M. Keyser, East Falls Church, Va. Ripping unit for metal cans. 1,685,312; Sept. 25.
Combustion Engineering Corporation. (See Jackson, George P., assignor.)
Comey, R. H., Brooklyn Company. (See Oakes, Raymond H., assignor.)
Conant, Herbert S., Troy, N. Y. Firearm. 1,685,148; Sept. 25.
Conn, C. G., Ltd. (See Click, Samuel A., assignor.)
Conn, C. G., Ltd. (See Weber, Charles, jr. assignor.)
Connell, Edwin L., assignor to The Van Dorn Electric Tool Company, Cleveland, Ohio. Electric drill. Des. 76,379; Sept. 25.
Connolly, William B., assignor to North East Electric Company, Rochester, N. Y. Condenser mounting. 1,685,563; Sept. 25.
Consolidated Electric Sign Corporation. (See Russell, Harry G., assignor.)
Consolidated Machine Tool Corporation of America. (See Trosch, Alfred, assignor.)
Constantine, Alphonse A., Jeffersonville, Ind., assignor to American Car and Foundry Company, New York, N. Y. Holding means for car-vestibule trapdoors. 1,685,124; Sept. 25.
Continental Mills, Inc. (See Brown, Millard D., assignor.)
Continuous Train Control Corporation. (See Clark, Thomas E., assignor.)
Continuous Train Control Corporation. (See Clark, Thomas E. and J. E., assignors.)

Cooke, Milton W., Mount Lebanon, and O. Williams, Pittsburgh, Pa. Electric switching device. 1,685,149; Sept. 25.
Corning Glass Works. (See Bailey, James, assignor.)
Cover, Harry C., assignor of one-half to himself and one-half to M. Hendler, Baltimore, Md. Ice-cream freezer. 1,685,189; Sept. 25.
Cramer, Otto P., San Francisco, Calif. Latch. 1,685,274; Sept. 25.
Cramer, Thomas M., Long Beach, Calif, assignor to Pacific Coast Borax Company. Production of commercial borax from rasorite by a wet method. 1,685,214; Sept. 25.
Crowell, William B., New York, N. Y., assignor to Elevator Supplies Company, Inc., Hoboken, N. J. Elevator and inclosure therefor. 1,685,228; Sept. 25.
Crumrine, George E. (See Morris, O. E., Crumrine, and Grounds.)
Cudahy Packing Company, The. (See Drake, Eugene T., assignor.)
Curtis, Joseph T., New York, N. Y. Hat and making the same. 1,685,190; Sept. 25.
Cutler-Hammer Mfg. Co., The. (See Meuer, George J., assignor.)
Cutler-Hammer Mfg. Co., The. (See Seeger, Edwin W., assignor.)
Dahl, Otto. (See Masing, G., and Dahl.)
Darco Corporation. (See Holt, Joseph H., assignor.)
Daughaday, Frank P., Norton, Mass. Belt buckle. Des. 76,380; Sept. 25.
Davey, James A. G. (See Davey, P. H., and Williams, assignors.)
Davey, James A., Sound Beach, Conn., and P. H. Davey and C. L. Gaugler; said Gaugler assignor of one-third of his entire interest to The Davey Tree Expert Company, Kent, Ohio. Air compressor. 1,685,150; Sept. 25.
Davey, Paul H. (See Davey, James A. and P. H., and Gaugler.)
Davey, Paul H., and W. R. Williams, Kent, Ohio; said Davey assignor of one-fourth to J. A. Davey, Sound Beach, Conn.; said Williams assignor to The Davey Tree Expert Company, Kent, Ohio. Applying threaded bracing rods to trees. 1,685,151; Sept. 25.
Davey Tree Expert Company, The. (See Davey, James A. and P. H., and Gaugler, assignors.)
Davey Tree Expert Company, The. (See Davey, P. H., and Williams, assignors.)
Davis, Ernest W., Oak Park, assignor to The Bassick Manufacturing Company, Chicago, Ill. Swivel coupling. 1,685,351; Sept. 25.
Davis, Guy F., Schenectady, N. Y., assignor to General Electric Company. Recording system. 1,685,667; Sept. 25.
Davis, James G., Buffalo, N. Y. Foldable horse for trestle beams. 1,685,668; Sept. 25.
Davis, Jasper N., Denver, Colo. Storage-battery plate. 1,685,215; Sept. 25.
Davis, John P., and S. Heiman, St. Louis, Mo.; said Davis assignor to said Heiman. Machine for producing post-office classifica..on slips. 1,685,352; Sept. 25.
Davis, Richard M., West Pittston, Pa. Deflector for gasoline-hose nozzles. 1,685,313; Sept. 25.
Davis, Richard M., West Pittston, Pa. Bottom margin spacer for typewriters. 1,685,314; Sept. 25.
Davis, William, Chicago, Ill. Auxiliary fuel and cleaning device for internal-combustion engines. 1,685,598; Sept. 25.
Dawson, George H., Boston, Mass., and H. F. Frease, Canton, Ohio. Trussed structure. 1,685,353; Sept. 25.
Day, David T., deceased, Washington, D. C.; F. J. Goble, administrator. Extracting the oily bases from crude shale oil. 1,685,315; Sept. 25.
Dayton Funhouse & Riding Device Mfg. Company, The. (See Vaszin, Aurel, assignor.)
Dayton Irrigation Company, The. (See Keys, John H., assignor.)
Dean, Michael F., Indianapolis, Ind. Print or film holder. 1,685,584; Sept. 25.
Deere & Company. (See Paul, William L., assignor.)
Deere & Company. (See Sklovsky, Max, assignor.)
Deere & Company. (See Tuffley, George E., assignor.)
Deere & Company. (See White, Charles H., assignor.)
De Hart, William A., Teaneck, N. J., assignor of five-sevenths to E. H. Binns and two-sevenths to R. H. Binns, Pittsburgh, Pa. Counting mechanism. 1,685,481; Sept. 25.
Delany, Edward L., assignor to Delany Realty Corporation, Brooklyn, N. Y. Flush-tank-operating lever. 1,685,152; Sept. 25.
Delany, Edward L., Brooklyn, N. Y. Flush-tank-operating lever. 1,685,153; Sept. 25.
Delany Realty Corporation. (See Delany, Edward L., assignor.)
Delbon, Frank G., Brooklyn, N. Y. Arch support and shoe-shank reenforcement. 1,685,398; Sept. 25.
Delco-Light Company. (See Smith, Jasper A., assignor.)
Delco-Light Company. (See Starr, Frank F., assignor.)
Deppé, William P., Brightwaters, N. Y. Internal-combustion engine. 1,685,564; Sept. 25.
De Reamer, Frank C., Bridgeport, Conn., assignor to General Electric Company. Hanging means for electric fans and the like. 1,685,669; Sept. 25.
Devereaux, William C., Detroit, Mich. Lock-shaft-securing means. 1,685,316; Sept. 25.
Devereaux, William C., Detroit, Mich. Latching means for door-lock handles. 1,685,317; Sept. 25.
De Weese, John H., Dayton, Ohio. Display stand. Des. 76,381; Sept. 25.
Dike, George P., Brookline, Mass. Footwear. 1,685,216; Sept. 25.
Display Stage Lighting Co. Inc. (See Higham, John, assignor.)
Dixson, Harry, assignor to Rolscreen Company, Pella, Iowa. Rethreader for screens. 1,685,522; Sept. 25.
Dobmaier, Karl, Leverkusen-on-the Rhine, assignor to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany. Manufacture of solid alkali-metal salts of organic compounds. 1,685,191; Sept. 25.
Dodge, Adiel Y., South Bend, Ind. Transmission. 1,685,523; Sept. 25.
Dodge, Harry H., Green Island, N. Y. Control valve for gaseous-fuel burners. 1,685,275; Sept. 25.
Doerr, Fred H., assignor to American Brass Novelty Co., Grand Haven, Mich. Receptacle. 1,685,276; Sept. 25.
Doherty, James, Chicago, Ill. Steam and air injector. 1,685,482; Sept. 25.
Donnellan, James S., Los Angeles, Calif. Slicing cutter for butter, bread, and the like. 1,685,533; Sept. 25.
Dopyera, John, Los Angeles, Calif. Guitar. Des. 76,382; Sept. 25.
Dorfan, Morton L., New York, N. Y., assignor to Allis-Chalmers Manufacturing Company, Milwaukee, Wis. Apparatus for treating fumes. 1,685,229; Sept. 25.
Dorsey, Farnum F., assignor to North East Electric Company, Rochester, N. Y. Electric switch. 1,685,565; Sept. 25.
Dow Chemical Company, The. (See Veazey, William R., assignor.)
Dow, Floyd Wyanet, Ill. Valley, hip, and ridge construction for roofs. 1,685,524; Sept. 25.
Dow, Floyd, Wyanet, Ill. Flashing for roof construction. 1,685,525; Sept. 25.
Drahn, Carl, Magdeburg, assignor to the firm Fried. Krupp Grusonwerk Aktiengesellschaft, Magdeburg-Buckau, Germany. Apparatus for the separation of oil from oil containing substances. 1,685,534; Sept. 25.
Drake, Eugene T., Omaha, Nebr., assignor to The Cudahy Packing Company, Chicago, Ill. Production of nitrites. 1,685,629; Sept. 25.
Drake, Eugene T., Omaha, Nebr., assignor to The Cudahy Packing Company, Chicago, Ill. Curing meats. 1,685,630; Sept. 25.
Drake, George W. (See Burrell, E. P., and Drake.)
Dreifuss, Audrey, et al. (See Schmid, Werner, assignor.)
Dreifuss, Emil, et al. (See Schmid, Werner, assignor.)
Dreifuss, Jerome, et al. (See Schmid, Werner, assignor.)
Dreifuss, Louis, et al. (See Schmid, Werner, assignor.)
Dreifuss, Sybille, et al. (See Schmid, Werner, assignor.)
Dryden, Mary E., Chicago, Ill. Frame and holder for slippers and other articles. 1,685,277; Sept. 25.
Duffey, William J., Denver, Colo. Screen-clamping device. 1,685,705; Sept. 25.
Duncan, Thomas R., Richmond, Calif. Combined weighing and dumping body for motor trucks. 1,685,694; Sept. 25.
Duplex Printing Press Company. (See Bechman, Henry F., assignor.)
Du Pont, E. I., de Nemours & Company. (See Middleton, Edmund B., assignor.)
Du Pont-Pathe Film Manufacturing Corporation. (See Zeiger, Georges E., assignor.)
Durand, David H., Denver, Colo. Traffic button or signal. 1,685,449; Sept. 25.
Dwyer, William C., Auburn, N. Y., assignor to International Harvester Company, Chicago, Ill. Combined disk and toothed harrow. 1,685,278; Sept. 25.
E. & N. Manufacturing Company, The. (See Barber, William J., assignor.)
Earl, Harley J. (See Seaholm, E. W., and Earl.)
Earle, Ralph H., Wauwatosa, assignor to Allis-Chalmers Manufacturing Company, Milwaukee, Wis. Prime-mover dynamo plant. 1,685,740; Sept. 25.
Earon, Isabel. (See Earon, Orville D., assignor.)
Earon, Orville D., assignor to I. Earon, Montclair, N. J. Lather brush. 1,685,526; Sept. 25.
Eastman Kodak Company. (See Frederick, Charles W., assignor.)
Edison Electric Appliance Company. (See McCormick, Francis H., assignor.)
Edison Electric Appliance Company. (See Shroyer, Jacob L., assignor.)
Edwards, William H., Brooklyn, N. Y., assignor to American Telephone and Telegraph Company. Lock. 1,685,154; Sept. 25.
Egloff, Gustav, and H. P. Benner, Independence, Kans., assignor to Universal Oil Products Company, Chicago, Ill. Pipe connection. 1,685,483; Sept. 25.
Ehrlich, Frederick W., Newark, N. J. Automobile radiator ornament. Des. 76,383; Sept. 25.
Elge, Jacob, assignor to The Fisher Governor Company, Marshalltown, Iowa. Journaling means for hollow float-arm shafts. 1,685,527; Sept. 25.
Elnson-Freeman Co. (See Elnson, Morris M., assignor.)
Elnson, Morris M., Yonkers, N. Y., assignor to Elnson-Freeman Co., Inc., Combination packing and display container. 1,685,125; Sept. 25.
Elder, John S., Grandfield, Okla. Cotton-chopping machine. 1,685,318; Sept. 25.

Electrolux Servel Corporation. (See von Platen, B. C., and Munters, assignors.)
Elevator Supplies Company. (See Crowell, William B., assignor.)
Elfving, Hemming A., Hango, assignor to Finsk-Engelska Biscuit-Fabriks A. B., Hango-Vaxel, Finland. Apparatus for stacking biscuits and similar articles. 1,685,354; Sept. 25.
Ellis, Carleton, Montclair, N. J., assignor to Ellis-Foster Company. Streak-ribbed product and making same. 1,685,355; Sept. 25.
Ellis-Foster Company. (See Ellis, Carleton, assignor.)
Emeott, Harry D., St. Paul, Minn. Arch support. 1,685,155; Sept. 25.
Emons, Ernest E., assignor of one-half to R. E. Hillier, Akron, Ohio. Spectacles. 1,685,192; Sept. 25.
Engstrom, Gustaf W., Riverside, assignor to International Harvester Company, Chicago, Ill. Tractor. 1,685,279; Sept. 25.
Enterprise Machinery Company. (See McVicker, W. J., and Sandt, assignors.)
Erdman, Harvey C., Shaker Heights, assignor to The National Screw and Manufacturing Company, Cleveland, Ohio. Metal-working machine. 1,685,319; Sept. 25.
Eustis, Robert I., and F. S. Beiger, assignors to The Eustis Specialty Co., Los Angeles, Calif. Track for sliding sashes. 1,685,535; Sept. 25.
Eustis, Robert I., and F. S. Beiger, assignors to The Eustis Specialty Co., Los Angeles, Calif. Drawer slide. 1,685,536; Sept. 25.
Eustis Specialty Co., The. (See Eustis, R. I., and Beiger, assignors.)
Evans, Charles H., Jersey City, N. J., assignor to American Car and Foundry Company, New York, N. Y. Draft-key retainer. 1,685,126; Sept. 25.
Evans, Floyd G., Baton Rouge, La., assignor of one-half to H. W. Mitchell, Webster Springs, W. Va. Car door and operating means therefor. 1,685,631; Sept. 25.
Evelin, Leo E., New York, N. Y. Shock-absorbing handpiece. 1,685,670; Sept. 25.
Fanberg, Oscar, Hensley, W. Va. Scraper. 1,685,399; Sept. 25.
Farrow, Ernest L., deceased, Cleveland Heights, Ohio; P. Farrow, administratrix. Flexible cord or strip puzzle. 1,685,400; Sept. 25.
Farrow, Pauline, administratrix. (See Farrow, Ernest L.)
Federal Mogul Corporation. (See Blomstrom, Lowell C., assignor.)
Feldt, Adolf. (See Schoeller, W., Feldt, Gerhke, and Borgwardt.)
Fellows, Frederick W., Los Angeles, Calif. Musical instrument. 1,685,401; Sept. 25.
Ferguson, Herman B., Philadelphia, Pa. Garment bag. Des. 76,384; Sept. 25.
Féry, Charles J. V., Paris, France. Separating device for lead storage batteries. 1,685,695; Sept. 25.
Fesler, Douglas F., assignor to The Bassick Manufacturing Company, Chicago, Ill. Lubricant compressor. 1,685,484; Sept. 25.
Findley, Lester L., Los Angeles, Powder-placing syringe. 1,685,280; Sept. 25.
Finley, Dozier, Berkeley, assignor to The Paraffine Companies, Inc., San Fancisco, Calif. Insulating board. 1,685,320; Sept. 25.
Finnell System, Incorporated. (See Finnell, Walter S., assignor.)
Finnell, Walter S., Hannibal, Mo., assignor to Finnell System, Incorporated. Floor-scrubbing machine. 1,685,485; Sept. 25.
Finsk-Engelska Biscuit-Fabriks A. B. (See Elfving, Hemming A., assignor.)
Fisher Governor Company, The. (See Elge, Jacob, assignor.)
Fisher, James F., Honolulu, Hawaii. Sign. Des. 76,385; Sept. 25.
Fisher, R. Fenton. (See White, Ernest C., assignor.)
Fitch, Benjamin F., Greenwich, Conn., assignor to Motor Terminals Company, Wilmington, Del. Locking mechanism for removable containers. 1,685,356; Sept. 25.
Fletcher, John P., U. S. Army, Carlisle, Pa. Collapsible dental chair. 1,685,599; Sept. 25.
Foote, Edward B., assignor to Taylor Instrument Companies, Rochester, N. Y. Thermometer. 1,685,193; Sept. 25.
Ford Instrument Company. (See Tanner, Harry L., assignor.)
Fornaca, Guido, Turin, Italy. Brake of the expanding-shoe type. 1,685,450; Sept. 25.
Forseth, Albert J., Grand Forks, N. Dak., assignor to B. F. Gilbert, Fort Worth, Tex. Automatically-adjustable embroidery guide. 1,685,194; Sept. 25.
Foster, Theodore W., & Brother Company. (See Noble, Arthur H., assignor.)
Fostoria Glass Company. (See Bottome, Edgar M., assignor.)
Foulds, Charles V., Berkeley, assignor to The Pelton Water Wheel Co., San Francisco, Calif. Sleeve assembly for valve stems, piston rods, spindles, plungers, and the like. 1,685,418; Sept. 25.
Fox, William F., assignor, to Natural Color Pictures Company, Inc., New York, N. Y. Production of colored photographs. 1,685,281; Sept. 25.
Fr. Hesser Maschinenfabrik-Aktiengesellschaft. (See Gangler, Paul, assignor.)
Frank, Gustav, Wichita Falls, Tex. Clamp. 1,685,696; Sept. 25.
Frease, Hurxthal F. (See Dawson, G. H., and Frease.)
Frederick, Charles W., assignor to Eastman Kodak Company, Rochester, N. Y. Optical system for color processes. 1,685,600; Sept. 25.
Freeman, Albert E. (See Bartenbach, H., and Freeman.)
Freyn Engineering Company. (See Willcox, Frederick H., assignor.)
Fried. Krupp Grusonwerk Aktiengesellschaft. (See Drahn, Carl, assignor.)
Friedemann, Matthew M., New York, N. Y. Display fixture or the like. Des. 76,386; Sept. 25.
Frost, Dennis R., et al. (See Hughes, Hugh R., assignor.)
Fuller, John E., Hartsville, S. C. Hydrocarbon engine. 1,685,282; Sept. 25.
Funnell, Harry M., New Market, N. J. Spring-retained casing for universal joints. 1,685,528; Sept. 25.
Gail, John F., Evanston, Ill., assignor to Simmons Company, New York, N. Y. Spring-inserting mechanism. 1,685,566; Sept. 25.
Gallimore, Keith F. (See Kempton, H. E., Gallimore, and Woytych.)
Gangler, Paul, Esslingen, assignor to the firm Fr. Hesser Maschinenfabrik - Aktiengesellschaft, Stuttgart - Cannstatt, Germany. Machine for wrapping up razor blades. 1,685,601; Sept. 25.
Gardner, James H., Boston, Mass. Printed fabric. Des. 76,387; Sept. 25.
Garland, Walter S., Washington, D. C. Circuit controller. 1,685,537; Sept. 25.
Gaugler, Charles L. (See Davey, James A., and P. H., and Gaugler.)
Gebhardt, George H., Muscatine, Iowa. Treating pearl chips and product. 1,685,451; Sept. 25.
Gedda, Georg G., Surahammer, Sweden. Producing wrought iron with increased tensile properties. 1,685,602; Sept. 25.
Gee, James M., Cleveland, Ohio. Hydrocarbon-oil burner. 1,685,567; Sept. 25.
Gehrke, Max. (See Schoeller W., Feldt, Gehrke, and Borgwardt.)
Geist, Walter, assignor to Allis-Chalmers Manufacturing Company, Milwaukee, Wis. Candy-pulling machine. 1,685,741; Sept. 25.
Genachte, Désiré V., New York, N. Y. Lamp shade. Des. 76,437; Sept. 25.
General Cable Corporation. (See Saurman, Atlee B., assignor.)
General Electric Company. (See Basch, David, assignor.)
General Electric Company. (See Bauerschmidt, Kuno, assignor.)
General Electric Company. (See Bond, Leslie W., assignor.)
General Electric Company. (See Brophy, D. H., and Ruggles, assignors.)
General Electric Company. (See Davis, Guy F., assignor.)
General Electric Company. (See De Reamer, Frank C., assignor.)
General Electric Company. (See Hardesty, Llewellyn C., assignor.)
General Electric Company. (See Maxwell, Howard, assignor.)
General Electric Company. (See Mosher, James H., assignor.)
General Electric Company. (See Phiffer, Clark R., assignor.)
General Electric Company. (See Testell, Emile, assignor.)
General Electric Company. (See West, Harry R., assignor.)
General Electric Company. (See Whitney, Willis, R., assignor.)
General Motors Corporation. (See Seaholm, E. W., and Earl, assignors.)
General Tire & Rubber Company, The. (See Remark, Isidore J., assignor.)
General Zeolite Company. (See Schreier, Arthur, assignor.)
General Zeolite Company. (See Stein, Milton F., assignor.)
George, Edgar C., Norwood, Ohio, assignor to Allis-Chalmers Manufacturing Company, Milwaukee, Wis. Core for electrical apparatus. 1,685,742; Sept. 25.
Genscecke, Wilhelm, Bad Homburg, Germany, assignor to American Lurgi Corporation, New York, N. Y. Purifying oils and fats. 1,685,195; Sept. 25.
Giberson, Thomas, Caribou, Me. Potato digger. 1,685,230; Sept. 25.
Gibson, James P., Denver, Colo. Collapsible trestle. 1,685,283; Sept. 25.
Gilbert, B. F. (See Forseth, Albert J., assignor.)
Gilbert, Clarence E., Aberdeen, S. Dak. Scarifier tooth. 1,685,196; Sept. 25.
Gilson, Michael, assignor to Kwik-Mix Concrete Mixer Co., Port Washington, Wis. Automatic lock and release for concrete mixers. 1,685,529; Sept. 25.
Giordani, Francesco, Naples, Italy, assignor to Pomilio Brothers Corporation, New York, N. Y. Electrochemical process for separating iron from aluminum. 1,685,156; Sept 25.
Gleason Works. (See Wildhaber, Ernest, assignor.)
Gleason Works. (See Wildhaber, E., and Candee, assignors.)

Glidden, Alfred A., and T. M. Knowland, assignors to Hood Rubber Company, Watertown, Mass. Sole for boots and shoes. 1,685,538; Sept. 25.

Gloekler, John E., Pittsburgh, Pa. Door-latch construction. 1,685,419; Sept. 25.

Gluck, Edward V., Woodhaven, N. Y. Grid leak. 1,685,603; Sept. 25.

Goble, Fred J., administrator. (See Day, David T.)

Goeller, Edward F., New York, N. Y. Advertising device. 1,685,157; Sept. 25.

Gold, Samuel B., assignor to Weber Engine Company, Kansas City, Mo. Coupling. 1,685,158; Sept. 25.

Goldsmith, Hugo, assignor to The P. Goldsmith Sons Company, Cincinnati, Ohio. Athlete's protective harness. 1,685,452; Sept. 25.

Goldsmith, P., Sons Company, The. (See Goldsmith, Hugo, assignor.)

Goodfellow, Alfred, assignor to C. L. Huston, Coatesville, Pa. Electromagnetic carrier system for heavy plate. 1,685,539; Sept. 25.

Gould, Frank D., Oakland, Calif. Auto top. 1,685,530; Sept. 25.

Graham, Albert G., Monette, Ark. Carpenter's rule. 1,685,486; Sept. 25.

Granat, Joseph, San Francisco, Calif. Wedding ring. Des. 76,388; Sept. 25.

Granat, Joseph, San Francisco, Calif. Wedding ring. Des. 76,389; Sept. 25.

Granat, Joseph, San Francisco, Calif. Wedding ring. Des. 76,390; Sept. 25.

Grasselli Dyestuff Corporation. (See Haller, Josef, assignor.)

Green, J Birchard, assignor to Chicago Steel & Wire Company, Chicago, Ill. Stabilizing and modifying the metallic welding arc. 1,685,082; Sept. 25.

Gregory & Read Company. (See Gulliford, Nicholas L., assignor.)

Gretsch, Frederick, Brooklyn, N. Y. Musical instrument. 1,685,706; Sept. 25.

Griggs, Elmer V., White Plains, assignor to Western Electric Company, Incorporated, New York, N. Y. Transmission system. 1,685,357; Sept. 25.

Grimes, Charles P., assignor to Pedwyn Balancer Corporation, Syracuse, N. Y. Safety lock for counterbalancing devices. 1,685,585; Sept. 25.

Groak, Irwin D., Chicago, Ill. Mounting for water-purifying apparatus. Des. 76,391; Sept. 25.

Grob, Benjamin. (See Pfau, A., and Grob.)

Groenke, John H., assignor to The Bucher & Gibbs Plow Company, Canton, Ohio. Self-leveling wheeled plow. 1,685,321; Sept. 25.

Grosswelschede, Julius, and G. Reichenbecher, Mulheim-Ruhr, assignors to Vereinigte Stahlwerke Aktiengesellschaft, Dusseldorf, Germany. Manufacture of highest-pressure conduits. 1,685,402; Sept. 25.

Grounds, Wick. (See Morris, O. E., Crumrine, and Grounds.)

Guerin, Cornelius F., assignor of one-half to N. M. Guinsburg, New York, N. Y. Jack. 1,685,097; Sept. 25.

Guggenheim Brothers. (See Burdick, Charles L., assignor.)

Guinsburg, Nathan M. (See Guerin, Cornelius F., assignor.)

Guinzburg, George K., Chappaqua, assignor to I. B. Kleinert Rubber Company, New York, N. Y. Hat protector. 1,685,556; Sept. 25.

Gulliford, Nicholas L., Peabody, assignor to Gregory & Read Company, Boston, Mass. Heel-dropping machine. 1,685,743; Sept. 25.

Gunning, William A., assignor to American Optical Company, Southbridge, Mass. Lens-grinding machine. 1,685,139; Sept. 25.

Guthrie, Eugene P., Dallas, Tex. Garden tool. 1,685,217; Sept. 25.

Haas, Gertrude M., executrix. (See Haas, Jackson O.)

Haas, Jackson O., deceased, Philadelphia, Pa.; G. M. Haas, executrix. Bottle seal and finishing the same. 1,685,744; Sept. 25.

Hager, Harold H., Point Place, Ohio. Screen for vehicle window frames. 1,685,587; Sept. 25.

Hale, Joseph H., Linden, Calif. Scraper. 1,685,487; Sept. 25.

Haller, Josef, Wiesdorf, near Cologne-on-the-Rhine, Germany, assignor to Grasselli Dyestuff Corporation, New York, N. Y. Halogenides of aromatic oxaminic acids. 1,685,698; Sept. 25.

Halloway, Ernest T., Milwaukee, Wis. Automobile body. Des. 76,392; Sept. 25.

Hammond, Cecil F., and W. Shackleton, London, England. Combined step and wall or extension ladder. 1,685,632; Sept. 25.

Hammond, Guy L., L. H. Messinger, jr., and W. Nicholas, assignors to The Black Rock Manufacturing Company, Bridgeport, Conn. Rubber-ring-cutting machine. 1,685,127; Sept. 25.

Hansen, Peter V., Salem, S. Dak. Engine-cooling fan. 1,685,323; Sept. 25.

Harcourt, Clyde L., Seattle, Wash. Mechanical manikin. 1,685,358; Sept. 25.

Hardesty, Llewellyn C., Scotia, N. Y., assignor to General Electric Company. Automatic motor starter. 1,685,671; Sept. 25.

Harding, John A., Maricopa, Calif. Spider having mechanically-operated pipe slips. 1,685,284; Sept. 25.

Harnly, David H., Chicago, Ill. Weather strip. 1,685,324; Sept. 25.

Hart, Fred V. (See Winkley, E. E., and Hart.)

Haseltine, Stacy B., Chicago, Ill., assignor, by mesne assignments, to W. H. Miner, Inc. Antifriction bearing. 1,685,160; Sept. 25.

Hays, Milton D., Overbrook, Pa. Gravity water motor. 1,685,285; Sept. 25.

Heald Machine Company, The. (See Kempton, H. E., Gallimore, and Woytych, assignors.)

Hecht, Max. (See Rodman, C. J., and Hecht.)

Heenan & Froude Limited. (See Walker, George H., assignor.)

Helman, Samuel. (See Davis, J. P., and Helman.)

Heinke, Alfred J., Towaco, N. J., assignor to H. R. Mallinson & Co., Inc., New York, N. Y. Textile fabric or similar article of manufacture. Des. 76,393; Sept. 25.

Hemming, Carl H., New Haven, Conn. Table cutlery. 1,685,588; Sept. 25.

Hendler, Manuel. (See Cover, Harry C., assignor.)

Herb, Otto J., assignor to The Bassick Manufacturing Company, Chicago, Ill. Lubricating device. 1,685,359; Sept. 25.

Hercules Powder Company. (See Stuart, Joseph 2d, assignor.)

Hershey Manufacturing Company. (See Hershey, Orville S., assignor.)

Hershey, Orville S., assignor to Hershey Manufacturing Company, Chicago, Ill. Automobile lock. 1,685,128; Sept. 25.

Heybach, Frederick J., Savannah, Ga. Automatic torch lighter. 1,685,633; Sept. 25.

Hickok, W. O., Manufacturing Company, The. (See Broadmeyer, Albert, assignor.)

Higham, John, Port Richmond, N. Y., assignor to Display Stage Lighting Co. Inc. Electric-cable-coupling connector. 1,685,420; Sept. 25.

Hilliker, Robert E. (See Emons, Ernest E., assignor.)

Hilton, Avery J., Gloucester, Mass. Saxophone. 1,685,129; Sept. 25.

Hobson, Arthur K., assignor to The Hobson and Botts Company, Danbury, Conn. Spoon or similar article. Des. 76,394; Sept. 25.

Hobson and Botts Company, The. (See Hobson, Arthur K., assignor.)

Hodges, Reginald. (See Hodges, Thomas, T. R. W., and R.)

Hodges, Thomas, T. R. W., and R., Cornwall, England. Apparatus for raising and locating submerged vessels. 1,685,540; Sept. 25.

Hodges, Thomas R. W. (See Hodges, Thomas, T. R. W., and R.)

Hoffman, Robert B., Monterey, Calif. Cleaning composition of matter. 1,685,360; Sept. 25.

Holmes, Morris P., Claremont, N. H., assignor to Sullivan Machinery Company. Mining machine. 1,685,403; Sept. 25.

Holt, John W., assignor to National Malleable and Steel Castings Company, Cleveland, Ohio. Vehicle wheel structure. 1,685,130; Sept. 25.

Holt, Joseph H., assignor to Darco Corporation, Wilmington, Del. Revivifying furnace. 1,685,745; Sept. 25.

Homans, William P., Canton, assignor to Alsatian Machine Words, Limited, Boston, Mass. Bearing for top-doffing rolls. 1,685,218; Sept. 25.

Honaman, Richard K., Bloomfield, N. J., assignor to American Telephone and Telegraph Company. Multiwinding discharge balance coil. 1,685,161; Sept. 25.

Hood Rubber Company. (See Glidden, A. A., and Knowland, assignors.)

Hoppmann, Georg P., Brooklyn, N. Y. Swimming apparatus. 1,685,083; Sept. 25.

Housley, William F., Annapolis, and E. G. Townsend, Camp Parole, Md. Valve-spring compressor. 1,685,548; Sept. 25.

Howard, William H., Salt Lake City, Utah. Recovery of sulphur. 1,685,231; Sept. 25.

Hoyt, John T., Hazleton, Pa., assignor to United Filters Corporation, New York, N. Y. Apparatus for separating liquid from pulp fibers. 1,685,084; Sept. 25.

Hoyt, John T., Hazleton, Pa., assignor to United Filters Corporation, New York, N. Y. Dewatering apparatus. 1,685,085; Sept. 25.

Hubbell, Harvey, Incorporated. (See Hubbell, Harvey, jr., assignor.)

Hubbell, Harvey, jr., assignor to Harvey Hubbell, Incorporated, Bridgeport, Conn. Cap and shell fastening. 1,685,361; Sept. 25.

Huff, Lyman C., assignor to Universal Oil Products Company, Chicago, Ill. Process and apparatus for converting hydrocarbons. 1,685,488; Sept. 25.

Hughes, Hugh R., assignor of one-fourth to D. R. Frost, one-fourth to H. A. Mutch, and one-fourth to H. J. Papineau, Kellogg, Idaho. Tire-deflation signal. 1,685,325; Sept. 25.

Hummer, Charles L., Newark, N. J., assignor to American Car and Foundry Company, New York, N. Y. Tank-car coil heater. 1,685,131; Sept. 25.

Humphreys, Eric J., Lancaster, Pa., assignor to Armstrong Cork Company. Linoleum or similar hard-surfaced floor covering. Des. 76,395; Sept. 25.

Hunter, Percy, E., Pittsburgh, Pa., assignor of one-half to B. West, Weirton, W. Va. Tinning pot. 1,685,162; Sept. 25.

Huntington, Edward E., assignor to The Willys-Overland Company, Toledo, Ohio. Dash light. 1,685,421; Sept. 25.

Hupp Motor Car Corporation. (See Punke, John J., assignor.)

Hurlburt, Dane, Cannes, France. Parachute. 1,685,422; Sept. 25.

Hurlburt, Lee R., assignor to Pennsylvania Rubber Company, Jeannette, Pa. Making tennis balls. 1,685,423; Sept. 25.

Hurrell, Guy C., Blackheath, London, England. Emulsification apparatus. 1,685,424; Sept. 25.

Huston, Charles L. (See Goodfellow, Alfred, assignor.)

Hutchinson, Orrin F. (See Mau, E. A., and Hutchinson.)

Hutchison, Miller R., Llewelyn Park, N. J., assignor, by mesne assignments, to Acoustic Products Company, New York, N. Y. Loud-speaker unit. 1,685,086; Sept. 25.

Hymans, Frederick, Yonkers, N. Y., assignor to Otis Elevator Company, Jersey City, N. J. Elevator safety appliance. 1,685,232; Sept. 25.

I. G. Farbenindustrie Aktiengesellschaft. (See Dohmaier, Karl, assignor.)

I. G. Farbenindustrie Aktiengesellschaft. (See Nüsslein, Joseph, assignor.)

Indiana Lamp Corporation. (See Springer, Edgar D., assignor.)

International Harvester Company. (See Benjamin, Bert R., assignor.)

International Harvester Company. (See Dwyer, William C., assignor.)

International Harvester Company. (See Engstrom, Gustaf W., assignor.)

International Motor Company. (See Jupp, William B., assignor.)

International Motor Company. (See Masury, Alfred F., assignor.)

International Silver Company. (See Theobald, Jean, assignor.)

Jackson, George P., Flushing, assignor to Combustion Engineering Corporation, New York, N. Y. Tile-anchoring device. 1,685,568; Sept. 25.

Jacobson, Alvin E. (See Johnson, Paul A., assignor.)

Jaeger, Alphons O., Crafton, assignor to The Selden Company, Pittsburgh, Pa. Purification of benzoic acid and its derivatives. 1,685,634; Sept. 25.

Jaeger, Alphons O., Crafton, assignor to The Selden Company, Pittsburgh, Pa. Catalytic oxidation of anthracene. 1,685,635; Sept. 25.

Jaeger, Alphons O., Pittsburgh, assignor to The Selden Company, Pittsburgh, Pa. Catalytic apparatus. 1,685,672; Sept. 25.

Jandus, Herbert S., and J. R. Morgan, assignors to The C. G. Spring & Bumper Company, Detroit, Mich. Clamp for vehicle bumper. Des. 76,396; Sept. 25.

Jandus, Herbert S., and J. R. Morgan, assignors to The C. G. Spring & Bumper Company, Detroit, Mich. Clamp plate. Des. 76,397; Sept. 25.

Jandus, Herbert S., and J. R. Morgan, assignors to The C. G. Spring & Bumper Company, Detroit, Mich. Clamp plate. Des. 76,398; Sept. 25.

Jansen, Carl, New York, N. Y. Lace for footwear. 1,685,489; Sept. 25.

Jeanson, Marl, Etrelles, France. Combined rake and binding apparatus. 1,685,163; Sept. 25.

Jefferson Forge Products Company. (See Wilber, Carl L., assignor.)

Jensen, John, assignor to Whitney Metal Tool Company, Rockford, Ill. Hand punch and the like. 1,685,604; Sept. 25.

Jewett, John R., jr., Grand Island, Nebr. Dishpan holder for sinks. 1,685,233; Sept. 25.

Joannides, Christie, London, England. Artificial teeth and fixing the same. 1,685,541; Sept. 25.

Johanson, Adolph T., assignor of one-half to M. E. Page, jr., Chicago, Ill. Water-heating unit. 1,685,453; Sept. 25.

Johansson, Ernest G. (See Palmer, G. E., and Johansson.)

Johansson, Ernest G., Boston, assignor, by mesne assignments, to The Palmer Electric & Manufacturing Co., Waltham, Mass. Casing for safety switches. 1,685,490; Sept. 25.

Johnson, Carl, Los Angeles, Calif. Testing device for valves. 1,685,454; Sept. 25.

Johnson, Carl M., Chicago, Ill. Nailing strip or block. 1,685,491; Sept. 25.

Johnson, George A., assignor to W. H. Miner, Inc., Chicago, Ill. Draft-rigging-key retainer. 1,685,164; Sept. 25.

Johnson, Gustav, West Roxbury, Mass., assignor, by mesne assignments, to The Bassick Manufacturing Company, Chicago, Ill. Lubricating apparatus. 1,685,404; Sept. 25.

Johnson, Harold M., St. Louis, Mo. Apparatus for reaming smoking pipes. 1,685,087; Sept. 25.

Johnson, Norman E., Chicago, Ill. Automobile radiator cap. 1,685,405; Sept. 25.

Johnson, Paul A., assignor of one-half to A. E. Jacobson, Grand Haven, Mich. Toilet-seat hinge. 1,685,088; Sept. 25.

Johnson, William S., and J. W. Sheffer, Berwick, Pa., assignors to American Car and Foundry Company, New York, N. Y. Electric heater for long bars. 1,685,133; Sept. 25.

Joiner, Sylvester L., McGregor, Tex. Combined grain-door strip and side-door-post protector. 1,685,197; Sept. 25.

Joiner, Sylvester L., McGregor, Tex. Combined wear plate and centering device for draft-rigging keys for railway cars. 1,685,455; Sept. 25.

Jones, E. D., et al. (See Jones, W. S., and Baker, assignors.)

Jones, Felix B., Chicago, Ill. Firearm. 1,685,673; Sept. 25.

Jones, Winfield S., et al. (See Jones, W. S., and Baker, assignors.)

Jones, Winfield S., Brea, and H. U. Baker, assignors of three-eighths to W. S. Jones, two-eighths to H. U. Baker, and three-eighths to E. D. Jones, Los Angeles, Calif. Perforator. 1,685,492; Sept. 25.

Jordan, James D., assignor to The Ken-Rad Corporation, Owensboro, Ky. Thermionic vacuum tube. 1,685,326; Sept. 25.

Joseph, William C., Fort Worth, Tex. Fastening device for floor coverings. 1,685,362; Sept. 25.

Joslyn Manufacturing & Supply Co. (See Smalley, Burton M., assignor.)

Joy, Robert W., Brooklyn, assignor to American Car and Foundry Company, New York, N. Y. Car-tank-dome closure. 1,685,132; Sept. 25.

Judd, H. L., Company. (See Vermillion, Raymond H., assignor.)

Jupp, William B., Brooklyn, assignor to International Motor Company, New York, N. Y. Removable-unit mounting. 1,685,569; Sept. 25.

Kall, Simon, Akron, Ohio. Automatic feeding mechanism for tapping machines. 1,685,542; Sept. 25.

Kalkanis, James N., Detroit, Mich. Candy-making device. 1,685,005; Sept. 25.

Kammerer, Archer W., Fullerton, Calif. Well-drilling bit. 1,685,327; Sept. 25.

Kapff, Karl F., et al. (See Auble, Lawrence, assignor.)

Kassler, Adolph, assignor to American Car and Foundry Company, New York, N. Y. Hopper car. 1,685,089; Sept. 25.

Katcher, Morris, assignor to Columbia Metal Box Co., New York, N. Y. Quick-make-and-break electric switch. 1,685,234; Sept. 25.

Kearney, George F, Andalusia, assignor to Bulletin Co., Philadelphia, Pa. Badge or similar article. Des. 76,399; Sept. 25.

Keedy, Edward J., Schenectady, N. Y. Toy magnetic crane. 1,685,707; Sept. 25.

Kelleher, Patrick J., Salem, Mass. Battery composition. 1,685,674; Sept. 25.

Kelly, Harry G., Omaha, Nebr. Roofing strip. 1,685,493; Sept. 25.

Kelly, John A., Brooklyn, N. Y., assignor to United Shoe Machinery Corporation, Paterson, N. J. Heel-seat fitting and molding machine. 1,685,363; Sept. 25.

Kemp, Joseph, Baltimore, Md. Tube-drawing plug. 1,685,630; Sept. 25.

Kempter, Fritz, Stuttgart, Germany. Kneading machine. 1,685,637; Sept. 25.

Kempton, Herbert E., K. F. Gallimore, and R. M. Woytych, Fond du Lac, Wis., assignors, by mesne assignments, to the Heald Machine Company, Worcester, Mass. Chuck. 1,685,235; Sept. 25.

Ken-Rad Corporation, The. (See Jordan, James D., assignor.)

Kendall, William G. (See MacDougall, H., and Kendall.)

Kern, Fred T., Milwaukee, Wis. System for storing and handling material. 1,685,675; Sept. 25.

Kern, Leo, Villingen in Baden, assignor to Kienzle Uhrenfabriken Aktiengesellschaft, Schwenningen-on-the-Neckar, Germany. Fare indicator. 1,685,589; Sept. 25.

Kevitt, Tice C., Athenia, N. J. Bird house. Des. 76,400; Sept. 25.

Key, Frederick E., East St. Louis, Ill. Apparatus for dispensing ice cream and the like. 1,675,250; Sept. 25.

Keys, John H., assignor to The Dayton Irrigation Company, Dayton, Ohio. Sprinkler. 1,685,165; Sept. 25.

Keyser, Harry M. (See Combes, A. L., and Keyser.)

Kienzle Uhrenfabriken Aktiengesellschaft. (See Kern, Leo, assignor.)

Kimman, Theodore P., Cleveland, Ohio, assignor to Chicago Pneumatic Tool Company, New York, N. Y. Cleaning and polishing wheel. 1,685,406; Sept. 25.

Klausmeyer, David C., assignor to The Cincinnati Bickford Tool Company, Oakley, Cincinnati, Ohio. Condensed clutch for reversing mechanisms. 1,685,638; Sept. 25.

Kleinert, I. B., Rubber Company. (See Guinzburg, George K., assignor.)

Knesch, Adolph, Rule, Tex. Lock and latch. 1,685,708; Sept. 25.

Knowland, Thomas M. (See Glidden, A. A., and Knowland.)

Koch, Jacob, Buffalo, N. Y. Shelf strip. 1,685,456. Sept. 25.

Koch, Lydia B., assignor to Reinforced Paper Bottle Corporation, New York, N. Y. Constructing bottle-receptacle elements. 1,685,494; Sept. 25.

Kogler, Albert P. (See Kogler, Elsa S. and A. P.)

Kogler, Elsa S. and A. P., San Francisco, Calif. Sanitary brush. 1,685,328; Sept. 25.

Kopatz, Erich T. P., Dearborn, Mich. Electric water heater. 1,685,364; Sept. 25, 1928.

Koster, John, San Francisco, Calif. Smoking stand. Des. 76,401; Sept. 25.
Krause, Arthur R., Woodhaven, N. Y., assignor to Max Schaffer Co., Inc. Lighting-fixture bar or article of analogous nature. Des. 76,402; Sept. 25.
Krauth, Julius, Sontheim-Heilbronn, Germany. Apparatus for playing skittles. 1,685,699; Sept. 25.
Kulenkampff, Carl A., New York, N. Y. Brick-ice-cream cutter. 1,685,700; Sept. 25.
Kwik-Mix Concrete Mixer Co. (See Gilson, Michael, assignor.)
Lackner, Michael J., Dortmund, Germany. Burner for regenerative furnaces. 1,685,543; Sept. 25.
Ladd, Charles W., Chipman, assignor of one-half to T. Sing, Edmonton, Alberta, Canada. Hillside plow. 1,685,365; Sept. 25.
La France, Richard, Toledo, Ohio. Differential timing device. 1,685,166; Sept. 25.
Lagall, Leo, El Reno, Okla. Internal-combustion engine. 1,685,639; Sept. 25.
La Hodny, William, assignor to Standard Mirror Co. Inc., Buffalo, N. Y. Mirror bracket. 1,685,544; Sept. 25.
Lake, Willett R. (See Tucker, Carl L., assignor.)
Lamb, Donald C., assignor to Taylor Instrument Companies, Rochester, N. Y. Pressure-responsive instrument of the Bourdon spring type. 1,685,457; Sept. 25.
Lamson and Sessions Company, The. (See Province, John and B., assignors.)
Lang, Andrew, Edmonton, Alberta, Canada. Automobile body. Des. 76,403; Sept. 25.
Lapointe, J. N., Company, The. (See West, Donald H., assignor.)
La Porte, Ralph P. (See Pitkin, A. F., and La Porte.)
Larrowe Construction Company. (See Tressler, Donald K., assignor.)
Larsh, Everett P., assignor to The Master Electric Company, Dayton, Ohio. Short circuiter. 1,685,549; Sept. 25.
Larson, John M., assignor to National Regulator Company, Chicago, Ill. Fluid-pressure-control valve. 1,685,286; Sept. 25.
Latz, Harry, assignor to Harry Latz Service, Inc., New York, N. Y. Device for creating accuracy in the art of boxing. 1,685,495; Sept. 25.
Latz, Harry, Service, Inc. (See Latz, Harry, assignor.)
Lavault, André, Paris, France, assignor to Associated Merchandising Corporation. Bottle for perfume or the like. Des. 76,405; Sept. 25.
Lavell, Lulu V., Minneapolis, Minn. Thermometer frame. Des. 76,404; Sept. 25.
Lawson, Joseph, Great St. Helens, London, assignor to Asiatic Petroleum Company, Limited, St. Helens Court, London, England. Plug cock. 1,685,236; Sept. 25.
Leash, Homer E., Oakland, Calif. Defective-lumber-repairing machine. 1,685,366; Sept. 25.
Leaver, James M., Oakland, assignor to The Pacific Lumber Company, San Francisco, Calif. Method and apparatus for making artificial silk. 1,685,640; Sept. 25.
Lee, Adelbert E., Akron, Ohio. Brake. 1,685,709; Sept. 25.
Lee, Harry S., Plymouth, Mich. Permanent mold construction. 1,685,545; Sept. 25.
Lee, Harry S., Plymouth, Mich. Controlling metal castings. 1,685,546; Sept. 25.
Lee, John, and C. Pearson, Ingersoll, Ontario, Canada. Sheet-metal container. 1,685,367; Sept. 25.
Leigh, Fred A., Chicago, Ill. Cutter attachment. 1,685,590; Sept. 25.
Leon, Lewicki J., West Chicago, Ill. Parrot stand. Des. 76,406; Sept. 25.
Leon, Lewicki J., West Chicago, Ill. Bird cage. Des. 76,407; Sept. 25.
Leonhart, Henry A., Bangor, Wis. Furnace. 1,685,710; Sept. 25.
Leopold, Samuel N., assignor to Rose Display Box Company, Chicago, Ill. Display box. 1,685,606; Sept. 25.
Levien, Louis, New York, N. Y. Vanity tray. 1,685,237; Sept. 25.
Levine, Max, Brooklyn, N. Y. Binding. 1,685,607; Sept. 25.
Lidback, Leonard P., Honolulu, Hawaii. Airship. 1,685,458; Sept. 25.
Lifter, Anna, New York, N. Y. Apparel. 1,685,091; Sept. 25.
Lifshitz, Alex M., Brooklyn, N. Y. Automatic drum. 1,685,090; Sept. 25.
Lindemann, A. J., & Hoverson Company. (See Rutenber, Edwin A., assignor.)
Link-Belt Company. (See Petersen, J. H. D., and Wilson, assignors.)
Linn, Holman H., assignor to The Linn Manufacturing Corporation, Morris, N. Y. Vehicle drive. 1,685,641; Sept. 25.
Linn, Holman H., assignor to The Linn Manufacturing Corporation, Morris, N. Y. Tractor. 1,685,676; Sept. 25.
Linn Manufacturing Corporation, The. (See Linn, Holman H., assignor.)
Lipke, Frank, Mishawaka, Ind. Dirigible headlight. 1,685,092; Sept. 25.
Lipschutz George, Philadelphia, Pa. Electric attachment plug. 1,685,608; Sept. 25.
Litty, John R., and T. B. Lundin, Philadelphia, Pa. Subdividing attachment for measuring machines. 1,685,425; Sept. 25.
Ljunglof, George L., assignor to American Optical Company, Southbridge, Mass. Workholder. 1,685,167; Sept. 25.
Lochrie, Thomas, et al. (See Adams, Ervin, assignor.)
Loewe, Siegmund, Berlin-Friedenau, Germany, assignor to Radio Corporation of America. Station scale. 1,685,426; Sept. 25.
Lomax, Clarence E., Oak Park, assignor to Automatic Electric Inc., Chicago, Ill. Automatic telephone system. 1,685,547; Sept. 25.
Lorentzen, Hans K., New York, N. Y. Coin box. 1,685,219; Sept. 25.
Lorenz, William A., West Hartford, assignor to The Otaka Fabric Company, Hartford, Conn. Machine and drying crinkled paper. 1,685,427; Sept. 25.
Lowry, Michael J., Los Angeles, Calif. Toy baseball game. 1,685,428; Sept. 25.
Ludw. Loewe & Co. Actiengesellschaft. (See Storck, Walter, assignor.)
Luipersbek, Frank, Boundbrook, N. J. Wind vane. 1,685,134; Sept. 25.
Lund, Isaac, Chicago, Ill. Radiocabinet. Des. 76,408; Sept. 25.
Lund, Thomas, Beverly, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Finishing machine. 1,685,368; Sept. 25.
Lundin, Trued B. (See Litty, J. R., and Lundin.)
Lykken, Henry G., Minneapolis, Minn. Low-temperature distillation apparatus. 1,685,496; Sept. 25.
Lynch, Charles J., San Francisco, Calif. Alarm mechanism. 1,685,329; Sept. 25.
Lynch, Charles W., Perry, Okla., assignor to Pickering Lumber Company, Kansas City, Mo. Corner plate for derricks. 1,685,711; Sept. 25.
MacClatchie, John W., Compton, Calif. Coupling. 1,685,459; Sept. 25.
MacDougall, Harold, Maplewood, and W. G. Kendall, Newark, N. J. Magazine buffer. 1,685,333; Sept. 25.
Mallinson, H. R., & Co. (See Heinke, Alfred J., assignor.)
Mangan, Michael J., Des Plaines, Ill. Cigarette-package holder. 1,685,765; Sept. 25.
Mann, James H., jr., Mont Eagle, Tenn., assignor to Southwestern Sales Corporation, New York, N. Y. Coin-detecting vending machine. 1,685,550; Sept. 25.
Mann, James H., jr., St. Petersburg, Fla., assignor to Southwestern Sales Corporation, New York, N. Y. Spurious-coin segregator. 1,685,551; Sept. 25.
Mannich, Charles, Frankfort-on-the-Main, Germany. Dicyclic derivatives of pentamethylene and manufacture of same. 1,685,407; Sept. 25.
Mark, Abraham F., Cedar Rapids, Iowa. Humidifier. 1,685,198; Sept. 25.
Marsh, Jas. P., & Company. (See Rose, Alexander D. assignor.)
Marshall, Draper T., Vancouver, British Columbia, Canada. Food cabinet. 1,685,712; Sept. 25.
Maroney, John M., Oakland, Calif. Direction-indicating signal. 1,685,330; Sept. 25.
Martin, George C., Los Angeles, Calif. Shock absorber. 1,685,497; Sept. 25.
Martin, John H., Central Park, N. Y. Preparation of fur for shrinking and felting. 1,685,168; Sept. 25.
Martin, John H., Central Park, N. Y. Preparation of fur for shrinking and felting. 1,685,169; Sept. 25.
Masing, Georg, Berlin, and O. Dahl, Berlin-Charlottenburg, assignors to Siemens & Halske Aktiengesellschaft, Siemensstadt, near Berlin, Germany. Improving the qualities of nickel beryllium alloy. 1,685,570; Sept. 25.
Master Electric Company, The. (See Larsh, Everett P., assignor.)
Masury, Alfred F., assignor to International Motor Company, New York, N. Y. Brake. 1,685,429; Sept. 25.
Masury, Alfred F., assignor to International Motor Company, New York, N. Y. Suspension for electric railway motors. 1,685,430; Sept. 25.
Matthes, Samuel S., assignor to The Ohio Brass Company, Mansfield, Ohio. Trolley-wire clamp. 1,685,431; Sept. 25.
Mau, Edward A., and O. F. Hutchinson, New Haven, Conn., assignors, by mesne assignments, to Rockbestos Products Corporation. Insulated wire. 1,685,369; Sept. 25.
Maxwell, Howard, Schenectady, N. Y., assignor to General Electric Company. Induction motor. 1,685,677; Sept. 25.
McCarthy, Charlotte E., et al. (See Auble, Lawrence, assignor.)
McCarty, William J., Murdock, Minn. Foot-operated steering gear. 1,685,332; Sept. 25.
McClure, Elmer P., La Grange, Ill. Light-projecting device. 1,685,609; Sept. 25.
McCormick, Francis H., Glen Ellyn, assignor to Edison Electric Appliance Company, Inc., Chicago, Ill. Water heater. 1,685,642; Sept. 25.
McCullough, Paul J., assignor to Scullin Steel Co., St. Louis, Mo. Magnetic pulley. 1,685,498; Sept. 25.
McDonald, Alexander, Pittsburgh, and W. O. Smith, Wilkinsburg, assignors of seventy one-hundredths to J. C. Young, Pittsburgh, Pa., and thirty one-hundredths to said Smith. Ventilator for chimneys. 1,685,170; Sept. 25.
McDonald, Leslie R., Westmount, Montreal, Quebec, Canada. Display apparatus. 1,685,499; Sept. 25.
McDowell, William R., Las Vegas, Nev. Derrick walking beam. 1,685,238; Sept. 25.

McEldowney, Robert E., assignor to New Martinsville Glass Mfg. Co., New Martinsville, W. Va. Pitcher or similar article. Des. 76,409; Sept. 25.
McEntire, Frank M., Milwaukee, Wis. Bathtub dressing table for children. 1,685,093; Sept. 25.
McEvoy, Joseph H., jr., Houston, Tex. Forming well strainers. 1,685,287; Sept. 25.
McKee Glass Company. (See Richardson, Joseph S., assignor.)
McLaughlin, Herrold L. (See McLaughlin, Wilson L. and H. L.)
McLaughlin, Wilson L. and H. L., Des Moines, Iowa. Apparatus for feeding powdered fuel. 1,685,331; Sept. 25.
McVicker, Walter J., and A. R. Sandt, assignors to Enterprise Machinery Company, Minneapolis, Minn. Separable tractor dump wagon. 1,685,171; Sept. 25.
Mead, Homer A., Turlock, Calif. Open-end adjustable wrench. 1,685,432; Sept. 25.
Meller, Reginald B., Alameda, assignor to The Paraffine Companies, Inc., San Francisco, Calif. Display stand. 1,685,571; Sept. 25.
Mendez, Alvaro, East Orange, N. J., assignor to American Car and Foundry Company, New York, N. Y. Stanchion bracket. 1,685,135; Sept. 25.
Merrill, Arthur H., Hartford, Conn. Key case. 1,685,288; Sept. 25.
Messinger, Lester H. (See Hammond, G. L., Messinger, and Nicholas.)
Meuer, George J., assignor to The Cutler-Hammer Mfg. Co., Milwaukee, Wis. Electric switch. 1,685,500; Sept. 25.
Meyerhofer, Albert. (See Buchner, Max, assignor.)
Micali, John, Lawrence, Mass. Handle-securing means for shank-forming tools. 1,685,643; Sept. 25.
Michaud, Arthur J., Montreal, Quebec, Canada. Tire and rim. 1,685,552; Sept. 25.
Michel, Gilbert, Bagneux, assignor to H. O. Berg, Paris, France. Sand mold for casting magnesium and making same. 1,685,553; Sept. 25.
Mid-West Manufacturing Company. (See Benedict, George W., assignor.)
Middleton, Edmund B., Parlin, N. J., assignor to E. I. du Pont de Nemours & Company, Wilmington, Del. Acylating carbohydrates. 1,685,220; Sept. 25.
Miles, James C., Cleveland, Ohio. Hot-air heating and ventilating apparatus. Re17,089; Sept. 25.
Miller, Clement G., Kansas City, Mo. Artificial teeth. 1,685,289; Sept. 25.
Milton, John L., Louisville, Ky., assignor to Cheatham Electric Switching Device Company. Switch-throwing device. 1,685,172; Sept. 25.
Miner, W. H., Inc. (See Haseltine, Stacey B., assignor.)
Miner, W. H., Inc. (See Johnson, George A., assignor.)
Miner, W. H., Inc. (See O'Connor, John F., assignor.)
Mirfield, George E., Youngstown, Ohio. Manufacturing pipe couplings. 1,685,678; Sept. 25.
Mitchell, Harry W. (See Evans, Floyd G., assignor.)
Molz, Emil, Halle-on-the-Saale, assignor to Chemische Fabrik Ludwig Meyer, Mayence, Germany. Dry fungicide. 1,685,715; Sept. 25.
Montgomery, Herbert D., New York, N. Y. Thermostatically-controlled circuit closer. 1,685,136; Sept. 25.
Moody, Joseph F., Tulsa, Okla. Oil-well elevator. 1,685,713; Sept. 25.
Moore, Arlington, Worcester, Mass. Paper container having body with renitent neck and making same. 1,685,370; Sept. 25.
Moore, Henry A. (See Stuart, T. F., and Moore.)
Moorer, Thaddeus B., Charleston, S. C. Rheostat. 1,685,714; Sept. 25.
Moran, Charles A., Bernardsville, N. J. Reciprocating-saw machine. 1,685,239; Sept. 25.
Morgan, John R. (See Jandus, H. S., and Morgan.)
Morris, Onas E., G. E. Crumrine, and W. Grounds, Cedar Hill, Tex. Cotton-planter attachment. 1,685,554; Sept. 25.
Morse, Clark T., assignor, by mesne assignments, to American Blower Corporation, Detroit, Mich. Heating and ventilating apparatus. 1,685,610; Sept. 25.
Morse, Lawrence H., assignor to The American Multigraph Company, Cleveland, Ohio. Printing press. 1,685,611; Sept. 25.
Mosher, James H., Schenectady, N. Y., assignor to General Electric Company. Support for vacuum tubes. 1,685,766; Sept. 25.
Motor Industries, Inc. (See Bethenod, Joseph, assignor.)
Motor Terminals Company. (See Fitch, Benjamin F., assignor.)
Mounts, Daniel D., Los Angeles, Calif. Phonograph. 1,685,433; Sept. 25.
Muentener, Christian, Bogota, N. J. Stair rod. 1,685,679; Sept. 25.
Mullen, George B., Stroud, Okla. Oil-derrick anchor. 1,685,716; Sept. 25.
Muller, Leopold, Schonbach, Czechoslovakia. Tuning device. 1,685,717; Sept. 25.
Munters, Carl G. (See von Platen, B. C., and Munters.)
Murdoch, Alexander G., London, England. Lever linkwork apparatus. 1,685,718; Sept. 25.
Murphy, Howard J., Reading, Mass., assignor, by mesne assignments, to The Bassick Manufacturing Company, Chicago, Ill. Lubricant-expelling device. 1,685,408; Sept. 25.
Mutch, Harry A., et al. (See Hughes, Hugh R., assignor.)
Myers, Arthur L., assignor to Northern Engraving Company, La Crosse, Wis. Name plate. 1,685,334; Sept. 25.
Myers, Wilson R., and B. O. Opitz, Portland, Oreg. Depositing apparatus. 1,685,460; Sept. 25.
National Lace and Embroidery Company. (See Schmid, Werner.)
National Malleable and Steel Castings Company. (See Holt, John W., assignor.)
National Regulator Company. (See Larson, John M., assignor.)
National Screw and Manufacturing Company, The. (See Erdman, Harvey C., assignor.)
Natural Color Pictures Company. (See Fox, William F., assignor.)
Neill, David S., Genoa, Italy. Lifeboat. 1,685,719; Sept. 25.
Nellson, Albert A., Beachwood, N. J. Combination saw and square. 1,685,721; Sept. 25.
Nelson, Albert, Buffalo, Minn. Operating means for musical instruments. 1,685,240; Sept. 25.
Nelson, Gust, assignor of one-half to F. R. Pendleton, Vancouver, British Columbia, Canada. Floating tensions for cableways. 1,685,720; Sept. 25.
Neumann, Karl, Milwaukee, Wis. Artificial limb. 1,685,290; Sept. 25.
New Departure Manufacturing Company, The. (See Baldwin, Harry G., assignor.)
New Martinsville Glass Mfg. Co. (See McEldowney, Robert E., assignor.)
Newton, Merle M., Cragmor, Colo. Ore-concentrating device. 1,685,644; Sept. 25.
Niagara Electro Chemical Company, The. (See Baum, Gustav, assignor.)
Nicholas, William. (See Hammond, G. L., Messinger, and Nicholas.)
Nichols, Charles R., New York, N. Y. Power transmission. 1,685,371; Sept. 25.
Nichols, Charles R., New York, N. Y. Gear transmission. 1,685,461; Sept. 25.
Nichols, Daniel R., Berwick, Pa., assignor to American Car and Foundry Company, New York, N. Y. Foldable seat. 1,685,137; Sept. 25.
Nicholson, Robert M., Liberty, Tex. Gaming device. 1,685,291; Sept. 25.
Niles-Bement-Pond Company. (See Cole, Lyndon C., assignor.)
Niles-Bement-Pond Company. (See Parkes, Albert W., assignor.)
Noble, Arthur H., Pawtucket, assignor to Theodore W. Foster & Brother Company, Providence, R. I. Lip-stick holder. 1,685,768; Sept. 25.
Noble, Arthur H., Pawtucket, assignor to Theodore W. Foster & Brother Company, Providence, R. I. Lip-stick holder. 1,685,769; Sept. 25.
Nohr, Chris, Pasadena, and P. Nohr, Los Angeles, Calif. Machine for rolling soles. 1,685,555; Sept. 25.
Nohr, Peter. (See Nohr, Chris and P.)
North East Electric Company. (See Connolly, William B., assignor.)
North East Electric Company. (See Dorsey, Farnum F., assignor.)
North East Electric Company. (See Sullivan, Raymond H., assignor.)
North East Electric Company. (See Wallis, Cyril T., assignor.)
Northern Engraving Company. (See Myers, Arthur L., assignor.)
Northup, Amos E., Detroit, Mich. Closed vehicle body. Des. 76,410; Sept. 25.
Northrup, Annabelle S., Norfolk, Va. Insect trap. 1,685,241; Sept. 25.
Norton, James G., Leonia, N. J. Paper container. 1,685,138; Sept. 25.
Nowaik, Frank T., Scranton, Pa. Jack-hammer support. 1,685,372; Sept. 25.
Nüsslein, Joseph, Ludwigshafen-on-Rhine, assignor to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-Main, Germany. Fulling wool and the like. 1,685,680; Sept. 25.
Nye, Henry V., West Allis, assignor to Allis-Chalmers Manufacturing Company, Milwaukee, Wis. System of distribution. 1,685,746; Sept. 25.
Nye, Henry V., West Allis, assignor to Allis-Chalmers Company, Milwaukee, Wis. System of distribution. 1,685,747; Sept. 25.
Oakes, Raymond H., assignor to R. H. Comey, Brooklyn Company, Inc., Brooklyn, N. Y. Treating hats and the like. 1,685,199; Sept. 25.
Oakley, Edward C. F., Norbury, England. Apparatus for delivering measured quantities of liquids. 1,685,409; Sept. 25.
Oakley, Laurence M., Trenton, N. J. Shoe sole. Des. 76,411; Sept. 25.
O'Connor, John F., Chicago, Ill., assignor, by mesne assignments, to W. H. Miner, Inc. Antifriction bearing. 1,685,173; Sept. 25.
O'Connor, John F., assignor to W. H. Miner, Inc., Chicago, Ill. Refrigerator-car-door-operating mechanism. 1,685,174; Sept. 25.
O'Connor, John F., assignor to W. H. Miner, Inc., Chicago, Ill. Door-operating mechanism. 1,685,175; Sept. 25.
O'Connor, John F., assignor to W. H. Miner, Inc., Chicago, Ill. Shock-absorbing mechanism. 1,685,176; Sept. 25.

O'Connor, John F., assignor to W. H. Miner, Inc., Chicago, Ill., Buffing mechanism. 1,685,177; Sept. 25.
O'Connor, John F., assignor to W. H. Miner, Inc., Chicago, Ill. Buffing mechanism. 1,685,178; Sept. 25.
O'Connor, John F., Chicago, Ill., assignor, by mesne assignments, to W. H. Miner, Inc. Antifriction bearing. 1,685,612; Sept. 25.
Obagen, Heinrich, Breslau, Germany. Milling cutter for cutting sharply-pointed angular incisions into wood. 1,685,373; Sept. 25.
Ohio Brass Company, The. (See Austin, Arthur O., assignor.)
Ohio Brass Company, The. (See Matthes, Samuel S., assignor.)
Ohio Foundry and Manufacturing Company, The. (See Sharp, William L., assignor.)
Ohison, John B., assignor to The Vortex Mfg. Co., Chicago, Ill. Dispensing container and dispensing articles therefrom. 1,685,292; Sept. 25.
Ohse, Walter R. (See Smiley, G. T., and Ohse.)
Onsrud Machine Works, Inc. (See Onsrud, Oscar, assignor.)
Onsrud, Oscar, assignor to Onsrud Machine Works, Inc., Chicago, Ill. Woodworking machine. 1,685,572; Sept. 25.
Onsrud, Oscar, assignor to Onsrud Machine Works, Chicago, Ill. Woodworking machine. 1,685,613; Sept. 25.
Opitz, Bernhard O. (See Myers, W. R., and Opitz.)
Ormsbee, Willard A., Taunton, Mass. Tie clip. Des. 76,412; Sept. 25.
Osborn, Robert T., Richmond, assignor, by mesne assignments to Standard Oil Company of California, San Francisco, Calif. Recovery of vapors. 1,685,501; Sept. 25.
Otis Elevator Company. (See Bjorkman, Axel W., assignor.)
Otis Elevator Company. (See Brady, Thomas, assignor.)
Otis Elevator Company. (See Hymans, Frederick, assignor.)
Otaka Fabric Company, The. (See Lorenz, William A., signor.)
Owen, Robert V., New York, N. Y. Pedometer. 1,685,242; Sept. 25.
Owens Bottle Company, The. (See Soubier, Leonard D., assignor.)
Oxford Varnish Corporation. (See Brown, Robert F., assignor.)
P & M Company, The. (See Warr, Harold G., assignor.)
Pacific Coast Borax Company. (See Cramer, Thomas M., assignor.)
Pacific Lumber Company, The. (See Leaver, James M., assignor.)
Page, Milton E., jr. (See Johanson, Adolph T., assignor.)
Palmer Electric & Manufacturing Co., The. (See Johansson, Ernest G., assignor.)
Palmer Electric and Manufacturing Company, The. (See Palmer, G. E., and Johansson, assignors.)
Palmer, Granville E., Brookline, and E. G. Johansson, Boston, assignors, by mesne assignments, to The Palmer Electric and Manufacturing Company, Waltham, Mass. Switch box. 1,685,462; Sept. 25.
Palmer, Stephen L., Teaneck, N. J. Hot-water bottle or similar article. Des. 76,413; Sept. 25.
Papineau, Harrey J., et al. (See Hughes, Hugh R., assignor.)
Paraffine Companies, The. (See Fuley, Dozier, assignor.)
Paraffine Companies, The. (See Meller, Reginald B., assignor.)
Paramount Textile Machinery Co. (See Prosser, T. W., and Wahlbeck, assignors.)
Parker, William S. (See Stevens, H. R., Parker, Shupert, and Benson.)
Parkes, Albert W., Dundas, Ontario, Canada, assignor to Niles-Bement-Pond Company, New York, N. Y. Bearing strip for machine-tool ways. 1,685,434; Sept. 25.
Parsons, Charles A., and J. Rosen, Newcastle-on-Tyne, England; said Rosen assignor to said Parsons. Insulation of conductors used in electrical apparatus. 1,685,722; Sept. 25.
Partos, Francis, London, England. Magazine pencil. 1,685,374; Sept. 25.
Paterson, John C., and G. R. Baker, London, England, assignors to Baker Perkins Company, Incorporated, New York, N. Y. Apparatus for sorting and stacking biscuits and other articles. 1,685,335; Sept. 25.
Pathfinder Accessories Corporation, The. (See Savasky, Albert A., assignor.)
Paul, William L., Berkeley, Calif., assignor to Deere & Company, Moline, Ill. Side-draft control for tractors. 1,685,375; Sept. 25.
Paull, Roy B., Seattle, Wash. Atomizing, device. 1,685,293; Sept. 25.
Peacock, Robert A., Delaware City, Del. Kick bike. 1,685,614; Sept. 25.
Pearmain, William J., assignor to Twin Disc Clutch Company, Racine, Wis. Clutch and transmission mechanism. 1,685,502; Sept. 25.
Pearson, Charles. (See Lee, J., and Pearson.)
Pederson, Harold G., Syracuse, N. Y. Counterbalancing device. 1,675,748; Sept. 25.
Pedwyn Balancer Corporation. (See Grimes, Charles P., assignor.)
Pelton Water Wheel Co., The. (See Foulds, Charles V., assignor.)
Pendleton, Frank R. (See Nelson, Gust, assignor.)
Pennsylvania Rubber Company. (See Hurlburt, Lee R., assignor.)
Petersen, John H. D., and J. W. Wilson, assignor to Link-Belt Company, Chicago, Ill. Shaker conveyer. 1,685,463; Sept. 25.
Pfau, Arnold, assignor to Allis-Chalmers Manufacturing Company, Milwaukee, Wis. Control system. 1,685,749; Sept. 25.
Pfau, Arnold, Milwaukee, and B. Grob, West Allis, assignors to Allis-Chalmers Manufacturing Company, Milwaukee, Wis. Control system. 1,685,750; Sept. 25.
Pfau, Arnold, assignor to Allis-Chalmers Manufacturing Company, Milwaukee, Wis. Bearing. 1,685,751; Sept. 25.
Pfauser, Edward M., assignor to Blackhawk Manufacturing Company, Milwaukee, Wis. Socket wrench. 1,685,503; Sept. 25.
Phiffer, Clark R., Schenectady, N. Y., assignor to General Electric Company. Adapter for vacuum tubes. 1,685,767; Sept. 25.
Philbrick, George W., Winthrop, Mass. Dog harness. 1,685,455; Sept. 25.
Phillips, Raymond C., assignor to W. S. Rush & Company, Los Angeles, Calif. Countersink machne. 1,685,200; Sept. 25.
Pickering Lumber Company. (See Lynch, Charles W., assignor.)
Pilley Packing & Flue Brush Manufacturing Company. (See Shultz, Llewellyn B., assignor.)
Pitkin, Arthur F., and E. P. La Porte, Schenectady, N. Y. Gear casing. 1,685,202; Sept. 25.
Pittsburgh Transformer Company. (See Bingay, Robert V., assignor.)
Platt, Henry. (See Platt, John W. and H.)
Platt, John W., and H., Harrow, England. Carding engine or machine. 1,685,658; Sept. 25.
Platt, Maitland S. (See Platt, William E. and M. S.)
Platt, William. (See Platt, John, W., and H.)
Platt, William E. and M. S., Toronto, Ontario, Canada. Display device. 1,685,336; Sept. 25.
Polite, Joseph, Detroit, Mich. Memorandum holder for automobile steering wheels. Des. 76,414; Sept. 25.
Pomeranz, Jacob J., Brooklyn, N. Y. Hinge for an eyeglass frame. Des. 76,415; Sept. 25.
Pomilio Brothers Corporation. (See Giordani, Francesco, assignor.)
Pope, Jessie C., Longview, Tex. Railway tie, rail fastener, and rail joint. 1,685,337; Sept. 25.
Porter, Winfield P., Greene, Me. Tire valve. 1,685,376; Sept. 25.
Potter, William W., Pawtucket, R. I. Machine tool. 1,685,556; Sept. 25.
Powell, William H., Wauwatosa, assignor to Allis-Chalmers Manufacturing Company, Milwaukee, Wis. Dynamo-electric machine and winding therefor. 1,685,752; Sept. 25.
Prosser, Thomas W., and J. H. Wahlbeck, Kankakee, assignors to Paramount Textile Machinery Co., Chicago, Ill. Hosiery-finishing apparatus. 1,685,753; Sept. 25.
Province, Benjamin. (See Province, John and B.)
Province, John and B., assignors to The Lamson and Sessions Company, Kent, Ohio. Cut-off mechanism for metal-working machines. 1,685,377; Sept. 25.
Punga, Edwin A. F., Mulheim-on-the-Ruhr, Germany. Method and device for balancing rotating machine parts. 1,685,094; Sept. 25.
Punke, John J., assignor to Hupp Motor Car Corporation, Detroit, Mich. Escutcheon plate. Des. 76,416; Sept. 25.
Putterman, Benjamin, Brooklyn, N. Y., assignor to American Auto Lamp Co., Inc. Smoker's receptacle. Des. 76,417; Sept. 25.
Radio Corporation of America. (See Loewe, Siegmund, assignor.)
Radio Corporation of America. (See von Ardenne, Manfred, assignor.)
Raeburn, William, Waterbury, Conn., assignor to The Bassick Manufacturing Company, Chicago, Ill. Lubricating device. 1,685,378; Sept. 25.
Ramsay, Erskine, Birmingham, Ala. Rotary dump. 1,685,203; Sept. 25.
Randolph, Oliver W., Toledo, Ohio. Drying. 1,685,338; Sept. 25.
Randolph, Oliver W., Toledo, Ohio. Furnace. 1,685,339; Sept. 25.
Rauch, John D., Lima, Ohio. Motor-truck wheel. 1,685,294; Sept. 25.
Regelsberger, Hermann, Erlangen, Germany. Apparatus for analyzing the alveolar air from the lungs. 1,685,557; Sept. 25.
Reichart, James H., Muncie, Ind. Casing for corn-popping machine. Des. 76,418; Sept. 25.
Reichenbecher, Georg. (See Grosswelschede, J., and Reichenbecher.)
Reinforced Paper Bottle Corporation. (See Koch, Lydia B., assignor.)
Reliance Company, The. (See Wilms, Gustav O., assignor.)
Remark, Isidore J., assignor to The General Tire & Rubber Company, Akron, Ohio. Vehicle tire. Des. 76,419; Sept. 25.
Reppetto, Harvey B., Clyde, Ohio. Hydrocarbon heating stove. 1,685,095; Sept. 25.
Reyrolle, A., & Company Limited. (See Anderson, W., and Clothier, assignors.)
Rhodes, Charles J. (Berry, George W., assignor.)

Rich, Elmer A., jr., Chicago, Ill., assignor to The American Foundry Equipment Company, New York, N. Y. Sand cutting, screening, and piling machine. 1,685,139; Sept. 25.
Rich, John W., Woolrich, Pa. Game pouch. 1,685,243; Sept. 25.
Richardson, Joseph S., assignor to McKee Glass Company, Jeannette, Pa. Dish or similar article. Des. 76,420; Sept. 25.
Richter, Alfred, Doberitz, near Berlin, Germany, assignor to A.-G. für Handels- und Industriewerte Glarus, Glarus, Switzerland. Absorption refrigerating apparatus. 1,685,340; Sept. 25.
Richter, George A., assignor to Brown Company, Berlin, N. H. Recovering sulphur dioxide from waste gases. 1,685,754; Sept. 25.
Rideau, Sidney J., New Orleans, La. License-display device for automobiles. 1,685,558; Sept. 25.
Ring, Joseph J., Milwaukee, and C. Schindler, West Allis, assignors to Allis-Chalmers Manufacturing Company, Milwaukee, Wis. Control system for prime movers. 1,685,755; Sept. 25.
Ring, Joseph J., Wauwatosa, assignor to Allis-Chalmers Manufacturing Company, Milwaukee, Wis. Rotor. 1,685,756; Sept. 25.
Ringe, John C., Stratford, Conn., assignor to The Singer Manufacturing Company, Elizabeth, N. J. Feeding mechanism for sewing machines. 1,685,436; Sept. 25.
Rizzuto, Samuel E. (See Beck, August B., assignor.)
Robbins, Elwin A., Nashua, N. H. Fruit-branding machine. 1,685,645; Sept. 25.
Robins, May J., Katonah, N. Y. Game apparatus. 1,685,723; Sept. 25.
Rock, Michael B., New York, N. Y. Apparatus for teaching sight singing. 1,685,682; Sept. 25.
Rockbestos Products Corporation. (See Mau, E. A., and Hutchinson, assignors.)
Rodin, Charles F., San Francisco, assignor to California Six Wheel Company, Oakland, Calif. Vehicle suspension. 1,685,295; Sept. 25.
Rodman, Clarence J., Wilkinsburg, and M. Hecht, Pittsburgh, Pa. Process and apparatus for reconditioning mineral oils. 1,685,681; Sept. 25.
Roessler & Hasslacher Chemical Company, The. (See Carveth, Hector R., assignor.)
Rogers, Wallace A., Anoka, Minn. Machine for treating grain. 1,685,179; Sept. 25.
Rolscreen Company. (See Dixson, Harry, assignor.)
Rose, Alexander D., assignor to Jas. P. Marsh & Company, Chicago, Ill. Thermometer. Des. 76,421; Sept. 25.
Rose Display Box Company. (See Leopold, Samuel N., assignor.)
Rose Patch and Label Co. (See Rosenthal, Arthur and M., assignors.)
Rosen, Jessel. (See Parsons, C. A., and Rosen.)
Rosenthal, Arthur and M., assignors to Rose Patch and Label Co., Grand Rapids, Mich. Printed label and manufacturing the same. 1,685,140; Sept. 25.
Rosenthal, Julius, Cannstatt-Stuttgart, Germany. Overhead traveling crane for lifting railroad vehicles. 1,685,724; Sept. 25.
Rosenthal, Martin. (See Rosenthal, Arthur and M.)
Rosenzweig, Siegfried, New York, N. Y. Making sound and vibration insulating units. 1,685,244; Sept. 25.
Rossi, Peter, Brooklyn, N. Y. Wall covering. 1,685,573; Sept. 25.
Rowe, Frederick A., Vancouver, British Columbia, Canada. Spectacles. 1,685,725; Sept. 25.
Ruggles, Leonard L., Wheaton, assignor, by mesne assignments, to Automatic Electric Inc., Chicago, Ill. Automatic telephone system. 1,685,379; Sept. 25.
Ruggles, William A. (See Brophy, D. H., and Ruggles.)
Ruhman, Richard, assignor of one-half to M. Stern, Essen-Ruhr, Germany. Optical system. 1,685,646; Sept. 25.
Rush, W. S., & Company. (See Phillips, Raymond C., assignor.)
Russell, Harry G., assignor to Consolidated Electric Sign Corporation, Battle Creek, Mich. Sign. Des. 76,422; Sept. 25.
Russo, Calogero, Cleveland, Ohio. Vegetable cutter. 1,685,245; Sept. 25.
Rutenber, Edwin A., assignor to A. J. Lindemann & Hoverson Company, Milwaukee, Wis. Stove-leg connection. 1,685,096; Sept. 25.
St. Pierre Chain Corporntion. (See St. Pierre, Henry, assignor.)
St. Pierre, Henry, assignor to St. Pierre Chain Corporation, Worcester, Mass. Snap hook. 1,685,201; Sept. 25.
Salbador, Ramon, New Orleans, La. Special sliding trap-door valve and gas-meter protector. 1,685,683; Sept. 25.
Sandford, Dent, Toledo, Ohio. Warpless valve plate. 1,685,615; Sept. 25.
Sandt, Arthur R. (See McVicker, W. J., and Sandt.)
Saurman, Atlee B., Pittsburgh, Pa., assignor, by mesne assignments, to General Cable Corporation. Connecter for sector-shaped conductors. 1,685,437; Sept. 25.
Savasky, Albert A., assignor to The Pathfinder Accessories Corporation, Cleveland, Ohio. Light-control appliance. 1,685,438; Sept. 25.
Saye, John F. (See Sheller, John C., assignor.)
Scaife, Alan M., Pittsburgh, Pa., assignor to Wm. B. Scaife & Sons Company, Container and making the same. 1,685,246; Sept. 25.
Scaife, Wm. B., & Sons Company. (See Scaife, Alan M., assignor.)
Scammell China Company. (See Schnepf, Emil L., assignor.)
Schaefer, Albert N., Minneapolis, Minn. Brush ax. 1,685,141; Sept. 25.
Schaffer, Max, Co. (See Krause, Arthur R., assignor.)
Scheibli, Robert J., jr., St. Louis, Mo., assignor to American Car and Foundry Company, New York, N. Y. Journal-box lid. 1,685,097; Sept. 25.
Schellens, Eugene L., Pointe Claire, Quebec, Canada, and J. S. Coffin, jr., Lisbon, N. H., assignor, by mesne assignments, to C-S Engineering Company. Locomotive draft appliance. 1,685,574; Sept. 25.
Schenk, Otto, asignor to C. R. Ballis and C. N. Stemper, Dayton, Ohio. Machine for opening oysters. 1,685,296; Sept. 25.
Scheuer, William, New York, N. Y. Automatic spot-setting machine. 1,685,504; Sept. 25.
Schilling, John M., Lima, Ohio. Cabinet for bottle coolers. Des. 76,423; Sept. 25.
Schindler, Carl. (See Ring, J. J., and Schindler.)
Schlacht, Herman, New York, N. Y. Watch holder. Des. 76,424; Sept. 25.
Schlesinger, August B., Detroit, Mich., assignor to American Car and Foundry Motors Company, New York, N. Y. Air-compressor unit. 1,685,616; Sept. 25.
Schmid, Werner, White Plains, assignor to A., E., J., L., and S. Dreifuss, copartners doing business as National Lace and Embroidery Company, New York, N. Y. Embroidered textile fabric. Des. 76,425; Sept. 25.
Schnepf, Emil L., assignor to Scammell China Company, Trenton, N. J. Plate. Des. 76,426; Sept. 25.
Schering, Otto Y., Chicago, Ill. Combined vending jar and base. Des. 76,427; Sept. 25.
Schoeller, Walter, A. Feldt, M. Gehrke, and E. Borgwardt, assignors to the firm: Chemische Fabrik auf Actien (vorm. E. Schering), Berlin, Germany. Pharmaceutical product. 1,685,341; Sept. 25.
Schoeller, Walter, A. Feldt, M. Gehrke, and E. Borgwardt, assignors to the firm: Chemische Fabrik auf Actien (vorm. E. Schering), Berlin, Germany. Pharmaceutical product. 1,685,342; Sept. 25.
Schreier, Arthur, Vienna, Austria, assignor, by mesne assignments, to General Zeolite Company, Chicago, Ill. Liquid-treating material and making same. 1,685,204; Sept. 15.
Scullin Steel Co. (See McCollough, Paul J., assignor.)
Seaholm, Ernest W., and H. J. Earl, assignors to General Motors Corporation, Detroit, Mich. Motor-vehicle front assembly. Des. 76,428; Sept. 25.
Seeger, Edwin W., assignor to The Cutler-Hammer Mfg. Co., Milwaukee, Wis. Motor controller. 1,685,464; Sept. 25.
Selden Company, The. (See Andrews, Chester E., assignor.)
Selden Company, The. (See Jaeger, Alphons O., assignor.)
Selway, Edward B., Leetsdale, Pa. Studding for building structures. 1,685,247; Sept. 25.
Shackleton, William. (See Hammond, C. F., and Shackleton.)
Sharp, William L., assignor to The Ohio Foundry and Manufacturing Company, Steubenville, Ohio. Gas heater. Des. 76,429; Sept. 25.
Sheffer, John W. (See Johnson, W. S., and Sheffer.)
Sheller, John C., assignor to J. F. Saye, Maywood, Ill. Attachable shower. 1,685,180; Sept. 25.
Sherr, Max. (See Stockov, Max, assignor.)
Shone, Wesley K., Los Angeles, Calif. Brake-testing machine. 1,685,297; Sept. 25.
Shroyer, Jacob L., Oak Park, assignor to Edison Electric Appliance Company, Inc., Chicago, Ill. Regulating temperature. 1,685,647; Sept. 25.
Shultz, Llewellyn B., assignor to Pilley Packing & Flue Brush Manufacturing Company, St. Louis, Mo. Scraping tool. 1,685,380; Sept. 25.
Shupert, Frank W. (See Stevens, H. R., Parker, Shupert, and Benson.)
Siemens & Halske Aktiengesellschaft. (See Masing, G., and Dahl, assignors.)
Siena, Edward U., Cleveland, Ohio. Valve. 1,685,298; Sept. 25.
Silverman, Joseph, Chicago, Ill. Shoe-shining stand. 1,685,648; Sept. 25.
Simmons Company. (See Gail, John F., assignor.)
Simmons Company. (See Vollmer, William A., assignor.)
Simpson, Fredrick C. (See Allen, G., jr., and Simpson.)
Simpson, Walter S., assignor to The United Electric Company, Canton, Ohio. Vacuum-cleaner attachment. 1,685,299; Sept. 25.
Sing, Tom. (See Ladd, Charles W., assignor.)
Singer Manufacturing Company, The. (See Binge, John C., assignor.)
Sklovsky, Max, assignor to Deere & Company, Moline, Ill. Driving key. 1,685,098; Sept. 25.
Smalley, Burton M., assignor to Joslyn Manufacturing & Supply Co., Chicago, Ill. Insulator support. 1,685,684; Sept. 25.
Smiley, George T., and W. R. Ohse, Houston, Tex. Refrigerating apparatus. 1,685,505; Sept. 25.
Smith, Abraham, Erie, Pa. Bookkeeping machine. 1,685,685; Sept. 25.
Smith, Franklin H., Peshtigo, Wis. Gate. 1,685,506; Sept. 25.

Smith, Jasper A., assignor to Delco-Light Company, Dayton, Ohio. Water system. 1,685,099; Sept. 25.
Smith, John O., assignor to The Upson-Walton Company, Cleveland, Ohio. Combined stuffing box and shaft bearing. 1,685,381; Sept. 25.
Smith, John R. C., Victoria, British Columbia, Canada. Handle for steering wheels. 1,685,686; Sept. 25.
Smith, John W., Dover Village, Ohio. Game. 1,685,142; Sept. 25.
Smith, S. Morgan, Company. (See Syvertsen, Harald, assignor.)
Smith, William O. (See McDonald, A., and Smith.)
Sonne, Minna B., Nexoe, Denmark. Wrapper for coins and the like. 1,685,649; Sept. 25.
Soubier, Leonard D., assignor to The Owens Bottle Company, Toledo, Ohio. Apparatus for delivering charges of molten glass. 1,685,143; Sept. 25.
Southwestern Sales Corporation. (See Mann, James H., jr., assignor.)
Sparling, Eric C., assignor to The Sperry Gyroscope Company, Brooklyn, N. Y. Latitude indicator. 1,685,762; Sept. 25.
Spencer, Robert M., Waycross, Ga. Fire box for boilers. Re17,088; Sept. 25.
Sperry Gyroscope Company, The. (See Sparling, Eric C., assignor.)
Sperryn, George N., Birmingham, England. Screw-down tap or cock. 1,685,465; Sept. 25.
Spicer Manufacturing Corporation. (See Thiemer, William H., assignor.)
Spraker, David L., assignor to Spraker Manufacturing Company, Indianapolis, Ind. Grinding tool. 1,685,100; Sept. 25.
Spraker Manufacturing Company. (See Spraker, David L., assignor.)
Springer, Edgar D., assignor to Indiana Lamp Corporation, Connersville, Ind. Lens retainer. 1,685,575; Sept. 25.
Standard Mirror Co. Inc. (See La Hodny, William, assignor.)
Standard Oil Company. (See Atwell, Harold V., assignor.)
Standard Oil Company of California. (See Osborn, Robert T., assignor.)
Standard Plastering System, Inc. (See Walper, Curry O., assignor.)
Star Chandelier Co. (See Boehringer, John A. assignor.)
Starr, Frank F., assignor to Delco-Light Company, Dayton, Ohio. Electrical generating system. 1,685,101; Sept. 25.
Stehlik, Rudolph F., assignor to Automatic Electric Inc., Chicago, Ill. Telephone system. 1,685,410; Sept. 25.
Stein, Milton F., assignor, by mesne assignments, to General Zeolite Company, Chicago, Ill. Rate-of-flow controller. 1,685,205; Sept. 25.
Stemper, Clarence N., et al. (See Schenk, Otto, assignor.)
Stepp, Eddie H., Knoxville, Tenn. Ore separator. 1,685,466; Sept. 25.
Stern, Max. (See Ruhnau, Richard, assignor.)
Stettner, Morris, Brooklyn, N. Y. Radiocabinet or similar article. Des. 76,430; Sept. 25.
Stettner, Morris, Brooklyn, N. Y. Radiocabinet or similar article. Des. 76,431; Sept. 25.
Stevens, Enoch P., deceased, Chicago, Ill., M. A. Stevens, executrix. Self-sustaining furnace arch. 1,685,617; Sept. 25.
Stevens, Harry R., W. S. Parker, F. W. Shupert, and J. C. Benson, Sanford, Fla. Superheater. 1,685,726; Sept. 25.
Stevens, Mary A., executrix. (See Stevens, Enoch P.)
Stevenson, Arthur G., Ottawa, Kans. Kafir-corn header. 1,685,507; Sept. 25.
Stewart, Arthur L., Danville, Ill. Rug-sizing frame. 1,685,689; Sept. 25.
Stewart, Robert, New York, N. Y. Dispensing applicator. 1,685,727; Sept. 25.
Stock, Emil, Bad Flinsberg of Silesia, Germany. Planning stormproof zones around or through wood districts. 1,685,343; Sept. 25.
Stockov, Max, New York, N. Y., assignor of one-half to M. Sherr, Philadelphia, Pa. Vehicle, stop. 1,685,467; Sept. 25.
Stone, Peter A., Chicago, Ill. Hanger. 1,685,728; Sept. 25.
Stone, Peter, Chicago, Ill. Bridging construction for joists. 1,685,729; Sept. 25.
Storck, Walter, Berlin-Halensee, assignor to Ludw. Loewe & Co. Actiengesellschaft, Berlin, Germany. Circular-grinding machine. 1,685,757; Sept. 25.
Strand, Theodore N., Los Angeles, Calif. Chair. Des. 76,432; Sept. 25.
Streich, John M., Clarendon, Pa. Pump valve. 1,685,650; Sept. 25.
Strout, Robert W., Brooklyn, assignor, by mesne assignments, to E. W. Bliss Company, New York, N. Y. Nail-making machine. 1,685,439; Sept. 25.
Strufe, Otto, Dwight, Ill. Refrigerator and installation construction therefor. 1,685,248; Sept. 25.
Stuart, Joseph, 2d, assignor to Hercules Powder Company, Wilmington, Del. Machine for securing bridge wires to lead wires of electric blasting caps. 1,685,344; Sept. 25.
Stuart, Joseph, 2d, assignor to Hercules Powder Company, Wilmington, Del. Bridging the connecting wires of electric blasting caps. 1,685,382; Sept. 25.
Stuart, Thomas F., and H. A. Moore, Los Angeles, Calif. Push catch for doors. 1,685,508; Sept. 25.
Sullivan Machinery Company. (See Holmes, Morris P. assignor.)
Sullivan, Raymond H., assignor to North East Electric Company, Rochester, N. Y. Electric-lighting system. 1,685,576; Sept. 25.
Summerhayes, W. Kenth, jr., Louisville, Ky. Advertising device. 1,685,102; Sept. 25.
Syvertsen, Harald, assignor to S. Morgan Smith Company, York, Pa. Bearing for hydraulic turbine shafts. 1,685,181; Sept. 25.
Talgman, Max, New York, N. Y. Motor stand. 1,685,103; Sept. 25.
Tams, William H., Trenton, N. J. Plate or similar article. Des. 76,433; Sept. 25.
Tanner, Harry L., Brooklyn, assignor to Ford Instrument Company, Inc., Long Island City, N. Y. Speed-regulating mechanism. 1,685,440; Sept. 25.
Tanzi, Mario, Boston, Mass. Macaroni die. 1,685,249; Sept. 25.
Taylor Instrument Companies. (See Foote, Edward B., assignor.)
Taylor Instrument Companies. (See Lamb, Donald C., assignor.)
Testell, Emile, Paris, France, assignor to General Electric Company. Dynamo-electric machine. 1,685,651; Sept. 25.
Thacher, Frank B. (See Waggoner, C. L., and Thacher,)
Theobald, Jean, assignor to International Silver Company, Meriden, Conn. Table set. Des. 76,434; Sept. 25.
Thiemer, William H., Cleveland, Ohio, assignor, by mesne assignment, to Spicer Manufacturing Corporation, South Plainfield, N. J. Universal joint. 1,685,509; Sept. 25.
Thiemer, William H., Cleveland, Ohio, assignor to Spicer Manufacturing Corporation, South Plainfield, N. J. Universal joint. 1,685,510; Sept. 25.
Thomas, John J., Westfield, N. J., assignor to American Can Company, New York, N. Y. Pouring-spout container. 1,685,383; Sept. 25.
Thomas, William E., Oakland, Calif. Preparing spinach and the like for canning. 1,685,511; Sept. 25.
Thompson, Earl A., Portland, Oreg. Automatic gear-shifting mechanism for sliding-gear transmissions. Re17,090; Sept. 25.
Thompson, Harry F., Stratford, N. Y. Road-building machine. 1,685,687; Sept. 25.
Thompson, John D., Union City, N. J., assignor to American Car and Foundry Company, New York, N. Y. Car underframe. 1,685,104; Sept. 25.
Thompson, John D., Union City, and V. Willoughby, Ridgewood, N. J., assignors to American Car and Foundry Company, New York, N. Y. Multiunit tank car. 1,685,105; Sept. 25.
Thompson, John D., Union City, and V. Willoughby, Ridgewood, N. J., assignors to American Car and Foundry Company, New York, N. Y. Container. 1,685,106; Sept. 25.
Thörnblad, Axel R., assignor to Aktiebolaget Fallskärm, Stockholm, Sweden. Parachute. 1,685,688; Sept. 25.
Thrift, Timothy, Cleveland, Ohio. Loop aerial. 1,685,652; Sept. 25.
Thurber, Frank, Los Angeles, Calif. Lamp. 1,685,251; Sept. 25.
Tinnerman, Albert H., Cleveland, Ohio. Stove. Des. 76,435; Sept. 25.
Tippetts, George W., Spanish Fork, Utah. Gun. 1,685,730; Sept. 25.
Tobias, Wilfred R., Los Angeles, Calif. Roof. 1,685,559; Sept. 25.
Townsend, Edward G. (See Housley, W. F., and Townsend.)
Travers, John T., assignor to The Travers-Lewis Process Corporation, Columbus, Ohio. Process and apparatus for treating polluted acid wastes. 1,685,300; Sept. 25.
Travers, John T., assignor to The Travers-Lewis Process Corporation, Columbus, Ohio. Treatment of polluted wastes. 1,685,301; Sept. 25.
Travers-Lewis Process Corporation, The. (See Travers, John T., assignor.)
Tregillus, Harold G., Park Ridge, Ill. Trussed structure. 1,685,107; Sept. 25.
Tressler, Donald K., Pittsburgh, Pa., assignor to Larrowe Construction Company, Detroit, Mich. Preparation of betaine hydrochloride, etc. 1,685,758; Sept. 25.
Trevena, Clair, Bellevue Hill, near Sydney, New South Wales, Australia. Mop. 1,685,731; Sept. 25.
Trosch, Alfred, assignor to Consolidated Machine Tool Corporation of America, Rochester, N. Y. Rail clamp. 1,685,468; Sept. 25.
Truax, Charles C., Columbus, Ohio. Separator for corncobs and the like. 1,685,732; Sept. 25.
Trueb, Rudolph O., Murray Hill, N. J. Curtain. 1,685,252; Sept. 25.
Trulock, George, Los Angeles, Calif. Lid holder for containers. 1,685,560; Sept. 25.
Truscon Steel Company. (See Briody, Bernard, assignor.)
Tubal Boiler Company. (See White, Raymond E., assignor.)
Tucker, Carl L., assignor of one-half to W. R. Lake, Denver, Colo. Mechanism for making side-seam envelopes. 1,685,469; Sept. 25.
Tuffley, George E., Syracuse, N. Y., assignor to Deere & Company, Moline, Ill. Oil burner for furnaces. 1,685,108 Sept. 25.

Twin Disc Clutch Company. (See Pearmain, William J., assignor.)
Tyler, Harvey E., Chicago, Ill. Muffler. 1,685,302; Sept. 25.
Uhde, Georg F., Bovinghausen, Germany. Purifying gases. 1,685,733; Sept. 25.
Uhde, Georg F., Bovinghausen, Germany. Synthetically producing ammonia. 1,685,734; Sept. 25.
United Electric Company, The. (See Simpson, Walter S., assignor.)
United Filters Corporation. (See Campbell, Robert C., assignor.)
United Filters Corporation. (See Hoyt, John T., assignor.)
United Shoe Machinery Corporation. (See Kelly, John A., assignor.)
United Shoe Machinery Corporation. (See Lund, Thomas, assignor.)
United Shoe Machinery Corporation. (See Winkley, E. E., and Hart, assignors.)
Universal Draft Gear Attachment Co. (See Wilson, Jack, assignor.)
Universal Oil Products Company. (See Alther, Joseph G., assignor.)
Universal Oil Products Company. (See Egloff, G., and Benner, assignors.)
Universal Oil Products Company. (See Huff, Lyman C., assignor.)
Upson-Walton Company, The. (See Smith, John O., assignor.)
Van Amburgh, Charles L., Long Beach, Calif. Razor-stropping device. 1,685,470; Sept. 25.
Van Bloem, Paul S., Great Neck, assignor to Viking Products Corporation, New York, N. Y. Elevator signal panel. Des. 76,436; Sept. 25.
Van Dorn Electric Tool Company, The. (See Connell, Edwin L., assignor.)
Varusky, John J., assignor to Carter-Mayhew Manufacturing Co., Minneapolis, Minn. Scalper. 1,685,512; Sept. 25.
Vaszin, Aurel, assignor to The Dayton Funhouse & Riding Device Mfg. Company, Dayton, Ohio. Amusement device. 1,685,577; Sept. 25.
Veazey, William R., Cleveland Heights, Ohio, assignor to The Dow Chemical Company, Midland, Mich. Magnesium alloy and making same. 1,685,653; Sept. 25.
Verein für Chemische Industrie Aktiengesellschaft. (See Walter, Hans, assignor.)
Vereinigte Stahlwerke Aktiengesellschaft. (See Grosweischede, J., and Reichenbecher, assignors.)
Vermillion, Raymond H., Los Angeles, Calif., assignor to H. L. Judd Company, Inc., Wallingford, Conn. Drapery-pole bracket. Des. 76,438; Sept. 25.
Vermillion, Raymond H., Los Angeles, Calif., assignor to H. L. Judd Company, Inc., Wallingford, Conn. Drapery-pole socket. Des. 76,439; Sept. 25.
Viking Products Corporation. (See Van Bloem, Paul P., assignor.)
Vollmer, William A., assignor to Simmons Company, Kenosha, Wis. Tip. 1,685,578; Sept. 25.
Von Ardenne, Manfred, Berlin, Germany, assignor to Radio Corporation of America. Double-grid thermionic tube. 1,685,253; Sept. 25.
Von Platen, Baltzar C., and C. G. Munters, Stockholm, Sweden, assignors, by mesne assignments, to Electrolux Servel Corporation. Refrigerator. 1,685,764; Sept. 25.
Voorhels, Joseph T., Oakland, assignor to Coen Company, San Francisco, Calif. Duplex oil strainer. 1,685,303; Sept. 25.
Vortex Mfg. Co., The. (See Ohlson, John B., assignor.)
Voss, Erdmann, Hamburg, Germany. Hair-drying apparatus. 1,685,345; Sept. 25.
Wackerman, Charles S., Bridgeport, Conn. Narrow woven trimming. Des. 76,440; Sept. 25.
Waggoner, Charles L., and F. B. Thacher, assignors to By-Products Coke Corporation, Chicago, Ill. Treating coke and products. 1,685,654; Sept. 25.
Wagner, Chester I., New York, N. Y. Record-filing system. 1,685,206; Sept. 25.
Wahlbeck, John H. (See Prosser, T. W., and Wahlbeck.)
Wald, David, New York, N. Y. Rheostat construction. 1,685,579; Sept. 25.
Walker, George H., assignor to Heenan & Froude Limited, Worcester England. Hydraulic dynamometer. 1,685,735; Sept. 25.
Walker, Hubert, Royal Oak, and F. A. Whitten, Detroit, Mich., assignors to American Car and Foundry Motors Company, New York, N. Y. Vehicle bumper and fender and mounting means therefor. 1,685,618; Sept. 25.
Wallis, Cyril T., assignor to North East Electric Company, Rochester, N. Y. Seal for instrument cases. 1,685,580; Sept. 25.
Walper, Curry O., assignor to Standard Plastering System, Inc., Detroit, Mich. Reenforced plaster board. 1,685,254; Sept. 25.
Walter, Hans, Mainz-Mombach, assignor to Verein für Chemische Industrie Aktiengesellschaft, Frankfort-on-the-Main, Germany. Diffusion reaction. 1,685,759; Sept. 25.
Warner and Swasey Company, The. (See Burrell, E. P., and Drake, assignors.)
Warr, Harold G., Park Ridge, assignor to The P & M Company, Chicago, Ill. Manufacturing rail anchors. 1,685,255; Sept. 25.
Washington, Dixon E., Kansas City, Mo. Speed reducer. 1,685,256; Sept. 25.
Waterworth, Eric N., West Hobart, Tasmania, Australia. Stopping means of talking machines. 1,685,471; Sept. 25.
Watson, George D., Torrance, Calif. Oil-well tool. 1,685,472; Sept. 25.
Weber, Alfred, New York, N. Y. Incandescent-lamp bulb or similar article. Des. 76,441; Sept. 25.
Weber, Charles, jr., assignor to C. G. Conn, Ltd., Elkhart, Ind. Gauge. 1,685,109; Sept. 25.
Weber Engine Company. (See Gold, Samuel B., assignor.)
Weigle, Russell J., East Grand Rapids, Mich. Direction indicator for vehicles. 1,685,257; Sept. 25.
Weinert, Harry F., Detroit, Mich. Tinning-cup attachment for blowtorches. 1,685,258; Sept. 25.
Weiskopf, Otto, Erfurt, Germany. Tens-carrying device for calculating machines. 1,685,346; Sept. 25.
Wellington, Arthur W., assignor to The Chase Companies, Inc., Waterbury, Conn. Flush-tank fitting. 1,685,259; Sept. 25.
Wells, Harold D., Glens Falls, N. Y. Machine for paper-making processes. 1,685,736; Sept. 25.
Welsch, Frank G., South Bend, Ind., assignor to Westinghouse Electric and Manufacturing Company. Head for lighting units. Des. 76,442; Sept. 25.
Welsh, Ralph B., Burkburnett, Tex. Sand pump. 1,685,619; Sept. 25.
Wenzka, Ignace J., Depew, N. Y. Liquid strainer. 1,685,655; Sept. 25.
West, Bernard. (See Hunter, Percy E., assignor.)
West, Donald H., assignor to The J. N. Lapointe Company, New London, Conn. Hydraulic drive for broaching machines and the like. 1,685,760; Sept. 25.
West, Harry R., Pittsfield, Mass., assignor to General Electric Company. Induction voltage regulator. 1,685,656; Sept. 25.
West Process Pavement Company. (See West, William C., assignor.)
West, William C., assignor to West Process Pavement Company, Incorporated, Louisville, Ky. Asphaltic material and preparing same. 1,685,304; Sept. 25.
Western Electric Company. (See Griggs, Elmer V., assignor.)
Western Electric Company. (See Williams, Robert R., assignor.)
Westerfield, Samuel, New York, N. Y. Electric table lamp. Des. 76,443; Sept. 25.
Westinghouse Electric and Manufacturing Company. (See Welsch, Frank G., assignor.)
Whalen, William H., Los Angeles, Calif. Track sprinkler. 1,685,581; Sept. 25.
White, Charles H., assignor to Deere & Company, Moline, Ill. Tandem-disk harrow. 1,685,110; Sept. 25.
White, Charles H., assignor to Deere & Company, Moline, Ill. Scraper. 1,685,385; Sept. 25.
White, Edward A., Lewiston, Idaho. Sizing apparatus. 1,685,207; Sept. 25.
White, Ernest C., New York, N. Y., assignor of one-half to R. F. Fisher, Philadelphia, Pa. Electric-lighting fixture. 1,685,020; Sept. 25.
White, Raymond E., assignor to Tubal Boiler Company, Chicago, Ill. Boiler construction. 1,685,388; Sept. 25.
White, William M., Milwaukee, Wis. Guide vane. 1,685,260; Sept. 25.
White, William M., Milwaukee, Wis. Hydraulic turbine. 1,685,261; Sept. 25.
Whitney Metal Tool Company. (See Jensen, John, assignor.)
Whitney, Willis R., Niskayuna, N. Y., assignor to General Electric Company. Composite metal article. 1,685,657; Sept. 25.
Whitsel, Robert L., South Chicago, Ill. Cigar and cigarette holder. 1,685,182; Sept. 25.
Whitten, Frank A. (See Walker, H., and Whitten.)
Whitten, Frank A., Detroit, Mich., assignor to American Car and Foundry Motors Company, New York, N. Y. Valve-operating mechanism. 1,685,582; Sept. 25.
Wilber, Carl L., assignor to Jefferson Forge Products Company, Detroit, Mich. Apparatus for forming wheels. 1,685,513; Sept. 25.
Wildhaber, Ernest, assignor to Gleason Works, Rochester, N. Y. Producing gears. 1,685,441; Sept. 25.
Wildhaber, Ernest, and A. H. Candee, assignors to Gleason Works, Rochester, N. Y. Producing bevel gears. 1,685,442; Sept. 25.
Wiley, William R., Mount Clemens, Mich. Making gland nuts. 1,685,262; Sept. 25.
Wilhelm, Howard H., Jefferson City, Mo. Dispensing container. 1,685,183; Sept. 25.
Willcox, Frederick H., assignor to Freyn Engineering Company, Chicago, Ill. Blast-furnace construction. 1,685,208; Sept. 25.
Williams, Oscar. (See Cooke, M. W., and Williams.)
Williams, Robert R., Roselle, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Insulated conductor. 1,685,386; Sept. 25.
Williams, William R. (See Davey, P. H., and Williams.)
Willoughby, Victor. (See Thompson, J. D., and Willoughby.)
Willoughby, Victor, Ridgewood, N. J., assignor to American Car and Foundry Company, New York, N. Y. Insulated tank car. 1,685,111; Sept. 25.

Willys-Overland Company, The. (See Huntington, Edward E., assignor.)
Wilmot Engineering Company. (See Wilmot, George W., assignor.)
Wilmot, George W., assignor to Wilmot Engineering Company, Hazleton, Pa. Attachment for chairs. 1,685,112; Sept. 25.
Wilms, Gustav O., assignor to The Reliance Company, Milwaukee, Wis. Mechanical movement. 1,685,113; Sept. 25.
Wilson Jack, Chicago, Ill., assignor to Universal Draft Gear Attachment Co. Brake-beam safety hanger. 1,685,474; Sept. 25.
Wilson, John W. (See Petersen, J. H. D., and Wilson.)
Wilson, Stanton D., St. Louis, Mo. Light globe. Des. 76,444; Sept. 25.
Winkley, Erastus E., and F. V. Hart, Lynn, Mass., assignors to United Shoe Machinery Corporation, Paterson, N. J. Shoe-pressing machine. 1,685,387; Sept. 25.
Wirebound Patents Company. (See Bauwens, Seraphine F., assignor.)
Wirkkala, Oscar A., Deming, Wash. Bull hook. 1,685,473; Sept. 25.
Witzel, Henry H., Mitchell, S. Dak. Automobile head lamp. 1,685,090; Sept. 25.
Wolff, Frederick W. J., San Francisco, Calif. Hat guard. 1,685,263; Sept. 25.
Woytych, Raymond M. (See Kempton, H. E., Gallimore, and Woytych.)
Wuthnow, Verland E., Dillon, Kans. Motor-vehicle hood latch. 1,685,475. Sept. 25.
Young, John C. (See McDonald, A., and Smith.)
Young, John M., Brooklyn, assignor to American Can Company, New York, N. Y. Hooked and lapped side seam for tubular bodies and making the same. 1,685,384; Sept. 25.
Yuen, San D. J., New York, N. Y. Watch dial or similar article. Des. 76,445; Sept. 25.
Zarou Bros. (See Zarou, Salim G., assignor.)
Zarou, Salim G., Brooklyn, assignor to Zarou Bros., New York, N. Y. Textile fabric or similar article of manufacture. Des. 76,446; Sept. 25.
Zelenka, Edward J., Minneapolis, Minn. Bearing for centrifugal extractors. 1,685,347; Sept. 25.
Zeger, Georges E., Montreuil, France, assignor, by mesne assignments, to du-Pont-Pathe Film Manufacturing Corporation, Wilmington, Del. Manufacture of plastic compounds. 1,685,443; Sept. 25.
Zelger, Georges E., Montreuil, France, assignor, by mesne assignments, to Du Pont-Pathe Film Manufacturing Corporation, Wilmington, Del. Manufacture of plastic compounds. 1,685,444; Sept. 25.
Zimmermann, William F., Maplewood, N. J. Shaping machine with variable-power traverse. 1,685,659; Sept. 25.
Zoellig, Eugene, Hamilton, Ohio. Molding ring. 1,685,660; Sept. 25.

ALPHABETICAL LIST OF INVENTIONS

FOR WHICH

PATENTS WERE ISSUED ON THE 25TH DAY OF SEPTEMBER, 1928.

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice). **Includes patents, reissues, and designs.**

Acids, Halogenides of aromatic oxamic. J. Haller. 1,685,698; Sept. 25.
Adjustable wrench, Open-end. H. A. Mead. 1,685,432; Sept. 25.
Advertising device. E. F. Goeller. 1,685,157; Sept. 25.
Advertising device. W. K. Summerhayes, jr. 1,685,102; Sept. 25.
Aerial, Loop. T. Thrift. 1,685,652; Sept. 25.
Air-pressure gauge. A. E. Carliss. 1,685,273; Sept. 25.
Airship. L. P. Lidback. 1,685,458; Sept. 25.
Alarm: *See*—
Burglar alarm.
Alarm mechanism. C. J. Lynch. 1,685,329; Sept. 25.
Alloy and making same, Magnesium. W. R. Veazey. 1,685,653; Sept. 25.
Alloy, Improving the qualities of nickel-beryllium. G. Masing and O. Dahl. 1,685,570; Sept. 25.
Ammonia, Synthetically producing. G. F. Uhde. 1,685,734; Sept. 25.
Amusement device. A. Vaszin. 1,685,577; Sept. 25.
Analyzing the alveolar air from the lungs, Apparatus for. H. Regelsberger. 1,685,557; Sept. 25.
Anchor, Oil-derrick. G. B. Mullen. 1,685,716; Sept. 25.
Anchors, Manufacturing rail. H. G. Warr. 1,685,255; Sept. 25.
Anchoring device, Tile-. G. P. Jackson. 1,685,568; Sept. 25.
Apparel. A. Lifter. 1,685,091; Sept. 25.
Arch support. H. D. Emcott. 1,685,155; Sept. 25.
Arch support and shoe-shank reenforcement. F. G. Delbon. 1,685,398; Sept. 25.
Asphaltic material and preparing same. W. C. West. 1,685,304; Sept. 25.
Athlete's protective harness. H. Goldsmith. 1,685,452; Sept. 25.
Atomizing device. R. B. Paull. 1,685,293; Sept. 25.
Auto top. F. D. Gould. 1,685,530; Sept. 25.
Automobile body. W. H. Atkinson. 1,685,264; Sept. 25.
Automobile body. E. T. Halloway. Des. 76,392; Sept. 25.
Automobile body. A. Lang. Des. 76,403; Sept. 25.
Automobile lock. O. S. Hershey. 1,685,128; Sept. 25.
Automobile radiator ornament. F. W. Ehrlich. Des. 76,383; Sept. 25.
Ax, Brush. A. N. Schaefer. 1,685,141; Sept. 25.
Badge or similar article. G. F. Kearney. Des. 76,399; Sept. 25.
Balls, Making tennis. L. R. Hurlburt. 1,685,423; Sept. 25.
Bathtub dressing table for children. F. M. McEntire. 1,685,093; Sept. 25.
Batteries, Separating device for lead storage. C. J. V. Féry. 1,685,695; Sept. 25.
Battery composition. P. J. Kelleher. 1,685,674; Sept. 25.
Battery plate, Storage-. J. N. Davis. 1,685,215; Sept. 15.
Bearing. A. Pfau. 1,685,751; Sept. 25.
Bearing, Antifriction. S. B. Haseltine. 1,685,160; Sept. 25.
Bearing, Antifriction. J. F. O'Connor. 1,685,173; Sept. 25.
Bearing, Antifriction. J. F. O'Connor. 1,685,612; Sept. 25.
Bearing for centrifugal extractors. E. J. Zelenka. 1,685,347; Sept. 25.
Bearing for hydraulic turbine shafts. H. Syvertsen. 1,685,181; Sept. 25.
Bearing for top-detaching rolls. W. P. Homans. 1,685,218; Sept. 25.
Bearing mounting. H. G. Baldwin. 1,685,517; Sept. 25.
Bearing strip for machine-tool ways. A. W. Parkes. 1,685,434; Sept. 25.
Bidet, Bed. B. Claus. 1,685,693; Sept. 25.
Bike, Kick. R. A. Peacock. 1,685,614; Sept. 25.
Binding. M. Levine. 1,685,607; Sept. 25.
Bird cage. L. J. Leon. Des. 76,407; Sept. 25.
Bird house. T. C. Kevitt. Des. 76,400; Sept. 25.
Biscuits and similar articles, Apparatus for stacking. H. A. Elfving. 1,685,354; Sept. 25.
Bit: *See*—
Drilling bit.
Board: *See*—
Insulating board. Plaster board.
Boiler construction. R. E. White. 1,685,388; Sept. 25.
Bookkeeping machine. A. Smith. 1,685,685; Sept. 25.
Borax from rasorite by a wet method, Production of commercial. T. M. Cramer. 1,685,214; Sept. 25.
Boring and facing machine, Car-wheel. L. C. Cole. 1,685,417; Sept. 25.
Bottle for perfume or the like. A. Lavault. Des. 76,405; Sept. 25.
Bottle or similar article, Hot-water. S. L. Palmer. Des. 76,413; Sept. 25.
Bottle receptacle elements, Constructing. L. B. Koch. 1,685,494; Sept. 25.
Box: *See*—
Coin box. Mail box.
Display box. Switch box.
Locomotive driving box.
Boxing, Device for creating accuracy in the art of. H. Latz. 1,685,495; Sept. 25.
Bracing rods to trees, Applying threaded. P. H. Davey. 1,685,151; Sept. 25.
Bracket: *See*—
Mirror bracket. Stanchion bracket.
Brake. A. E. Lee. 1,685,709; Sept. 25.
Brake. A. F. Masury. 1,685,429; Sept. 25.
Brake of the expanding-shoe type. G. Fornaca. 1,685,450; Sept. 25.
Branding machine, Fruit-. E. A. Robbins. 1,685,645; Sept. 25.
Brick mold. J. H. Beckwith. 1,685,188; Sept. 25.
Bridging construction for joists. P. Stone. 1,685,729; Sept. 25.
Bridging the connecting wires of electric blasting caps. J. Stuart, 2d. 1,685,382; Sept. 25.
Brush, Lather. O. D. Earon. 1,685,526; Sept. 25
Brush, Sanitary. E. S. and A. P. Kogler. 1,685,328; Sept. 25.
Buckle, Belt. F. P. Daughaday. Des. 76,380; Sept. 25.
Buffer, Magazine. H. MacDougall, and W. G. Kendall. 1,685,333; Sept. 25.
Buffing mechanism. J. F. O'Connor. 1,685,177–8; Sept. 25.
Bull hook. O. A. Wirkkala. 1,685,473; Sept. 25.
Bumper and fender and mounting means therefor, Vehicle. H. Walker and F. A. Whitten. 1,685,618; Sept. 25.
Burglar alarm. T. R. Castles. 1,685,416; Sept. 25.
Burner: *See*—
Oil burner.
Burner for furnaces, Oil. G. E. Tuffley. 1,685,108; Sept. 25.
Burner for regenerative furnaces. M. J. Lackner. 1,685,543; Sept. 25.
Button clasp, Collar-. A. Beiffos. 1,685,595; Sept. 25.
Cabinet, Food. D. T. Marshall. 1,685,712; Sept. 25.
Cabinet for a sound-reproducing instrument or the like. N. P. Bloom. Des. 76,370; Sept. 25.
Cabinet for bottle coolers. J. M. Schilling. Des. 76,423; Sept. 25.
Cabinet, Towel. J. N. Borroughs. 1,685,395; Sept. 25.
Calendar. J. F. Bennet. 1,685,692; Sept. 25.
Candy-making machine. J. N. Kalkanis. 1,685,605; Sept. 25.
Candy-pulling machine. W. Geist. 1,675,741; Sept. 25.
Cap and shell fastening. H. Hubbell, jr. 1,685,361; Sept. 25.
Car, Cane. J. C. Abel. 1,685,079; Sept. 25.
Car, Hopper. A. Kassler. 1,685,089; Sept. 25.
Car, Insulated tank. V. Willoughby. 1,685,111; Sept. 25.
Car, Multiunit tank. J. D. Thompson and V. Willoughby. 1,685,105; Sept. 25.
Car underframe. J. D. Thompson. 1,685,104; Sept. 25.
Carbohydrates, Acylating. E. B. Middleton. 1,675,220; Sept. 25.
Carburetor. H. C. Abern. 1,685,114; Sept. 25.
Carrier system for heavy plates, Electromagnetic. A. Goodfellow. 1,685,539; Sept. 25.
Case: *See*—
Key case. Musical-instrument case.
Casing for corn-popping machine. J. H. Reichart. Des. 76,418; Sept. 25.
Casing for safety switches. E. G. Johansson. 1,685,490; Sept. 25.
Casing for universal joints, Spring-retained. H. M. Funnell. 1,685,528; Sept. 25.
Casing, Gear. A. F. Pitkin and R. P. La Porte. 1,685,202; Sept. 25.
Castings, Controlling metal. H. S. Lee. 1,685,546; Sept. 25.
Catalytic apparatus. A. O. Jaeger. 1,685,672; Sept. 25.
Catch for doors, Push. T. F. Stuart and H. A. Moore. 1,685,508; Sept. 25.
Ceiling plate for lighting fixtures or similar articles. J. A. Boehringer. Des. 76,371; Sept. 25.
Cementing and floating shoe. R. C. Baker. 1,685,307; Sept. 25.
Chains, Attachment for. G. W. Wilmot. 1,685,112; Sept. 25.
Chair: *See*—
Dental chair.
Chair. T. N. Strand. Des. 76,432; Sept. 25.

Chassis. T. R. Arden. 1,685,592; Sept. 25.
Chassis, Aircraft. E. B. Carns. 1,685,122; Sept. 25.
Chuck. H. E. Kempton, K. F. Gallimore, and R. M. Woytych. 1,685,235; Sept. 25.
Circuit closer, Heat or pressure responsive. L. E. Beck. 1,685,211; Sept. 25.
Circuit closer, Thermostatically-controlled. H. D. Montgomery. 1,685,136; Sept. 25.
Circuit controller. W. S. Garland. 1,685,537; Sept. 25.
Clamp: *See*—
Rail clamp. Trolley-wire clamp.
Clamp. G. Frank. 1,685,696; Sept. 25.
Clamp for vehicle bumper. H. S. Jandus and J. R. Morgan. Des. 76,396; Sept. 25.
Clamp plate. H. S. Jandus. Des. 76,397–8; Sept 25.
Clamping device, Screen-. W. J. Duffcy. 1,685,705; Sept. 25.
Clasp: *See*—
Button clasp.
Cleaning and polishing wheel. T. P. Kimman. 1,685,406; Sept. 25.
Cleaning composition of matter. R. B. Hoffman. 1,685,360; Sept. 25.
Cleaning implement. W. J. Barber. 1,685,265; Sept. 25.
Closure device. L. R. N. Carvalho. 1,685,227; Sept. 25.
Clutch and transmission mechanism. W. J. Pearmain. 1,685,502; Sept. 25.
Clutch for reversing mechanisms, Condensed. D. C. Klausmeyer. 1,685,638; Sept. 25.
Cock, Plug. J. Lawson. 1,685,236; Sept. 25.
Coil heater, Tank-car. C. I. Hummer. 1,1,685,131; Sept. 25.
Coil-winding device. A. W. Bjorkman. 1,685,597; Sept. 25.
Coin box. H. K. Lorentzen. 1,685,219; Sept. 25.
Compressor, Air. J. A. and P. H. Davy and C. L. Gaugler. 1,685,150; Sept. 25.
Compressor, Lubricant. D. F. Fesler. 1,685,484; Sept. 25.
Compressor unit, Air-. A. B. Schlesinger. 1,685,616; Sept. 25.
Compressor, Valve-spring. W. F. Housley and E. G. Townsend. 1,685,548; Sept. 25.
Computing machine. G. Browning. 1,685,583; Sept. 25.
Condenser mounting. W. B. Connolly. 1,685,563; Sept. 25.
Conduits, Manufacture of highest-pressure. J. Grosswelschede and G. Reichenbecher. 1,685,402; Sept. 25.
Connecter for sector-shaped conductors. A. B. Saurman. 1,685,437; Sept. 25.
Container. O. B. Case. 1,685,147; Sept. 25.
Container. J. D. Thompson and V. Willoughby. 1,685,106; Sept. 25.
Container and making the same. A. M. Scaife. 1,685,246; Sept. 25.
Container, Combination packing and display. M. M. Elnson. 1,685,125; Sept. 25.
Container, Dispensing. H. H. Wilhelm. 1,685,183; Sept. 25.
Container having body with renitent neck and making same, Paper-. A. Moore. 1,685,370; Sept. 25.
Container, Paper. J. G. Norton. 1,685,138; Sept. 25.
Container, Pouring-spout. J. J. Thomas. 1,685,383; Sept. 25.
Container, Sheet-metal. J. Lee and C. Pearson. 1,685,367; Sept. 25.
Control mechanism for electric switch gear. W. Anderson and H. W. Clothier. 1,685,531; Sept. 25.
Control system. A. Pfau. 1,685,749; Sept. 25.
Control system. A. Pfau and B. Grob. 1,685,750; Sept. 25.
Control system for prime movers. J. J. Ring and C. Schindler. 1,685,755; Sept. 25.
Converting hydrocarbons, Process and apparatus for. L. C. Huff. 1,685,488; Sept. 25.
Conveyer, Shaker. J. H. D. Petersen and J. W. Wilson. 1,685,463; Sept. 25.
Core for electrical apparatus. E. C. George. 1,685,742; Sept. 25.
Corset. A. B. Beck. 1,685,477; Sept. 25.
Cotton chopping machine. J. S. Elder. 1,685,318; Sept. 25.
Counterbalancing device. H. G. Pederson. 1,685,748; Sept. 25.
Countersink machine. R. C. Phillips. 1,685,200; Sept. 25.
Counting mechanism. W. A. De Hart. 1,685,481; Sept. 25.
Coupling: *See*—
Swivel coupling.
Coupling. S. B. Gold. 1,685,158; Sept. 25.
Coupling. J. W. MacClatchie. 1,685,459; Sept. 25.
Coupling connecter, Electric-cable-. J. Higham. 1,685,420; Sept. 25.
Couplings, Manufacturing pipe. G. E. Mirfield. 1,685,678; Sept. 25.
Covering articles and the product resulting therefrom. H. I. Beadle. 1,685,393; Sept. 25.
Covering, Wall. P. Rossi. 1,685,573; Sept. 25.
Cracking oils. J. G. Alther. 1,685,476; Sept. 25.
Crane for lifting railroad vehicles, Overhead traveling. J. Rosenthal. 1,685,724; Sept. 25.
Crossing gate, Highway-. J. A. Anderson. 1,685,623; Sept. 25.
Cuff construction. J. H. Anderson. 1,685,305; Sept. 25.
Cultivator. L. Brenneis. 1,685,478; Sept. 25.
Cultivator blade. B. R. Benjamin. 1,685,268; Sept. 25.
Curing meats. E. T. Drake. 1,685,630; Sept. 25.
Curtain. R. O. Trueb. 1,685,252; Sept. 25.
Cutlery, Table. C. H. Hemming. 1,685,588; Sept. 25.
Cutter: *See*—
Ice-cream cutter. Vegetable cutter.
Cutter attachment. F. A. Leigh. 1,685,590; Sept. 25.
Cutter for butter, bread, and the like, Slicing. J. S. Donnellan. 1,685,533; Sept. 25.
Cutter for cutting sharply-pointed angular incisions into wood, Milling. H. Obagen. 1,685,373; Sept. 25.
Cutting machine, Rubber-ring-. G. L. Hammond, L. H. Messinger, jr., and W. Nicholas. 1,685,127; Sept. 25.
Dash light. E. E. Huntington. 1,685,421; Sept. 25.
Declutching. J. Bethenod. 1,685,596; Sept. 25.
Deflector for gasoline-hose nozzles. R. M. Davis. 1,685,313; Sept. 25.
Delivering charges of molten glass, Apparatus for. L. D. Soubier. 1,685,143; Sept. 25.
Dental chair, Collapsible. J. P. Fletcher. 1,685,599; Sept. 25.
Depositing apparatus. W. R. Myers and B. O. Opitz. 1,685,460; Sept. 25.
Derricks, Corner plate for. C. W. Lynch. 1,685,711; Sept. 25.
Designs, Reproducing artistic. R. F. Brown. 1,685,396; Sept. 25.
Dewatering apparatus. J. T. Hoyt. 1,685,085; Sept. 25.
Dicyclic derivatives of pentamethylene and manufacture of same. C. Mannich. 1,685,407; Sept. 25.
Die: *See*—
Macaroni die.
Dieing-out machine. E. R. Boylan. 1,685,309; Sept. 25.
Diffusion reaction. H. Walter. 1,685,759; Sept. 25.
Digger: *See*—
Potato digger.
Direction-indicating signal. J. M. Maroney. 1,685,330; Sept. 25.
Direction indicator for vehicles. R. J. Weigle. 1,685,257; Sept. 25.
Discharge balance coil, Multiwinding. R. K. Honoman. 1,685,161; Sept. 25.
Dish or similar article. J. S. Richardson. Des. 76,420; Sept. 25.
Dispensing applicator. R. Stewart. 1,685,727; Sept. 25.
Dispensing container and method of dispensing articles therefrom. J. B. Ohlson. 1,685,292; Sept. 25.
Dispensing ice cream and the like, Apparatus. F. E. Key. 1,685,250; Sept. 25.
Display apparatus. L. R. McDonald. 1,685,499; Sept. 25.
Display box. S. N. Leopold. 1,685,606; Sept. 25.
Display device. W. E. and M. S. Platt. 1,685,336; Sept. 25.
Display device for automobiles, License. S. J. Rideau. 1,685,558; Sept. 25.
Display fixture or the like. M. M. Friedemann. Des. 76,386; Sept. 25.
Display stand. J. H. De Weese. Des. 76,381; Sept. 25.
Display stand. R. B. Meller. 1,685,571; Sept. 25.
Distillation apparatus, Low-temperature. H. G. Lykken. 1,685,496; Sept. 25.
Distribution system. H. V. Nye. 1,685,746–7; Sept. 25.
Dome closure, Car-tank-. R. W. Joy. 1,685,132; Sept. 25.
Door and operating means therefor, Car. F. G. Evans. 1,685,631; Sept. 25.
Door-closure mechanism. T. Brady. 1,685,081; Sept. 25.
Door-operating mechanism. J. F. O'Connor. 1,685,175; Sept. 25.
Door-operating mechanism, Refrigerator-car-door. J. F. O'Connor. 1,685,174; Sept. 25.
Door strip and side-door-post protector, Combined grain-. S. L. Joiner. 1,685,197; Sept. 25.
Dough kneading and mixing machine. F. Aeschbach. 1,685,187; Sept. 25.
Dough-kneading machinery. F. Aeschbach. 1,685,185; Sept. 25.
Draft appliance, Locomotive. E. L. Schellens and J. S. Coffin, jr. 1,685,574; Sept. 25.
Draft-key retainer. C. H. Evans. 1,685,126; Sept. 25.
Draft rigging. D. S. Barrows. 1,685,209; Sept. 25.
Draft-rigging-key retainer. G. A. Johnson. 1,685,164; Sept. 25.
Drapery-pole bracket. R. H. Vermillion. Des. 76,438; Sept 25.
Drawer slide. R. I. Eustis and F. S. Beiger. 1,685,536; Sept. 25.
Dress or similar article. E. M. Boyes. Des. 76,375; Sept. 25.
Drilling bit, Well. A. W. Kammerer. 1,685,327; Sept. 25.
Drip pan. G. P. Childers. Des. 76,378; Sept. 25.
Drive device, Spiral. F. P. Breen. 1,685,702; Sept. 25.
Drum, Automatic. A. M. Lifshitz. 1,685,090; Sept. 25.
Drum, Demountable winding. O. B. Bjorge. 1,685,519; Sept. 25.
Drying. O. W. Randolph. 1,685,338; Sept. 25.
Drying apparatus, Hair-. E. Voss. 1,685,345; Sept. 25.
Dump, Rotary. E. Ramsay. 1,685,203; Sept. 25.

Handle for steering wheels. J. R. C. Smith. 1,685,686; Sept. 25.
Handle-securing means for shank-forming tools. J. Micali. 1,685,643; Sept. 25.
Hanger: *See*—
Safety hanger.
Hanger. P. A. Stone. 1,685,728; Sept. 25.
Harness, Dog. G. W. Philbrick. 1,685,435; Sept. 25.
Harrow, Combined disk and toothed. W. C. Dwyer. 1,685,278; Sept. 25.
Harrow, Tandem-disk. C. H. White. 1,685,110; Sept. 25.
Hat and making the same. J. T. Curtis. 1,685,190; Sept. 25.
Hat guard. F. W. J. Wolff. 1,685,263; Sept. 25.
Hat protector. G. K. Guinzburg. 1,685,586; Sept. 25.
Head for lighting units. F. G. Welsch. Des. 76,442; Sept. 25.
Header, Kafir-corn. A. G. Stevenson. 1,685,507; Sept. 25.
Headlight and mounting for toy railway cars. H. S. Becker. 1,685,691; Sept. 25.
Headlight, Dirigible. F. Lipke. 1,685,092; Sept. 25.
Heater: *See*—
Coil heater. Water heater.
Heater for long bars, Electric. W. S. Johnson and J. W. Sheffer. 1,685,133; Sept. 25.
Heating and ventilating apparatus. C. T. Morse. 1,685,610; Sept. 25.
Heating and ventilating apparatus, Hot-air. J. C. Miles. Re17,089; Sept. 25.
Heating attachment for windshield wipers, Electric. E. Adams. 1,685,389; Sept. 25.
Heating high-temperature apparatus. C. L. Burdick. 1,685,226; Sept. 25.
Heating liquids, Apparatus for electrically. G. Baum. 1,685,210; Sept. 25.
Heating liquids by electrical energy for distillation, concentration, provocation of chemical reactions, etc. G. Baum. 1,685,266; Sept. 25.
Heating unit, Water-. A. T. Johanson. 1,685,453; Sept. 25.
Heel-dropping machine. N. L. Gulliford. 1,685,743; Sept. 25.
Heel-seat fitting and molding machine. J. A. Kelly. 1,685,363; Sept. 25.
Hinge for an eyeglass frame. J. J. Pomeranz. Des. 76,415; Sept. 25.
Hinge, Toilet-seat. P. A. Johnson. 1,685,088; Sept. 25.
Holder, Cigar and cigarette. R. L. Whitsel. 1,685,182; Sept. 25.
Holder, Cigarette-package. M. J. Mangan. 1,685,765; Sept. 25.
Holder, Dish. G. H. Carter. Des. 76,377; Sept. 25.
Holder for sinks, Dishpan. J. R. Jewett, jr. 1,685,233; Sept. 25.
Holder, Lip-stick. A. H. Noble. 1,685,768–9; Sept. 25.
Holder, Print or film. M. F. Dean. 1,685,584; Sept. 25.
Holder, Razor-blade. C. A. Clark. 1,685,703; Sept. 25.
Holder, Watch. H. Schlacht. Des. 76,424; Sept. 25.
Holding block for broaching half bearings. L. C. Blomstrom. 1,685,224; Sept. 25.
Hook: *See*—
Bull hook. Snap hook.
Hook. H. Bartenbach and A. E. Freeman. 1,685,145; Sept. 25.
Hooked and lapped side seam for tubular bodies and making the same. J. M. Young. 1,685,384; Sept. 25.
Hosiery-finishing apparatus. T. W. Prosser and J. H. Wahlbeck. 1,685,753; Sept. 25.
Humidifier. F. F. Bahnson. 1,685,221; Sept. 25.
Humidifier. A. F. Mark. 1,685,198; Sept. 25.
Hydrocarbon engine. J. E. Fuller. 1,685,282; Sept. 25.
Hydrochloride, etc., Preparation of betaine. D. K. Tressler. 1,685,758; Sept. 25.
Ice-cream cutter, Brick. C. A. Kulenkampff. 1,685,700; Sept. 25.
Indicator: *See*—
Fare indicator. Latitude indicator.
Induction motor. H. Maxwell. 1,685,677; Sept. 25.
Injector, Steam and air. J. Doherty. 1,685,482; Sept. 25.
Insect trap. A. S. Northrup. 1,685,241; Sept. 25.
Inspecting apparatus. A. Broadmeyer. 1,685,761; Sept. 25.
Insulated conductor. R. R. Williams. 1,685,386; Sept. 25.
Insulating board. D. Finley. 1,685,320; Sept. 25.
Insulating units, Making sound and vibration. S. Rosenzweig. 1,685,244; Sept. 25.
Insulation of conductors used in electrical apparatus. C. A. Parsons and J. Rosen. 1,685,722; Sept. 25.

Internal-combustion engine. W. P. Deppé. 1,685,564; Sept. 25.
Interual-combustion engine. L. Lagali. 1,685,639; Sept. 25.
Jack: *See*—
Scaffold jack.
Jack. C. F. Guerin. 1,685,697; Sept. 25.
Jack-hammer support. F. T. Nowalk. 1,685,372; Sept. 25.
Joint: *See*—
Rail joint. Universal joint.
Journaling means for hollow float-arm shafts. J. Elge. 1,685,527; Sept. 25.
Key case. A. H. Merrill. 1,685,288; Sept. 25.
Key Driving. M. Sklovsky. 1,685,098; Sept. 25.
Kneading machine. F. Aeschbach. 1,685,186; Sept. 25.
Kneading machine. F. Kempter. 1,685,637; Sept. 25.
Knife bar for paper cutting and folding machines. H. F. Bechman. 1,685,532; Sept. 25.
Knitted fabric. M. D. Brown. Des. 76,376; Sept. 25.
Label and manufacturing the same, Printed. A. and M. Rosenthal. 1,685,140; Sept. 25.
Lace for footwear. C. Jansen. 1,685,489; Sept. 25.
Ladder Combined step and wall or extension. C. F. Hammond, and W. Shackleton. 1,685,632; Sept. 25.
Lamp. F. Thurber. 1,685,251; Sept. 25.
Lamp Automobile head. H. H. Witzel. 1,685,690; Sept. 25.
Lamp bulb or similar article, Incandscent. A. Weber. Des. 76,441; Sept. 25.
Lamp Electric table. S. Westerfield. Des. 76,443; Sept. 25.
Lamp shade. D. V. Genachte. Des. 76,437; Sept. 25.
Lantern and supporting bracket, Combined porch. R. S. Aspinwall. Des. 76,367; Sept. 25.
Latch. O. P. Cramer. 1,685,274; Sept. 25.
Latch construction, Door-. J. E. Gloekler. 1,685,419; Sept. 25.
Latch Motor-vehicle hood. V. E. Wuthnow. 1,685,475; Sept. 25.
Latching means for door-lock handles. W. C. Devereaux. 1,685,317; Sept. 25.
Latitude indicator. E. C. Sparling. 1,685,762; Sept. 25.
Lead cames, Making. W. J. Burrows. 1,685,518; Sept. 25.
Lens retainer. E. D. Springer. 1,685,575; Sept. 25.
Lever, Flush-tank-operating. E. L. Delany. 1,685,152–3; Sept. 25.
Lever for machine tools, Controlling. E. P. Burrell and G. W. Drake. 1,685,310; Sept. 25.
Lid holder for containers. G. Trulock. 1,685,560; Sept. 25.
Lid, Journal-box. R. J. Scheibli, jr. 1,685,097; Sept. 25.
Lifeboat. D. S. Neill. 1,685,719; Sept. 25.
Light: *See*—
Dash light. Vehicle light.
Light-control appliance. A. A. Savasky. 1,685,438; Sept. 25.
Light-projecting device. E. P. McClure. 1,685,609; Sept. 25.
Lighter, Automatic torch. F. J. Heybach. 1,685,633; Sept. 25.
Lighting-fixture bar or article of analogous nature. A. R. Krause. Des. 76,402; Sept. 25.
Lighting fixture, Electric-. E. C. White. 1,685,620; Sept. 25.
Lighting system, Electric-. R. H. Sullivan. 1,685,576; Sept. 25.
Limb, Artificial. K. Neumann. 1,685,290; Sept. 25.
Linkwork apparatus, Lever. A. G. Murdoch. 1,685,718; Sept. 25.
Linoleum or sigilar hard-surfaced floor covering. E. J. Humphreys. Des. 76,395; Sept. 25.
Liquids, Apparatus for delivering measured quantities of. E. C. F. Oakley. 1,685,409; Sept. 25.
Lock: *See*—
Automobile lock. Nut lock.
Lock. W. H. Edwards. 1,685,154; Sept. 25.
Lock and latch. A. Knesch. 1,685,708; Sept. 25.
Lock and release for concrete mixers, Automatic. M. Gilson. 1,685,529; Sept. 25.
Lock for counterbalancing devices, Safety. C. P. Grimes. 1,685,585; Sept. 25.
Lock-shaft-securing means. W. C. Devereaux. 1,685,316; Sept. 25.
Locking mechanism for removable containers. B. F. Fitch. 1,685,350; Sept. 25.
Locomotive driving box. J. G. Blunt. 1,685,212; Sept. 25.
Loud-speaker unit. M. R. Hutchison. 1,685,086; Sept. 25.
Lubricant-expelling device. H. J. Murphy. 1,685,408; Sept. 25.
Lubricating apparatus. G. Johnson. 1,685,404; Sept. 25.
Lubricating device. O. J. Herb. 1,685,359; Sept. 25.
Lubricating device. W. Raeburn. 1,685,378; Sept. 25.
Lumber-repairing machine, Defective-. H. B. Leash. 1,685,366; Sept. 25.
Macaroni die. M. Tanzi. 1,685,249; Sept. 25.
Machine and drying crinkled paper. W. A. Lorenz. 1,685,427; Sept. 25.
Machine for opening oysters. O. Schenk. 1,685,296; Sept. 25.
Machine for paper-making processes. H. D. Wells. 1,685,736; Sept. 25.
Machine for producing post-office classification slips. J. P. Davis and S. Helman. 1,685,352; Sept. 25.
Machine for rolling soles. C. and P. Nohr. 1,685,355; Sept. 25.
Machine for securing bridge wires to lead wires of electric blasting caps. J. Stuart, 2d. 1,685,344; Sept. 25.
Machine for treating grain. W. A. Rogers. 1,685,179; Sept. 25.
Machine for use in making boxes. S. F. Bauwens. 1,685,626; Sept. 25.
Machine for wrapping up razor blades. P. Gangler. 1,685,601; Sept. 25.
Machine parts, Method and device for balancing rotating. E. A. F. Punga. 1,685,094; Sept. 25.
Machines and the like, Hydraulic drive for broaching. D. H. West. 1,685,760; Sept. 25.
Mail box. A. E. Blackman. 1,685,222; Sept. 25.
Mail-carrier mechanism. L. Auble. 1,685,593; Sept. 25.
Manikin, Mechanical. C. L. Harcourt. 1,685,358; Sept. 25.
Margin spacer for typewriters, Bottom. R. M. Davis. 1,685,314; Sept. 25.
Measuring machines, Subdividing attachment for. J. R. Litty and T. B. Lundin. 1,685,425; Sept. 25.
Mechanical movement. G. O. Wilms. 1,685,113; Sept. 25.
Mechanism for making side-seam envelopes. C. L. Tucker. 1,685,469; Sept. 25.
Memorandum holder for automobile steering wheels. J. Polite. Des. 76,414; Sept. 25.
Metal article, Composite. W. R. Whitney. 1,685,637; Sept. 25.
Metal-working machine. H. C. Erdman. 1,685,319; Sept. 25.
Metal-working machines, Cut-off mechanism for. J. and B. Province. 1,685,377; Sept. 25.
Mining machine. M. P. Holmes. 1,685,403; Sept. 25.
Mirror bracket. W. La Hodny. 1,685,544; Sept. 25.
Mode of producing wrought iron with increased tensile properties. G. G. Gedda. 1,685,602; Sept. 25.
Mold: *See*—
Brick mold.
Mold construction, Permanent. H. S. Lee. 1,685,545; Sept. 25.
Mold for casting magnesium and making same, Sand. G. Michel. 1,685,553; Sept. 25.
Molding ring. E. Zuellig. 1,685,660; Sept. 25.
Mop. C. Trevena. 1,685,731; Sept. 25.
Motor: *See*—
Induction motor. Water motor.
Motor controller. E. W. Seeger. 1,685,461; Sept. 25.
Motor stand. M. Talgmann. 1,685,103; Sept. 25.
Motor-vehicle front assembly. E. W. Senholm and H. J. Earl. Des. 76,428; Sept. 25.
Motors, Suspension for electric railway. A. F. Masury. 1,685,430; Sept. 25.
Mounting for water-purifying apparatus. I. D. Gronk. Des. 76,391; Sept. 25.
Mounting, Removable-unit. W. B. Jupp. 1,685,569; Sept. 25.
Muffler. H. E. Tyler. 1,685,302; Sept. 25.
Muffler for internal-combustion engines, Exhaust-gas. J. Blanchard. 1,685,701; Sept. 25.
Musical instrument. F. W. Fellows. 1,685,401; Sept. 25.
Musical instrument. F. Gretsch. 1,685,706; Sept. 25.
Musical-instrument case. S. A. Click. 1,685,123; Sept. 25.
Musical instruments, Operating means for. A. Nelson. 1,685,240; Sept. 25.
Nail-making machine. R. W. Strout. 1,685,439; Sept. 25.
Nailing strip or block. C. M. Johnson. 1,685,491; Sept. 25.
Name plate. A. L. Myers. 1,685,334; Sept. 25.
Nitrites, Production of. E. T. Drake. 1,685,629; Sept. 25.
Nut lock. E. B. Carns. 1,685,120; Sept. 25.
Oil burner, Hydrocarbon-. J. M. Gee. 1,685,567; Sept. 25.
Oil from oil-containing substances, Apparatus for the separation of. C. Drahn. 1,685,534; Sept. 25.
Oil-well elevator. J. F. Moody. 1,685,713; Sept. 25.
Oils and fats, Purifying. W. Gensecke. 1,685,195; Sept. 25.
Operating electric switches, Mechanism for. L. W. Bond. 1,685,665; Sept. 25.
Optical system. R. Ruhnan. 1,685,646; Sept. 25.
Optical system for color processes. C. W. Frederick. 1,685,600; Sept. 25.
Ore-concentrating device. M. M. Newton. 1,685,644; Sept. 25.
Ore separator. E. H. Stepp. 1,685,466; Sept. 25.
Oxidation, Controlling rate of. H. R. Carveth. 1,685,520; Sept. 25.
Oxidation of anthracene, Catalytic. A. O. Jaeger. 1,685,635; Sept. 25.
Package and making the same, Preservative. G. W. Beadle. 1,685,392; Sept. 25.
Parachute. D. Huriburt. 1,685,422; Sept. 25.
Parachute. A. R. Thörnblad. 1,685,688; Sept. 25.
Parrot stand. L. J. Leon. Des. 76,406; Sept. 25.
Pedometer. R. V. Owen. 1,685,242; Sept. 25.
Pen, Fountain. F. M. Ashley. 1,685,413–14; Sept. 25.
Pencil, Magazine. F. Partos. 1,685,374; Sept. 25.
Perch for preventing bird trouble in connection with electrical transmission lines, Insulated. A. O. Austin. 1,685,663; Sept. 25.
Perforator. W. S. Jones and H. U. Baker. 1,685,492; Sept. 25.
Pharmaceutical products. W. Schoeller, A. Feldt, M. Gehrke, and E. Borgwardt. 1,685,341; Sept. 25.

ERRATA.

1,682,779, page 82 (issue of Sept. 4, 1928), in the heading, lines 2 and 3, strike out "assignor to The E. T. Burrowes Company, Portland, Me., a Corporation of Maine."

1,685,322, page 829 (issue Sept. 25, 1928), strike out the word "Withdrawn" and insert *Apparatus for Forging or Forming Metal Articles. Frank Scott, Sheffield, England. Filed Oct. 11, 1927. Serial No. 225,526.*

Patents Nos. 1,685,770 to 1,686,505.

THE OFFICIAL GAZETTE

OF THE

United States Patent Office.

Vol. 375—No. 1. TUESDAY, OCTOBER 2, 1928. Price—$10 per year.

The OFFICIAL GAZETTE is mailed under the direction of the Superintendent of Documents, Government Printing Office, to whom all subscriptions should be made payable and all communications respecting the Gazette should be addressed. Issued weekly. Subscription, $10.00 per annum; including annual indexes, $11.50; single numbers, 25 cents each.

PRINTED COPIES OF PATENTS are furnished by the Patent Office at 10 cents each. For the latter, address the Commissioner of Patents, Washington, D. C.

CIRCULARS OF GENERAL INFORMATION concerning PATENTS or concerning TRADE-MARKS, PRINTS, and LABELS will be sent without cost on request to the Commissioner of Patents, Washington, D. C.

Adjudicated Patents.

(C. C. A. Mich.) The Whittier patent, No. 970,672, for refrigerator-shelf support, claims 7 and 8 *Held* invalid. *Grand Rapids Refrigerator Co.* v. *Stevens*, 27 F. (2d) 248.

(C. C. A. Mich.) The Whittier patent, No. 1,147,288, for enameled or porcelain-coated refrigerator linings, claims 1, 2, and 4 *Held* not infringed. *Id.*

(D. C. Ga.) The Schulde patent, No. 1,225,682, for improvements in show-case refrigerator, *Held* invalid. *Harry L. Hussman Refrigerator & Supply Co.* v. *Warren*, 27 F. (2d) 450.

(C. C. A. Ohio.) The Smith patent, No. 1,262,860, for incubator, *Held* not infringed. *Buckeye Incubator Co.* v. *Blum*, 27 F. (2d) 838.

(C. C. A. Mich.) The Hoffman patent, No. 1,353,161, for disk wheel for automobiles, claims 1, 2, and 8 *Held* valid and infringed. *Motor Wheel Corporation* v. *Hoffman*, 27 F. (2d) 221.

(C. C. A. Ill.) The Slattery patent, No. 1,438,561, for repair link for automobile tire chains, claims 1 and 2 *Held* valid and infringed. *Slattery* v. *Johnson Motor Products Co.*, 27 F. (2d) 209.

(D. C. Ga.) The Schulde patent, No. 1,447,733, for improvements in show-case refrigerator, claims 10, 12, and 13 *Held* invalid. *Harry L. Hussman Refrigerator & Supply Co.* v. *Warren*, 27 F. (2d) 450.

(C. C. A. Ohio.) The Connelly patent, No. 1,522,577, for method of tunnel excavation, *Held* invalid. *Connelly* v. *Anderson*, 27 F. (2d) 330.

(D. C. Mich.) The Putnam patent, No. 1,537,879, for pneumatic-treaded vehicle wheel, claims 1 and 2 *Held* invalid. *Steel Wheel Corporation* v. *B. F. Goodrich Rubber Co.*, 27 F. (2d) 427.

(D. C. Pa.) The Haiss reissue patent, No. 15,515, for improvement in wagon loaders, claims 8 and 9 *Held* invalid. *George Haiss Mfg. Co.* v. *Link Belt Co.*, 27 F. (2d) 397.

(C. C. A. Ill.) The Flint reissue patent, No. 15,687, for a guide showing comparative express and parcel-post rates, *Held* invalid. *Flint et al.* v. *G. R. Leonard & Co. et al.*, 27 F. (2d) 215.

APPLICATIONS.

PRELIMINARY AMENDMENT.

Additional Claims.

U. S. Patent Office, *Washington, Aug. 18, 1928.*

My attention has just been called to an application filed with 64 claims and a filing fee of $64.00, as required by statute. Six days after the application was filed the applicant presented an amendment adding 84 additional claims, without the extra fee of $1.00 per additional claim, as would have been required by the statute had the claims been presented six days earlier. In cases in which claims in excess of the number corresponding to the filing fee are presented before the first official action on the case, the Examiners will place the amendment in the file and enter it on the file wrapper, but will defer action on the claims presented in the amendment. In his first action the Examiner should act on the claims originally presented and for which the appropriate fee was paid. If, after the official action is made, the applicant believes that any of the claims presented by the amendment are patentable, he can have them entered and considered in the next action, but only by specifically pointing out wherein the claims presented in the amendment are patentable over the references cited by the Examiner.

THOMAS E. ROBERTSON,
Commissioner.

3827

Condition of Applications Under Examination at Close of Business September 21, 1928.

(Total number of applications awaiting action, excluding Trade-Mark Division, 113,271; Trade-Mark Division, 2,067. Oldest new case, Nov. 22, 1927; oldest amended, Nov. 22, 1927. The dates given are 1928 except where † indicates 1927.)

DECISIONS IN PATENT AND TRADE-MARK CASES.

Court of Appeals of the District of Columbia.

KNIGHT *v.* FISCHER.

No. 1,998. Decided March 5, 1928.

INTERFERENCE—PRIORITY.

Where F. had established that he was the first to reduce the invention to practice, *Held* that the testimony for K. was either insufficient to establish that he was the first to conceive the invention or, if sufficient to establish that fact, was insufficient to show that he was diligent in reducing the invention to practice and priority was properly awarded to F.

APPEAL from the Commissioner of Patents. Affirmed.

Mr. Nelson J. Jewett for Knight.

Mr. A. J. Fihe for Fischer.

Before MARTIN, Chief Justice, VAN ORSDEL, Justice, and SMITH, Judge U. S. Court of Customs Appeals.

VAN ORSDEL, *J.:*

This is an interference proceeding involving a device for molding minced meats into blocks so that it can be conveniently sliced for use in making sandwiches. The issue is involved in a single count, as follows:

In a mold of the class described, a body portion having angularly disposed walls, said body portion opening along a line extending lengthwise thereof, said body portion being constructed to be sprung apart from a corner thereof.

It is conceded that the party Fischer was the first to reduce the invention to practice; and the dates accorded him by the tribunals of the Patent Office for reduction to practice in April 1923, and for conception in December 1922, are fully supported by the record.

To overcome these dates the party Knight attempted to establish a date of conception as early as July 1922, when he claims to have seen a square mold at Hazard, Ky., which was manufactured by Swift & Company. He testified that on returning home he took the matter up with one Miles, sales manager of the Louisville Provision Company, and they experimented in making square sausages. This experiment was a failure, however, because the sausage had to be boiled in the square mold and then removed from the mold and smoked. Later the party Knight, in company with Miles, visited a plant in Indianapolis, Ind., and were shown a round mold, at which time Knight claims that he suggested the possibility of making a mold out of wire. On returning to Louisville, Knight and Miles took up the matter of manufacturing a square container that would obviate the trouble they had experienced in connection with perforated and solid molds. The record, however, is silent as to what actually resulted from the experimental work of Knight and Miles.

Knight claims that he then made known his ideas to one Poschinger, and asked him to manufacture some molds that would be workable. Knight claims that he furnished Poschinger some sketches, but this is definitely denied by Poschinger, who says that Knight simply gave him an oral description of what he wanted. Poschinger prepared some molds which, it may be conceded, fairly came within the issue, but Poschinger testifies that the first time the idea of a square mold was brought to his attention by Knight was "about July 1923". This, of course, is too late a date to be of any advantage to Knight.

Taking the testimony as a whole, we fully agree with the conclusion of the Commissioner that—

the nature of the ideas that he imparted to Poschinger does not appear, but even assuming that at the time he called Poschinger to his aid he was in possession of a clear and definite conception of the invention in issue, which assumption is inconsistent with Poschinger's testimony, still Knight could not be given a date of conception earlier than Fischer's date. * * * If Knight be given a date of conception as early as July 1922, then it must be held that he was lacking in diligence. No reasonable excuse has been offered for a delay of more than a year in embodying the simple inventive concept in issue in an operative mold.

In any view of the case Fischer, as found by the concurrent decisions of the tribunals below, must prevail.

The decision of the Commissioner is affirmed.

Court of Appeals of the District of Columbia.

FORD MOTOR COMPANY *v.* PARTRIDGE, SINGER & BALDWIN, INC.

No. 2,048. Decided May 7, 1928.

1. TRADE-MARKS—"WARFORD" AND "FORD" NOT DECEPTIVELY SIMILAR.

The appearance and pronunciation of the word "Warford" is so distinctively different from the word "Ford" standing alone as to obviate any probability of confusion either as to origin or reputation.

2. SAME—CORPORATE NAME.

The last syllable in the mark "Warford" is a word in common use and is the same as the ending of many surnames and is not an appropriation of the corporate name of the Ford Motor Company.

APPEAL from the Commissioner of Patents. Affirmed.

Mr. C. R. Halbert, Mr. E. S. Rogers, Mr. C. M. Thomas, and *Mr. F. D. Thomas* for Ford Motor Company.

Mr. D. L. Morris for Partridge, Singer & Baldwin, Inc.

Before MARTIN, Chief Justice, and ROBB and VAN ORSDEL, Associate Justices.

VAN ORSDEL, *J.:*

This appeal is from the decision of the Commissioner of Patents dismissing appellant's petition for the cancellation of the registered trade-mark of appellee company, consisting of the word "Warford," used on automobile transmissions.

Cancellation is sought first on the ground that the registered mark has for—

its principal characteristic and predominating feature the word "Ford," which is the principal characteristic and predominating feature of the Ford Motor Company's corporate name;

and second, that the registered mark—

is so similar to the trade-mark of the Ford Motor Company as to be likely to cause confusion in the minds of the public, and is calculated to deceive and mislead the public into the belief that the goods of the said Partridge, Singer & Baldwin, Inc., are produced and sold by the Ford Motor Company.

We agree with the decision of the Commissioner that the last syllable in registrant's mark is a word in common use, and is the same as the ending of many surnames, and is not such an appropriation of appellant's corporate name as to justify legal intervention; and that the appearance and pronunciation of the word "Warford" is so distinctively different from the word "Ford" standing alone, as to obviate any probability of confusion either as to origin or reputation.

For the same reason the second ground advanced in support of the petition for cancellation was properly denied by the tribunals below. The testimony discloses the use of registrant's mark since January, 1922; and the goods manufactured are intended for use and sold by dealers for use on Ford automobiles, and though appellee company in the meantime has built up a business of approximately $7,000,000, no evidence was submitted of actual confusion of either goods or origin. Neither are we of opinion that the marks are so similar as to probably lead to confusion.

The decision of the Commissioner is affirmed.

Court of Appeals of the District of Columbia.

IN RE BLISS.

No. 2,053. Decided May 7, 1928.

1. PATENTABILITY—INVENTION—NONANALOGOUS ARTS.
Trunks belong to the art of baggage, which is different from the art classified under paper receptacles.

2. SAME—SAME.
A claim for a shipping case including certain specified details of the corner construction *Held* patentable over the prior art.

APPEAL from the Commissioner of Patents. Reversed.

Mr. S. C. Barnes, *Mr. C. M. Thomas*, and *Mr. F. D. Thomas* for Bliss.

Mr. T. A. Hostetler for the Commissioner of Patents.

Before MARTIN, Chief Justice, and ROBB and VAN ORSDEL, Associate Justices.

VAN ORSDEL, *J.*:

This appeal is from the decision of the Commissioner of Patents denying appellant a patent for a fiber-board shipping case.

The invention is described by the Examiner as follows:

> The invention claimed consists of a shipping case made from three blanks, a main blank which has three panels and two cover wings, each panel having foldable corner flaps, the three panels, when folded, forming the two side walls and the bottom of the case and two end blanks having foldable corner flaps. When the corner flaps of the main blank and the end blanks are folded against the adjacent blank double reinforced corners are formed.

The references cited on which the patent was denied are as follows: (248) Lemon, 1,428,597, September 12, 1922; (834) Bliss, 1,430,151, September 26, 1922; (210) Walter, 1,198,293, September 12, 1916; (87) Forward, 1,160,871, November 16, 1915; (31) Morrow, 361,885, April 26, 1887.

The object of the inventor is to produce a fiber-board box of superior strength by the use of a minimum amount of material, that will be able to withstand the hardships of shipping and will be strong enough to withstand the crushing strains when stacked one upon another either in shipping or in warehouses. The advantages of the invention are described in the specification as follows:

> I also find this case a great advantage in connection with damp goods such as soap, butter, oleomargarine, and similar products. Soap shrinks and leaves a clearance in the inside of the package, so that the package itself has to be able to support the stresses and strains brought upon it in stacking and handling. Butter and oleomargarine are shipped in refrigerator cars and stored in refrigerators. The board becomes damp and soft and great strength at the corners is needed to keep it in good condition.

The principal feature of appellant's invention consists in so folding and adjusting the corners that there will be a double reenforcement of the corners of equal and uniform strength from top to bottom. This feature, we think, is not shown in any of the references, with the exception of possibly the patent to Morrow, which will be referred to hereafter.

The Forward and Koff patents relate to suitcases, but neither of these references disclose corners having uniform double column strength. A double-angle-strip corner of uniform width extending from the top to the bottom of the box is not disclosed. In these references the inside and outside flaps in the corners are so cut in triangular shape that the result obtained, so far as resisting crushing strains, are not comparable to the resistance obtained by appellant. In other words, while there would be in the suitcases produced by Forward and Koff considerable column strength at the top, this diminishes to nothing at the bottom. Besides, they disclose a waste of stock in construction, which is not found in appellant's device.

Coming to the patents to Lemon and Bliss, we find that they disclose only a single angle and not the double angle of the device before us. In other words, it appears that the applicant has taken the main blank of the Lemon patent, which discloses the angle fold at the end of the box, and combined it with the two end blanks of the Bliss patent, with the angle fold at the sides, and by combining the two has secured practically double strength with little increase in the amount of material used. The combination thus made by applicant removes his invention from the field of the Bliss and Lemon patents.

This brings us to the Morrow patent, which is used as a reference. This shows the double angle as applied in the construction of trunks. It belongs to a different art; namely the baggage art, which is different from the art classified under paper receptacles. While the use in the two inventions is similar, the method of construction is entirely different.

In inventions relating to simple articles, which consist largely in the making of valuable improvements over the prior art, it is quite usual to find a counterpart in some other art which is suggestive of the invention under immediate consideration. For example an angle iron used to protect the edge of a wooden pavement did not anticipate an angle iron used to protect the edge of a concrete or asphalt pavement. *Goodwin* v. *International Steel Tie Co.*, 2 Fed. (2d) 198. It was also held that a celluloid cap for salt cellars was not anticipated by a celluloid cap for talcum bottles. *Westmoreland Specialty Company* v. *Hogan*, 167 Fed. 327. It was likewise held that a metal dome driven into the bottom end of chair legs to take the place of castors is not anticipated by a similar device used on the bottom of travelers' grips. *Barry* v. *Harpoon Castor Company*, 209 Fed. 207.

While the present case is a close one, we are of opinion that the applicant has contributed something to the art, entitled to protection under the patent laws. It has been the policy of this court, as announced in many cases, to give the inventor the benefit of the doubt when any doubt exists. We think the present case comes within the rule, and that the applicant is entitled to a patent.

The decision of the Commissioner is reversed.

Interference Notice.

U. S. PATENT OFFICE, *Washington, Sept. 15, 1928.*

Alice L. Lynch, her assigns or legal representatives, take notice:

An interference having been declared by this Office between the application of John L. Lombardo, 59-61 Broadway, Buffalo, N. Y., for registration of a trade-mark and trade-mark registered July 3, 1923, No. 169,843, to Alice L. Lynch, of 442 West Forty-Third Street, New York, N. Y., and a notice of such declaration sent by registered mail to the said Alice L. Lynch at the said address having been returned by the post office as undeliverable, notice is hereby given that unless said Alice L. Lynch, her assigns or legal representatives, shall enter an appearance therein within 30 days from the first publication of this order the interference will be proceeded with as in case of default. This notice will be published in the OFFICIAL GAZETTE for three consecutive weeks.

M. J. MOORE,
First Assistant Commissioner.

TRADE-MARKS

OFFICIAL GAZETTE, OCTOBER 2, 1928.

[VOL. 375. No. 1.]

The following trade-marks are published in compliance with section 6 of the act of February 20, 1905, as amended March 2, 1907. Notice of opposition must be filed within thirty days of this publication.

Marks applied for " under the ten-year proviso " are registrable under the provision in clause (b) of section 5 of said act as amended February 18, 1911.

As provided by section 1 of said act, a fee of ten dollars must accompany each notice of opposition.

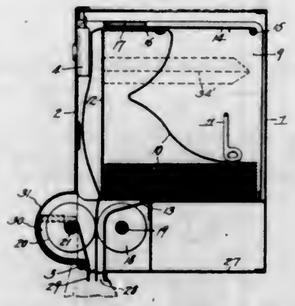
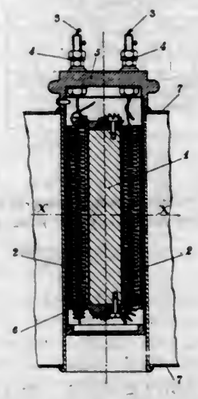
REISSUES



OCTOBER 2, 1928.

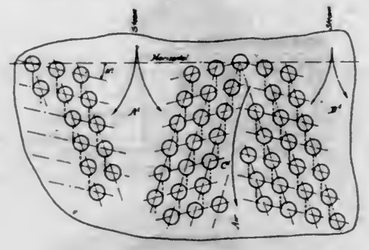
17,091. MEANS FOR SECURING KNOBS AND DIALS TO INSTRUMENT SHAFTS. HENRY J. KASCH, Dayton, Ohio, assignor to Kurz-Kasch Company, South Broadway, near Dayton, Ohio, a Corporation of Ohio. Filed Jan. 28, 1926. Serial No. 84,522. Original No. 1,563,635, dated Dec. 1, 1925, Serial No. 723,951, filed July 3, 1924. 12 Claims. (Cl. 116—129.)

1. In a device of the type described, the combination with a shaft, of a knob and a dial for conjoint use in turning the shaft, the dial having a tapering axial hole and the knob having a tubular extension adapted to be brought over said hole, a loose bushing having a tapered, split end adapted to be contracted within said hole, and having its opposite end threaded for connection with the tubular extension on the knob, whereby when the knob is turned, the tapered end of the bushing will be contracted tightly about the shaft, for the purpose specified.



17,092. DISPENSING CABINET. MOSES M. MARCUSE, New York, N. Y., assignor to West Disinfecting Company, Long Island City, N. Y., a Corporation of New York. Filed May 1, 1928. Serial No. 274,310. Original No. 1,658,608, dated Feb. 7, 1928, Serial No. 73,406, filed Dec. 5, 1925. 11 Claims. (Cl. 312—39.)

1. A portable receptacle for dispensing cabinets, provided with an opening in its rear wall for receiving the material to be dispensed, a front wall having a platen extending inwardly from the upper edge thereof, and a top wall having its forward edge normally resting upon said platen whereby the stock to be dispensed is placed under tension as it is drawn over said platen and between it and the forward edge of said cover, said top being revolvable about its rear edge into position to close said opening in the rear wall of said receptacle.

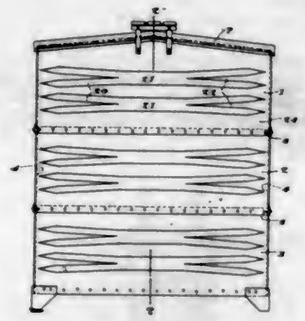


17,093. THERMOELECTRIC HEATER. ANGELO TORRIANI, Pavia, Italy. Filed Feb. 18, 1928. Serial No. 255,453. Original No. 1,651,644, dated Dec. 6, 1927, Serial No. 71,854, filed Nov. 27, 1925, and in Italy Dec. 15, 1924. 5 Claims. (Cl. 219—38.)

1. A thermo-electric candle for heating fluid masses, in which a plurality of spiral resistances are used, lodged each in a recess of its own formed in a heat transmission mass, this heat transmission mass being an accurate fit in an outer envelope secured to the walls of the vessel in which the fluid to be heated is contained, so that when said

resistances are energized, said mass of material is caused by the thermal expansion to come in forcible contact with said envelope.

17,094. SURFACE CONDENSER. ANDRÉ GINABAT, Paris, France. Filed May 9, 1924. Serial No. 712,169. Original No. 1,451,334, dated Apr. 10, 1923, Serial No. 466,481, filed May 3, 1921. 19 Claims. (Cl. 257—43.)



15. A surface condenser of the tubular type having tubes so disposed that a vertical line from every point on the axis of the upper tube of a pair of tubes is practically tangent to the lower tube of the pair, clearance spaces being provided in the midst of the tubular system for the entrance of steam.

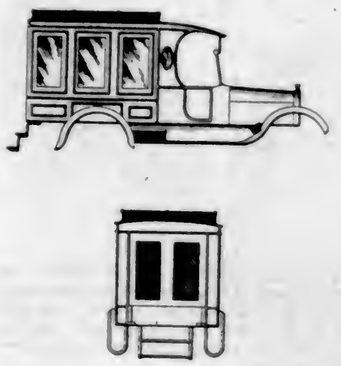
17,095. METAL STRUCTURE FOR RAILWAY CARS. ARTHUR E. SMALL, Chicago, Ill., assignor to Union Metal Products Company, Chicago, Ill., a Corporation of Delaware. Filed June 15, 1928. Serial No. 285,651. Original No. 1,638,172, dated Aug. 9, 1927, Serial No. 595,634, filed Oct. 19, 1922. Divided and application filed Jan. 3, 1927. Serial No. 158,595. 41 Claims. (Cl. 105—410.)

1. A metallic panel for railway cars having a reinforcement formed therein, comprising a plurality of stiffening

ribs which merge into each other to form a relatively wider stiffening rib adjacent the center of said reinforcement,

the height of said reinforcement being greatest adjacent its center and almost parallel to the first mentioned ribs.

17,096. METHOD OF COLORING YARN ON BOBBINS. JAMES S. JOHNSTON, Elmira, N. Y., assignor, by mesne assignments, to Eclipse Textile Devices, Incorporated, Elmira Heights, N. Y., a Corporation of New York. Filed Mar. 8, 1928. Serial No. 260,214. Original No. 1,613,707, dated Jan. 11, 1927, Serial No. 751,069, filed Nov. 20, 1924. 11 Claims. (Cl. 8—5.)

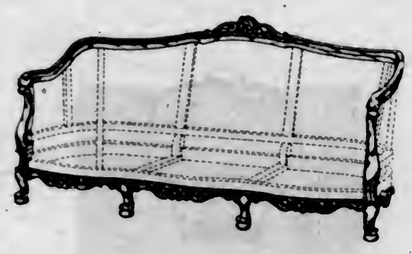


1. The herein described process for coloring portions of yarn on the bobbin consisting in applying a coloring fluid to a portion of the periphery of the yarn on the bobbin and drawing said coloring matter into the yarn by suction applied to the interior of the bobbin.

DESIGNS

OCTOBER 2, 1928.

76,447. MOTOR-VEHICLE BODY. WILLIAM E. AVRIL, Santa Monica, Calif. Filed Oct. 5, 1927. Serial No. 23,644. Term of patent 14 years.



The ornamental design for a motor vehicle body as shown.

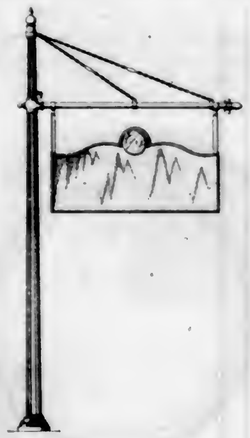
76,453. CONSOLE TABLE. EDWARD G. BLUMENFELD, Brooklyn, N. Y., assignor to La Salle Brass & Bronze Works, Inc., a Corporation of New York. Filed Aug. 2, 1928. Serial No. 27,673. Term of patent 3½ years.

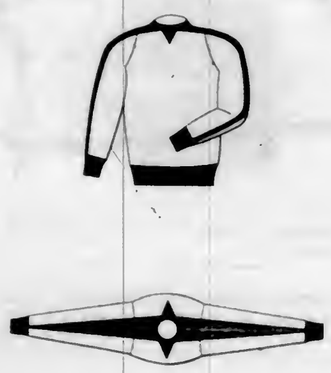
The ornamental design for a console table, as shown.

76,454. PLATE. EDGAR M. BOTTOME, Moundsville, W. Va., assignor to Fostoria Glass Company, Moundsville, W. Va., a Corporation of West Virginia. Filed July 2, 1928. Serial No. 27,348. Term of patent 14 years.



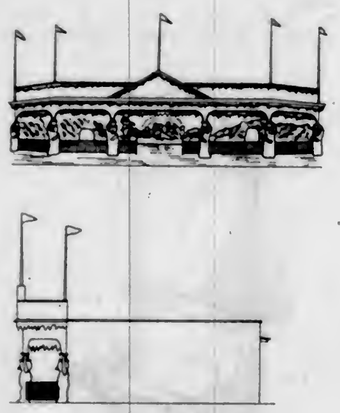
The ornamental design for a plate, as shown and described.

76,455. PLATE. EDGAR M. BOTTOME, Moundsville, W. Va., assignor to Fostoria Glass Company, Moundsville, W. Va., a Corporation of West Virginia. Filed July 2, 1928. Serial No. 27,349. Term of patent 14 years.



The ornamental design for a plate, as shown and described.

76,456. SIGN. ROBERT S. BRENNER, Union City, N. J., and JOHN SCOTT, Stapleton, N. Y., assignors to Standard Oil Development Company, a Corporation of Delaware. Filed June 19, 1928. Serial No. 27,202. Term of patent 14 years.

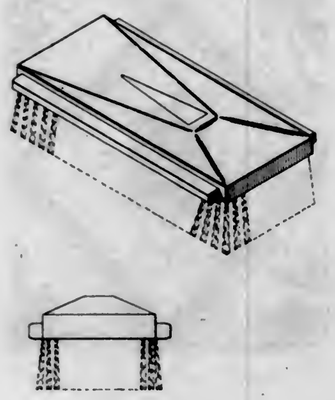


The ornamental design for a sign, as shown.

76,457. SHIRT. HAROLD L. BURR, Rockford, Ill. Filed Jan. 19, 1927. Serial No. 20,434. Term of patent 7 years.

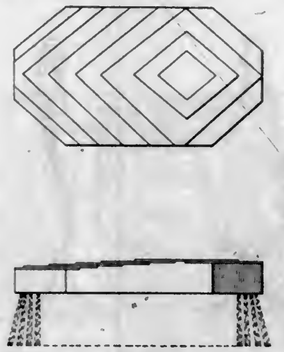
The ornamental design for a shirt substantially as shown and described.

76,458. AMUSEMENT HOUSE. NAHUM A. CANNON, Fairview, Ala. Filed Nov. 4, 1927. Serial No. 24,009. Term of patent 14 years.



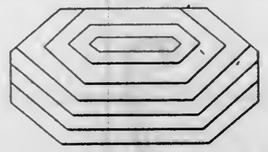
The ornamental design for an amusement house substantially as shown and described.

76,459. TABLE SCARF OR SIMILAR ARTICLE. JOSEPH DERK, Doylestown, Pa., assignor to The Derk Manufacturing Company, Doylestown, Pa., a Corporation of Pennsylvania. Filed July 18, 1928. Serial No. 27,521. Term of patent 3½ years.

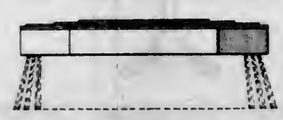


The ornamental design for a table scarf or similar article as shown and described.

76,460. BRUSH BACK. THOMAS A. DE VILBISS, Toledo, Ohio, assignor to The Ames Brush Company, Toledo, Ohio, a Corporation of Ohio. Filed Apr. 7, 1928. Serial No. 26,174. Term of patent 7 years.

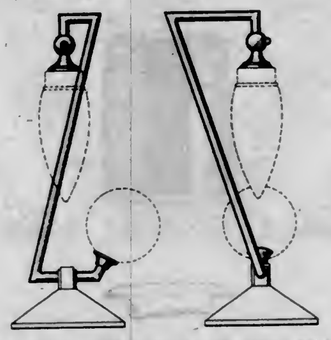


The ornamental design for a brush back, substantially as shown.

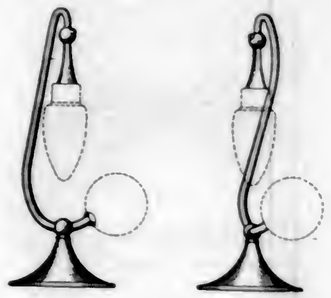


76,461. BRUSH BACK. THOMAS A. DE VILBISS, Toledo, Ohio, assignor to The Ames Brush Company, Toledo, Ohio, a Corporation of Ohio. Filed Apr. 7, 1928. Serial No. 26,176. Term of patent 7 years.

The ornamental design for a brush back, substantially as shown.



76,462. BRUSH BACK. THOMAS A. DE VILBISS, Toledo, Ohio, assignor to The De Vilbiss Company, Toledo, Ohio, a Corporation of Ohio. Filed Apr. 7, 1928. Serial No. 26,189. Term of patent 7 years.



The ornamental design for a brush back, substantially as shown.

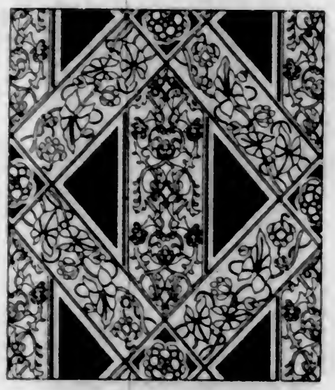
76,463. ATOMIZER. THOMAS A. DE VILBISS, Toledo, Ohio, assignor to The De Vilbiss Company, Toledo, Ohio, a Corporation of Ohio. Filed Apr. 7, 1928. Serial No. 26,183. Term of patent 7 years.

The ornamental design for an atomizer, substantially as shown.

76,464. ATOMIZER. THOMAS A. DE VILBISS, Toledo, Ohio, assignor to The De Vilbiss Company, Toledo, Ohio, a Corporation of Ohio. Filed Apr. 7, 1928. Serial No. 26,189. Term of patent 7 years.

The ornamental design for an atomizer, substantially as shown.

76,465. ATOMIZER. THOMAS A. DE VILBISS, Toledo, Ohio, assignor to The De Vilbiss Company, Toledo, Ohio, a Corporation of Ohio. Filed Apr. 7, 1928. Serial No. 26,190. Term of patent 7 years.



The ornamental design for an atomizer, substantially as shown.

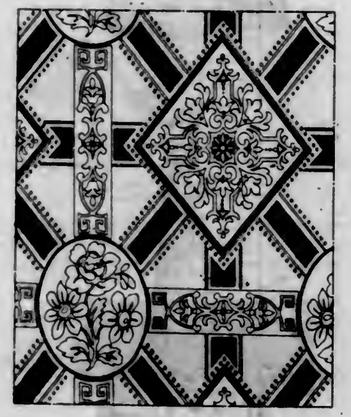
76,466. BELT BUCKLE. ROBERT F. EICHNER, Rochester, N. Y., assignor to Hickok Manufacturing Company, Rochester, N. Y., a Corporation of New York. Filed July 11, 1928. Serial No. 27,453. Term of patent 3½ years.

The ornamental design for a belt buckle, as shown.

76,467. TEXTILE FABRIC. GUSTAVE F. ERHARD, Scranton, Pa., assignor to The Scranton Lace Company, Scranton, Pa., a Corporation of Pennsylvania. Filed July 19, 1928. Serial No. 27,530. Term of patent 7 years.

The ornamental design for a textile fabric, substantially as shown.

76,468. TEXTILE FABRIC. GUSTAVE F. ERHARD, Scranton, Pa., assignor to The Scranton Lace Company, Scranton, Pa., a Corporation of Pennsylvania. Filed July 19, 1928. Serial No. 27,531. Term of patent 7 years.



The ornamental design for a textile fabric, substantially as shown.

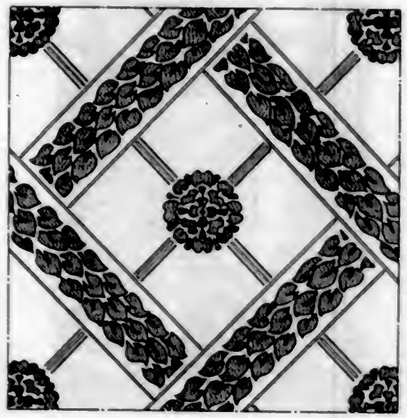
76,469. TEXTILE FABRIC. GUSTAVE F. ERHARD, Scranton, Pa., assignor to The Scranton Lace Company, Scranton, Pa., a Corporation of Pennsylvania. Filed July 19, 1928. Serial No. 27,532. Term of patent 7 years.

The ornamental design for a textile fabric, substantially as shown.

76,470. TEXTILE FABRIC. GUSTAVE F. ERHARD, Scranton, Pa., assignor to The Scranton Lace Company, Scranton, Pa., a Corporation of Pennsylvania. Filed July 19, 1928. Serial No. 27,534. Term of patent 7 years.

The ornamental design for a textile fabric, substantially as shown.

76,471. TEXTILE FABRIC. GUSTAVE F. ERHARD, Scranton, Pa., assignor to The Scranton Lace Company, Scranton, Pa., a Corporation of Pennsylvania. Filed July 19, 1928. Serial No. 27,535. Term of patent 7 years.

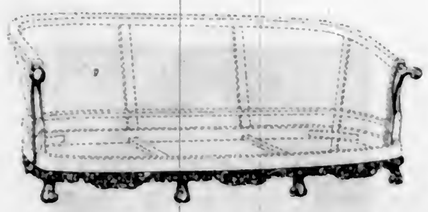


The ornamental design for a textile fabric, substantially as shown.

76,472. TEXTILE FABRIC. GUSTAVE F. ERHARD, Scranton, Pa., assignor to The Scranton Lace Company, Scranton, Pa., a Corporation of Pennsylvania. Filed July 26, 1928. Serial No. 27,586. Term of patent 7 years.

The ornamental design for a textile fabric, substantially as shown.

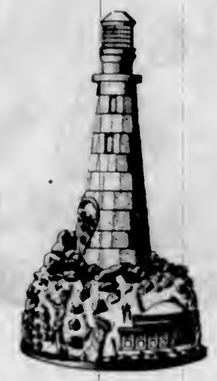
76,473. TEXTILE FABRIC. GUSTAVE F. ERHARD, Scranton, Pa., assignor to The Scranton Lace Company, Scranton, Pa., a Corporation of Pennsylvania. Filed July 26, 1928. Serial No. 27,587. Term of patent 7 years.



The ornamental design for a textile fabric, substantially as shown.

76,474. CAKE. AUGUSTINE C. GORTON, Whittenburg, Tex. Filed July 7, 1928. Serial No. 27,411. Term of patent 7 years.

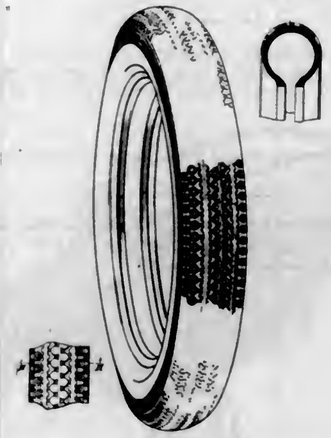
The ornamental design for a cake, as shown.



76,475. SETTEE FRAME OR SIMILAR ARTICLE. CHARLES T. GRAHAM, Grand Rapids, Mich., assignor to American Parlor Frame Company, Sheboygan, Wis., a Corporation of Wisconsin. Filed May 28, 1928. Serial No. 26,882. Term of patent 3½ years.

The ornamental design for a settee frame or similar article as shown and described.

76,476. LAMP. JOSEPHINE A. GREATHOUSE, Los Angeles, Calif. Filed Jan. 23, 1928. Serial No. 24,997. Term of patent 3½ years.

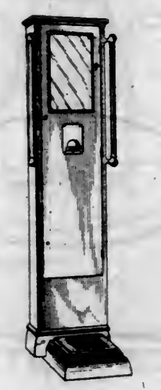


The ornamental design for a lamp substantially as shown.

76,477. FOLDING CHAIR. WALLACE G. GROSSMAN, North White Plains, N. Y. Filed May 23, 1928. Serial No. 26,826. Term of patent 3½ years.

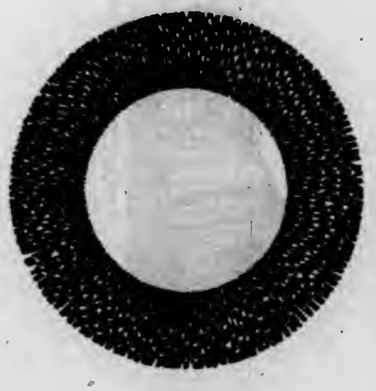
The ornamental design for a folding chair as shown.

76,478. VEHICLE TIRE. LA PORT W. HEEFNER, Greensburg, Pa., assignor to Pennsylvania Rubber Company, Jeannette, Pa., a Corporation of Pennsylvania. Filed Dec. 3, 1927. Serial No. 24,376. Term of patent 14 years.



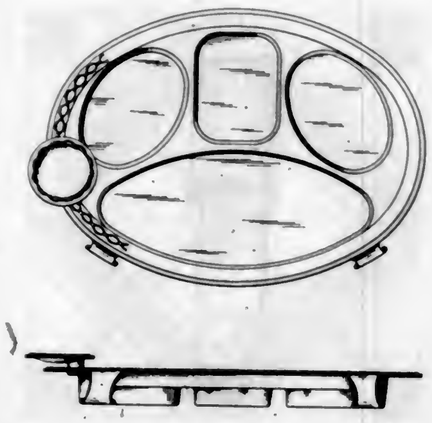
The ornamental design for a vehicle tire, as shown.

76,479. TRIMMING BRAID. PAUL HERSHKOWITZ and NATHAN HERSHKOWITZ, New York, N. Y. Filed Sept. 29, 1927. Serial No. 23,577. Term of patent 14 years.



The ornamental design for trimming braid, as shown.

76,480. WEIGHING-SCALE CASING. GUSTAV F. HOCHRIEM, Chicago, Ill., assignor to Rhodes-Hochriem Manufacturing Co., Chicago, Ill., a Corporation of Illinois. Filed Sept. 11, 1926. Serial No. 19,033. Term of patent 14 years.

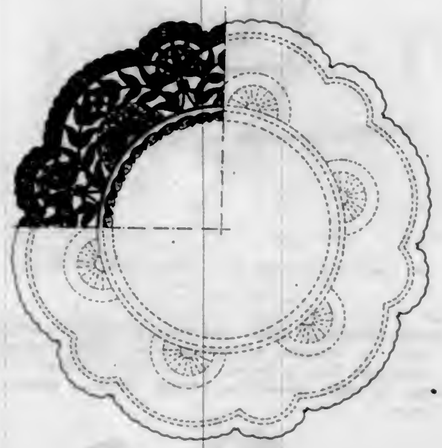


The ornamental design for a weighing scale casing, as shown.

76,481. WREATH. VICTOR T. HOEFLICH, New York, N. Y. Filed Apr. 6, 1928. Serial No. 26,154. Term of patent 14 years.

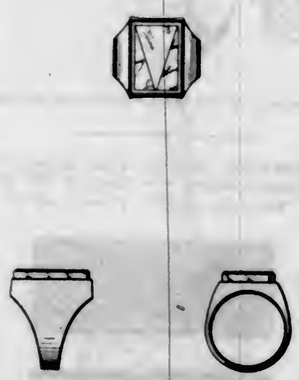
The ornamental design for a wreath, as shown.

76,482. SERVICE TRAY. SAMUEL W. JAMES, Chicago, Ill. Filed Jan. 4, 1928. Serial No. 24,752. Term of patent 3½ years.



The ornamental design for a service tray as shown and described.

76,483. COMBINED PIANO CASE AND WRITING DESK. WEBSTER E. JANSSEN, New York, N. Y. Filed Apr. 24, 1928. Serial No. 26,443. Term of patent 14 years.

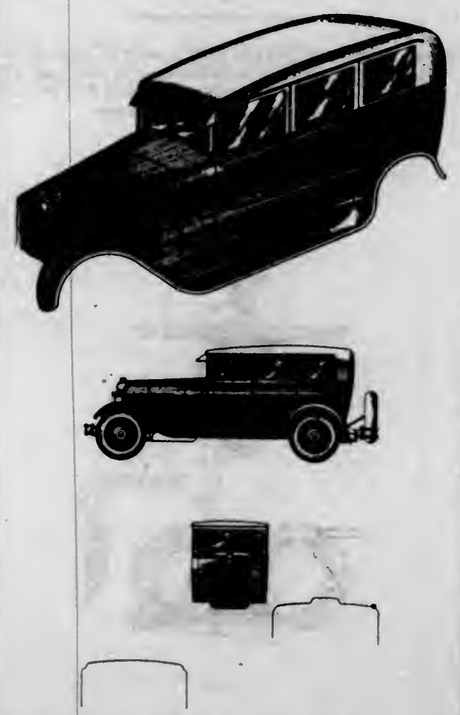


The ornamental design for a combined piano case and writing-desk as shown.

76,484. DOILY. EDWARD KARFIOL, Brooklyn, N. Y. Filed July 18, 1928. Serial No. 27,515. Term of patent 14 years.

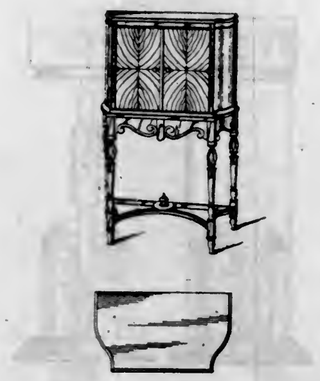
The ornamental design for a doily as shown and described.

76,485. FINGER RING. JOHN W. KRISCH, Kansas City, Mo. Filed Nov. 21, 1927. Serial No. 24,222. Term of patent 3½ years.



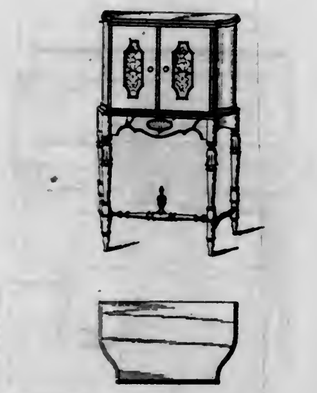
The ornamental design for a finger ring as shown.

76,486. BOX FOR PERFUME, POWDER, OR THE LIKE. ANDRÉ LAVAULT, Paris, France, assignor to Associated Merchandising Corporation, a Corporation of New Jersey. Filed Nov. 25, 1927. Serial No. 24,275. Term of patent 14 years.



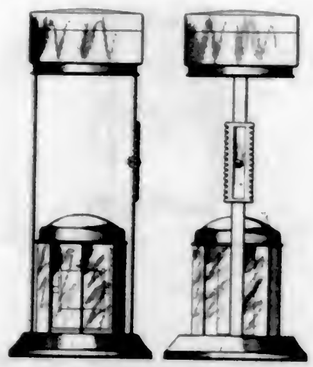
The ornamental design for a box for perfume, powder, or the like, as shown and described.

76,487. COMBINED AUTOMOBILE BODY AND HOOD. DWIGHT B. LEE, Detroit, Mich. Filed Apr. 23, 1927. Serial No. 21,700. Term of patent 14 years.



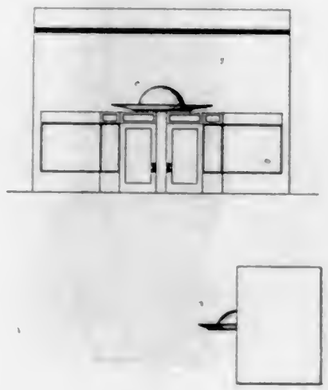
The ornamental design for a combined automobile body and hood, as shown and described.

76,488. RADIOCABINET. ISAAC ARYNSAN LUND, Chicago, Ill. Filed June 15, 1928. Serial No. 27,138. Term of patent 3½ years.



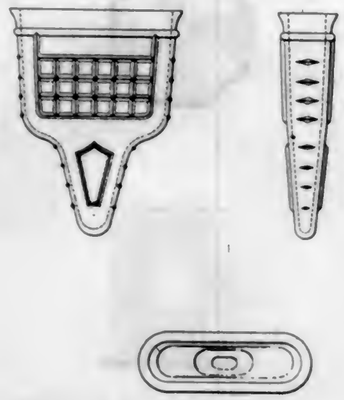
The ornamental design for a radiocabinet substantially as shown.

76,489. RADIOCABINET. ISAAC ARYNSAN LUND, Chicago, Ill. Filed June 15, 1928. Serial No. 27,139. Term of patent 3½ years.



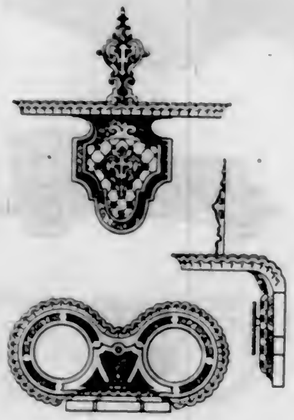
The ornamental design for a radiocabinet substantially as shown.

76,490. COMBINED TOOTHPICK AND DENTAL FLOSS HOLDER. ERNEST THEODORE LUTZ, New York, N. Y. Filed June 9, 1928. Serial No. 27,062. Term of patent 14 years.



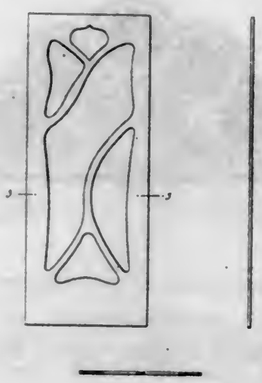
The ornamental design for a combined toothpick and dental floss holder, as shown.

76,491. BUILDING FRONT. FRED R. MERRILL, Miles City, Mont. Filed June 1, 1927. Serial No. 22,277. Term of patent 7 years.



The ornamental design for a building front, as shown.

76,492. ARTICLE OF PASTRY. JACOB NOTKIN, Roxbury, Mass. Filed June 11, 1928. Serial No. 27,078. Term of patent 7 years.



The ornamental design for an article of pastry substantially as shown.

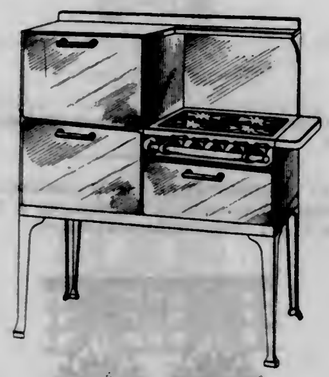
76,493. LIGHTING FIXTURE. ALBERT J. D. OHM, Oak Park, Ill., assignor to R. Williamson & Company, Chicago, Ill., a Corporation of Illinois. Filed Feb. 24, 1928. Serial No. 25,569. Term of patent 14 years.

The ornamental design for a lighting fixture, as shown.

76,494. DOOR. JAMES A. PIETSCH, St. George, N. Y. Filed May 29, 1928. Serial No. 26,900. Term of patent 14 years.

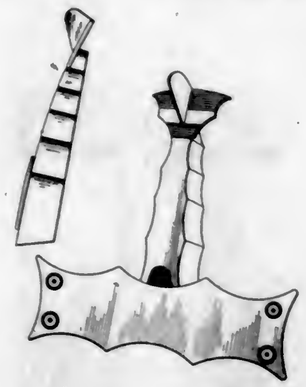
The ornamental design for a door substantially as shown.

76,495. STOCKING. JACOB A. PHILLIPS, Glen Ridge, N. J. Filed May 17, 1928. Serial No. 26,716. Term of patent 7 years.



The ornamental design for a stocking, as shown.

76,496. STOCKING. JACOB A. PHILLIPS, Glen Ridge, N. J. Filed May 17, 1928. Serial No. 26,718. Term of patent 7 years.

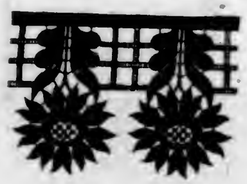


The ornamental design for a stocking, as shown.

76,497. GAS RANGE. MINARD A. POSSONS, Cleveland, Ohio, assignor to American Stove Company, St. Louis, Mo., a Corporation of New Jersey. Filed Mar. 18, 1927. Serial No. 21,198. Term of patent 14 years.

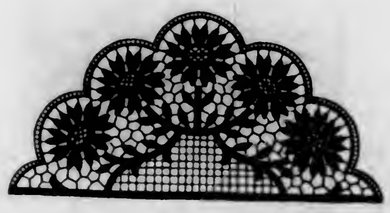
The ornamental design for a gas range as shown and described.

76,498. ADVERTISING SIGN. GUY DU PRIEST, Austin, Tex., assignor to Josephine Nolen, Austin, Tex. Filed Jan. 11, 1928. Serial No. 24,816. Term of patent 14 years.



The ornamental design for an advertising sign as shown.

76,499. SPOON OR ANALOGOUS ARTICLE. ALBERT PRINZ, Wald, Germany. Filed June 3, 1927. Serial No. 22,302. Term of patent 7 years.

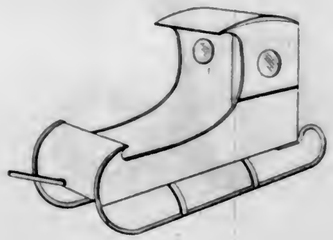


The ornamental design for a spoon or analogous article as shown.

76,500. EMBROIDERED LACE EDGING. HENRY SCHWARBER, Weehawken, N. J. Filed July 9, 1928. Serial No. 27,417. Term of patent 3½ years.

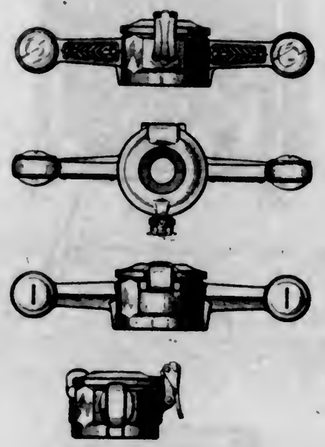
The ornamental design for embroidered lace edging, as shown.

76,501. EMBROIDERED LACE MEDALLION. HENRY SCHWARBER, Weehawken, N. J. Filed Aug. 8, 1928. Serial No. 27,740. Term of patent 3½ years.



The ornamental design for embroidered lace medallion, as shown.

76,502. TEXTILE FABRIC. ARTHUR SOLOMON, New York, N. Y. Filed July 17, 1928. Serial No. 27,510. Term of patent 3½ years.

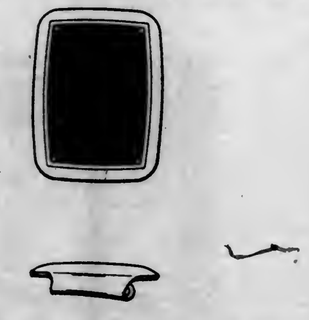


The ornamental design for a textile fabric as shown.

76,503. CHILD'S VEHICLE. JOSEPH J. TISCHLER and WENDELIN A. TISCHLER, St. Paul, Minn. Filed Feb. 2, 1928. Serial No. 25,140. Term of patent 7 years.

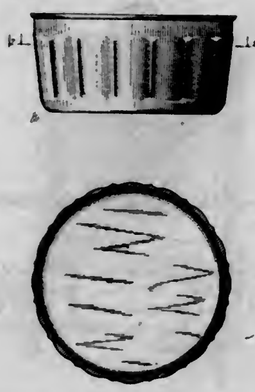
The ornamental design for a child's vehicle, as shown.

76,504. RADIATOR CAP. GEORGE H. TOWNSEND, Greenwich, Conn., assignor, by mesne assignments, to The Kingsley-Miller Company, Chicago, Ill., a Corporation of Illinois. Filed July 31, 1925. Serial No. 14,292. Term of patent 3½ years.



The ornamental design for a radiator cap as shown.

76,505. SCALE CASING. NORMAN TATHAM, Los Angeles, Calif. Filed May 28, 1928. Serial No. 26,892. Term of patent 7 years.



The ornamental design for a scale-casing, as shown.

76,506. BELT BUCKLE. HAROLD C. VAISEY, Rochester, N. Y., assignor to Hickok Manufacturing Company, Inc., Rochester, N. Y., a Corporation of New York. Filed July 11, 1928. Serial No. 27,457. Term of patent 3½ years.

The ornamental design for a belt buckle, as shown.

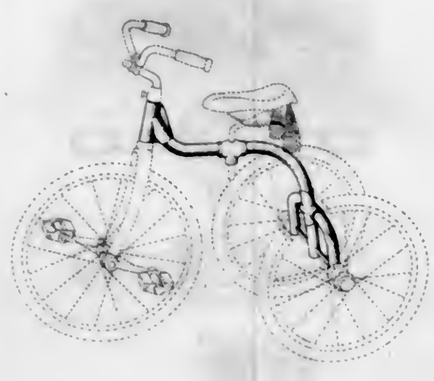
76,507. PAN OR THE LIKE. ANTOINE VERICEL, Baldwin, N. Y., assignor to Doehler Die-Casting Co., a Corporation of New York. Filed May 23, 1928. Serial No. 26,825. Term of patent 3½ years.

The ornamental design for a pan or the like as shown.

76,508. BADGE. LOUIS M. VOIVOD, Warren, Ohio. Filed Nov. 4, 1927. Serial No. 24,002. Term of patent 7 years.

The ornamental design for a badge as shown.

76,509. LIGHTING STANDARD. RALPH WAGGONER, Los Angeles, Calif. Filed Mar. 24, 1928. Serial No. 25,999. Term of patent 14 years.

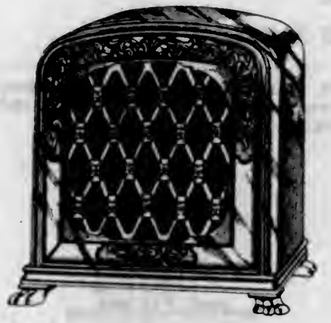


The ornamental design for a lighting standard substantially as shown.

76,510. BRACELET CHAIN OR SIMILAR ARTICLE. NICHOLAS D. WHALEN, Attleboro, Mass., assignor to Eugene C. Healy, doing business as J. T. Healy & Son, Attleboro, Mass. Filed Jan. 12, 1928. Serial No. 24,841. Term of patent 3½ years.

The ornamental design for a bracelet chain or similar article, as shown.

76,511. FRAME FOR A VELOCIPEDE. GEORGE N. WOLFE, Washington, Pa., assignor to Sidway-Topliff Company, Washington, Pa. Filed June 30, 1927. Serial No. 22,626. Term of patent 14 years.



The ornamental design for a frame for a velocipede, as shown.

76,512. RADIOCABINET. EVERETT WORTHINGTON, Chicago, Ill., assignor to Brandes Laboratories, Inc., Newark, N. J., a Corporation of New Jersey. Filed June 2, 1928. Serial No. 26,973. Term of patent 14 years.

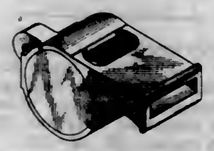
The ornamental design for a radiocabinet as shown.

76,513. LOUD-SPEAKER CABINET. EVERETT WORTHINGTON, Chicago, Ill., assignor to Brandes Laboratories, Inc., Newark, N. J., a Corporation of New Jersey. Filed June 8, 1928. Serial No. 27,042. Term of patent 14 years.

The ornamental design for a loud speaker cabinet as shown.

76,514. RADIOCABINET. EVERETT WORTHINGTON, Chicago, Ill., assignor to Brandes Laboratories, Inc., Newark, N. J., a Corporation of New Jersey. Filed June 13, 1928. Serial No. 27,113. Term of patent 14 years.

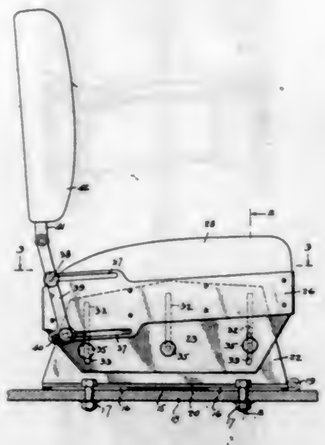
The ornamental design for a radiocabinet as shown.



76,515. RADIOCABINET. EVERETT WORTHINGTON, Chicago, Ill., assignor to Brandes Laboratories, Inc., Newark, N. J., a Corporation of New Jersey. Filed June 16, 1928. Serial No. 27,170. Term of patent 14 years.

The ornamental design for a radiocabinet as shown.

76,516. WHISTLE. GEORGE J. ZISCH, Newark, N. J. Filed May 18, 1927. Serial No. 22,042. Term of patent 7 years.



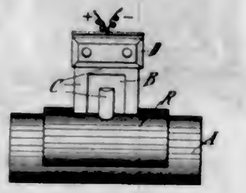
The ornamental design for a whistle, as shown.

PATENTS

GRANTED OCTOBER 2, 1928.

1,685,770. ADJUSTABLE VEHICLE SEAT. RICHARD E. BOWEN, Los Angeles, Calif. Filed July 6, 1926. Serial No. 120,823. 5 Claims. (Cl. 155—14.)

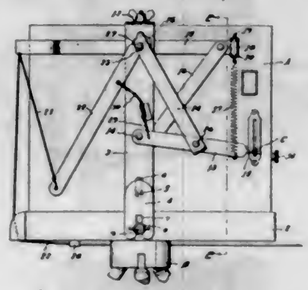
1. A vehicle seat comprising a seat frame, strips within and at the sides of the frame, bars secured within the frame and in spaced relation to said strips to provide slots between the two, a seat supported in the frame between the bars, a supporting frame for the seat frame comprising plates secured to said strips and other plates associated with the first members, and extending into said slots, means for adjustably connecting the first and second said plates to permit vertical adjustment of the seat frame, and a seat back supported on the sides of the seat frame.



1,685,771. CYANO NITRATE EXPLOSIVE AND PROCESS OF PRODUCING THE SAME. FRANK H. BERGEIM, Woodbury, N. J., assignor to E. I. du Pont de Nemours & Company, Wilmington, Del., a Corporation of Delaware. Filed Sept. 15, 1927. Serial No. 219,817. 9 Claims. (Cl. 260—144.)

1. An explosive compound containing a cyano group and a nitrate group.

1,685,772. REDUCTION OF SULPHATE MINERALS AND BRIQUETTES THEREFOR. JAMES ELIOT BOOGE and JOSEPH P. KOLLER, Wilmington, Del., assignors to E. I. du Pont de Nemours & Company, Wilmington, Del., a Corporation of Delaware. Filed Nov. 10, 1924. Serial No. 749,024. 5 Claims. (Cl. 23—137.)

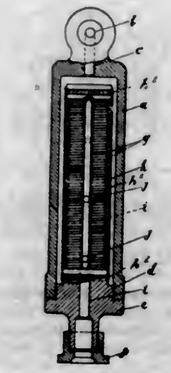


3. As a new article, powdered sulphate ore containing more than 4% of silica and held together in the form of substantially non-porous tablets or briquettes by a suitable binder, which depends upon its coking properties for its binding action.

1,685,773. HAIR-CURLING DEVICE. ANTOINE CIERPLIKOWSKI, Paris, France. Filed Dec. 6, 1927. Serial No. 238,055. 2 Claims. (Cl. 132—36.)

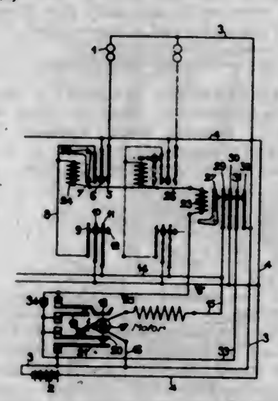
1. A heating device for treating the hair comprising a plurality of electrically heated elements and a curved blade spring connected to said elements and adapted to force them towards each other.

1,685,774. SHUTTER-OPERATING ATTACHMENT FOR CAMERAS. AMEDEE DE LAND, River Rouge, Mich. Filed Nov. 5, 1927. Serial No. 231,369. 8 Claims. (Cl. 95—53.)



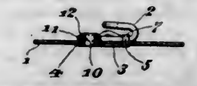
1. An attachment for cameras including a base frame to receive the camera box, a strap embracing the camera box and detachably attached to the base frame for holding the box within the frame and lever mechanism carried by said strap for operating the camera shutter.

1,685,775. APPARATUS FOR FILTERING SOLUTIONS USED IN THE MANUFACTURE OF ARTIFICAL SILK AND THE LIKE. WILLIAM PORTER DREAPER, Hempstead Heath, London, England. Filed June 2, 1923, Serial No. 643,124, and in Great Britain June 22, 1922. 1 Claim. (Cl. 210—164.)



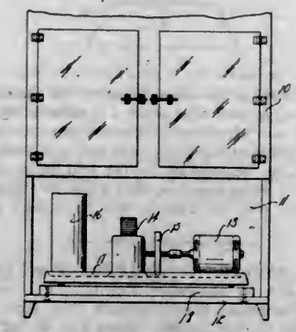
A filter for use in the manufacture of artificial silk having in combination a removable casing, a swivel connection integral therewith, a filtering member within said casing being secured thereto at one end, a central duct in said filtering member terminating at the base, a spinning jet in

direct communication with said central duct, a plurality of transverse vents in said filtering member, a circumferential groove formed at the respective ends of said



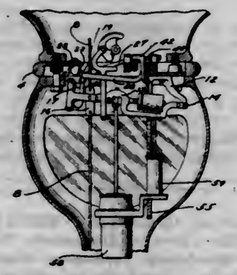
filtering member, and a textile fabric surrounding said filtering member, being secured at each end around the circumferential grooves.

1,685,776. ELECTRIC SIGNALING APPARATUS. FRANÇOIS FAVARGER, Neuchatel, Switzerland, assignor, by mesne assignments, to National Teleregister Corporation, New York N. Y., a Corporation of Delaware. Filed Oct. 31, 1924, Serial No. 747,140, and in Switzerland Nov. 12, 1823. Renewed Sept. 23, 1927. 5 Claims. (Cl. 177—380.)



1. A signal transmitting apparatus, comprising a source of electrical current, a motor in electrical connection with said source, a pair of relays connected in series with said source, a system of normally open contacts in the motor and relay circuits adapted to close said circuits and cause rotation of the motor, a normally open switch and a normally closed switch in the relay circuit, means carried by the motor for closing and thereafter opening said normally open switch and opening and closing said normally closed switch once during each revolution of the motor, a second circuit including said normally closed switch and connecting said relays in series with the source of current, a system of normally open contacts in said second circuit, and means operable by the relays for closing said contacts and causing current to continue to pass through the relays after the normally open switch has been opened and before the opening of the normally closed switch.

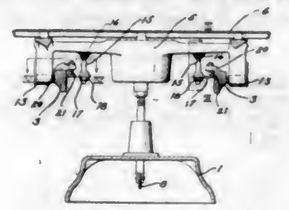
1,685,777. HOOK AND EYE. LEONARD GUTEKUNST, Philadelphia, Pa., assignor to The De Long Hook and Eye Company, Philadelphia, Pa., a Corporation of Pennsylvania. Filed June 15, 1926. Serial No. 116,191. 3 Claims. (Cl. 24—229.)



1. In a hook and eye tape structure, means for fastening garment hooks to tape including a metallic member having a surface extent, substantially equal to that of the shank portions of the hooks, which member is provided with projections which are adapted to engage the fastening eyes of a garment hook, and also having means adjacent its opposite end for engaging the shank portions of the said hooks.

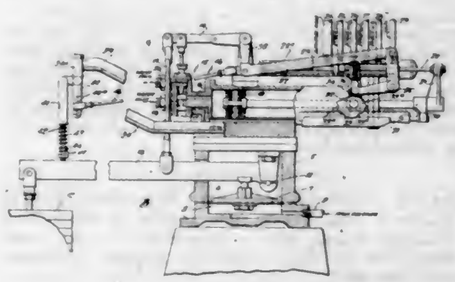
1,685,778. RESILIENT SUPPORT. FRED J. HEIDEMAN, Detroit, Mich., assignor to T. C. Whitehead, Detroit, Mich. Filed Jan. 18, 1926. Serial No. 82,116. 1 Claim. (Cl. 248—16.)

A support having a base, a supplemental base detachably secured to said base having a plurality of spaced recesses therein, a third base constituting a support for mechanical refrigerating apparatus positioned substantially above the supplemental base and having a depending flange, members threadedly engaging said third base and extending downwardly therefrom terminating short of said supplemental base and concealed by said depending flange, and yieldable elements surrounding the members and engaging said recesses for yieldably supporting the third base spaced from the supplemental base.



1,685,779. COIN-CONTROLLED WEIGHING SCALE. HALVOR O. HEM, Toledo, Ohio, assignor to Toledo Scale Company, Toledo, Ohio, a Corporation of New Jersey. Filed June 27, 1924. Serial No. 722,650. 11 Claims. (Cl. 194—56.)

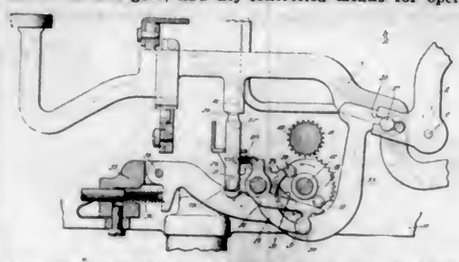
1. In a weighing scale, in combination, weighing mechanism, and locking mechanism therefor, said locking mechanism having a member for preventing weighing movement of said weighing mechanism, releasable means for said



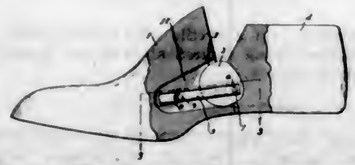
member comprising means adapted to be engaged by a coin or the like, and manually operable means engageable with said coin whereby said coin forms a necessary element of said releasing mechanism, said locking mechanism having an additional member for preventing movement of said weighing mechanism and releasing means for said additional member, said releasing means being operated by said manually operable means subsequently to engagement of said coin with said coin engaged means.

1,685,780. WEIGHING SCALE. HALVOR O. HEM, Toledo, Ohio, assignor to Toledo Scale Company, Toledo, Ohio, a Corporation of New Jersey. Filed Mar. 11, 1925. Serial No. 14,771. 5 Claims. (Cl. 308—2.)

1. In a device of the class described, in combination, a member having a knife edge pivot, a member having a bearing engaging said pivot, and means for preventing derangement of said pivot and bearing, said means including a cone pivot carried by the member having said knife edge pivot, and means for adjusting said cone pivot to bring its apex into alignment with the apex of said knife edge pivot.



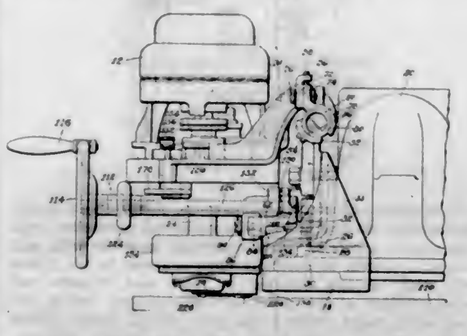
1,685,781. CONTROL APPARATUS FOR COMPRESSORS. LEON F. HOFFMAN, Franklin, Pa., assignor to Chicago Pneumatic Tool Company, New York, N. Y., a Corporation of New Jersey. Filed Feb. 8, 1927. Serial No. 166,624. 21 Claims. (Cl. 230—19.)



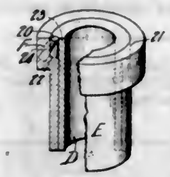
1. In a pump or compressor, the combination with a cylinder and a plurality of unloading devices arranged to unload the cylinder in whole or in part, of automatic regulating apparatus for controlling said unloading devices comprising a pilot valve controlled by receiver pressure, means for returning the pilot valve to neutral position after each movement, and means including a rotatable member for actuating said first-named means.

1,685,782. POWER-OPERATING MECHANISM FOR TYPEWRITERS. OTTO A. HOKANSON, Woodstock, Ill., assignor to Woodstock Typewriter Company, Woodstock, Ill., a Corporation of Illinois. Filed Apr. 28, 1924. Serial No. 709,320. 10 Claims. (Cl. 197—17.)

1. In a typewriting machine, a type-bar actuating member, a toothed gear arranged to engage said member to impart movement thereto, a continuously rotating power-driven toothed gear, and key-controlled means for operatively connecting said gears to operate said type-bar actuating member, said gears having relatively fixed axes of rotation.

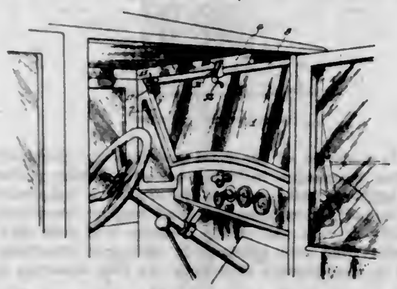


1,685,783. LAST. WALTER A. KRENTLER, Detroit, Mich., assignor to Krentler Arnold Hinge Last Company, Detroit, Mich., a Corporation of Michigan. Filed Sept. 24, 1927. Serial No. 221,830. 4 Claims. (Cl. 12—136.)



1. A connecting device for hinged lasts comprising a single non-flexible member having an opening adjacent one end to receive a pivot pin and a longitudinal slot intermediate its ends to receive a second pivot pin, and yielding means for yieldingly holding said member moved longitudinally with one of said pivot pins in engagement with the inner end of the slot in the member.

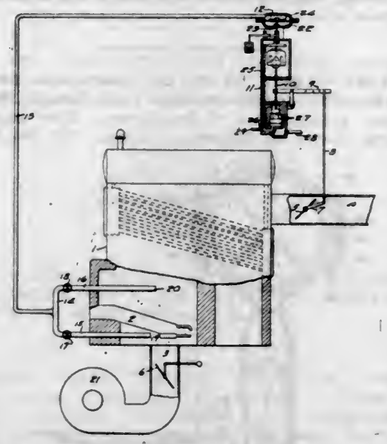
1,685,784. RESURFACING MACHINE. WILLIAM C. MEYER, deceased, Beverly, Mass., by Anne W. Meyer, administratrix, Beverly, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J., a Corporation of New Jersey. Filed Sept. 26, 1924. Serial No. 740,098. 13 Claims. (Cl. 164—34.)



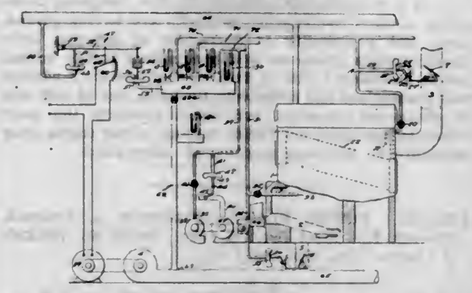
1. In an apparatus for resurfacing blocks, a bracket adapted for attachment to a support above a block, said bracket being provided with spaced supporting surfaces extending longitudinally of the bracket, a resurfacing machine having a frame provided with surfaces for engaging the spaced supporting surfaces on the bracket for sliding movement longitudinally of the latter, and means for securing the resurfacing machine in selected position during a resurfacing operation on any desired portion of the block.

1,685,785. LOCK MEANS. JOHN H. MUTH, Cleveland, Ohio, assignor to C. F. Heinkel, Cleveland, Ohio. Filed Oct. 30, 1924. Serial No. 746,750. 4 Claims. (Cl. 77—62.)

1. In a lock means, associable members to be locked to each other, a pin having one end thereof fixed in one of said members, the remainder of said pin partly embedded in said one member throughout the major portion of the length thereof, said pin disposed at an angle so that the end of said partly embedded portion projects further from the wall of said one member than the other portion thereof, and another one of said members to be locked to said one member having a groove arranged to engage both sides of said projecting portion of the pin so that either a longitudinal movement between the members in one direction creates a rotative movement between the members in one direction or a rotative movement between the members in one direction creates a longitudinal movement between the members in one direction to lock the members to each other both longitudinally and rotatively and so that a reversal of said movements automatically disengages the members from each other.



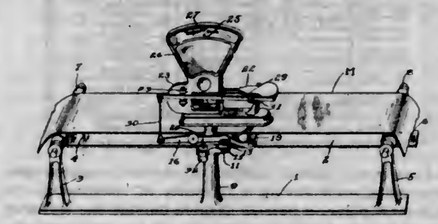
1,685,786. WORM-DRIVE WINDSHIELD REGULATOR. ALBERT T. POTTER, Detroit, Mich., assignor to Ainsworth Manufacturing Co., Detroit, Mich., a Corporation of Michigan. Filed Feb. 4, 1927. Serial No. 165,798. 2 Claims. (Cl. 296—84.)



1. The combination with the frame of a vehicle body formed to receive and support a windshield, of a windshield panel pivotally supported at its ends between upwardly extending members of said body frame, and means for swinging said panel including a casing rigidly secured to the frame above and intermediate the ends of said panel, a member secured to the panel intermediate its ends and within said casing, said casing being formed with an opening to receive said member, a closure for said opening detachably secured to said casing, a shaft in said casing to operate said member, said shaft being inclined inwardly and downwardly from the support of said casing, and an operating handle on the inner end of said shaft for manually rotating the shaft, said handle being in substantially the horizontal plane of the upper portion of the panel.

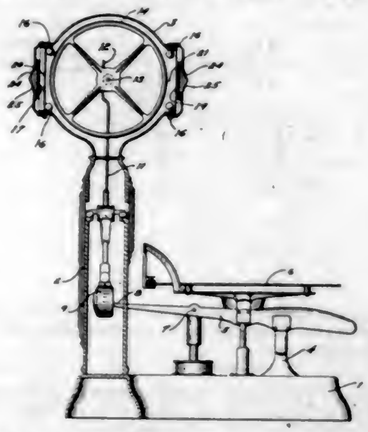
1,685,787. REGULATION BY PROPORTIONATE PRESSURE AND APPARATUS THEREFOR. CHARLES H. SMOOT, Maplewood, N. J. Filed Dec. 16, 1926. Serial No. 155,231. 5 Claims. (Cl. 236—15.)

5. In systems for regulation by fluid pressure, means for maintaining constant a pressure intermediate two variable fluid pressures between which there is a flow of fluid, comprising in combination a flow regulator, means for creating a pressure corresponding to said intermediate pressure, a device responsive to a constant pressure and to said created pressure, and means for controlling said regulator by said device.



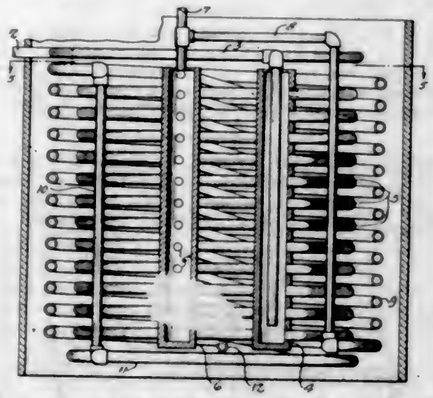
1,685,788. FURNACE REGULATION. CHARLES H. SMOOT, Maplewood, N. J. Filed Dec. 16, 1926. Serial No. 155,232. 8 Claims. (Cl. 236—15.)

7. A steam generating furnace including a blower and an inlet damper, a regulator for the damper and means for controlling said regulator in accordance with a desired intermediate between the pressure at a point in advance of the damper and at a point in the combustion chamber.



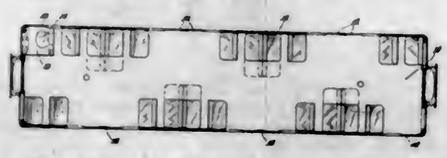
1,685,789. TESTING DEVICE. EDWARD G. THOMAS, Toledo, Ohio, assignor to Toledo Scale Company, Toledo, Ohio, a Corporation of New Jersey. Filed Apr. 28, 1921. Serial No. 465,134. 11 Claims. (Cl. 249—5.)

1. In a device of the class described, in combination, a pair of supports for a strip of material, and a predetermined weight weighing device adapted to be adjusted to



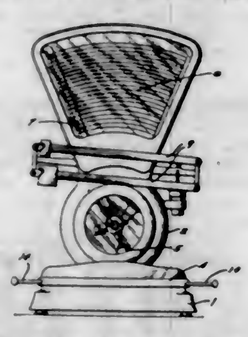
support a portion of such strip in the same plane as the portions engaging said pair of supports, whereby changes in the weight of said strip may be detected by said predetermined weighing device regardless of the condition of tautness of said strip.

1,685,790. WEIGHING SCALE. EDWARD G. THOMAS, Toledo, Ohio, assignor to Toledo Scale Company, Toledo, Ohio, a Corporation of New Jersey. Filed Sept. 13, 1924. Serial No. 737,598. 8 Claims. (Cl. 88—1.)



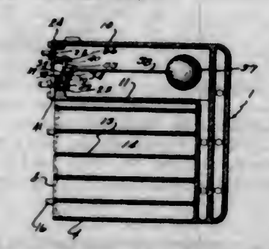
3. In a weighing scale, in combination, weighing mechanism, a chart co-operating therewith and having graduations and a plurality of characters of different color characteristics giving to said graduations unlike values, means including a pair of fixed color filters for rendering said graduations and selectively rendering one of said sets of characters readable, and means whereby the same points on the chart are visible through either screen from substantially the same position of observation.

1,685,791. POWER PLANT. FREDERICK A. TRINKLE, Harvey, Ill. Filed Dec. 20, 1924. Serial No. 757,226. 2 Claims. (Cl. 122—250.)



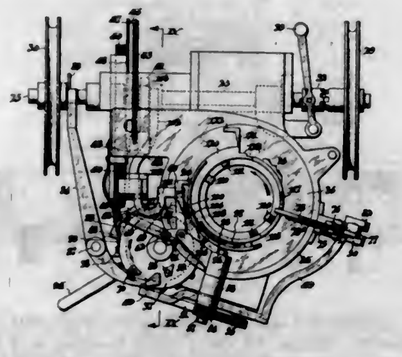
1. In a power plant, a series of vertically spaced generating coils, each having a plurality of convolutions in a horizontal plane, a pair of headers outside the series of coils and to which the opposite ends of the coils are connected at vertically spaced points along the headers, a preheating coil above the series of generating coils having a discharge pipe depending into one of the headers, a storage coil surrounding the series of generating coils in spaced relation and in connection at one end with the upper end of the other header, and a superheating coil below the series of generating coils and in connection with the other end of the storage coil.

1,685,792. RAILWAY CAR. JOHN T. WARREN, Brooklyn, N. Y. Filed Apr. 28, 1927. Serial No. 187,132. 12 Claims. (Cl. 105—345.)



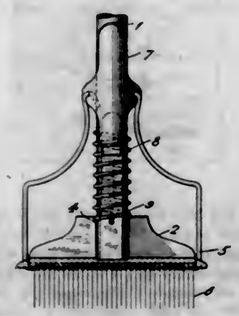
1. In a railway car, doors mounted in the sides thereof, each door in one side being offset with respect to each door of the other side, and a plurality of seats arranged on each side of the car opposite each door on the other side.

1,685,793. WEIGHING SCALE. LEWIS C. WETZEL, Toledo, Ohio, assignor to Toledo Scale Company, Toledo, Ohio, a Corporation of New Jersey. Filed Sept. 28, 1925. Serial No. 58,962. 5 Claims. (Cl. 265—36.)



1. In a device of the class described, in combination, weighing mechanism including a load receiving platform, said platform being adapted to receive a supplemental load support, a supplemental load support comprising a plurality of rods and means whereby said rods may be extended from said platform in divergent directions to assist in supporting a load upon the load receiving platform.

1,685,794. BRINE TANK. THOMAS C. WHITEHEAD, Detroit, Mich. Filed Jan. 12, 1925. Serial No. 2,049. 10 Claims. (Cl. 62—95.)



2. A brine tank having a chamber for ice molds, a chamber containing a refrigerating medium extending around and over the first chamber, and a chamber adapted to contain brine extending around the second chamber and embracing the same.

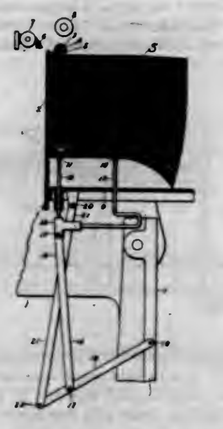
1,685,795. MECHANISM FOR UNITING KNITTED WEBS. LOUIS N. D. WILLIAMS, Ogontz, Pa., assignor to Scott & Williams, Incorporated, New York, N. Y., a Corporation of Massachusetts. Filed Dec. 12, 1923. Serial No. 680,064. 35 Claims. (Cl. 112—27.)

1. In mechanism for uniting knitted webs, the combination of a web carrier comprising two members each with fabric loop-engaging points and one capable of being turned over upon the other, an element for engaging said turnable member, means for swinging said element about an axis to impart turning movement to said member, and means for moving said engaging element into and out of engagement with the turnable member.

1,685,796. MOPSTICK HEAD. JOSEPH WILMER WOHLHIETER, Irvington, N. J., assignor to Keystone Stamping Corporation, a Corporation of New Jersey. Filed Apr. 14, 1926. Serial No. 101,902. 5 Claims. (Cl. 15—152.)

1. A mop head comprising a body portion made up of parallel plates having opposed edges bent outwardly to form flanges, and a member cooperating with said flanges having a groove or channel extending throughout the length thereof and formed with side flanges which embrace the flanges on the body portion.

1,685,797. JELUTONG PRODUCT AND METHOD OF MAKING THE SAME. SHELDON S. YATES, Englewood, N. J., assignor to Chicle Development Company, New York, N. Y., a Corporation of Delaware. Filed Sept. 24, 1927. Serial No. 221,859. 5 Claims. (Cl. 18—50.)

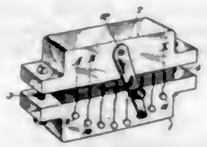


1. The method of producing a Jelutong product which consists in coagulating Jelutong latex, subjecting the coagulant to melting heat until the same is melted and the water is expelled so as to be substantially less than five per cent, pouring the melted mass into molds and permitting the same to cool.

1,685,798. CARTON FOR PLAYING CARDS. FRANK C. ARMSTRONG, Larchmont, N. Y. Filed Apr. 6, 1927. Serial No. 181,304. 9 Claims. (Cl. 229—27.)

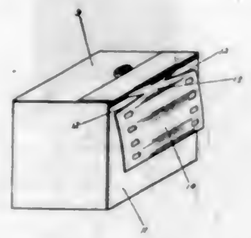
1. A carton comprising four rectangular and parallel compartments, each of said compartments opening on a different side of said carton.

1,685,799. SHEET-FEEDING APPARATUS. JOSEPH W. BAKER, Philadelphia, Pa., assignor to Stokes and Smith Company, Philadelphia, Pa., a Corporation of Pennsylvania. Filed Jan. 28, 1925. Serial No. 5,208. 17 Claims. (Cl. 271—61.)



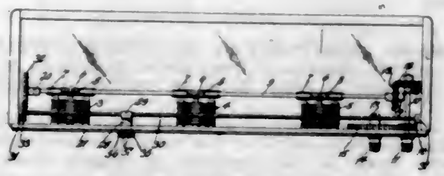
1. In the art of feeding sheets of ununiform thickness from the top of a stack thereof wherein the uniform arrangement of the sheets gives to the stack different heights in different vertically disposed regions, the step of supporting the stack when of considerable thickness at its bottom substantially solely in a region of minor stack height to effect at its top a predetermined feeding formation.

1,685,800. TREATMENT OF SULPHITE-WOOD-PULP LIQUOR. WEBSTER E. BYRON BAKER, York Haven, Pa. Filed Feb. 25, 1922. Serial. No. 539,285. 7 Claims. (Cl. 23—131.)



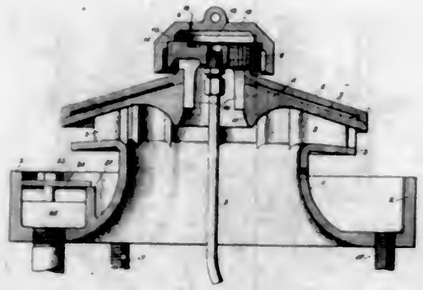
1. In the treatment of wood pulp liquor the process which consists in recovering from the sulphite waste liquor solids useful in the preparation of sulphite cooking liquor and containing principally sulphites insoluble in water by neutralizing the waste liquor with alkaline earth metal base sufficient to produce the degree of alkalinity expressed as pH—9 or greater alkalinity and sufficient to decompose the reversibly combined sulphurous acid present in combination with the substances dissolved from the wood to increase the recovery of the sulphur as monosulphite, and in the preparation of cooking liquor, treating the solids with cooking acid which contains free sulphurous acid for the conversion of the solids into soluble bisulphites.

1,685,801. CURRENT-CONTROLLING DEVICE. WILLIAM R. BALLARD, New Rochelle, N. Y., assignor to American Telephone and Telegraph Company, a Corporation of New York. Filed Dec. 2, 1924, Serial No. 753,522, and in Japan Oct. 6, 1924. 4 Claims. (Cl. 201—48.)



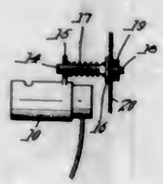
1. In a resistance device, the combination with a plurality of sheets of resistance material of a plurality of separate, spaced conductors lying transversely between adjacent sheets, the conductors between any two sheets being substantially directly above and below the conductors between the adjacent sheets, means to clamp together all of the said sheets, and a plurality of terminals each of which serves to terminate all of the conductors similarly located between the adjacent sheets.

1,685,802. FILM PACKAGE. CARL BORNMANN, Binghamton, N. Y., assignor, by mesne assignments, to Agfa Ansco Corporation, Binghamton, N. Y., a Corporation of New York. Filed Apr. 8, 1927. Serial No. 182,122. 2 Claims. (Cl. 206—52.)



1. A film package comprising a receptacle having a roll of film therein, a slot in said receptacle through which an end of said film extends, and recesses in said film end at the point of projection from said receptacle.

1,685,803. LOGGING AND INDICATING DEVICE FOR RADIO RECEIVING SETS. ROBERT C. BOWER, St. Louis, Mo. Filed June 4, 1926. Serial No. 113,628. 5 Claims. (Cl. 175—41.5.)

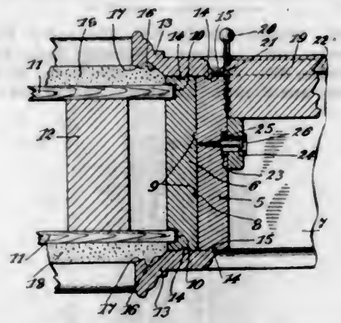


1. In a device of the class described, the combination of a case with a plurality of rotary variable condensers, a common shaft for operating the shafts of the variable condensers, actuators for operating said common shaft at different speeds, a longitudinally movable indicator, a stationary chart carried by one wall of the case cooperating with said indicator, and gear connections between said common shaft and said indicator whereby the adjustment of the variable condensers is indicated.

1,685,804. LIQUID-FUEL BURNER. CHARLES B. BUERGER, Pittsburgh, Pa., assignor to Gulf Oil Burner Company, Pittsburgh, Pa., a Corporation of Pennsylvania. Filed Aug. 17, 1926. Serial No. 129,826. 4 Claims. (Cl. 158—91.)

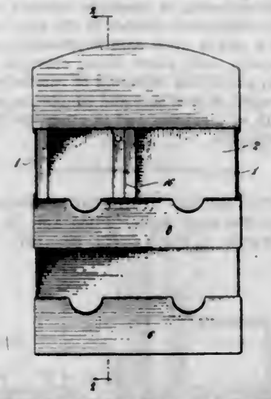
2. A liquid fuel burner comprising a base provided with an interior passage for air, a cover overlying said base and spaced therefrom so that air from said passage is directed laterally between the top of the base and the cover, a burner plate supported on said cover in spaced relation therewith, the said cover and the said burner plate provided with passages registering with the air passage of said base, a distributer for a liquid fuel supported above said burner plate in spaced relation whereby a part of the air from the passage of the base and from the passages of the cover and burner plate may flow over the burner plate under said distributer and means for supplying liquid fuel to said distributer.

1,685,805. LAMP-FOCUS-SECURING DEVICE. ISIDORE L. DUQUETTE, WILFRED J. PLASSE, and CHARLES A. MERRILL, Webster, Mass. Filed Dec. 12, 1927. Serial No. 239,332. 2 Claims. (Cl. 240—44.)



1. In a headlight, the combination with a lamp casing, a reflector, a lamp socket and a guide therefor, of a screw connected with the socket for moving the socket for adjustment relative to said reflector, a collar integrally mounted on the screw, a spring on the screw exerting opposite forces on the socket and collar to force the collar against the lamp casing, said screw having a left handed screw portion of reduced diameter on its end beyond the collar, projecting through the back of the casing, a nut on the left handed screw portion to prevent the adjusting screw from unscrewing, and means on said screw whereby same may be turned.

1,685,806. DOORFRAME. ALBERT ENTENMAN, Brooklyn, N. Y. Filed June 3, 1927. Serial No. 196,171. 8 Claims. (Cl. 20—11.)

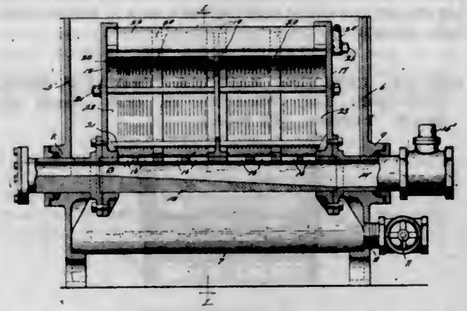


1. A unitary door frame having opposite sides each consisting of two parts having tongue and groove connection with each other, trim strips having tongue and groove connections with the opposite edges of each of said

parts, the outer side parts of the frame being provided in their outer faces with longitudinally extending grooves adapted to receive the ends of building wall laths, and

said trim strips being provided with longitudinally extending grooves to receive the wall plaster and form an interlocking connection therewith.

1,685,807. SHEET-METAL DISPLAY STAND. HENRY A. FERN, New York, N. Y., assignor to The Sweets Company of America, Inc., New York, N. Y., a Corporation of New York. Filed Oct. 4, 1927. Serial No. 223,882. 2 Claims. (Cl. 211—126.)

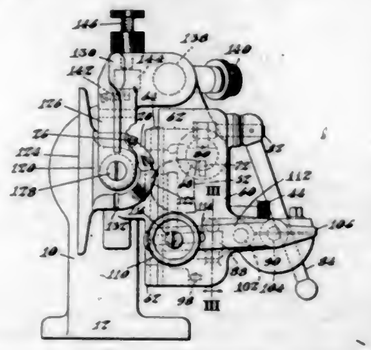


1. A display stand for packages and the like comprising substantially vertical side walls, means rigidly connecting said side walls comprising a plurality of inclined trays having side flanges fixed to the walls, a base plate for each tray extending at right angles to the latter and having end flanges turned over upon the side walls and secured thereto by tongue and slot connections, a cap plate having substantially the same inclination as the trays, as and for the purpose described and a hinged cover member extending rearwardly of the cap plate and at right angles thereto.

1,685,808. COTTON-PICKER'S CUFF. WILLIAM C. FRENCH, Burkburnett, Tex. Filed June 28, 1926. Serial No. 118,023. 1 Claim. (Cl. 224—28.)

A cotton picker's cuff to be attached to the hand and form a pocket at the base of the palm, the same comprising an elongated flat body of flexible material having opposite ends outwardly curved, its rear edge concave and its forward edge formed on a compound curve, and having openings adjacent its forward corners, lacings engaging the openings and adapted to receive the thumb and the little finger of the hand, respectively, and having a forward extension at one corner to lie against the side of the hand adjacent the little finger, a strap attached to the body adjacent the rear corner diagonally opposite the said forward extension and separable fastenings having elements along the length of the strap and on the back of the body, the latter elements extending in a diagonal line from the rear corners opposite the strap.

1,685,809. PAPER AND PULP SCREENING MACHINE. EDWARD B. FRITZ, Chicago, Ill. Filed Jan. 20, 1928. Serial No. 248,050. 11 Claims. (Cl. 92—29.)

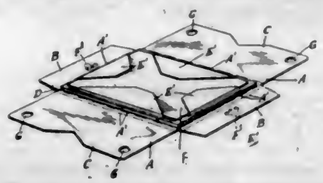


2. In a screening device a primary tank having its top open, and an outlet at the bottom thereof; operatively assembled in said tank a chamber fixedly mounted upon a shaft journalled in the walls of said tank; said chamber having circular wall forms containing vertically spaced-apart slots in rows adjacent one another; said mounted chamber having means associated therewith for a measured reciprocatory movement.

1,685,810. METHOD OF AND APPARATUS FOR RENDERING VISIBLE OSCILLATIONS OF PIEZO-ELECTRICAL CRYSTALS. ERICH GIEBE and ADOLF SCHEIBE, Berlin, Germany. Filed June 8, 1926, Serial No. 114,567, and in Germany May 15, 1925. 5 Claims. (Cl. 250—39.)

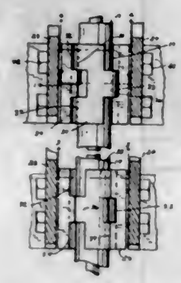
1. The method of rendering visible elastical oscillations of a piezo-electric crystal, which consists in producing a luminous effect by the piezo-electric voltages, which are caused by the deformations of said crystal, when subjected to said elastical oscillations.

1,685,811. TOP-LIFT-TRIMMING MACHINE. JOSEPH GOULDBOURN and REGINALD BOYD WOODCOCK, Leicester, England, assignors to United Shoe Machinery Corporation, Paterson, N. J., a Corporation of New Jersey. Filed Aug. 25, 1927, Serial No. 215,478, and in Great Britain Sept. 30, 1926. 20 Claims. (Cl. 12—88.)



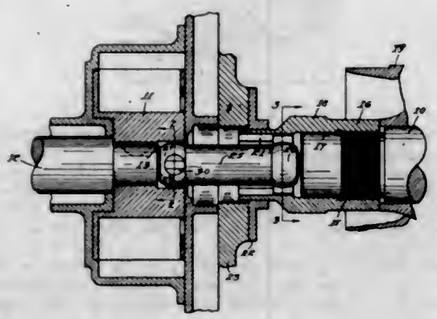
1. A top-lift-trimming machine comprising two relatively adjustable units one of which includes a rotary cutter arranged to trim the contour of a top lift attached to a heel, and the other of which includes a tread-rest for the top lift and a cutter arranged to bevel the edge of the tread face of the top lift, said units being relatively adjustable to locate the edge of the attaching face of the top lift and one end of said contour cutter in substantially flush relation.

1,685,812. CLEANING MACHINE. CHARLES F. GREGG, Indianapolis, Ind. Filed Oct. 28, 1925. Serial No. 65,314. 6 Claims. (Cl. 8—8.)



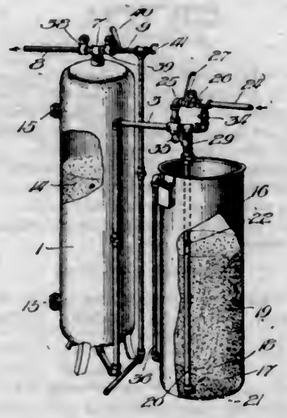
1. In a dry cleaning machine the combination with a cleaning fluid tank, of a container for the goods to be cleaned having a foraminous bottom, a foraminous adjustable clamping member adjustable in said container relatively to the bottom and constructed to clamp the goods in said container between the clamping member and the bottom irrespective of the quantity of goods placed in the container and means for reciprocating said container with the clamped goods into and out of the liquid contained in said tank.

1,685,813. MAILING WRAPPER FOR PHOTOGRAPHS. HERMAN L. GREVE, Brooklyn, N. Y. Filed July 16, 1927. Serial No. 206,225. 4 Claims. (Cl. 229—87.)



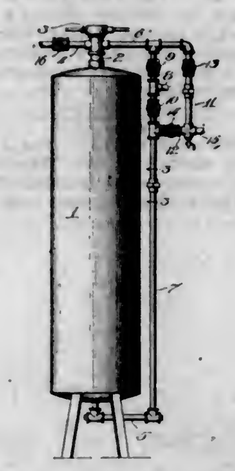
1. A mailing wrapper comprising a casing, a stiff plate portion, a thin flexible sheet having flaps of less length than said plate and secured thereto at the centre only, to permit the ends and sides of said sheet to be folded over toward each other to embrace all of the edges of a card of less length and width than that of said plate.

1,685,814. OUTBOARD MOTOR. HERBERT J. HILLBORN, Milwaukee, Wis., assignor to Evinrude Motor Company, Milwaukee, Wis. Filed Mar. 26, 1923, Serial No. 627,664. Renewed Apr. 2, 1928. 7 Claims. (Cl. 115—18.)



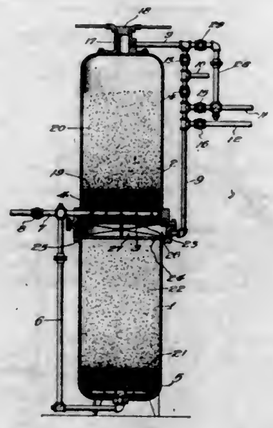
1. An outboard motor including the combination with the submerged portions thereof and a supporting member for said portions rotatable for steering and reversing said motor and oscillatable with said submerged portions about a transverse axis above the water line; of an interlocking device comprising a relatively fixed block having a bore extending therethrough, a passage opening rearwardly from said bore and lateral notches in the side walls of said passage; and a sleeve upon said supporting member and movable therewith, said sleeve being provided with staggered, laterally projecting segments of combined diameters substantially equal to said bore and adapted in one position to register with said notches and in other positions to fail to register therewith.

1,685,815. UNIVERSAL COUPLING. IRVING C. JENNINGS, South Norwalk, Conn. Filed Apr. 13, 1926. Serial No. 101,829. 1 Claim. (Cl. 64—107.)



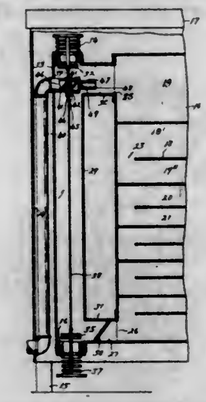
A universal coupling for adjacent rotatable members comprising a sleeve secured upon and extending beyond the end of one of said members to form the circumferential wall of an axial recess and having opposed longitudinally disposed slots in said circumferential wall, said sleeve having its free end extending through a sealing member, of a casing in which said second rotatable member is mounted, and said second member also having an axial slotted recess, and a coupling member having cross pins seated in said slots and connecting said rotatable members, said sleeve having a nut shaped outer portion and a threaded inner portion engageable with said first member, whereby said sleeve may be rotated and moved axially of the coupling member.

1,685,816. WATER-SOFTENING APPARATUS. WILLIAM J. KENNEY, Chicago, Ill., assignor to Zeolite Engineering Co., a Corporation of Illinois. Filed July 2, 1924. Serial No. 723,707. 5 Claims. (Cl. 10—24.)



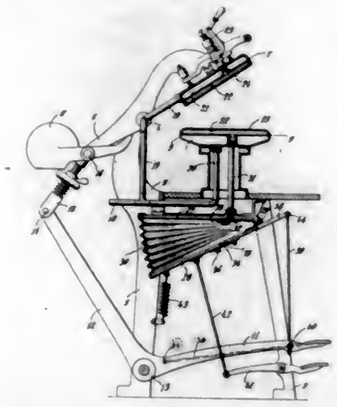
1. In combination, a treating reservoir, a brine tank, a siphon pipe having its inlet end arranged in and terminating a considerable distance above the bottom of the tank so as to be open to atmosphere when the liquid level in the tank falls to a predetermined point, a water pipe connected to the outlet end of the siphon pipe and to the reservoir, and means associated with said water pipe to produce a suction in said siphon pipe.

1,685,817. WATER SOFTENER. WILLIAM J. KENNEY, Chicago, Ill., assignor to Zeolite Engineering Co., a Corporation of Illinois. Filed Mar. 11, 1926. Serial No. 93,899. 1 Claim. (Cl. 210—24.)



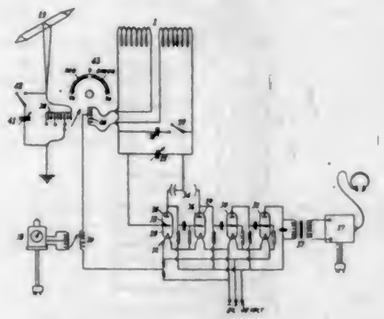
In an apparatus of the character described, a reservoir having an outlet and an inlet, a conduit connecting the outlet and the inlet, a service pipe connected to the outlet, a supply pipe connected to said conduit, manual valves in said conduit on opposite sides of the connection with the supply pipe, said conduit having a section at a point between the outlet and the nearest valve in the form of a passage of very small cross-sectional area, and there being in the conduit between said inlet and the nearest valve a section having the shape of a Venturi tube.

1,685,818. COMBINED FILTER AND UPFLOW WATER SOFTENER. WILLIAM J. KENNEY, Chicago, Ill. Filed May 21, 1927. Serial No. 193,100. 4 Claims. (Cl. 210—24.)



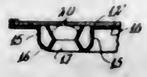
1. In an apparatus of the character described, a tank divided into an upper chamber and an independent lower chamber, a bed of zeolitic material in one of said chambers and a filtering bed in the other chamber, and means for causing water to flow through the chamber containing the filtering bed and then through the chamber containing the zeolitic material, and means for permitting salt to be introduced into the chamber containing the filtering bed whereby brine is formed and filtered before entering the other chamber.

1,685,819. SAFETY DEVICE FOR GAS-RADIATOR SYSTEMS. ELMER E. LEDBETTER, Detroit, Mich., assignor to The Ever Hot Heater Company, Detroit, Mich., a Corporation of Michigan. Filed Apr. 11, 1927. Serial No. 182,846. 9 Claims. (Cl. 126—91.)



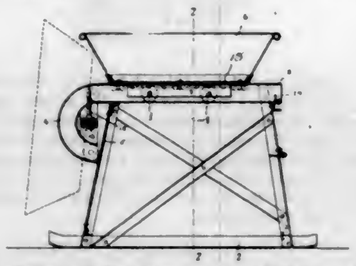
1. In an internal combustion radiator heating system, the combination with a combustion chamber having a fuel inlet and an air inlet, of means for forcibly withdrawing the products of combustion through the combustion chamber, and means operable upon a predetermined lessening of the circulation through said combustion chamber for automatically closing said air inlet.

1,685,820. GARMENT PRESS. JAMES C. LEBBETTER, Brooklyn, N. Y., assignor, by mesne assignments, to The Prosperity Company, Inc., Syracuse, N. Y., a Corporation of New York. Filed Oct. 26, 1923. Serial No. 671,123. 5 Claims. (Cl. 68—9.)



1. A garment press comprising in combination, co-operating press jaws at least one of which has an air chamber provided with a perforated pressing surface, an air pump connected with the chamber, operating means to open and close the press, an operating device connected with the pump to work the pump independently of the press operating means to force air through the chamber when the press jaws are stationary, and means for connecting the pump with the press operating means by which said pump may be driven simultaneously with the opening and closing of the press.

1,685,821. DIRECTION FINDER. AUGUST LEIB, Berlin, Germany, assignor to Gesellschaft für Drahtlose Telegraphie m. b. H., Berlin, Germany, a Corporation of Germany. Filed Apr. 29, 1924, Serial No. 709,819, and in Germany Apr. 19, 1923. 14 Claims. (Cl. 250—11.)

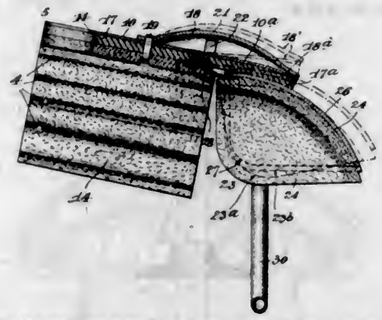


13. The method of radio direction finding with a loop aerial of appreciable width in which out of phase currents are caused by a distorted wave front which consists in, tuning the loop aerial to the desired wave length, supplying energy from an auxiliary non-directional aerial while in an untuned condition and transferring a component of said energy to said loop circuit so that the current in said loop circuit will be zero when its magnetic axis points at the station to be received.

1,685,822. ILLUMINATED SIGN. EUGENE LOWINGER, New York, N. Y. Filed Aug. 23, 1927. Serial No. 214,856. 2 Claims. (Cl. 40—133.)

1. A sign unit, comprising a frame plate, means for retaining a transparent pane on the rear side thereof, a character cut out of the frame, a flange projecting from the front of the frame plate and extended along the edge of the cut-out character, converging marginal elements extending from opposite sides of the front of the said flange to a plane intermediate the front of the flange and the rear of the frame plate, and diverging wall elements extending from the ends of the converging marginal elements to the rear of the frame plate.

1,685,823. SCREEN. ALFRED MAYER, Duluth, Minn. Filed Mar. 5, 1927. Serial No. 172,938. 3 Claims. (Cl. 209—260.)

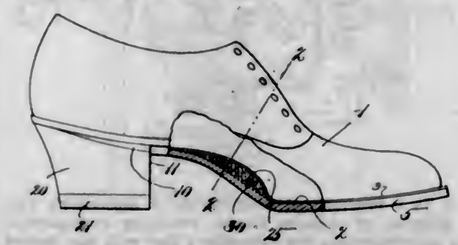


1. A device of the character described comprising in combination an upright fabricated structure, a horizontally disposed track traversing the upper portion of the structure, said track comprising spaced channel irons facing each other one end of same terminating downwardly and arcuately towards the structure forming a dumping portion of the track, a screening hopper reciprocally mounted within the track and selectively operable within either the horizontal portion thereof for screening purposes or the dumping portion thereof.

1,685,824. ARTIFICIAL LARYNX. ELMER I. MCKESSON, Toledo, Ohio, assignor to The Vocophone Company, Toledo, Ohio, a Corporation of Ohio. Filed June 24, 1926. Serial No. 118,180. 7 Claims. (Cl. 181—1.)

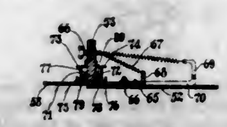
1. An air current audible noise producer comprising a diaphragm mounting means providing concave seats, and a diaphragm distended over said seats.

1,685,825. SHOULDER PAD. ROBERT THOMAS MULLINS, Brooklyn, N. Y., assignor to A. G. Spalding & Bros., New York, N. Y., a Corporation of New Jersey. Filed Nov. 1, 1926. Serial No. 145,453. 4 Claims. (Cl. 2—2.)



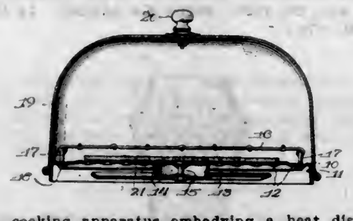
1. In a shoulder guard, the combination of a main over-shoulder portion, and an off-shoulder extension including a resilient cushion extended from the first mentioned portion, a substantially stiff but resilient epaulette overlying such extension, and a shoulder cap underlying said extension and hingedly connected to the first-mentioned portion.

1,685,826. GOLF CLUB. JOHN J. RADEL, Newark, N. J. Filed Feb. 21, 1927. Serial No. 169,739. 1 Claim. (Cl. 273—77.)



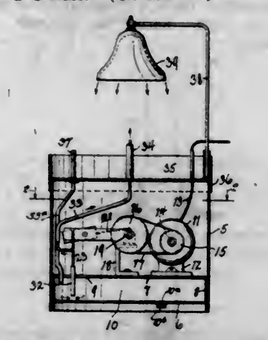
A golf-club comprising an open inverted V-shaped member providing oppositely presented flat inclined striking faces symmetrical to the vertical axis of said member and of equal angular pitch, and a socketed handle shank receiving portion integrally connected with and extending upwardly from one end of said member.

1,685,827. METHOD OF MAKING BOOTS AND SHOES. WILLIAM SAKLAD, Boston, Mass. Filed Oct. 12, 1925. Serial No. 61,952. 2 Claims. (Cl. 12—142.)



1. The improved method of making boots and shoes, which consists in providing a last with a disalined portion at the heel breast to provide for raising the outsole at said disalined position in the completed shoe, assembling upper and insole materials on a last, lasting the shoe, applying the outsole, beating the outsole in said disalined portion at the inner shank part adjacent the heel breast from a normal horizontal position, applying a corrective wedge member from the heel breast portion rearwardly and centrally of the heel seat to offset said disalined outsole, said wedge member being of greatest thickness at the heel breast and where exposed at the forward part of the heel, tapering rearwardly and centrally of the heel seat, and thereupon applying the heel and finishing the shoe in the said usual manner.

1,685,828. ORE-GRADING MACHINE. VICENTE SANCHEZ, Ponemah, Ill. Filed Nov. 11, 1927. Serial No. 232,555. 3 Claims. (Cl. 209—391.)



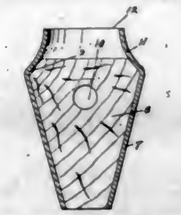
1. In a device of the class described, a screen, a shutter adapted for manual operation, and extended member hinged to the inner edge of the shutter, and a means for elevating said member when the shutter is projected over the screen.

1,685,829. COOKING APPARATUS. STANLEY SAUVAGE, Chicago, Ill. Filed Oct. 29, 1927. Serial No. 229,570. 4 Claims. (Cl. 53—6.)

1. A cooking apparatus embodying a heat distributor plate having a depending peripheral flange and provided with apertures throughout the area of the body of the plate, a hood adapted to be removably supported over the plate, and an independent sheet of heat non-conducting material adapted to be removably placed directly upon said plate to cover a portion of the apertures in the plate to form a closure therefor and for directing the heat towards the periphery of the plate.

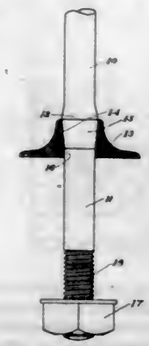
1,685,830. WATER FOUNTAIN. THEODORE SCHIDORSKI, New York, N. Y. Filed Dec. 13, 1926. Serial No. 154,609. 2 Claims. (Cl. 299—7.)

1. A portable fountain of the class described comprising a casing having a removable false bottom forming a liquid compartment with the bottom of said casing, a drainage outlet for said compartment, a motor and a pump driven from the motor mounted on said false bottom, said motor, pump and false bottom being removable as a unit, a removable liquid tank interfitting with the top of the casing and supported thereby, conduits connecting the intake of the pump with said liquid compartment and



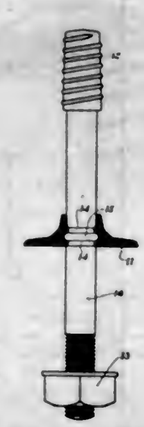
the outlet of the pump through the top of said water tank whereby the liquid may be forced in a jet above said tank, and a return conduit from the said liquid tank to the bottom compartment.

1,685,831. WINDOW FIXTURE. GILBERT E. ALPHIN, Mount Olive, N. C. Filed Mar. 17, 1927. Serial No. 176,158. 5 Claims. (Cl. 156—22.)



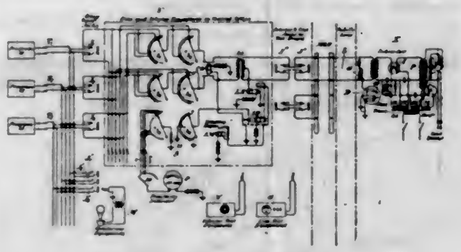
5. A shade roller supporting means comprising two brackets one of which is formed with an opening to receive the cylindrical journal at one end of the roller, the other bracket having a vertical slot closed at both ends for reception of the flat stub at the other end of the roller, and mounting means for said other bracket permitting turning thereof from a normal position in a vertical plane, to an inclined position when said flat stub is being inserted into or removed from said slot.

1,685,832. METHOD OF MAKING REENFORCED TUBULAR SPOKES. HERALD P. ARNT, Jackson, Mich. Filed Apr. 26, 1926. Serial No. 104,642. 14 Claims. (Cl. 29—174.)



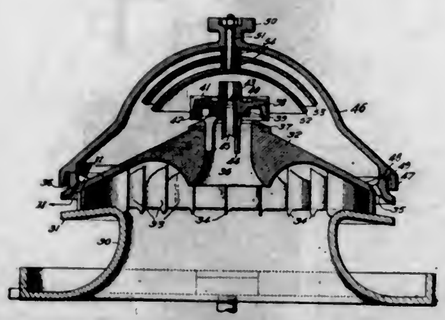
1. The method of making a reenforced tubular metal spoke which consists in forming a hollow quadrilateral nave end with portions of a pair of opposite sides converging, inserting a wedge-shaped filler, modifying the larger end of said nave end, and then welding thereto a tubular extension.

1,685,833. PROCESS OF MANUFACTURING INSULATOR PINS. ARTHUR O. AUSTIN, Barberton, Ohio, assignor, by mesne assignments, to The Ohio Brass Company, Mansfield, Ohio, a Corporation of New Jersey. Filed July 29, 1922. Serial No. 578,469. 4 Claims. (Cl. 29—155.5.)



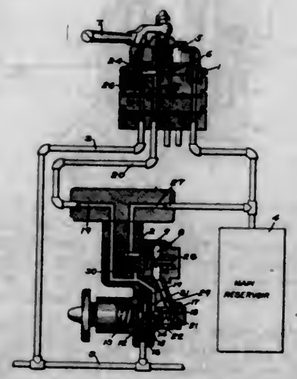
1. The process of manufacturing insulator pins comprising the steps of upsetting a metal bar between its ends to produce an enlargement thereon, separately forming a supporting member and applying said member to said enlargement to form a support for said pin.

1,685,834. PROCESS OF MANUFACTURING INSULATOR PINS. ARTHUR O. AUSTIN, Barberton, Ohio, assignor, by mesne assignments, to The Ohio Brass Company, Mansfield, Ohio, a Corporation of New Jersey. Filed Aug. 2, 1922. Serial No. 579,134. 6 Claims. (Cl. 29—155.5.)



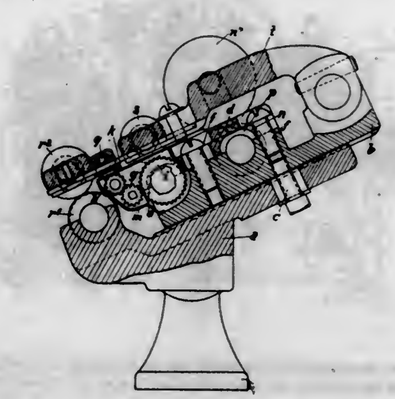
1. The process of manufacturing insulator pins, comprising the steps of deforming a bar to provide a projection thereon, placing on said bar in registration with said projection, a supporting member having an opening therein to receive said bar, and then pressing said supporting member to form the material thereof about said projection.

1,685,835. PROGRAM-SELECTING ARRANGEMENT. HENRY M. BASCOM, Brooklyn, OSCAR M. ARNOLD, Leonia, and ROBERT L. PENTLAND, Brooklyn, N. Y., assignors to American Telephone and Telegraph Company, a Corporation of New York. Filed Dec. 22, 1925. Serial No. 77,116. 4 Claims. (Cl. 179—1.)



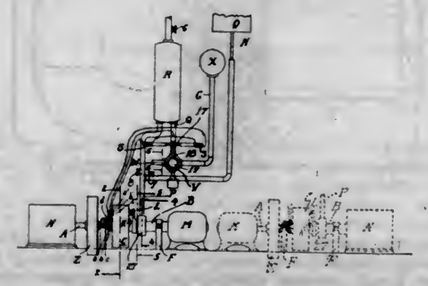
1. In a program selecting system, a subscriber's line, a plurality of program trunks, switching arrangements for interconnecting the subscriber's line with any desired trunk, means to control the operation of said switching apparatus, a subscriber's program receiving equipment associated with the line, a circuit extending from the subscriber's station over the line to said switch controlling means, means controllable at will by the subscriber over said circuit for restoring the switching apparatus to normal prior to the switching operation, and means controlled by the subscriber over said circuit for thereafter selectively operating the switching arrangement to select the desired trunk.

1,685,836. LIQUID-FUEL BURNER. CHARLES B. BUERGER, Pittsburgh, Pa., assignor to Gulf Oil Burner Company, Pittsburgh, Pa., a Corporation of Pennsylvania. Filed July 13, 1926. Serial No. 122,187. 16 Claims. (Cl. 158—63.)



1. A liquid fuel burner comprising an upper compartment having openings formed therein adjacent the peripheral edge of the burner, a lower compartment having similar openings, the openings of the upper compartment overlying the openings of the lower compartment, and means for separately feeding liquid fuel and air to the upper compartment.

1,685,837. FEED-VALVE DEVICE. WILLIAM E. DEAN, Edgewood, Pa., assignor to The Westinghouse Air Brake Company, Wilmerding, Pa., a Corporation of Pennsylvania. Filed Dec. 18, 1926. Serial No. 155,733. 4 Claims. (Cl. 303—59.)

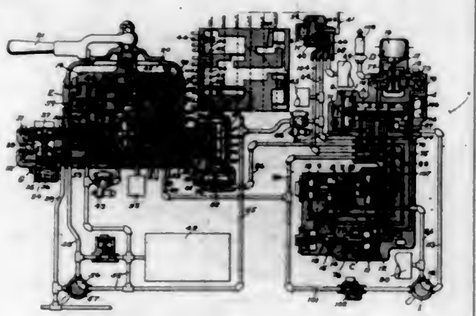


4. In a fluid pressure brake, the combination with a brake pipe, of a feed valve device comprising a supply portion for controlling the supply of fluid under pressure to the brake pipe, a regulating valve for controlling the venting of fluid from said supply portion to the supply passage of said feed valve device, a diaphragm subject to brake pipe pressure for operating said valve, and a valve operated by said diaphragm for controlling communication from said supply passage to said diaphragm.

1,685,838. DRAWING MECHANISM FOR SPINNING FIBROUS MATERIALS. UDO DITTMAR, Freiburg im Breisgau, Baden, Germany. Filed Aug. 16, 1927, Serial No. 213,353, and in Germany Jan. 24, 1927. 13 Claims. (Cl. 19—130.)

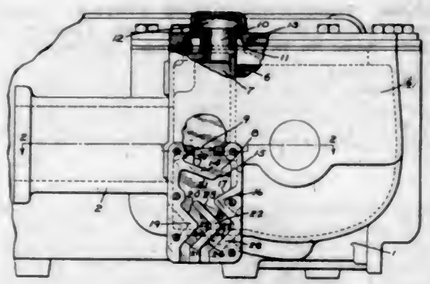
1. In a drawing-frame for spinning-machines a plurality of pairs of main drawing-rollers in combination with a plurality of additional bottom-rollers which are shorter than the main drawing-rollers and driving means for each said additional bottom roller.

1,685,839. TORQUE-EQUALIZING SYSTEM. ALEXANDER DAWES DU BOIS, Minneapolis, Minn. Filed Dec. 30, 1925. Serial No. 78,421. 18 Claims. (Cl. 64—89.)



1. In the practice of power transmission, the art of transmitting the force of a turning moment through the particles of a displaceably disposed fluid, under controlled fluid pressure, in chambers of variable volume; thereby providing constant torque through constant pressure in the fluid, and providing for pulsations of angular velocity by the displaceable character of the fluid.

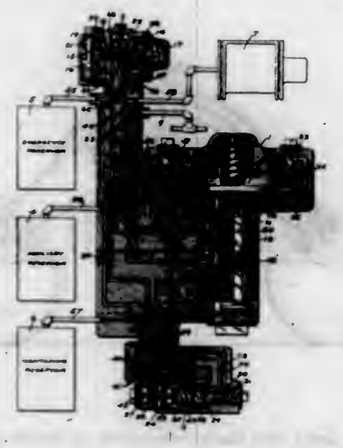
1,685,840. AUTOMATIC TRAIN STOP. CLYDE C. FARMER, Pittsburgh, Pa., assignor to The Westinghouse Air Brake Company, Wilmerding, Pa., a Corporation of Pennsylvania. Filed Nov. 27, 1925. Serial No. 71,532. 9 Claims. (Cl. 303—18.)



9. In a train control apparatus, the combination with a brake pipe and a brake valve device having a position in which fluid under pressure is supplied to the brake pipe, of a brake application valve device, train control mechanism for effecting the operation of said brake ap-

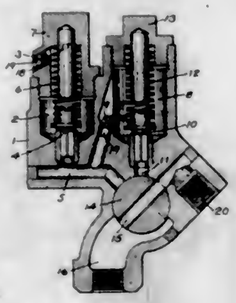
plication valve device, a valve for controlling communication through which said brake valve device supplies fluid to the brake pipe, and a piston operated upon movement

of said brake application valve device to effect an application of the brakes, for operating said valve to cut off said communication.



1,685,841. CRANK-CASE VENT. CLYDE C. FARMER, Pittsburgh, Pa., assignor to The Westinghouse Air Brake Company, Wilmerding, Pa., a Corporation of Pennsylvania. Filed June 5, 1926. Serial No. 113,916. 2 Claims. (Cl. 121—194.)

1. The combination with a reciprocating piston machine having a crank case chamber, of a crank case air vent device having portions provided with faces against which the air current laden with oil vapor exhaled from the crank case chamber impinges and on which oil tends to deposit, and faces against which the air current carrying dirt particles impinges when air is inhaled, the particles tending to be deflected back in part and in part to be held against movement to the crank case chamber by the deposited oil, the faces on which oil tends to collect being disposed so that the collected oil tends to drain out to the atmosphere by gravity flow.

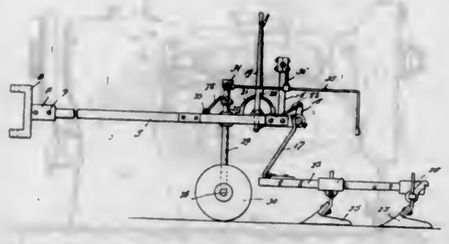


1,685,842. FLUID-PRESSURE BRAKE. CLYDE C. FARMER, Pittsburgh, Pa., assignor to The Westinghouse Air Brake Company, Wilmerding, Pa., a Corporation of Pennsylvania. Filed Oct. 21, 1926. Serial No. 143,153. 8 Claims. (Cl. 303—60.)

2. In a fluid pressure brake, the combination with a brake pipe, auxiliary reservoir, brake cylinder, and triple valve device having a piston and slide valve and operated upon a reduction in brake pipe pressure for supplying fluid from the auxiliary reservoir to the brake cylinder, of a maintaining reservoir, a valve device for controlling the supply of fluid from the maintaining reservoir to the brake

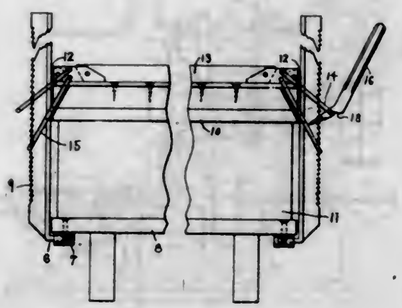
cylinder, and means for charging said maintaining reservoir with fluid under pressure from the brake pipe through ports controlled by said slide valve.

1,685,843. DUPLEX PRESSURE RETAINER. CLYDE C. FARMER, Pittsburgh, Pa., assignor to The Westinghouse Air Brake Company, Wilmerding, Pa., a Corporation of Pennsylvania. Filed Mar. 10, 1927. Serial No. 174,192. 4 Claims. (Cl. 303—79.)



4. A pressure retaining valve device comprising two retaining valves and means for at one time directing the flow of fluid past one retaining valve and thence through a restricted port to the atmosphere and at another time past one retaining valve and through a restricted port to the other retaining valve and thence past the other retaining valve and through a restricted port to the atmosphere.

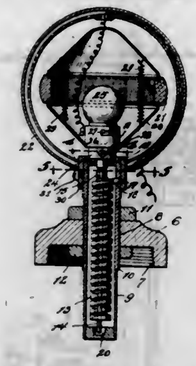
1,685,844. CULTIVATOR ATTACHMENT. BYRON L. FOWLER and JOHN J. SMITH, Morton, Tex. Filed Apr. 21, 1927. Serial No. 185,623. 1 Claim. (Cl. 280—82.)



An attachment for a cultivator comprising a tongue, a frame at the rear end of the tongue, a standard journaled vertically in the frame, wheels mounted at the lower end

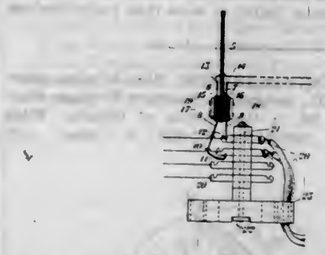
of the standard, a crank extending from an intermediate portion of the standard above the frame and having an opening in its extremity, a hook pivotally mounted on the tongue and engageable in the opening of the crank, a double crank extending in opposite directions from the

upper end of the standard, a pair of rods engaged with the extremities of the double crank, a post rising from the frame, a pair of brackets on the post inclining downwardly and outwardly and terminating in sleeves through which the rods are slidable, and the rear ends of the rods being bent downwardly and provided with handles.



1,685,845. TRANSPORTATION OF PAPER. BERTWOOD LEROY HAMMOND, Worcester, Mass. Filed Aug. 31, 1925. Serial No. 53,467. 8 Claims. (Cl. 100—6.)

1. A device for facilitating the transportation of sheet paper comprising a platform upon which sheets of paper may be superimposed, a rigid upright member constructed and arranged for detachably mounting at opposite sides of the platform, a movable flat cross member arranged to engage a substantial area of the top sheet of a pile of paper upon the platform and extend between the upright members, a hand operated mechanism providing a large mechanical advantage to cooperate with the upright member and cross member to force the latter against the paper to prevent relative movement of the sheets during transportation, and means for holding the cross member rigidly in such position.

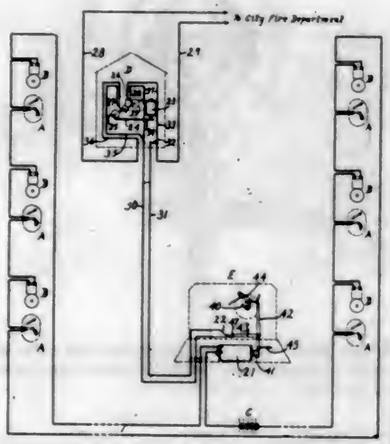


1,685,846. MOTOR METER. WILLIAM R. HESLEWOOD, Los Angeles, Calif., assignor of one-half to Fred A. Dana, Los Angeles, Calif. Filed Oct. 25, 1926. Serial No. 143,961. 3 Claims. (Cl. 116—114.)

3. In a motor meter, a hollow indicator consisting of a translucent horizontal annulus having readily distinguishable sectors, said annulus having seats in its upper and lower sides respectively, concavo-convex shells adapted to seat in said seats and thus to co-operate with said annulus to form a hollow rotatable body, and a tension spring

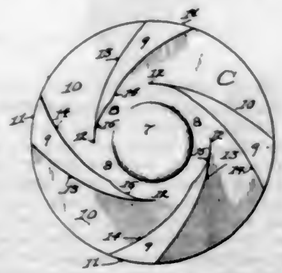
within said hollow body having one end secured to one of said shells and the other end to the other shell normally to hold said shells seated in said seats.

1,685,847. TEST CLIP. HERBERT HUNTINGTON, Hartford, Conn., assignor to American Telephone and Telegraph Company, a Corporation of New York. Filed Dec. 29, 1925. Serial No. 78,231. 5 Claims. (Cl. 173—324.)



1. In a test clip adapted to be applied to individual groups of a bank of terminals, a pair of resilient members for the clip having oppositely alined contact points for simultaneously engaging certain terminals of a group, one of said resilient members being of greater length than the other of said members and being provided with a curved portion adapted to extend over the tips of an outer terminal and an inner terminal to grip the latter terminal, and the other resilient member being comparatively straight and adapted to grip said outer terminal, a handle for said clip, insulating means positioned between said resilient members and said handle, and means to clamp said resilient members to said handle.

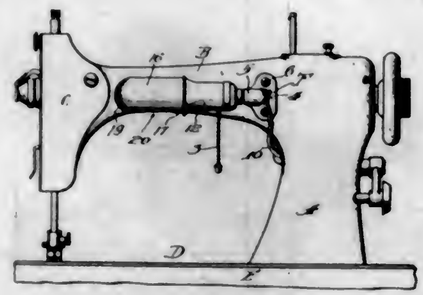
1,685,848. SIGNAL SYSTEM AND DEVICE. GEORGE ALFRED JACKSON, Waltham, Mass., assignor, by mesne assignments, to The Gamewell Company, Newton, Mass., a Corporation of Massachusetts. Filed Mar. 8, 1924. Serial No. 697,773. 21 Claims. (Cl. 177—369.)



1. In a signal system,—signal manifesting mechanism, and controlling stations having means thereat for causing response of said mechanism by the formulation of respectively distinctive multi-impulse code signals, each of which signals comprises impulses some two of which have a predetermined characteristic of situation within the signal and are separated by a time interval the duration of which falls within predetermined maximum and minimum

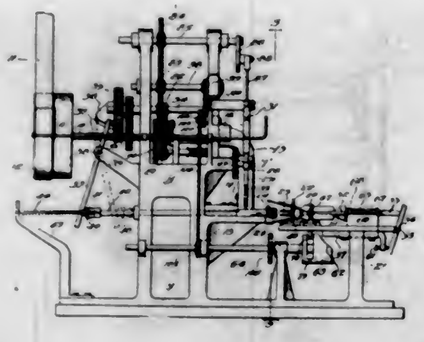
limits; in combination with a signal transmitter and an actuating device therefor responsive to such impulses and involving means for causing functional actuation of said transmitter only when said device is subjected to a plurality of impulses some two of which have such predetermined

characteristic of situation within the signal and are separated by a time interval the duration of which walls within the limits which do not exceed said maximum or fall short of said minimum limits, in more than predetermined degrees.



1,685,849. FORGING APPARATUS. CARL RICHARD JENNBERG, Chicago, Ill., assignor to Standard Forgings Company, Chicago, Ill., a Corporation of Illinois. Filed Aug. 26, 1926. Serial No. 131,553. 9 Claims. (Cl. 78—80.)

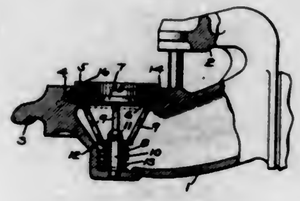
9. A forging apparatus adapted to work down and spin a hot billet to the desired contour and thickness, comprising a constantly rotating billet supporting die, and an upper reciprocating die provided with a plurality of spaced, spirally directed, metal working vanes.



1,685,850. LIGHTING ATTACHMENT FOR SEWING MACHINES. RAYMOND F. LIST, Belvidere, Ill., assignor to National Sewing Machine Company, Belvidere, Ill., a Corporation of Illinois. Filed Jan. 21, 1927. Serial No. 162,506. 3 Claims. (Cl. 240—2.)

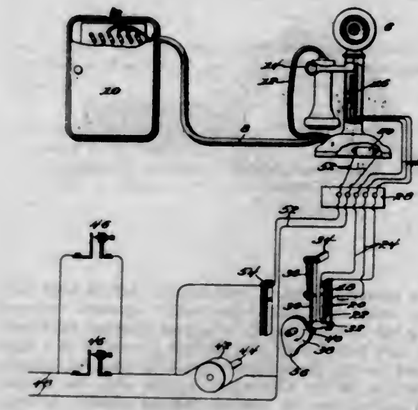
2. The combination with a sewing machine including an upright standard and overhanging arm, of an electric lighting device comprising an electric lamp, a socket, a reflector, and a bracket having one side complemental to the front of the overhanging arm adjacent to its connection with the standard, said bracket being rigidly connected to

the overhanging arm whereby the lighting device is mounted closely in front of and substantially parallel with the axis of said horizontal arm.



1,685,851. MACHINE FOR PLACING SPRINGS IN FABRIC POCKETS. JAMES L. MACINERNEY, Grand Rapids, Mich. Filed May 9, 1927. Serial No. 190,118. 22 Claims. (Cl. 226—18.)

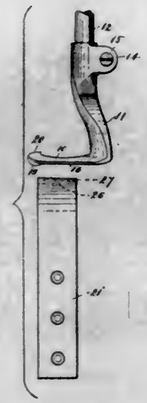
1. A machine for placing coiled springs in fabric pockets, comprising mechanism for compressing the springs, means for maintaining the springs in compressed condition, a reciprocating plunger for moving the compressed spring in a horizontal plane toward and between the two laps of a folded fabric strip, a support for the fabric strip, a pair of gripping jaws, adapted to grasp the fabric strip and spring therebetween, means for transmitting limited reciprocating movement transversely of the machine to said jaws, means for releasing the gripping jaws from the strip, and means for returning the jaws to original position.



1,685,852. HOSE-COUPLING GASKET. ALBERT A. MACKERT, Wilmerding, Pa., assignor to The Westinghouse Air Brake Company, Wilmerding, Pa., a Corporation of Pennsylvania. Filed Jan. 4, 1927. Serial No. 158,936. 1 Claim. (Cl. 285—63.)

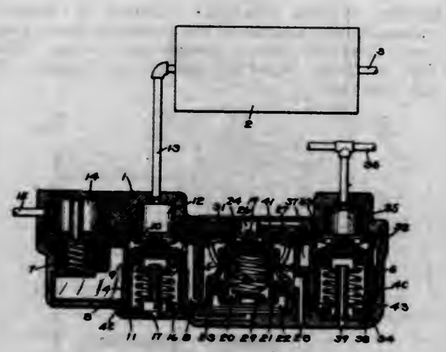
The combination with a hose coupling head having a conduit provided with an opening at the meeting face of the head and having an annular recess adjacent to said opening, and a gasket having an annular flange disposed in said recess, of a stem mounted in said head in axial alinement with said opening, a member slidably mounted on said stem and engaging said gasket, and a spring

acting on said member and tending to press same in engagement with said gasket, and a stop carried by said stem and adapted to be engaged by said member for limiting the movement of said member by said spring.



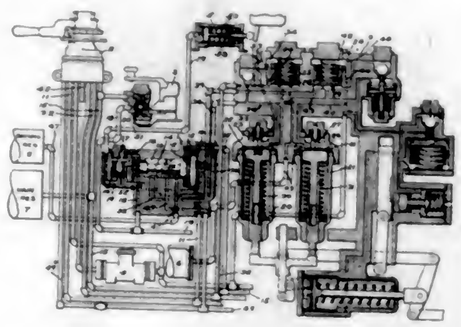
1,685,853. SIGNAL SYSTEM. AMEDEE S. MAZZUR, Waban, Mass. Filed Aug. 17, 1926. Serial No. 129,759. 2 Claims. (Cl. 179—5.)

1. An alarm apparatus comprising alarm initiating means, a normally stationary code wheel, means acting upon operation of the alarm initiating means for continuously rotating the code wheel, a signal circuit, a switch operated by the code wheel for intermittently opening and closing the signal circuit, a multiple element switch adapted to have its separate elements connected to the corresponding elements of the hook switch of a telephone instrument, a release cooperating with the multiple element switch and normally engaging the code wheel to maintain the elements of the switch out of contact with each other and constructed and arranged to be released and to permit permanent engagement of the contacts after starting of rotation of the code wheel.



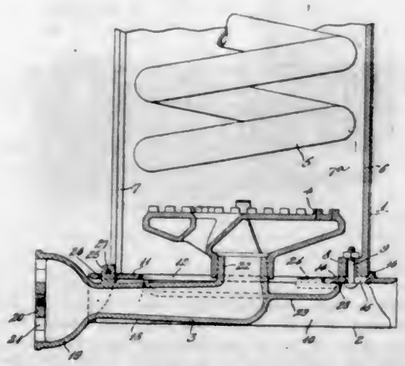
1,685,854. SHOE-SEWING MACHINE. THOMAS E. MCLAUGHLIN and MICHAEL C. MCLAUGHLIN, Holbrook, Mass. Filed Mar. 6, 1924. Serial No. 697,342. 1 Claim. (Cl. 112—62.)

In a shoe sewing machine, a needle-plate or table having a shank and a lateral extension offset from said shank toward the needle and inclined rearwardly, said lateral extension having a longitudinally-extending needle slot



passing vertically therethrough and a horizontal thread groove formed in its upper surface, said thread groove intersecting said slot at the rearward end of the latter.

1,685,855. FLUID-PRESSURE BRAKE. JOSEPH C. MCCUNE, Edgewood, Pa., assignor to The Westinghouse Air Brake Company, Wilmerding, Pa., a Corporation of Pennsylvania. Filed Oct. 19, 1926. Serial No. 142,636. 4 Claims. (Cl. 303—63.)

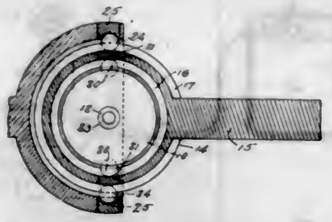


3. In a fluid pressure brake, the combination with a main reservoir, a main reservoir pipe, and a brake pipe, of a vent valve device for venting fluid from the brake pipe to effect an application of the brakes, a cut-off valve device operated upon a predetermined reduction in brake pipe pressure for operating said vent valve device to open communication through which fluid is vented from the brake pipe, and a protection valve device for cutting off communication from the brake pipe to said vent valve device until the brake pipe pressure has been increased to a predetermined degree.

1,685,856. VARIABLE-LOAD DEVICE. JOSEPH C. MCCUNE, Edgewood, Pa., assignor to The Westinghouse Air Brake Company, Wilmerding, Pa., a Corporation of Pennsylvania. Filed Oct. 14, 1927. Serial No. 226,121. 9 Claims. (Cl. 303—22.)

4. The combination with a "safety car control equipment," of a variable load mechanism associated with said equipment and operative by fluid under pressure, when effecting an application of the brake, to vary the braking power in accordance with the load on the car, said mechanism comprising a service limiting portion and an emergency limiting portion, a brake cylinder forming a part of said equipment and connected to said emergency limiting portion, means included in said equipment for supplying fluid under pressure directly to said service limiting portion in effecting a service application of the brake, and valve means forming part of said equipment adapted to control the flow of fluid under pressure from said service limiting portion to said brake cylinder through said emergency limiting portion.

1,685,857. WATER HEATER. CLARENCE H. MORROW, Cleveland, Ohio, assignor to The Hotstream Heater Company, Cleveland, Ohio, a Corporation of Ohio. Filed Sept. 27, 1924. Serial No. 740,227. 11 Claims. (Cl. 126—350.)

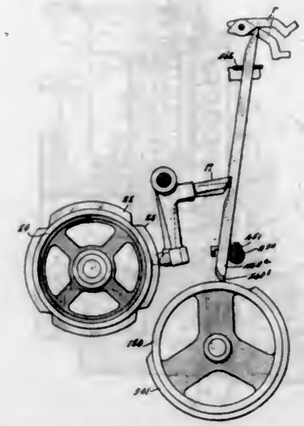


1. A water heater, comprising a casing provided with a front door opening and a base having a skirt, and a side feed burner mixer having a horizontally extending portion extending through the skirt, said base being formed to receive said mixer in a plurality of different positions.

1,685,858. ELECTRIC SWITCH. ARVID H. NERO, New Britain, Conn., assignor to The Arrow Electric Company, Hartford, Conn., a Corporation of Connecticut. Filed Oct. 17, 1923. Serial No. 669,086. 14 Claims. (Cl. 173—355.)

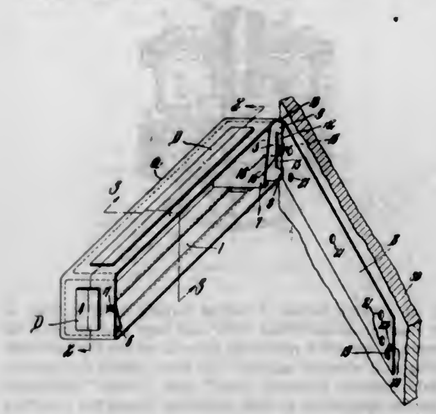
1. In an electric switch, a switch contact, a pivoted rocker, a push bar slidable with respect thereto and adapted to push the rocker toward the switch contact, and a spring carried by the push bar and having a camming engagement with the rocker to complete the circuit closing travel of the latter.

1,685,859. UNIVERSAL JOINT. ELI NOEL, Kansas City, Mo. Filed July 7, 1927. Serial No. 204,112. 1 Claim. (Cl. 64—91.)



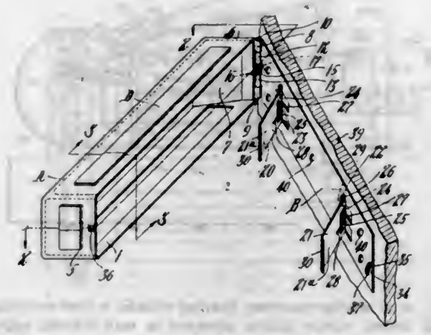
In a universal joint, a semi-circular hollow body having an axial shaft and diametrically opposite concaved bearing ball cavities therein, a central spherical solid body within said hollow body and movable therewith as a rigid unit and having diametrically opposite concaved bearing ball cavities therein adapted to register with the cavities in the hollow body, an annular bearing member movably surrounding said solid body and having an axial spindle or shaft and annular concaved bearing ball race opening to the solid body and an annular concaved bearing ball race opening to the wall of said hollow body, bearing balls movable in the cavities in said solid body and extending into the inner race in said bearing member, and bearing balls movable in the cavities in said hollow body and extending into the outer race in said bearing member.

1,685,860. CIRCULAR-KNITTING MACHINE. ALBERT E. PAGE, Brooklyn, N. Y., assignor to Scott & Williams, Incorporated, New York, N. Y., a Corporation of Massachusetts. Filed Feb. 17, 1927. Serial No. 168,979. 9 Claims. (Cl. 66—154.)



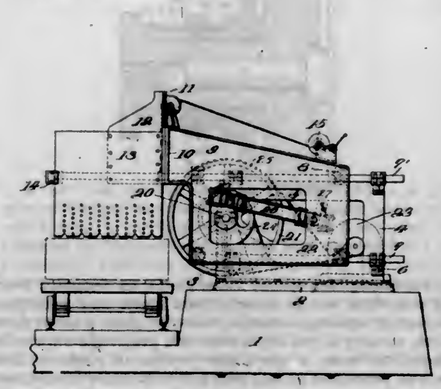
8. In a knitting machine a main pattern drum, an auxiliary pattern drum, a comb, a pair of thrust rods passing through one of the slots in said comb, said thrust rods having slots in their sides at different elevations, one cam on said main pattern drum adapted to control said pair of thrust rods, cams of two heights on one cam position of said auxiliary drum, means controlled by said auxiliary drum cams to raise one thrust rod when actuated by the low cam and the other thrust rod when actuated by the high cam, in

combination with a stationary external sinker cam cap and a vertically movable cam in said cam cap, said vertically movble cam having a spring mounted on said cam ring tend-



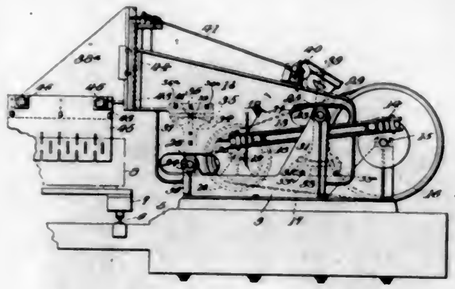
ing to hold said vertically movable cam in its uppermost position, said pair of thrust rods controlling the position of said cam.

1,685,861. DISPENSING CABINET. HOWARD PARKER, Berlin, N. H., assignor to Brown Company, Berlin, N. H., a Corporation of Maine. Filed July 28, 1925. Serial No. 46,578. 3 Claims. (Cl. 312—60.)



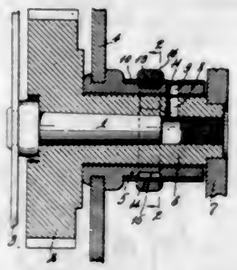
1. A dispensing cabinet comprising a back for securement to a support, an open-back receptacle for housing a supply of interleaved sheets hingedly secured thereto at one end and having a slot at the bottom, through which said sheets may be successively withdrawn, and a pair of inclined leaves within and adjacent to the ends of said receptacle and converging toward the ends of said slot for guiding said sheets in proper position toward said slot, said receptacle being swingably open from said back horizontally, so that sheets may be introduced into said receptacle through its open back.

1,685,862. DISPENSING CABINET. HOWARD PARKER, Berlin, N. H., assignor to Brown Company, Berlin, N. H., a Corporation of Maine. Filed Aug. 18, 1925. Serial No. 50,941. 4 Claims. (Cl. 312—61.)



1. A dispensing cabinet comprising a back for securement to a support, a receptacle for containing a supply of interleaved sheets hingedly secured thereto and having a horizontal slot at its front through which said sheets may be successively withdrawn, and a pair of inclined plates within said receptacle and converging toward the ends of said slot for guiding said sheets towards said slot.

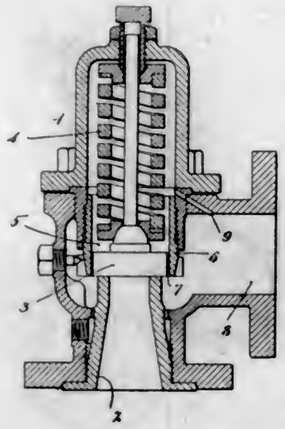
1,685,863. STONE-SAWING MACHINE. FRED R. PATCH, Rutland, Vt. Filed Aug. 5, 1925. Serial No. 48,259. 4 Claims. (Cl. 125—16.)



1. A stone sawing machine comprising a base having standards, a crank shaft mounted in said standards having a crank head provided with a wrist pin, a vertically disposed frame mounted on said base provided with brackets, bearings carried by said brackets, a saw head provided with rods slidably mounted in said bearings, a wrist pin carried by said saw head, a pitman connecting the wrist pin of said saw head to the wrist pin of said crank shaft, a guide holder slidably mounted on one end of said saw head, a saw blade carried by said holder and a guide carried by one of said rods for guiding the free edge of said blade.

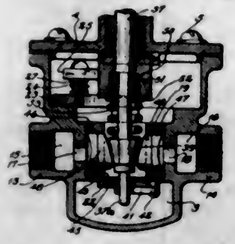
1,685,864. STONE-SAWING MACHINE. FRED R. PATCH, Rutland, Vt. Filed Oct. 26, 1926. Serial No. 144,325. 10 Claims. (Cl. 125—16.)

1. In a sawing machine, bearing stands, a saw carrying slide frame, rocker shafts mounted in said stands, oppositely arranged guides carried by the frame, and oppositely disposed rockers pivoted on said shafts and coacting with the guides for mounting the frame for reciprocating movement.



1,685,865. LUBRICATING DEVICE. CHARLES T. PFLUEGER, Akron, Ohio, assignor to The Enterprise Manufacturing Company, Akron, Ohio, a Corporation of Ohio. Filed Mar. 16, 1922. Serial No. 544,272. 1 Claim. (Cl. 308—124.)

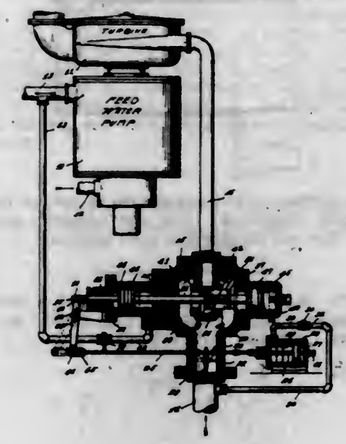
In a fishing reel, spaced frame plates, an elongated bearing post fixed to the inner of said plates and projecting through an opening formed in the outer plate, a sleeve fixed in the opening of the outer plate and projecting outwardly beyond the same, a spool gear having an elongated hollow hub journalled on said post and in said sleeve, said post terminating short of the end of the hub to provide a lubricant chamber, said hub and sleeve having registering ports communicating with said chamber, and a rotatable cap on said sleeve frictionally retained against rotation and provided with an opening adapted to register with said ports.



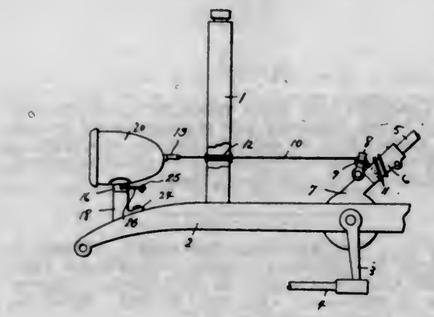
1,685,866. SAFETY AND RELIEF VALVE. FAIRFIELD E. RAYMOND, Boston, Mass., assignor to Crosby Steam Gage & Valve Company, Boston, Mass., a Corporation of Massachusetts. Filed Sept. 25, 1922. Serial No. 590,290. 1 Claim. (Cl. 137—53.)

A safety valve comprising a throat tube terminating in an opening, a spring operated valve disc normally closing the opening, a chamber above the valve disc enclosing the spring, an outlet chamber through which fluid vapor escapes upon opening of the valve disc, and connections between the spring chamber and outlet chamber designed to permit

the escape of fluid vapor from the spring chamber and reduce the pressure in the spring chamber by virtue of the eductive effect of vapor flowing through the outlet chamber.



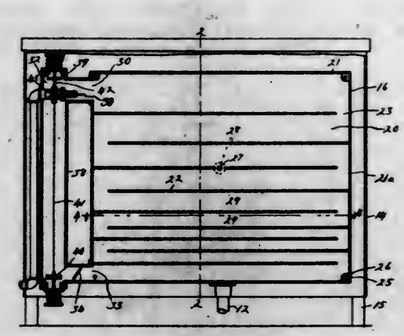
1,685,867. FLUID-MIXING VALVE. BENJAMIN ROSENBAUM, New York, N. Y. Filed Jan. 15, 1926. Serial No. 81,359. 16 Claims. (Cl. 277—39.)



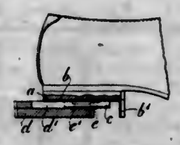
15. In a valve device, a casing having a valve seat, a valve element co-operating with said seat and movable in a horizontal direction relatively thereto, means for normally pressing said element against said seat, means for operating said element between "open" and "closed" positions, and means operatable by said operating means for reducing the pressure of said element upon said seat during operation of said element.

1,685,868. CONTROLLER GOVERNOR. VICTOR SCHLEYER, Anderson, Ind., assignor, by mesne assignments, to Dean Hill Pump Company, Anderson, Ind., a Corporation of Indiana. Filed June 2, 1923. Serial No. 643,027. 9 Claims. (Cl. 103—19.)

1. A safety governor-controller for pressure producing pumps, comprising control means for controlling the supply of power to the driving means for a pump, means acted on oppositely by the pressure developed by the pump and by the pressure of said power-supply to shift the position of said control means to maintain a predetermined relation between said two pressures, and shut-off means for shutting off the supply of power, said shut-off means being connected with said control means to be moved thereby to shut-off position by the movement of said control means which occurs when the pressure produced by the pump falls.



1,685,869. AUTOMOBILE HEADLIGHT STRUCTURE. JOSEPH CECIL SHOFNER, Haley, Tenn. Filed Feb. 25, 1927. Serial No. 171,046. 1 Claim. (Cl. 240—62.)

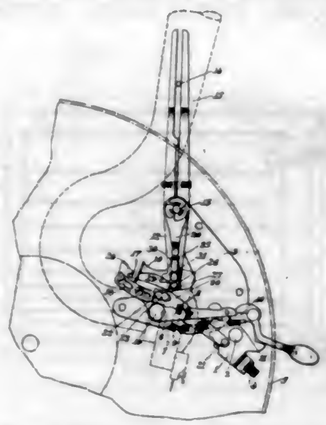


In an automobile, the combination of a frame, a radiator having a longitudinally disposed conduit guide extending through its lower portion, a steering mechanism in rear of said radiator, a light mounted on the frame to be turned from a straight-ahead position to a laterally directed position, a tensioned spring connected with the frame and the light and arranged on release of the light to turn the same to a laterally-directed position, a crank connected with the light, and a flexible cable movable through the conduit guide in the radiator and directly interposed between and connected to said crank and said steering mechanism, whereby when the steering mechanism is actuated and forward movement of said cable is permitted said spring will operate to move the light to a laterally directed position.

1,685,870. INTERNAL-COMBUSTION RADIATOR UNIT. FRANK W. SHUELL and ELMER E. LEDBETTER, Detroit, Mich., assignors to The Ever Hot Heater Company, Detroit, Mich., a Corporation of Michigan. Filed Apr. 11, 1927. Serial No. 182,845. 10 Claims. (Cl. 126—91.)

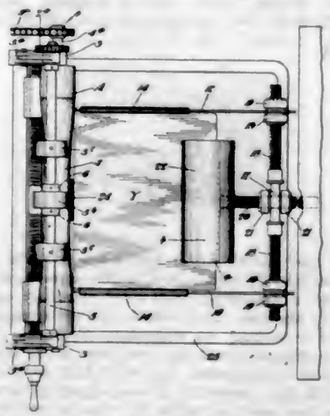
1. A heating apparatus of the internal combustion type comprising a combustion chamber having an air inlet at the top thereof and an elongated flue passageway extending downwardly therefrom, means for introducing fuel into the upper portion of said combustion chamber adjacent said air inlet, and means for forcibly withdrawing the products of combustion from the lower portion of said combustion chamber.

1,685,871. DETACHABLE HEEL FOR BOOTS AND SHOES. HARRY ASHER, London, England. Filed Aug. 17, 1927, Serial No. 213,593, and in Great Britain Apr. 9, 1927. 1 Claim. (Cl. 36—42.)



A shoe heel having upper and lower sections, a plate secured against the under face of the upper heel section and having a depending portion at its front edge constituting an abutment and formed with an opening, a longitudinally extending rib depending from the plate between the abutment and the rear end of the plate and dovetailed in cross section, the lower heel section having a longitudinally extending groove opening through its front edge face and dovetailed in cross section to snugly receive the rib, and a fastener having an attaching portion secured against the upper face of the lower heel section and a tongue projecting forwardly and passed through the opening in said abutment and bent into clinching engagement with the front face thereof.

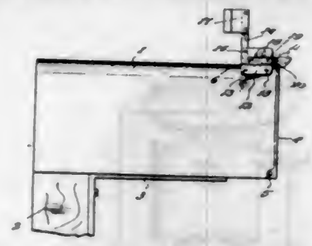
1,685,872. AUTOMATIC BRAKE FOR TALKING MACHINES. HORACE LEOPOLD TUCKER BUCKLE, Iver Heath, England, assignor to Victor Talking Machine Company, a Corporation of New Jersey. Filed Dec. 28, 1927, Serial No. 243,164, and in Great Britain Nov. 10, 1926. 6 Claims. (Cl. 192—124.)



1. An automatic brake for talking machines comprising a rotatable brake member and a detent member adapted to engage said brake member to hold it in the "off" position and to be moved to allow said brake member

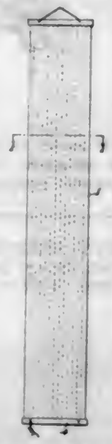
to move into the "on" position, a sound arm, a member moved by said sound arm, and brake withdrawing means adapted to cooperate with the rotatable brake member

and the member moved by the sound arm whereby withdrawal of the brake from the stopping position may be effected by the manual operation of the sound arm.



1,685,873. FEED ROLLERS. ARCHIBALD D. EVANS and JAMES K. LAMOREE, New Castle, Pa., assignors to American Sheet and Tin Plate Company, Pittsburgh, Pa., a Corporation of New Jersey. Filed Sept. 28, 1927. Serial No. 222,681. 5 Claims. (Cl. 271—80.)

2. Feed rollers for delivering sheets and plates comprising, in combination, a concave roller, a shaft arranged parallel to said concave roller, an idler disk mounted for free rotation on said shaft at a point intermediate the ends of said shaft, said idler disk being spaced from said concave roller, at least two other disks mounted on and fixed to said shaft and spaced equidistant from the center of said shaft and concave roller, said last named disks being in contact with said roller.



1,685,874. MAIL-BOX LATCH AND SIGNAL. HERMAN C. FEIST, Rowena, Tex. Filed Apr. 19, 1927. Serial No. 184,959. 8 Claims. (Cl. 232—34.)

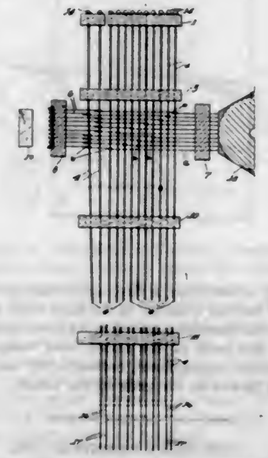
1. A receptacle, a closure for said receptacle movable into and out of a closed position, a signal carried by said receptacle and movable into and out of a set position, and a movably mounted latch carried by said receptacle and having a portion engageable with said closure and

another portion movable into and out of position to engage said signal whereby the latch may releasably retain the closure shut and the signal in a set position.

1,685,875. RADIO APPLIANCE. ALBERT B. FISHWICK, Cincinnati, Ohio. Filed Nov. 12, 1923. Serial No. 674,225. 6 Claims. (Cl. 250—33.)

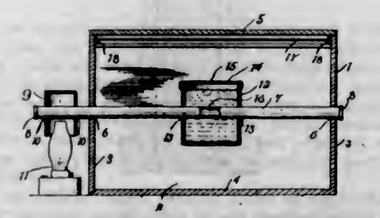
4. A material from which electric wave sensitive units may be formed comprising webs of paper secured together by a binding layer of dielectric adhesive of bituminous nature and strands of interspaced wires extending through said material, within the binding layer.

1,685,876. TOOTHBRUSH CONTAINER. HARRY C. FRAYER, St. Paul, Minn., assignor to Sterilizable Tooth Brush Container Company, St. Paul, Minn., a Corporation of Minnesota. Filed Feb. 9, 1925. Serial No. 7,879. 1 Claim. (Cl. 248—63.)



A tooth brush holder comprising a glass tube cover member having perforations near the top thereof, hook-shaped means for frictionally holding the lower end of said cover member, a flange integral with said holding means upon one end thereof, a lip horizontally disposed upon said flange and extending inside the opening in the lower portion of said cover member, and a pivoted bottom portion secured to said lip.

1,685,877. HEAT TREATMENT OF PERMANENT MAGNETS. JAMES EDWIN GEE and FREDERICK SAMUEL GEE, London, England. Filed Mar. 21, 1925, Serial No. 17,440, and in Great Britain Mar. 25, 1924. 2 Claims. (Cl. 148—3.)

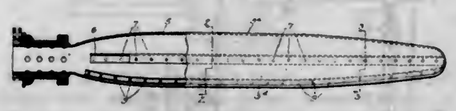


1. A method of making permanent magnets by casting and heat treating the castings only before magnetizing, in which the castings are softened by heating and then hardened by first heating to approximately 1,200° C., then cooling and leaving for about 18 hours, reheating to approximately 750° C., and allowing to cool and finally heating to approximately 1,000° C. for ten minutes, allowing to cool, and leaving for about 12 hours before magnetizing.

1,685,878. JACQUARD HARNESS. HAROLD GRIFFITHS, Shrewsbury, Mass. Filed Apr. 13, 1927. Serial No. 183,479. 8 Claims. (Cl. 139—59.)

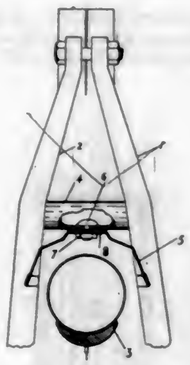
1. In a jacquard machine, a top board, a selectively lifting board, and a set of stiff harness elements extending through the selectively lifting board and the top board, means to hold said elements from falling through the top board, and means for lifting them by the rise of the selectively lifting board, whereby said action takes place without flexure of the harness elements.

1,685,879. BROODER HEATER. GEORGE E. LEAR, Danville, Ala. Filed May 23, 1927. Serial No. 193,664. 1 Claim. (Cl. 237—15.)



A brooder comprising a casing, a tube supported by the end walls of the casing and having one end extended beyond one end wall, a heat trapping receptacle mounted upon the extended end, a water tank supported by the tube, said tube having an orifice therein for communication with the tank, and a heating unit associated with the receptacle for heating water in the tube and thus the water in the tank.

1,685,880. LIQUID-DISPENSING DEVICE. NAPOLEON H. LOPOSER, Gulfport, Miss. Filed Mar. 19, 1927. Serial No. 176,698. 2 Claims. (Cl. 221—100.)

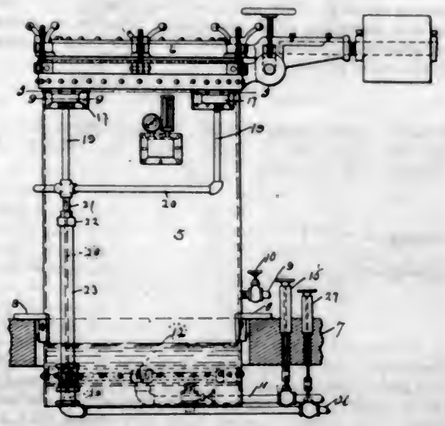


1. In a liquid dispensing device, the combination of a dispensing receptacle including an inlet and a dispensing outlet and an overflow outlet, a plurality of measuring tubes communicating with the overflow outlet and extending to different levels in the receptacle and having valve seats at their respective upper extremities, the top of said receptacle having openings vertically alined with the respective measuring tubes and a plurality of valve units each including a handle and a stem and a valve closing element, these valve closing elements being normally seated on the upper extremities of the respective measuring tubes while the respective stems extend through the respective openings which are alined with the respectiev measuring tubes, the respective handles being operable to raise the respective valve elements from the respective measuring tubes and thereby permit a surplus of the liquid to escape through one or another of the measuring tubes, means to engage with the respective handles and thereby hold the respective valves in raised position, and a valve operable to open and close said dispensing outlet and thereby dispense the liquid remaining in the receptacle after the surplus has escaped through one of the measuring tubes.

1,685,881. PROPELLER BLADE. MOSES C. NIXON, Chicago, Ill. Filed Nov. 1, 1926. Serial No. 145,571. 2 Claims. (Cl. 170—159.)

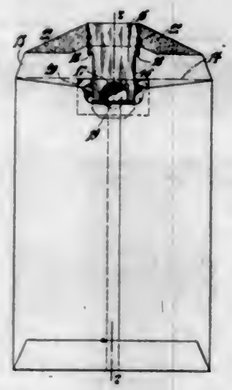
1. A propeller blade comprising a sheet of metal, a channel-like member extending substantially the length of the blade, said sheet of metal being folded longitudinally so as to bring its sides against the flanges of said channel member, said channel member being so disposed that its flanges project toward the free edges of said sheet of metal, means for securing the sides of said sheet of metal to said flanges, and means for securing said free edges of the sheet of metal together.

1,685,882. BICYCLE REPAIR PLATE. EWALD F. PAWSAT, Maysville, Ky., assignor to Wald Manufacturing Company, a Corporation of Kentucky. Filed Sept. 29, 1926. Serial No. 138,523. 1 Claim. (Cl. 208—141.)



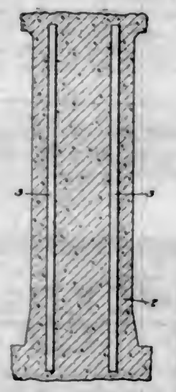
As an article of manufacture, an elongated repair plate, said plate being shaped to rest longitudinally against a bicycle mud guard, and having a central perforation to receive the mud guard attaching bolt.

1,685,883. PROCESS OF SEPARATING GAS MIXTURES. ARTHUR B. RAY, Flushing, N. Y., assignor to Carbide and Carbon Chemicals Corporation, a Corporation of New York. Filed May 4, 1923. Serial No. 636,766. 12 Claims. (Cl. 196—8.)



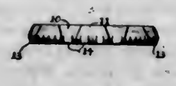
11. Process of separating gas mixtures by the absorption of a water-insoluble constituent thereof in activated carbon which comprises contacting the gas mixture with the carbon and supplying water to the carbon during the absorption to cool the carbon.

1,685,884. SPRAY ATTACHMENT FOR RETORTS. ROBERT A. SINDALL, Baltimore, Md., assignor, by mesne assignments, to Mavis Bottling Company of America, Baltimore, Md., a Corporation of Delaware. Filed Sept. 25, 1926. Serial No. 137,802. 2 Claims. (Cl. 126—272.)



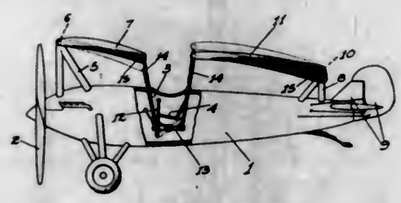
1. A temperature regulating spraying device for retorts, including a vessel having a cover therefor, a spraying head secured in said vessel, a feeding means for said spraying head, spraying plates secured adjacent the upper end of said receptacle, feeding means for said spraying plates, and an injector vacuum forming means secured in said last named feeding means as and for the purpose specified.

1,685,885. BAG OR ENVELOPE. GEORGE C. SNYDER, Long Island City, N. Y., assignor to Kaelma Manufacturing Company, Inc., New York, N. Y., a Corporation of New York. Filed Oct. 17, 1923. Serial No. 668,902. 6 Claims. (Cl. 229—68.)



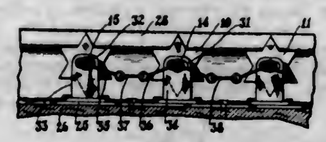
2. In a bag or envelope, a flap, operating means therefor, the bag body having a notch in its back wall and a transverse slit for the operating means in its front wall and which lies between the ends of the notch, and means for establishing a mutual engagement between the back wall and the operating means at the ends of the notch.

1,685,886. CONCRETE-REENFORCING MEMBER. FRANK N. SPELLER, Pittsburgh, Pa. Filed July 30, 1925. Serial No. 47,000. 4 Claims. (Cl. 72—111.)



4. A hollow reenforcing bar for concrete and the like, having a non-circular, readily collapsible cross-section, the cross-section of said member being substantially equal to the cross-section required in standard practice for solid reenforcing bars.

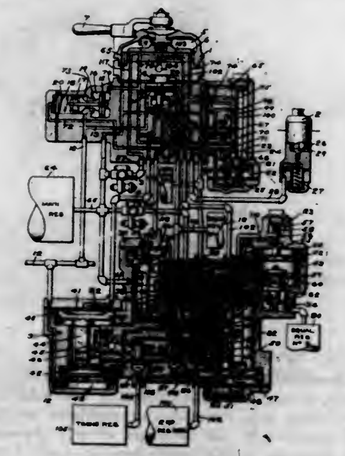
1,685,887. BOTTLE CAP. HENRY SPENGLER, New York, N. Y. Filed Apr. 20, 1926. Serial No. 103,201. 6 Claims. (Cl. 215—46.)



1. In a bottle closure, a cap provided with dependent, inturned spring fingers, yielding reinforcing members overlying said fingers, the ends of said fingers and of said members being crimped and the reinforcing members and fingers being provided with interlocking means.

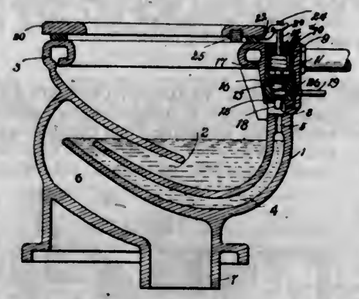
1,685,888. AEROPLANE. GEORGE C. ST. LOUIS, Fresno, Calif., assignor of one-half to Francis A. Spooner, Willows, Calif. Filed June 18, 1927. Serial No. 199,817. 4 Claims. (Cl. 244—12.)

4. An aeroplane including a fuselage, separate longitudinally spaced wings disposed above the fuselage, supports projecting upwardly from the fuselage adjacent its opposite ends, hinge connections between said supports and the front and rear ends of the front and rear wings respectively, means for turning the wings on their hinge connections at will, such means comprising a pivoted operating lever mounted in the fuselage, and connections between said lever and the wings arranged to cause the free ends of the front and rear wings to be lowered and raised simultaneously relative to the fuselage.



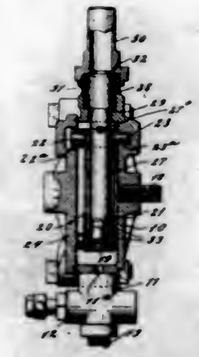
1,685,889. CATTLE GUARD FOR RAILROADS. AUGUSTIN THIBERT, Jogues, Ontario, Canada. Filed Mar. 26, 1928. Serial No. 264,809. 2 Claims. (Cl. 256—16.)

1. In an animal guard, a series of rods placed parallel to each other and slidably mounted in vertical supporting members which are secured to a suitable base structure, rotatable members having spur points projecting radially therefrom and the said rotatable members mounted at intervals on the aforesaid rods, and foot plates positioned in the spaces intervening between the said rods and supported by links which connect them to adjacent portions of the said rods.



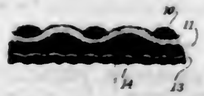
2. In an animal guard, parallel series of spur wheels rotatably mounted at intervals on rod members which are slidably supported in vertical bearing brackets, which brackets are secured to suitable base elements, and foot plates in positions parallel to the said rods and supported therefrom by link members which are placed at intervals thereon.

1,685,890. FLUID-PRESSURE BRAKE DEVICE. THOMAS H. THOMAS, Edgewood, and CLAUDE A. NELSON, Wilmerding, Pa., assignors to The Westinghouse Air Brake Company, Wilmerding, Pa., a Corporation of Pennsylvania. Filed Oct. 14, 1927. Serial No. 226,112. 16 Claims. (Cl. 303—18.)



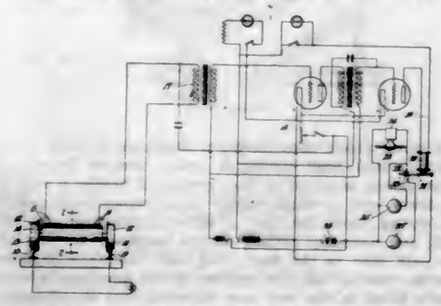
2. The combination with a brake pipe, of means for effecting a reduction in brake pipe pressure in two stages including an equalizing reservoir, means operating upon a reduction in pressure in said reservoir for effecting a reduction in brake pipe pressure, a second equalizing reservoir, and means operating in effecting the first stage of reduction in brake pipe pressure for connecting the second equalizing reservoir to the first equalizing reservoir and operating upon effecting the second stage of reduction in brake pipe pressure for disconnecting the second reservoir from the first.

1,685,891. WATER-CLOSET VENTILATOR. WILLIAM M. WATKINS and GEORGE C. FINLEY, Long Beach, Calif. Filed Feb. 15, 1927. Serial No. 168,394. 1 Claim. (Cl. 4—72.)



A water closet bowl having a discharge passage and a conduit, said bowl having a recess formed therein, a valve casing mounted in the recess and having a seat in its lower end, a water supply pipe communicating with the casing above the seat, a valve cooperating with the seat, and normally cutting off the supply of water from the said pipe to the seat, said bowl having a chamber therein opening into the interior of the bowl, an injector nozzle fitted in the seat and extended into the chamber, said nozzle serving to discharge water into the conduit when the valve is unseated, to draw air from the bowl into the chamber for discharge into the conduit and a second conduit connecting the chamber and recess.

1,685,892. APPARATUS FOR ABRADING GRAPHITE OR SIMILAR MATERIAL. LEWIS S. WATERS, Scranton, Pa., assignor to National Graphite Lubrication Company, Wilmington, Del., a Corporation of Delaware. Filed July 11, 1924. Serial No. 725,377. 8 Claims. (Cl. 137—99.)

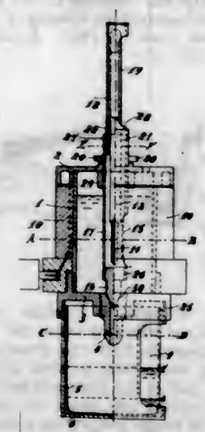


1. In combination a vibrating support, a chamber mounted thereon, a magazine tube extending into said chamber, an outlet from said chamber, an oscillator within said chamber operated by the vibration of said chamber, and abrasive material within said chamber carried by said oscillator.

1,685,893. FLEXIBLE COVERING MATERIAL AND METHOD OF MAKING THE SAME. JOHN A. WILSON, Elizabeth, N. J., assignor to Duratex Corporation, Newark, N. J., a Corporation of New Jersey. Original application filed Nov. 12, 1923, Serial No. 674,313. Divided and this application filed June 2, 1924. Serial No. 717,299. 10 Claims. (Cl. 154—50.)

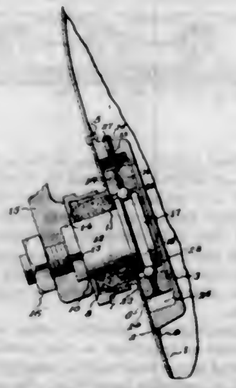
3. A flexible, water proof, covering material comprising a burlap base, an intermediate layer of oxidized oil applied to said burlap base, a facing fabric secured to said burlap base by said intermediate layer, and a surface coating applied to said facing fabric.

1,685,894. AUTOMATIC TRAIN-CONTROL APPARATUS. MAX THEODORE WINTSCH, Lancaster, Pa., assignor to The Lowell-Wintsch Automatic Train Control Corp., Lancaster, Pa., a Corporation of Delaware. Filed Oct. 20, 1926. Serial No. 142,789. 11 Claims. (Cl. 246—63.)



1. Brake controlled apparatus for vehicles mounted on rails comprising a valve for controlling the application of the brakes, electro-magnetic means for holding said valve closed, a metal sheet surrounding an axle of the vehicle and having its edges connected through the cores of a plurality of coils, an amplifier circuit inductively connected to said coils, and a relay in the output circuit of said amplifier for controlling the energization of said electro-magnetic means.

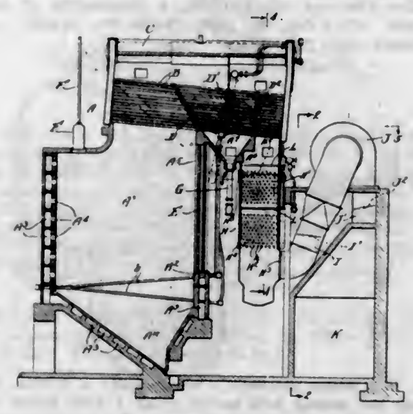
1,685,895. METHOD OF MAKING CALCIUM POLYSULPHIDE. CHARLES D. WOOD, Walnut Park, Calif., assignor to Los Angeles Chemical Company, Los Angeles, Calif., a Corporation of California. Filed Sept. 1, 1926. Serial No. 133,066. 7 Claims. (Cl. 23—138.)



1. The method of making calcium polysulphide consisting in grinding sulphur in the presence of lime and hot water.

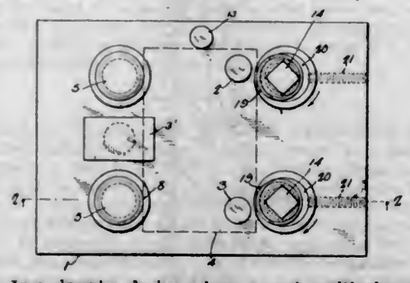
1,685,896. VISCOSIMETER. JACQUES WOUDHUYSEN and GASTON ORY, Paris, France. Filed July 7, 1927. Serial No. 204,122. 3 Claims. (Cl. 265—11.)

1. A viscosimeter comprising in combination: a cup-like container for the liquid to be tested, means for heating the liquid, a nozzle in the bottom of the container, an internal valve seat in said nozzle cooperating with a valve forming part of a tubular fitting containing a thermometer, the bulb of which contacts with the liquid to be tested, means for opening and closing the valve and a graduated testing cup receiving the liquid flowing through the nozzle.



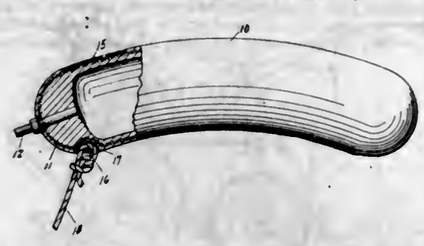
1,685,897. BEARING FOR DRILL DISKS. CLARENCE L. YOST and LOYAL C. BROWN, Kanorado, Kans. Filed Mar. 19, 1927. Serial No. 176,754. 2 Claims. (Cl. 308—181.)

1. A bearing of the class described, comprising a boxing, a disk removably engaged in the boxing, a cover plate for the rear side of the boxing, said cover plate having a



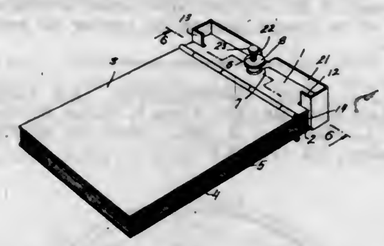
casing carried thereby, a cap threaded upon the casing, packing engaged in the casing, a spindle adapted for attachment to a planter, said spindle being engaged in the casing and having its outer end formed with a circular head adapted to engage in the boxing, said head having a ball race therein, rings engaged in the boxing, and having grooves formed in their inner peripheries to constitute a ball race which coincides with the ball race of the head, ball bearings engaged with the respective ball races, pockets formed in the bearings, and grooves formed in the base of the boxing, and affording communication between the respective pockets for distributing a lubricant within the boxing, and washers interposed between said rings.

1,685,898. ECONOMIZER BOILER. JOHN E. BELL, Brooklyn, N. Y., assignor to Foster Wheeler Corporation, New York, N. Y., a Corporation of New York. Filed Mar. 7, 1923. Serial No. 623,385. 7 Claims. (Cl. 122—292.)



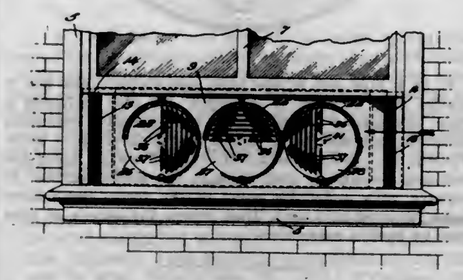
1. The combination with a horizontal water tube boiler having a housing therefor and baffled to provide four transverse passes for the heating gases, of a chamber beneath the first pass through which heating gases pass upward into said first pass, an economizer located within said boiler housing beneath the fourth pass and comprising a closely spaced bank of heating tubes, and means providing a flow path for the discharge of heating gases from the bottom of the economizer including separate portions at opposite sides of a plane transverse to said tubes and intermediate the ends of the latter.

1,685,899. CLAMPING DEVICE. WILLIAM K. ANDREW, Milwaukee, Wis., assignor to Kearney & Trecker Corporation, West Allis, Wis., a Corporation of Wisconsin. Filed Oct. 4, 1923. Serial No. 666,515. 10 Claims. (Cl. 51—217.)



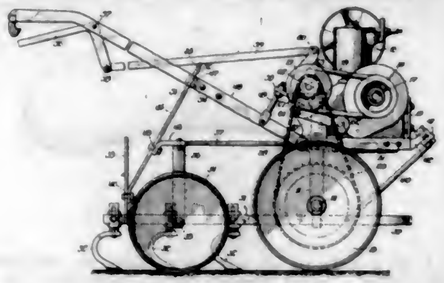
1. In a clamping device, a base, a work positioning stop fixed therewith, a clamp member having an eccentrically formed work clamping portion rotatably fixed on said base, and means for adjusting the axis of rotation of said head portion relative to the position of said stop.

1,685,900. SECTIONAL AIR BAG. KIT CURTIS BENN, Akron, Ohio, assignor to The Mohawk Rubber Company, Akron, Ohio, a Corporation of Ohio. Filed Feb. 2, 1926. Serial No. 85,491. 3 Claims. (Cl. 18—45.)



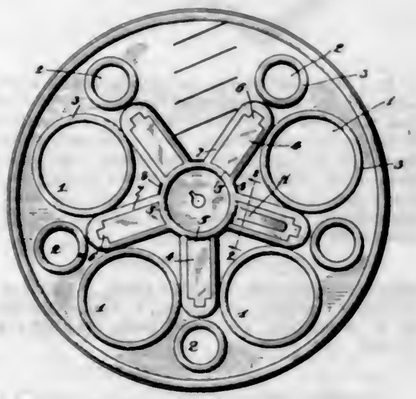
1. In a sectional air bag construction, an expansible bag having a recess formed upon its inner face, and a band of cord fabric wrapped about the bag a plurality of times, the cords being brought together to form a cable which passes over the recess and forms an eye.

1,685,901. BINDER. FRED BERNER, East Rutherford, N. J. Filed May 7, 1926. Serial No. 107,389. 6 Claims. (Cl. 129—18.)



1. In a loose leaf binder, the combination of a pair of binding strips, leaves arranged between the said strips, means for keeping the leaves substantially in alignment, said leaves and one of said strips each having a notch intermediate the side edges of the leaves, a threaded post pivoted to the other strip and projecting through the said notches, and a nut carried by said post, the said post being adapted to swing at least partially out of the notches when the nut is loosened.

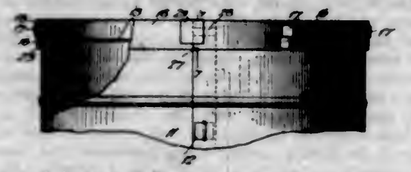
1,685,902. WINDOW VENTILATOR. CHARLES G. BLOOMER, Cranston, and HENRY F. SANDS, Providence, R. I. Filed Mar. 16, 1928. Serial No. 262,124. 3 Claims. (Cl. 98—99.)



1. In a window ventilator, an oblong plate provided with semicircular orifices longitudinally disposed therein, disks rotatably supported by the plate over the orifices, and a series of integral forwardly directed louver fins transversely disposed upon semicircular segmental areas of the disks.

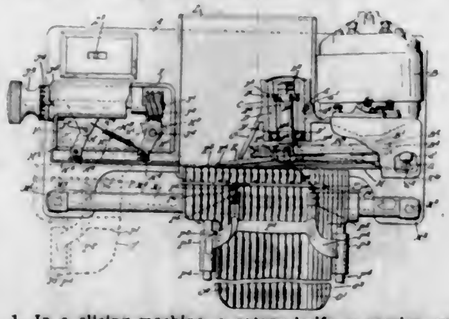
1,685,903. CULTIVATOR. HARRY W. BOLENS, Port Washington, Wis. Filed Nov. 12, 1921. Serial No. 514,652. 10 Claims. (Cl. 97—48.)

1. In a garden cultivator, the combination of a propelled frame, a tool carrying frame connected to the propelled frame, ground working tools carried by the tool frame, steering members connected to the propelled frame, and members connecting the steering members and tool frame, said members serving to move the tool frame laterally of the cultivator independently of the forward movement of the cultivator upon lateral steering movement of the steering members for steering the propelled frame.



1,685,904. REEL CONSTRUCTION AND LENGTH-MEASURING MEANS. JAMES L. BURKE, Weehawken, N. J. Filed Mar. 2, 1921. Serial No. 449,120. 5 Claims. (Cl. 33—128.)

1. In a tape reel of the type comprising a hub and a coaxial disk to serve as a keeper, the disk including a scale comprising a plurality of segments extending obliquely, said disk being slitted lengthwise of said scale, whereby the outer convolution of tape wound upon the reel may readily be seen through the slitted portion in registry with a definite point of the scale, and indications adjacent said scale from which the length of tape may be readily ascertained.

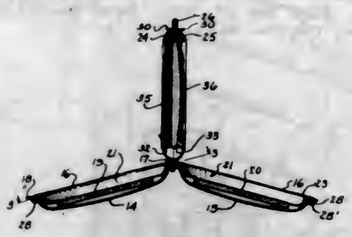


1,685,905. METAL SHIPPING CONTAINER. JOHN J. CAIN, Bayonne, N. J. Filed July 11, 1925. Serial No. 43,053. 6 Claims. (Cl. 220—59.)

1. In a metal shipping container, a circular body portion having reverse folds of the material at the outside of an open end forming a flange with a channel between the folds, a head having a peripheral flange adapted to be received in said channel between the walls of the body

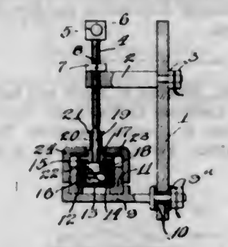
folds, and tongues formed on one of said flanges and adapted to fold over the edge of the other flange to secure the head on the body.

1,685,906. SLICING MACHINE. WILLIAM J. CAMPBELL, Indianapolis, Ind., assignor to American Slicing Machine Company, Chicago, Ill., a Corporation of New York. Filed Oct. 21, 1926. Serial No. 143,082. 33 Claims. (Cl. 146—102.)



1. In a slicing machine, a rotary knife, a carrier, and means for guiding said carrier along a path across the face of said knife, including a pair of superposed vertically aligned tracks, and means for laterally adjusting said carrier in relation to one of said tracks, including a plurality of adjustable contact members mounted on said carrier and adapted to engage opposite sides of said track.

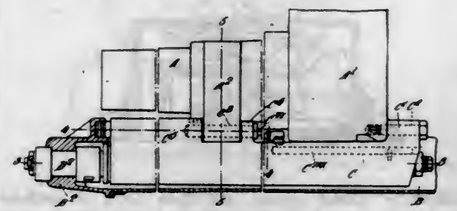
1,685,907. DEVICE FOR ELEVATING WATER. PAUL ARSÈNE CIROU, Tlemcen, Algeria. Filed Mar. 24, 1927, Serial No. 177,964, and in France May 6, 1926. 5 Claims. (Cl. 103—63.)



1. A device for elevating water comprising an endless belt, a plurality of buckets mounted on said belt, a casing surrounding a portion of said belt and adapted to fill said buckets when in the upright position and means in certain of said buckets for retaining a portion of their contents when inverted by said belt.

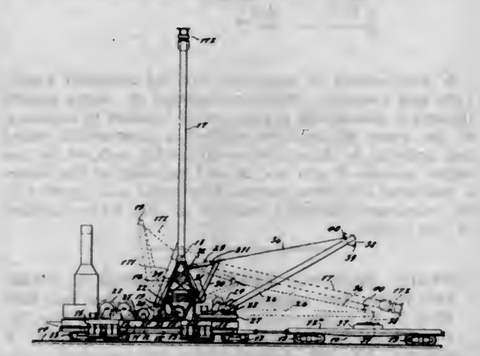
1,685,908. VANITY CASE. CHARLES N. CORYELL, Mamaroneck, N. Y., assignor to Scovill Manufacturing Company, Waterbury, Conn., a Corporation of Connecticut. Filed Mar. 3, 1925. Serial No. 12,825. 23 Claims. (Cl. 132—83.)

1. A vanity case comprising a two-part body member, each part having a dish shaped portion and a rim forming an annular channel therebetween, one of said parts having a bead secured to its rim and engaged over the rim of the other part, each part having a strip struck out across said channel joining said dish shaped portion and rim to form a hinge loop, and cover sections cooperating with said loops.



1,685,909. RECTIFYING DEVICE. NATHANIEL BANKS CROZIER, Chicago, Ill. Filed May 25, 1925. Serial No. 32,651. 3 Claims. (Cl. 250—31.)

1. A device of the class described comprising a receptacle adapted to support a detecting substance and a contact member adapted to be actuated to contact with said substance, a spring surrounding said member for holding the same in retracted position, and screw means adjustably supported above said member for engaging the same to contact position and means to prevent a complete revolution of said screw means.

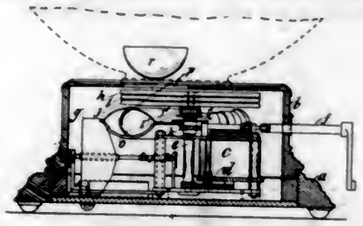


1,685,910. RECOIL AND RUN-OUT APPARATUS FOR ORDNANCE. ARTHUR TREVOR DAWSON and GEORGE THOMAS BUCKHAM, Westminster, London, England, assignors to Vickers Limited, Broadway, Westminster, England. Filed July 2, 1927, Serial No. 203,135, and in Great Britain Sept. 10, 1926. 11 Claims. (Cl. 89—43.)

1. In ordnance recoil and run-out apparatus for ordnance, the combination with a pneumatic recuperator cylinder and a recoil or brake cylinder the interior of which does not communicate with the interior of said recuperator cylinder, of a piston working in said recoil or brake cylinder, a separate piston working in said recuperator cylinder so as to compress the air therein during the recoil of the gun, and a rod of the latter piston made of large diameter and hollow to form a reservoir of the required volume to store the compressed air, the air from said recuperator cylinder passing to the interior of said hollow piston rod during the recoil of the gun and returning to said recuperator cylinder at the end of the recoil to act upon the second mentioned piston and effect the run-out of the gun.

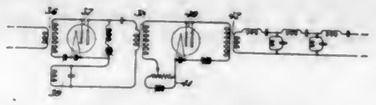
6. In ordnance recoil and run-out apparatus for ordnance, the combination with a pneumatic recuperator cylinder and a recoil or brake cylinder, a body in which said cylinders are formed and an upwardly extending piece on said body constituting a thrust member against which the rear surface of the breech ring of the gun bears.

1,685,911. OVERHEAD CABLEWAY SKIDDING AND LOADING EQUIPMENT. MERIAN H. DICKINSON, Seattle, Wash., and JOSEPH H. DICKINSON, Winter Park, Fla., assignors to Lidgerwood Manufacturing Company, New York, N. Y., a Corporation of New York. Filed Jan. 14, 1925. Serial No. 2,268. 7 Claims. (Cl. 212—46.)



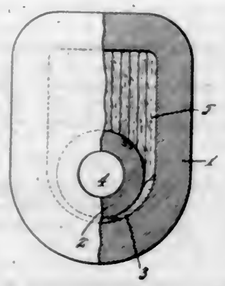
1. In combination, two movable platforms spaced from each other, each being mounted on trucks adapted to engage track rails, a hoisting boom mounted for horizontal movement on one of said platforms and pivotally mounted for movement in a vertical plane, and means for lowering said boom into supporting engagement with the other platform, a roller bearing being provided between said boom and said other platform.

1,685,912. APPARATUS FOR OBTAINING KALEIDOSCOPIC LIGHTING EFFECTS. ALFRED DUNHILL, London, England. Filed June 11, 1926, Serial No. 115,224, and in Great Britain Jan. 20, 1926. 2 Claims. (Cl. 240—49.)



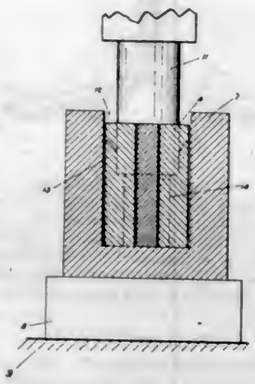
1. In a device of the kind described, a motor frame, a motor driven spindle supported therein, a series of concentric bushings nested one within the other on said spindle and having their ends in vertically spaced relation, gearing connecting the spindle and respective bushings to cause

the latter to revolve at different speeds from each other and from the spindle, a series of disks one of which is fixed on the spindle to revolve therewith and the others of which are fixed on respective bushings to revolve therewith, said disks being each provided with a series of transparent



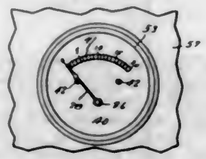
differently colored sectors, the disks being of uniform diameters, a casing covering said disks and having an opening therein to one side of the axis of the spindle and beneath which said disks rotate, and a light source supported within the casing beneath said opening.

1,685,913. RECORDING AND REPRODUCING OF SOUND WAVES. LLOYD ESPENSCHIED, Kew Gardens, N. Y., assignor to American Telephone and Telegraph Company, a Corporation of New York. Filed Dec. 17, 1919, Serial No. 345,591. Renewed Apr. 23, 1927. 24 Claims. (Cl. 179—100.1.)



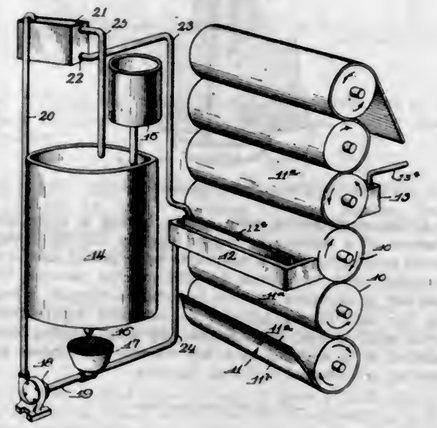
5. The method of correcting for the combined amplitude and resonance distortion suffered by waves passed through a phonograph system, which consists in imposing on the waves an amplitude distortion substantially equal and opposite to the amplitude distortion suffered by the waves because of said system, and imposing on the waves a resonance distortion substantially equal and opposite to the resonance distortion suffered by the waves because of said system.

1,685,914. ELECTRIC FURNACE. CHARLES B. FOLEY, Fort Wayne, Ind., assignor to Charles B. Foley, Inc., New York, N. Y., a Corporation of New York. Filed Mar. 13, 1920, Serial No. 365,632. Renewed Feb. 23, 1928. 8 Claims. (Cl. 266—1.5.)



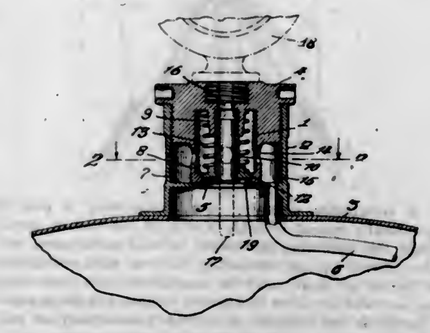
1. The process of making electric induction furnaces of the crucible type, which comprises reducing a refractory material to a finely divided state, fashioning the said material into a uniformly dense, highly compressed block, carving out the block to form half of a crucible, fashioning as an integral portion of the solid block near the bottom of the crucible portion, a tube having a constricted passage between the tube and the bottom and sides of the crucible, and uniting two blocks thus produced to form a complete furnace.

1,685,915. FABRICATION OF METALLIC THORIUM. WILLIAM BENJAMIN GERO, Bloomfield, N. J., assignor to Westinghouse Lamp Company, a Corporation of Pennsylvania. Filed May 25, 1926. Serial No. 111,516. 7 Claims. (Cl. 29—160.5.)



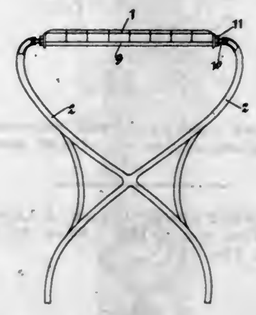
1. The method of compacting a rare refractory metal which comprises subjecting the metal in a coherent state to pressure and yieldingly restraining the flow of the metal while being pressed.

1,685,916. GAUGE. EDMUND E. HANS and ROBERT HENRY, Detroit, Mich., assignors to Walter M. Scott, Lakewood, Ohio, and Raleigh E. Tresise, Cleveland Heights, Ohio. Filed Apr. 20, 1925. Serial No. 24,389. 5 Claims. (Cl. 73—109.)



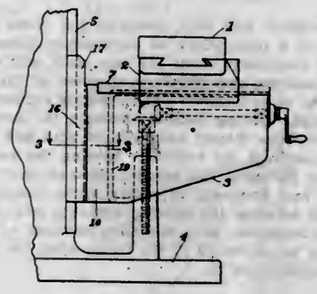
1. A gauge mechanism comprising an inlet nipple having a threaded portion and a reduced extension, a bracket carried by said reduced extension, a second bracket connected to and arranged in spaced relation to the first bracket, a spindle journaled in said brackets, an indicating needle connected to said spindle, a graduated dial disposed in operative relation to said indicating needle, stop pins disposed adjacent each end of the graduated portion of said dial, said stop pins serving to support said dial from the first mentioned bracket, a Bourdon tube having one end connected to said reduced extension, and means connecting the opposite end of said tube with said spindle, said means including a bendable element to provide a zero correction for said needle.

1,685,917. PROCESS FOR FINISHING AND COLORING PAPER AND PAPER MADE THEREBY. THOMAS HANS, Chicago, Ill., assignor to Container Corporation of America, Chicago, Ill., a Corporation of Delaware. Filed Feb. 21, 1927. Serial No. 169,856. 20 Claims. (Cl. 92—40.)



5. In the manufacture of paper from fluid, fibrous pulp, the process of introducing into and incorporating with the pulp only a part of the coloring matter required for the predetermined color tone and but part of the required sizing material, and of applying to the surface of the advancing paper sheet, after it has been dried but before it has been calendered, a thin liquid containing colored, paraffin treated tapioca powder.

1,685,918. CONDENSER. JOHN KARMAZIN, Detroit, Mich. Filed May 31, 1924. Serial No. 716,942. 6 Claims. (Cl. 220—24.)

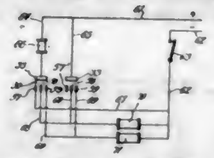


1. In an internal combustion engine radiator, a water chamber, a filling neck therefor, a ledge in said filling neck, an overflow tube projecting through said ledge and into said filling neck, a cap for said filling neck, a tubular projection on said cap adapted to form a fluid tight seal with said ledge, a valve in said projection, a spring normally holding the valve closed and a plurality of holes through the walls of said projection to permit fluid to flow from the water chamber through the same into the overflow tube when the valve is open.

1,685,919. BOW TROLLEY FOR ELECTRIC VEHICLES. ERWIN KRAMER, Berlin, Germany, assignor to Härtstoff-Metall Aktiengesellschaft (Hametag), Berlin-Copenick, Germany. Filed Nov. 7, 1925, Serial No. 67,546, and in Germany Nov. 11, 1924. 4 Claims. (Cl. 191—55.)

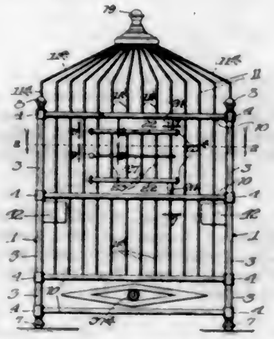
1. In combination with a bow-collector for street cars and the like, a sliding contact consisting of a porous body formed of powdered metal or metals of relatively light weight and graphite intimately and uniformly mixed therewith and compressed to the desired shape.

1,685,920. MACHINE-TOOL KNEE STRUCTURE. EDWARD J. KEARNEY, Wauwatosa, Wis., assignor to Kearney & Trecker Corporation, West Allis, Wis., a Corporation of Wisconsin. Filed Dec. 15, 1923. Serial No. 681,010. 5 Claims. (Cl. 90—58.)



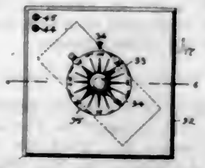
2. A machine tool knee structure having a slideway adapted to guide the structure for vertical movement, a plurality of side walls fixed with said slideway and extending in vertical planes, a channel thru said structure and having open ends, and a rib extending between said side walls to laterally strengthen both said walls and forming a closure for one side of said channel.

1,685,921. SELECTIVE CONTROL DEVICE. LESTER L. LADD, Chicago, Ill., assignor to Photometric Products Corporation, Chicago, Ill. Filed Nov. 8, 1920. Serial No. 422,561. 13 Claims. (Cl. 175—335.)



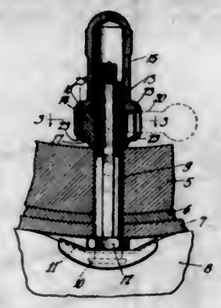
1. A selective control device comprising a controlling circuit, a set of contacts, a plurality of operating circuits electrically connected therewith, a second set of contacts arranged opposite said first set, a plurality of operating circuits electrically connected therewith, electro-magnets in certain of said operating circuits of each set, certain of said circuits having no electro-magnets therein and a movable contact making member operating between said sets of contacts and adapted to co-operate with any opposite

pair of said contacts to serially connect an operating circuit associated with one of said sets of contacts with an operating circuit associated with the other of said sets of



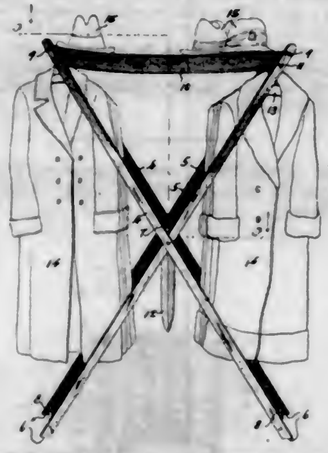
contacts to throw either two of said electro-magnets into operation simultaneously or one of said electro-magnets singly.

1,685,922. PARROT CAGE. LEWICKI J. LEON, West Chicago, Ill. Filed Nov. 6, 1925. Serial No. 67,229. 15 Claims. (Cl. 119—17.)



1. A portable bird cage, comprising a frame structure made up of a multiplicity of horizontally disposed units extending completely about the cage, each unit consisting of cross-members and couplings therefor at the adjacent ends of the cross-members and releasably connected therewith, upright spacing elements between the several units at the couplings thereof and engaged with and separated by said couplings for vertically spacing the units apart, means for clamping the spacing elements and couplings together, and upwardly extending wires making up the cage body between the spacing elements and having releasable connection with the cross-members so that the wires may be assembled in the frame after the latter has been completely set up.

1,685,923. WIRELESS SIGNALING APPARATUS. SAMUEL E. LEONARD, Jr., East Cleveland, Ohio. Filed Mar. 26, 1921. Serial No. 455,852. 1 Claim. (Cl. 250—11.)

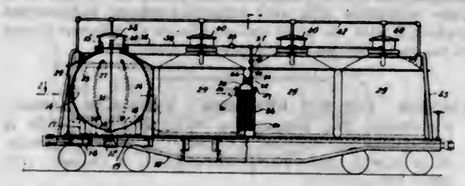


A wireless directional determining apparatus for use on ships, comprising a loop aerial adapted to be rotated manually, a compass card located upon the same axis as said loop aerial and means for rotating the compass card manually independently of said loop aerial and other points, and a calibration point moving into exact alignment with the ship's head or a point homologous to the ship's head to serve as a reference point with respect to said compass card.

1,685,924. TIRE-LOCKING DEVICE. MORSE C. LEE, Chicago, Ill. Filed Apr. 6, 1922, Serial No. 550,146. Renewed Jan. 28, 1924. 3 Claims. (Cl. 70—122.)

1. The combination with a tire having a valve stem thereon, of a member having an opening therein through which said valve stem is adaped to be projected, means for clamping said valve stem to said member movable into and out of clamping position by rotation thereof, a housing for said means mounted to normally rotate freely about said means, said means and said housing being adapted to be engaged by a key whereby said means and housing are adapted to rotate together.

1,685,925. COLLAPSIBLE GARMENT RACK. JOSEPH LINCK and ANNA JOEST, Newark, N. J. Filed Mar. 7, 1927. Serial No. 173,377. 5 Claims. (Cl. 211—178.)

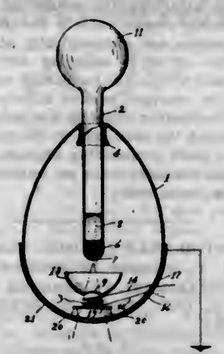


1. A collapsible garment rack, comprising a pair of longitudinally spaced foldable X-shaped end-frames, means to limit the unfolding movement of said end-frames, and means carried by and extending between said end-frames from which garments may be suspended, said suspending means and the adjacent end-frame members defining space for garments on hangers to extend transversely of said suspending means and beneath said limiting means.

1,685,926. MULTIUNIT TANK CAR. MAX MAURAN, Niagara Falls, N. Y., assignor to The Mathieson Alkali Works, Inc., New York, N. Y., a Corporation of Virginia. Filed Sept. 15, 1926. Serial No. 135,554. 20 Claims. (Cl. 105—360.)

1. In a car of the type described, the combination of a body, a plurality of tanks mounted at different points lengthwise of the body, means for supporting each tank

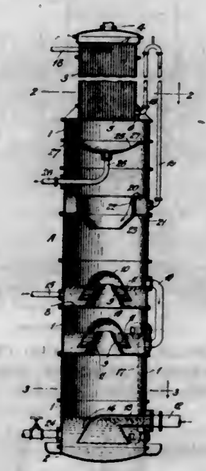
comprising a continuous cradle member extending around the lower end of the tank and carrying the tank, a plurality of legs supporting the cradle member and mounted



on the body, and means secured to the upper end of the tank for holding the latter in position on the cradle member.

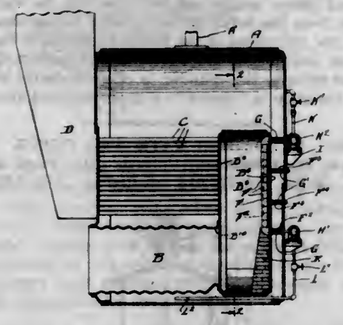
1,685,927. METHOD AND APPARATUS FOR FUELING SHIPS AT SEA. THOMAS SPENCER MILLER, South Orange, N. J. Filed Dec. 12, 1922. Serial No. 606,488. 16 Claims. (Cl. 137—78.)

15. The method of supplying oil from a fueling ship to a ship to be fueled which consists in suspending a hose between said ships at a plurality of points throughout the length thereof, applying tension at a plurality of points on the hose in a direction substantially longitudinal of it to oppose sagging therein and passing oil through the hose.



1,685,928. X-RAY TUBE. MONTFORD MORRISON, New York, N. Y. Filed June 9, 1921. Serial No. 476,155. 25 Claims. (Cl. 250—35.)

1. An X-ray device comprising an envelope of ovoidal configuration, an anti-cathode sealed in the small portion of said envelope and a cathode and focusing device disposed in the larger portion of said envelope, the shape of said envelope conforming substantially to the lines of force representing the electrical field between the cathode, focusing device and anti-cathode.

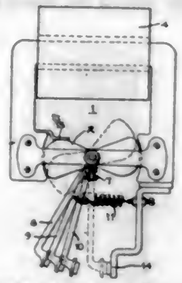


1,685,929. CAUSTICIZING UNIT. WILLIAM D. MOUNT, Lynchburg, Va. Filed Oct. 16, 1922. Serial No. 594,859. 9 Claims. (Cl. 23—283.)

1. In a causticizing unit, a casing, connections thereto by which one chemical may be passed through the casing, means for admitting the second chemical to the moving body of the first chemical, means for bubbling a hot gas through the moving mixture of chemicals to heat and agitate the mixture, and a heat interchange unit through one part of which the exhaust gas passes and through the

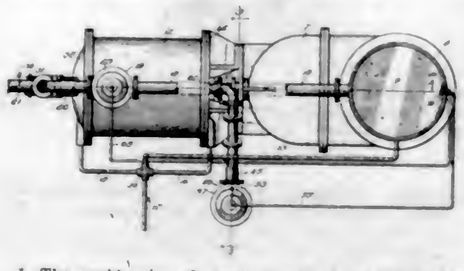
other part of which one of the ingoing chemicals passes out of direct contact with the exhaust gas so as to be heated preliminarily thereby.

1,685,930. SUPERHEATER FOR SCOTCH BOILERS. JOSEPH JOHN NELIS, Brooklyn, N. Y., assignor to Foster Wheeler Corporation, New York, N. Y., a Corporation of New York. Filed Feb. 28, 1924. Serial No. 695,679. 2 Claims. (Cl. 122—469.)



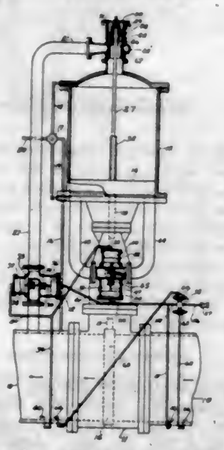
1. In a boiler of the type comprising an internal combustion chamber with a portion of the wall thereof separated from the boiler shell by a portion of the water space and stay tubes connecting said wall portion and shell, the improvement which consists in a superheater formed of tubular elements having body portions arranged to form a lining for a substantial part of said wall portion and having transversely extending supports connected to the body portions at intervals along their lengths and extending through said stay tubes.

1,685,931. ACCELERATING RELAY. NIELS K. ANDERSEN, Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Nov. 10, 1922. Serial No. 600,001. 2 Claims. (Cl. 200—104.)



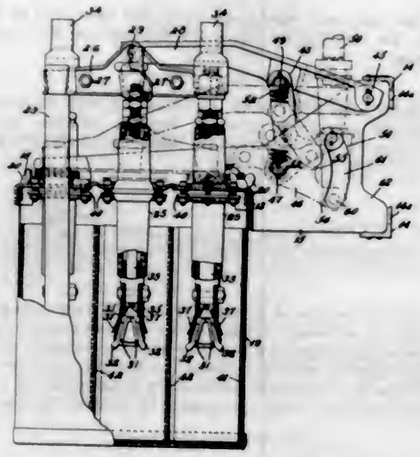
1. An accelerating relay comprising a rotatable armature and a shaft therefor, a plurality of fingers mounted

radially on the shaft in staggered relation to each other, movable contact members operated by the fingers, means



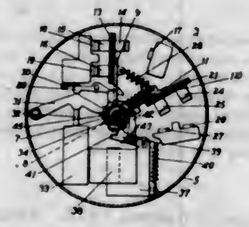
for separately biasing each of said fingers to a closed circuit position, a field-magnet winding for biasing said armature to actuate said fingers to an open circuit position.

1,685,932. HYDRAULIC GATE AND CHECK VALVE. WALTER B. ANDERSSON, Chicago, Ill. Filed Jan. 15, 1926. Serial No. 81,400. 4 Claims. (Cl. 137—139.)



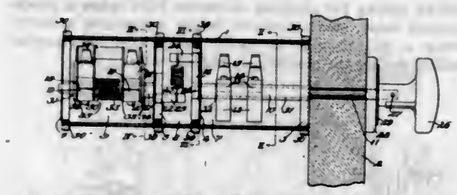
1. The combination of a main, a valve in said main, cylinder and piston mechanism for actuating the valve, connections from the main to the cylinder for manually controlling the movement of the piston by means of fluid from the main and means for automatically admitting water from the main to the cylinder to close the valve when the flow in the main is reduced to a predetermined amount.

1,685,933. HYDRAULIC GATE AND CHECK VALVE. WALTER B. ANDERSSON, Chicago, Ill. Filed Mar. 14, 1927. Serial No. 175,286. 5 Claims. (Cl. 137—139.)



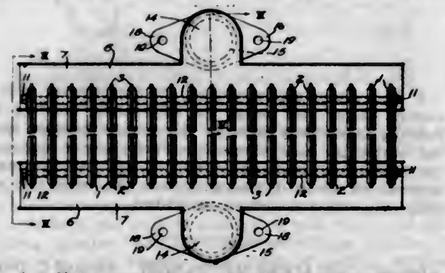
1. The combination with a water main, of a valve for closing the same, a cylinder and piston for actuating the valve, a connection from the main to the cylinder, valves for controlling the cylinder inlet and outlets, fluid operated means for actuating said valves, connections from the main to the fluid operating means, an outlet valve for said fluid operated means, means for actuating the outlet valve, pipes connected with said actuating means, and nozzles connected with the pipes and positioned at different points in the main, as and for the purpose described.

1,685,934. CIRCUIT BREAKER. ANDREW H. BAKKEN, Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed July 9, 1921. Serial No. 483,384. 6 Claims. (Cl. 200—153.)



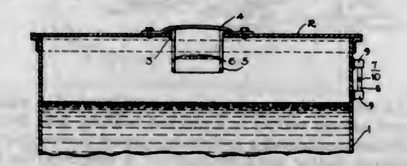
1. In a circuit breaker, the combination of a pressed metal supporting member provided with openings therethrough, insulating members extending through the openings, means for attaching the insulating members to the supporting member, means whereby the insulating and the supporting members are automatically aligned regardless of irregularities on their engaging surfaces, conductor members disposed within the insulating members and each provided with an enlarged portion adjacent to one end of its associated insulating member, the enlarged portion of the conductor and the said end of the insulating member being provided with cooperating engaging faces of such contour that the conductors are non-rotatable with respect to the insulating members.

1,685,935. MOTOR SNAP SWITCH. HAROLD G. BAXTER, Baldwin, N. Y., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Mar. 1, 1923. Serial No. 622,052. 22 Claims. (Cl. 200—89.)



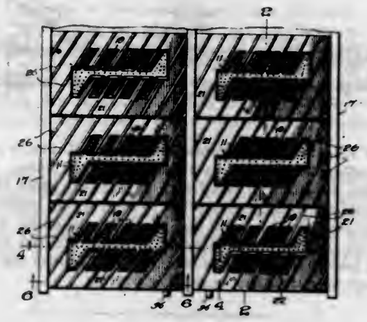
21. A motor-starting switch comprising a running switch, a starting switch, an electro-magnet for controlling the running switch connected in the running switch circuit and means for rendering the electromagnet operative at lower current values when the starting switch is open.

1,685,936. FIELD DISCHARGE SWITCH. JAMES M. BROWN, Pittsburgh, Pa., assignor to Westinghouse Electric and Manufacturing Company, a Corporation of Pennsylvania. Filed Jan. 23, 1920. Serial No. 353,405. 1 Claim. (Cl. 200—1.)



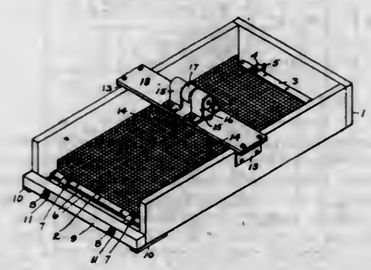
In an electric switching device, the combination with a holding member provided with two end compartments and one central compartment, of a switch member rotatably mounted in one of the said end compartments, a means external to the said holding member for operating the said switch member, an arm rotatably mounted in the central compartment and coacting with the said switch member, a second switch member rotatably mounted in the opposite end compartment, a second arm rotatably mounted in the said central compartment and coacting with the said second switch member, and a resilient means attached to the said arms for ensuring coaction thereof.

1,685,937. RADIATOR. WALTER M. DANN, Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Jan. 8, 1921. Serial No. 435,958. 4 Claims. (Cl. 257—191.)



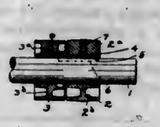
1. A radiator comprising a plurality of cooling elements each comprising a pair of complementary sections provided with outwardly extending channel portions, said channel portions being adapted to form tubular projections when said sections are secured together, and a plurality of header members communicating with said projections and off-set with respect to said cooling elements, whereby said header members are substantially without the area of vertical projection of said cooling elements.

1,685,938. INDICATING DEVICE. WALTER M. DANN, Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Sept. 23, 1922. Serial No. 590,207. 11 Claims. (Cl. 23—252.)



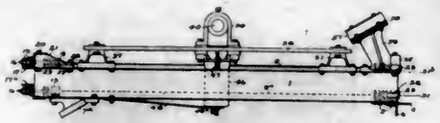
9. The combination with a container having therein a medium comprising a plurality of gases, of means for changing the relative proportions of said gases, and means controlled by said medium for indicating a condition of said first named means.

1,685,939. GRATE. ARTHUR W. DAYTON, Newark, Ohio. Filed July 24, 1926. Serial No. 124,746. 4 Claims. (Cl. 110—74.)



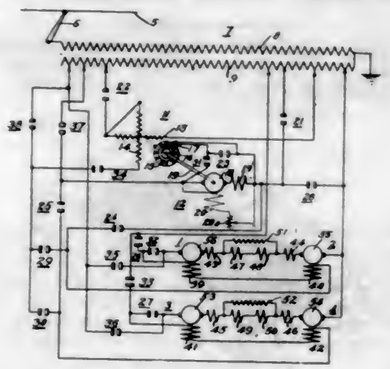
1. A grate comprising bearing members, a plurality of hollow stationary members, shafts secured to said stationary members and to said bearing members, rocking members pivotally mounted on said shafts and adapted to rock thereon, and means for rocking said rocking members.

1,685,940. VIBRATING SCREEN. EMIL DEISTER, Fort Wayne, Ind. Filed May 24, 1926. Serial No. 111,223. 2 Claims. (Cl. 209—346.)



1. The combination with a frame, a screening medium flexibly supported in tension on the frame, a flat elastic member rigidly secured to the frame, and extending transversely of the same, motion transmitting means secured to the elastic member and to the screening medium, and means mounted on and rigidly secured to the elastic member to vibrate said member and cause the said medium to vibrate independently of the frame.

1,685,941. VIBRATING MOTION-PRODUCING MECHANISM. EMIL DEISTER, Fort Wayne, Ind. Filed May 24, 1926. Serial No. 111,224. 3 Claims. (Cl. 74—14.)

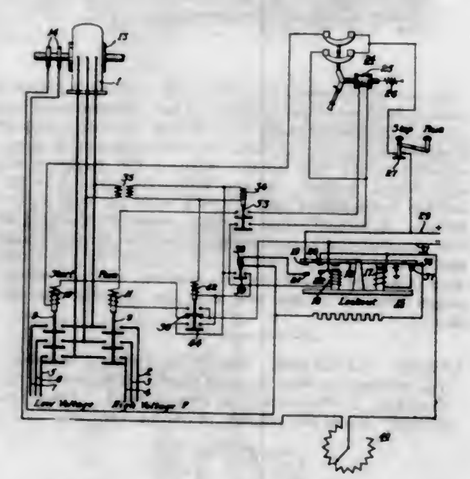


3. A mechanism to product vibratory motion comprising a revolubly mounted shaft, a pair of unbalanced members on the shaft one of which is secured to the shaft, a fixed member adapted to engage the other unbalanced member at any one of a plurality of peripherally spaced points for controlling peripheral adjustment of said unbalanced member on the shaft.

1,685,942. SCREENING MECHANISM. EMIL DEISTER, Fort Wayne, Ind. Filed May 24, 1926. Serial No. 111,225. 7 Claims. (Cl. 209—347.)

1. A vibrating screen comprising a main frame, a screening medium supported in tension on the frame, spring members mounted on the frame at opposite sides thereof, a transmitter member connected to each spring member and having engagement with the screening medium, a shaft revolubly supported in bearings rigidly secured to both spring members and means on the shaft to cause the spring members to vibrate as the shaft is rotated.

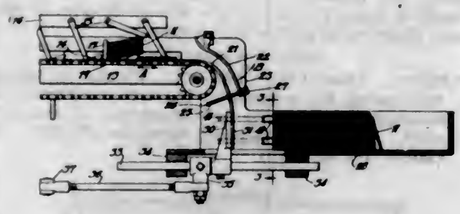
1,685,943. SYSTEM OF CONTROL. JOHN V. DOBSON, Forest Hills, and MAURICE F. JONES, Wilkinsburg, Pa., assignors to Westinghouse Electric and Manufacturing Company, a Corporation of Pennsylvania. Filed Apr. 27, 1922. Serial No. 556,828. 10 Claims. (Cl. 172—276.)



1. In a motor-control system, the combination with a plurality of motors, a plurality of supply sources of different kinds of electrical energy, and means for consecutively connecting said motors to said sources without rendering all of the motors simultaneously inoperative.

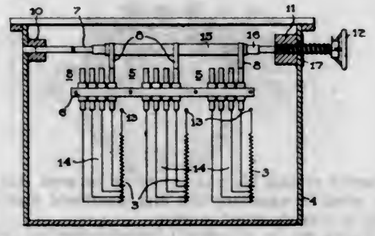
2. In a motor-control system, the combination with a dynamo-electric machine adapted to act both as a motor and a generator, of a plurality of sources of different kinds of electrical energy, means for consecutively energizing said motor from said sources, and means comprising a power-factor correcting device for governing said motor during the regenerative period.

3. In a motor-control system, the combination with a motor adapted for both acceleration and regeneration, of a source of alternating current for energizing said motor, means comprising a phase-converter for governing said motor during regeneration, and means comprising a generator for energizing said motor with direct-current during the starting period.



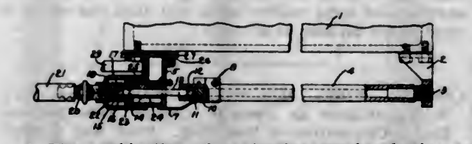
1,685,944. SYNCHRONOUS MOTOR STARTER. CHESTER W. DRAKE, Irwin, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed June 17, 1920. Serial No. 389,597. 7 Claims. (Cl. 171—118.)

1. In a motor control system, the combination with an alternating-current motor having a field-magnet winding and switching mechanism for establishing main starting and running connections for said motor, of means for energising said winding during normal operation of said motor, and automatic means for effecting the establishing of said running connections and the connection of said winding to said energizing means when the current traversing said winding during the starting operation falls below a predetermined value, said automatic means comprising a switch having a coil that is in circuit with said field-magnet winding during the starting operation only.



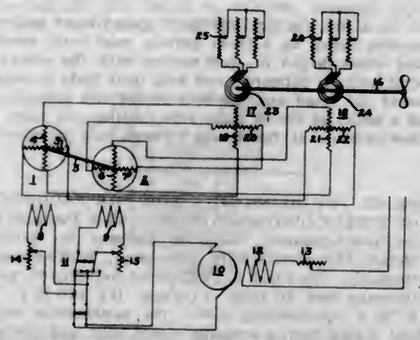
6. In a motor control system, the combination with an electric motor and means for establishing starting and running connections therefor, of manually-operable means for controlling said connections comprising a manually-operable switch and means operable to retain said manually-operable switch in its closed position only when said running connections have been established.

1,685,945. DELIVERY MECHANISM. NORMAN C. DRAKE, Brooklyn, N. Y., assignor to Redfield-Kendrick-Odell Co. Inc., New York, N. Y., a Corporation of New York. Filed Oct. 6, 1926. Serial No. 139,770. 5 Claims. (Cl. 271—87.)



1. A delivery mechanism for use with a machine adapted to eject printed matter in a stacked relation, said delivery mechanism comprising a receptacle adapted to receive stacks of printed matter one after another, a reciprocating head adapted to successively move the stacks of printed matter from one end of said receptacle towards the other end thereof, and relatively movable guiding elements for guiding the stacks of printed matter into said receptacle, one of said guiding elements being carried by said head.

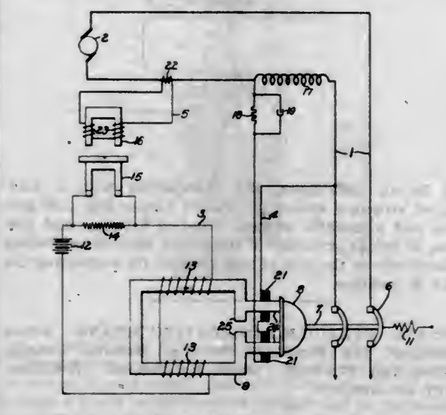
1,685,946. ELECTRICAL TRANSFORMER. ALFRED GEORGE ELLIS, Hale, England, assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed May 19, 1923, Serial No. 640,245, and in Great Britain June 20, 1922. 4 Claims. (Cl. 171—119.)



1. In a transformer structure, a casing, a plurality of windings therein, a plurality of stationary contact members connected to said windings, a shaft mounted in said casing, means for longitudinally moving said shaft at uniform speed during rotation thereof, and contact members mounted on said shaft for engagement with said stationary contact members.

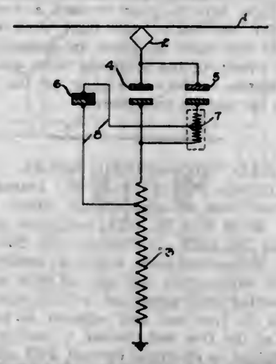
1,685,947. THERMOSTATIC CONTROL FOR IRONING MACHINES. HARRY D. ELSE, Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed May 15, 1924. Serial No. 713,437. 11 Claims. (Cl. 236—7.)

1. The combination of an ironing member having an opening therein for the passage of fluid, a valve for restricting said opening, a second member having a connection with said valve, said second member being operative on the movement of the ironing member in one direction to vary the relative position of said valve and said ironing member, said connection permitting rotation of said valve with respect to said second member without varying the relative longitudinal position of said valve and said second member.



1,685,948. SYSTEM OF CONTROL. ALLAN BERTRAM FIELD, Marple, England, assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Jan. 30, 1923, Serial No. 615,803, and in Great Britain Feb. 1, 1922. 5 Claims. (Cl. 172—237.)

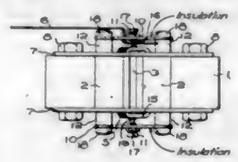
3. A system of control comprising a plurality of two-phase generators, a plurality of synchronous motors each having its phase windings connected to the respective windings of the several generators, and means for simultaneously reversing the excitation of one motor and one of said generators.



4. A system of control comprising a plurality of two-phase generators, a plurality of synchronous motors adapted to drive a common load and severally having their phase windings mutually cross-connected to the phase windings of the respective generators and means for reversing the excitation of one of said motors when the direction of operation of said load is to be reversed.

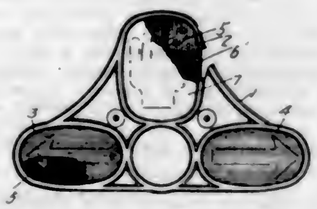
1,685,949. HIGH-SPEED CIRCUIT INTERRUPTER. CHARLES LE G. FORTESCUE, Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Dec. 11, 1922. Serial No. 606,142. 9 Claims. (Cl. 175—294.)

1. The combination with an electrical circuit, of a quick-acting circuit-interrupting mechanism comprising a magnetizable member, a coil for normally magnetizing the said member, an armature adapted to be attracted by said magnetizable member, bias means adapted to oppose said attraction, means responsive to sudden variations in said electrical circuit for controlling said magnetizable member, and means for de-magnetizing said member under overload in said electrical circuit.



1,685,950. CIRCUIT-INTERRUPTER SYSTEM. LLOYD J. HIBBARD, East Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed June 10, 1922. Serial No. 567,411. 8 Claims. (Cl. 175—294.)

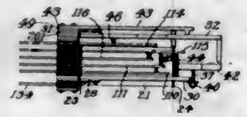
1. The combination with a transformer and a supply circuit therefor, of a main switch for interrupting the



flow of current to the transformer, a reactor in shunt relation to the main switch, an auxiliary switch between the reactor and the supply circuit, an auxiliary circuit connected across end turns of the transformer and including a portion of the reactor, and a switch for controlling the flow of current through the reactor.

1,685,951. INSTRUMENT STRUCTURE. PAUL MACGAHAN, Orange, N. J., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed July 17, 1926. Serial No. 123,204. 6 Claims. (Cl. 171—95.)

1. In an instrument, the combination with a field-magnet structure embodying spaced cooperating pole portions and a movable element disposed between said portions, of bridge structure of insulating material extending transversely to the axis of said element for supporting the same in position.

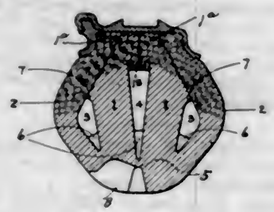


1,685,952. STENCILED INDICATING MEANS. ALLAN ROLAND PYE JOHNSON, Toronto, Ontario, Canada. Filed July 27, 1927. Serial No. 208,847. 3 Claims. (Cl. 40—135.)

3. An indicator adapted to be illuminated and comprising an inner transparent suitably colored sheet, means permitting light rays to pass through a portion of the sheet and for obstructing the light rays through the remainder of the sheet to form an opaque background and a sheet overlying the aforesaid sheet and of a color tending to merge or tone the color of the transparent portion into the opaque background.

1,685,953. ELECTROMAGNETIC RELAY. GEORGE ALBEN E. LUNDELL, New York, N. Y.; Jeannette Dolores Lundell executrix of said George Alben E. Lundell, deceased. Filed Mar. 21, 1921. Serial No. 453,958. Renewed Aug. 31, 1927. 3 Claims. (Cl. 200—103.)

1. In an electro-magnetic relay, a double pole-piece, an armature adjacent to one side of said pole piece, a spring retracting said armature, a stud secured to said armature at its free end and adapted to press against said spring at the free end thereof, a contact spring normally maintained in electrical contact with said retractive spring at a point between said stud and the rigid end of said retractive spring, a second armature adjacent to the opposite side of said pole piece, a spring retracting said armature, a stud secured to said armature and adapted to press against said spring, and a contact between said

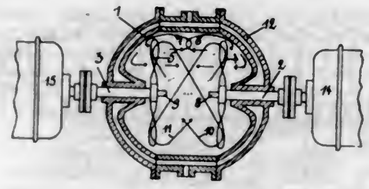


retractive springs for making contact between said springs at a point intermediate said first mentioned stud and the point of said electrical contact.

1,685,954. METHOD OF FIXING A THIN LAYER OF SPONGE RUBBER TO THE SURFACE OF INDIA-RUBBER GOODS. SATARO MORIMOTO, Minamikatsushika-Gun, Tokyo-Fu, Japan. Filed Apr. 14, 1927, Serial No. 183,907, and in Japan June 24, 1926. 1 Claim. (Cl. 18—53.)

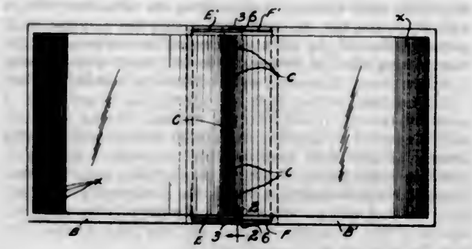
A method of fixing a thin layer of sponge rubber to the surface of india rubber goods, in which the india rubber solution obtained by dissolving unvulcanized india rubber in a suitable solvent and adding to this solution ordinary mixtures and the materials which convert ordinary india rubber into spongy rubber, is applied to the surface of unvulcanized india rubber goods and then the whole is cured by hot process, as set forth.

1,685,955. TIRE. MAX CYRUS OVERMAN, New York, N. Y., assignor to Overman Cushion Tire Company Inc., a Corporation of New York. Filed May 6, 1922. Serial No. 559,006. 13 Claims. (Cl. 152—1.)



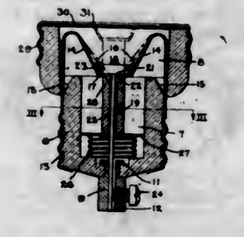
1. In a tire, the combination of spaced inner and outer members united by a tread portion, said outer members being elbow-shaped in cross-section with the elbows directed laterally outwardly and with their limbs converging toward the tread and the base of the tire respectively; and a series of spaced cross-webs uniting said inner and outer members at the spaces between said members.

1,685,956. WHIRLING MILL FOR THE PRODUCTION OF FINELY-DIVIDED POWDER. EMIL PODSZUS, Berlin-Friedrichshagen, Germany, assignor to Hartstoff-Metall Aktiengesellschaft (Hametag), Berlin-Copenick, Germany. Filed Oct. 8, 1923, Serial No. 667,163, and in Germany Sept. 21, 1923. 4 Claims. (Cl. 83—11.)



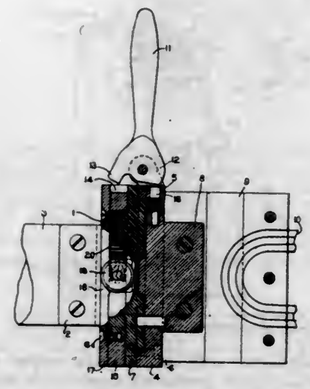
1. In a comminuting device, the combination with a closed casing having normally closed inlet and discharge openings, of rotatably journalled oppositely positioned air propellers adapted to revolve in opposite directions and

of a pitch to produce an axial thrust of the air within the said casing toward its center, thereby producing constantly mutually impinging rapid whirling air currents, said cas-



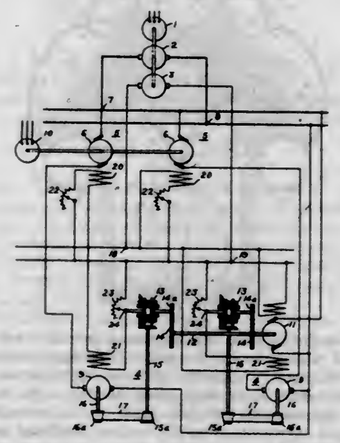
ing having recesses disposed rearwardly of the propellers comprising curved walls, and means for rotating the said propellers.

1,685,957. LOOSE-LEAF BINDER. ADOLPH RUBIN, St. Louis, Mo., assignor to Sieber Products Manufacturing Company, St. Louis, Mo., a Corporation of Missouri. Filed Aug. 16, 1926. Serial No. 129,416. 6 Claims. (Cl. 129—13.)



1. A loose leaf binder, comprising opposed leaf-clamping members, a guide attached to one of said members, a cooperating slide embraced by said guide and attached to the other leaf-clamping member, a locking device on said guide arranged so that when it is turned into a certain position it will exert sufficient pressure on said slide to prevent it from moving longitudinally of said guide, and means for limiting the turning movement of said locking device.

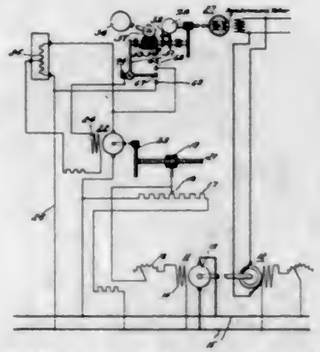
1,685,958. THERMAL CUT-OUT. MAURITS J. SANDIN, Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Jan. 23, 1923, Serial No. 614,378. Renewed Sept. 18, 1926. 11 Claims. (Cl. 200—123.)



1. In a cut-out for electric circuits, the combination with a pair of relatively movable terminal members and a thermally-responsive heating conductor releasably connecting the terminal members and adapted to open the circuit when the conductor attains a predetermined temperature, of a heat-absorbing member surrounding the conductor and influencing the heating characteristics of the conductor.

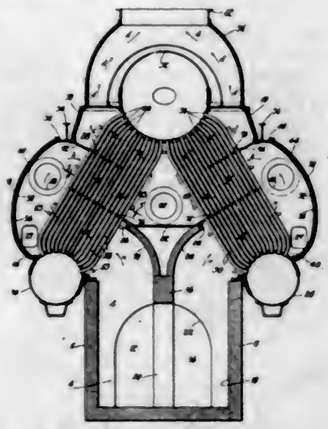
1,685,959. SWIVEL HEAD FOR COIL-PULLING MACHINES. LEE B. SCHMERBER, Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Mar. 5, 1923. Serial No. 622,842. 6 Claims. (Cl. 153—11.)

1. A swivel head for a coil-forming machine comprising a base member, a swivel member rotatably mounted thereon, means on said swivel member for engaging a coil to be formed, a finger on said swivel member and an adjustable stop member on said base member for engaging said finger.



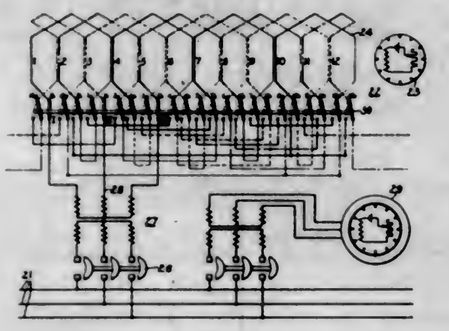
1,685,960. REGULATOR SYSTEM. FERDINAND SCHILLER, Berlin-Charlottenburg, Germany, assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Dec. 8, 1926, Serial No. 153,361, and in Germany Feb. 4, 1926. 12 Claims. (Cl. 172—293.)

1. A motor-control system comprising a plurality of driving motors, a plurality of boosters connected in series relation with said driving motors, a motor for driving said



boosters, a control motor, and means responsive to variations in speed between said control motor and the driving motors to vary the excitation to said driving motors and said boosters to maintain a substantially uniform speed of the driving motors.

1,685,961. FREQUENCY REGULATOR. BENJAMIN H. SMITH, Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Jan. 31, 1921. Serial No. 441,216. 41 Claims. (Cl. 172—293.)

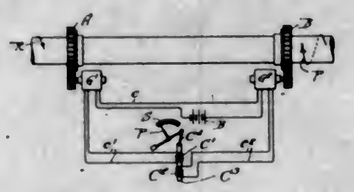


1. In combination with an alternating-current circuit, of a synchronous motor operatively connected to said circuit, master escapement means actuated by said motor, a differential device between said motor and said escapement means, and control means adapted to be operated in accordance with the movements of said differential device.

1,685,962. BOILER. WILLIAM W. SMITH, Jersey City, N. J. Filed Dec. 15, 1923. Serial No. 680,901. 1 Claim. (Cl. 122—7.)

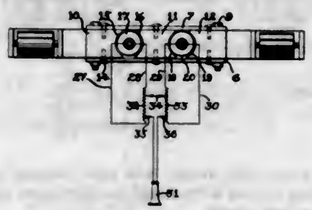
A boiler including in combination a pair of lower drums, a central wall between the latter, a steam header above said central wall, a plurality of banks of tubes connecting said lower drums and said steam header, baffle walls extending transversely of said tubes, roofs extending upwardly and outwardly from said central wall and terminating at said baffle walls, side walls parallel with said central wall terminating adjacent said lower drums, curved side shells forming outer walls opposite said tubes and a casing connected with said side shells enclosing part of said steam header and having a gas outlet formed therein.

1,685,963. ALTERNATING-CURRENT TRANSMISSION SYSTEM. MARVIN W. SMITH, Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Apr. 29, 1924. Serial No. 709,848. 17 Claims. (Cl. 172—237.)



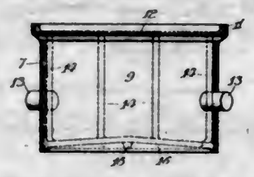
1. The combination with an alternating-current line, a dynamo-electric machine connected to said line and exciting means for said machine, said line being of such length and voltage that the line-charging current tends to additionally magnetize said machine and produce an excessive voltage rise, of means for, at times, decreasing the relative magnetizing effect of the armature current as compared to the magnetizing effect of the current in said exciting means and, at other times, increasing said relative magnetizing effect.

2. The combination with an alternating-current line, a constant-voltage dynamo-electric machine having an armature connected to said line and a field member and exciting means for said field member, the line current flowing in said armature being, at times, magnetizing and, at other times, demagnetizing, and means for so changing the characteristics of said machine as to vary the relative magnetic effects of the armature current and the field member current for currents of the same values.



17. The method of operating a long, high-voltage alternating-current line of substantially constant voltage at a terminal thereof, in combination with a dynamo-electric machine having an armature winding connected to said line at said terminal and also having a field-magnet member excited by direct current, the current in said armature winding having a magnetizing or demagnetizing reaction depending on its phase with respect to the voltage, which consists in so connecting the armature winding as to generate the maximum possible voltage when the armatpre reaction is demagnetizing and in changing the armature-winding connections in such manner as to reduce the armature reaction and require a larger excitation on the field member to produce the required voltage when the armature reaction is magnetizing.

1,685,964. ELECTRIC TORSION POWER METER. WILLIAM W. SMITH and ROBERT W. ERICKSON, Jersey City, N. J. Filed July 22, 1924. Serial No. 727,472. 4 Claims. (Cl. 265—26.)

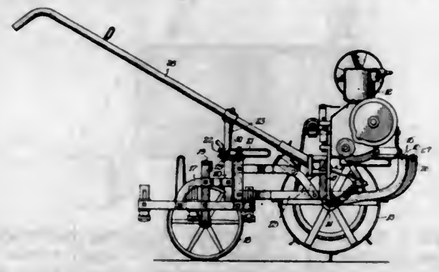


1. An apparatus of the class described comprising means for measuring torsion including two current producing members operatively connected to the member whose torsion is to be measured and an oscillograph for indicating the phase relations between the currents produced by said members whereby the torsion can be determined, said oscillograph being actuated by said currents.

1,685,965. MAGNETIC TESTING APPARATUS AND METHOD OF TESTING. THOMAS SPOONER, Edgewood Park, Pa., assignor to Westinghouse Electric and Manufacturing Company, a Corporation of Pennsylvania. Filed Sept. 27, 1922. Serial No. 590,813. 7 Claims. (Cl. 175—183.)

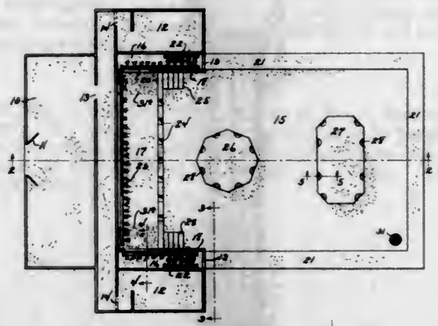
3. Apparatus for testing a piece of metal having a strained place, comprising means for passing a magnetic flux through said piece across said strained place and an adjacent unstrained place, a pair of magnetic yokes comprising contact members for simultaneously shunting off a portion of the magnetic flux through shunt paths of equal reluctances at both of said places, dynamo means for securing electromotive forces of rotation responsive to the fluxes in the respective shunt paths, and means for comparing said electromotive forces.

1,685,966. ANNEALING POT. ROBERT S. STEWART, Chicago, Ill., assignor to The American Brake Shoe & Foundry Company, New York, N. Y., a Corporation of Delaware. Filed Sept. 30, 1927. Serial No. 222,994. 3 Claims. (Cl. 263—49.)



1. An annealing pot having an excess of metal on the inside of each corner to reinforce and strengthen the corner and to compensate for oxidation and wear on the outside of the corner of the pot.

1,685,967. BURNER. WILLIAM J. SULLIVAN, Chicago, Ill., assignor of one-half to C. P. Mertens, Chicago, Ill. Filed Dec. 8, 1924. Serial No. 754,467. 5 Claims. (Cl. 158—74.)

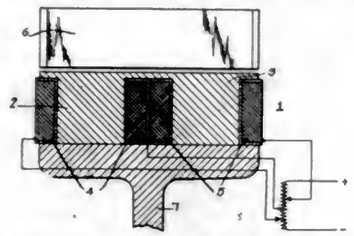


1. In a burner of the class described, a mixing chamber, a partition dividing the mixing chamber into chambers communicating about the periphery of said diaphragm, a nozzle connected with one of said chambers, means for supplying oil and steam to the other of said chambers and directing the steam and oil against said partition and an air supply pipe extending through said partition and into said nozzle.

1,685,968. TRACTOR AND HITCH CONSTRUCTION. CHARLES J. TRAVERS, Port Washington, Wis., assignor to Gilson Manufacturing Company, Port Washington, Wis., a Corporation of Wisconsin. Filed July 3, 1924. Serial No. 723,854. 4 Claims. (Cl. 180—19.)

1. In a power cultivator, power propelled ground engaging steering means, a main frame carried by said means, a wheeled tractor hitch, the wheels being controlled in direction by the hitch, a single pivot upon said main frame in advance of the ground enguging steering means and means connecting the hitch to said pivot, the hitch being free to swing in a horizontal plane about said pivot.

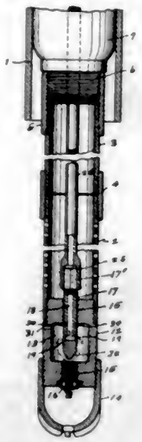
1,685,969. SWIMMING POOL. JOSEPH M. VIETTI, Clinton, Ind. Filed Aug. 1, 1927. Serial No. 209,896. 7 Claims. (Cl. 4—172.)



1. In a device of the character described, a swimming pool, check rooms adjacent said pool, wading pools between said check rooms and swimming pool, and showers guarding all passages from the wading pools to the swimming pool.

1,685,970. DYNAMO-ELECTRIC MACHINE. ROBERT TOWNEND, Chorlton-cum-Hardy, and JAN ARTHUR KUYSER, Sale, England, assignors to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Aug. 12, 1922, Serial No. 581,347, and in Great Britain Aug. 15, 1921. Renewed Apr. 16, 1928. 31 Claims. (Cl. 172—246.)

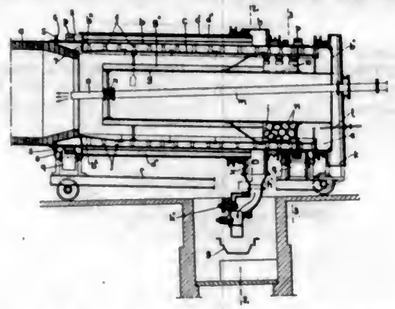
1. The method of preventing or restricting the rise of voltage in an alternator when employed for charging up electric transmission lines, said alternator having a stator member and a rotor member, which consists in causing magnetic saturation to occur at lower values of magnetomotive force in one of said members during the charging operation.



2. The method of operating a synchronous dynamo-electric machine connected to an alternating-current transmission line of such length and voltage that the line charging current tends to produce excessive rise in voltage during light-load operation, which consists in causing

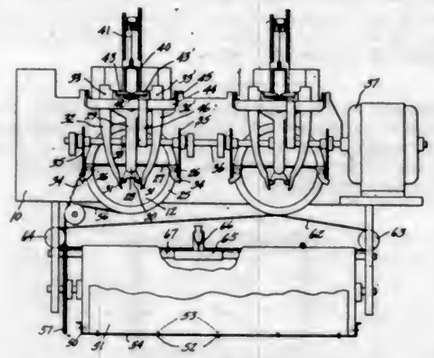
the machine to require a larger total excitation to maintain a given voltage during light-load operation of the line than during normal load operation.

24. A regulating system for an alternating-current synchronous generator which is adapted to supply a load of such a character that the excitation produced by the armature current is sufficient to cause the voltage of the generator to build up to an abnormal value, characterized by the fact that means are provided for varying the reluctance of the magnetic structure of the generator whereby the amount of flux produced by a given amount of armature current may be varied to regulate the voltage of said generator.



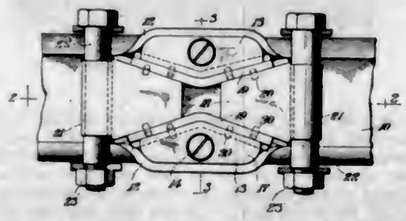
1,685,971. SCREEN-SETTING APPARATUS. JOSEPH DARK ADAMS, Beaumont, Tex. Filed Sept. 16, 1927. Serial No. 219,919. 7 Claims. (Cl. 166—20.)

1. The combination with a well screen, of means for closing the lower end thereof, said means including an anchor attached to the lower end of the screen and having a threaded bore, a downwardly opening back pressure valve controlling said bore a safety plug having a threaded connection with said anchor and having a fluid channel leading downwardly therethrough, from the upper end thereof, and terminating in a lateral port and through which fluid may pass from the interior of the screen through said bore, said plug being adapted to be screwed down into the bore to block both said port and bore.



1,685,972. ROTARY FURNACE. ERNST AMME, Brunswick, and KARL DIENST, Frankfort-on-the-Main, Germany, and DAVID J. UHLE, Allentown, Pa. Filed Feb. 25, 1927, Serial No. 171,029, and in Germany Jan. 31, 1927. 4 Claims. (Cl. 263—36.)

1. A rotary furnace comprising a rotary heating drum, heating means, a rotary cooling drum in axial alignment with said heating drum and removable therefrom, said cooling drum comprising a plurality of concentric cylinders having annular chambers provided between the same communicating respectively with the inner part of the cooling drum and with each other at opposite ends, elevating ribs

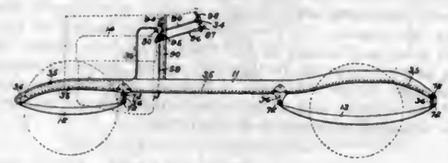


projecting from said drums into said annular chambers, disintegrating means within said cooling drum, and means for rotating said drums.

1,685,973. TESTING APPARATUS. ROLAND B. ALEXANDER and WILLIAM HOWARD ROWAN, Detroit, Mich. Filed May 23, 1925. Serial No. 32,374. 13 Claims. (Cl. 234—5.5.)

1. Means for recording comparative temperature effects upon two bodies comprising means for subjecting both bodies to gradual heating means for measuring the temperature of one body, means for measuring the differences in temperature between the two bodies, and means for producing a record indication showing the continuous variations of both said measured quantities.

1,685,974. TWO-RIM VEHICLE WHEEL. FREDERICK WILLIAM BAKER, Stourbridge, England, assignor to Trinity Wheel Corporation, New York, N. Y., a Corporation of New York. Filed Aug. 25, 1926. Serial No. 131,509. 5 Claims. (Cl. 152—36.)



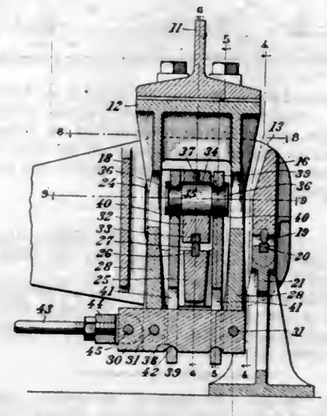
1. A vehicle wheel having spaced concentric rims, spaced abutments with oppositely inclined sides on one rim, abutments on the second rim wedging between those of the first rim and removably coupled to said second rim, and a yielding packing between the wedging abutments.

1,685,975. ALLOY. GEORGE H. BENDER, Detroit, Mich. Filed Apr. 4, 1927. Serial No. 181,004. 1 Claim. (Cl. 75—1.)

An alloy consisting in substantially the proportions herein set out, of—

	Parts.
Copper	70 3/10
Tin	24 53/100
Lead	5 2/10

1,685,976. LUBRICATING SYSTEM. FREDERICK C. BLANCHARD, Dorchester, Mass. Filed July 3, 1925. Serial No. 41,349. 10 Claims. (Cl. 184—7.)



1. In a lubricating system, the combination of an engine having bearings, an oil reservoir, a pump taking oil from said reservoir, bearings extraneous to said engine, an oil pressure indicator, and valve means having two positions, one in which said engine bearings and said indicator are in communication with the pump outlet and in which said indicator indicates the pressure of the oil being supplied to said engine bearings, and the other in which said extraneous bearings and said indicator are in communication with the pump outlet and in which said indicator indicates the pressure of the oil being supplied to said extraneous bearings to the exclusion of said engine bearings.

1,685,977. WIRE CUTTER AND STRIPPER. ALBERT BOLLERMAN, New York, N. Y. Filed Aug. 18, 1927. Serial No. 213,779. 1 Claim. (Cl. 81—9.5.)

A wire cutting and stripping implement comprising a pair of handles hinged together at one end and having inturned flanges at the other, cutting and stripping devices attached in opposed relation to said flanges, a screw stud fixed in one handle to extend towards the other, a hollow post fixed in the other handle to receive said stud, a nut adjustable on said stud, to limit the closing movement of the handles, a compression spring encircling said stud to normally press said handles apart, and a stop limiting the opening between said handles.

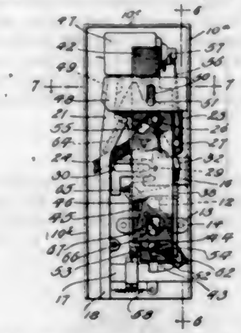
1,685,978. TRACK SCALE. ALFRED BOUSFIELD, St. Johnsbury, Vt., assignor to E. and T. Fairbanks and Company, St. Johnsbury, Vt., a Corporation of Vermont. Filed July 21, 1926. Serial No. 123,908. 6 Claims. (Cl. 265—71.)

1. In a scale, the combination with a lever having a vertical opening formed therein and a pivot spanning said opening, of a substantially triangular block mounted on said pivot and having oppositely projecting bearings near the apex thereof, a girder chair having legs straddling said block, and means suspended from the bearings in the said block for supporting the said chair.

1,685,979. LOUD SPEAKER. PORTER H. BRACE, Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Aug. 6, 1925. Serial No. 48,438. 5 Claims. (Cl. 179—117.)

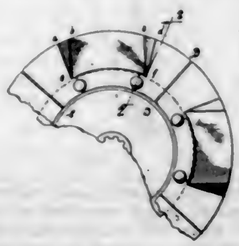
1. A telephonic receiver device comprising a relatively large circular trough shaped permanent magnet structure having magnetic poles upon opposite edges of the trough, a concentric pole piece attached to said magnet, and a movable coil positioned substantially concentric with said magnet and having a sound radiating diaphragm means attached thereto, the diameter of said radiating means being greater than five inches.

1,685,980. RAILROAD TIE. SAMUEL FREDERICK BROHMAN, Cochin, Saskatchewan, Canada. Filed May 19, 1927, Serial No. 192,735, and in Canada May 11, 1927. 2 Claims. (Cl. 238—62.)



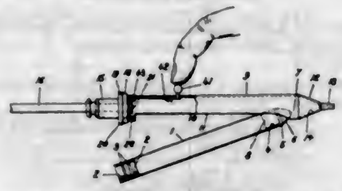
1. A railroad tie comprising a substantially hollow body portion, a cover plate for the body portion formed with a transverse groove adjacent each end to engage with rails, clamping plates on each side of the rails, and securing bolts extending through said plates, the cover and the body portion.

1,685,981. COMPOSITION OF MATTER. DANIEL C. BAUCE, Nashville, Tenn. Filed July 29, 1926. Serial No. 125,828. 2 Claims. (Cl. 106—8.)



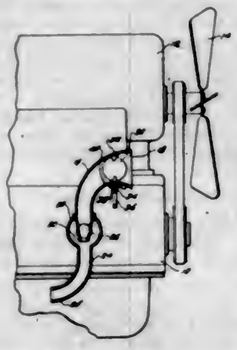
1. A filling composition consisting of an admixture of a soap jelly, a starch dextrin paste including borax, glycerine and oil of cloves, and comminuted fibrous material in the proportions specified.

1,685,982. LOCK. RALEIGH B. BUZZAIRD, Maplewood, N. J. Filed Oct. 6, 1925. Serial No. 60,914. 10 Claims. (Cl. 70—6.)



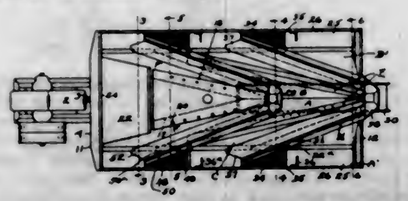
1. In a lock, the combination of a main bolt, an auxiliary bolt, key-actuated mechanism for concurrently operating the bolts in relatively opposite directions and means whereby the auxiliary bolt is automatically brought back into unlocking position when the main bolt is in final unlocking position.

1,685,983. CLUTCH PLATE. HAROLD D. CHURCH, Cleveland, Ohio, assignor to General Motors Corporation, Detroit, Mich., a Corporation of Delaware. Filed Mar. 29, 1926. Serial No. 98,266. 11 Claims. (Cl. 192—107.)



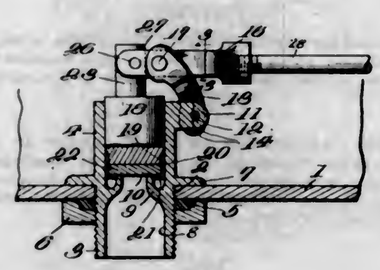
1. A clutch plate member of segmental shape having an intermediate portion in the form of a plane surface positioned at an angle to the common plane of the end portions and the inner edge.

1,685,984. SYRINGE. JULES COURNAND and RENÉ COURNAND, Paris, France. Filed Mar. 5, 1926, Serial No. 92,559, and in France Mar. 17, 1925. 8 Claims. (Cl. 128—218.)



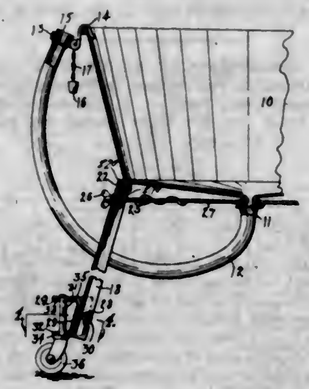
1. A syringe, comprising, in combination, an elongated recessed rigid body, with the front end of the recess of frusto-conical shape, a nozzle at the front end of the body, an elongated cylindrical capsule for containing liquid to be injected, an opening in the body permitting the capsule to be removably housed within the recess of the body, front and rear resilient stoppers hermetically closing the capsule, the front stopper being shaped to have its front part snugly fit the front end of the recess and to be perforated by an injection needle, means to engage the rear stopper and push it forward to drive liquid out of the capsule, and a spring actuated knob on the body for starting withdrawal of the capsule.

1,685,985. CRANK-CASE-VENTILATOR SHUT-OFF VALVE. CLINTON H. DEARBORN, Hampton, Va., assignor to A C Spark Plug Company, Flint, Mich., a Corporation of Michigan. Filed Sept. 6, 1927. Serial No. 217,713. 5 Claims. (Cl. 123—171.)



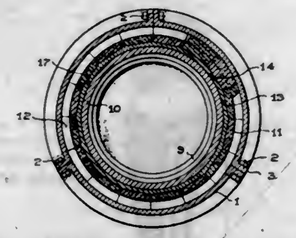
1. In combination with an internal combustion engine including a crankcase, means operated by the flow of air past said engine for drawing air from the crankcase, and means operated by an increase in the rate of flow of the air for reducing the normal increase in the amount of air drawn from said crankcase.

1,685,986. CONCENTRATING TABLE. EMIL DEISTER, Fort Wayne, Ind. Filed May 21, 1925. Serial No. 31,769. 8 Claims. (Cl. 209—441.)



1. A concentrating table comprising a deck transversely inclined and inclined downwardly from its head end toward its foot or discharge end, means to reciprocate the deck longitudinally, a series of upwardly inclined stratifying launders on the declined surface of deck and diagonally disposed relatively to the line of reciprocation of the deck, the bottom of each launder projecting laterally from said declined surface and being substantially level transversely, means to feed dressing water to each stratifying means, and means to feed materials to be treated to the deck adjacent the head end thereof, the inclination of each stratifying means being in a direction opposed to the said inclination of the deck.

1,685,987. FLOAT VALVE. EDWARD L. DELANY, Brooklyn, N. Y., assignor to Delany Realty Corporation, Brooklyn, N. Y. Filed Jan. 17, 1925. Serial No. 3,127. 2 Claims. (Cl. 137—104.)



1. A float valve comprising a casing, a valve therein extending beyond the casing and having one side cut away, a float lever pivotally connected to the valve, and a compensating arm pivoted to the casing and extending upwardly over the valve and pivoted to the float lever very close to the pivotal connection between the float lever and the valve.

1,685,988. TUB STAND. FRANK J. DULTMEIER, Des Moines, Iowa, assignor to Dulco Manufacturing Company, a Corporation of Iowa. Filed Nov. 8, 1926. Serial No. 147,095. 2 Claims. (Cl. 68—31.)

1. In a tub stand, a plurality of legs, braces for holding them in spaced relation, a flexible member connected with the upper end of one leg, having a slidable connection with the upper ends of the other legs, a tub supported on and between the legs, and means for tightening the flexible member for causing the legs to grip the tub.

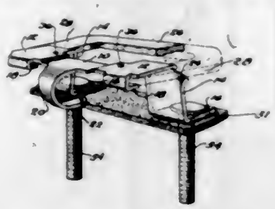
1,685,989. GEAR-GRINDING HOB. GEORGE M. EATON, Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Nov. 12, 1923. Serial No. 674,418. 6 Claims. (Cl. 51—206.)

1. An abrasive device comprising a hub, a plurality of abrasive members each having a gear tooth face, said members being angularly disposed to constitute a cylinder with the teeth constituting helices, a plurality of strands of band wire helically wound in the tooth spaces and means for securing the bands to said hub.

1,685,990. FLY SWATTER. WALTER H. A. EMANUEL, Fairchild, Wis. Filed Oct. 14, 1926. Serial No. 141,582. 2 Claims. (Cl. 306—1.)

2. In a fly swatter of the class described, a swatter head, a pair of parallel spaced relatively elongated rods extending longitudinally from the inner edge of the swatter head, a relatively elongated tube within which the free ends of the rods are adapted for disposition, a separating member carried by only one of the rods and slidable therealong for expanding the rods at a point directly adjacent the inner end of the tube when said separating member is disposed in one position, the separating member further permitting the rods to be moved outwardly of the tube when said separating member is disposed in another position remote from the inner end of the tube.

1,685,991. LEGGING. CARL ARVID ERICKSON, Detroit, Mich. Filed July 14, 1926. Serial No. 122,380. 2 Claims. (Cl. 36—2.)

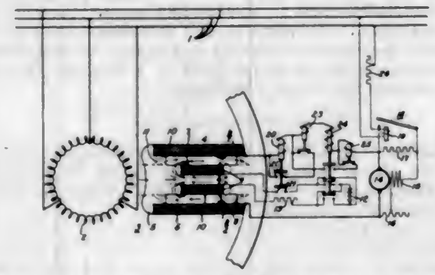


1. A garment of the class described adapted for mounting on a leg comprising a pair of leg covering members; an elastic strip connecting the rear edges of said covering members; a tongue projecting outwardly from the lower end of the forward edge of each of said covering members, said tongues being suitably secured together, the remain-

der of the forward edge of said covering members being detached from each other; an elastic strip mounted on the forward edge of each of said covering members; fastening means mounted on said elastic strips for retaining the edges of said elastic strips in close relation, all of

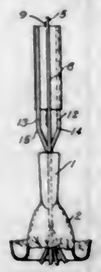
said elastic strips being transversely and longitudinally stretchable for effecting a molding of said covering members to conform to the shape of the leg and to retain the same in close engagement with the leg and for preventing sagging of said covering members on the leg.

1,685,992. AMMETER FRAME. JESSE E. ESHBAUGH, Flint, Mich., assignor to A C Spark Plug Company, Flint, Mich., a Corporation of Michigan. Filed Nov. 30, 1927. Serial No. 236,761. 8 Claims. (Cl. 171—95.)



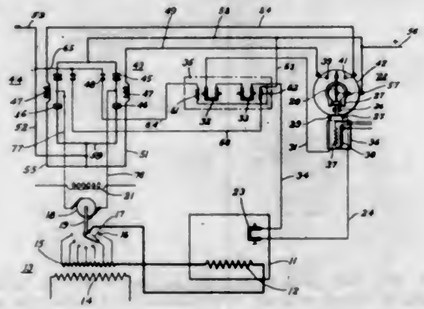
8. In an ammeter, a metallic conductor frame comprising a central portion and side wings each having a portion bent at an angle therewith, the metal of said wings being cut on each outer side and bent back to form a slot, a horseshoe magnet having converging arms, each arm fitting within a slot, and means for holding said magnet against displacement comprising a bent over portion of said frame.

1,685,993. STABILIZATION OF TRANSMISSION LINES. CARL J. FECHHEIMER, Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Jan. 23, 1923. Serial No. 614,371. 12 Claims. (Cl. 172—237.)



2. The combination with an alternating-current transmission line, of a synchronous dynamo-electric machine connected thereto and a voltage-responsive mechanism for limiting the voltage thereof, said mechanism comprising means for variably exciting said machine from a maximum value to a predetermined minimum value and means operable upon the occurrence of said predetermined minimum value for varying the reluctance of the magnetic circuits of said machine.

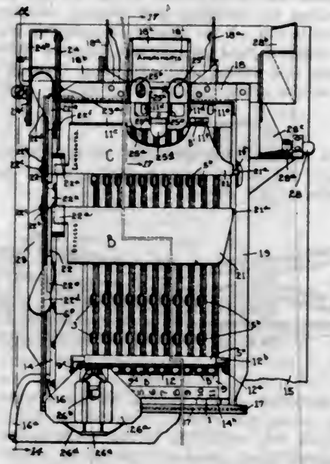
11. The combination with a synchronous dynamo-electric machine and a long transmission line connected to said machine, of an exciter for said machine, voltage-responsive means for regulating the exciter current, and electro-responsive means for automatically changing the ratio between the combined exciting ampere-turns of field and ar-



mature and the terminal voltage of the machine in response to conditions which would otherwise have necessitated a reduction of the exciter current below a predetermined value.

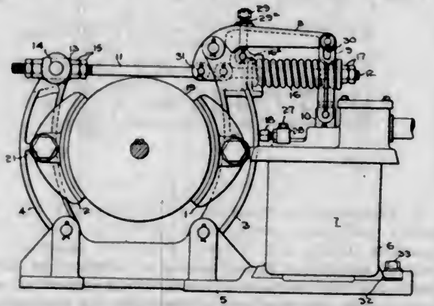
1,685,994. RADIO VACUUM TUBE. HUBERT M. FREEMAN, East Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Jan. 8, 1924. Serial No. 684,981. 3 Claims. (Cl. 250—27.5.)

1. In a vacuum tube device, a press, a cylindrical plate, two standards mounted in said press and secured to said plate along elements of the cylinder, the plane of said elements being at an oblique angle to the plane of said press.



1,685,995. TEMPERATURE REGULATOR. HARLAN S. GANO, Pittsburgh, Pa., assignor to Westinghouse Electric and Manufacturing Company, a Corporation of Pennsylvania. Filed Oct. 23, 1925. Serial No. 64,363. 10 Claims. (Cl. 236—68.)

1. A temperature control system comprising a contact-making member, an actuating coil therefor, a main thermo-couple, subjected to the temperature to be controlled, for



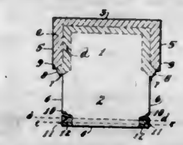
energizing said actuating coil, and an auxiliary thermo-couple, energized in accordance with the position of said contact-making member, for preventing hunting of said system.

1,685,996. BALLOT MARKER AND SETTER. EUGENE GREGORY, Ann Arbor, Mich., assignor of one-tenth to Edward H. Saier, Lansing, Mich. Filed Jan. 25, 1923. Serial No. 614,787. 35 Claims. (Cl. 235—53.)

1. In voting means of the character described, a ballot-marker provided with a plurality of grooves, members adjustable in said grooves, and means whereby the members may be locked in adjusted positions in the grooves, substantially as described.

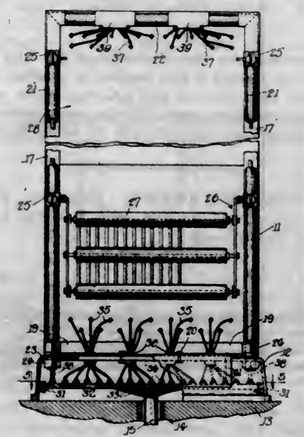
1,685,997. ELECTROMAGNETIC BRAKE. GUSTAF A. HALFVERSON, Verona, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed July 24, 1925. Serial No. 45,741. 3 Claims. (Cl. 188—171.)

3. In an electromagnetic brake, the combination with a pair of brake shoes and a brake wheel, of a pair of arms for supporting said shoes, an operating lever mounted on one of said arms, a spring for biasing said lever, an electromagnet for opposing said bias, and a bolt mounted on said arm for locking said lever to said arm and to further bias said spring independently of said magnet.



1,685,998. DOUBLE-ACTING DOOR LATCH. CARL JOHN HAGSTROM, Glen Cove, N. Y. Filed May 20, 1927. Serial No. 192,823. 5 Claims. (Cl. 292—18.)

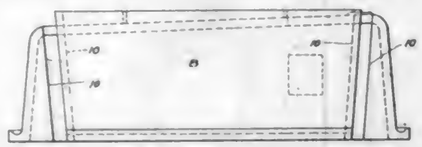
1. In a device of the class set forth, the combination with two members adapted to be moved as to open position, of catch mechanism co-operating with said members, permitting either of the members to be moved, said catch mechanism having means actuated by the member moved to render it positively impossible for the second member to be moved after the first has been moved, said means in-



cluding a catch on the first mentioned member to keep the same closed, an actuator operated by said catch on moving said member, and means actuated by said actutor to lock the second member.

1,685,999. ROOFING SHINGLE. WILLIAM A. HARRIS, Boston, Mass., assignor to The Flintkote Company, Boston, Mass., a Corporation of Massachusetts. Filed Feb. 27, 1925. Serial No. 11,968. 8 Claims. (Cl. 108—7.)

1. A flexible roofing shingle having parallel ends and parallel sides, the upper portion which is substantially one half the length of the shingle being wider than the lower portion, and defined therefrom by a pair of shoulders on each side parallel to the ends, one shoulder extending inwardly from the side edge of the upper portion to a short intermediate edge and the other shoulder extending inwardly from the intermediate edge to the side edge of the lower portion, and the lower portion having notches cut near its extremity to form tabs laterally extending a distance equal to the perpendicular distance between the side edges of the upper and lower portions.

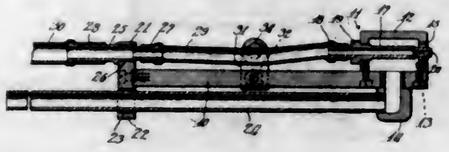


1,686,000. CONTROL BOARD FOR ELEVATORS. FRANK A. HECHT, Jr., Chicago, Ill., assignor to Kaestner & Hecht Company, Chicago, Ill., a Corporation of Illinois. Filed May 26, 1924. Serial No. 716,078. 8 Claims. (Cl. 175—298.)

1. A control panel board comprising, in combination, a closed base open on its lower side and having a removable cover, a supporting frame mounted on said closed base

and comprising a pair of hollow tubular standards, a vertical panel secured to the front of said frame for supporting a plurality of electrical devices, a terminal board mounted within said base and supporting a plurality of terminal binding posts, an incoming electrical conduit extending into said base from below and having its wires connected to said binding posts, a plurality of lead wires attached to certain of said binding posts and extending directly out of said base to the lower portion of said panel, and a plurality of lead wires attached to others of said binding posts and passing through said hollow standards to the top of said frame from where they are distributed to the electrical devices on the upper portion of said panel.

1,686,001. PATTERN FOR BATHTUBS. HENRY E. HENRICKS, Beaver, Pa., assignor to The United States Sanitary Manufacturing Company, Pittsburgh, Pa., a Corporation of Pennsylvania. Filed Sept. 30, 1925. Serial No. 59,530. 18 Claims. (Cl. 22—158.)

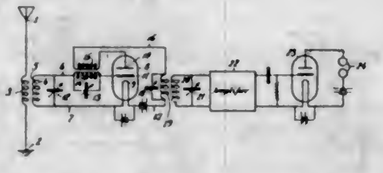


1. A pattern for a bath tub having a shield portion which is an extension of a tub wall, including a tub body portion and a shield portion, co-planar with a wall of the body portion, the shield portion being relatively movable with respect to the body portion to a position substantially outside the mold portion formed by the pattern.

1,686,002. EYEGLASS HOLDER. JACOB S. HERZON, Detroit, Mich. Filed June 11, 1925. Serial No. 36,308. 3 Claims. (Cl. 206—5.)

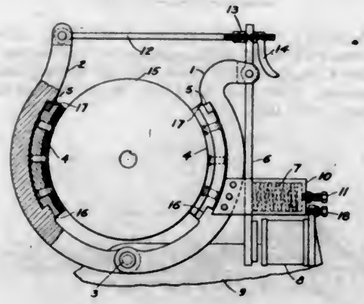
1. A receptacle for eye glasses and the like including a forward wall having a slot therein in position to permit access to the nose piece of eye glasses therein, and securing means pivotally secured to the receptacle in alignment with said slot, and adapted to swing therethrough.

1,686,003. SPRAYING DEVICE. ARNOLD H. HOTTINGER, Chicago, Ill. Filed Apr. 3, 1925. Serial No. 20,322. 3 Claims. (Cl. 91—45.)



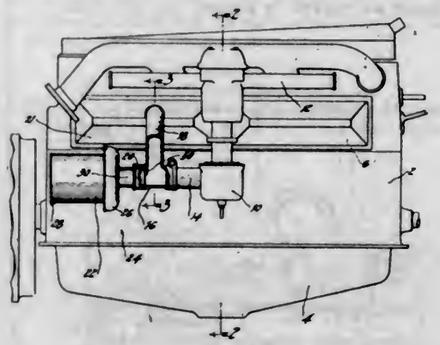
1. A spraying device having, in combination, a flat base plate, a closed hollow casing mounted on one end of said plate, a plurality of paint nozzles extending through said casing, each nozzle being threaded into the rear wall of said casing and having a restricted passage extending through the front wall of said casing, said casing being formed in its front wall with means for discharging pressure fluid about said nozzles, a bracket secured to the other end of said plate and extending on opposite sides thereof, a plurality of paint conduits rigidly mounted on said bracket at one side of said plate, a plurality of flexible conduits connecting said first mentioned conduits to said nozzles, and lying closely along said one side of said plate, means for pressing said flexible conduits against said plate to cut off the supply of paint to said nozzles, and a pressure fluid supply line opening through said plate into said casing and extending through said end bracket at the other side of said plate.

1,686,004. SPRAYING DEVICE. ARNOLD H. HOTTINGER, Chicago, Ill. Filed Apr. 3, 1925. Serial No. 20,323. 12 Claims. (Cl. 91—45.)



1. A spraying device having, in combination, a base plate, a casing mounted on one end of said base plate, a truncated cone extending through said casing and having a plurality of passages converging closely together at the front end, said casing having a plurality of ports formed in its front wall about the front end of said cone, means for supplying the material to be sprayed to said passages, and means for supplying pressure fluid to said casing.

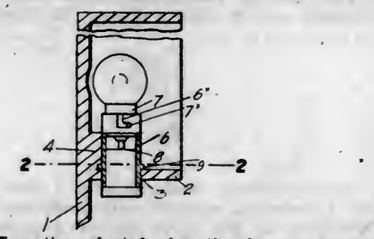
1,686,005. WAVE SIGNALING SYSTEM. HARRY W. HOUCK, East Orange, N. J., assignor, by mesne assignments, to Westinghouse Electric & Manufacturing Company, East Pittsburgh, Pa., a Corporation of Pennsylvania. Filed Mar. 3, 1923. Serial No. 622,521. 4 Claims. (Cl. 250—20.)



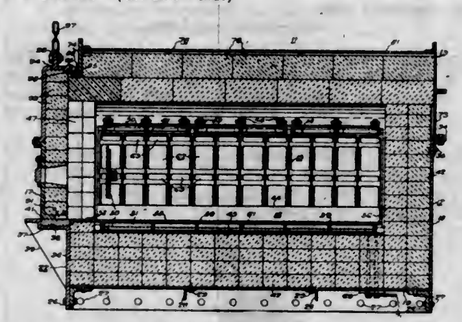
1. Apparatus for receiving and amplifying a high frequency oscillatory energy and producing energy corresponding thereto and of lower frequency, comprising an electron discharge device having a cathode, an anode and a control electrode, a tuned circuit associated with said control electrode and determining the fundamental frequency of said electron discharge device as an oscillator, a second circuit also associated with said control electrode and tuned to the frequency of said high frequency oscillatory energy, a tuned circuit associated with the anode of said electron discharge device, the apparatus having such a degree of feed-back that harmonics of said fundamental frequency will be present in the energy impressed upon said control electrode, one of said harmonics differing from said high frequency oscillatory energy by the frequency to which said tuned circuit associated with the anode is resonant, whereby the rectifying action by which the said harmonic and the high frequency oscillatory energy are caused to produce energy of a low frequency is performed by the same discharge device which produces the harmonic.

1,686,006. ELECTROMAGNETIC BRAKE. CHARLES JARLOW, East Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Nov. 10, 1922. Serial No. 599,997. 5 Claims. (Cl. 188—171.)

4. An electromagnetic brake comprising a pair of independently movable brake arms, a stationary magnet-coil, an armature member pivotally mounted on one of the brake arms for actuating said arms and a spring carried on one of said brake arms for biasing the armature member to oppose the action of said magnet coil.



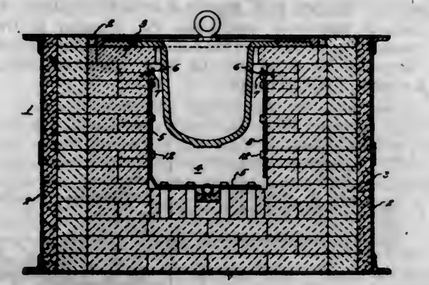
1,686,007. CRANK-CASE-VENTILATING SYSTEM. ROBERT K. JACK, Lansing, Mich., assignor to General Motors Corporation, Detroit, Mich., a Corporation of Michigan. Filed Aug. 23, 1926. Serial No. 131,064. 3 Claims. (Cl. 123—119.)



1. The combination of an engine provided with a crankcase and a carburetor, a conduit for supplying air to the carburetor, an air inlet for the crankcase, a conduit connecting the crankcase with said first named conduit for supplying crankcase vapors to the carburetor, and a baffle at the junction of said conduits for restricting the flow of air through the first named conduit to increase the aspirating effect on said second named conduit.

1,686,008. LOCKING DEVICE FOR BULB SUPPORTS OF DIRECTION INDICATORS. ALLAN ROLAND PYE JOHNSON, Toronto, Ontario, Canada. Filed Mar. 19, 1928. Serial No. 262,787. 1 Claim. (Cl. 177—329.)

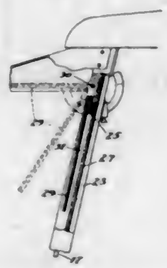
The combination with two wall portions set at right angles one to the other, one of said portions having an orifice therein, a recess formed in the other wall portion adjacent the orifice, a sleeve forming a support for an incandescent bulb and coacting contacts and fitting the aforesaid orifice and provided with an annular flange having a cut off portion adapted when the sleeve is turned to permit the flange thereof clearing the recess to permit of the withdrawal of the sleeve.



1,686,009. ELECTRIC FURNACE. ALVIN D. KEENE, West Mansfield, Ohio, assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Sept. 24, 1926. Serial No. 137,481. 4 Claims. (Cl. 266—1.5.)

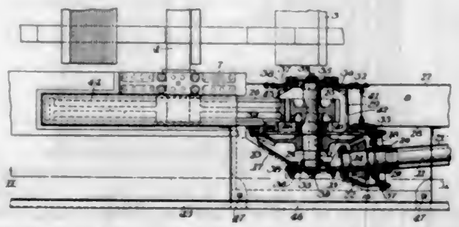
1. A supporting and protective means for electric resistor heating units comprising a plurality of upwardly extending cast metallic frames having a plurality of openings therein and a cast metallic frame supported by said upwardly extending frames and interfitting therewith.

1,686,010. ELECTRIC FURNACE. ALVIN D. KEENE, Mansfield, Ohio, assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Jan. 14, 1927. Serial No. 161,064. 5 Claims. (Cl. 266—1.5.)



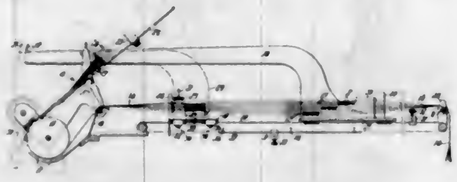
1. In an electric furnace, a furnace wall, a resistor support carried by said wall and comprising a block forming a part of the lining of said wall, said block having portions projecting from the face of said wall, and elongated metallic members fitting in said block and extending out over said projecting portions.

1,686,011. ELECTRICAL COUPLING. WILLIAM OSCAR KENNINGTON, London, England, assignor to A C Spark Plug Company, Flint, Mich., a Company of Michigan. Filed Apr. 14, 1925, Serial No. 23,137, and in Great Britain Jan. 12, 1925. 1 Claim. (Cl. 173—269.)



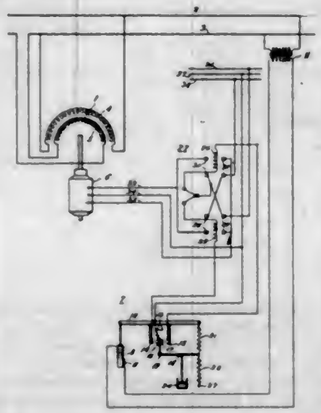
In combination, a conductor wire, a spark plug including a projecting electrode, and a connector electrically connecting the wire to the electrode and consisting of a wire having a loop therein adapted to be loosely slipped over the end of the conductor wire and engaging tightly about the same when in connecting position, the end portions of the wire having loops bent therefrom, one being a double loop and the other having a loop portion received between the convolutions of the double loop, tending to spread apart therefrom to thereby clamp the electrode when in connecting position thereon, the axes of said loops when in connecting position substantially coinciding and substantially intersecting that of the end portion of the conductor wire.

1,686,012. WINDSHIELD HEATER. WILLIAM O. KENNINGTON, London, England, assignor to General Motors Corporation, Detroit, Mich., a Corporation of Delaware. Filed Nov. 14, 1925. Serial No. 69,207. 6 Claims. (Cl. 20—40.5.)



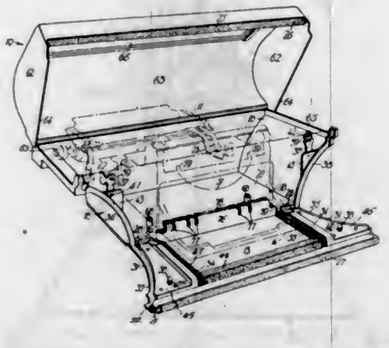
1. A windshield including in combination, a pair of spaced transparencies, the space therebetween having an opening to atmosphere along its lower side, and means to introduce heat into the space at the top thereof.

1,686,013. DRIVE FOR PADDLE-WHEEL BOATS. BERNARD H. KERSTING, Ben Avon, Pa., assignor to Dravo Contracting Company, Pittsburgh, Pa., a Corporation of Pennsylvania. Filed Nov. 13, 1926. Serial No. 148,222. 9 Claims. (Cl. 115—40.)



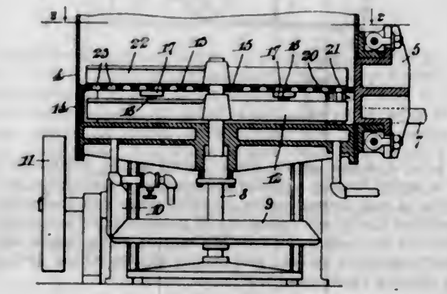
1. A drive for paddle wheel boats, comprising a boxlike boat girder, a drive shaft extending longitudinally of the boat, a paddle wheel shaft extending crosswise of the boat, an intermediate shaft extending crosswise of the boat, gearing connecting the intermediate shaft with the paddle wheel shaft, gearing connecting the intermediate shaft with the drive shaft, and a common bearing member secured to the girder and having bearings for the drive shaft and the intermediate shaft.

1,686,014. TYPEWRITING MACHINE. HIRAM S. LASHER, New York, N. Y., assignor to Underwood Elliott Fisher Company, New York, N. Y., a Corporation of Delaware. Filed Oct. 24, 1925. Serial No. 64,529. 32 Claims. (Cl. 197—126.)



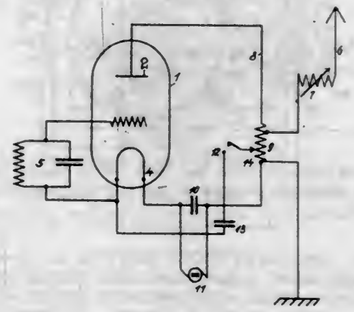
1. The combination with a fan-fold typewriting machine having a platen, a web-course at the rear of said platen, and a carbon-carrier, arranged to reciprocate upon said course, for controlling the position of carbons interleaved with the plies of a fan-folded web, of fold-slitters mounted on the machine at the intake side thereof and operable independently of the movement of the carbon-carrier and effective to slit the stationary web.

1,686,015. PRIMARY RELAY FOR INDUCTION REGULATORS. EDWIN LENR, Edgewood Park, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Sept. 8, 1924. Serial No. 736,426. 4 Claims. (Cl. 171—229.)



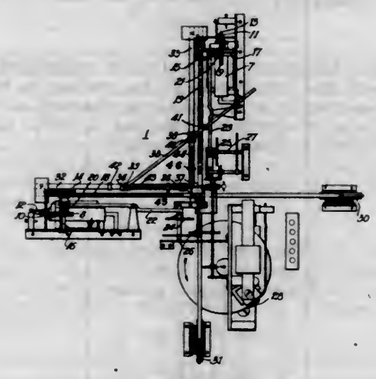
1. In a regulator, an electromagnet energized in accordance with the quantity to be regulated, a pair of contact members actuated by said electromagnet, a second pair of contact members co-operating with the first-named contact members, and resilient means for actuating said second pair of contact members, means for varying the bais of said resilient means in accordance with a change in the position of said first pair of contact members.

1,686,016. TYPEWRITING MACHINE. JOSEPH LINDBURG, Brooklyn, N. Y., assignor to Underwood Elliott Fisher Company, New York, N. Y., a Corporation of Delaware. Filed Apr. 30, 1925. Serial No. 26,903. 12 Claims. (Cl. 197—186.)



1. A sound-deadening casing for a typewriting machine, including a floor-section and rear and side walls and a hinged cover therefor, said casing also including a member hinged to said casing so as to occupy either of two positions, in one of which it is cumbent and lies substantially level with said floor-section, whereby said machine may be lowered in upright position into the casing without obstruction, said member having the form of an open frame loosely surrounding the projecting keyboard-extension of the typewriter when in cumbent position, said member being also swingable upwardly and rearwardly to upright position independently of the keyboard-extension, and forming a front wall for the casing, and means to hold it releasably in its upright position.

1,686,017. RENDERING APPARATUS. MICHAEL V. LOVETT, Castanea, Pa. Filed July 28, 1924. Serial No. 728,777. 3 Claims. (Cl. 87—13.)

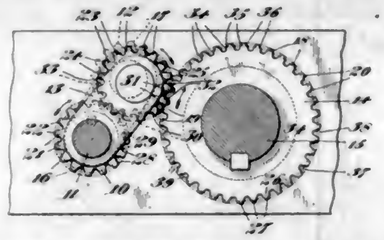


1. In a rendering apparatus, the combination with a tank having a discharge opening; of a sub-bottom within said tank disposed in a horizontal plane extending substantially midway through said opening, and agitators in said tank one above and one below said sub-bottom and both disposed relatively close to said sub-bottom.

1,686,018. VACUUM-TUBE CIRCUITS. SIEGMUND LOEWE, Berlin, Germany, assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Aug. 29, 1921, Serial No. 496,404, and in Germany Nov. 13, 1917. 9 Claims. (Cl. 250—36.) (Granted under the provisions of the act of Mar. 3, 1921, 41 Stat, L., 1313.)

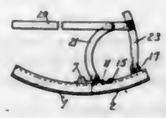
1. A circuit comprising an electron discharge device including an anode and a cathode, an anode circuit, a cathode circuit, and means for inductively transferring sufficient energy from said anode circuit to said cathode circuit to maintain said cathode heated.

1,686,019. ELECTRICAL MEASURING INSTRUMENT. HENRY H. LYON, Buffalo, N. Y.; Henry L. Lyon administrator of said Henry H. Lyon, deceased. Filed Dec. 10, 1919. Serial No. 343,836. 13 Claims. (Cl. 171—34.)



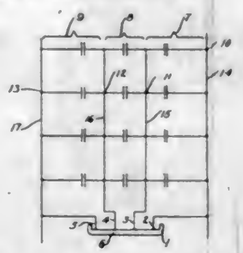
11. In a measuring instrument, the combination with two driven members disposed at right angles to each other and means for connecting the same, of means for periodically resetting the driven members and means associated with the connecting means for indicating the maximum distance between the driven members attained in any period.

1,686,020. GEARING MECHANISM. JAMES P. MADDEN, Bethlehem, Pa., assignor to Bethlehem Steel Company. Filed Mar. 6, 1926. Serial No. 92,727. 3 Claims. (Cl. 74—41.)



1. In uni-directional, power-transmitting gearing, the combination of a driven gear having teeth with a symmetrical dedendum and non-symmetrical addendum portions and a gear having symmetrical teeth movable later-

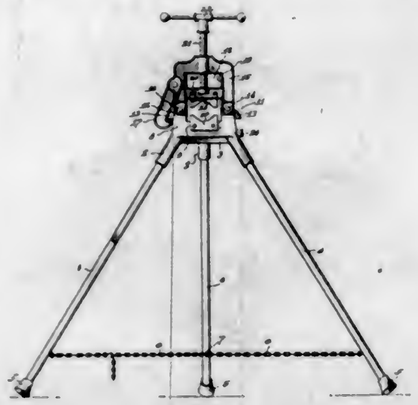
ally of the driven gear to meshed and demeshed positions with respect to the latter, said gears having teeth adapted to intermesh and the idle faces of the teeth of the driven



gear being relieved from the pitch circle to the tips in order to facilitate meshing of the laterally movable gear therewith.

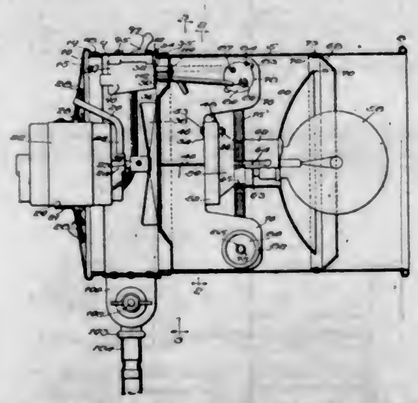
1,686,021. SPLIT-RIM TOOL. FRANK LE ROI MAIN, Birmingham, Mich., assignor to General Motors Corporation, Detroit, Mich., a Corporation of Delaware. Filed Oct. 24, 1925. Serial No. 64,605. 3 Claims. (Cl. 157—1.)

1. A split rim tool comprising a handle, a link intermediately pivoted adjacent an end of said handle, a second link intermediately pivoted to said handle at a point somewhat removed from said pivot, means on one arm of each link by which it may be connected to a rim adjacent the split, the other ends of the links lying in the same plane and slidably engaging each other upon the operation of the handle.



1,686,022. RESISTOR FOR SHUNTED CONDENSERS. RALPH E. MARBURY, Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Oct. 1, 1923. Serial No. 665,834. 5 Claims. (Cl. 250—16.)

1. The combination with a plurality of condensers connected in series, of a shunting resistor comprising a single container having therein a liquid in which are immersed terminal and intermediate electrodes connected to terminal and intermediate points of said condensers.

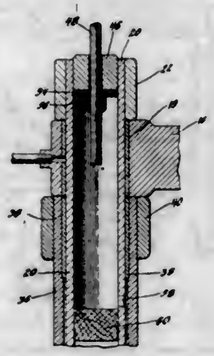


1,686,023. PIPE VISE AND STAND. LEO MCCLOSKEY, Essex, Ontario, Canada. Filed Mar. 19, 1924. Serial No. 700,406, and in Canada Nov. 22, 1923. 1 Claim. (Cl. 81—41.)

A vise and stand comprising a table having a front edge thereof provided with integral end diverging leg sockets and its rear edge with a leg socket of greater angularity than the first mentioned leg sockets, legs in all of said sockets, an integral base on the front edge of said table, integral apertured ears on said base above the sockets at the front edge of said table and affording laterally projecting keepers, gripping members fastened to said base intermediate the ends thereof, a reversible vise member pivotally connected to one of said apertured ears, and

engageable with the other ear, a hook carried by said vise member and engageable with the keeper opposite the pivotal connection of said vise member, and an adjustable gripping member in said vise member opposing said gripping members.

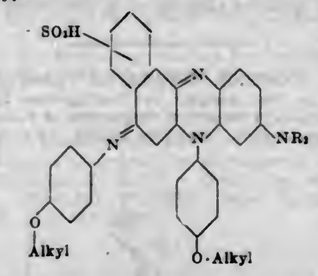
1,686,024. HAIR DRIER. WILLIAM MEYER, Chicago, Ill. Filed Aug. 6, 1927. Serial No. 211,121. 19 Claims. (Cl. 34—26.)



1. In a device of the class described, the combination of a casing having a discharge opening, a transverse partition in said casing, means mounted upon said transverse partition for directing the air in substantially a straight line and for preventing swirling thereof and a heater element supported by said last means, said partition having an opening therethrough.

1,686,025. LUBRICATION OF BRAKE SHAFTS. HARRY MORGAN, Flint, Mich., assignor to General Motors Corporation, Detroit, Mich., a Corporation of Delaware. Filed Oct. 19, 1927. Serial No. 227,158. 2 Claims. (Cl. 308—92.)

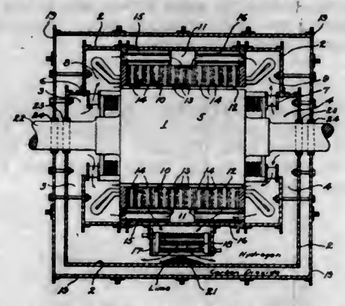
1. In a brake shaft assembly for support on a vehicle chassis, a hollow inner brake actuating shaft, a hollow outer brake actuating shaft journaled on said inner shaft,



a bearing support for said shafts on the chassis permitting independent rocking movement of said shafts, said inner shaft being closed at one end, and a fixed lubricating tube extending in the other end of said inner shaft by a con-

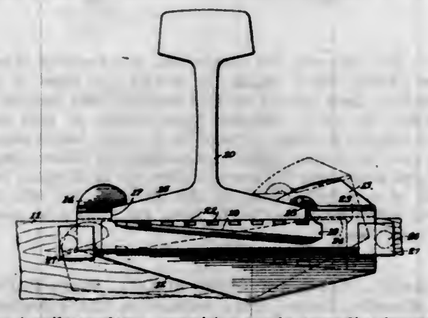
nection permitting rotation of the shaft relative to the tube but preventing the escape of lubricant, said inner shaft being provided with an aperture opening into said outer shaft.

1,686,026. NAPHTHOPHENAZINE DYESTUFFS. WILHELM NEELMEIER, Leverkusen, near Cologne-on-the-Rhine, and THEODOR NOCKEN, Wiesdorf, near Cologne-on-the-Rhine, Germany, assignors to Grasselli Dyestuff Corporation, New York, N. Y., a Corporation of Delaware. Filed June 9, 1926, Serial No. 114,803, and in Germany June 12, 1925. 3 Claims. (Cl. 260—26.)



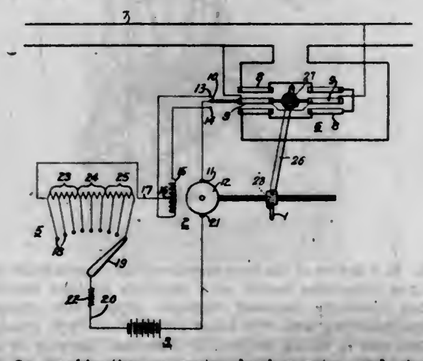
1. As new products naphthophenazine dyestuffs of the general type

in which R stands for hydrogen, an alkyl or an aryl radicle, and in which the naphthophenazine nucleus may contain additional sulfo groups, which are dark powders with metallic lustre, soluble in water with from violet to blue colors, soluble in concentrated sulfuric acid with a green color, dyeing wool from violet to blue shades, particularly fast to light and which are substantially identical with the products obtainable by submitting 1-3-di(para-alkoxy-arylamino) naphthalene compounds and para-diamino-aryl compounds to reactions leading to the formation of the naphthophenazine nucleus.



1,686,027. INERT-GAS PROTECTIVE CHAMBER FOR HYDROGEN-COOLED MACHINES. FRANK DAVIES NEWBURY, Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed July 23, 1925. Serial No. 45,488. 3 Claims. (Cl. 171—252.)

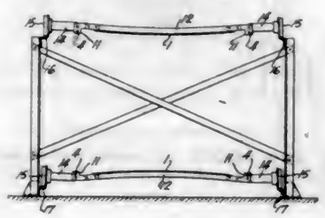
2. A dynamo-electric machine having a gas-tight, hydrogen-filled casing entirely surrounding the same, a rotatable shaft extending through said casing, a seal for preventing the passage of a gas between said rotatable shaft and said casing, an external chamber surrounding said shaft on the outer side of said seal, and a filling of inert gas in said



external chamber at a pressure higher than atmospheric for maintaining said external chamber substantially free of oxygen.

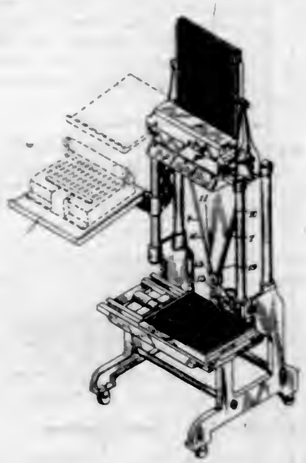
1,686,028. RAIL CLAMP. ALPHONSO T. PALMER, Chicago, Ill. Filed May 24, 1926. Serial No. 111,141. 16 Claims. (Cl. 238—324.)

1. A railway clamp comprising a yoke extending beneath the bottom flange of the rail from one side to the other thereof, inwardly extending hooks disposed at opposite ends of said yoke for engaging the top face of the rail flange, and a wedge for forcing said yoke downwardly to tighten said hooks upon the upper face of the rail flange said wedge having transversely extending grooves and ridges substantially throughout its length to hold said wedge from longitudinal and lateral displacement.



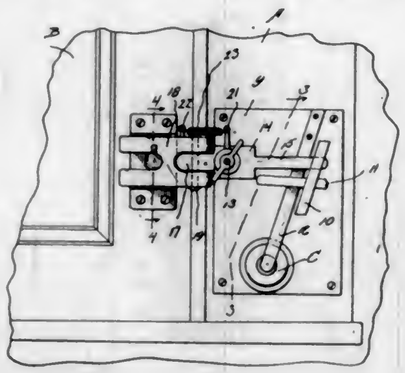
1,686,029. MOTOR CONTROL. RAYMOND T. PIERCE, Swissvale, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Feb. 23, 1922. Serial No. 538,811. 2 Claims. (Cl. 172—179.)

1. In combination, a motor having rotor and stator windings one of which is divided in substantially similar



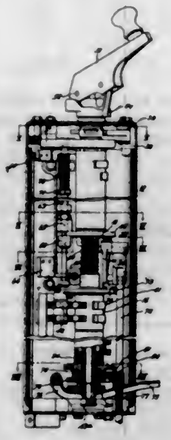
sections for causing a predetermined forward or backward direction of rotation of the rotor winding, a variable resistor for governing the speed of the motor, and means for connecting the resistor in the same circuit relation with either one of the said sections.

1,686,030. ROPE CONVEYER. ROBERT BRINDLEY PITT, Bath, England, assignor to Stothert & Pitt, Limited, Newark Works, Bath, England. Filed July 11, 1927, Serial No. 204,925, and in Great Britain Oct. 6, 1926. 2 Claims. (Cl. 198—130.)



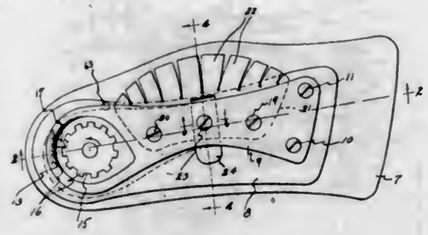
1. In a conveyer, the combination of a plurality of endless parallel ropes, means for driving the ropes, a belt conveyer, jaws carried by said conveyer and adapted to receive the ropes, clamping arms carried by said jaws and adapted to clamp the ropes in the jaws, rollers carried by said arms, cam guides engaged by said rollers and so shaped as to cause the arms to move out of clamping position at a suitable point on the travel of the belt, and cam guides so shaped as to move the arms into clamping position.

1,686,031. TYPE-COMPOSING BOARD. FRANK H. POEPPELMEIER, Dayton, Ohio, assignor to The Typographic Machines Company, Dayton, Ohio, a Corporation of Ohio. Filed Dec. 13, 1926. Serial No. 154,397. 6 Claims. (Cl. 276—20.)



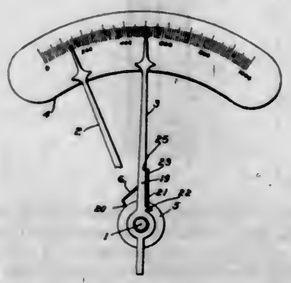
1. In a device of the type described, the combination with a type composing board, of a plurality of type receiving tubes vertically disposed thereon, oblique side channels communicating with the lower ends of the type receiving tubes, and to which the type is delivered edgewise by said tubes, and a common discharge means into which the type is delivered by the side channels.

1,686,032. COMBINED SASH LOCK AND SIGNAL-SWITCH ACTUATOR. THADEUS KANDON and HAROLD PHOENIX, Wilkes-Barre, Pa. Filed June 24, 1927. Serial No. 201,159. 3 Claims. (Cl. 200—55.)



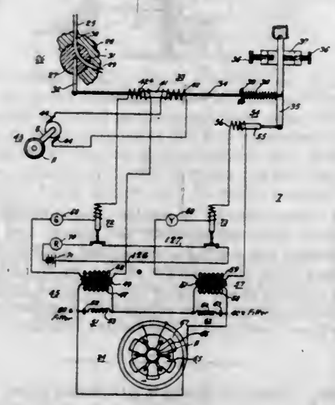
1. In a device of the character described, a bracket constructed for attachment to a sash frame, a plate member constructed for attachment to the window frame adjacent said bracket, a push button switch associated with said plate, an elongated finger of spring material connected at one end to said plate and overlying the button of the push button switch at its lower end, said finger being normally swung outwardly at its lower end, a block pivotally secured to said plate, a tongue upon one end of the block for engagement over said spring finger whereupon when the block is swung downwardly said tongue will cause the inward movement of the finger to close the push button switch and a connection between the block and the sash attached bracket, to cause the swinging of the block when the sash is raised.

1,686,033. CONTROL APPARATUS. LYNN G. RILEY, Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed May 11, 1925. Serial No. 29,285. 18 Claims. (Cl. 200—5.)



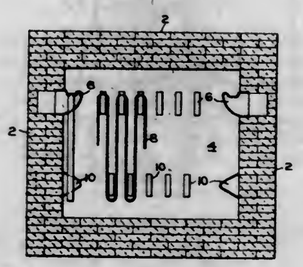
18. In a controller, in combination, a casing, a reversing drum and an emergency drum rotatably mounted in the casing, a key adapted to engage the reversing drum to provide for its manual operation, means for actuating the emergency drum, means for locking the emergency drum against operation, means for ejecting said key from the casing when the reversing drum is in its "neutral" position, said ejecting means being adapted to cooperate with said locking means to retain the emergency drum in its "forward" position.

1,686,034. ARCH SUPPORT. MATHIAS F. ROSER, Detroit, Mich. Filed Apr. 15, 1925. Serial No. 23,230. 2 Claims. (Cl. 36—71.)



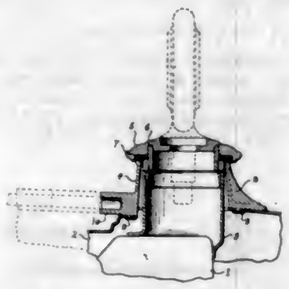
1. An arch support of the class described, comprising: a flexible foot engaging plate; a reinforcing plate on said foot engaging plate; an adjusting plate mounted on said reinforcing plate, said adjusting plate being fixed relatively to said reinforcing plate, at one of its ends, the opposite end of said adjusting plate having an opening provided therein; a bolt projected eccentrically through said opening; a disc mounted concentrically on said bolt; a circular boss on the inner surface of said disc, eccentrically of said bolt, adapted to engage in said opening, said adjusting plate being adapted to flex said reinforcing plate and foot engaging plate in two directions upon the rotation of said disc in one direction.

1,686,035. MAXIMUM-DEMAND DEVICE. ALBERT ROTH, Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Apr. 15, 1925. Serial No. 23,414. 13 Claims. (Cl. 116—129.)



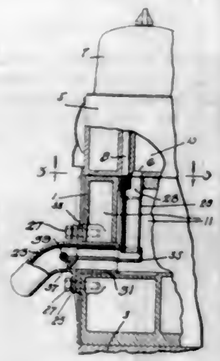
8. In a demand-indicating device, the combination with a periodically-reset operating shaft, a driving pointer secured thereto and a driven pointer relatively-movably mounted thereon, of a yieldable disk relatively-movably mounted on the shaft, a pawl member pivotally mounted on the driven pointer and having a relatively sharp point, said pawl being normally so biased that the point thereof indents the surface of said disk, a ratchet secured to said disk, a second pawl co-operating with said ratchet and constituting means for returning the driven pointer to an initial positon, and means for frctionally holding said dsk against movement, said driving pointer operating to releae said first pawl from said disk and to drive the driven pointer.

1,686,036. AUTOMATIC TRAIN CONTROL AND CAB SIGNALING. HARRY M. RYDER, Sharpsburg, Md., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Feb. 3, 1925. Serial No. 6,551. 8 Claims. (Cl. 246—63.)



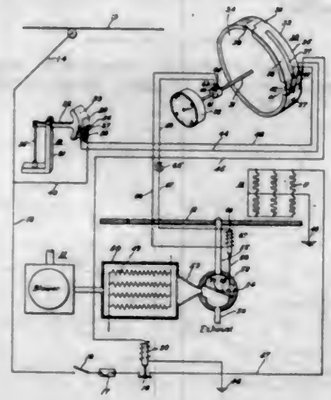
7. The combination with a track having a plurality of rails, of means for electricnily insulating groups of said rails to form sections and subsections of track, a plurality of sources of electrical energy of different frequencies, and means for selectively connecting said groups of rails to said sources of electrical energy in accordance with traffic conditions.

1,686,037. RESISTOR SUPPORT. JOHANN SCHNEPF, Nuremberg, Germany, assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed June 24, 1927, Serial No. 201,289, and in Germany July 17, 1926. 5 Claims. (Cl. 206—1.5.)



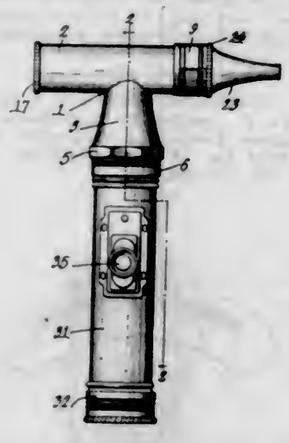
1. In an electric furnace, a resistance heating element, refractory means of normally acid characteristic directly supporting said resistance element within said furnace, and means for shielding said resistance element from the deleterious effects occasioned by said acid refractory supports.

1,686,038. RADIATOR CAP. ERNEST W. SEAHOLM, Detroit, Mich., assignor to General Motors Corporation, Detroit, Mich., a Corporation of Delaware. Filed Nov. 15, 1926. Serial No. 148,540. 5 Claims. (Cl. 220—24.)



1. In a filler opening, in combination, a filling spout, an ornamental shell surrounding the spout, and an ornametal closure cap having a dependent portion detachably engageable with the interior of the spout and provided with an annular groove into which the upper portion of the shell extends, whereby the ornamental contours of the cap and shell are combined in cooperative relation.

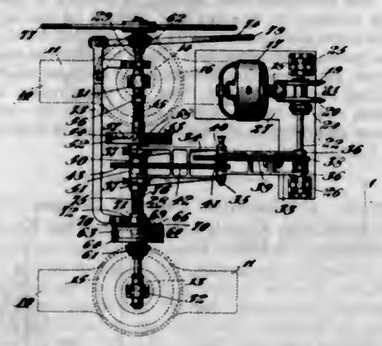
1,686,039. COOLING-WATER DISTRIBUTION. CHARLES R. SHORT, Detroit, Mich., assignor to General Motors Research Corporation, Detroit, Mich., a Corporation of Delaware. Filed Mar. 1, 1926. Serial No. 91,507. 6 Claims. (Cl. 123—173.)



1. In a motor comprising one or more cylinders and a head, a cooling system therefor including a pump, a water jacket about the cylinders, means within the cylinder block whereby the flow of fluid may be directed through the water jacket to the head or may be impelled directly to the head, by-passing the water jacket.

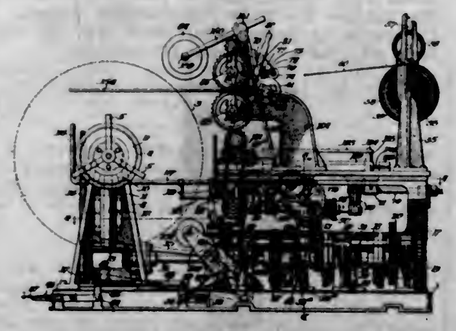
1,686,040. CONTROL SYSTEM. KARL A. SIMMON, Edgewood, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Aug. 7, 1926. Serial No. 127,870. 14 Claims. (Cl. 219—20.4.)

2. In a car-heating system, in combination, a heater, a circuit for supplying energy to the heater, a thermostat for making and breaking the circuit upon changes in temperature, and means for breaking the circuit and maintaining it open during predetermined periods, said means being independent of the thermostat.



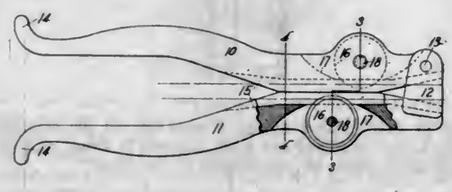
1,686,041. OTOSCOPE. JOHN G. SMITH, Wahoo, Nebr. Filed Apr. 16, 1927. Serial No. 184,401. 1 Claim. (Cl. 128—9.)

An otoscope embodying a T-shaped head made up of a tubular arm and a main tubular member arranged at right angles to each other, an eye piece on one end of the main member, mechanism on the opposite end of the main member for cooperating with the part which is to be inspected, a hollow handle, means for connecting the hand detachably to the arm, an inclined reflector located in the main member between the eye piece and said mechanism and so positioned as to receive light from the arm, the reflector being supplied with a peep hole, a lamp in the handle and illuminating the reflector, a battery housed in the handle and constituting means for operating the lamp,



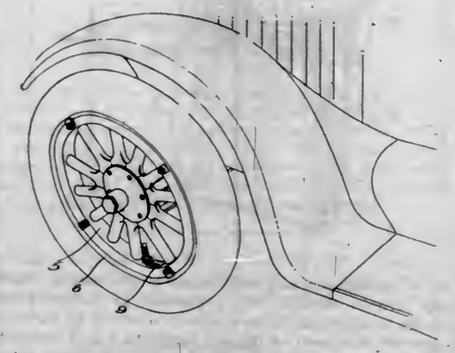
and a switch controlling the lighting of the lamp, the switch being movably mounted on the handle at a point spaced from both ends of the handle, the switch being located in a position approximately at right angles to a plane passing through the axes of the handle, the head and the arm, whereby the switch may be worked conveniently by the thumb of an operator whilst the operator is looking through the eye piece, the peep hole, and said mechanism.

1,686,042. ROLLING-MILL SCREW-DOWN MECHANISM. LAWRENCE C. STEELE, Baltimore, Md. Filed Feb. 9, 1925. Serial No. 7,885. 12 Claims. (Cl. 80—56.)



1. The combination, with a mill having screws for limiting upward movement of an upper roll, gears connected to the screws, bearings movable with the screws, a cross shaft carried by the bearings, driving gears on the cross shaft and meshing with the first gears, one of the driving gears being secured to the cross shaft and the other being loose thereon, a vernier clutch between the shaft and the loose driving gear, a continuously operating motor, a transmission mechanism between the motor and the shaft including reversible and disconnectible gearing, means for engaging and disengaging the clutch, and means for rendering the reversible gearing effective for driving the shaft in either direction or ineffective, both of said controlling means including manual elements available for operation from a common position.

1,686,043. TIRE-MAKING MACHINE. WILLIAM C. STEVENS, Akron, Ohio, assignor to The Firestone Tire and Rubber Company, Akron, Ohio, a Corporation of Ohio. Filed Nov. 22, 1921. Serial No. 517,010. 24 Claims. (Cl. 154—10.)

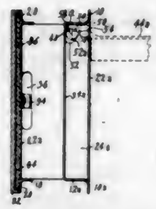


1. In a machine for making tires, a core, means for rotating the core, a tension roller, gearing connecting the tension roller with the core so as to rotate it at a surface speed less than the surface speed of the core, means within the gearing to change the relative speed of rotation of the core and the roller and means to expand and contract the core.

1,686,044. CABLE-SLITTING DEVICE. GROVER T. STOTT, Springfield, Ohio, assignor of one-half to Roscoe O. Snider, Springfield, Ohio. Filed Apr. 14, 1927. Serial No. 183,823. 4 Claims. (Cl. 81—9.5.)

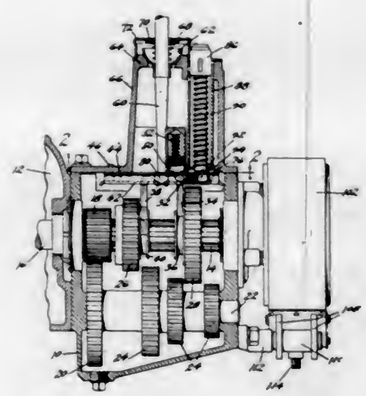
1. In a cable slitting device, two members pivotally connected one to the other on an axis transverse to their length and having opposed portions provided with longitudinal grooves to form a guideway for a cable, cutters carried by the respective members and extending into said grooves, said members having parts forming handles by means of which one of said cutters may be moved toward and from the other.

1,686,045. THEFT-PREVENTING DEVICE. DAVID R. TABER, Washington, D. C., assignor or one-third to George A. Meyers, Washington, D. C. Filed Jan. 13, 1927. Serial No. 160,921. 5 Claims. (Cl. 70—90.)



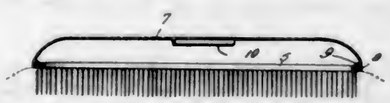
1. A felly and rim lock comprising a lock casing carried by the felly, fastening elements for holding said casing in place and extending from the rim-engaged surface of said felly to engage said casing whereby said fastening elements will be concealed when the rim is in place on the felly, and said rim having a portion with which the bolt of said lock engages to prevent the rim from being taken off the felly.

1,686,046. WINDOW STRUCTURE. WILLIAM H. TAYLOR, Des Moines, Iowa. Filed Sept. 1, 1927. Serial No. 216,904. 7 Claims. (Cl. 189—69.)



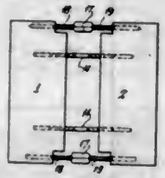
1. In a structure of the class described, an all metal window frame comprising top and bottom and end frame members formed with inner facing flanges, portions projecting outwardly therefrom and stop flanges, said outwardly projecting portions of the end frame members being formed at their upper parts with slots tapered outwardly toward their lower ends, one of the facing flanges being

provided with a slot communicating with one of said first slots, a sash frame having at its upper portion laterally projecting spindles for entering said first described slots,



one of said spindles having a rabbeted end for entering said second described slot when the sash is swung to position substantially at right angles to the frame.

1,686,047. TRANSMISSION LOCKING DEVICE. PERRY L. TENNEY, Muncie, Ind., assignor to General Motors Corporation, Detroit, Mich., a Corporation of Delaware. Original application filed May 7, 1923, Serial No. 637,230. Divided and this application filed Aug. 2, 1926. Serial No. 126,658. 7 Claims. (Cl. 70—90.)

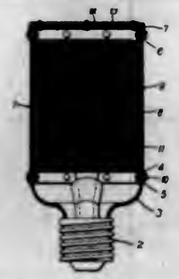


1. A transmission lock comprising in combination, shifter forks, a lever movable into a position to operate either fork, an interlocking device positively operated by the lever to prevent movement of the idle fork, and a lock including a bolt movable into locking engagement with the interlocking device and one shifter fork.

1,686,048. GRAVE COVER. ANTHONY W. THOMPSON, California, Mo. Filed Sept. 1, 1927. Serial No. 216,086. 2 Claims. (Cl. 27—30.)

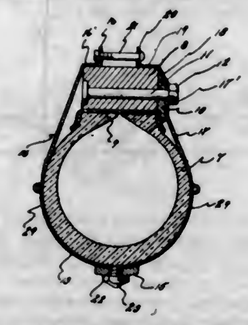
1. A device of the class described comprising a cover having a plurality of spikes extending vertically from one side thereof in closely spaced relation and adapted to penetrate the ground at the edges of the cover, whereby to form a barrier against the entrance of animals to the area beneath the cover.

1,686,049. METHOD OF MAKING TOILET SEATS. WILLIAM F. TILL, Brooklyn, N. Y. Filed Mar. 20, 1928. Serial No. 263,143. 5 Claims. (Cl. 144—31.)



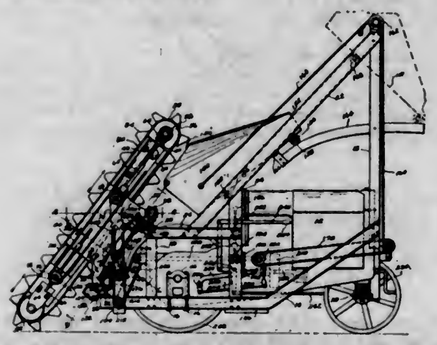
1. The hereindescribed method of making a toilet seat which consists in bringing the sections of the seat into spaced-apart juxtaposition with right and left hand threaded tie members projected into alined holes in the respective sections, and thereafter drawing said sections together by applying tension between them for the purpose of fully entering the tie members into the holes of the respective sections and bringing the contiguous edges of such sections into abutting relation.

1,686,050. AUTOMOBILE AWNING. FOSTER V. WALTZ, St. Louis, Mo. Filed Oct. 27, 1926. Serial No. 144,502. 9 Claims. (Cl. 156—44.)



1. An automobile awning comprising a support arranged above a window opening, a roller journaled in said support, a shade attached to said roller and extensible outwardly through said window opening, an open ended tubular member secured transversely to the free end of said shade, a pair of plugs slidably disposed in said tubular member, and a mounting bracket having one end pivotally secured to the outer end of a corresponding plug and having the opposite end adapted to be detachably secured to the body portion of the automobile adjacent to said window opening for holding said shade in extensible position.

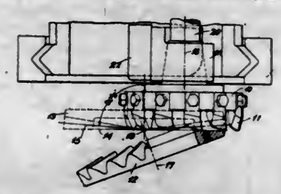
1,686,051. MEANS FOR PREVENTING EXPLOSIONS. HENRY C. P. WEBER, Edgewood Park, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Mar. 23, 1922. Serial No. 546,003. 5 Claims. (Cl. 247—1.)



1. A protective device for consuming gaseous vapors comprising a filament composed of a metal capable of causing combustion of gaseous mixtures at temperatures ranging from 600° to 800° C., a base to which said filament is electrically connected and which is adapted to fit into a standard lamp socket, and a housing comprising a Davey safety lamp diaphragm secured to said base to provide a combustion chamber for said filament.

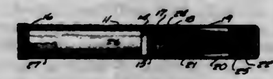
1,686,052. DETACHABLE ANTISKID TREAD. OLAF WEBBAO, Dearborn, Mich. Filed Dec. 7, 1925. Serial No. 73,644. 1 Claim. (Cl. 152—16.)

A device of the class described adapted for use with a vehicle wheel having a felly, bolts projected therethrough and a tire carried by said felly, comprising: a plurality of sections positioned on the tread portion of said tire and extending circumferentially thereof; oppositely disposed co-operating attachment lips swingably mounted on said sections, the clips on one side of said felly being formed to lie in engagement with the side face of said felly and provided with openings for accommodating the bolts projected through said felly, each of said clips being angularly turned at its free end for engaging the inner surface of said felly; and a bolt projected through the free ends of said clips for clamping the same in engagement with said felly.



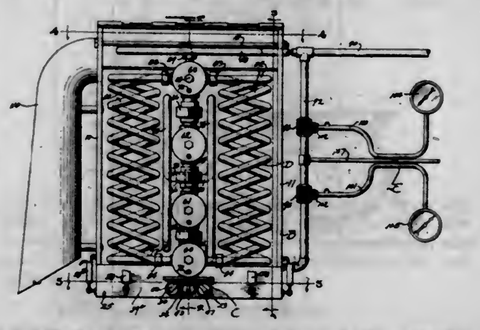
1,686,053. MATERIAL LOADER. ROBERT L. WHEATLEY, Hammond, Ind., assignor of one-tenth to Fred D. Wilson, Harvey, Ill. Filed Dec. 23, 1926. Serial No. 156,730. 11 Claims. (Cl. 37—101.)

1. In combination with an automotive vehicle, a supplemental frame, a movable hopper thereon, a digger movable sidewise across said frame delivering in said hopper and means for dumping the hopper by power from the vehicle motor.



1,686,054. METHOD OF GENERATING BEVEL GEARS. ERNEST WILDHABER, Brooklyn, N. Y., assignor to Gleason Works, Rochester, N. Y., a Corporation of New York. Filed Feb. 28, 1927. Serial No. 171,610. 28 Claims. (Cl. 90—4.)

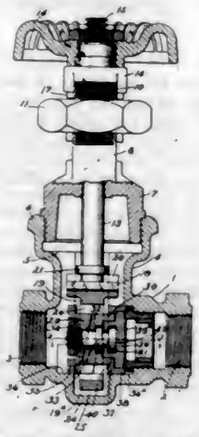
1. A method of producing a bevel gear which consists in cutting each of its side tooth surfaces by moving a tool having a cutting edge of convex profile, across the face of a tapered gear blank while imparting a relative rolling movement between the tool and blank as though the blank were rolling with a basic gear having conical top, pitch, and root surfaces, and a pitch cone angle different from the pitch cone angle of its mating gear.



25. The method of producing a pair of bevel gears which consists in cutting the side tooth surfaces of both members of the pair two sides simultaneously with a rotary annular face mill, having cutting edges adapted to finish cut adjacent side tooth faces of a gear blank, one member of the pair being cut in a generating operation in which the tool is rotated in engagement with a tapered gear blank while the blank is rotated on its axis and simultaneously an additional relative movement is imparted between the tool and blank about an axis intersecting the blank axis and parallel to the tool axis, the other member of the pair being cut in a generating operation in which the tool is rotated in engagement with a tapered gear blank while the blank is rotated on its axis and simultaneously an additional relative movement is imparted between the tool and blank about an axis intersecting the blank axis and angularly inclined to the tool axis.

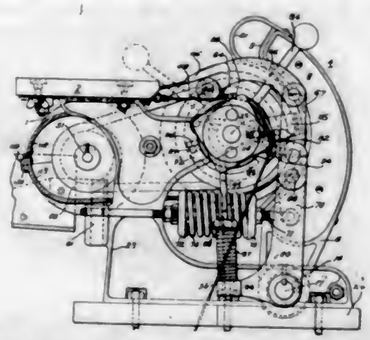
1,686,055. SHAVING BRUSH AND SOAP OUTFIT. HOWARD AUSTIN WHITESIDE, Rye, N. Y. Filed Mar. 8, 1927. Serial No. 173,666. 10 Claims. (Cl. 132—81.)

1. In combination, a tubular sleeve, a ring at one end of the sleeve, a cap removably carried by the ring, a shaving brush having a base, the ring having a hole into which the base of the shaving brush is insertible, and a soap cartridge removably carried in the sleeve, the soap being accessible through the other end of the sleeve, the sleeve and ring acting as a handle for the shaving brush.



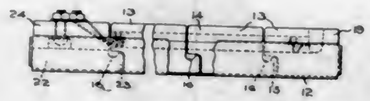
1,686,056. STEAM-BOILER CONSTRUCTION. JOHN G. WILL, Canon City, Colo. Filed Sept. 1, 1923. Serial No. 660,562. 5 Claims. (Cl. 122—250.)

1. A boiler construction comprising a series of headers arranged one over the other in a vertical plane, a pair of preheating coils disposed one at each side of the headers, each of said coils being wound with the convolutions all in a plane and parallel with the plane of the headers, com-



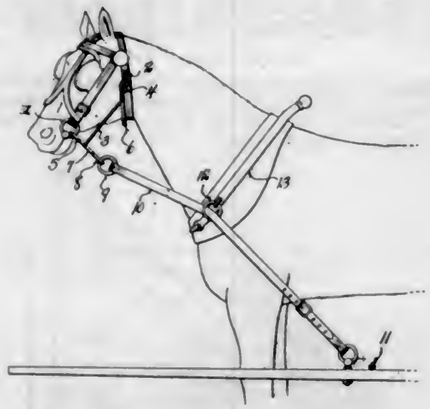
municating means extending centrally between said coils, water inlet means for one of said coils, and means communicating the other of said coils with the lowermost header of said boiler arrangement.

1,686,057. HIGH-PRESSURE GATE VALVE. BELVIN T. WILLISTON, Somerville, Mass., assignor, by mesne assignments, to Consolidated Ashcroft Hancock Company, New York, N. Y., a Corporation of Delaware. Continuation of application Serial No. 712,950, filed May 13, 1924. This application filed May 3, 1926. Serial No. 106,205. 12 Claims. (Cl. 251.)



1. A gate valve comprising a casing having inlet and outlet openings connected by a fluid passage, a carriage reciprocable transversely of the fluid passage, means for moving the carriage, said carriage having a vertically elongate slot closed at its lower end and whose opposite walls are provided with inclined cam ribs, a head disposed within said slot, said head comprising sleeve members disposed end to end and means uniting the sleeve members, said sleeve members having opposed surfaces defining between them inclined grooves on opposite sides of the head which receive the respective cam ribs of the carriage, and a valve disc carried by the head, said cam ribs and inclined grooves cooperating to move the head with the valve disc in opposite directions.

1,686,058. IRONING MACHINE. ALLEN S. WISE, East Orange, N. J., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed July 2, 1925. Serial No. 41,002. 10 Claims. (Cl. 68—9.)

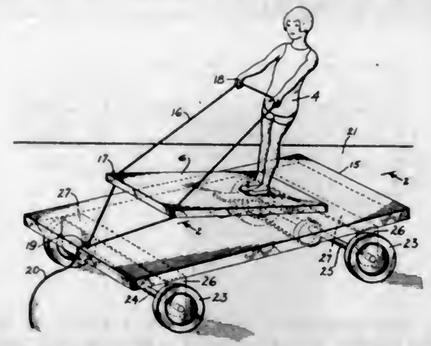


1. The combination of an ironing roll, an ironing shoe movable towards and from said roll, power means for rotating said roll, said shoe being movable against said roll by the direct-exercise of force by an operator, and means operative when said shoe is against said roll to transmit power from said power means to said shoe for pressing said shoe against said roll.

1,686,059. ELECTRIC HEATING UNIT. JAMES C. WOODSON, East Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Apr. 24, 1925. Serial No. 25,606. 1 Claim. (Cl. 219—37.)

In an electric heater, in combination, a plurality of grooved refractory electric-insulating members located in abutting relation and having their adjacent edge portions overlapping each other, metal supporting means for said refractory members interfitting therewith, a refractory terminal-member-supporting plate at one end of said heater, and a refractory spacing plate between said terminal-member-supporting plate and said metallic supporting means.

1,686,060. HEAD CHECK. CHARLES ACHENBACH, Manitowoc, Wis. Filed Oct. 1, 1927. Serial No. 223,390. 3 Claims. (Cl. 54—57.)



1. An animal check comprising a pair of spaced bars having means adjacent their upper ends for attachment to a bridle or headgear, a metal strap connecting the upper ends of said bars, a yoke carried by the lower ends of said bars, and a strap for connecting said yoke to a stationary bar of a vehicle or implement.

1,686,061. FIGURE WHEEL TOY. ALBERT A. ALLINGER, Richmond Hill, N. Y. Filed Mar. 10, 1927. Serial No. 174,126. 1 Claim. (Cl. 46—45.)

A toy comprising a platform, a front and a rear axle to support the platform and wheels supporting the axles, a board hinged at its rear end to the platform, a doll

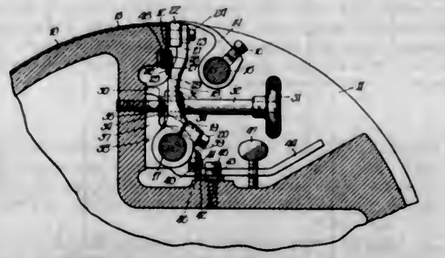
mounted on the board, said platform being formed with an aperture beneath the board, a cam guide secured to the

board and extending downwardly and rearwardly and curving upwardly about the rear axle and a cam carried by the rear axle to engage the cam guide.

1,686,062. THERAPEUTIC COMPOSITION. CHARLES F. AMACKER, Bogalusa, La. Filed July 8, 1927. Serial No. 204,430. 3 Claims. (Cl. 167—9.)

1. A new product having therapeutic properties including a mercury derivative of di-brom-fluorescein and iodine.

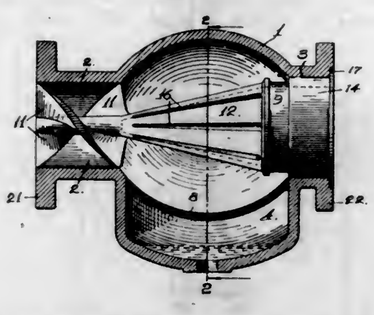
2. A new product having therapeutic properties including a salicylic acid, iodine and a mercury derivative of di-brom-fluorescein.



1,686,063. PACKING AND PROCESS OF MAKING SAME. BURNIE L. BENBOW, Cleveland, Ohio. Filed Mar. 28, 1921. Serial No. 456,185. 11 Claims. (Cl. 154—2.)

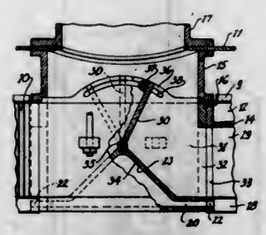
1. The process of making packing which includes immersing a base material in a liquid bath containing deflocculated graphite in suspension, removing the base material from the bath, and evaporating the liquid therefrom, thereby leaving thereon a dry adherent coating of graphite.

1,686,064. PROCESS OF CONCENTRATING OXIDIZED ORES AND MINERALS. FRANK A. BIRD, Salt Lake City, Utah. Filed Aug. 30, 1926. Serial No. 132,659. 1 Claim. (Cl. 209—9.)



The process of treating oxidized ores to render them amenable to concentration by the flotation process, which consists in grinding the ore in a mill free from metal surfaces with which the ore would be liable to make contact, and subjecting the ground ore to a sulphidizing agent whereby to deposit a film of sulphide thereon.

1,686,065. PRINTING-PRESS BLANKET CLAMP. JOSEPH R. BLAINE, Oak Park, Ill., assignor to The Miehle Printing Press & Manufacturing Company, Chicago, Ill., a Corporation of Illinois. Filed Feb. 28, 1927. Serial No. 171,511. 8 Claims. (Cl. 101—415.1.)

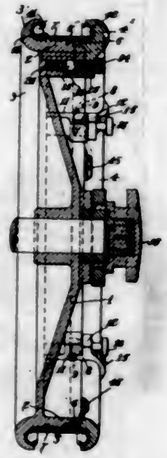


2. In a printing press, the combination of a support, a blanket carried thereby, a clamping element secured to the edge of said blanket, and a gripper pad support cooperating with said clamping element for locking said blanket to said first mentioned support.

1,686,066. SEPARATOR. HARRY E. BOYRIE, San Francisco, Calif., assignor, by mesne assignments, to Blaw-Knox Company, Blawnox, Pa., a Corporation of New Jersey. Filed Jan. 16, 1926. Serial No. 81,728. 7 Claims. (Cl. 183—79.)

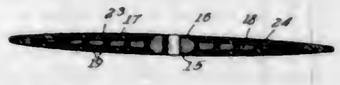
1. As an article of manufacture, a separator comprising a separator chamber having inlet and outlet ports; a liquid receiving chamber formed below the separator chamber and communicating therewith through a slot formed in the bottom of said separator chamber; a member mounted within the separator chamber and extending between the inlet and outlet ports, said member being provided with a helical baffle disposed within the inlet port and arranged to impart a rotating movement to a fluid stream moving therepast whereby entrained liquid will be deposited by centrifugal force against the walls of the chamber and drained through the slot into the liquid receiving chamber, said member being also provided with a hood formed integrally therewith and extending across the chamber and connected to the outlet port and having slots through which the dry fluid may pass to said outlet.

1,686,067. FLUID SEPARATOR. GRANT D. BRADSHAW, Pittsburgh, Pa., assignor to Blaw-Knox Company, Blawnox, Pa., a Corporation of New Jersey. Filed May 12, 1927. Serial No. 190,723. 9 Claims. (Cl. 183—111.)



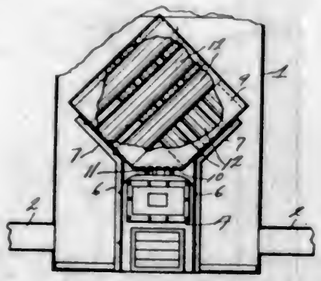
1. A steam separator comprising a T outlet, steam separator sections connected to said outlet on each side thereof, a water passageway in each of said sections, and a water passageway in said T outlet connecting the passageways in said sections.

1,686,068. RIM-REMOVING DEVICE. FRANCIS W. BRIGGS, Medford, Mass. Filed May 18, 1925. Serial No. 30,945. 2 Claims. (Cl. 301—23.)



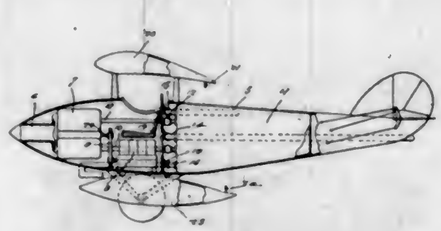
2. In combination with a wheel structure having a projectable locking detent, a removable rim part interlocked

with said detent by a rotary motion, and a manually operable lock for releasably holding said detent projected,



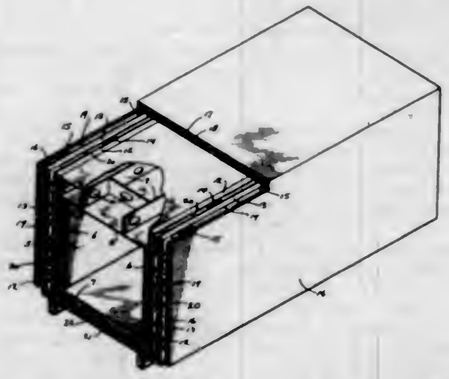
and comprising a key operated member rotatable into engagement with said detent about an axis transverse to the line of projection of said detent.

1,686,069. PROPELLER. HERBERT E. BUCKLEN, Elkhart, Ind. Filed Feb. 8, 1926. Serial No. 86,684. 1 Claim. (Cl. 170—159.)



A propeller comprising a core and a propeller shaped body surrounding the core and formed of molded cork.

1,686,070. AIR-HEATING FURNACE. LOUIS BURMESTER, Omaha, Nebr. Filed Feb. 21, 1928. Serial No. 255,884. 3 Claims. (Cl. 126—116.)

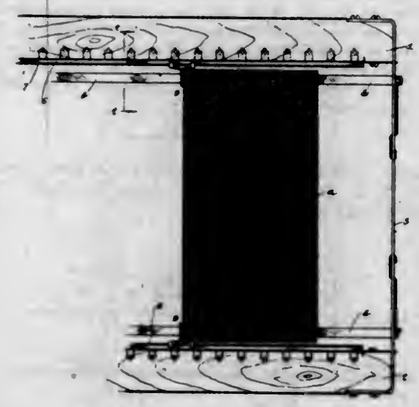


1. An air heating furnace comprising a main casing, a tube carrying casing within the main casing, said tube carrying casing having diagonal corners in a vertical plane, a combustion chamber casing below the tube carrying casing, discharge pipes connecting the combustion chamber casing and the tube carrying casing, a discharge pipe connecting the rear side of the combustion chamber casing and the tube carrying casing and means for closing said last named pipe.

1,686,071. AEROPLANE. VINCENT CAVALERI, Brooklyn, N. Y. Filed Aug. 20, 1927. Serial No. 214,304. 2 Claims. (Cl. 244—18.)

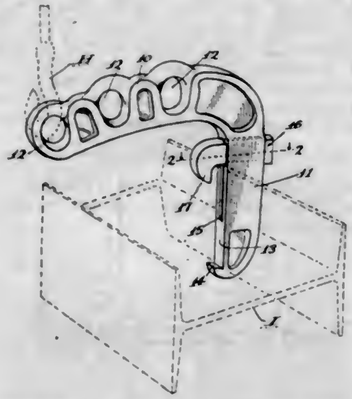
2. In an aeroplane having a fuselage, a tank in the rear of the fuselage, said tank adapted to store air under pressure, a plurality of pipes extending forwardly from the tank, then laterally in different directions, and then rearwardly, valves in said pipes, and means for simultaneously operating the valves.

1,686,072. REFRIGERATOR. JENS C. CHRISTENSEN, Buffalo, N. Y. Filed Mar. 31, 1926. Serial No. 98,910. 4 Claims. (Cl. 217—5.)



1. A refrigerator comprising inner refrigerator walls, an inner cork side wall in contact with the inner refrigerator wall at each side of the refrigerator, an outer cork wall in spaced relation with each of the inner cork walls, and an outer side wall in spaced relation with each of the outer cork walls, the spaces between the inner and outer cork walls being closed and separated from the spaces between the outer cork walls and the outer side walls, the spaces between the outer walls and the outer cork walls being separate and non-communicating and open only at the bottom, whereby both sides of the outer walls will be subjected to atmospheric temperature.

1,686,073. HEDDLE FRAME. HOWARD D. COLMAN, Rockford, Ill., assignor to Barber-Colman Company, Rockford, Ill., a Corporation of Illinois. Filed Oct. 20, 1924. Serial No. 744,543. Renewed Jan. 9, 1928. 4 Claims. (Cl. 139—92.)

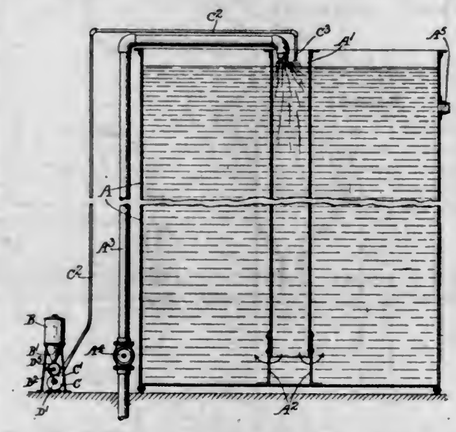


1. A heddle frame comprising a wooden main frame bar, a heddle bar, and means for supporting the heddle bar intermediate its ends, said means comprising a guide bar of substantially the same length as the frame bar and of T-

shape in cross-section, said guide bar comprising a vertical central web and horizontal flanges, said web having tangs thereon which are driven into the frame bar to secure the

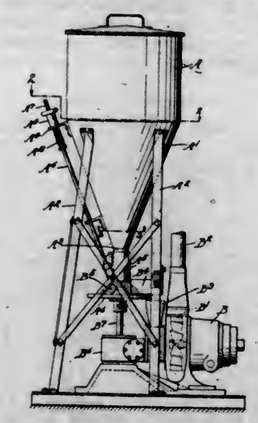
guide bar in place, and a member slidably engaging the heddle bar and slidably mounted upon the horizontal flanges of said guide bar.

1,686,074. ADJUSTABLE POSITIVE-GRIP STEEL-BEAM HOOK. CARLTON E. CURRIE, Los Angeles, Calif. Filed July 28, 1926. Serial No. 125,423. 3 Claims. (Cl. 294—82.)



1. A device of the class described comprising a body providing two arms rigidly connected together and arranged at an angle to each other, there being a shoulder adjacent the end of one arm on that side disposed toward the other arm, said other arm being adapted to be lifted by a lifting element and means mounted upon the first mentioned arm for holding the upper part of an object placed upon the shoulder adjacent the first mentioned arm.

1,686,075. PROCESS OF MAKING SYNTHETIC PIG IRON. EMIL EDWIN, Trondhjem, Norway, assignor to the Firm: Aktieselskapet Norsk Staal (Elektrisk-Gas-Reduktion), Oslo, Norway. Filed Jan. 25, 1927, Serial No. 163,550, and in Norway Dec. 10, 1925. 2 Claims. (Cl. 75—27.)

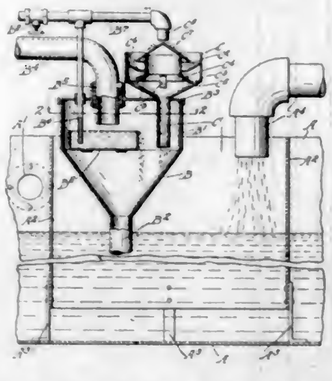


1. Process of producing synthetic pig iron from pure sponge iron, which is obtained by reducing iron ore by means of reducing gases and magnetically separating iron and gangue, comprising mixing finely divided pure sponge iron intimately with finely divided substantially pure carbonaceous material without addition of other ferrous material and subjecting the mixture to melting in an electric furnace under acid conditions and at as low a temperature as possible.

1,686,076. METHOD AND APPARATUS FOR MIXING SOLIDS WITH LIQUIDS. WILSON EVANS, Chicago, Ill., assignor, by mesne assignments, to National Aluminate Corporation, Chicago, Ill., a Corporation of Delaware. Filed June 6, 1927. Serial No. 196,810. 6 Claims. (Cl. 210—16.)

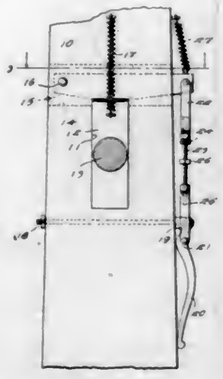
1. The process of mixing liquids and solids which consists in projecting a continuous stream of finely divided solids at high velocity against the surface of the liquid with which the solid is to be mixed.

1,686,077. DRY FEEDING AND MEASURING MACHINE. WILSON EVANS, Chicago, Ill., assignor, by mesne assignments, to National Aluminate Corporation, Chicago, Ill., a Corporation of Delaware. Filed Oct. 7, 1927. Serial No. 224,597. 10 Claims. (Cl. 221—118.)



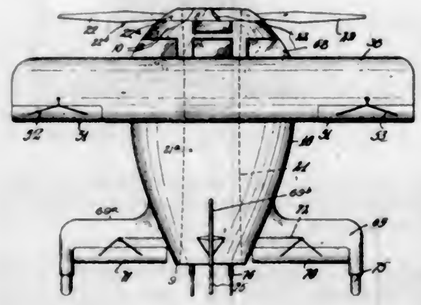
5. The process of discharging material by gravity from a receptacle which consists in withdrawing a plurality of separate streams of material from the underside of the receptacle at spaced points thereupon and converging said streams and discharging them at a common discharge point.

9. The combination with a cylindrical receptacle having a conical bottom of discharge means therein comprising an



apertured plate located adjacent the largest portion of the conical bottom, a relatively small apertured plate located adjacent the discharge mouth of the conical bottom, a plurality of gravital discharge passages joining pairs of apertures in said plates and all discharging into the open mouth of the conical bottom.

1,686,078. MIXING DEVICE. WILSON EVANS, Chicago, Ill., assignor, by mesne assignments, to National Aluminate Corporation, Chicago, Ill., a Corporation of Delaware. Filed Nov. 7, 1927. Serial No. 231,432. 11 Claims. (Cl. 210—29.)



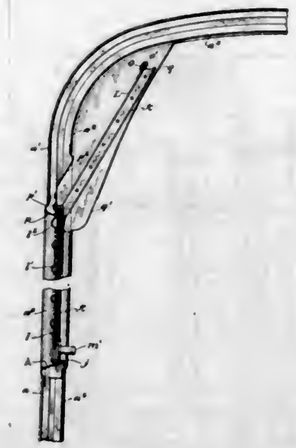
1. A mixing device for water treating plants and the like comprising a dust tight housing, a discharge passage leading therefrom and having its end immersed in the water, a pan contained within the housing, means for continuously supplying water to and permitting it to overflow therefrom, a pneumatic conveyor adapted to discharge air suspended solids into the housing against the water in the pan, an air discharge vent from the housing, means located within the vent for washing the air and means for mixing the air washing water with the pan water.

1,686,079. WRIST-PIN-BEARING HOLDER. WILLIAM H. FENNEMAN, Taft, Calif., assignor to Mary Katherine Fenneman. Filed Jan. 6, 1927. Serial No. 159,452. 1 Claim. (Cl. 287—93.)

A pitman having an upper wrist-pin opening, a bearing block in the opening, a transverse opening intersecting the upper end of the wrist-pin opening, means for normally urging the block into the transverse opening, an arm pivotally supported in the transverse opening and having a convex face bearing on the upper end of the block, resilient means for normally urging the arm away from the block, an eye bolt disposed transversely through the pitman beneath the bearing block opening, a bent lever pivotally mounted on the eye bolt, a yoke pivotally connected to the free end of the said arm, a yoke pivotally connected with the lever adjacent its pivotal connection with the eye bolt, and an oppositely threaded bolt engaged in the adjacent ends of said yokes.

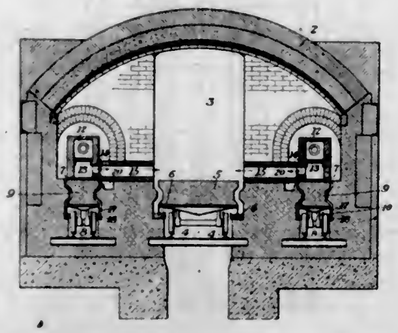
1,686,080. CYCLOPLANE. MICHAEL HUGH FORD, Jersey City, N. J. Filed May 29, 1925. Serial No. 33,597. 55 Claims. (Cl. 244—14.)

1. An aircraft for vertical and horizontal flight, comprising a propeller, an elongated fuselage having an empennage with stabilizing fins, landing members carried by said fins for supporting the craft vertically upright on the ground, a movable load container in the fuselage, a pilot's control therefor, and means for shifting the craft from vertical to horizontal including said load container.



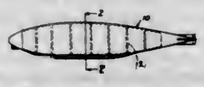
1,686,081. STRAW HAT. JACOB FRIEDMAN, Brooklyn, N. Y. Filed Nov. 26, 1927. Serial No. 235,776. 2 Claims. (Cl. 2—193.)

1. A braided straw hat having a crown, a two-ply brim spaced circumjacent the crown, an intervening two-ply element composed of a series of unstiffened braid coils, a covered elastic band wound spirally between the upper and lower intervening braid coils at the juncture of the coils, and rows of stitches retaining the braid coils and elastic band in such manner as to permit limited relative movement of the coils.



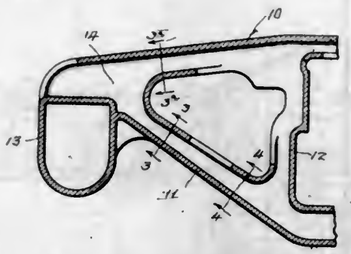
1,686,082. WINDOW CONSTRUCTION. CHARLES FROESCH, New York, N. Y., assignor to International Motor Company, New York, N. Y., a Corporation of Delaware. Original application filed Sept. 5, 1924, Serial No. 736,009. Divided and this application filed Nov. 12, 1926. Serial No. 147,923. 11 Claims. (Cl. 296—45.)

1. In an adjustable window, a casement, a sash, tracks comprising fixed strips and movable strips carried with the casement, yielding non-metallic material interposed between the casement and the movable strips, rollers on the sash and positioned between the fixed and movable strips, removable face plates on the casement, and means to secure the plates in telescoping position with respect to



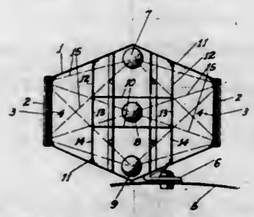
the movable strip to confine the yielding material between the plates and movable strips under compression, whereby movement of the sash is yieldingly resisted.

1,686,083. TUNNEL KILN, FURNACE, AND THE LIKE. CHARLES F. GEIGER, Metuchen, N. J., assignor to The Carborundum Company, Niagara Falls, N. Y., a Corporation of Pennsylvania. Filed Feb. 1, 1927. Serial No. 165,109. 15 Claims. (Cl. 263—43.)



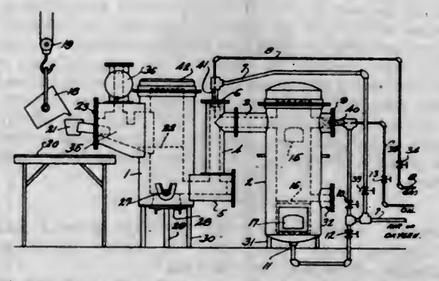
2. The combination with a furnace having a passageway therein, of a combustion chamber movable along the passageway.

1,686,084. AIRCRAFT. CHARLES S. HALL, Oakland, Calif. Filed Sept. 15, 1926. Serial No. 135,507. 9 Claims. (Cl. 244—3.)



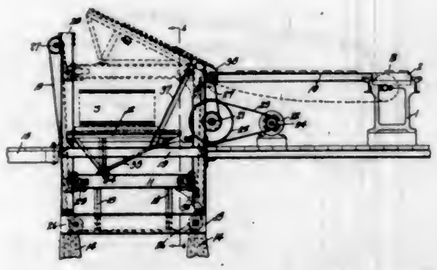
1. In an aircraft, a gas holding compartment, a gas heating means, a gas cooling means, and a gas purifying means, and a means to remove gas from said compartment and to return it to said compartment through any one or more of said three first mentioned means.

1,686,085. SIDE-FRAME STRUCTURE. CLARENCE B. HARRISON, Lima, Ohio, assignor to The Ohio Steel Foundry Company, Lima, Ohio, a Corporation of Ohio. Filed Oct. 29, 1927. Serial No. 229,574. 2 Claims. (Cl. 105—205.)



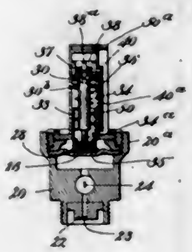
1. A side frame comprising an integral casting including journal boxes, and tension and compression members converging at opposite ends adjacent said journal boxes, said tension and compression members each having arcuate cross sections intermediate their ends merging into box sections adjacent each of said journal boxes.

1,686,086. MOTOR-VEHICLE SIGNAL. FRANK L. HARRIS, Stockton, Calif. Filed Nov. 9, 1927. Serial No. 232,092. 1 Claim. (Cl. 177—329.)



A signal device including a casing open at one end, a translucent screen across said end, an opaque panel in the casing behind and spaced from the screen and parallel thereto, said panel having a plurality of vertically spaced signal-symbols cut therethrough, superimposed compartments formed in the casing behind the panel, the symbols registering individually with the different compartments, and lights in said compartments disposed relative to the panel and to the screen to cause the outline of all said symbols to be projected in complete and magnified form onto the screen.

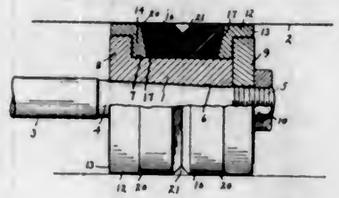
1,686,087. ART OF REFINING IRON AND STEEL PRODUCTS. CHARLES W. HILL, Birmingham, Ala. Filed Nov. 30, 1925. Serial No. 72,136. 4 Claims. (Cl. 75—44.)



1. A process of treating molten metal, by which regulated and controlled volumes of gases are forced into molten metal while controlling the temperature and pressure of said molten metal so that the amount of gases absorbed by the molten metal may be definitely controlled.

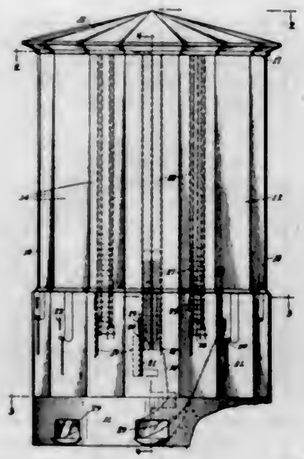
1,686,088. UNLOADING MACHINE. FREDERICK W. HORSTKOTTE, Portland, Oreg. Filed Oct. 12, 1927. Serial No. 225,740. 7 Claims. (Cl. 214—8.5.)

1. The combination with a vertically movable elevator and a tiltable chute thereon adapted to receive a plurality of layers of material, of means for retaining the tilted stack and means for permitting discharge of the uppermost layer of the stack.



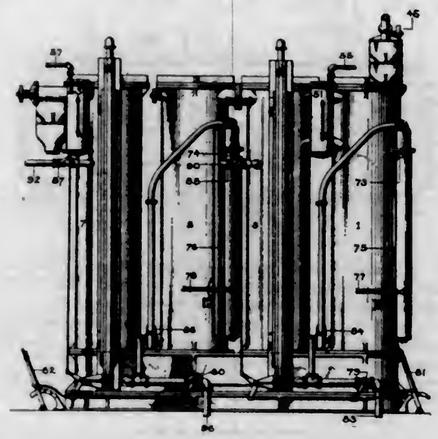
1,686,089. TIRE-PROTECTING SIGNAL. JOHN E. KENNEDY and MICHAEL A. KENNEDY, Los Angeles, Calif. Filed Aug. 17, 1925. Serial No. 50,576. 5 Claims. (Cl. 116—34.)

5. In a device of the class described, the combination with a valve air-pressure chamber adapted to contain constant communication with the tire stem, a piston chamber secured thereto, an imperforate diaphragm preventing the passage of air from one casing to the other, an indicating pointer mounted on the piston casing to indicate at a distance from the tire over-inflation or under-inflation of the tire, and a piston resting upon said diaphragm, said piston comprising extensibly adjustable members connected by a tensioning nut so as to vary either the effective length of the piston or the tension of the spring without one adjustment affecting the other, substantially as described.



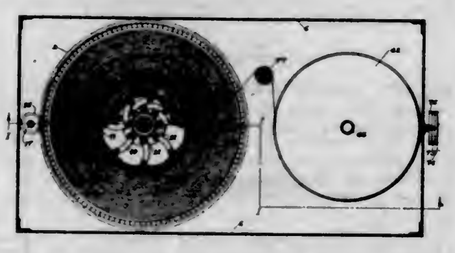
1,686,090. PISTON PACKING. JOHN W. MACCLATCHIE, Compton, Calif. Filed Dec. 22, 1926. Serial No. 156,284. 7 Claims. (Cl. 74—108.)

1. A piston adapted for reciprocation in a cylinder containing a medium under pressure, a packing annulus on the piston, and an abutment, slidable relative to the piston responsive to the pressure in the cylinder and engaging the end of the packing for axially compressing the packing and thereby radially expanding it into packing engagement with the wall of the cylinder, the packing annulus being recessed medially of its length to reduce its thickness and



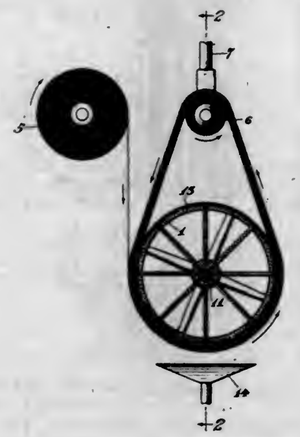
having end portions of uniform relatively greater thickness extending from said medial recess to the respective ends of the annulus.

1,686,091. VENDING-MACHINE CABINET. LANDON C. MANNING, New York, N. Y., assignor to Pack Shops, Inc., New York, N. Y., a Corporation of New York. Filed Nov. 27, 1925. Serial No. 71,599. 17 Claims. (Cl. 312—42.)



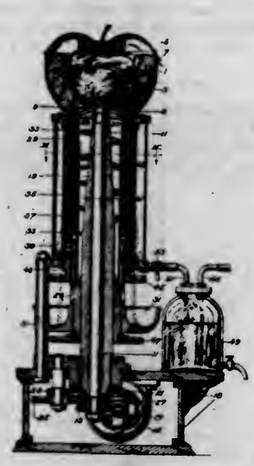
1. In a vending machine, the combination of an upstanding cabinet substantially semicircular in horizontal cross-section, a floor defining the bottom of the cabinet, said floor provided with a discharge opening located at the center of its semi-circular outline leaving the space above the floor and between the curved side of the cabinet and the vertically projected outline of the opening as a semi-annular space, a plurality of vertically extending package reservoirs each substantially rectangular in plane and disposed in radially disposed position in said semi-annular space and said reservoirs coacting substantially to fill the semi-annular space considered horizontally whereby a maximum number of reservoirs for containing rectangular packages may be contained within the outlines of a semi-circular vending machine.

1,686,092. PROCESS OF AND APPARATUS FOR THE CONTINUOUS COUNTERCURRENT TREATMENT OF LIQUIDS AND SOLIDS. FRED W. MANNING, Berkeley, Calif. Filed Mar. 20, 1926. Serial No. 96,343. 40 Claims. (Cl. 210—177.)



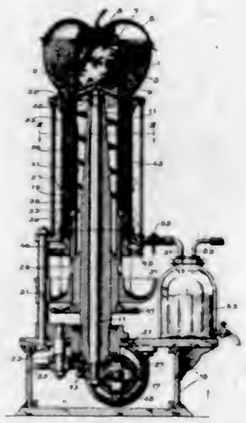
2. A filtering process which comprises introducing treating solids into an elastic fluid zone situated above the level of a liquid to be filtered, distributing the solids throughout the liquid, and thereafter filtering the liquid through the solids.

1,686,093. PROCESS OF AND APPARATUS FOR CONTINUOUS-PRESSURE FILTRATION. FRED W. MANNING, Berkeley, Calif. Filed Apr. 11, 1927. Serial No. 182,925. 22 Claims. (Cl. 210—196.)



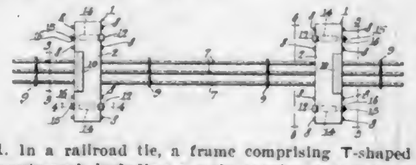
16. A filtering process consisting of passing a fluid through a filter member formed of layers of filter material, continuously removing the inlet surface portion of the member to provide fresh filtering surface to the fluid to be filtered, and simultaneously adding a fresh filter layer to the outlet surface portion of the member.

1,686,094. PROCESS OF AND APPARATUS FOR CONTINUOUS COUNTERCURRENT FILTRATION. FRED W. MANNING, Berkeley, Calif. Filed June 21, 1927. Serial No. 200,357. 12 Claims. (Cl. 210—197.)



1. A filtering process which comprises passing a fluid through a constantly renewing filter member formed of layers of treating material, the said member moving continuously in a direction opposed to the flow of the fluid.

1,686,095. CONTINUOUS EXPELLING AND CLARIFYING PROCESS. FRED W. MANNING, Berkeley, Calif. Filed Nov. 20, 1924. Serial No. 751,058. 3 Claims. (Cl. 210—194.)

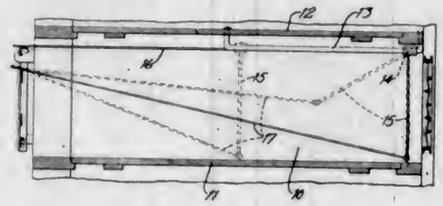


1. The proces of treating fruit and vegetable juices by passing the said juices through a body of treating solids, said solids being continuously moved over a filter wall.

1,686,096. CONTINUOUS EXPELLING AND CLARIFYING PROCESS AND APPARATUS. FRED W. MANNING, Berkeley, Calif. Filed Mar. 6, 1928. Serial No. 259,583. 7 Claims. (Cl. 210—194.)

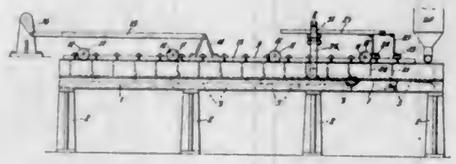
1. A process of the character described comprising disintegrating fruit or vegetables and removing the juices from the disintegrated solids in the absence of air.

1,686,097. RAILROAD TIE. ROBERT E. L. MAXEY, New York, N. Y. Filed Sept. 24, 1927. Serial No. 221,807. 6 Claims. (Cl. 238—42.)



1. In a railroad tie, a frame comprising T-shaped rail supports each including a main member and a depending flange, connecting rods mounted in the flanges and joining the supports, anchor rods mounted intermediate their ends in the flange of each support and having their inner ends spaced apart, and a body in which the frame is mounted.

1,686,098. INSULATED FLEXIBLE CONDUCTOR AND METHOD OF PRODUCING SAME. FRANZ MEIWALD, Vienna, Austria. Filed Apr. 29, 1927, Serial No. 189,731, and in Austria Dec. 14, 1926. 4 Claims. (Cl. 173—264.)

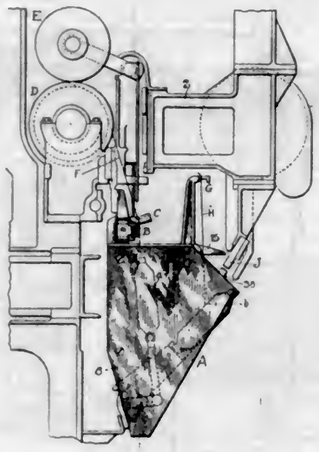


4. A flexible conductor comprising a conductor core, a suitable outer fabric covering, and an insulating band of substantially tissue-thin gutta-percha between the conductor core and cover and helically wound about the conductor core with the edges of its windings overlapping.

1,686,099. POULTRY-COOP UNLOADER. ARTHUR MILLER, Chicago, Ill. Filed Sept. 22, 1927. Serial No. 221,363. 3 Claims. (Cl. 217—64.)

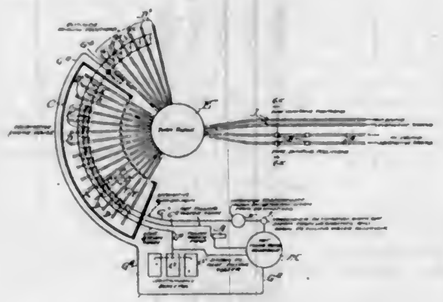
1. A poultry coop unloader comprising a partition slidably and hingedly mounted at its upper edge in the coop and normally located in a vertical position at the outer end of the coop, means for sliding said partition toward the inner end of said coop to move the contents forward, and means for swinging said partition from a normal vertical position to a substantially horizontal position adjacent the ceiling of the coop.

1,686,100. APPARATUS FOR THE ACTIVATION OR REVIVIFICATION OF CARBON. STANLEY A. W. OKELL, Tyrone, Pa., and LEONARD WICKENDEN, Flushing, N. Y., assignors to Industrial Chemical Company, New York, N. Y., a Corporation of New York. Filed Aug. 1, 1925. Serial No. 47,480. 8 Claims. (Cl. 266—15.)



1. In apparatus for activating or revivifying carbon, a long shallow trough provided with a longitudinal series of rakes, means for causing the rakes to oscillate longitudinally to and fro, the rakes being so shaped as to agitate and gradually propel the charge from rake to rake through the trough.

1,686,101. FILLER WEATHER STRIP. RICHARD O. OAKLEY, St. Louis, Mo. Filed Apr. 28, 1926. Serial No. 105,165. 2 Claims. (Cl. 20—69.)



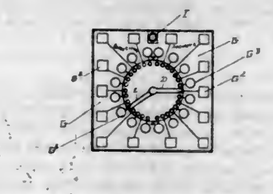
1. A filler weatherstrip applied between the parting bead of a window and the bottom and sides of a notch cut in the meeting rails of the window sash and comprising a front member and a body member of compressible material secured thereto, said front member having a contacting portion and attaching portions extending beyond said body member and positioned in a plane substantially parallel to the plane of said contacting portion and removed therefrom a distance substantially equal in thickness of said body member, and said attaching portion having a hole therein through which is passed the attaching means for securing the weatherstrip to said parting bead, said hole being larger than said attaching means.

1,686,102. WINDER. BURT A. PETERSON, Rockford, Ill., assignor, by mesne assignments, to Edgar S. Nethercutt, Evanston, Ill. Filed Sept. 11, 1919, Serial No. 323,194. Renewed Dec. 28, 1927. 52 Claims. (Cl. 242—35.5.)

15. The combination of a compartment having an open side and a floor inclined downwardly toward said side, a skewer arranged to support a bobbin in said compartment, and means to effect disengagement of the bobbin from the skewer within the compartment.

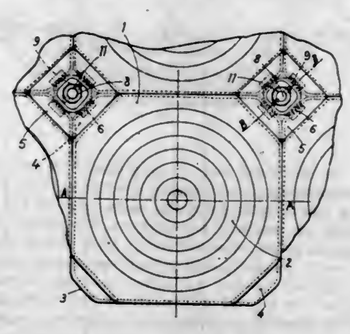
1,686,103. LOCOMOTIVE TERMINAL. LELAND G. PLANT, Chicago, Ill. Filed Nov. 29, 1926. Serial No. 151,445. 21 Claims. (Cl. 104—26.)

1. The method of storing steam locomotives at a terminal, which consists in discharging the locomotive fire at a fire dumping station, then placing the locomotive at the storage station, maintaining a working steam pressure with corresponding water temperature throughout the locomotive boiler while at the storage station and without fire in the locomotive, then moving the locomotive by self propulsion from the storage station, and thereafter igniting the fire and dispatching the locomotive for service.



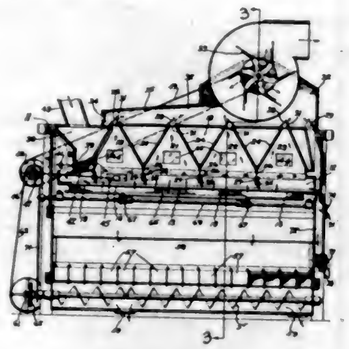
1,686,104. LOCOMOTIVE FRAME. JOHN D. RAUCH, Lima, Ohio, assignor to The Cast Steel Devices Co., Lima, Ohio, a Corporation of Ohio. Filed Apr. 30, 1926. Serial No. 105,645. 2 Claims. (Cl. 105—172.)

1. A locomotive frame comprising a single piece casting having a pair of side members with a plurality of pedestal recesses formed therein, and connecting means for said side members including a web connecting the upper margins of said side members, and a second substantially continuous web arched in longitudinal section over the upper



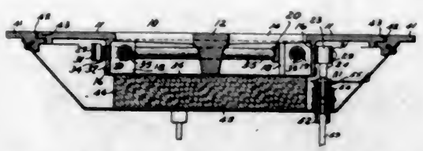
corners of said pedestal recesses and thence downwardly and along the bottom of said side members between adjacent recesses.

1,686,105. AMUSEMENT AND EDUCATIONAL DEVICE. LOUIS S. ROTHENBERG, Brookline, Mass. Filed Jan. 31, 1928. Serial No. 250,747. 3 Claims. (Cl. 35—12.)



1. An educational device of the type described, comprising a base, a dial on the base having indicia thereon, a pair of pointers rotatably mounted on the base and insulated from each other, a source of electrical energy to one of the respective poles of which each pointer is connected, an alarm in the circuit of one pointer, and a plurality of contacts associated with the indicia on the dial and arranged in the paths of movement of the pointers, pairs of said contacts being connected in circuit so that when the pointers are in contact with any one of the pairs the circuit will be completed to the alarm.

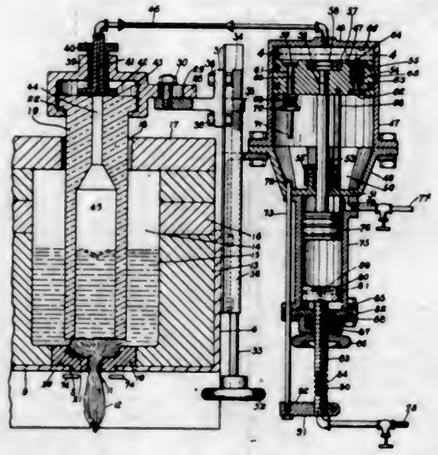
1,686,106. METALLIC FLOORING PLATE FOR SHOPS AND LIKE USES. LÉON SAIVES, Billancourt, France, assignor to Louis Renault, Billancourt, France. Filed Feb. 4, 1928, Serial No. 251,984, and in France Nov. 10, 1927. 2 Claims. (Cl. 94—13.)



1. In a metallic flooring for factories, pressed metal plates of square form provided with four small sides at the corners completing an octagonal form, a downward flange on the edges of the metal plates and recesses on the surface of the plates in front of the small sides, an upper concave member of square form fitting into the recesses of four adjacent plates, an under concave member underneath engaging the flanges of the same adjacent plates, and means for clamping together the two concave members.

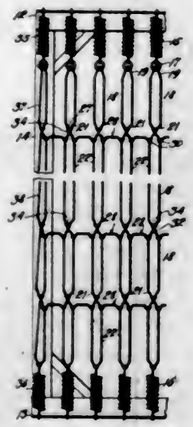
1,686,107. AIR-CONTROLLED PURIFIER. WILBUR S. SEWELL, Minneapolis, Minn., assignor to Strong-Scott Manufacturing Co., Minneapolis, Minn., a Corporation of Minnesota. Filed Sept. 8, 1925. Serial No. 55,073. 7 Claims. (Cl. 209—28.)

1. An apparatus of the class described comprising a frame, a vibrating sieve whereto the material to be separated is delivered, means dividing the space above said sieve into a series of separate air chambers having transverse walls converging upwardly at substantially the same angle from said sieve whereby the suction will be substantially uniform in all the chambers, each chamber having a discharge throat or opening transversely of the sieve, said converging walls extending to the top of said chambers and near said openings, means for establishing currents of air selectively through sections of said sieve and through said chambers and openings, the air currents operating upon the material to separate the lighter from the heavier particles, and guided to said openings by said converging walls, and means for controlling the flow of the air currents through said sieve and chambers.



1,686,108. ELECTRICAL HEATING APPARATUS. HAROLD N. SHAW, Milwaukee, Wis., assignor, by mesne assignments, to Globar Corporation, Philadelphia, Pa., a Corporation of New York. Filed Dec. 3, 1925. Serial No. 72,880. 24 Claims. (Cl. 219—37.)

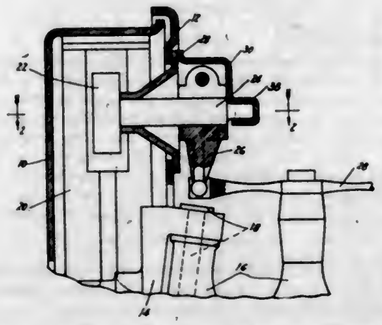
1. In an electrical heating appliance, in combination with a supporting frame having apertured wall portions extending downwardly from the upper edge of the frame, a plurality of contacts mounted on the under side of said frame in substantial alinement with alined apertures in said wall portions, and a self-sustaining resistance heating element having a portion movable through an aperture in one of said wall portions and yieldingly and detachably mounted in electrically operative position by said contacts through butt-end engagement between said contacts and said heating element.



1,686,109. GLASS-FEED-CONTROL MECHANISM. SAMUEL G. STUCKEY, Middletown, Ohio. Filed May 5, 1926. Serial No. 106,935. 13 Claims. (Cl. 49—55.)

13. In an apparatus for controlling the feed of molten glass, the combination of a tubular member with an open end adapted to be immersed in a body of molten glass above a discharge opening, an air conduit leading from the upper portion of the said tube, a cylinder with which the conduit connects, a control piston movable in the said cylinder, means for reciprocating the piston to cause alternate conditions of pressure and vacuum in the tubular member above the molten glass therein, control means for

varying the quickness of movement of the control piston to produce pressure conditions, and other control means to vary the quickness of movement of the piston to produce vacuum conditions, such control means being operable independently of each other and of the speed of the apparatus as a whole.

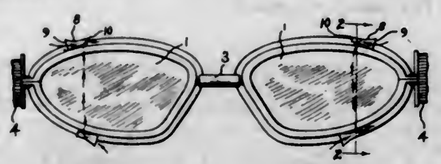


1,686,110. WIRE FABRIC. HYMAN TAMPKIN, Brooklyn, N. Y. Filed Jan. 19, 1928. Serial No. 247,790. 3 Claims. (Cl. 245—5.)

1. A wire fabric including alternate rows of links, one row comprising spaced links which extend in one general direction, the closed end of each of the spaced links having a contracted engaging portion, such engaging portion joining the sides of each of said links by inwardly bowed portions, and the opposite ends of each such link having eyes; and the second row of links comprising links which extend generally transversely to the general direction of the links of the other row, and each of such links of the second row provided with arms which extend in the same general direction as the links of the other row, said arms having eyes, whereby two eyes of adjoining links of such second row of links engage the contracted

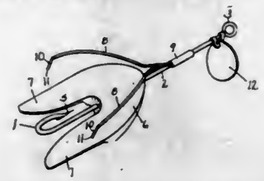
portion of a spaced link and so on across the fabric, each of the second row links having two spaced loop portions, and the loop portions of each second row link respectively engaged with one of the eyes of a link of the other row and one of the eyes of the next link of the other row and so on across the fabric, whereby the links of the two rows are arranged in offset relation, such construction and arrangement being repeated throughout the fabric.

1,686,111. BRAKE-OPERATING MEANS. GEORGE J. THOMAS, South Bend, Ind., assignor to Bendix Brake Company, Chicago, Ill., a Corporation of Illinois. Filed Feb. 4, 1927. Serial No. 165,794. 8 Claims. (Cl. 188—194.)



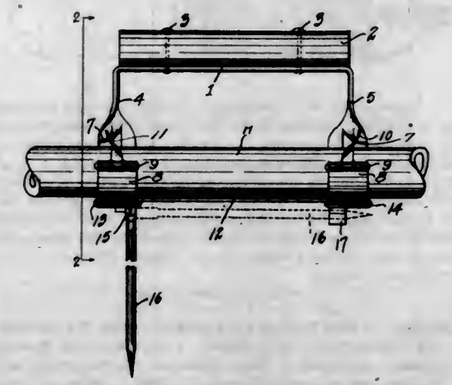
4. Brake-operating means comprising, in combination, a backing plate formed with an opening, a brake-applying shaft passing through said opening, a pair of stampings both of which are arranged on the outer side of the backing plate and which are formed with coaxial integrally-drawn sleeves in which said shaft is journalled, and means for securing said stampings to the backing plate.

1,686,112. SEPARATION OF ALUMINA FROM ALUM. GEORGE S. TILLEY, Mill Valley, Calif. Filed June 3, 1927. Serial No. 196,402. 5 Claims. (Cl. 23—142.)



3. In the treatment of potash alum, the herein described improvement which comprises heating the crystallized alum first to a temperature substantially below that at which it would melt in its water of crystallization, maintaining the temperature for a sufficient period to remove over one half of the water of crystallization, thereafter heating said material to a sufficiently higher temperature to drive off the SO_3 which is initially combined with the alumina.

1,686,113. GOGGLES. EDGAR D. TILLYER, Southbridge, Mass., assignor to American Optical Company, Southbridge, Mass., a Voluntary Association of Massachusetts. Filed July 5, 1927. Serial No. 203,410. 2 Claims. (Cl. 2—14.)

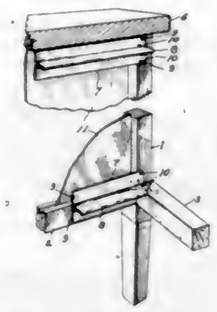


1. In a device of the character described in combination with an eye cup provided with a lens and means for holding the eye cup tightly against the face and openings through the walls of the eye cup, one on the top and the other on the bottom thereof, said openings being spaced intermediate the ends of the eye cup, and a funnel shaped tube over each opening extending longitudinally of the eye cup and having the opening through the tube communicating with the opening in the eye cup at a point intermediate the ends of the tube, the larger end of one tube being on the nasal side and the larger end of the other tube on the temporal side of the respective openings through the eye cup whereby air rushing through one tube will cause a suction to exhaust air from the interior of the eye cup and to draw fresh air into the eye cup through the other tube.

1,686,114. FISH BAIT OR LURE. CLARENCE H. WALTER, Niles, Mich. Filed Aug. 22, 1927. Serial No. 214,759. 3 Claims. (Cl. 43—39.)

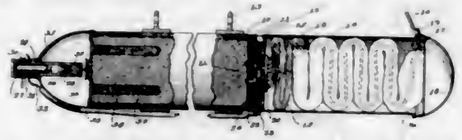
1. A fish bait or lure comprising a hook provided with a shank of substantial length, a weight on said shank projecting oppositely from the point of the hook, a body of resilient material molded on said shank to embrace said weight and having relatively thin spaced wings lying at the sides of the hook and in a plane below the plane at the point of the hook, the wings being of substantial width to afford substantial transverse resistance and a pair of rearwardly diverging spring guard arms secured to said shank in advance of said body and projecting over the same with their rear ends normally in a plane above the plane of the point of the hook and overlying said wings coacting therewith to guard the point of the hook.

1,686,115. HOSE HANDLE. WILLIAM ANDERSON, Spokane, Wash. Filed Aug. 29, 1927. Serial No. 216,154. 4 Claims. (Cl. 294—15.)



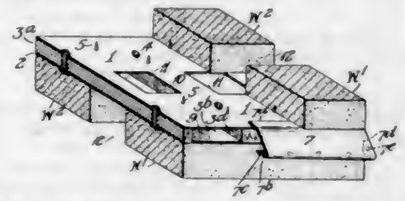
1. A hose handle comprising a blade having spaced angular arms and resilient locking tongues on said arms, the ends of said arms terminating in bands to encircle a hose, and locking latches hinged at the free ends of the bands for locking engagement with the tongues.

1,686,116. FURNITURE CONSTRUCTION. ELMER E. ASH, Los Angeles, Calif. Filed Oct. 30, 1925. Serial No. 65,755. 1 Claim. (Cl. 45—77.)



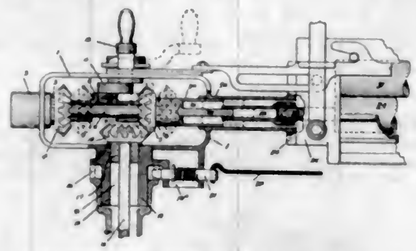
In an article of furniture formed of metal and wood and having a supporting frame formed of wood including wooden posts and wooden front cross rail, a series of superposed drawers between said posts, each drawer having a sheet metal body and a front end formed of wood with the wooden end overlapping the end edges of the body, guides for said drawers comprising members formed of sheet metal and each provided with an outstanding rib which is thin

in cross section to project between adjacent superposed drawers with the upper drawer resting upon said rib and the upper edge of the drawer below engag'ng the underside of said rib, said drawers being spaced apart the thickness of said rib only, and each guide formed with a flange extending upwardly from said rib and a flange extending



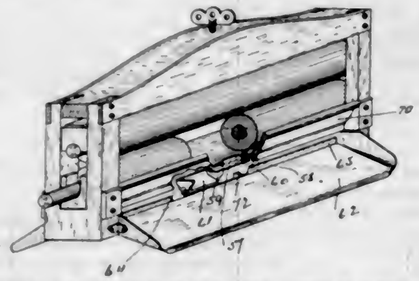
downwardly therefrom, said flanges being secured at their ends to the inner sides of sa'd posts, certain of said guides being secured within the meeting angle between said posts and front rail of said wooden frame with a flange of each guide secured to a post and an end portion of said rib secured to said rail, whereby said metal guides form a brac'ng for said wood frame.

1,686,117. PARACHUTE FLARE. GUY M. BALL, Dayton, Ohio. Filed Mar. 18, 1924. Serial No. 700,102. 14 Claims. (Cl. 102—24.)



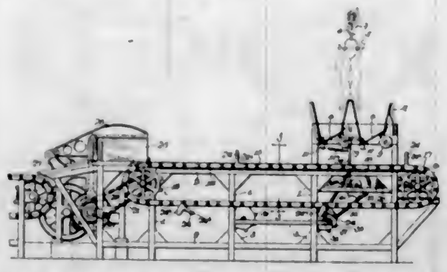
1. A parachute flare for droppage from aircraft comprising a candle, a casing about the same extending beyond the ends thereof, a firing charge and firing means held in normally safe condition in one end of said casing, a parachute packed in the opposite end of said casing connected with said candle, a tube extending from the end of said casing to the parachute end, and an arming wire extending through said tube fastened to the parachute and releasably holding said firing means safe to release the same when the flare is dropped.

1,686,118. VENTILATION ELEMENT FOR WALL CONSTRUCTION AND THE LIKE. DAVID WILLIAM BARRIE, Auburn, Australia. Filed June 24, 1926, Serial No. 118,186, and in Australia Aug. 19, 1925. 7 Claims. (Cl. 72—127.)



1. A metal damp course and ventilating block for arrangement transversely in an upright wall, comprising spaced metal plates, spacing means disposed between the plates and secured thereto to afford air passages from one face to the other of the wall.

1,686,119. WRINGER. WILLIAM GEORGE BEATTY, Fergus, Ontario, Canada. Filed Nov. 30, 1926. Serial No. 151,805. 12 Claims. (Cl. 68—32.)

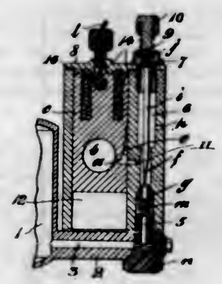


1. A wringer comprising a set of rolls, a cover part including a spring for exerting pressure on the rolls, driving means or rotating the rolls, and a reciprocatory locking bar for securing the cover part and maintaining the spring in its pressure exerting relation with the rolls, said reciprocatory locking bar having operable connection with the driving means and when actuated to release the pressure of the spring on the rolls simultaneously controlling the action of the driving means for the stoppage of the rotation.

1,686,120. WRINGER. WILLIAM GEORGE BEATTY, Fergus, Ontario, Canada. Filed Nov. 30, 1926. Serial No. 151,806. 7 Claims. (Cl. 68—32.)

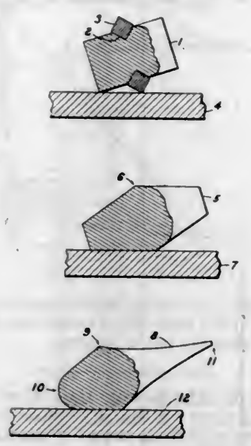
1. A wringer comprising a wringer frame, wringer rolls therein, a drainage orifice at the bottom of the frame, and an adjustable spout having two water chutes set in opposite directions for delivering the discharge from the orifice at either selected side of the wringer, movable lengthwise of the rolls to bring either chute into operative relation with the orifice.

1,686,121. MACHINE FOR TRANSFERRING AND CHOPPING ANIMAL CARCASSES. BERNARD G. BRENNAN, Chicago, Ill. Filed Oct. 26, 1925. Serial No. 64,728. 12 Claims. (Cl. 198—53.)



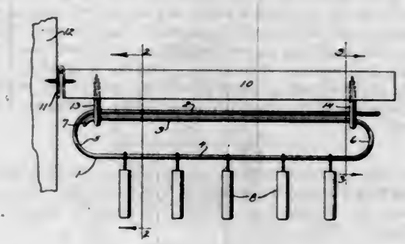
7. In meat-handling apparatus including means for supplying split carcasses, a two-compartment hopper having a pair of trap doors arranged to close the bottoms of the two compartments, latching means arranged to hold said trap doors closed, conveyor means including pusher members arranged to pass successively under said hoppers, and means for releasing both latches simultaneously at the passage of every alternate pusher underneath the hopper.

1,686,122. MEAT-CUTTING TABLE. BERNARD G. BRENNAN, Chicago, Ill. Filed Oct. 26, 1925. Serial No. 64,729. 6 Claims. (Cl. 198—135.)



1. A machine for conveying meat sides and the like past work stations for performing particular operations thereon, said machine comprising front and rear rotatable idler members and an articulated endless conveyor table engaging said idler members, said conveyor table being equipped with contact members spaced apart the distance between work stations, and an actuating member arranged to successively engage said contact members and shift said table the distance between such members.

1,686,123. CARBURETOR FOR INTERNAL-COMBUSTION ENGINES. CLEMENT BROWN, Birmingham, England. Filed Sept. 27, 1920, Serial No. 413,150, and in Great Britain Sept. 13, 1919. 2 Claims. (Cl. 261—62.)

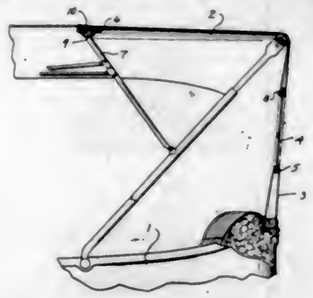


1. A carburetor having a casing provided on opposite walls with openings in alinement with each other, a throttle valve rectilinearly movable within said casing and having an opening adapted to aline with said first named openings in a predetermined position of the valve, a fuel mixture chamber having a passage communicating with the casing and the throttle valve having a passage extending from the opening therein angularly to the direction of the movement of the throttle valve to an edge portion of the valve, said throttle valve passage communicating on the edge portion with recesses of graduated depth adapted to be moved successively into opposition to the passage leading from the fuel mixture chamber and adapted to maintain communication between the fuel mixture chamber and the openning in the throttle valve at any position of said throttle valve.

1,686,124. SURFACE PROJECTILE. ELBERT O. BROWER, Huntington, N. Y. Filed Apr. 21, 1928. Serial No. 271,788. 5 Claims. (Cl. 273—128.)

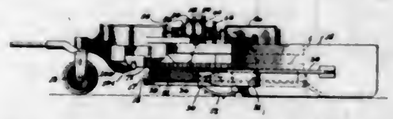
1. A surface projectile consisting of an elongated body of greatest diameter near its center of gravity; the form of this portion of said body being abruptly tapered longitudinally in both directions from the circumference of said diameter.

1,686,125. CLOTHES-HANGER HOLDER. ANNIE L. CHUBB, Oakland, Calif. Filed Feb. 19, 1927. Serial No. 169,522. 4 Claims. (Cl. 211—123.)



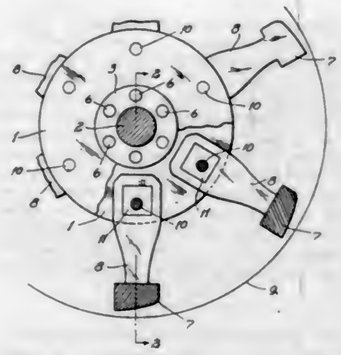
3. A clothes-hanger holder comprising a support, a ring depending from the support, a hook depending from the support and spaced from said ring; a rod comprising a straight end portion, a bent portion extending parallel with said straight end portion, a rebent portion extending between said straight end and said bent portion and in parallelism therewith; said straight portion and rebent portion being spaced so as to allow the straight portion to be threaded thru the eyes of a hanger and thru said ring, the end of said straight portion and the rebent portion to be removably suspended so as to prevent the accidental removal of said rod from said ring and the accidental removal of said hangers, said ring and said hook supporting said hanger rod in substantially a horizontal position.

1,686,126. REAR-CURTAIN-LIGHT SUPPORT. ALBERT A. CRIPPS, Detroit, Mich., assignor, by mesne assignments, to Dodge Brothers Inc., a Corporation of Maryland. Filed Oct. 24, 1923. Serial No. 670,410. 6 Claims. (Cl. 296—145.)



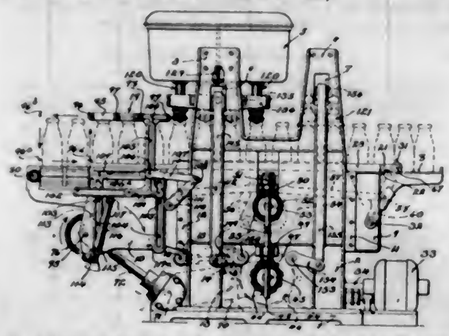
1. In a folding top, a rear curtain, a light in said curtain, and means out of operation when the top is raised and ar-

ranged to be put in operation when the top is lowered for supporting one end of the light in a position in or adjacent



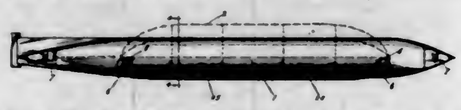
the plane between the points of attachment of the top and bottom edges of the rear curtain to the body and top frame respectively when the top is lowered.

1,686,127. APPARATUS FOR HANDLING LOOSE MATERIAL. CHARLES E. DAVIS, Chicago, Ill., assignor to Goodman Manufacturing Company, Chicago, Ill., a Corporation of Illinois. Filed Dec. 30, 1924, Serial No. 758,948. Renewed Mar. 5, 1928. 5 Claims. (Cl. 37—115.)



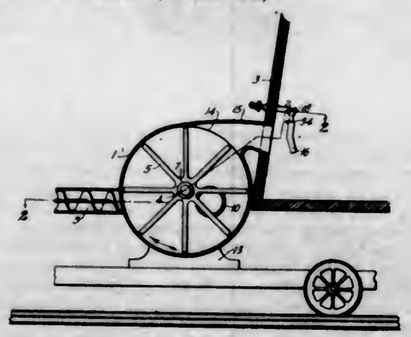
1. In an apparatus of the class described, a movable head frame, a draft operated scraper having lateral bearing engagement with said head frame while being moved thereabout, and auxiliary power means on said head frame for moving said scraper thereabout including a laterally projecting arm extending around the rear end of the scraper to engage the outer side thereof adjacent the forward end thereof.

1,686,128. ADJUSTABLE HAMMER FOR DISINTEGRATORS AND THE LIKE. WILLIAM M. DUNCAN, Alton, Ill. Filed Aug. 1, 1927. Serial No. 209,747. 8 Claims. (Cl. 83—11.)



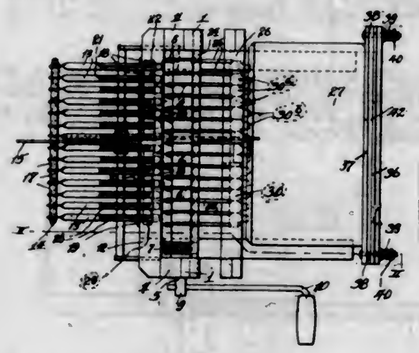
1. In a disintegrator, a rotary carrier, a pivot carried by said carrier, a hammer-support pivotally mounted on said pivot, and a hammer carried by said support, said support being adjustable to vary the position of the hammer relative to the axis of said pivot.

1,686,129. BOTTLE-HANDLING MACHINE. GEORGE A. FULLIPS, Milwaukee, Wis. Filed Dec. 22, 1925. Serial No. 76,994. 10 Claims. (Cl. 198—31.)



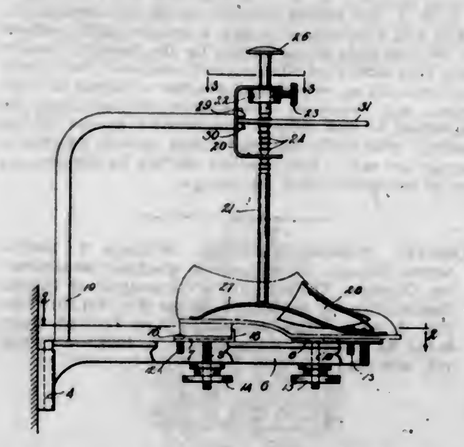
1. A bottle handling machine comprising a table, means for raising and lowering said table to accommodate different sizes of bottles, a main conveyor adapted to engage a plurality of bottles arranged in a plurality of longitudinal rows and to simultaneously advance said bottles longitudinally of said table, a supply conveyor adapted to deliver bottles in rows to said table, and a transfer conveyor adapted to engage an entirely transverse row of bottles and simultaneously move such row into reach of said main conveyor, whereby a simultaneous feed of a plurality of longitudinal rows of bottles along said table, is secured.

1,686,130. AIRCRAFT. CHARLES S. HALL, Los Angeles, Calif. Filed May 16, 1922, Serial No. 561,513. Renewed Feb. 9, 1926. 12 Claims. (Cl. 244—5.)



1. In an aircraft, the combination of; a plurality of cylindrical gas containers held together in parallel arrangement with respect to the normal line of flight arranged to provide an unobstructed V-shaped space between them; and a collapsible auxiliary gas container occupying said space substantially as shown.

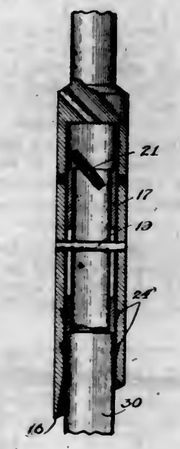
1,686,131. METHOD AND APPARATUS FOR FEEDING COAL. HENRY H. HAMILTON, Columbus, Ohio. Continuation of application Serial No. 611,598, filed Jan. 9, 1923. This application filed June 16, 1923. Serial No. 645,743. 9 Claims. (Cl. 110—15.)



1. The method of feeding coal which consists in elevating and projecting the coal into the furnace with one continuous motion, separating the fine coal from the coarse coal and delivering the coarse coal to predetermined areas of the furnace.

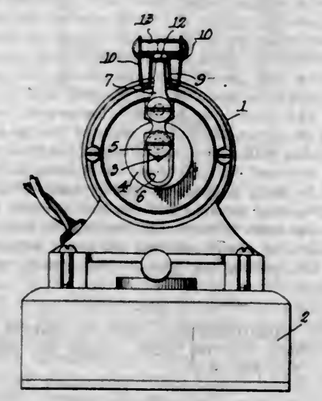
1,686,132. METHOD OF CUTTING AND WRAPPING INDEX TABS. THOMAS E. HEETER, St. Louis, Mo. Filed Apr. 20, 1927. Serial No. 185,336. 4 Claims. (Cl. 93—2.)

1. The method of making index tab strips consisting of cutting a tab strip into sections, of holding the sections in a projected position after cutting them into sections, of inserting the projected portions of the sections into respective apertures of a wrapping cover, and of finally wrapping the sections in said cover.



1,686,133. SUPPORT FOR POLISHING SHOES. HENRY HILL, Brockton, Mass. Filed Nov. 22, 1926. Serial No. 149,907. 7 Claims. (Cl. 12—128.)

1. A support for shoes to be polished comprising a bracket having rests for the heel and toe of a shoe, a spring plate adapted to fit within the shoe and bear upon the insole thereof, a plunger movable downwardly into contact with said plate and upwardly out of the shoe, so that the shoe may readily be placed upon and removed from the rests when the plunger is lifted, and means for forcing the plunger downwardly to depress the spring plate and thereby to hold the shoe in fixed position upon said rests.

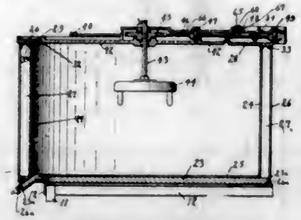


1,686,134. SLIP-RING SOCKET. FRANK J. HINDERLITER, Tulsa, Okla. Filed Oct. 19, 1927. Serial No. 227,194. 12 Claims. (Cl. 294—110.)

1. In combination, in a device for fishing tool parts from a well, a tubular body member, slip means carried by and disposed within said body member, and a slidable sleeve disposed within and concentric with said body member arranged to normally hold the slip means in place and being

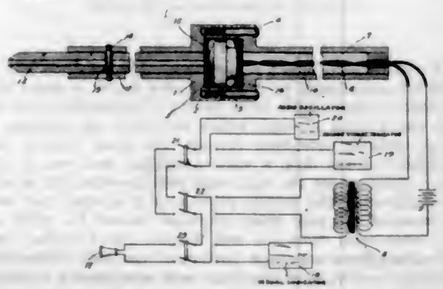
movable upon it contacting the tool member to be removed from the well to allow the slip means to grip the tool member as said slip means is uncovered.

1,686,135. MIXER. JOSEPH H. HURDLE, Mebane, N. C. Filed Oct. 19, 1926. Serial No. 142,065. 1 Claim. (Cl. 259—75.)



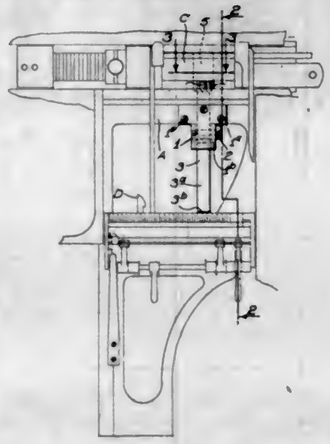
A mixing attachment for an electric motor including a disk for attachment to the shaft of a motor, a wrist pin extending therefrom, a lever having a longitudinal slot in one end portion through which the wrist pin extends, a pivot member extending through the lever beyond the periphery of the disk, a yoke straddling that end of the lever remote from the slot, said yoke constituting means for supporting the middle portion of a capsule, the side portions of the yoke being extended toward the pivot of the lever away from the end thereof, and a spring arm extending from each side portion of the yoke outwardly past and spaced from the yoke, each arm having a recess in its free end portion, and a capsule insertable laterally between the spring arm to position on the yoke and in the recesses.

1,686,136. METHOD OF OBTAINING NITROGENOUS BASES FROM HYDROCARBON MATERIALS. HARRY K. IHRIG, Martinez, Calif., assignor of one-half to Sumner E. Campbell, Associated, Calif., and one-half to Associated Oil Company, San Francisco, Calif., a Corporation of California. Filed Dec. 21, 1926. Serial No. 156,249. 2 Claims. (Cl. 260—1.)



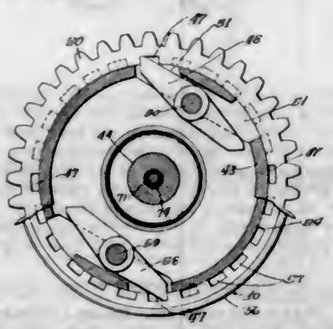
2. The method of obtaining nitrogenous bases which comprises obtaining a crude gasoline from a hydrocarbon material; treating said crude gasoline with a reagent to form compounds with the nitrogenous bases; separating the reaction compound; making said reaction compound alkaline; distilling the alkaline liquor containing said compounds to separate the nitrogenous bases in two types, soluble and insoluble, respectively, in water; separating said types, one from the other, in accordance with their differential solubility.

1,686,137. WASHING MACHINE. ALBERT S. KIBBY, Perry, Iowa, assignor of one-half to National Sales Company, Des Moines, Iowa, a Corporation of Iowa. Filed Feb. 19, 1925. Serial No. 10,310. 1 Claim. (Cl. 220—9.)



In a washing machine, the combination of a base member, an open top tub mounted on the base member, the periphery of the base member extending beyond the tub, a cover for the tub having two downwardly projecting flanges thereon spaced apart from each other, the inner one being designed to engage the outer edge of the top of the tub, a heat retaining wall member formed of sheet metal and cylindrical in form and of a diameter considerably greater than that of the tub, and having its lower edge resting against the periphery of the base and its top edge engaging the outer one of said downwardly extending flanges on the cover, the upright walls of the tub and of the heat retaining wall and the portions of the base and cover members arranged between these walls being substantially air tight to form a dead air space, and bolts extended through the cover member and the base member and lying wholly in the space between the tub and the heat retaining wall member for firmly securing the cover member to the tub and for holding the heat retaining wall member in position.

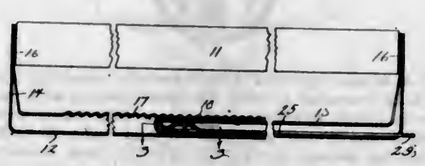
1,686,138. VIBROMETER. ORIN E. MARVEL, Dayton, Ohio. Filed Oct. 19, 1922. Serial No. 595,704. 3 Claims. (Cl. 179—1.)



1. In combination, a sound transmitting member comprising a housing, a michrophone transmitter therein, a soft disc like pad between one side of the transmitter and the housing, an element movably supported by said housing and adapted to contact with an external vibrating body to transmit the vibrations to said transmitter, means limiting the movement of said element relative to the housing, and a soft pad of material between said element and said microphone transmitter.

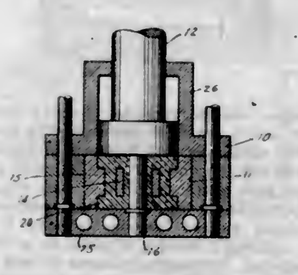
1,686,139. ELEVATOR-CONTROL ATTACHMENT FOR TYPESETTING MACHINES. DENIS P. MCLAUGHLIN, San Diego, Calif. Filed Oct. 13, 1926. Serial No. 141,256. 3 Claims. (Cl. 199—26.)

1. In a type setting machine having an assembly elevator and a delivery slide bar, a support rigidly secured to the base plate of the support for the assembly elevator of a type setting machine, a gravity actuated lever pivotally mounted on said support adapted to engage said elevator, stop means on said support for regulating the movement of said lever, a cam member secured on the delivery slide bar of the type setting machine adapted to engage one end of said lever for shifting its opposite end out of engagement with the elevator.



1,686,140. MINING MACHINE. WILLIAM T. MCCULLOUGH, Chicago, Ill., assignor to Goodman Manufacturing Company, Chicago, Ill., a Corporation of Illinois. Continuation of application Serial No. 434,591, filed Jan. 3, 1921. This application filed Dec. 29, 1922, Serial No. 609,617. Renewed Mar. 5, 1928. 3 Claims. (Cl. 262—30.)

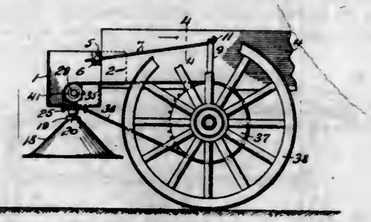
1. In a mining machine the combination of two winding drums each associated with a flexible cable, driving means



operable to rotate each of said drums in a direction to wind its cable thereon, retarding means operable to automatically engage each of said drums when it is rotated to unwind its cable thereon, and means associated with each drum for simultaneously disengaging both driving means, and retarding means whereby the cable may be unwound freely of said driving and retarding means.

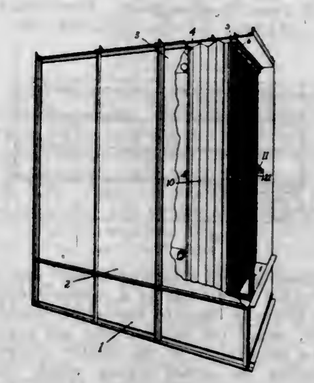
1,686,141. CURTAIN ROD. CLARENCE E. BLAKELY, Ute, Iowa, assignor of one-half to Wilbur A. Blakely, Grand Center, Iowa. Filed June 27, 1927. Serial No. 201,751. 5 Claims. (Cl. 156—23.)

4. In a device of the class described, a pair of telescoping curtain rod members provided at their outer ends with brackets having clamping jaws, adapted to engage the ends of a casing member, the end of one telescoping member being adapted to engage and lock against the wall of the other telescoping member in any of a number of positions, so closely spaced as to enable the creation of tension between the brackets such as to result in pressure of the clamping jaws against the ends of said casing member and friction elements carried by the clamping jaws and adapted to engage the ends of said casing member, the brackets being semi-resilient so as to transform said tension into permanent pressure of the clamping jaws, the locking resulting from bending strain imposed upon the telescoping member by said tension and pressure.



1,686,142. COMPOSITE MOLDED ARTICLE. LE BONSIEUR, Elyria, Ohio. Filed Apr. 29, 1927. Serial No. 187,501. 9 Claims. (Cl. 18—59.)

1. As an article of manufacture, a wheel comprising a frame of phenolic condensation product composition, or the like, and a body of rubber comprising a tire portion molded into the frame and held by portions thereof continually compressed by the confining frame portions.

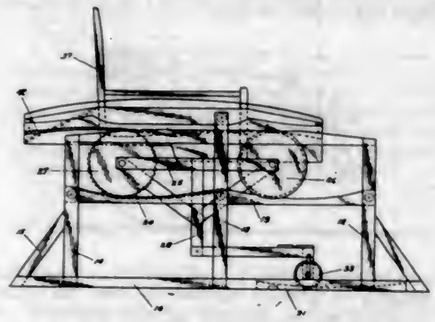


1,686,143. LIME SPREADER. CLAUDE D. BOUSMAN, Kansas City, Kans. Filed Jan. 18, 1926. Serial No. 82,001. 1 Claim. (Cl. 275—2.)

In a lime spreader of the kind described, the combination with the bed and two opposite bolster standards of a wagon, said standards having each a hole therethrough, of a hopper having a front mouth portion extending a substantial distance into the rear open end and resting on the bottom and disposed between the sides of said bed, said hopper at its opposite ends having two plates each having a hole alining with the hole of the adjacent standard, two rods respectively extending through the holes of said standards and through the holes in said plates and having

threaded rear ends and each having a hook at its forward end engaging the adjacent standard, and two nuts adjustably mounted on the threaded portions respectively of said rods and bearing respectively against the rear sides of said plates.

1,686,144. AIR-WASHER STRUCTURE. ALVIN H. COLBERT, Chicago, Ill. Filed Jan. 28, 1926. Serial No. 84,340. 5 Claims. (Cl. 183—22.)

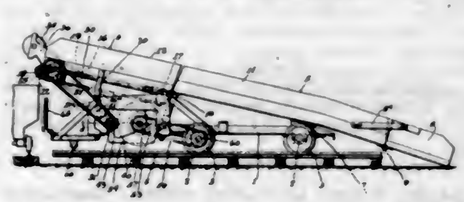


1. In an air washer, a casing, a plate structure comprising vertically disposed eliminator plates, a base with cross bars having longitudinal top grooves thereon, spacers formed with engaging lugs to engage said grooved bars, notched top bars with U-shaped bar means for supporting the same in the top of said casing, an intermediate angle cross bar secured by brackets to the walls of said casing and having its vertical member disposed in proximity to the edge of the eliminator plates and its horizontal member projecting outwardly therefrom, a connecting bracket for one of said plates comprising a sheet metal strap folded upon itself forming an eye at its outer end, a vertical clamp bolt disposed in said eye to clamp and engage the horizontal member of said angle bar, and spacers of hook form to engage over the vertical member of said angle bar and extend between the eliminator plates beyond the edge.

1,686,145. PORCH AND LAWN SWING. LESTER GUY COOK, Lincoln, Nebr. Filed Feb. 1, 1927. Serial No. 165,137. 1 Claim. (Cl. 155—57.)

A porch swing including a frame having a pair of arcuate racks at the sides thereof and having a pair of arcuate tracks forward of said arcuate racks and having also a pair of arcuate tracks below and forward of said first named tracks, a seat member having a rear shaft provided with a pair of pinions secured thereto for traveling on said arcuate racks, a pair of wheels supporting the forward

portion of said seat member and adapted to travel in said first named tracks, a foot rest platform pivotally secured at the rear extremity thereof to said seat member, and a



pair of wheels for traveling in said second named arcuate tracks and supporting the forward portion of said foot rest platform.

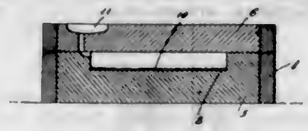
1,686,146. HEATER FOR WINDSHIELDS. ROBERT T. CUMMINGS, Spokane, Wash., assignor of one-half to Everett H. Price, Spokane, Wash. Filed Jan. 31, 1927. Serial No. 164,939. 1 Claim. (Cl. 219—19.)

The combination with a heating element and a heating gravity actuated circuit having a normally open circuit breaker, of manually operated means for closing the circuit breaker, means for automatically and gradually increasing the temperature of the heating element, means for determining the period during which the circuit breaker is closed, and automatic means for opening the circuit at the end of this period.

1,686,147. SCRAPER LOADING DEVICE. CHARLES E. DAVIS, Davenport, Fla., assignor to Goodman Manufacturing Company, Chicago, Ill., a Corporation of Illinois. Filed Feb. 29, 1924, Serial No. 695,895. Renewed June 29, 1927. 13 Claims. (Cl. 214—93.)

1. A combined loading chute and transportation device comprising a wheeled truck having a main frame and an inclined chute on said frame comprising upper and lower portions normally in alignment with each other, the lower portion being mounted for rocking movement intermediate its ends on said main frame and adjustable into substantially horizontal position with its upper end in supporting engagement with said frame.

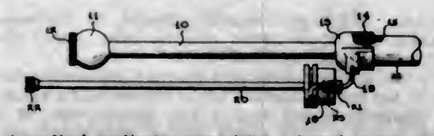
1,686,148. SCRAPER. CHARLES E. DAVIS, Davenport, Fla., assignor to Goodman Manufacturing Company, Chicago, Ill., a Corporation of Illinois. Filed Mar. 26, 1923, Serial No. 627,548. Renewed Sept. 7, 1926. 7 Claims. (Cl. 37—115.)



2. A scraper provided with forwardly extending walls pivotally connected at their rear ends whereby said walls may be moved laterally respective to each other, means limiting the inward movement of said walls, a flexible connecting member having its terminals each connected with one of said walls, and a drag line connected to the central portion of said flexible connecting member.

1,686,149. TREATMENT OF FABRICS. GEORGE HOLLAND ELLIS, Spondon, near Derby, England, assignor to Celanese Corporation of America, a Corporation of Delaware. Filed Dec. 3, 1926, Serial No. 152,515, and in Great Britain July 27, 1926. 17 Claims. (Cl. 8—20.)

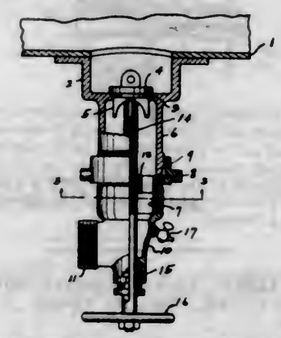
1. Process for the treatment of fabrics to render them less liable to develop faults, comprising impregnating the fabrics with strong aqueous solutions of dispersing agents.



1,686,150. ABRASIVE SURFACE AND METHOD OF MAKING SAME. COLIN G. FINK and ARTHUR H. KOPP, New York, N. Y., assignors to American Abrasive Metals Company, a Corporation of New York. Filed Mar. 14, 1927. Serial No. 175,353. 13 Claims. (Cl. 22—202.)

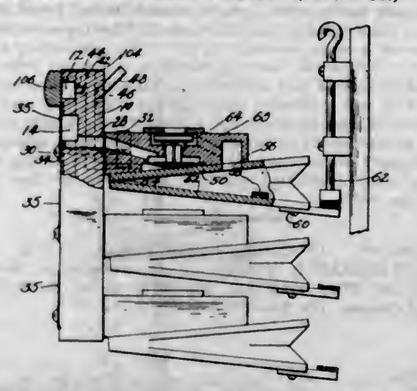
1. An article adapted to resist abrasion comprising a base of cast metal, grains of wear-resisting material embedded in the surface of said base, and a localized metal alloy immediately surrounding each of said grains, the remainder of said base being free of said alloy.

7. The method of producing an article adapted to resist abrasion, which method includes forming a mold for the article, applying a coating of metal to grains of wear resisting material, distributing a layer of said previously coated grains on a surface of said mold adapted to shape a surface of said article, and pouring molten metal into said mold.



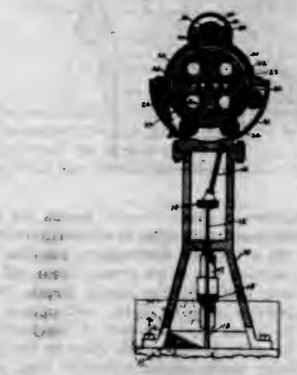
1,686,151. MEDICAL APPLICATOR. CLARENCE ELMER FREY, Lincoln, Nebr. Filed Aug. 17, 1926. Serial No. 129,753. 1 Claim. (Cl. 128—234.)

A medical applicator comprising a barrel, a cap swingingly connected with the barrel at the end remote from



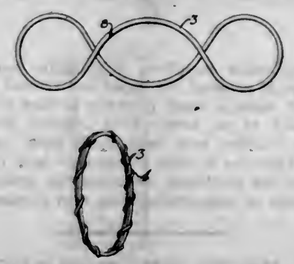
the discharge mouth, and a plunger snugly fitting the bore of the barrel and provided with a staff extending through and guided by said cap, the cap and plunger staff being swingable into a position in parallelism with the barrel or into a position where the staff is axially aligned with the bore of the barrel, the staff, when the plunger is engaged in the bore of the barrel, retaining the cap in closed position.

1,686,152. VALVE LIFTER. JOHN C. GARROTT, Houston, Tex. Filed Dec. 20, 1926. Serial No. 155,863. 4 Claims. (Cl. 251—157.)



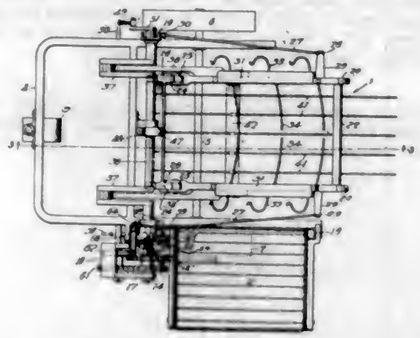
1. A device of the character described including a valve casing having a reduced tubular depending neck, a web separating said casing and neck having an opening therein and a valve seat surrounding said opening, an upwardly opening valve in the casing controlling said opening, a hose connection depending from and having a swiveling connection with said neck, a valve lifting rod extending through said connection and neck and aligned underneath the valve and a spider in said connection having a tapped bearing through which said rod is threaded.

1,686,153. PLAYER PIANO. CHRISTIAN GULBRANSEN, Chicago, Ill., assignor to Gulbransen Company, Chicago, Ill., a Corporation of Illinois. Filed Oct. 16, 1924. Serial No. 743,866. 8 Claims. (Cl. 84—50.)



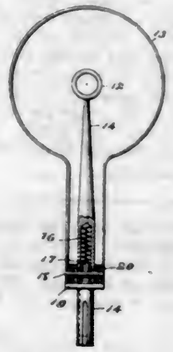
1. In a pneumatic stack, in combination, a channel board having three large grooves and one small groove formed in one face thereof, a direct connection to each large groove for delivering suction thereto, three tiers of unit pneumatics secured against the opposite face of said board and positioned to register with said large grooves, fastening screws for each unit pneumatic extending through solid portions of said board to the opposite side for convenient access, transverse equalizing passages extending in from one edge of said board to inter-connect all four grooves, transverse individual control passages extending in from the same edge past said grooves near the opposite face of said board to register with said unit pneumatics, bleed passages connecting each control passage with the small groove, tracker bar passages extending in at an angle from the ungrooved face of the board to said control passages, sealing strips covering all said grooves, and a sealing strip covering the ends of said equalizing and individual control passages.

1,686,154. PUMP HEAD. LYSLE L. HAZEN, Joplin, Mo. Filed Apr. 28, 1925. Serial No. 26,436. 10 Claims. (Cl. 74—14.)



10. A pump head comprising, in combination, a pair of pitmen connected with the sucker rods of the pump; a crank disk with which the two pitmen are connected at diametrically opposite points; a power driven shaft; a pinion on said shaft; said crank disk having peripheral gear teeth with which the pinion meshes, thereby to drive the crank disk and reciprocate the sucker rods; a lubricant trough surrounding the lower portion of the crank disk, whose gear teeth thus pass through a lubricant bath; a series of rollers within the trough supported on axes which are transverse of the trough and parallel to the axis of rotation of the crank disk; the crank disk being supported wholly by the rollers fitting into a groove provided on rollers with which it has peripheral contact; the periphery of the crank disk, so that any movement of the crank disk parallel to its axis of rotation is prevented; the rollers having flat sides and V-shaped peripheries and fitting into grooves which are shaped complementarily.

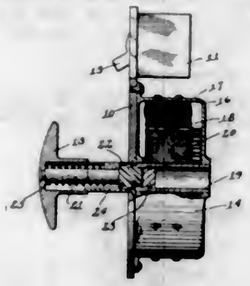
1,686,155. METHOD OF MAKING TIRE-BEAD REENFORCING ELEMENTS. ARTHUR C. HOPKINS, Niles, Mich., assignor to National Standard Company, Niles, Mich., a Corporation of Michigan. Filed May 25, 1927. Serial No. 194,142. 8 Claims. (Cl. 245—1.5.)



1. The method of making a tire-bead reenforcing element having a plurality of convolutions of a tension member, consisting of first forming such tension member in a single loop of requisite length, joining the ends, and then forming said single loop into a plurality of convolutions.

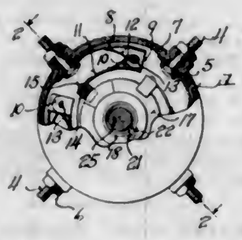
1,686,156. GRAIN SHOCKER. FRED JACKSON, Clay City, Ind. Filed Sept. 11, 1924. Serial No. 737,143. 12 Claims. (Cl. 56—422.)

1. In a grain shocker, a shock former, means for supporting the same for movement from a normal horizontal receiving position to a vertical discharging position, actuating means for moving the shock former from the one to the other of said positions, the shock former being provided with oppositely opening gates, and means for retaining one of the gates closed in one of the positions and the other of the gates closed in the other of the positions, the gates being yieldingly impelled to open position and alternately locked in closed position by an element of the actuating means.



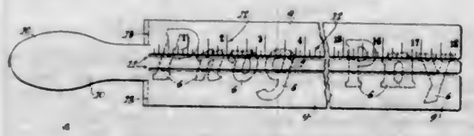
1,686,157. RING SIGHT FOR MACHINE GUNS. ROBERT KAUCH and CHARLES L. PAULUS, Dayton, Ohio. Filed May 8, 1924. Serial No. 711,881. 2 Claims. (Cl. 33—53.)

2. A gun sight including a normally vertical shaft having a sight piece at the upper end thereof, a plurality of different sizes of rings pivotally carried by said shaft and adapted to be swung into position selectively to concentric relation with said sight piece, an abutment against which the pivoted portions of said rings engage and means for yieldingly retaining the pivoted portions of said rings in engagement with said abutment.



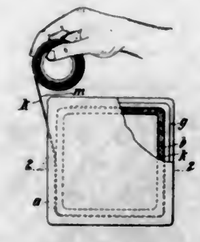
1,686,158. ELECTRIC-IMPULSE GENERATOR. ROBERT KAUCH and CHARLES L. PAULUS, Dayton, Ohio. Filed Jan. 30, 1925. Serial No. 5,857. 6 Claims. (Cl. 171—76.)

2. An impulse generator comprising a rotatable armature, a driving element, a driven element fixed to the armature, said driving element being arranged to operate said driven element for only a predetermined amount of travel



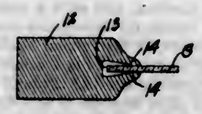
of the driving element, and spring means for rapidly recoiling said armature at the limit of the movement thereof to generate a current.

1,686,159. TIMER. ADAM W. KAUFMAN, Milwaukee, Wis. Filed May 13, 1926. Serial No. 108,821. 1 Claim. (Cl. 200—26.)



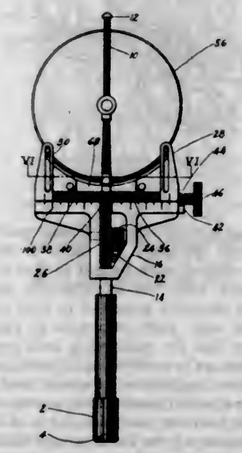
A timer comprising a rotary shaft having a key therein, a roller carried by said shaft, and having a keyway therethrough and adapted to slide longitudinally of said shaft, said roller being of disc-like shape and having a segmental contact, a casing surrounding said roller, and having a plurality of terminal receiving members, stationary arms carried by each of said members, pivotally mounted arms carried by said stationary arms, springs urging said pivotally mounted arms inwardly, and a plurality of contacts carried by said pivotally mounted arms and adapted to engage the periphery of the roller, each of said contacts having front and rear ears adapted to overhang the front and rear faces of the roller.

1,686,160. CHARACTER-MOUNTING STICK FOR CHANGEABLE SIGNS. PAUL KLIMOWICZ, Stevens Point, Wis. Filed Apr. 28, 1927. Serial No. 187,342. 4 Claims. (Cl. 33—174.)



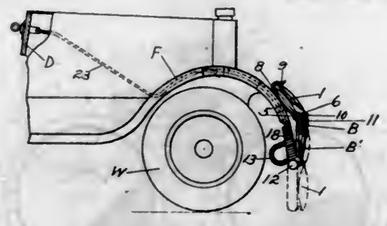
1. A character aligning spacing and mounting stick comprising an elongated flat body having a handle at one end and spaced parallel grooves extending through and along the body from adjacent the handle and through the opposite end, there being indicia on said stick body for the purpose specified.

1,686,161. WALL. PAUL LIESE, Berlin-Tempelhof, Germany. Filed Dec. 17, 1927, Serial No. 240,667, and in Germany May 2, 1927. 2 Claims. (Cl. 72—41.)



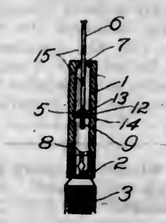
1. The herein described wall or ceiling composed of pairs of superposed sectional glass tiles having the gap formed between the abutting faces thereof closed at its outside by a strip of a suitable material glued to the side faces of the sectional tiles, and a mass of mortar filling out the spaces between adjacent pairs of sectional tiles.

1,686,162. WINDOW. FRANCIS M. LINDERSMITH, Spokane, Wash. Filed Aug. 6, 1927. Serial No. 211,196. 1 Claim. (Cl. 20—56.2.)



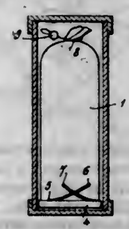
In a sash frame the combination with an integral frame member and its glass panel, said member having an undercut groove for the panel with the opening of said groove of less width than the thickness of the glass panel whereby resilient beads are formed at the opposite sides of the panel, and a plastic filler encased within said groove at the edge of the panel.

1,686,163. ADJUSTABLE RING SIGHT. WALTER G. MCNEILL and ROBERT KAUCH, Dayton, Ohio. Filed Aug. 4, 1922. Serial No. 579,631. 9 Claims. (Cl. 33—53.)



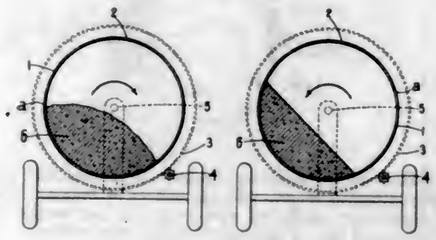
2. In a sighting device, in combination, a support, a thin flexible band carried by said support in the form of a ring, and means for varying the diameter of said ring to compensate for varying speeds of an object sighted.

1,686,164. BUFFER FOR AUTOMOBILES. YATARO MIYAOKA, Spokane, Wis. Filed Jan. 24, 1928. Serial No. 249,068. 5 Claims. (Cl. 293—36.)



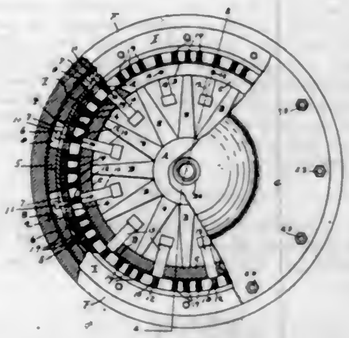
1. The combination with a bumper, of a pneumatic bag loosely attached thereto and adapted to be folded, means for supporting the folded pneumatic bag, and means for plunging said bag to unfolded and operative position.

1,686,165. TIRE GAUGE. ROBERT V. MORSE, Ithaca, N. Y. Filed Apr. 12, 1926. Serial No. 101,479. 8 Claims. (Cl. 73—111.)



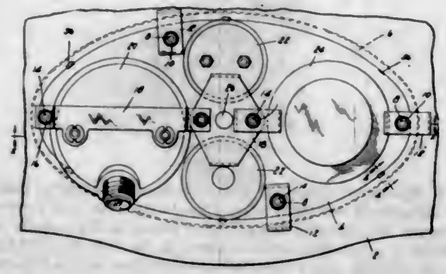
1. In a pressure gauge, the combination of a movable element and a fixed element cooperating to form a substantially air tight expansible chamber, one of said elements adapted to be attached to a self closing valve to render the chamber air tight, a metering element between the movable element and the valve arranged to insure that a definite volume of air may be trapped between the movable element and the valve when the valve becomes closed, and means for indicating the amount of travel of said movable element as a result of the expansion of the trapped air until the air pressures on both sides of the movable element are substantially equalized.

1,686,166. GREASE PACKAGE. JACQUES MULLER, La Garenne Colombes, France. Filed Feb. 7, 1927, Serial No. 166,478, and in France Feb. 8, 1926. 1 Claim. (Cl. 206—56.)



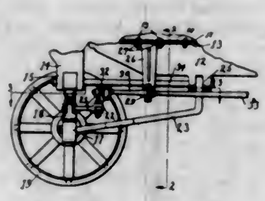
A commercial package embodying a pliant sheath containing a soft and greasy substance, a substantially rigid base upon which the same rests, and a breaking device interposed between said substance and base.

1,686,167. VEHICLE FOR RECEIVING AND TRANSPORTING REFUSE AND THE LIKE. HEINRICH NEUY, Hamburg, Germany. Filed Nov. 6, 1926, Serial No. 146,729, and in Germany Nov. 10, 1925. 7 Claims. (Cl. 214—152.)



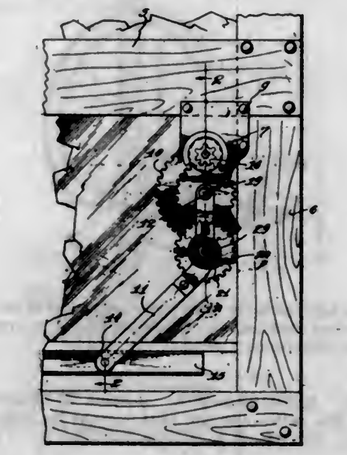
1. A method of loading materials into a vehicle of the type having a rotatably-mounted container and a filling opening therein, which comprises the repeated steps of loading the material into the container of the vehicle through the opening thereof until it reaches the edge of the opening; and rotating said container to flatten out and rearrange said material in the container for a further supply of material.

1,686,168. SPRING WHEEL. ANDREW B. NIHLBOS, Murray City, Utah. Filed Mar. 24, 1927. Serial No. 177,897. 5 Claims. (Cl. 152—38.)



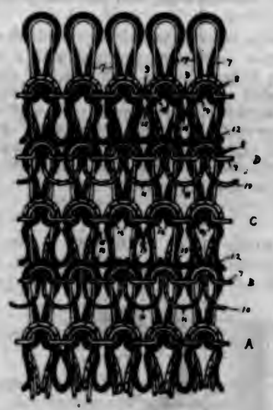
1. In a spring-wheel the combination with a hub having spokes projecting therefrom and a felly connecting said spokes together, said felly having a band on its outer face, of cylinders secured within said felly, a rim spaced from said felly, an inner rim in sections between said felly and said rim, said inner rim being provided with means for retaining a plurality of coil springs, one end of said springs resting against said rim and the other end of said springs resting upon said band, all substantially as set forth.

1,686,169. INSTRUMENT-BOARD ASSEMBLY. FRANK N. NUTT, Flint, Mich., assignor to A C Spark Plug Company, Flint, Mich., a Corporation of Michigan. Filed Feb. 19, 1926. Serial No. 89,366. 4 Claims. (Cl. 180—90.)



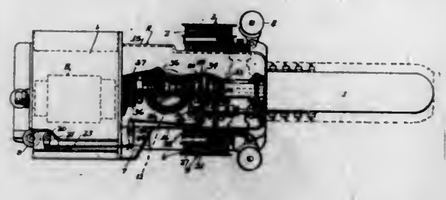
1. The combination of an instrument board having an opening therein, a plate provided with a flange portion adapted to bear against the outer face of the instrument board around said opening, and with a portion adapted to fit in said opening, means for detachably securing the plate in position on the board, an instrument board fitting, means for securing said fitting on said plate comprising fastening devices having portions projecting through said plate, and an ornamental face plate secured to said first named plate and adapted to conceal the fastening devices, said face plate being insertable from the front of the instrument board.

1,686,170. DETACHABLE STEERING MECHANISM FOR TRACTORS. JOHN LOUIS OPITZ, Clarinda, Iowa. Filed Dec. 23, 1924. Serial No. 757,663. 3 Claims. (Cl. 280—95.)



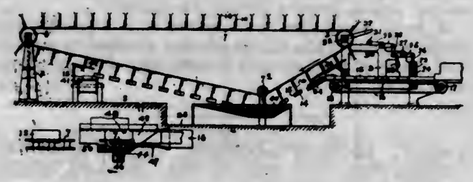
1. In combination, a tractor frame having outwardly extending flanges designed to carry a detachable pan which is also provided with flanges to rest adjacent to the first said flanges, bolts for securing the said flanges together, an axle pivotally mounted to said frame, spindles pivoted to said axle, each of which is provided with a steering arm, a link for connecting said arms, means for imparting movement to said link comprising a substantially U-shaped bracket designed to surround said pan, the end of each member of said bracket being provided with a flange designed to rest beneath the flanges of said detachable pan and secured thereto by the bolts in said flanges, the lower portion of said U-shaped bracket being provided with a downwardly extending pivot pin, a lever pivotally mounted on said pin, a link for connecting one end of said lever to said steering link, and means for connecting the opposite lever with the steering mechanism of a tractor.

1,686,171. WINDOW REGULATOR. JOHN H. PARSONS, Pontiac, Mich. Filed June 29, 1925. Serial No. 40,361. 7 Claims.. (Cl. 268—126.)



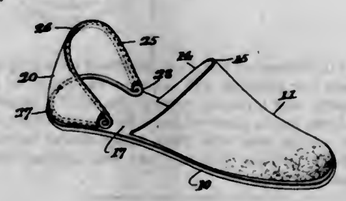
1. In a device of the character described, a window, and means for raising or lowering the window including a fixed curved rack, a lever fulcrumed upon the rack and engaging the window, a pinion journaled on the lever and meshing with the rack, and means for rotating the pinion.

1,686,172. KNITTED FABRIC. FREDERICK L. PORTE, Utica, N. Y. Filed Mar. 12, 1925. Serial No. 15,031. 5 Claims. (Cl. 66—194.)



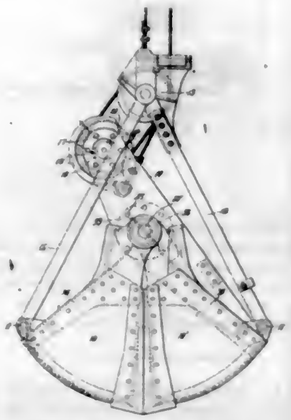
1. In a knitted fabric, a basic web having stitches arranged in longitudinally extending rows and laterally extending courses and supplemental yarns knitted into the stitches of the basic courses, the connecting threads of certain of said supplemental yarns extending outwardly in fleecing loops from the body of the fabric at certain courses on one side of the fabric and the connecting threads of the other supplemental yarns extending outwardly in fleecing loops from the body of the fabric at certain courses on the other side of the fabric.

1,686,173. MINING MACHINE. CHARLES A. PRATT, Chicago, Ill., assignor to Goodman Manufacturing Company, Chicago, Ill., a Corporation of Illinois. Filed Sept. 14, 1925. Serial No. 56,151. 7 Claims. (Cl. 262—30.)



1. In a mining machine, a frame having a cutter bar projecting therefrom provided with a cutter chain, a portion of said frame and said cutter bar forming a passage into which the cuttings are brought rearwardly by said cutter chain, and discharge means for the cuttings including a horizontally oscillating sweep.

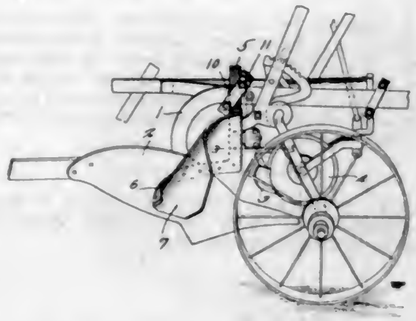
1,686,174. APPARATUS FOR COATING CANDIES, CAKES, ETC. GEORGE W. RAUSCHENBERGER, Butler, Pa. Filed Feb. 23, 1922. Serial No. 538,672. 2 Claims. (Cl. 91—4.)



1. In apparatus for coating confections, cakes, etc., the combination of an endless belt, a plurality of arms carried by said belt, inwardly extending prongs on said arms, means for separating said arms, means for moving said arms inwardly to engage the articles to be coated by said prongs, and a receptacle for containing the coating material in the path of said articles.

1,686,175. FOOTWEAR RETAINER. DAVID Y. READ, Washington, D. C. Filed Aug. 11, 1924. Serial No. 731,521. 7 Claims. (Cl. 36—58.5.)

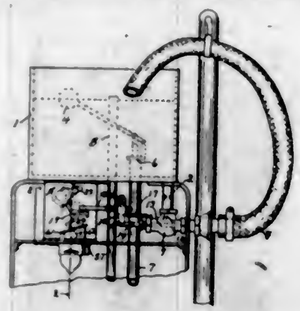
1. An article of footwear in which the rear of the upper is downwardly yieldable characterized by the provision of means secured to the sole on both sides and located entirely outside of the central area of said rear portion for actively restoring the upper to original position when relieved of downward pressure.



1,686,176. LEVER-ARM BUCKET. PHILIP THEODORE ROBIN, Aspinwall, and WILLIAM MAYO VENABLE, Pittsburgh, Pa., assignors to Blaw-Knox Company, a Corporation of New Jersey. Filed June 6, 1927. Serial No. 196,644. 11 Claims. (Cl. 37—184.)

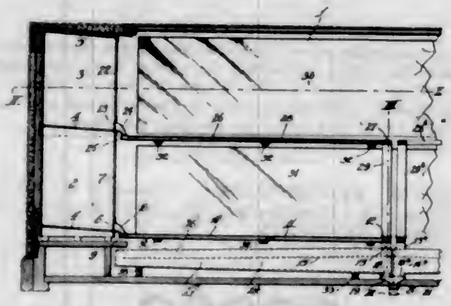
1. In a bucket, the combination of a lever arm hub, a pair of independently formed plates secured thereto in spaced relation and constituting the arm proper, and a sheave housing secured between the plates.

5. In a bucket, the combination of a pair of scoop members, a hinge pin, a lever arm hub mounted on the pin, and a pair of independently formed scoop hinge members mounted on the hub.



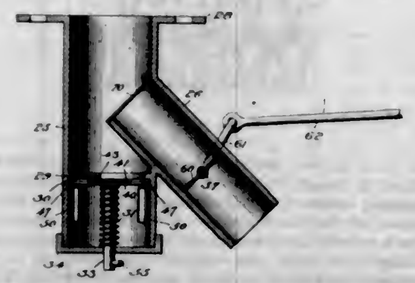
1,686,177. PLOW ATTACHMENT. FRANK E. ROSEKELLY, Huron, Ohio. Filed Sept. 13, 1927. Serial No. 219,270. 2 Claims. (Cl. 97—193.)

1. An attachment of the class described including a standard, means for securing the same to the beam of a plow, a rearwardly and laterally curved arm at the lower end of the standard, and a plate secured to the standard and the front face of the arm, said plate being curved from side to side with its concave face in front and inclined upwardly and forwardly.



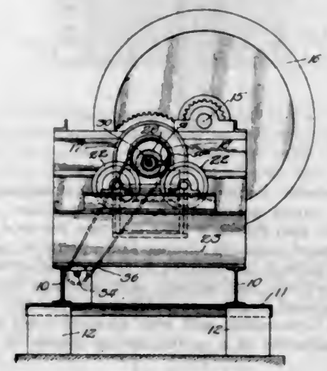
1,686,178. VENDING MACHINE. JAMES A. SATHER, Oakland, Calif. Filed Aug. 17, 1925. Serial No. 50,671. 8 Claims. (Cl. 194—82.)

1. In a liquid vending device of the character described, a control valve, an operating mechanism adapted to become active for a predetermined period of time upon the insertion of a coin, an operative connection between the mechanism and the valve for operating the latter, the latter connection being adjustable to allow the valve period to be regulated independently of that of the mechanism, said operating mechanism comprising a revolving element



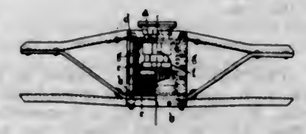
actuating said operative connection, spring means to revolve the revolving element, and releasable means to arrest the motion of said element.

1,686,179. REFRIGERATOR. JOSEPH A. SCHNUR, St. Louis, Mo. Filed Aug. 20, 1924. Serial No. 733,072. 4 Claims. (Cl. 62—37.)



1. In a refrigerator, a pair of ice chambers arranged one above the other, each being provided with a draining outlet, a pair of hollow shelves each being in communication at one end with an outlet of a respective chamber, a pair of pipes depended from the opposite end of each of said shelves, one of said pair of pipes telescoping into said other pair of pipes, and a member having a return passageway formed therein in communication with each pipe of said last mentioned pair of pipes.

1,686,180. FUEL-FEED SYSTEM. CHARLES EDWARD SHIFFER, Wilmington, Del. Filed Oct. 14, 1921. Serial No. 507,635. 5 Claims. (Cl. 123—142.)



1. In combination, a fuel feed system for automobiles, a combustible mixture outlet, a primary mixture passage leading thereto, a check valve between the passage and outlet, a throttle valve in said passage, an auxiliary air inlet, a spring-pressed valve normallly closing said inlet but free to open said inlet upon back-fire, and means connecting said valves so that the air valve is opened whenever the throttle valve is opened and is closed by its spring upon closing of the throttle valve.

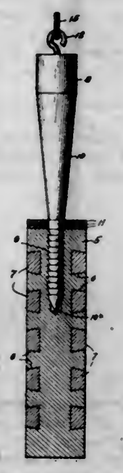
1,686,181. CYLINDER-GRINDING MACHINE. GEORGE N. SIMPSON, Chicago, Ill. Filed Mar. 30, 1927. Serial No. 179 527. 5 Claims. (Cl. 51—50.)

1. In a cylinder grinding machine of the character described; means for supporting and rotating a cylinder; a grinding wheel shaft adapted to enter the cylinder; a housing for the grinding wheel shaft, said shaft projecting beyond the end of said housing and supported in a bearing carried by the end of the housing; a grinding wheel on the projecting forward end of the shaft; means for rotating the grinding wheel shaft; means for reciprocating the grinding wheel longitudinally in the cylinder; and means for holding the grinding wheel away from the bottom of the cylinder, said means comprising a horizontally arranged guard arm having one end attached to the housing and the other end adapted to bear against the inside of the wall of the cylinder to prevent the grinding wheel from resting on the bottom of the cylinder.

1,686,182. CONSTRUCTION OF BOGIE TRUCKS FOR RAILWAY AND LIKE VEHICLES. GEORGE HARRISON SHEFFIELD and JAMES DENIS TWINBERROW, London, England, assignors to G. H. Sheffield & Company, Engineers, Limited, London, England. Original application filed June 22, 1926, Serial No. 117,823, and in Great Britain June 30, 1925. Divided and this application filed July 12, 1927. Serial No. 205,228. 4 Claims. (Cl. 105—197.)

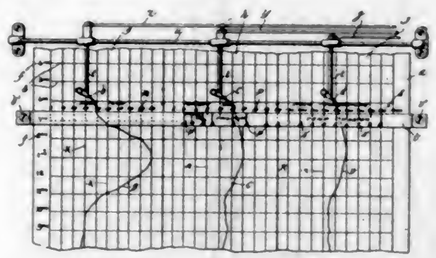
1. A bogie truck of the kind referred to comprising in combination two side frames and a cross transom connecting said frames, said transom being composed of an upper member consisting of a beam with its major axis horizontal and two lower angle members spaced apart from one another and apart also from the upper beam member.

1,686,183. CURRENT-RECTIFYING DEVICE. WALTER O. SNELLING, Allentown, Pa. Filed Feb. 14, 1923. Serial No. 619,033. 4 Claims. (Cl. 250—31.)



1. The process of preparing current rectifying materials which comprises heating a compound of a metal and an element of the sulfur group in the presence of the vapor of an element of the sulfur group.

1,686,184. COMBINED BAILER AND JAR. GEORGE A. SPANG, Butler, Pa. Filed Jan. 12, 1923. Serial No. 612,250. 1 Claim. (Cl. 166—19.)



The combination with a bailer having a bail, of a link adapted to co-operate with said bail so as to form a jar, a collar secured to said bail, a rod on said link extending into said bailer through said collar, and means on said rod for aligning it with said collar so as to guide the movement of said link.

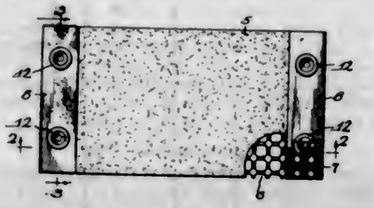
1,686,185. WELL PLUG. FERDINAND J. SPANG, Butler, Pa., assignor to Spang and Company, Butler, Pa., a Corporation of Pennsylvania. Filed Jan. 9, 1926. Serial No. 80,232. 2 Claims. (Cl. 166—13.)

1. The combination in a well plug of an elongated body portion of malleable metal provided with a plurality of grooves in the outer face thereof, inserts of readily flowing rubber mounted in said grooves and a tapered mandrel for expanding said body portion and said inserts.

1,686,186. FURNACE EFFICIENCY METER. JACOB M. SPITZGLASS, Chicago, Ill., assignor to Republic Flow Meters Company, Chicago, Ill., a Corporation of Illinois. Original application filed May 1, 1926, Serial No. 105,957. Divided and this application filed Jan. 12, 1927. Serial No. 160,721. 6 Claims. (Cl. 73—151.)

1. A furnace efficiency meter comprising an indicator movable in accordance with the temperature of the stack gases and an indicator movable in accordance with the percentage of carbon dioxide in the stack gases, said indicators being so positioned that the temperature indicator moves away from the CO_2 indicator as the temperatures increase and toward it as the temperatures decrease and the CO_2 indicator moves toward the temperature indicator as the percentage of CO_2 increases and moves away as it decreases.

1,686,187. WALL-BOARD RETAINER. JOSEPH STRAND, Los Angeles, Calif., assignor to Klinch Lath Corporation, Los Angeles, Calif., a Corporation of California. Filed Dec. 6, 1926. Serial No. 152,878. 6 Claims. (Cl. 72—115.)



1. A wall board retainer consisting of: a primary member having a primary plate and a primary flange formed at one edge of said primary plate; a secondary member having a secondary plate and a secondary flange extending from one edge of said secondary plate; means for fastening said primary and said secondary plates together, said primary and secondary members defining a substantial Z-shape; primary tongues formed in said primary plate in connection with a free edge of said primary plate; and secondary tongues formed in said secondary plate in connection with a free edge of said secondary plate.

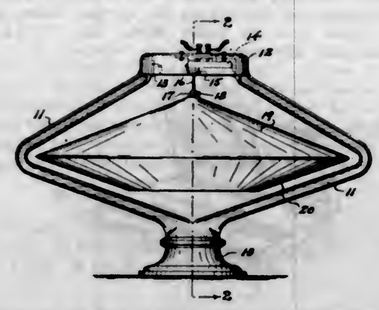
1,686,188. PERFUME CONTAINER AND DISPENSER. EDNA SIBLEY TIPTON, Jackson Heights, N. Y. Filed Feb. 26, 1926. Serial No. 90,990. 4 Claims. (Cl. 128—260.)

1. A perfume container and dispenser comprising a cylindrical barrel arranged to contain perfume, a feed aperture for said barrel, a vent aperture for said barrel, and an element normally closing said apertures, said element being formed and adapted to be actuated at will into a position wherein and whereby said apertures are simultaneously opened, for the purposes set forth; the wall of said barrel surrounding said vent aperture being adapted for the application of a suction device thereto to fill the barrel.

1,686,189. FRICTION BLOCK. JAMES S. THOMPSON, New York, N. Y., assignor to American Brake Materials Corporation, New York, N. Y., a Corporation of New York. Filed Apr. 13, 1927. Serial No. 183,381. 7 Claims. (Cl. 188—251.)

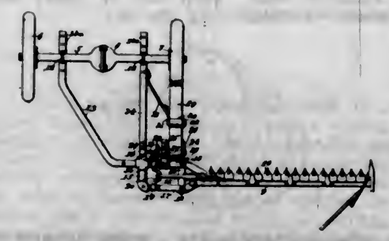
5. A friction block comprising a composition body, a reticulated metal plate anchored to the body and extended beyond the ends thereof, transverse plates arranged on opposite sides of said extended ends, and means for clamping said plates upon said extended ends to reinforce and strengthen the ends.

1,686,190. FRICTION BLOCK. JAMES S. THOMPSON, New York, N. Y., assignor to American Brake Materials Corporation, New York, N. Y., a Corporation of New York. Filed Apr. 13, 1927. Serial No. 183,383. 9 Claims. (Cl. 188—258.)



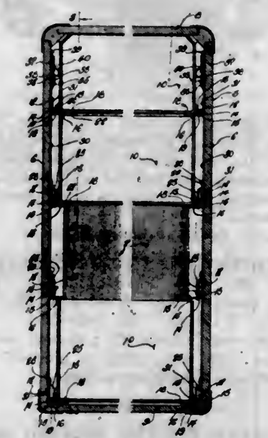
5. A friction block comprising a reticulated back and a composition body mounted thereon, a part of the back projecting beyond the body, and a metal strip doubled on said projecting part, there being an opening through the doubled metal strip and the projecting part enclosed therein, the edge of said opening on one side of said doubled metal strip being depressed to interlockingly engage said projecting part.

1,686,191. FRICTION BLOCK. JAMES S. THOMPSON, New York, N. Y., assignor to American Brake Materials Corporation, New York, N. Y., a Corporation of New York. Filed Apr. 13, 1927. Serial No. 183,384. 7 Claims. (Cl. 188—251.)



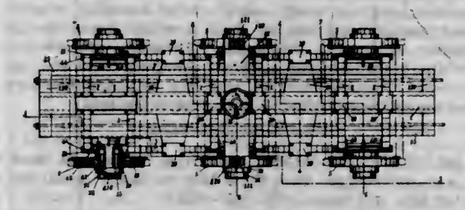
5. A friction block comprising a back and a composition body mounted thereon, a part of the back projecting beyond the body, and a metal reinforce on both sides of said back and having an opening therethrough and spot welded at the edge of said opening.

1,686,192. LOUD SPEAKER. WILLIAM H. VIDOR, Maplewood, N. J., assignor to Gloria Manufacturing Corp., Newark, N. J., a Corporation of New Jersey. Filed June 25, 1925. Serial No. 39,448. 5 Claims. (Cl. 181—31.)



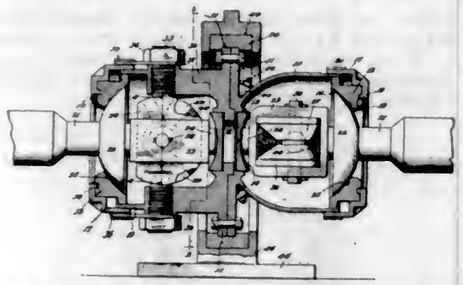
1. A loud speaker comprising a support, a balanced telephone receiving unit affixed to said support, a vertical vibrating rod actuated by said unit, and a diaphragm means supported solely by said rod and adapted to be vibrated thereby, said diaphragm means consisting of two hollow conical elements connected at their base edges, the lower element being truncated and open at its center, the upper element being affixed at its apex to said rod.

1,686,193. AUTOMOBILE DRIVING MECHANISM FOR IMPLEMENTS. CHARLES A. WALTERS, Marion, Iowa. Filed July 25, 1927. Serial No. 208,215. 3 Claims. (Cl. 180—53.)



1. Combined with an automobile driving wheel, a frame in fixed relation thereto, a driving pulley carried by said frame, and an inwardly concaved belt connecting the wheel and pulley, and adapted to operate tractively as the automobile moves over the ground.

1,686,194. DRAWER-LOCKING DEVICE. GEORGE HENRY WHEARY and MATHIES KURTEN, Racine, Wis., assignors to Wheary Trunk Co., Racine, Wis., a Corporation of Wisconsin. Filed Aug. 6, 1924. Serial No. 730,523. 5 Claims. (Cl. 45—94.)

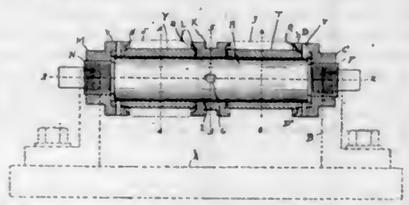


1. In a device of the character described including a drawer receiving section having side walls and a drawer slidable therein, drawer guide members secured to the section side walls, guide members carried by the drawer and slidably interlocked with the first-named guide members, a bar member slidably mounted at one section side wall, and means carried by the bar and adapted to be passed through registering apertures in the guide members to lock the interlocked guide members against relative movement when the drawer is closed.

1,686,195. SPRING SUSPENSION. JAMES A. WRIGHT, Montreal, Quebec, Canada. Filed Dec. 22, 1926. Serial No. 156,506. 20 Claims. (Cl. 105—180.)

1. In the spring suspension of rolling stock, a plurality of spring elements, each element having a pair of parallel springs mounted one above the other, between the frame and the independent wheels.

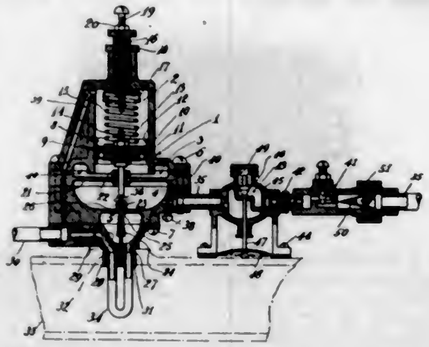
1,686,196. UNIVERSAL TANDEM JOINT. MAXWELL W. WYSONG, North Plainfield, N. J., assignor of one-half to Herbert C. Poole, Newark, N. J. Filed Feb. 18, 1926, Serial No. 89,152. Renewed Aug. 1, 1928. 9 Claims. (Cl. 64—91.)



1. A universal tandem joint including a double ended joint member composed of separate universal joint units, means connecting said units with each other and means rotatably mounting said member and limiting said units against separation to provide a reinforcement for said connecting means.

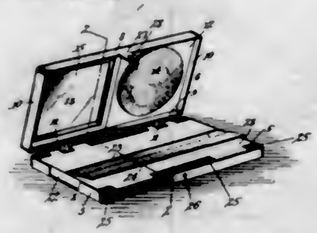
1,686,197. IMPERVIOUS CHEMICAL MATERIAL AND METHOD OF ITS PRODUCTION. WARREN F. BLEECKER, Boulder, Colo. Filed Jan. 13, 1923. Serial No. 612,514. 3 Claims. (Cl. 106—32.)

1. An impervious chemically-resistant material having in intermixture with artificial graphite, sulfur and solid hydrocarbons chemically combined.



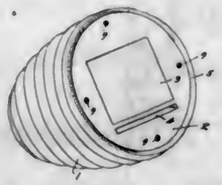
1,686,198. APPARATUS FOR HOLDING HALF BEARINGS IN POSITION FOR MACHINING. LOWELL C. BLOMSTROM, Detroit, Mich., assignor to Federal Mogul Corporation, Detroit, Mich., a Corporation of Michigan. Filed Aug. 6, 1927. Serial No. 211,087. 10 Claims. (Cl. 82—43.)

1. The combination, with terminal supporting members, of a pair of end clamping members supported thereby, each being horizontally bored and provided with screw threadings of reverse pitch one to the other, a carrying arbor provided at its ends with complementary screw threading to that of the adjacent clamping member wherein each end rests, and a central clamping member fixed against rotation on said carrying arbor though capable of limited lengthwise movement with respect thereto, between whose marginal clamping faces and the opposite clamping faces of said end clamping members bearing shells are adapted to be removably held.



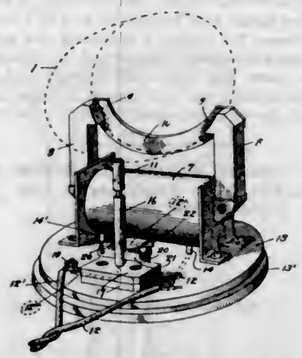
1,686,199. FLUID-MIXING DEVICE. HYMAN D. BOWMAN, Pittsburgh, Pa. Filed May 6, 1927. Serial No. 189,300. 7 Claims. (Cl. 123—122.)

1. In a fuel mixing device, for internal combustion engines of the character described, having a suction chamber, an atmospheric chamber, a mixing chamber and a fuel chamber communicating therewith, the combination of a plurality of lines for conducting the component fluids of said fuel into said mixing chamber; a heating element in commmunication with said fuel chamber and with the intake manifold of said engine; said intake manifold being in communication with said suction chamber; a member movable within the suction chamber; means for exerting a downward pressure on said movable member;



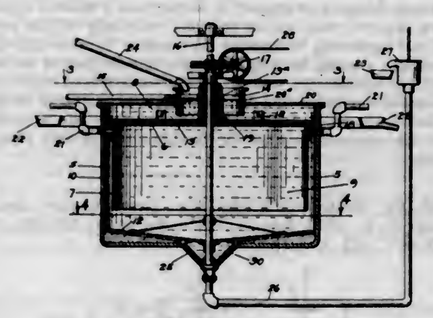
a valve-stem positioned on said movable member and a valve on said valve-stem for cutting off the communication between said mixing chamber and fuel chamber when said engine is at a stand still.

1,686,200. TOILET KIT OR CONTAINER. WILLIAM H. CANNARD and ALEXANDER W. WITBRO, Green Bay, Wis. Filed June 12, 1926. Serial No. 115,514. 9 Claims. (Cl. 132—83.)



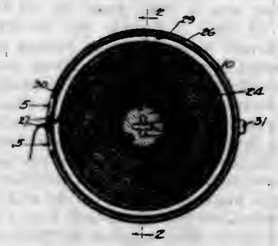
5. A container for toilet powder and an accessorial applying-element, including a box-component, a closure therefor hingedly connected thereto, a powder-compartment in the closure-component, a paper-compartment in the box-component for housing separable paper sheets, a closure for that compartment hingedly connected to the box-component and apertured longitudinally to dispense, successively, sheets of said paper from the compartment for use in conjunction with powder from the powder-compartment the two closures being independently movable, and a mirror in the closure-component and juxtaposed to the powder-compartment and overlying the closure for the paper-compartment when the container is closed.

1,686,201. HOME SAVINGS BANK. CARL W. CHERRY, San Francisco, Calif. Filed July 27, 1925. Serial No. 46,428. 2 Claims. (Cl. 70—50.)



1. A cylindrical bank having a spring actuated door in its flat surface, adapted to swing it to open position when released, locks having spring-projected bolts for locking said door, said locks being movable into unlocking position by magnets disposed exteriorly of the casing and in alignment with the movement of said locks.

1,686,202. MAGNETIC-LOCK-OPERATING DEVICE. CARL W. CHERRY, San Francisco, Calif. Filed July 27, 1925. Serial No. 46,429. 2 Claims. (Cl. 70—50.)



1. A magnetic-lock operating device comprising a support for carrying a bank having a curved wall, a portion of said support to contact with said curved wall and to conform therewith, magnets carried by said support and being positioned so as to lie opposite magnetic bolts carried by a bank when the bank is disposed in place and means for energizing said magnets.

1,686,203. THICKENING APPARATUS. HARRISON S. COE, Lawrence, Kans. Filed Jan. 9, 1925. Serial No. 1,476. 4 Claims. (Cl. 210—55.)

1. An apparatus for separating solids in hot solid-liquid suspensions, comprising a tank, a settling chamber having a circumferential, heat-transferring wall spaced from the corresponding wall of the tank to provide a downwardly extending passage, the settling chamber having an outlet for settled solids and an overflow for clarified liquid, and a feed chamber above the settling chamber separated therefrom by a substantially horizontal partition and connected with the passage for the conveyance of material to the lower portion of the settling chamber.

1,686,204. FILM MAGAZINE. BYRON V. COVERT, Lockport, N. Y. Filed May 31, 1927. Serial No. 195,464. 11 Claims. (Cl. 242—71.)

5. A film magazine having a floating light excluding shutter at the film slot, said shutter having relatively movable portions adapted to yieldingly bear against the respective sides of the film.

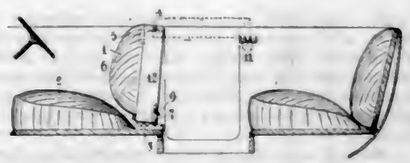
1,686,205. REFRIGERATOR. JOSÉ MIGUEL TORRES Y CURBELO, Habana, Cuba. Filed Feb. 2, 1927, Serial No. 165,437, and in Cuba Jan. 17, 1927. 1 Claim. (Cl. 62—42.)

In refrigerating apparatus, a casing forming a chamber having a closed top and sides and an open bottom, said casing being formed internally with baffles extending from the top to the plane of the bottom, arranged to conduct cooling liquid in a tortuous path through said casing, and a removable bottom for said casing having a plane upper surface engaging the edges of the sides of said casing and the edges of said baffles in water tight relation.

1,686,206. METHOD OF PRODUCING METALS OR METAL ALLOYS LOW IN CARBON DIRECTLY OUT OF ORE OR THE LIKE. HENNING GUSTAV FLODIN, Roslags-Nasby, and EMIL GUSTAF TORVALD GUSTAFSSON, Stockholm, Sweden. Filed Dec. 17, 1924, Serial No. 756,537, and in Sweden Jan. 12, 1924. 13 Claims. (Cl. 75—22.5.)

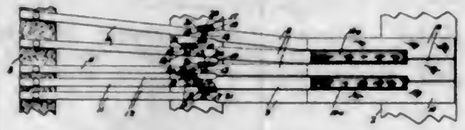
1. A method of producing metals or metal alloys low in carbon directly from ore and the like, consisting in mixing intimately finely divided ore, finely divided carbonaceous material of a quantity proportioned to the reduction of the ore and to the desired percentage of carbon in the product, and a binding agent, forming the mixture into desired shape, solidifying the bodies thus obtained so as to effect fixing of the positions of the ore and carbon particles with relation to one another, feeding said solidified bodies into an electric furnace repeatedly in quantities required for an even reduction and a regular operation of the process and reducing and melting same whilst floating on the top of the slag bath.

1,686,207. DIRECT REDUCTION PROCESS FOR PRODUCING CARBON BINDING METALS OR METAL ALLOYS. HENNING GUSTAV FLODIN, Roslags-Nasby, and EMIL GUSTAF TORVALD GUSTAFSSON, Stockholm, Sweden, assignors to Hampus Gustaf Emrik Cornelius, Stockholm, Sweden. Filed Apr. 7, 1925, Serial No. 21,412, and in Sweden Nov. 27, 1924. 5 Claims. (Cl. 75—22.5.)



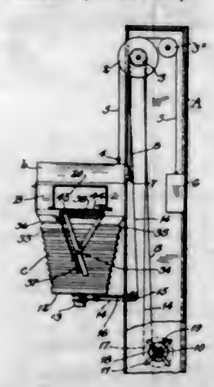
1. An endothermic direct reduction process for producing carbon binding metals and metal alloys consisting in charging an electric furnace, having an electrode that can be raised and lowered and in which heat is thus developed by electric resistance in the slag bath, with a solidified mixture containing finely divided oxide ore and finely divided reducing agent in the proportion required for reduction of the ore and carbonization of the metal, reducing and melting said mixture whilst swimming on the slag bath, controlling the temperature of the slag bath and of the molten metal by supplying the heat, required for the reduction, to the upper layer of the slag bath through regulating the position of the electrode relatively to the slag bath and running with an arc between the electrode and the slag bath.

1,686,208. SHADE-ROLLER MOUNTING. CHARLES P. FREESTATE, Riverside, Ill., assignor to Western Shade Cloth Company, Chicago, Ill., a Corporation of Illinois. Filed Feb. 21, 1927. Serial No. 169,726. 2 Claims. (Cl. 156—29.)



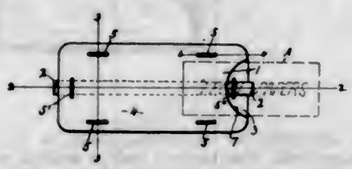
1. In a shade roller mounting, a bracket having a bearing aperture and two offset spring-retaining loops at opposite sides of the aperture, a roller, a trunnion on the roller having a portion journaled in the aperture and a grooved portion beyond the journaling portion, and a U-shaped spring extending across the bracket with the end portions of the spring beneath the loops in the bracket and the intermediate portions of the spring in opposite parts of the groove in the trunnion for resisting endwise movement of the roller.

1,686,209. MOTOR AND OTHER VEHICLE. HAROLD DELF GILLIES, London, England. Filed Nov. 30, 1925, Serial No. 72,258, and in Great Britain Dec. 2, 1924. 4 Claims. (Cl. 155—43.)



1. In combination with a vehicle, a seat, a back for said seat rotatably mounted on bearings at its upper end, means mounted upon the sides of the lower end of said back adapted when said back as a whole is rotated to a horizontal position to coact with further means mounted upon the sides of said vehicle in substantially the same horizontal plane as said bearings and at a distance to the rear thereof substantially equal to the height of said back to hold said back in a horizontal position.

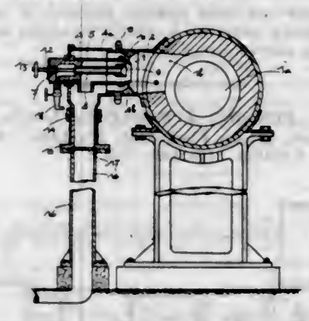
1,686,210. PIANO-KEY MOUNTING. WALTER A. GOBLE, Grand Rapids, Mich. Filed Feb. 28, 1927. Serial No. 171,536. 7 Claims. (Cl. 84—435.)



3. In a construction of the class described, a balance rail, a plurality of piano keys located above and across the balance rail, means for pivotally mounting the keys on said rail, said means being vertically adjustable through the keys to raise or lower the outer ends thereof, and means attached to the balance rail and located between the keys for holding each key from sideways tipping in either direction.

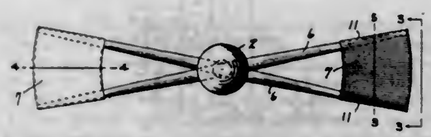
1,686,211. ROLL-FILM CONTROL. SAMUEL M. HERSHBERG, Brooklyn, N. Y. Filed June 10, 1926. Serial No. 114,930. 5 Claims. (Cl. 88—24.)

1. In a camera, a casing, a bellows depending from the casing, a lens carried by the bellows, means for simultaneously adjusting the position of the lens and casing, a negative rack within the casing, a negative holder held in said rack and adapted to support a supply and a take-up spool for a negative film, means operable exteriorly of the casing for imparting successive movements to the take-up spool, and a guide forming a predetermined limit of movement for said latter means, said predetermined limit of movement corresponding to the length of negative to be exposed so that successive lengths of negative may be actuated into exposed position by the actuation of said latter means.



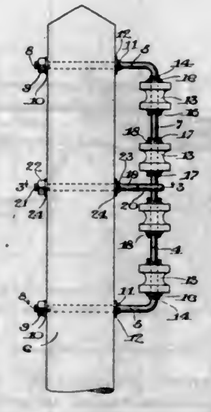
1,686,212. FILING-TAB HOLDER. LEE KINGSLEY, Syracuse, N. Y. Filed Feb. 21, 1927. Serial No. 169,880. 2 Claims. (Cl. 40—17.)

1. A filing-tab-holder comprising opposite plates of approximately equal width and length and secured flatwise to each other along opposite longitudinal edges to form an intervening relatively shallow tab-receiving chamber, said chamber being open at one end to permit the insertion and removal of the card and a rubber band having one side extending continuously through said chamber from end to end thereof and secured to the inner plate against relative



movement thereto and its remaining portion returning beneath said plate, the portion of the rubber band between the plates forming a part of the inner wall of the chamber for frictional engagement with the tab when the latter is inserted into the chamber, the outer plate being transparent to permit the indicia on the tab to be read therethrough.

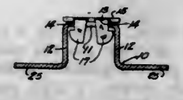
1,686,213. LIQUID-FUEL BURNER. DIMITRI KOUDRITSKY, Charleroi, Belgium. Filed Sept. 18, 1926, Serial No. 136,279, and in Belgium Sept. 24, 1925. Renewed Aug. 22, 1928. 2 Claims. (Cl. 158—76.)



1. A liquid fuel burner intended to be applied to metallurgic and the like furnaces, steam boilers of locomotives and the like industrial appliances, comprising a hollow column or standard for supporting the burner proper and through which air under pressure is forwarded to the burner, an air admission valve on said hollow column, a liquid fuel chamber secured on top of said column, a regulable duct for conveying the liquid fuel under pressure from an upper fuel tank to said chamber, a central tubular member projecting by one of its ends into said fuel chamber, a liquid fuel regulating spindle slidably fitting said tubular member, means for operating said fuel regulating spindle, a flaring conic frustum fuel discharging valve at the end of said spindle and fitting the flaring nozzle of the said tubular member, longitudinal grooves on the outer periphery of said spindle, through which grooves the liquid fuel under pressure is forwarded from the fuel chamber to the said discharge valve, a primary not adjustable air duct surrounding the said tubular member and forwarding compressed air proceeding from the said hollow column, an inwardly narrowing nozzle member at the end of said primary compressed air duct for discharging an annular air current intersecting and atomizing the liquid fuel discharged in shape of a conic frustum sheet between the said conic valve at the end of the spindle and the concentrically disposed flaring nozzle of said tubular member, a secondary or combustion compressed air duct concentrically surrounding the first or primary air duct and forwarding the air for the full combustion of the atomized fuel, means for regulating the delivery of said secondary compressed air current, a combustion chamber, and an inclined duct connecting the said atomizing space with said combustion chamber.

1,686,214. PROPELLER. ROYAL N. KYLE, Gardnerville, Nev. Filed Mar. 8, 1927. Serial No. 173,694. 1 Claim. (Cl. 170—169.)

In a propeller of the character described, a hub, rods extending radially therefrom so as to lie substantially in a helical curve, and a blade cored longitudinally and sprung on the extremities of the rods.

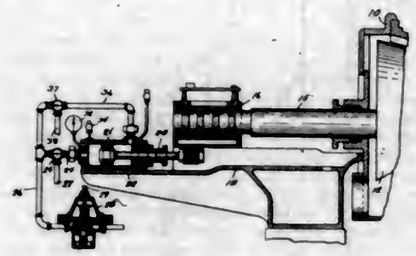


1,686,215. SECONDARY RACK. WILLIAM D. KYLE, Milwaukee, Wis., assignor to Line Material Company, South Milwaukee, Wis., a Corporation of Wisconsin. Filed July 27, 1923. Serial No. 654,157. 5 Claims. (Cl. 173—321.)

1. A secondary rack comprising a U-shaped member having integral leg portions each adapted to extend through a rack support and be clamped thereto, and insulators spacedly mounted on and receiving therethrough the transverse portion of said member and maintained against longitudinal displacement.

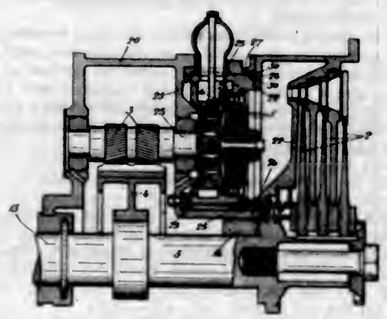
3. A secondary rack comprising a U-shaped member having leg portions each adapted to be clamped to a rack support, insulators mounted on the transverse portion of said member, and a hooked bolt member engaging said transverse portion at an intermediate point and having a threaded portion clamped to the support to reinforce said U-shaped member against bending strains.

1,686,216. INSULATING RACK. WILLIAM D. KYLE, Milwaukee, Wis., assignor to Line Material Company, South Milwaukee, Wis., a Corporation of Wisconsin. Original application filed Nov. 17, 1923, Serial No. 675,317. Divided and this application filed July 12, 1926. Serial No. 121,884. 7 Claims. (Cl. 173—321.)



7. In an insulating rack, the combination of a base member adapted to abut against a support and including spaced parallel side portions the outer lateral edges of which are inturned to form lips arranged in the same plane and defining a longitudinally-extending slot between them, and an apertured washer plate slidably bearing on the outer faces of said lips and including opposite hooked portions loosely embracing said lips to guide said plate member for movement along said slot and to prevent the withdrawal of said plate from the base member.

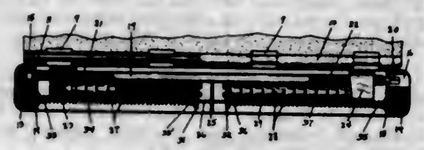
1,686,217. CONTROLLING DEVICE FOR PULP-REFINING ENGINES. ARTHUR J. LOMAN, Uncasville, Conn., assignor of one-half to William Brown, Uncasville, Conn. Filed Jan. 20, 1928. Serial No. 248,071. 7 Claims. (Cl. 92—27.)



1. In a pulp refining engine, a casing having an internally conical bed, a conical beating roll arranged therein

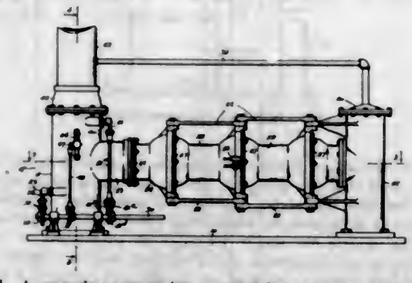
for axial rotation and for movement axially into operative relation with said bed, and fluid pressure operated means

for moving the roll axially towards the bed and for holding it in operative relation therewith under a predetermined pressure.



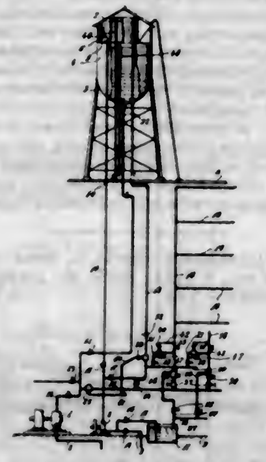
1,686,218. TURBINE AGGREGATE. FREDRIK LJUNGSTRÖM, Lidingo-Brevik, Sweden, assignor to Aktiebolaget Ljungströms Angturbin, Lidingo-Brevik, Sweden, a Corporation. Filed Dec. 26, 1924, Serial No. 758,284, and in Sweden Dec. 14, 1923. 2 Claims. (Cl. 60—70.)

1. A turbine aggregate, comprising a low pressure system, a single shaft carrying the low pressure system, a casing surrounding the low pressure system and provided with a steam supply portion, a high pressure system, a casing surrounding the high pressure system and provided with an exhaust steam portion, movably connected with the supply portion of the low pressure system, a shaft carrying the high pressure system and journalled in the casing of the high pressure system, and a pinion fixed on the shaft of the high pressure system and a toothed gear fixed on the shaft of the low pressure system and adapted to be driven directly by said pinion.



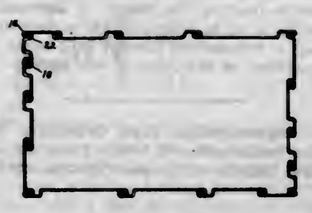
1,686,219. FLEXIBLE-POST BINDER. JOHN L. MCMILLAN and PAUL O. UNGER, Syracuse, N. Y., assignors to McMillan Book Company, Syracuse, N. Y., a Corporation of New York. Filed Dec. 27, 1927. Serial No. 242,744. 4 Claims. (Cl. 129—41.)

4. In a device of the class described, a pair of hollow clamping members, opposed apertures in said clamping members, a flexible post extending through each pair of opposed apertures and having one end enclosed in one of the said clamping members and the other end enclosed in the other clamping member, a guide rod in one of said clamping members adjacent the enclosed ends of the flexible posts, a guide link secured to the end of each of said



flexible posts and being slidably mounted on said guide rod, and spring means for yieldingly retaining the flexible posts inside said clamping member.

1,686,220. PUMPING APPARATUS. LESTER MORGAN, New York, N. Y. Filed Sept. 30, 1925. Serial No. 59,600. 6 Claims. (Cl. 103—153.)



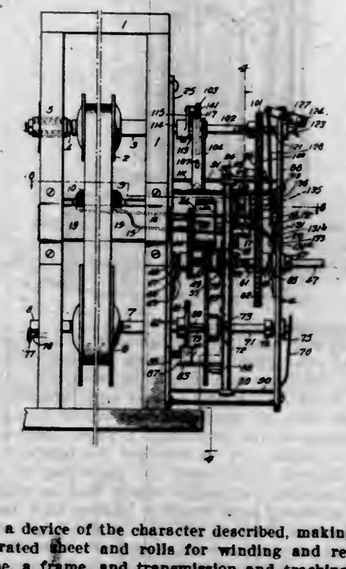
1. A pumping apparatus, comprising a casing having intake, suction and delivery chambers, and a pump piston therefor, including a hollow sectional piston rod, means for simultaneously reciprocating and oscillating the said sections, and means for establishing communication between the delivery side of said chamber and the interior of said piston rod.

1,686,221. SPRINKLER SYSTEM. CHARLES ADAMS, Jr., Cliffside Park, N. J., assignor of one-half to Sidney F. Weston, New York, N. Y. Filed Apr. 14, 1927. Serial No. 183,630. 9 Claims. (Cl. 169—5.)

1. In a system of the character described, the combination with a sprinkler discharge branchway, of a water supply tank, a container for a non-freezing, non-combustible medium, a conduit connecting the water supply tank to said sprinkler discharge branchway, a second conduit for connecting said container to said sprinkler discharge branchway, means for causing said sprinkler discharge branchway to be filled with said medium, a separation valve for separating the water in said first conduit from the medium in said sprinkler discharge branchway, the medium being subjected to a greater pressure than the water and thereby causing said separation valve to remain closed so long as such variation in pressure continues, a bypass connected to said sprinkler branchway, and an automatic control valve to obstruct the main passage to said sprinkler branchway after the required pressure has been built up by the medium in said branchway, whereupon said bypass will function to replenish the system for leakage, said bypass also functioning to retard the passage of the medium to said sprinkler branchway when said sprinkler branchway is open in case of fire thereby to facilitate the immediate reduction of the pressure in said medium to cause the separation valve to open for the passage of the water.

1,686,222. KNOCKDOWN CONTAINER. FRANCIS J. ADLER, West New Brighton, N. Y. Filed June 21, 1921. Serial No. 479,324. 6 Claims. (Cl. 220—7.)

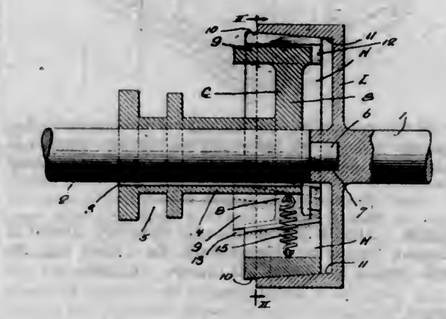
1. A receptacle comprising wall members, hooked formations on the edges lateral of said wall members, the hooked formations of adjacent wall members hooking into one another, and means for receiving the end edges of said wall members to expand the hooked formations of said wall members into interlocking position.



1,686,223. STABLE-SURFACE IRON-CHROMIUM-SILICON ALLOY. PERCY A. E. ARMSTRONG, Loudonville, N. Y., assignor to Ludlum Steel Company, Watervliet, N. Y., a Corporation of New Jersey. Filed Feb. 19, 1924. Serial No. 693,920. 4 Claims. (Cl. 148—2.)

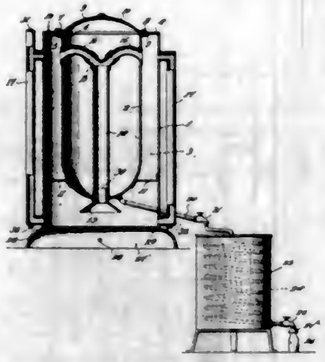
4. The process of making wrought articles of alloys containing principally chromium, silicon and iron with chromium over about 13%, silicon about .3–5%, carbon as low as practicable and under .05%, which comprises putting together degasified molten iron and preheated chrome alloy material, casting into ingots, hot working into reduced sizes, heating to an initial rolling temperature of about 1900–2300° F., and finish rolling with substantially maximum draft roll passes, finishing the rolling at a temperature above about 1100° F.

1,686,224. PROCESS OF DYEING AND PRINTING AND PRODUCT OBTAINED THEREIN. MARTIN BATTEGAY, Mulhouse, France, assignor to Calco Chemical Co., Boundbrook, N. J., a Corporation of New Jersey. Filed Nov. 1, 1926. Serial No. 145,099. 22 Claims. (Cl. 8—5.)



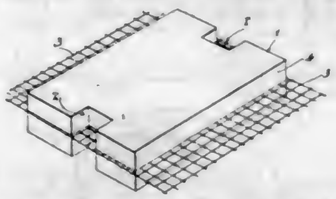
1. The process which comprises dyeing in one operation a fibrous material not substantially detrimentally affected by the substances used in treating the same, by applying thereto a mixed sulphurized phenol and a dyestuff comprised in the group of acid colors and salts of the same, to which an alkali has been added.

1,686,225. TRANSMISSION AND TRACKER MECHANISM UNIT. GEORGE P. BRAND, Westport, Conn. Filed Dec. 23, 1924. Serial No. 757,628. 36 Claims. (Cl. 84—137.)



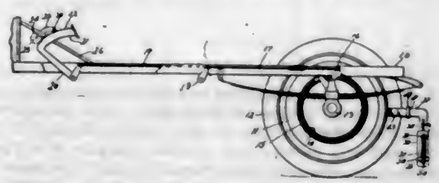
1. In a device of the character described, making use of a perforated sheet and rolls for winding and rewinding the same, a frame, and transmission and tracking mechanism carried by said frame, the said frame constituting in part portions of said mechanisms and detachable to provide ready access to the other parts.

1,686,226. CLUTCH. DE WITT C. CONKLIN, Jackson Heights, Long Island, N. Y. Filed Aug. 21, 1926. Serial No. 130,677. 4 Claims. (Cl. 192—65.)



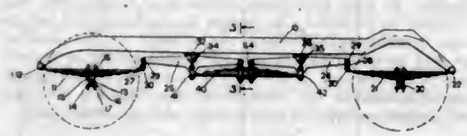
2. A cone clutch comprising an exterior cone member and an interior cone member, a shaft upon which the interior cone member is mounted to move longitudinally of the shaft, and said interior cone member comprising a sleeve slidable upon the shaft, said sleeve having a plurality of wedges rigidly connected to move therewith, a plurality of segmental friction parts, and springs interengaging between the friction parts and the sleeve to hold said friction parts in constant engagement with said wedges.

1,686,227. MEANS FOR THE PASTEURIZATION OF MILK. ERBY P. DAVIS, JAMES C. ROSS, and MARTIN E. SMITH, New Castle Hundred, Del. Filed Feb. 21, 1927. Serial No. 169,918. 3 Claims. (Cl. 257—210.)



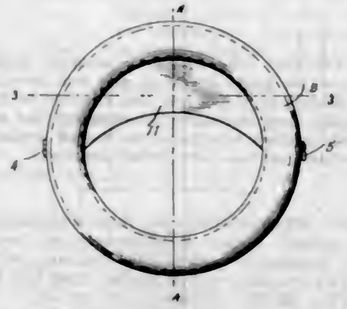
2. A hot water pasteurizing appliance comprising spaced inner and outer receptacles having the intervening space closed at its upper end, the inner receptacle having an opening in its bottom and a short pipe threaded at both ends fitted into the opening formed in the bottom of the inner receptacle and projecting a short distance downwardly, to which may be attached the nozzle of an inversely disposed funnel, and also projecting for a short distance upwardly, to which a pipe may be coupled extending upwardly with branches leading from the upper end of the pipe through the sides of the inner receptacle and return pipes on opposite sides of the outer receptacle and in communication with the upper and lower portions of the space formed between the two receptacles.

1,686,228. ADOBE WALL CONSTRUCTION. JOHN E. DEARDORFF, Vista, Calif. Filed Nov. 23, 1926. Serial No. 150,173. 6 Claims. (Cl. 72—32.)



5. An adobe brick having notches in its ends extending completely through the brick and having wire gauze embedded in the same and extending across the said notches.

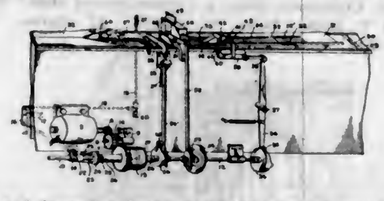
1,686,229. AUTOMOBILE BRAKE-TESTING DEVICE. GUSTAVE DIDERICH, Elkins Park, Pa. Filed Oct. 28, 1925. Serial No. 65,328. 2 Claims. (Cl. 265—1.)



2. In a device of the character stated, a testing device including a scale, and means for temporarily attaching said scale to a vehicle wheel, said means comprising a pair of opposed resilient arms normally tending to separate, due to the resiliency thereof, there being arcuate jaws at the outer ends of said arms, means to force said arms toward each other to clamp the jaws about the wheel, and means at the end of the arms opposite the jaws for connection with the aforementioned scale.

1,686,230. SPRING SUSPENSION. CHARLES A. ERICKSON, Chicago, Ill. Filed Nov. 23, 1926. Serial No. 150,292. 1 Claim. (Cl. 280—104.)

A vehicle chassis, a pair of semi-elliptic springs, means for connecting one end of said springs to said chassis, a lever for supporting the other end of each of said springs, said levers being pivotally connected to said chassis, means for interconnecting the free ends of said levers, and means for resiliently limiting the extent of movement thereof, said assembly being so arranged that movement of one of said springs is transmitted through said levers to produce similar movement of the other of said springs.

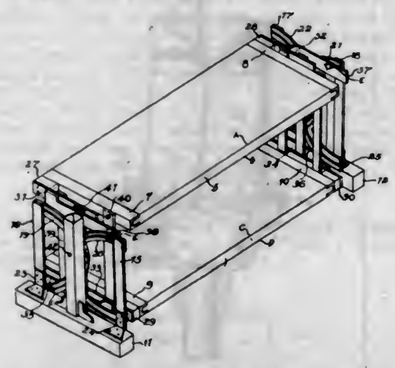


1,686,231. AUTOMOBILE TIRE CARRIER. ETHELBERT FRANCIS, Moundsville, W. Va. Filed May 21, 1927. Serial No. 193,209. 1 Claim. (Cl. 224—29.)

A tire carrier comprising hingedly connected inner and outer ring-like sections, semi-circular in cross section, a plate carried by the inner section having its lower edge bent forwardly to provide a bottom, partitions associated with said plate and bottom and defining compartments within the confines of both sections, the outer section having a plate carried thereby for closing the outer ends of the compartment when the sections are in their closed position.

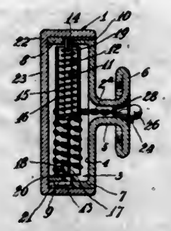
1,686,232. FEEDING AND CUTTING PAPER MATCH SPLINTS. LEO GREENBAUM, Far Rockaway, EDWARD VAN HOOFSTADT, Oceanside, and CHARLES GUSTAVSON, Brooklyn, N. Y., assignors to Lion Match Company, Inc., a Corporation of New York. Filed Apr. 30, 1925. Serial No. 27,111. Renewed July 23, 1927. 5 Claims. (Cl. 164—48.)

1. In a match strip feeding mechanism for match book machines, having a cutter operable to sever successive match cards from the strips, a weighted feeder reciprocable toward and from the cutter and operative in its movement toward the cutter to engage a strip between the splints thereof and feed it to the cutter, and adapted when moved from the cutter to slide freely over the strip without engaging the same, said feeder having a substantially flat smooth



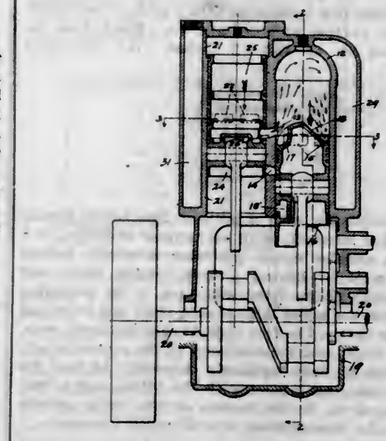
base and depending finger, said base being adapted to rest upon the splints and said finger adapted to engage therebetween.

1,686,233. SIGNALING DEVICE. MARION BORDEN HALLIDAY, New York, N. Y. Filed Apr. 6, 1927. Serial No. 181,311. 1 Claim. (Cl. 116—139.)



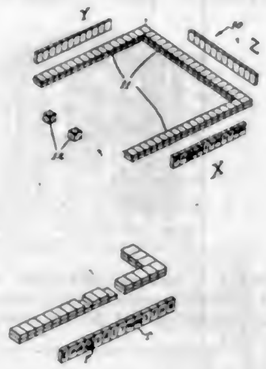
A manually operable signal device comprising an air chamber, a plunger mounted therein and provided with a stem, a whistle in said stem communicating through said stem and plunger with the interior of the air chamber, a lug projecting from a wall of said chamber and adapted to engage a portion of the hand of a user, and a finger piece at the outer end of said stem, said lug and said finger piece being so positioned and related that endwise movement of the air chamber is prevented by the lug when the user presses down against the finger piece in operating the device.

1,686,234. LABORATORY TABLE. OLIVER G. HARNE, Baltimore, Md. Filed Feb. 13, 1926. Serial No. 88,027. 3 Claims. (Cl. 45—111.)



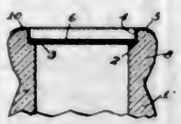
3. In a sectional laboratory table two table sections, pivoted means connecting the sections together and other pivotal means connecting the sections pivotally to supports and positive means for mutually positioning said table sections to permit said tables to become relatively reversible, consisting of off-set supporting arms secured at one end to said table sections, the other ends being guided in a definite path, and means for guiding said ends in said definite paths.

1,686,235. CUFF LINK. CHARLES W. HEASLEY, Pittsburgh, Pa. Filed Dec. 13, 1927. Serial No. 239,680. 8 Claims. (Cl. 24—102.)



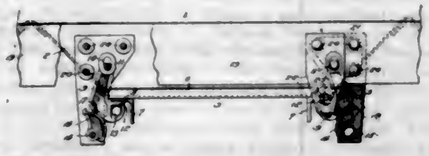
1. In a cuff-link, a pair of cuff-buttons; a flexible extensible and retractible member on each button, and means for detachably connecting said flexible members together.

1,686,236. INTERNAL-COMBUSTION ENGINE. OLAF HETLESATER, Seattle, Wash., assignor to Full Expansion Motors Corporation, Seattle, Wash., a Corporation of Washington. Filed June 16, 1926. Serial No. 116,761. 7 Claims. (Cl. 123—69.)



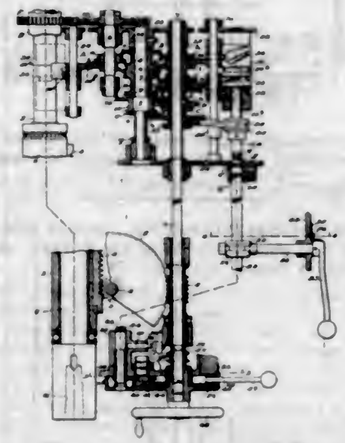
4. In an internal combustion engine, the combination of a power cylinder having a fuel intake port from a fuel charging cylinder, an exhaust port and an auxiliary fuel supply port into the charging cylinder, an independent port connecting with a source of fuel supply, also a passage extending from a source of compressed air supply to the intake port passage, a power piston having a recessed passage registrable with said auxiliary port and the independent port, also formed with relation to the aforesaid intake and exhaust ports, a charging cylinder having the aforesaid power cylinder intake and auxiliary ports, also an intake port connecting with a source of fuel supply, a charging piston having a recessed head with a port therein reciprocatingly registrable with the said power cylinder intake and auxiliary ports, and a shaft having cranks thereon for the respective pistons, which are connected with the opposing cranks at angles related to each other and to the cylinders, the power cylinder being offset from the charging cylinder, so that the auxiliary port will not register with the charging piston outlet port and the power piston auxiliary inlet port at the same time during the charging piston compression stroke.

1,686,237. GAME. SEYMOUR L. HOEXTER, Cedarhurst, N. Y. Filed Oct. 16, 1925. Serial No. 62,938. 1 Claim. (Cl. 273—137)



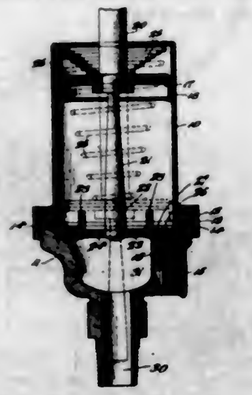
A game apparatus of the character described comprising a plurality of pieces, some of said pieces bearing each a letter of the alphabet and others bearing symbols other than such letters and definable by groupings of said letter bearing pieces.

1,686,238. BOTTLE PROTECTOR AND CLOSURE. FREDERIC S. JULIUS, Philadelphia, Pa. Filed June 14, 1927. Serial No. 198,733. 2 Claims. (Cl. 215—38.)



2. The combination with a milk or like bottle having a neck provided interiorly with an annular shoulder, of a discontinuous annular mouth protector integrally formed of resilient material having a base resting upon said shoulder, a skirt rising from said base, a lip extending outwardly from the upper edge of said skirt and overlying the top of the bottle, the free ends of said protector overlapping each other, and the resiliency of the protector urging its overlapping ends yieldingly outwardly to hold the protector in snug engagement with the bottle, and a sealing disc shaped to fit the mouth of the bottle closely resting upon the base portion of said mouth protector.

1,686,239. CAR-DOOR MECHANISM. BYERS W. KADEL, Baltimore, Md. Filed June 1, 1925. Serial No. 34,040. 9 Claims. (Cl. 105—308.)

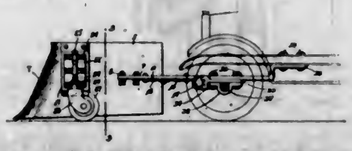


1. A car door mechanism including, in combination with a door hinged to the car body, a hook for supporting said door against opening movement, and a cam adapted to engage said hook for supporting the latter in an elevated position when the door is closed, said hook being slidably and swingingly mounted and being adapted to have supporting engagement with said door in a plurality of positions of the latter, and said cam being pivoted below said hook and being adapted to engage the latter so as to sustain the load imposed thereon by the door.

1,686,240. MULTIPLE-LEVER TWENTY-FOUR-SPEED MECHANISM. DAVID C. KLAUSMEYER, Cincinnati, Ohio, assignor to The Cincinnati Bickford Tool Company, Cincinnati, Ohio, a Corporation of Ohio. Filed July 7, 1925. Serial No. 42,073. 17 Claims. (Cl. 74—67.)

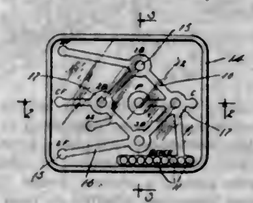
1. A multiple speed mechanism combining a prime mover; a shaft; three serially arranged speed change devices connecting said prime mover with said shaft to rotate the latter at a plurality of speeds; a rotatably and translatably mounted shaft connected to control said three speed-change devices; means to rotate said shaft to cause it to actuate two of said speed-change devices, and means to translate said shaft to cause it to actuate one of said speed-change devices.

1,686,241. GREASE CUP. JOHN FRANKLIN MACINDOE, Philadelphia, Pa. Filed Mar. 3, 1927. Serial No 172,387. 7 Claims. (Cl. 184—45.)



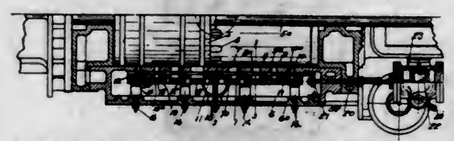
1. The combination of a grease cup having a discharge outlet, a control plate having a port therethrough, said plate dividing said cup into a main grease reservoir and an auxiliary grease reservoir, a spring pressed piston for forcing grease through said port, and means located in said port and controlled by said piston for automatically varying the quantity of grease passing through said port.

1,686,242. BIRD CAGE AND THE CONSTRUCTION THEREOF. BERNARD MARKOW, Brooklyn, N. Y. Filed Apr. 15, 1927. Serial No. 183,937. 19 Claims. (Cl. 119—17.)



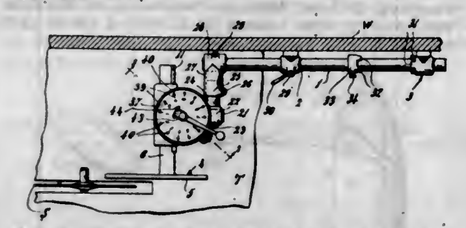
1. In a bird cage structure, a series of wires, and a band enclosing straight portions of said wires and frictionally holding said wires in predetermined horizontal spaced relation, comprising a substantially closed flattened tube having a series of spaced apertures in the narrowest part thereof of the cross-sectional shape of and adapted to receive said wires, the wide faces of said tube being parallel throughout and the least depth of said tube measured from front to rear being greater than the diameter of said wires, and a strip parallel throughout to the faces of said tube and arranged in the interior of the tube between said wires and the rear face of the tube and clamped by the tube in engagement with the wire while the parallelism of the strip and the tube is maintained.

1,686,243. SNOWPLOW. EDWARD B. MEYER, Newburgh, N. Y. Filed Apr. 28, 1926. Serial No. 105,047. 3 Claims. (Cl. 37—44.)



1. A snow plow attachment for motor driven vehicles comprising a pair of mold boards diverging from a cutting angle, of devices for reinforcing the mold boards, connections between said devices and the motor vehicle comprising a pair of hinges arranged to permit vertical movement of the mold boards relative to the vehicle, a frame adjustable within the mold boards to hold said boards at different heights, and a single caster wheel mounted on said frame and supporting the weight of said frame, the mold boards and the reinforcing devices.

1,686,244. BASEBALL PUZZLE. ARTHUR E. MORTIMER, Los Angeles, Calif. Filed May 24, 1927. Serial No. 193,778. 7 Claims. (Cl. 273—91.)



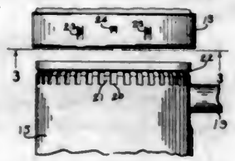
1. A puzzle of the character described, including a plate having a plurality of cup depressions corresponding to the positions of players of a game and trough depressions interconnecting the cup depressions, and a plurality of balls for operation through the trough depressions and into the cup depressions, the trough depressions having enlarged portions around the cup depressions where they join at cup depressions.

1,686,245. RECIPROCATING STEAM ENGINE. HERMAN G. MUELLER, Erie, Pa., assignor to Skinner Engine Company, Erie, Pa., a Corporation of Pennsylvania. Filed Sept. 7, 1923. Serial No. 661,342. 4 Claims. (Cl. 121—136.)

1. In a reciprocating steam engine, the combination of a cylinder; a piston operating in the cylinder; said cylinder having a series of bleeder ports, those uncovered late in the power stroke of the piston being longer in the direction of the axis of the cylinder than those uncovered earlier in the stroke of the piston; a valve controlling said ports and opening the same successively, the long ports permitting the continued opening of the first ports opened as the subsequent ports are opened.

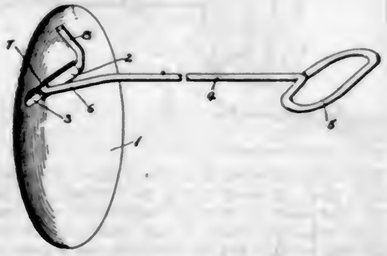
1,686,246. ADJUSTABLE GUIDE. JOHANN MÜRNER, Stemsburg, Switzerland. Filed Nov. 29, 1926, Serial No. 151,391, and in Switzerland Nov. 30, 1925. 8 Claims. (Cl. 143—174.)

3. The combination with a rotary saw, of a guide for guiding a piece of wood during the cutting of a parallel face by said saw, an arm for supporting said guide, a vertically extending shaft, a gear fixed on said shaft, a toothed edge on said arm in mesh with said gear, a dome fixed on said shaft and having graduations, the graduations indicating the distance of the space between the guide and the saw corresponding to the position of the gear, a bracket rotatably mounted on the upper end of said shaft which extends above and through the apex of said dome, a handle pivotally connected to said bracket, a finger on said handle, and there being a plurality of orifices in said dome adapted to receive said finger whereupon the rotation of said handle will actuate said dome in turn to actuate said gear.



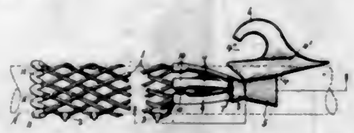
1,686,247. SLEEP-INDUCING PILLOW. EDWARD F. MURPHY, Newburgh, N. Y. Filed May 4, 1927. Serial No. 188,628. 4 Claims. (Cl. 5—337.)

1. An aromatic pocket for attachment on the surface of a pillow comprising a pocket with a flap, a button engaged through the flap and secured to the pocket, a brush back



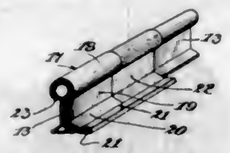
attached to the pocket, bristles therefrom abutting the inside of the flap, and a spring engaged beneath the button, and holding the flap against the bristles.

1,686,248. ELECTRIC-LIGHT SOCKET. ERASTUS G. OAKLEY, Southport, Conn., assignor to Bridgeport Brass Company, Bridgeport, Conn. Filed Jan. 24, 1924. Serial No. 688,223. 6 Claims. (Cl. 173—362.)



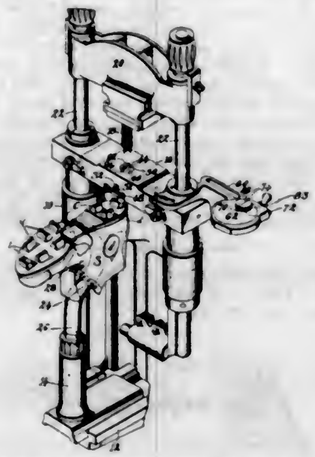
1. An electric light socket comprising a shell and a cap therefor, the metal of said shell being displaced inwardly adjacent the upper end thereof to form thereabove an annular shoulder on its outer surface, and a series of corrugations below said shoulder, and said cap being provided with integrally formed projections engaging below said shoulder to secure the shell and cap together, and with means to engage said corrugations to prevent relative rotation of the parts.

1,686,249. FURNACE-FUEL CLEANER. THOMAS OLINGER, Holland, Mich., assignor to Federal Manufacturing Company, Holland, Mich., a Corporation of Michigan. Filed Sept. 8, 1925. Serial No. 54,879. 1 Claim. (Cl. 15—242.)



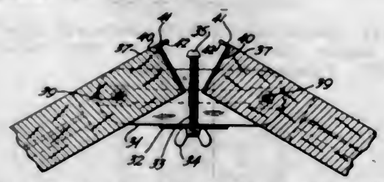
In a flue cleaner, a plate of sheet metal formed at one side of its center with an outwardly pressed bead open at both ends, an elongated wire handle member formed at one end with a pintle section extending transversely to the length of the handle, said pintle member extending through said bead for pivotal connection of the plate to the handle, said pintle section terminating in a stop section turned at right angles thereto, said stop section serving to retain the pintle within the bead and to engage the plate to limit its pivotal movement in one direction.

1,686,250. CABLE GRIP. HERBERT E. PAGE, Syracuse, N. Y. Filed July 7, 1927. Serial No. 203,969. 10 Claims. (Cl. 24—123.)



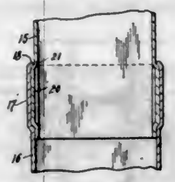
1. In a cable grip having diagonally interwoven strands separated at one end into branches and the strands of each branch bunched together, and a draft head having spaced attaching members tightly embracing the bunched strands of said branches.

1,686,251. INSULATED-CONTACT MEMBER. RAY V. PHILLIPS, Brooklyn, N. Y. Filed Mar. 15, 1927. Serial No. 175,537. 5 Claims. (Cl. 246—31.)



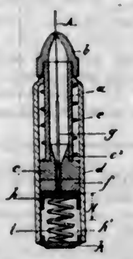
1. An insulated contact member comprising a cap to embrace the head of a rail, a web lying parallel with the web of the rail, a flange lying parallel with the rail flange, and a sheet fibre lining interposed between the rail and said contact member.

1,686,252. ATTACHING MACHINE. ELMER R. POPE, Hamilton, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J., a Corporation of New Jersey. Filed Jan. 2, 1925. Serial No. 172. 33 Claims. (Cl. 1—19.)



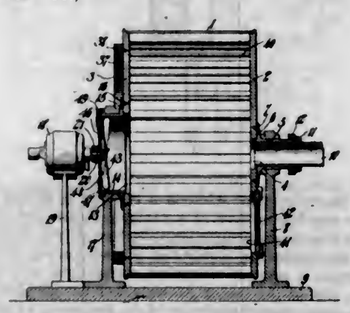
1. In a machine for attaching cleats to shoes, a shoe-support, a holder arranged to retain a cleat against movement therein, said holder being movable to present the contained cleat for attachment in different positions on the bottom of a supported shoe, and means movable independently of the holder for attaching a cleat thus held to said supported shoe.

1,686,253. CURTAIN STRETCHER. EDGAR J. QUIGGLE, Shelby, Ohio. Filed June 4, 1927. Serial No. 196,426. 2 Claims. (Cl. 45—24.)



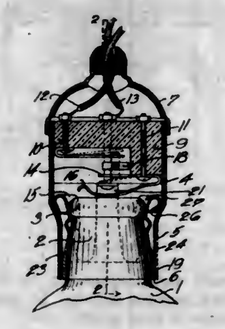
1. In a bar for a curtain stretcher having opposed and coacting portions adapted to be positioned in aligned relation to each other, and spaced side plates pivotally engaging said opposed and coacting portions, a cross piece connecting said side plates, a locking means threadedly engaging said cross piece and adapted to pass between said opposing and coacting portions, and lips formed on said opposing and coacting portions adapted to engage said locking means.

1,686,254. SHEET-METAL PIPE COUPLING. MAX RACHLIN, Brooklyn, N. Y. Filed Jan. 19, 1927. Serial No. 162,056. 1 Claim. (Cl. 285—185.)



A sheet-metal pipe section provided with a plurality of longitudinally extending substantially wedge-shaped sockets in one of its ends, said sockets being wider at their outer ends than at their inner ends, a second sheet-metal pipe section having one of its ends inserted into the socketed end of said first-mentioned pipe section, and a plurality of wedge-shaped lugs on the inserted end of said second-mentioned pipe section corresponding in number to and being seated in said sockets, the free outer wider ends of said sockets being swedged over the inner ends of said lugs.

1,686,255. DISTRIBUTOR FOR SLENDER ARTICLES OF ELONGATED SHAPE. GABRIEL ROBERGEL, Vincennes, France. Filed Mar. 21, 1927, Serial No. 177,195, and in France Mar. 22, 1926. 5 Claims. (Cl. 312—77.)



1. In a device of the character described, the combination with a socket one end of which is closed, of a member adapted for sliding in said socket, spring means between said member and the closed end of the socket, a rod carried by the said member, a seat at the end of said rod, a movable receptacle the bottom of which slopes toward a passage for the said rod, and a bulged and pierced lid on the said receptacle.

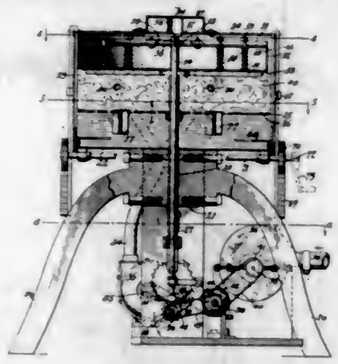
1,686,256. APPARATUS FOR DISTRIBUTING POWDERED MATERIAL. VERNON ROYLE, Paterson, N. J. Filed May 26, 1923. Serial No. 641,736. 14 Claims. (Cl. 302—36.)

1. An apparatus of the character described comprising a rotary cylindrical receptacle for the powdered material, means for generating a fluid current in and through said receptacle, a fluid inlet to and a fluid outlet from the receptacle, and means on the receptacle for carrying the material, said carrying means traversing an endless path surrounding the course of the fluid current, whereby the material is taken from a position below the said current carried around and above the same and dropped thereinto.

1,686,257. LAMP SOCKET. ANDREW SANDBERG, Seattle, Wash. Filed Aug. 8, 1927. Serial No. 211,277. 2 Claims. (Cl. 173—328.)

1. The combination with a lamp socket of a holder comprising a base ring within the socket, attaching arms on said base ring and means for securing the arms to a portion of the socket, clamp arms of resilient metal carried by the base ring, said arms tapering inwardly, and compressible hook members at the free ends of said arms.

1,686,258. KNITTED CAP. IKE SCHLESINGER, East Orange, N. J. Filed Jan. 21, 1927. Serial No. 162,462. 10 Claims. (Cl. 2—172.)

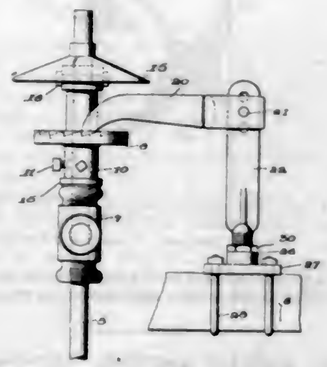


1. In a cap, the combination of a crown member, a band extending thereabout, said band being cut, and means including a hookless fastener to secure edge portions of said cut for retaining the band in position on the crown member, a portion of said band being movable into desired predetermined position when said fastener is opened.

1,686,259. WASHING MACHINE. SALVATORE SEDITA, Buffalo, N. Y. Filed July 12, 1927. Serial No. 205,139. 8 Claims. (Cl. 68—37.)

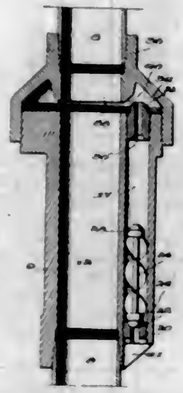
1. A washing machine comprising a tub adapted to contain water and the clothes to be washed, a vertically reciprocating lifter arranged in the lower part of the tub and adapted to raise and lower the clothes, a head which is arranged in the upper part of the tub and against which the clothes are adapted to be pressed by the lifter, and means for oscillating said head about a vertical axis including an upright rock shaft connected at its upper

end with said head and provided at its lower end with two rock arms projecting from diametrically opposite sides thereof, and a rotary shaft arranged horizontally below



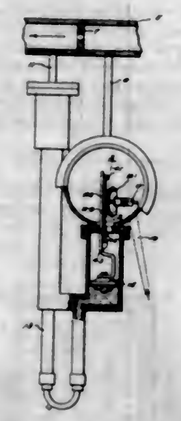
said upright shaft and provided on its diametrically opposite sides with tappets adapted to engage alternately with the rock arms of said upright shaft.

1,686,260. CONTACT RECTIFYING DEVICE. WALTER O. SNELLING, Allentown, Pa. Filed July 29, 1927. Serial No. 209,403. 1 Claim. (Cl. 250—31.)



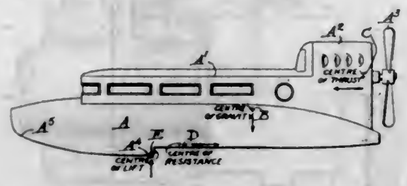
The process of treating current rectifying materials which comprises applying pressure to a finely divided compound of a metal with an element of the sulfur group until a coherent mass results and thereafter heating the resulting coherent product at a temperature sufficient to produce partial crystal growth, but lower than a sintering temperature.

1,686,261. POLISHED-ROD ROTATOR. ALEXANDER BOYNTON, San Antonio, Tex. Filed June 19, 1926. Serial No. 117,196. 2 Claims. (Cl. 255—14.)



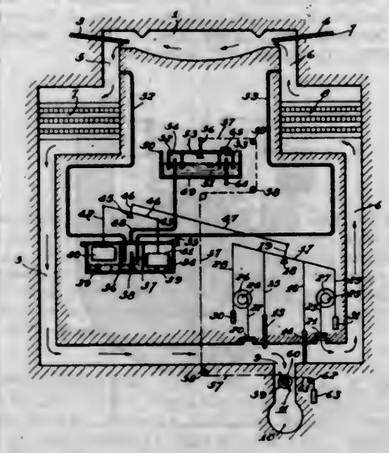
1. A polished rod rotor comprising an attaching member having beam engaging means, an upright actuating arm threadedly and adjustably connected to said attaching member, a locking device securing said upright arm in an adjusted position, a pawl adjustably connected to said arm, and a ratchet wheel having radial teeth engaged by said pawl, the adjustable threaded connection between said arm and base forming a means whereby the pawl may be adjusted radially on said wheel.

1,686,262. STAGE-LIFT FLOWING DEVICE. ALEXANDER BOYNTON, San Antonio, Tex. Filed Dec. 10, 1926. Serial No. 153,948. 3 Claims. (Cl. 103—233.)



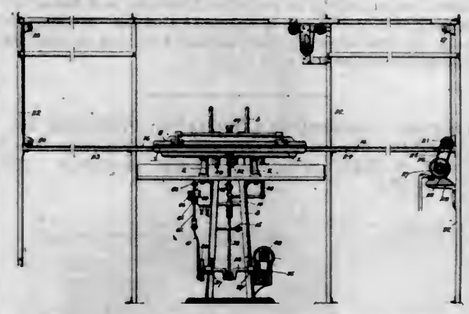
1. An induction valve for well pumps comprising a cylindrical body having a pair of sections, one of which has a depending flange and a flared portion cooperating in the formation of an annular chamber, there being means whereby said flared portion and the other section may be detachably connected, the other of said sections having a valve chamber, inlet and outlet valve seats detachably secured in the ends of the valve chamber and having fluid passages, and a valve between said seats.

1,686,263. MEASURING INSTRUMENT. EDGAR H. BRISTOL, Foxboro, Mass., assignor to The Foxboro Company, Foxboro, Mass., a Corporation of Massachusetts. Filed Apr. 22, 1926. Serial No. 103,792. 9 Claims. (Cl. 74—14.)



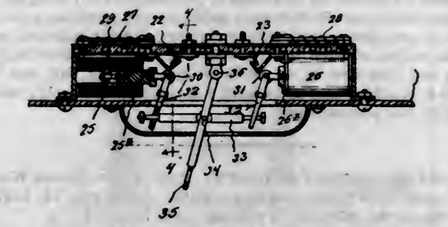
4. In an instrument wherein a member is moved responsively to the fluctuations of a variable means for transmitting said movement proportionately to a driven device comprising an oscillating sector and a cooperating reciprocating element, a pair of wrapping connectors secured adjacent one side of the sector, an equalizer bar pivoted to said element, said connectors secured to the sides of said bar, and a third wrapping connector between the two and including a tension spring, said connector secured adjacent the opposite side of the sector extending in the opposite direction and secured to said element, said connectors comprising wire chains having generally U-shaped links with arms terminally looped about the cross-bars of adjacent links and said sector having ridges received between the looped portions and making contact with the cross-bars.

1,686,264. AERIALLY-PROPELLED SPEED BOAT. HENRY LOWE BROWNBACK, Norristown, Pa., assignor to Brownback Motor Laboratories, Inc., New York, N. Y., a Corporation of New York. Filed July 21, 1925. Serial No. 45,023. 6 Claims. (Cl. 114—66.5.)



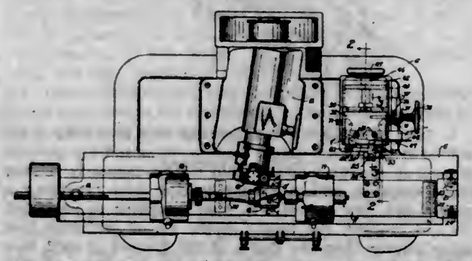
1. A boat of the character specified comprising a hull so designed that its center of gravity is disposed in rear of the mid-section of the hull, the center of resistance being disposed forward of the center of gravity, and the center of lift being disposed forward of the center of resistance; and means above the center of gravity for propelling the boat, the center of thrust thereof being disposed above and in rear of the center of gravity; whereby any change in the propelling thrust will shift the centers of lift and resistance to maintain a balance of forces during acceleration; and whereby the rear portion of the bottom of the hull will skim the surface of the water when at speed.

1,686,265. DRAFT-CONTROL SYSTEM. WILLARD P. CHANDLER, Jr., Pittsburgh, Pa. Filed July 11, 1927. Serial No. 204,682. 9 Claims. (Cl. 236—15.)



1. The combination with a regenerative heating furnace, a plurality of regenerators, flues leading from said furnace and extending one through each of said regenerators, and means for rendering in alteration each of said flues effective for the flow of products of combustion from the furnace through one of the regenerators; of means acting on said flues at the outlet sides of the regenerators for inducing draft through the furnace and flues, and mechanism for automatically regulating said draft-inducing means to vary its effectiveness in inverse relationship with the pressure in the regenerator inlet side of each flue when products of combustion flow through the flue.

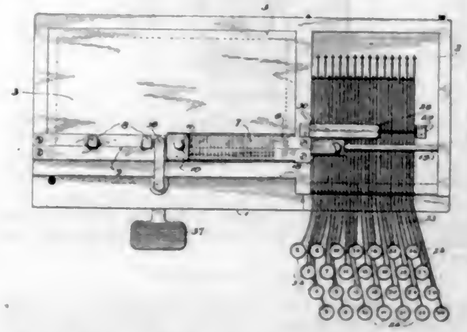
1,686,266. PRESSING MACHINE. HYMAN ELIAS COHEN, New York, N. Y., assignor to United States Hoffman Machinery Corporation, New York, N. Y., a Corporation of Delaware. Filed July 24, 1923. Serial No. 653,602. 8 Claims. (Cl. 68—9.)



1. In combination with cooperative pressing elements; an endless belt, one run whereof passes between said elements and to each side of the same; a motor for moving the belt; a second motor for opening and closing the press; switch mechanism operable to close the circuits of the motors in alternation; and means under the control of the operator for arresting the switch mechanism in open position.

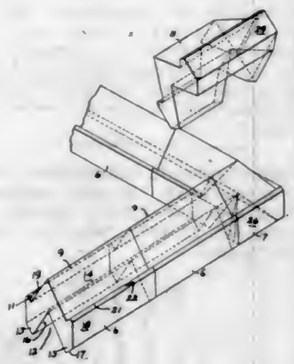
1,686,267. MOTOR-VEHICLE SIGNAL MEANS. HARVEY CURNICK and ELSIE D. SPECHT, Minneapolis, Minn. Filed Apr. 7, 1926, Serial No. 100,344. Renewed June 21, 1928. 2 Claims. (Cl. 200—100.)

1. An electrical organization for motor vehicles, comprising alined solenoids, the armatures of said solenoids being equipped with anti-friction rollers, levers connected with said armatures, a hand lever, a connection between the hand lever and the first-named levers, terminals, and other terminals movable by the anti-friction rollers of the armatures into engagement with the first-named terminals and this alternately.



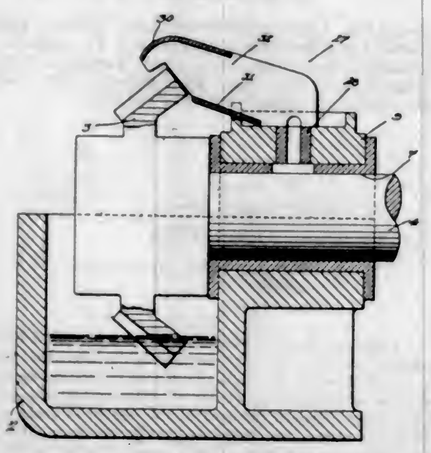
1,686,268. TABLE-CONTROL MECHANISM. GERARD A. DE VLIEG, Rockford, Ill. Original application filed Dec. 17, 1924, Serial No. 756,418. Divided and this application filed Oct. 22, 1926. Serial No. 143,344. 10 Claims. (Cl. 51—50.)

1. A control mechanism having, in combination with a support mounted for reciprocatory and pivotal movement,



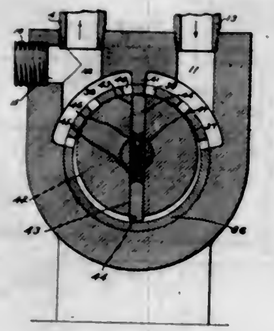
a cam for controlling the movement of said support during reciprocation in one direction, a second cam adapted to be moved into operative position at the end of said reciprocation to hold said support out of engagement with said first mentioned cam and control the movement of said support during reciprocation in the other direction, and means for holding said second cam in operative position, said support being adapted to release said means at the end of said last mentioned reciprocation.

1,686,269. SELECTIVELY-OPERATED PUNCHING MACHINE. FRED L. DUNLAP, Jefferson City, Mo. Filed Nov. 8, 1927. Serial No. 231,929. 5 Claims. (Cl. 164—07.)



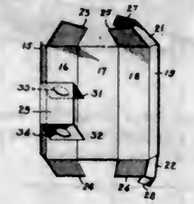
1. A card punching machine comprising a casing like body, a plurality of individually operable key carrying bars pivotally mounted thereon, a guide bar for retaining a card to be punched, a card setting carriage slidably mounted on the casing adapted to be checked in its sliding movement in one direction by an actuated key carrying bar, and a card punching means on said casing cooperable with said guide bar and carriage.

1,686,270. BUILDING BLOCK. CARL A. DWYER and WILLIAM A. WHEELER, Oakland, Calif. Filed Jan. 11, 1927. Serial No. 160,332. 4 Claims. (Cl. 72—38.)



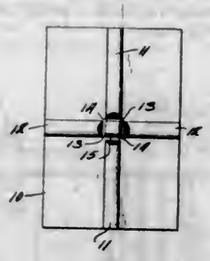
1. In a building block, a bearing face providing a rib defined by angularly related plane surfaces and like grooves defined at opposite sides of said rib by angularly related plane surfaces, and a second bearing face providing a groove and ribs respectively complementary to said first rib and grooves, the height of the rib of said first face being greater than the depth of the grooves of said face with respect to a plane defined by the top edges of said grooves.

1,686,271. JOURNAL LUBRICATOR. JEROME R. GEORGE and EDWARD J. QUINN, Worcester, Mass., assignors to Morgan Construction Company, Worcester, Mass., a Corporation of Massachusetts. Filed Nov. 19, 1926. Serial No. 149,465. 3 Claims. (Cl. 184—11.)



1. In a device for collecting lubricant tangentially thrown from a rotating member, a portion overhanging said rotating member and in the path of the flying lubricant, an inclined portion adapted to carry the collected lubricant by gravity to a journal, and a vertical flange connecting said portions, to take the impact of the lubricant.

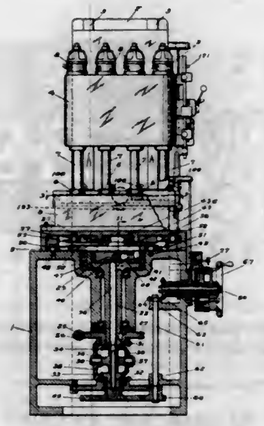
1,686,272. ROTARY PUMP. GEORGE E. GOODRIDGE, Reading, Mass., assignor, by mesne assignments, to Arthur H. Ballard, Incorporated, Boston, Mass., a Corporation of Massachusetts. Filed July 7, 1926. Serial No. 120,952. 11 Claims. (Cl. 103—137.)



1. A rotary fluid pump comprising a casing having a substantially cylindrical chamber therein, a rotor mounted eccentrically of said chamber, one or more pairs of diametrically opposite radial slots in said rotor, blades in said slots, transverse bores connecting said slots and expansible members in said bores and exerting an upward pressure on said opposite blades, each of said expansible members comprising a cup member having a compressible member therein and a plug member having a part fitting into said cup member and resting against said compressible member.

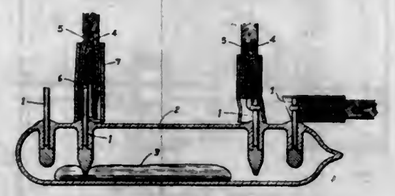
1,686,273. LAMP WRAPPER. FRANKLIN S. GOODSPEED, New York, N. Y., assignor to Westinghouse Lamp Company, a Corporation of Pennsylvania. Filed Dec. 1, 1925. Serial No. 72,463. 7 Claims. (Cl. 229—37.)

1. A lamp wrapper comprising a sheet of material including four side walls, an extended portion on one end of said sheet, apertured extensions on opposite sides of said portion bendable to constitute platforms for lamps, said sheet being foldable about said platforms to constitute a container for lamps.



1,686,274. EXPANSIBLE AND RETRACTABLE ROOFING SHEET. OLIVER P. GREENSTREET, Owensville, Mo. Filed July 17, 1926. Serial No. 123,209. 1 Claim. (Cl. 108—17.)

A metallic shingle consisting of a sheet provided at an intermediate point with an upstanding hump, said sheet having corrugations formed therein and which are radially disposed with relation to the hump, said corrugations having their inner ends spaced from the hump and said corrugations having their outer ends terminating at the edges of the sheet.



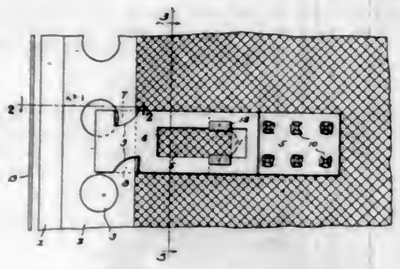
1,686,275. GRINDING MACHINE. RICHARD A. HEALD and WALDO J. GUILD, Worcester, Mass., assignors to The Heald Machine Company, Worcester, Mass., a Corporation of Massachusetts. Filed Feb. 19, 1927. Serial No. 169,510. 4 Claims. (Cl. 51—48.)

1. In a grinding machine, a plurality of grinding wheels whose axes are parallel, workholding means adapted to hold work engageable at separate individual places by each of the grinding wheels, means for producing such an orbital movement of the workholder as to cause an equal individual orbital movement of each grinding wheel-engaging position of the work about its grinding wheel, and for varying the radius of the common orbit of the workholder and thereby equally varying each individual orbit, and a dressing tool for each grinding wheel, said tools being so arranged that the axes of all the individual orbits are equally spaced in the same direction each from the dressing tool for its grinding wheel whereby, due to the equal variation of radius of all the orbits, the relation of all the points of contact of the work with the grinding

wheel to the points of engagement of the dressing tools with the grinding wheels will remain each equal to every other, regardless of such variation of radius of the orbit.

1,686,276. ELECTRICAL CONNECTION. KARL HUNCIKER, Chicago, Ill. Filed Aug. 29, 1927. Serial No. 216,078. 4 Claims. (Cl. 173—324.)

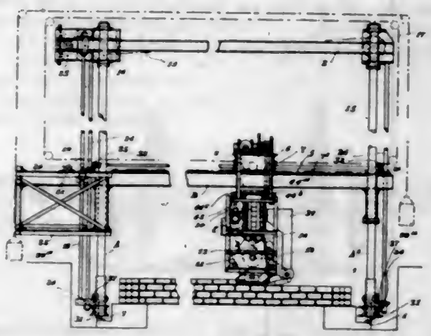
1. An electrical connection between a flexible lead composed of a plurality of fine wires braided together to form a tube and a lead-in wire sealed in a glass wall and projecting thereabove, comprising a connecting link having one end received within and soldered to the tubular lead and the projecting end thereof engaging and soldered to the projecting part of the lead-in wire.



1,686,277. METALLIC COMPOSITION AND PROCESS FOR MAKING THE SAME. WILBUR H. JUDY, Buffalo, N. Y., assignor to Sumet Corporation, Buffalo, N. Y., a Corporation of New York. Filed Aug. 9, 1923. Serial No. 656,522. 6 Claims. (Cl. 75—1.)

4. The method of purifying lead which consists in introducing hydrogen to the exclusion of oxygen into the mass of metal when such metal is in a molten condition.

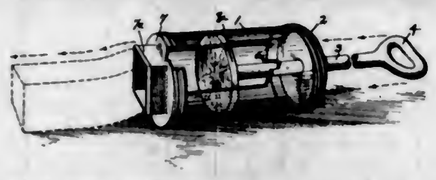
1,686,278. CLIP FOR BEADING CONSTRUCTION. ROGER KAUFFMAN, Lansdowne, Pa. Filed Sept. 10, 1927. Serial No. 218,704. 3 Claims. (Cl. 72—121.)



1. In a clip for securing corner beading strips formed with spaced opening, and in respect to a plaster lathing comprising a pair of sections slidably connected together,

a lug formed at one end of one of the sections adapted for engagement with the beading strips through one of the openings therein, and the opposite section adapted to be

secured to the plaster lathing, and construction associated with said section for locking the same against slidable relation.

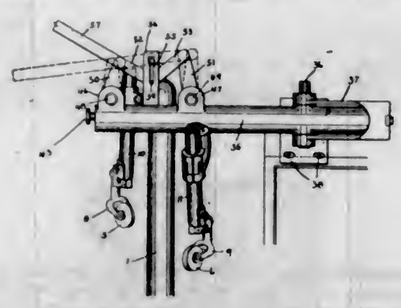


1,686,279. MACHINE FOR ERECTING WALLS OF BRICK AND THE LIKE. STEWART KAYE, Edinburgh, Scotland. Filed Feb. 2, 1924, Serial No. 690,160, and in Great Britain Feb. 19, 1923. 12 Claims. (Cl. 72—129.)

1. A machine for erecting walls of brick and the like comprising in combination upright structures, a cross member extending between and joining said upright structures, said member being adapted to straddle two parallel walls being built, brick laying mechanism carried by and adapted to travel on said cross member, and means whereby the brick laying mechanism may be traversed to lay a course of brick on each of four rectangular walls or cross walls in succession.

1,686,280. MIXER FOR MARGARINE AND THE LIKE. GRAYDON M. KELLER, Los Angeles, Calif., assignor of one-third to William R. Litzenberg, Los Angeles, Calif. Filed May 25, 1927. Serial No. 194,030. 2 Claims. (Cl. 31—35.)

2. In a mixer, a cylindrical body open at both ends, a closure member for one end with a plunger rod operable therethrough, a mixer on the inner end of said plunger rod, a disc having an annular flange around its edge and adapted to fit over said mixer within said cylindrical body, said annular flange being provided with attaching means to be detachably secured to said mixer, whereby to secure said disc with a turning movement to said mixer, and a closure for the other end of said body, said latter closure member

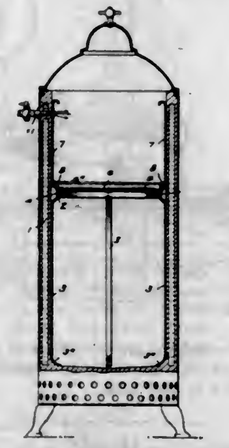


having a mouth extension from the outer face of said closure member to give form to material discharged from said body, substantially as described.

1,686,281. PROCESS OF PRODUCING METAL GLUTINS AND PRODUCT THEREOF. KARL KÖTTEL, Vienna, Austria, assignor, by direct and mesne assignments, of one-fourth to Ernst J. Watzl, Cleveland, Ohio, and one-fourth to Herman J. Trenkamp, Cleveland Heights, Ohio. Filed Aug. 7, 1925. Serial No. 48,915. 8 Claims. (Cl. 260—9.)

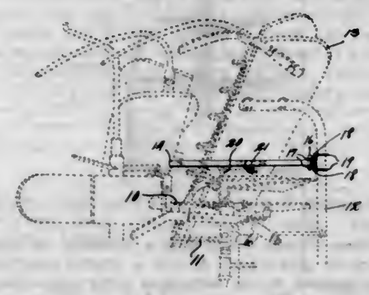
1. A process of producing metal glutins as a chemical combination, consisting in alkalizing glutin by adding only such a quantity of alkali as is required to transform all the glutin into saturated alkali metal glutin and subsequently adding an insoluble glutinate-forming type of metallic salt.

1,686,282. TIRE-BUILDING MACHINE. PAUL W. LEHMAN, Milwaukee, Wis., assignor to The Fisk Rubber Company, Chicopee Falls, Mass., a Corporation of Massachusetts. Filed May 19, 1926. Serial No. 110,148. 12 Claims. (Cl. 154—10.)



1. A device of the character described, comprising a bead applying roll adapted to be positioned adjacent a rotatable tire building form, holding means to position the end of a strip of bead material between the roll and the form and means to move the roll toward the form to press the end of the bead strip against a tire carcass supported on the form and apply the bead material in desired position on the carcass as the form is rotated.

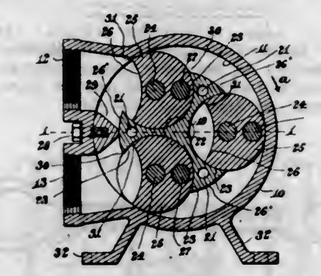
1,686,283. COFFEE URN. KARL LEVI, Minneapolis, Minn. Filed Dec. 23, 1927. Serial No. 242,189. 5 Claims. (Cl. 53—3.)



1. In a coffee urn, an annulus of smaller diameter than the urn chamber and spaced from the walls thereof, offset depending legs carried by said annulus and flatly engaging the walls of the chamber to space the annulus therefrom, the lower ends of said legs engaging the bottom of the chamber to maintain the annulus at a predetermined height, a perforated plate removably supported upon said annulus, said plate having a marginal upwardly and outwardly inclined circumferential flange engaging the chamber wall to

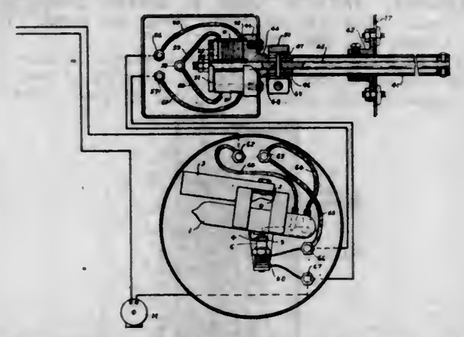
act as a seal and divert liquid from the chamber wall onto the plate, said flange serving to confine a coffee bag to entirely cover said plate to provide a uniform layer of coffee at all points thereon, upwardly extending handles carried

by said plate flange and secured to the inner surface thereof, and said handles extending to a point adjacent the top of the urn and contacting with the side walls of the urn chamber.



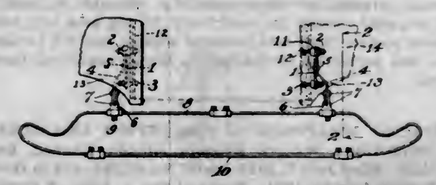
1,686,284. ATTACHMENT FOR CORN BINDERS. HOWARD F. LYMAN, Mitchell, S. Dak., assignor of one-half to Albert T. Lyman, Mount Vernon, S. Dak. Filed Sept. 8, 1926. Serial No. 134,203. 1 Claim. (Cl. 56—67.)

A supplemental trip attachment for a corn binder having a trip hook mounted for swinging movement upon a vertical axis, comprising a hinge support adapted to be applied to the frame of the binder at a point spaced from the axis of the trip hook, an arm pivoted at one end to the hinge member and arranged to swing in a plane transversely across the axis of the trip hook, a spring connected at one end with the arm at a point between the pivoted end thereof and the axis of the trip hook, and being connected at its other end with the frame of the binder at a point in advance of the axis of the trip hook, said spring normally holding the free end portion of the arm substantially in the vertical plane of the trip hook.



1,686,285. ROTARY PUMP. MAX C. MASON, Boston, Mass. Filed Sept. 9, 1926. Serial No. 134,552. 9 Claims. (Cl. 103—148.)

1. The combination of a casing having permanently closed immovable ends between which is a cylindrical chamber with inlet and outlet ports and a projection between said ports extending into said chamber from the cylindrical wall of said casing; a block rotatable in said chamber provided with peripheral pockets between which the peripheral wall is cylindrical and adapted to contact with the inner end of said projection; blades each having a



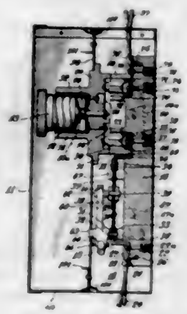
convex portion contacting with the wall of each pocket and normally projecting beyond the same into contact with the cylindrical wall of said chamber, each blade having a concaved peripheral recess; and means within said chamber for retaining said recess toward said projection during the entire rotation of said block.

1,686,286. TEMPERATURE-ACTUATED ELECTRIC CONTROL DEVICE. IRA E. MCCABE, Chicago, Ill. Filed Nov. 3, 1925. Serial No. 66,518. 8 Claims. (Cl. 200—122.)

1. In a temperature actuated electric control device including an electric switch, means normally acting to hold the switch in open position, detachable means for holding the switch in closed position releasable by heat generated by the electric current, and a temperature actuated compression means for varying the current passing through said heat generated means.

1,686,287. BUMPER BRACKET. ARTHUR J. MCCOOK, Stratford, Conn., assignor to American Chain Company, Inc., a Corporation of New York. Filed Mar. 8, 1927. Serial No. 173,626. 4 Claims. (Cl. 293—55.)

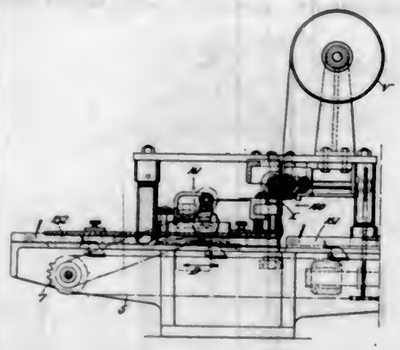
1. A bumper bracket for automobiles of the type described in which the spring and horn at the end of a frame member are masked by an upright pan, said bracket com-



prising a bumper-supporting part having means to hold a bumper bar, and an attachment part adapted to be secured adjustably and firmly to said horn by bolts passing through existing holes in said horn beneath said pan, said parts being connected by a portion offset to clear said pan.

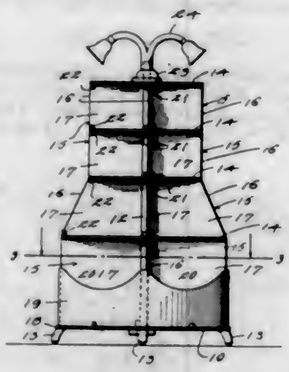
1,686,288. ROPE SLING. CASPER D. MEALS, Nutley, N. J., assignor to American Cable Company, Inc., a Corporation of Delaware. Filed Aug. 25, 1927. Serial No. 215,389. 6 Claims. (Cl. 294—74.)

1. A sling of the type described, said sling comprising a pair of thimbles and a single flexible member, each end of which is secured to a thimble, the intermediate portion of said member being carried around each of said thimbles thereby forming a plurality of stretches of said flexible member extending between said thimbles whereby when tension is placed upon said sling it is equalized among said stretches.



1,686,289. SWITCH. JOHN B. MILANO, Torrington, Conn. Filed Mar. 30, 1925. Serial No. 19,393. 12 Claims. (Cl. 200—114.)

4. In a switch box, a switch comprising a pair of horizontally movable contacts and a pair of stationary contacts, means for connecting said movable contacts to the main line conductors, each of said stationary contacts being connected to an upstanding socket, a pair of terminal sockets spaced from said first mentioned sockets, and a fuse-holding block having four depending metallic prongs arranged at the corners of a rectangle adapted to fit into said sockets for electrically joining said first mentioned sockets with said terminal sockets and for furnishing fuse protection to the branch circuit connected therewith.



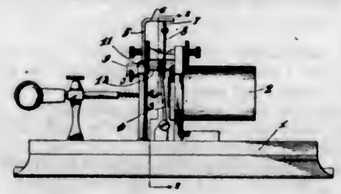
1,686,290. WRAPPING OF CIGARETTES AND OTHER ARTICLES. WALTER EVERETT MOLINS, London, England. Filed July 7, 1925, Serial No. 42,084, and in Great Britain July 10, 1924. Renewed Aug. 1, 1928. 7 Claims. (Cl. 93—4.)

2. An apparatus for packing cigarettes and other articles in a series of wrappers which comprises a forwardly moving conveyor adapted to move batches of articles simultaneously in rapid succession into engagement with

two or more wrapping strips, means to feed said strips across the path of each batch in separate planes transversely disposed to said path.

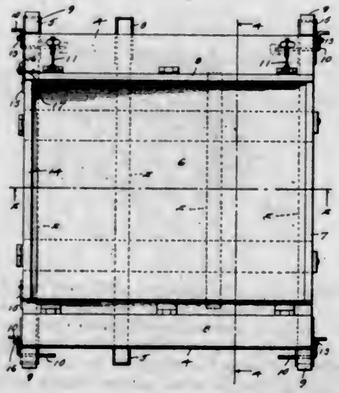
1,686,291. STORE FIXTURE. JACOB P. MOORE, McAllen, Tex. Filed Jan. 7, 1928. Serial No. 245,184. 3 Claims. (Cl. 211—144.)

3. A store fixture comprising a plurality of stacked shelf forming plates each having a central aperture, a standard secured in the lowermost plate and extending upwardly through the apertures of the remaining plates, V-shaped partition plates arranged between adjacent shelf forming plates and having the apices thereof abutting the standard, and means at the upper end of the standard for forcing the shelf forming plates longitudinally of the standard to thereby clamp them upon the partition forming plates, each shelf having upon each face thereof adjacent to the edge of the opening a lug for each of the associated partition plates and adapted to engage in the re-entrant angle of the plate, each shelf being further provided adjacent its periphery upon its upper and lower faces with spaced lugs adapted to engage the outer faces of the arms of the partition forming plates to prevent oscillatory movement of the plates.



1,686,292. SHOE. GEORGE E. MUSERECK, Milwaukee, Wis., assignor, by mesne assignments, to William A. Edmonds, Milwaukee, Wis. Filed Jan. 29, 1923. Serial No. 615,640. 2 Claims. (Cl. 36—17.)

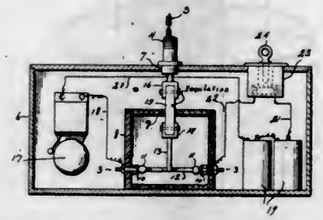
1. In a shoe, an insole shaped to a last to have its upper surface correspond with the curvatures of the bottom of the last, an upper and a welt stitched thereto, said insole being reduced and flattened at its lower surface beneath the high spot of the last corresponding with the ball of



the foot, and a sole member fitted thereto and stitched to the welt with the flat surface of the insole directly bearing thereon.

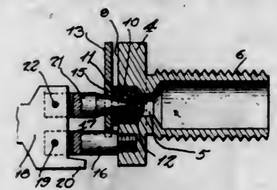
1,686,293. TELEGRAPH INDICATOR. SHERMAN G. NYE, Colorado Springs, Colo., assignor of one-half to D. B. Simon and one-fourth to Amelia Mann, William Mann, Helen Mann, and Freda Mann, Denver, Colo. Filed Dec. 15, 1921, Serial No. 522,641. Renewed Feb. 23, 1928. 2 Claims. (Cl. 177—311.)

1. In combination with a relay, a standard at one end thereof, an angular member one end of which is adjustable within the standard and the other end of which projects at right angles thereto, a ring arranged a substantial distance from said standard in parallel relation to said last named end of said angular member and carried by a rod the opposite end of which is supported by said standard, thus enabling said ring to act as a sounding ring, and a leaf detector supported by said angular member and disposed within said ring, whereby the vibrations of said detector causes the same to impinge against the ring and the sounds formed thereby to be clarified and amplified.



1,686,294. VEHICLE BED. ARTHUR F. RODEKOHR, Battle Creek, Nebr. Filed Aug. 25, 1927. Serial No. 215,481. 4 Claims. (Cl. 296—10.)

3. A vehicle bed comprising sills provided with recesses, flooring mounted upon the upper edges of the sills,

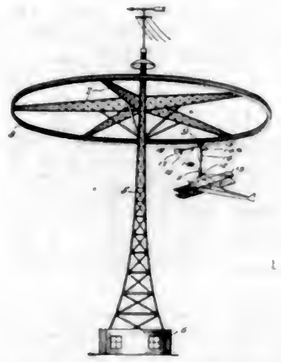


side pieces fitted in the recesses and lying in a plane below the plane of the flooring, panels hinged at the edges of the flooring and adapted to swing over the side pieces with their upper surfaces lying in a plane alined with the upper surface of the flooring.

1,686,295. ALARM DEVICE. JOSEPH D. SCHULTZ, Mount Clemens, Mich. Filed Feb. 5, 1924. Serial No. 690,811. 1 Claim. (Cl. 200—26.)

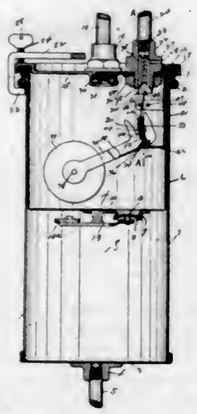
A circuit closer for vehicles comprising a casing of insulating material, a single pair of contacts located within said casing at opposite sides thereof and having threaded stems extending therethrough and carrying binding nuts for connection of conductors therewith, a rotary member journaled through one side of the casing between those sides equipped with said contacts, means for continuously rotating the rotary member during operation of the vehicle, resilient arms projecting laterally in opposite directions from said rotary member, and fly balls on the ends of said resilient arms into the path of which the contacts extend.

1,686,296. AUTOMATIC WATER-CONTROL VALVE. JOHN L. SKUTTLE, Mason City, Iowa. Filed Dec. 12, 1927. Serial No. 239,414. 3 Claims. (Cl. 137—104.)



2. In automatic water control of the character described, a valve casing head having a passage formed with a valve opening on the exterior surface of said head, a post projecting from said head, a plate pivoted to said post for vertical movement in its own plane, a float rod secured to said plate, a float on said rod, a valve plunger pivoted to said plate, a finger projecting from said plate adjacent said post to limit its downward movement about its pivot, a removable valve seat set into the valve opening, and a retaining plate for the removable seat.

1,686,297. WINDOW-SHADE PULL-CORD CLIP. ERNEST L. TRIMBLE, Philadelphia, Pa. Filed July 6, 1925. Serial No. 41,556. 1 Claim. (Cl. 156—40.)



A clip of U-cross section provided with grooves in a leg of the U, and spring strips secured within the grooves.

1,686,298. AIR OR SEAPLANE STATION. GEORGE A. UHL, San Antonio, Tex., assignor of one-third to George E. Ginter and one-third to Phelps & Dewees, a Firm composed of Raymond Phelps and George Dahl Dewees, San Antonio, Tex. Filed Sept. 10, 1927. Serial No. 218,660. 5 Claims. (Cl. 244—2.)

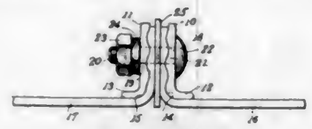
1. An air or seaplane station comprising a tower, a plurality of arms rigidly secured to and radiating from the upper end of said tower, a continuous annular track supported rigidly by the outer ends of said arms, a carriage movable along said track, and a grapple hung from said carriage for engagement by another grapple member on the plane.

1,686,299. VACUUM FUEL-FEEDING DEVICE FOR INTERNAL-COMBUSTION ENGINES. THOMAS VEITCH, Bradley Beach, N. J., assignor, by direct and mesne assignments, of forty per cent to Paul M. Abrahams and twenty per cent to Israel G. Cass, New York, N. Y. Filed June 27, 1925. Serial No. 39,893. 12 Claims. (Cl. 103—236.)

1. In a vacuum fuel feed apparatus comprising a suction chamber, a valve seat having a V-shape, a port in each side of the V and a wedge-shaped valve rocking within said V, and toggle means for holding said valve against said seat to retain said valve against one or the other of said ports.

1,686,300. BELT CLAMP. EDWIN VOLLRATH, Easton, Pa. Filed Oct. 7, 1926. Serial No. 140,042. 1 Claim. (Cl. 24—37.)

A belt end clamp comprising a pair of opposed clamp members having outwardly curved flanges to contact with the belt and longitudinally undulated inner faces, means for compressing the belt ends between said members comprising bolts with nuts to draw said members together, a



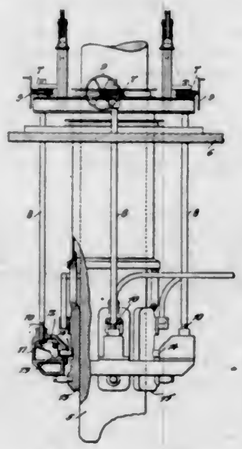


plate perforated to receive the bolts and positioned between the said belt ends whereby the said belt ends are held against relative movement.

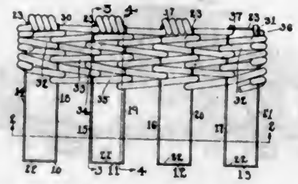
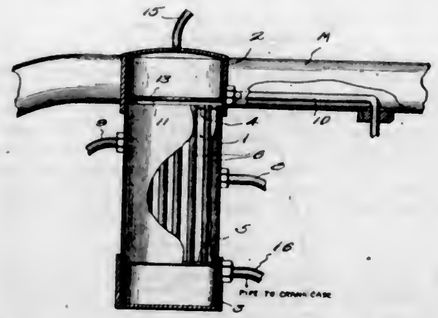
1,686,301. DEMOUNTABLE RIM AND MEANS FOR FASTENING SAME. JAMES H. WAGENHORST, Jackson, Mich. Filed May 28, 1921. Serial No. 473,539. 7 Claims. (Cl. 301—24.)



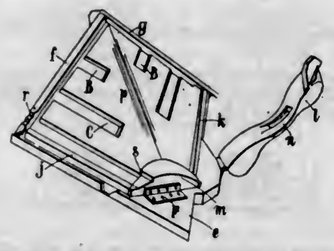
5. The combination with a fixed rim, of bolts passing therethrough, a demountable tire carrying rim having an inwardly projecting portion, said inwardly projecting portion being recessed opposite the bolts, clamps arranged upon said bolts and nuts for engaging said clamps, said clamp having a portion adapted to fit into the recessed portion of the fixed rim and also a portion adapted to bear laterally upon said inwardly projecting portion.

1,686,302. DISTANCE HANDLING OF ELECTRODES. MARTIN WALTHER, Oslo, Norway, assignor to Det Norske Aktieselskab for Elektrokemisk Industri of Norway, Oslo, Norway. Filed Nov. 4, 1925, Serial No. 66,794, and in Norway Nov. 7, 1924. 5 Claims. (Cl. 266—1.5.)



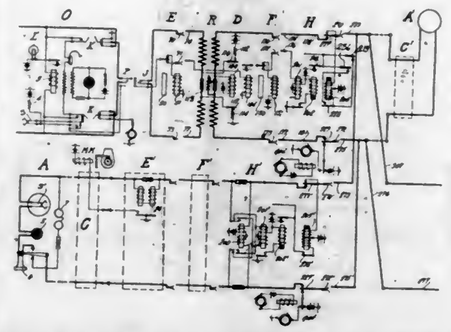
1. Arrangement for handling of selfbaking electrodes for electric furnaces comprising a tamping room arranged above the furnace and protected from the heat of the latter, a holder for the electrode, holder engaging means located below the room and adjacent the holder, a movable shaft extending into the room, means located in the room for actuating such shaft, and means operable by the shaft for actuating said holder engaging means.

1,686,303. MAT. WILLIAM M. WATTIE, Worcester, Mass. Original application filed May 25, 1923, Serial No. 641,503. Divided and this application filed Aug. 21, 1924. Serial No. 733,448. 7 Claims. (Cl. 15—215.)



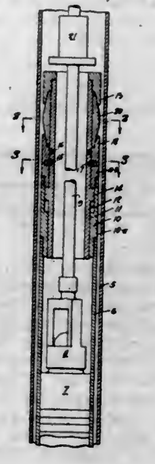
2. A mat composed of a plurality of separate spaced substantially rigid frames held together by strands of flexible material which are secured to the outer side of one of the frames, passed thereunder and looped around the end of said frame and over the other side thereof and under the side of the adjacent frame, looped around the end of said last mentioned frame and under and around the other side of said frame.

1,686,304. OIL CLEANER FOR AUTOMOBILE ENGINES. JAMES F. WELLS, St. Louis Mo. Filed Nov. 26, 1924. Serial No. 752,473. Renewed Aug. 10, 1928. 7 Claims. (Cl. 184—6.)



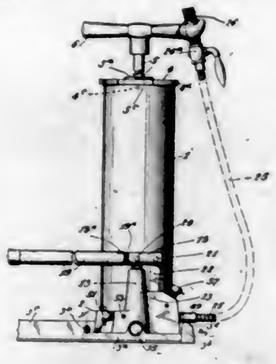
1. An oil cleaning attachment for an internal combustion engine consisting of an intermediate chamber, an upper chamber, a lower chamber, cooling means in the intermediate chamber, distributing means in the upper chamber, means for heating the oil and feeding it to the upper chamber to the distributing means, and means for leading the oil from the bottom chamber back to the crank case of the engine.

1,686,305. MOLD FOR MAKING ROOFING TILES. JOHN LACEY WEST, Abingdon, Berks, England. Filed Aug. 22, 1927, Serial No. 214,771, and in Great Britain Aug. 28, 1926. 3 Claims. (Cl. 25—43.)



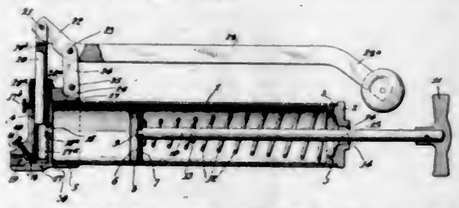
1. A mold for forming interlocking valley tiles comprising a hinged frame and a ridged pallet.

1,686,306. AUTOMATIC TELEPHONE SYSTEM. BERNARD D. WILLIS, Oak Park, Ill., assignor, by mesne assignments, to Automatic Electric Inc., Chicago, Ill., a Corporation of Delaware. Filed May 25, 1922, Serial No. 563,466. Renewed Dec. 18, 1926. 18 Claims. (Cl. 179—9.)



11. In a telephone system, a calling line, a meter, a called line, an operator's position, means for extending a call from said calling line to said called line either exclusive of any operator's position or via said position, and means for operating said meter when a call extended from said calling line to said called line over either route is answered by the called subscriber.

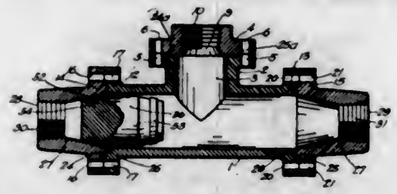
1,686,307. PUMP PACKER. JOHN A. YERKES and REES H. LEMMON, Long Beach, Calif. Filed Jan. 22, 1927. Serial No. 162,712. 2 Claims. (Cl. 103—225.)



1. In a packer for well pumps, a pump barrel, a mandrel sleeve secured to the barrel of said pump, said sleeve having an annular space in the wall of the bore thereof with shoulders at the ends thereof, a mandrel slidable within said sleeve and having a cap, there being an abutment on said mandrel adapted to engage either of said shoulders, packing means mounted on said mandrel between said mandrel sleeve and said cap, said mandrel sleeve and said cap each having annular lips to embrace a portion of said packing, and means to force said mandrel through said sleeve to expand said packing.

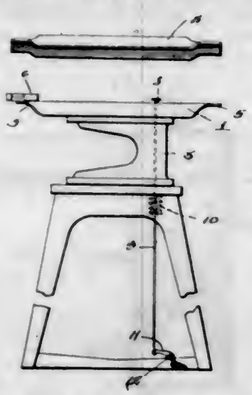
1,686,308. GREASE PUMP. CHARLES L. ZABRISKIE, New York, N. Y., assignor, by mesne assignments, to Rogers Products Co., Inc., a Corporation of New Jersey. Filed Dec. 11, 1925. Serial No. 74,680. 17 Claims. (Cl. 221—47.1.)

1. A grease pump, including a small area plunger, power multiplying means for reciprocating it and a cylinder provided with an inlet with check valve, means for supplying grease under pressure to said inlet, an outlet with check valve and an outlet conduit with an outer coupling for grease-tight connection with a lubricating duct, in combination with an emergency relief valve adapted to vent pressure at a point between the outlet check valve and said coupling; a priming vent valve adapted to vent the pump cylinder at a point between the inlet check valve and the pump plunger.



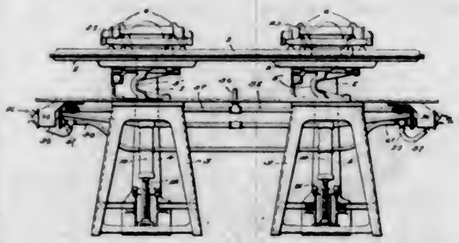
1,686,309. LUBRICATING DEVICE. CHARLES L. ZABRISKIE, New York, N. Y., assignor, by mesne assignments, to Rogers Products Co., Inc., a Corporation of New Jersey. Filed Apr. 13, 1926. Serial No. 101,652. 8 Claims. (Cl. 221—47.3.)

1. A grease gun, including reservoir, a force pump having main piston and cylinder elements, and means for relatively reciprocating them, in combination with a transferable piston and cylinder element of substantial cross-sectional area with a surface axially slidable along a corresponding surface of the piston element and having one end extending beyond one end of said main cylinder; means for locking said exterior end of said transferable element to function as effective cross-sectional area, with the piston element, and other means extending through the cylinder wall for locking it to function with the cylinder element.



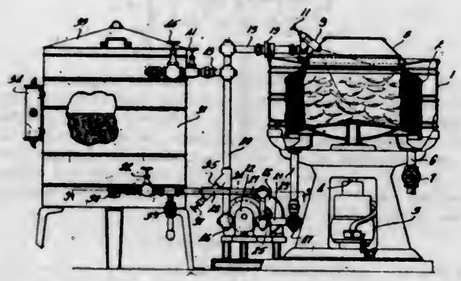
1,686,310. SLUSH-PUMP MANIFOLD. EDWARD M. BEEBE, Cushing, Okla. Filed Apr. 14, 1928. Serial No. 270,080. 6 Claims. (Cl. 251—118.)

1. A slush pump double plug valve of the class described, comprising a barrel-shaped member having a central cylindrical portion, and having a portion between each of its ends and said central cylindrical portion oppositely tapered, each of said tapered portions having a channel therearound for receiving hydraulic packing for respectively seating removably in valve seats, hydraulic packing suitably fitting said channels and co-operating with said valve-seats, flanged valve seats being adapted to co-operate with a manifold, and to fit one at a time the tupering



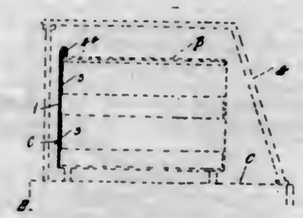
ends of said valve, said valve being adapted for longitudinal movement in said manifold and for closing the bore in one of said valve seats and permitting the other to remain open.

1,686,311. SHIRT-PRESSING MACHINE (TAIL HOLDER). PHILIP N. BRAUN, Syracuse, N. Y., assignor to The Prosperity Company Inc., Syracuse, N. Y., a Corporation of New York. Filed Apr. 14, 1926. Serial No. 102,002. 6 Claims. (Cl. 68—9.)



1. In a shirt pressing machine, the combination of a buck on which the shirt is arranged, a neck band holder, clamping means for engaging the front edges of the shirt and holding the front edges stretched on the buck, said means including a member arranged over the buck and movable toward and from the buck and means for operating the clamping member extending through the buck.

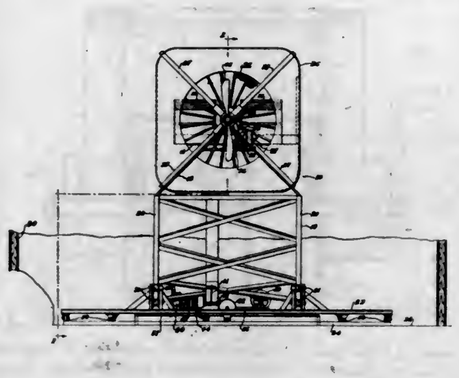
1,686,312. PRESSING APPARATUS. ERNEST DAVIS, Syracuse, N. Y., assignor to The Prosperity Company Inc., Syracuse, N. Y., a Corporation of New York. Filed Jan. 14, 1927. Serial No. 161,091. 4 Claims. (Cl. 68—9.)



1. A pressing apparatus comprising a plurality of spaced apart frames, a pressing element carried by and common to both frames, a movable pressing element movable toward and from the former element and means for supporting and actuating the movable element, said means comprising duplicate portions, carried by each frame and individual thereto.

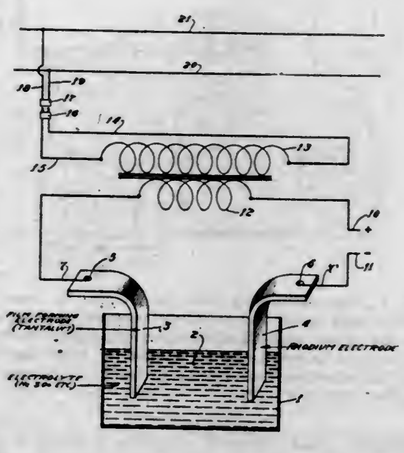
1,686,313. CENTRIFUGAL STARCHING APPARATUS. ALBERT J. DREHER and FORREST J. COUCH, Cincinnati, Ohio, assignors to The American Laundry Machinery Company, Norwood Station, Cincinnati, Ohio, a Corporation of Ohio. Filed Sept. 14, 1925. Serial No. 56,254. 3 Claims. (Cl. 68—28.)

1. Apparatus of the character described, comprising a centrifugal extracting machine, a starch solution storage reservoir, conduit means through which starch solution may be circulated through said machine, fluid supply means for flushing purposes, and delivery connections between said fluid supply means and said conduit means and between said fluid supply means and said starch solution storage reservoir, whereby said conduit means and said storage reservoir may be flushed by fluid from said fluid supply means.



1,686,314. REMOVABLE SANITARY COVER FOR FREEZER CANS. EMIL EBERHART, Edwardsville, Ill. Filed Dec. 2, 1925. Serial No. 72,825. 2 Claims. (Cl. 62—37.)

1. A sanitary cover for a refrigeration unit having air circulation pipes passing therethrough consisting of a piece of sheet iron or other suitable metal formed with a plurality of transverse openings corresponding in size and number to the air pipes of the refrigeration unit and strips of wire mesh fastened to the back of the cover and covering said openings.

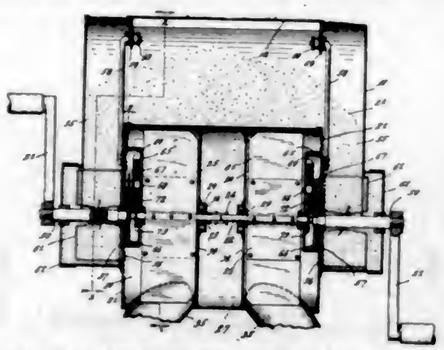


1,686,315. AMUSEMENT DEVICE FOR INDUCING SENSATIONS OF AVIATION. RICHARD M. EDWARDS, Canton, Ohio, assignor of one-half to Frank Thomas, Indianapolis, Ind. Filed Nov. 10, 1927. Serial No. 232,319. 12 Claims. (Cl. 104—83.)

1. A device for inducing aviation sensations and the like, including a cradle, means mounting the cradle for lateral oscillations about a longitudinal axis, means for oscillating the cradle about a lateral axis simultaneously

with its oscillation about its longitudinal axis, and means for rotating the crade about a vertical axis simultaneously with the lateral and longitudinal oscillations.

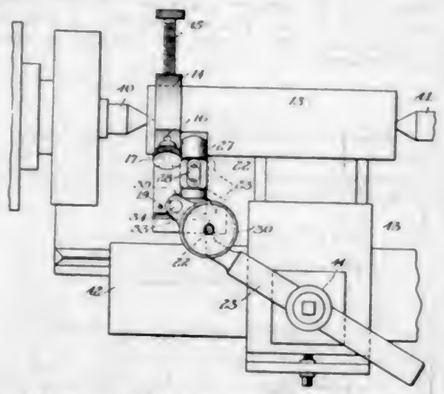
1,686,316. RECTIFIER ELECTRODE. EDGAR W. ENGLE, Lake Forest, Ill., assignor to Fansteel Products Company, Inc., North Chicago, Ill., a Corporation of New York. Filed Jan. 7, 1927. Serial No. 159,521. 4 Claims. (Cl. 175—318.)



1. In electrolytic apparatus, a non-film forming electrode comprising rhodium, a film forming electrode and an electrolyte.

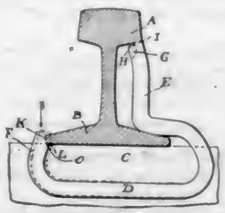
4. In an electrolytic device, a rhodium electrode, a tantalum electrode and a sulphuric acid electroyte, to which has been added a small amount of a metal of the iron group.

1,686,317. MULE BACK DUSTER. EDMUND J. FEENY, Muncie, Ind. Filed Oct. 4, 1922. Serial No. 592,274. 2 Claims. (Cl. 43—148.)



1. A mule-back duster, comprising a container arranged for mounting on the back of a mule and provided with projecting discharge tubes at the sides of the mule, two blowers for receiving powder from said containers and dis-

charging it through said two discharge tubes respectively, two operating handles arranged for operation by the two

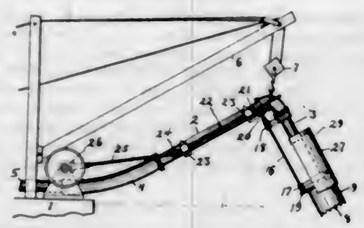


hands of the rider of the mule and connected to said two blowers respectively, said two blowers having alined shafts, and a separable coupling between said two shafts.

1,686,318. GAUGE. GEORGE B. GALLASCH, Rochester, N. Y., assignor to Bausch & Lomb Optical Company, Rochester, N. Y., a Corporation of New York. Filed Sept. 4, 1925. Serial No. 54,399. 12 Claims. (Cl. 33—181.)

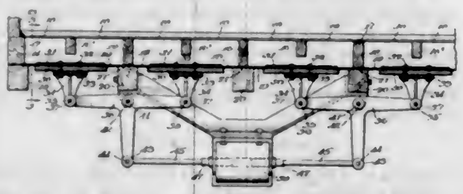
1. A gauge comprising a bracket adapted for connection with a shaft or tube, means upon the bracket for determining the proper angle of a thread-cutting tool with respect to the axis of the shaft and means for indicating when said last mentioned means is adjusted to a predetermined position upon the shaft.

1,686,319. RAIL ANCHOR. HORATIO G. GILLMOR, Washington, D. C. Filed Feb. 20, 1926. Serial No. 89,766. 10 Claims. (Cl. 238—330.)



9. A rail anchor comprising a single bar of metal bent to form a body portion adapted to engage a cross tie but not the rail base, an arm at one end adapted to engage the lower corners at least of the rail base at one side of the rail and an arm at the other end adapted to be wedged in between the head and base at the other side of the rail.

1,686,320. RAIL TIE. ERWIN GRIESBAUM, St. Louis, Mo. Filed July 13, 1927. Serial No. 205,383. 10 Claims. (Cl. 238—60.)

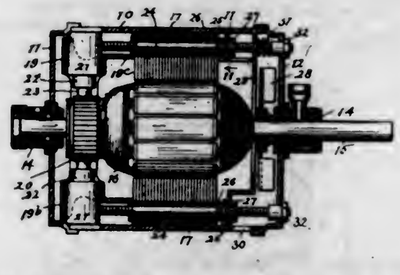


1. A railway tie comprising a metallic member having a pair of raised rail seats disposed near each end and spaced from each other, and a U-shaped clamping member arranged against the underside of said member intermediate each pair of seats and having its end portions projecting upwardly and inwardly therefrom for engaging the edges of the base flanges of the rail and clamping the latter against said seats.

1,686,321. SAND PUMP. WILLIS E. GROH, Corunna, Ind. Filed Apr. 3, 1926. Serial No. 99,551. Renewed July 12, 1928. 5 Claims. (Cl. 37—65.)

1. In apparatus of the class described including a vertically adjustable suction pipe and means for supporting same in adjusted positions, a cylindrical cutter head rotatably mounted on the suction pipe in axial alinement therewith, a portion thereof extending beyond the month of said pipe, the upper end of said head being closed, and its lower end being toothed; a grating fixed in the head disposed between the toothed end of the head and the mouth of said pipe; a driving mechanism including means for actuating same, having geared relation with said cutter head; and a shield in supported relation with said suction pipe and overhanging the upper portion of said cutter head.

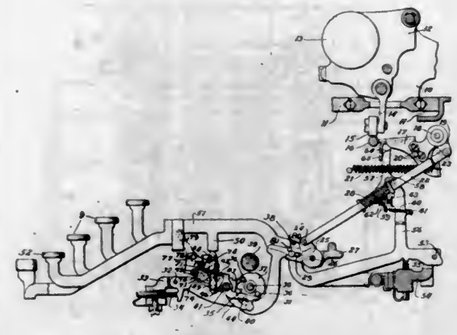
1,686,322. PAPER-MAKING MACHINERY. CHARLES L. HENDERSON, Neenah, Wis., assignor to Paper Patents Company, Neenah, Wis., a Corporation of Wisconsin. Filed Apr. 17, 1925. Serial No. 23,765. 11 Claims. (Cl. 92—32.)



1. In a machine of the class described, the combination with a diaphragm, of means for imparting a vibratory movement to said diaphragm including an electro-magnetic device coacting with said diaphragm and means for energizing said device.

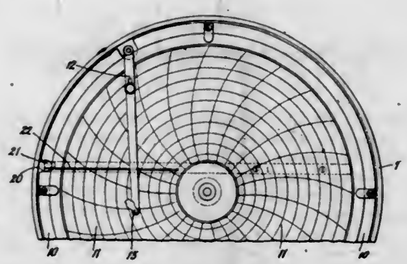
1,686,323. GOLF CLUB. GEORGE VON DER HEYDE, Montclair, N. J. Filed Apr. 12, 1928. Serial No. 269,332. 2 Claims. (Cl. 273—80.)

2. A golf club comprising a shaft of thin tubular form with a striking head on the smaller end, and an umbrella consisting of a stem with ribs spreaders and a cover and which is arranged to slide into and out of the said tubular shaft, the umbrella stem being provided at the free end with a short head arranged to slide partly into the upper open end of the said tubular shaft and provided with locking means to removably and rigidly hold the umbrella inside of the club and to permit the normal use of the club with the umbrella concealed therein.



1,686,324. ELECTRIC MOTOR. FOSTER F. HILLIX, Cleveland, Ohio, assignor, by mesne assignments, to White Sewing Machine Corporation, Cleveland, Ohio, a Corporation of Delaware. Filed Nov. 25, 1922. Serial No. 603,264. 12 Claims. (Cl. 172—36.)

4. In an electric motor, a casing, field, armature and brush holder elements enclosed thereby, the field element comprising a core, the brush holder element comprising a part having portions adapted to support brushes, and means extending axially through the core and engaging said brush holder part for securing the same thereto.

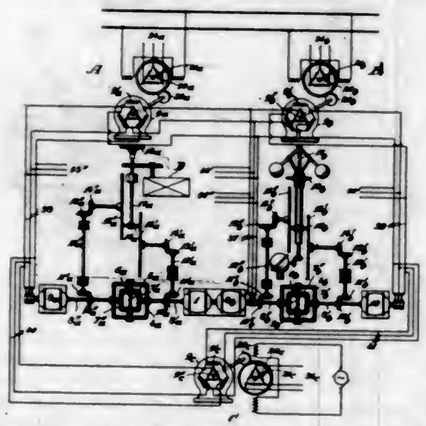


1,686,325. CASE-SHIFT MECHANISM. OTTO A. HOKANSON, Woodstock, Ill., assignor to Woodstock Typewriter Company, Woodstock, Ill., a Corporation of Illinois. Filed May 10, 1924. Serial No. 712,182. 17 Claims. (Cl. 197—73.)

13. In a typewriting machine, the combination with a shift frame for changing from one case to another, a power drive for moving said shift frame of a key lever for controlling the movement of said shift frame, and a

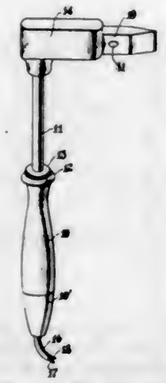
stop actuated by said key lever for locking said shift frame in its shifted position and out of driving relation with said power drive.

1,686,326. RECORDING INSTRUMENT. EMIL AUGUST ILEMAN, Queens, N. Y., assignor to American Schaeffer and Budenberg Corporation, a Corporation of New York. Filed Feb. 11, 1925. Serial No. 8,349. 1 Claim. (Cl. 234—1.)



As an article of manufacture a lifting device for the marking arm of a recording instrument adapted to carry a record sheet, comprising a part adapted to be fastened in fixed position behind said sheet, a resilient leaf spring extending from said fixed part back of said sheet to the edge of said sheet, an end portion carried by the free end of said spring at the edge of said record sheet and extending to a point in front thereof, and a lifting member carried by said end member and adapted to be lifted to lift said marking arm when the spring is released.

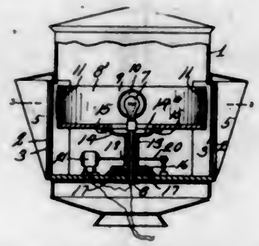
1,686,327. SYSTEM FOR THE TELECONTROL OF OBJECTS. JOHANN WILHELM GEORG ILLAUER, Berlin-Charlottenburg, Germany, assignor to Gesellschaft fuer Elektrische Apparate mit beschraenkter Haftung, Berlin-Marienfelde, Germany, a Corporation of Germany. Filed June 26, 1924. Serial No. 722,464, and in Germany June 28, 1923. 7 Claims. (Cl. 172—239.)



1. In a system for the telecontrol of objects, in combination, two sources of alternating currents having movable elements, a single power machine in the total system, said machine being of constant speed for driving the movable elements of said sources, a stepless device for regulating the relative speed of said movable elements, the speed

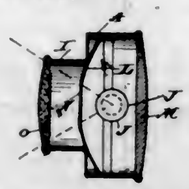
of movement of said movable elements determining the frequency of the current from each of said two sources, and a motor for adjusting the object to be controlled, the rotor

of said motor being supplied with current from one of said sources, and the stator of said motor being supplied with current from the other of said sources.



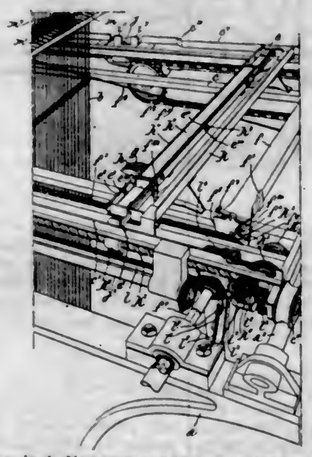
1,686,328. ELECTRIC SOLDERING IRON. BERTALAN KALMAR and MANO KOLLIN, Long Island City, N. Y. Filed Oct. 21, 1927. Serial No. 227,637. 4 Claims. (Cl. 219—26.)

4. The combination with an electric soldering iron having a socket member, heating units therein, and a heating point slidably arranged between the units, of projections from the heating units engaging in recesses in the socket member, and wedges slidable in grooves in the heating units to force the heating units against the socket member so that the projections are forced to stay in engagement with the recesses, and means for normally holding the heating point against being drawn out, consisting of levers hinged intermediate of their ends in the socket member, end of each lever being engageable in apertures in the heating point, and the other ends being frictionally held, and exposed for manual moving.



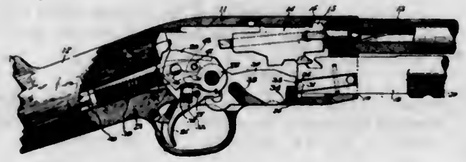
1,686,329. TRAFFIC SIGNAL. RICHARD C. KEOGAN, South Bend, Ind. Filed Sept. 27, 1926. Serial No. 138,093. 3 Claims. (Cl. 116—63.)

1. A traffic signal comprising a casing having sight openings in the sides thereof, a lamp within the casing, a rotatable drum within the casing, said light being disposed within said drum, said drum having light passages of relatively small area in relation to the sight openings in the casing and positioned whereby during the rotation of the



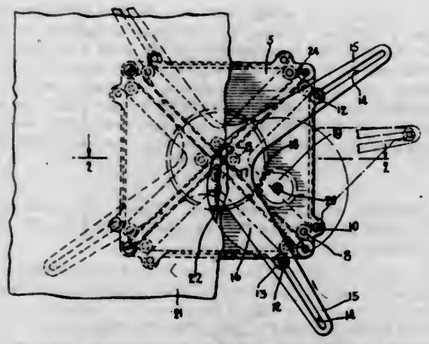
drum light rays projected through the light passages of the drum will pass through the sight openings and will move horizontally across said sight openings.

1,686,330. COMBINED SIGNAL AND PARKING LIGHT FOR MOTOR CARS. STANLEY R. LEESON, Lakewood, Ohio. Filed Sept. 15, 1921. Serial No. 500,823. 1 Claim. (Cl. 171—329.)



In a combined parking and signalling lamp, a front and a rear lens, an incandescent lamp between the two lenses to project light through each lens having a single bulb with a pair of filaments of different light emitting intensity therein, and means for selectively effecting flow of current through either filament to the exclusion of the other, whereby the filament of lesser intensity serves for parking use and the other filament serves for combined parking and stop signal use.

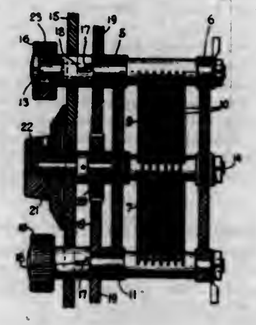
1,686,331. MANUFACTURE OF CARPETS. VICTOR CHARLES EMILE LE GLOAHEC, St. Cloud, France. Filed Dec. 19, 1924, Serial No. 756,864, and in Belgium Dec. 20, 1923. 19 Claims. (Cl. 139—5.)



1. A loom including means adapted to support the warp threads, a movable carriage adapted to be moved in a direction having a component parallel to the plane of the warp threads, movable tuft-shuttle holders located on opposite sides of the warp holding means and mounted on said carriage and movable in a direction having a component perpendicular to the plane of the warp threads, means adapted to actuate said holders so that they are moved towards each other and away from each other, movable retaining mechanism associated with each of said holders and adapted to retain said tuft-shuttles therein and to release said tuft-shuttles therefrom, and control means adapted to operate the retaining mechanism in each of said holders to release the tuft-shuttles in one of said holders and to retain them in the other of said holders.

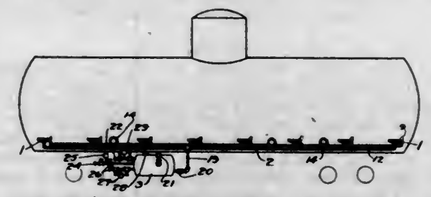
1,686,332. FIREARM. CRAWFORD C. LOOMIS, Ilion, N. Y., assignor to Remington Arms Company, Inc., a Corporation of Delaware. Filed May 5, 1926. Serial No. 106,817. 6 Claims. (Cl. 42—17.)

1. In a firearm of the type having a firing chamber, breech mechanism closing said firing chamber, and operating mechanism for said breech mechanism, the combination of a latch normally blocking movement of said operating mechanism, a firing hammer, a latch disabling means associated with said hammer and comprising a bifurcated member, one arm of which is adapted to yield if the resistance to motion of said latch is excessive.



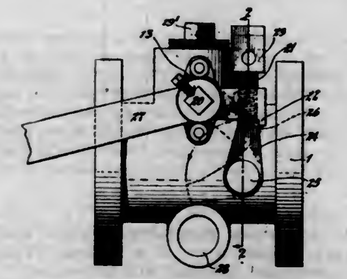
1,686,333. CONDENSER. GEORGE MERLE, Sr., Brooklyn, N. Y. Filed Feb. 5, 1926. Serial No. 86,319. 12 Claims. (Cl. 175—41.5.)

1. A condenser of the class described comprising a plurality of independent condenser units consisting of stator plates and movable plates of each unit, one end of the movable plates being pivoted whereby the same are swung bodily from said pivot into and out of communication with the stator plates of the separate units, and means in operative connection with the free end portions of said movable plates of all the units for operating said plates and for moving the plates of the separate units simultaneously.



1,686,334. CONDENSER. GEORGE MERLE, Sr., Brooklyn, N. Y. Filed Feb. 17, 1926. Serial No. 88,777. 15 Claims. (Cl. 175—41.5.)

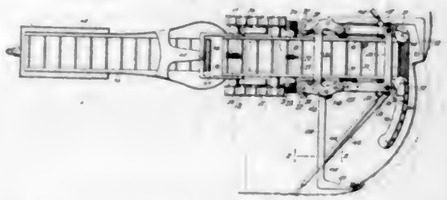
1. A condenser of the class described including a plurality of movable condenser units, said units being arranged side by side and in oppositely arranged pairs, the plates of oppositely arranged pairs of units being in common alinement and in spaced relation and the plates of the



units at the sides of each unit being in cooperative relation with such unit and positioned in the plane between and in spaced relation with the plates of such unit.

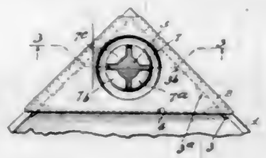
1,686,335. INTERIOR TANK-CAR CLEANER. RAYMOND E. MESSLER and FRED A. IVORY, Seattle, Wash. Filed June 9, 1927. Serial No. 197,558. 7 Claims. (Cl. 141—1.)

1. In an apparatus for cleaning tanks, a plurality of spray devices connected to a common header arranged in the bottom of the tank, an auxiliary chamber mounted on the tank, separate connections for supplying air, water and steam to the auxiliary chamber under pressure, each of said connections being provided with a pressure recording gauge, said auxiliary chamber being provided with an opening through which any cleaning compound may be placed therein, and a connection from the auxiliary chamber to the header in the bottom of the tank.



1,686,336. PLUG VALVE. SIDNEY E. MEYERS, Buffalo, N. Y., assignor to National Aniline & Chemical Co., Inc., New York, N. Y., a Corporation of New York. Filed Sept. 23, 1925. Serial No. 58,058. 12 Claims. (Cl. 251—40.)

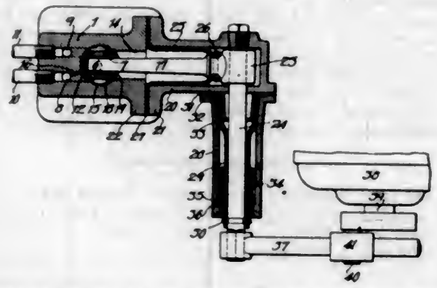
1. A valve comprising in combination a hollow body, a seat in said body, a tapered plug slidably mounted in spaced relation in said body and cooperating in axial



alignment with said seat, said plug having a slot, a lever extending into said slot, an exteriorly extending rotatable stem mounted in said body on which said lever is secured, means for rotating said stem, an arm secured to said stem and rotatable therewith, said arm having a downwardly extending lip at its outer end, an adjustable screw extending through said arm, and a pawl pivotally mounted exteriorly on said hollow body in a line offset from the vertical axis of said adjustable screw and adapted to be projected into the path of said arm and abutted against the downwardly extending lip thereon, said pawl having in its end a conical seat for engaging endwise said adjustable screw and coacting therewith whereby said plug can be forced and positively secured on its seat.

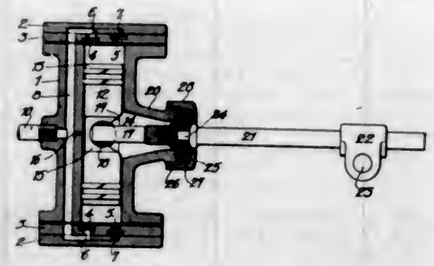
1,686,337. MINING AND LOADING APPARATUS. EDMUND C. MORGAN, New York, N. Y.; Olive Eugenie Morgan executrix of said Edmund C. Morgan, deceased. Filed June 23, 1920. Serial No. 391,212. 42 Claims. (Cl. 255—5.)

1. In a mining and loading machine, the combination with supporting framework, of coal splitting mechanism mounted on said framework for arcuate movement relatively thereto and along an upright mine wall, means for operating said coal splitting mechanism to dislodge material from said upright mine wall, a conveyer for transferring dislodged material toward loading position, and a supplemental conveyer for moving dislodged material along the base of the mine wall toward the receiving end fo said conveyer.



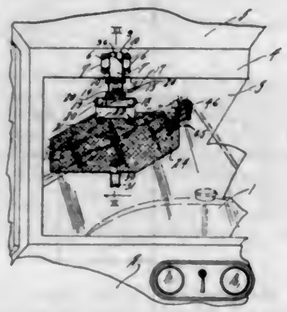
1,686,338. SELF-LOCKING BOX. HARRY D. MORTON, New York, N. Y. Filed Nov. 17, 1925, Serial No. 69,581. Renewed Jan. 16, 1928. 7 Claims. (Cl. 229—47.)

1. A box comprising a body and a cover constructed and arranged to be placed in telescopic relation, a hollow unitary member attached to the top of said cover, projecting therethrough and clinched thereto, and means attached to two adjacent walls of said body, and having a portion which spans two edges thereof and a part of the intervening space therebetween, and coacting with said unitary member to effect a permanent locking of said body and cover.



1,686,339. PUMP FOR REFRIGERANTS AND THE LIKE. THOMAS E. MURRAY, Brooklyn, N. Y. Filed May 12, 1926. Serial No. 108,489. 1 Claim. (Cl. 230—202.)

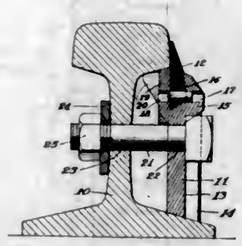
A pump for refrigerants and the like including a cylinder, a piston, an oscillating arm for actuating the piston, a chamber extending laterally from the cylinder and enclosing said arm, a second chamber extending laterally from the outer end of the first one, a shaft for said arm extending through said second chamber, a flexible fluid-tight tube within the first chamber surrounding said arm and



engaging the wall of the chamber and packing means within the second chamber between said shaft and the wall of the chamber.

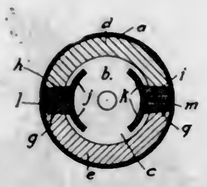
1,686,340. PUMP FOR REFRIGERANTS AND THE LIKE. THOMAS E. MURRAY, Brooklyn, N. N. Y. Filed May 14, 1926. Serial No. 109,074. 2 Claims. (Cl. 230—202.)

1. A pump for refrigerants and the like including a piston, a cylinder, a lever for actuating the piston, a chamber carrying the inner portion of the lever and open at its inner end to the cylinder to permit free movement of said lever, the lever passing through the outer end of the chamber and carrying a flexible fluid-tight plate the outer portion of which is attached to the end of the chamber, said plate alone constituting a rocking support for the lever.



1,686,341. GLARE SHIELD. ISAAC R. NATHANSON, Toledo, Ohio. Filed Dec. 14, 1925. Serial No. 75,319. 5 Claims. (Cl. 296—97.)

1. A light screen, a mounting bearing as a hinge support for the screen, said bearing being provided with an angular position determining stop for the screen as to said

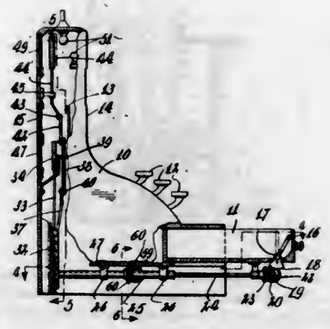


bearing, a fixed support, a bracket from said support providing a swingable mounting for the bearing, and directing means for the bearing as shiftable in said mounting relatively to the support.

1,686,342. SWITCH-POINT GUARD. ALPHONSO T. PALMER, Chicago, Ill. Filed Feb. 15, 1926. Serial No. 88,183. 12 Claims. (Cl. 246—441.)

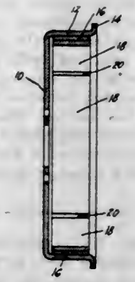
1. A switch point guard comprising a supporting stand, and a removable wear member carried by said stand and held thereby adjacent the lateral face of the railway rail.

1,686,343. INDUCTOR FOR MAGNETO-ELECTRIC MACHINES. MARC ANTOINE PATTAY and EUGENE JAQUEMOT, Geneva, Switzerland, assignors to Magnétas Lucifer, Société Anonyme, Carouge-Geneva, Switzerland, a Corporation of Switzerland. Filed Jan. 21, 1928, Serial No. 248,326, and in Switzerland Jan. 26, 1927. 1 Claim. (Cl. 171—209.)



Inductor for magnet-electric machines comprising in combination a plurality of magnets, an envelope of non-magnetic material and wedging members of magnetic material, these wedging members being lodged between the adjacent ends of the magnets and adapted to apply these latter against the surface of said envelope of non-magnetic material, pole pieces constituting one piece with said wedging members and which are in relation with the magnets solely by the intermediary of the wedging members, so as to allow to wholly utilize the magnets from the magnet point of view, and fixing members which are operative on the wedging members and which are adapted to bear against said envelope of non-magnetic material.

1,686,344. DIETHYLENE GLYCOL DINITRATE AND PROCESS OF PREPARING SAME. WILLIAM H. RINKENBACH, Dover, N. J., assignor of one-half to Walter O. Snelling, Allentown, Pa. Filed May 31, 1927. Serial No. 195,590. 5 Claims. (Cl. 260—144.)

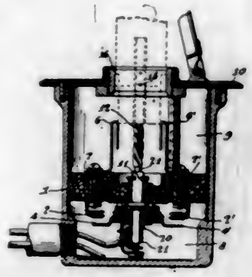


1. The new compound diethylene glycol dinitrate.

1,686,345. ADVERTISING DEVICE FOR CASH REGISTERS. SALVATORE RUSSO, New York, N. Y. Filed May 12, 1927. Serial No. 190,702. 3 Claims. (Cl. 235—7.)

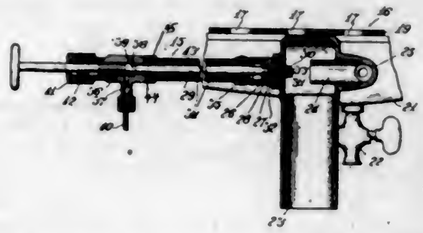
1. In a device of the class described, the combination with a cash register frame, of a display sign arranged for movement into exposed position on the frame, a cash drawer, a lever mounted on the drawer and arranged for manipulation from the interior thereof, and a means for transmitting movement from the lever to the sign.

1,686,346. BRAKE DRUM. ROY S. SANFORD, South Bend, Ind., assignor to Bendix Brake Company, Chicago, Ill., a Corporation of Illinois. Filed Sept. 19, 1927. Serial No. 220,318. 3 Claims. (Cl. 188—218.)



1. A brake drum which is expansible under the influence of heat, in combination with a member mounted on said drum and which is reversely affected by heat in such a manner as to maintain the braking surface of the drum approximately constant.

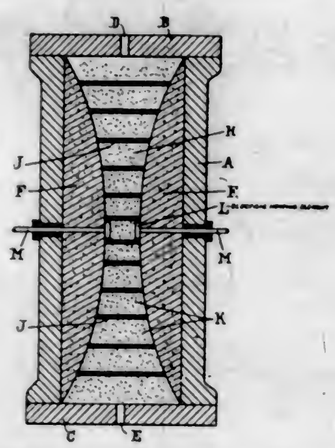
1,686,347. AUTOMATIC ARCLESS PLUG CONNECTION. OTTO SCHEUERMANN, Sharon, Pa. Filed Aug. 31, 1925. Serial No. 53,760. 3 Claims. (Cl. 200—51.)



1. In an automatic arcless plug connection including a housing, a base in said housing separating the same into two compartments, plug receiving clips mounted in one of said compartments on one side of said base, and switch blades and clips in the other of said compartments on

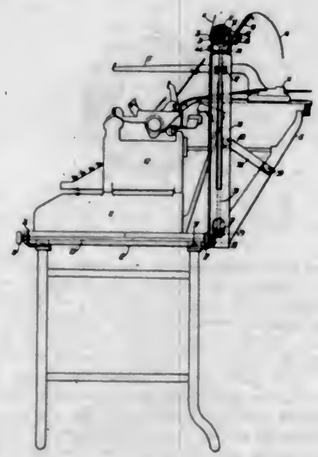
the opposite side of said base, means extending through the base connecting the plug clips and the switch clips, means for allowing the making of live wire connections

in the part of said housing containing the switch mechanism only, a means for operating the switch by the insertion of a plug, and a means for positively guiding the plug.



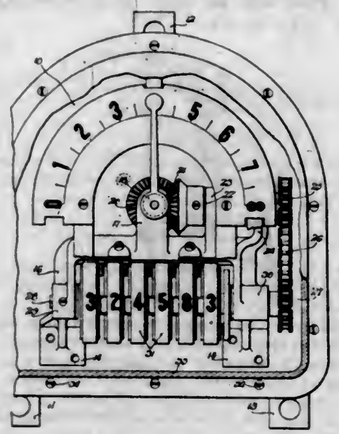
1,686,348. GENERATOR. GUSTAVE F. SCHMIDT, Chicago, Ill. Filed Jan. 15, 1926. Serial No. 81,357. 9 Claims. (Cl. 158—53.)

1. A generator of the character described, comprising an outer metallic tube, a nonporous carbon tube, the external diameter whereof is slightly less than the inner diameter of the outer tube and resting at bottom on the metal tube so as to provide an attenuated crescent shaped passage for the hydrocarbon between the outer tube and the upper surface of the carbon tube, and a metal rod passing through the carbon tube and of a diameter slightly less than the internal diameter of the carbon tube so as to provide an attenuated crescent shaped passage beneath the rod.



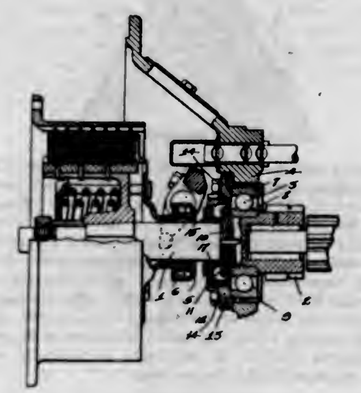
1,686,349. PROCESS OF CONDUCTING GASEOUS CATALYTIC REACTIONS AND APPARATUS THEREFOR. ROLAND EDGAR SLADE, Billingham-on-Tees, England, assignor to Atmospheric Nitrogen Corporation, New York, N. Y., a Corporation of New York. Filed May 1, 1926, Serial No. 106,166, and in Great Britain May 4, 1925. 13 Claims. (Cl. 23—288.)

1. The process of conducting exothermic gaseous catalytic reactions which comprises preheating a stream of uncatalyzed gases by passing them in contact with a hot body of heat-storing material, conducting said preheated stream of gases in contact with and through a body of catalyst material to cause the exothermic reaction to progress in the direction of the flow of the gases from the region of the inlet end of the said catalyst material toward the region of the exit end thereof, leading the hot catalyzed gases of the foregoing steps in contact with a second body of heat-storing material to remove heat from said gases, continuing the aforesaid steps until the portion of the catalyst material in the region of the exit end is at a higher thermal state than the correspondingly located material of the inlet end and thereupon causing the stream of gases to flow, in a reversed direction and under the aforesaid operating conditions, first in contact with the heat-storing material of the third step, now in a hot condition, then in contact with the catalyst, as heretofore set forth,



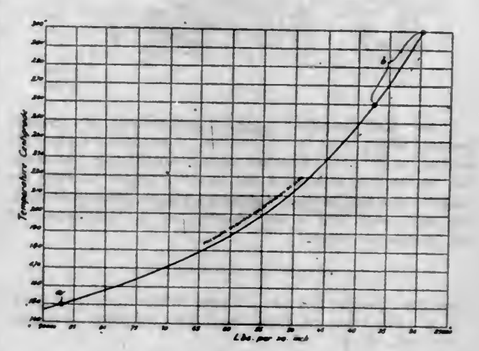
and finally in contact with the heat-storing material of the first step in order to re-heat it, and repeating the aforesaid steps as a continuously functioning catalytic procedure with substantially regular reversals of flow of gases.

1,686,350. COPYHOLDER FOR TYPEWRITING MACHINES. JESSE A. B. SMITH, Stamford, Conn., assignor to Underwood Elliott Fisher Company, New York, N. Y., a Corporation of Delaware. Filed Nov. 8, 1924. Serial No. 748,554. 6 Claims. (Cl. 120—32.)



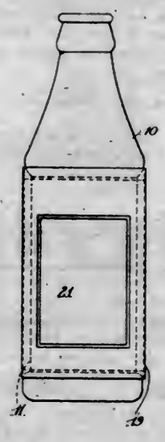
1. The combination with a typewriting machine having a reciprocable carriage of a copy-holder, bracket supports therefor, each support extending upwardly from below the typewriting machine with one support on either side thereof, detachable end plates on the upper ends of the supports for supporting the copy-holder at either end thereof above the typewriting machine, the bracket supports being sufficiently far apart to allow reciprocation therebetween of the typewriter carriage.

1,686,351. COAL METER. JACOB M. SPITZGLASS, Chicago, Ill., assignor to Republic Flow Meters Co., Chicago, Ill., a Corporation of Illinois. Filed Mar. 25, 1925. Serial No. 18,194. 19 Claims. (Cl. 235—61.)



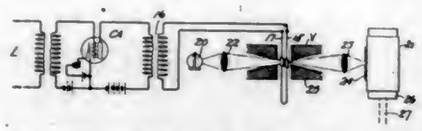
1. A meter for measuring the flow of granular or powdered material comprising a counter, a movable member actuated in sympathy with the rate of flow of said material for driving said counter, cam mechanism for controlling the connection between said movable member and counter, and means for setting said cam mechanism to accord with the quantity of flow of said material.

1,686,352. ADJUSTABLE CLUTCH BRAKE. HENRY W. SWEET, Syracuse, N. Y., assignor to Brown-Lipe Gear Company, Syracuse, N. Y., a Corporation of New York. Filed Sept. 23, 1926. Serial No. 137,268. 7 Claims. (Cl. 192—13.)



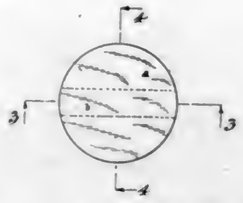
2. In a motion transmitting mechanism, the combination of a clutch including a shaft, a throw-out collar slidable along the shaft, a support for the shaft in the rear of the throw-out collar, the shaft having a bearing in said support, a bearing cap for said bearing having an outer body and a central part enclosing the shaft and threading into the body, said part being opposed to the throw-out collar and brake means interposed between said collar and part to retard the rotation of the throw-out collar when the same is actuated to release the clutch.

1,686,353. PROCESS FOR WORKING ZINC. WALTER MARCUS TOWNE, New York, N. Y., assignor, by mesne assignments, to E. W. Bliss Company, Brooklyn, N. Y., a Corporation of Delaware. Filed July 27, 1925. Serial No. 46,482. 4 Claims. (Cl. 148—11.)



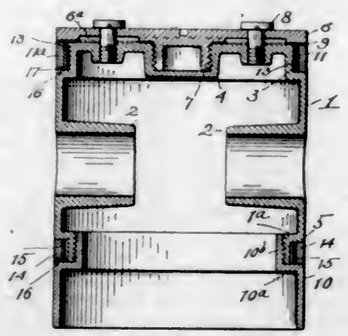
4. The process of working zinc which consists in subjecting a blank to pressure between male and female dies and extruding it through a contracted annular space surrounding the made die in a direction opposite to the movement of the male die and while at a temperature materially exceeding 150° C. and not materially exceeding 300° C.

1,686,354. MERCHANDISE PACKAGE. JAMES F. WALLACE, Rochester, N. Y., assignor to Certo Corporation, Rochester, N. Y., a Corporation of New York. Filed Mar. 24, 1927. Serial No. 178,100. 4 Claims. (Cl. 215—6.)



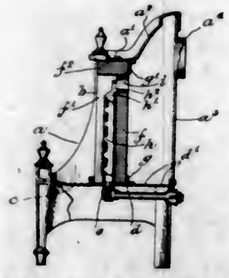
1. A merchandise package comprising a container having a depressed panel in a face thereof, an instruction booklet disposed and housed in said panel, means securing said booklet in said panel to adapt said booklet and container for convenient manipulation together as a unit in labeling operations, and a label having a vertical width over said panel substantially equal to that of said panel and encircling said container to enclose and conceal said booklet and present the outward form, adaptability and appearance of an ordinary container labeled in the ordinary manner.

1,686,355. TRANSLATING DEVICE. EDWARD C. WENTE, New York, N. Y., assignor to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed Mar. 22, 1924. Serial No. 701,016. 15 Claims. (Cl. 178—7.)



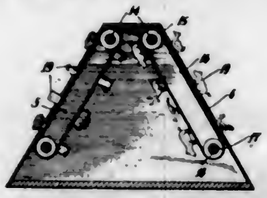
1. An electro-optical system comprising a passage through which light is transmitted, a source of modulated carrier waves, and vibrating means comprising two members movable in separated but parallel planes to vary the amount of light passing through said passage in accordance with only half of the envelope of the amplitudes of said modulated waves.

1,686,356. BOTTLE CAP. ALBERT WESTLAKE, New York, N. Y. Filed Oct. 18, 1926. Serial No. 142,282. 1 Claim. (Cl. 215—38.)



A bottle cap composed of fibrous material and having a zone within the mouth of the bottle, adapted, when subjected to pressure, to be depressed lower than the top surface of the bottle rim and provided with a sustaining strip crossing said bottle mouth and anchored upon the summit of the bottle neck rim, said sustaining strip being located below the top surface of the cap, whereby said cap is adapted to resist the contact of objects which might tend to penetrate the same.

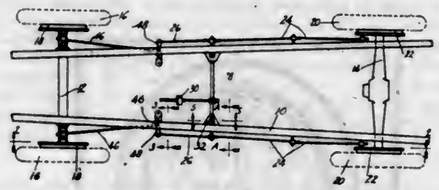
1,686,357. PISTON. EDWARD M. WILLIAMS, Elyria, Ohio. Filed Oct. 27, 1921. Serial No. 510,866. 4 Claims. (Cl. 74—108.)



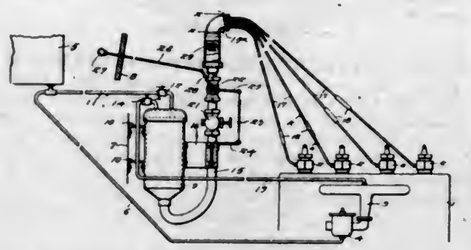
1. A piston comprising a body portion, a head portion, which head portion is separate from but secured to the body portion, heat insulating means interposed between the head and body portion and a skirt portion associated with the body portion which is made separate from but attached to the lower part of the body portion, the said head portion and the said skirt portion being made of metal which has a low co-efficient of expansion as compared to that of the body portion.

1,686,358. GAS HEATER. AARON H. WOLFF, New York, N. Y. Filed July 26, 1923. Serial No. 653,884. 9 Claims. (Cl. 126—92.)

1. A gas heater embodying therein a casing having an opening in the front thereof, combustion chamber forming means having a forwardly directed top, and a back wall rearwardly of said opening, a plurality of burners, opening into the bottom of said combustion chamber, a radiant element above each of said burners and extending adjacent the top of said combustion chamber, and a back plate for said casing spaced sufficiently away from the back wall of said combustion chamber forming means to form a flue chamber rearwardly of said combustion chamber, said back plate having an opening therethrough adapted to receive a flue pipe, and said combustion chamber forming means having an opening through the back wall thereof adjacent the top of each radiant element whereby gases will flow from said combustion chamber, and through said flue chamber and the opening therein.



1,686,359. DISPLAY DEVICE. ROBERT J. ZEDLER, Yonkers, N. Y. Filed June 21, 1927. Serial No. 200,376. 1 Claim. (Cl. 46—40.)

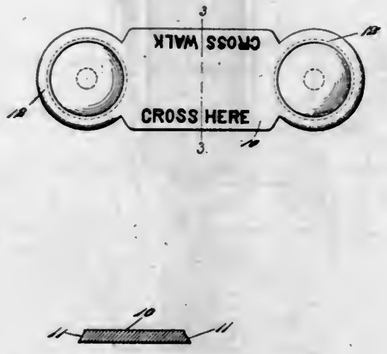


A display device comprising a hollow frusto-pyramidal casing having narrow slots in its opposed angular sides adjacent one end, the slots terminating in the level upper element of the casing, a motor fixed on the base of said casing midway between the sides thereof, shafts journalled in the end walls of said casing at its upper and lower corners, operative connections between said motor and the upper shafts, rolls fixed on all of said shafts, belts trained over said rollers at each side of the casing, the outer runs of said belts both moving upwardly, and a plurality of figural objects attached directly to said belts to partially extend through the slots in the casing sides.

1,686,360. OPERATING CONNECTION. WILLIAM JOSEPH ANDRES, South Bend, Ind., assignor to Bendix Brake Company, Chicago, Ill., a Corporation of Illinois. Filed Dec. 17, 1925. Serial No. 75,924. 6 Claims. (Cl. 188—10.)

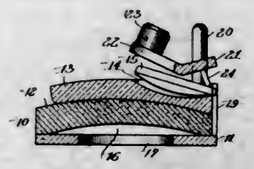
1. A vehicle having a chassis frame and swivelled wheels on opposite sides of the frame having brakes, and comprising, in combination therewith, a brake-applying connection for each brake inclined rearwardly in a horizontal plane and terminating inside the outer edge of the frame to clear the wheel in its extreme position, an operating connection for each brake-applying connection outside the frame terminating opposite the rear end of the corresponding brake-applying connection, and a motion-transmitting means supported by each side of the frame the two means connecting each of the operating connections outside the frame to the corresponding brake-applying connection inside the outer edge of the frame.

1,686,361. PRIMING DEVICE FOR INTERNAL-COMBUSTION ENGINES. CHARLES D. ARMSTRONG, Woonsocket, R. I. Filed Apr. 29, 1926. Serial No. 105,472. 1 Claim. (Cl. 123—187.5.)



In combination, an internal combustion engine and the spark plugs thereof, a tank, a vertically disposed pipe communicating at its lower end with the tank and provided at its upper end with a distributing head, a bracket for supporting the pipe and secured to the tank, a downwardly seating check valve arranged within the pipe below the distributing head, a manually operable valve located in the pipe below the check valve, tubes communicating with the distributing head and with the spark plugs, a source of fuel supply for the engine, a pipe provided with a check valve and communicating with said source and the top of the tank, and a second pipe provided with a check valve and communicating with the top of the tank and with the intake manifold of the engine.

1,686,362. ELECTRIC FIXTURE. GEORGE ARRAS, Chicago, Ill. Filed June 29, 1925. Serial No. 40,225. 5 Claims. (Cl. 247—30.)

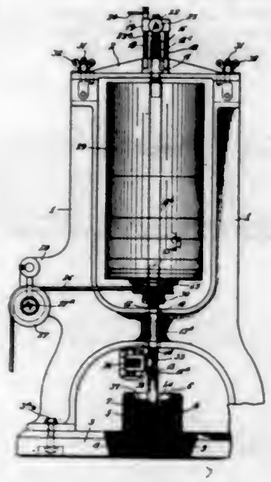


1. A fixture chain comprising opposite channel members forming hollow sheet metal sections with angular loops at the ends which hook into corresponding loops of adjacent sections, the interengagement of the angular loops holding the opposite sections together.

1,686,363. CROSSWALK MARKER. LEON F. N. BALDWIN, Edgewood, R. I., assignor of one-half to Benjamin S. Clark, Providence, R. I. Filed May 1, 1926. Serial No. 106,107. 3 Claims. (Cl. 40—130.)

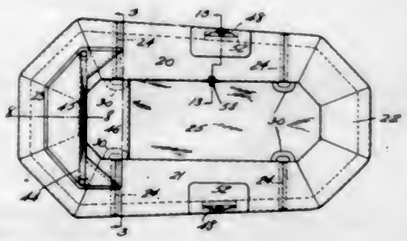
2. A traffic directing cross walk marker comprising an elongated plate having a lamp receiving pocket formed at each end thereof, and a lens for closing the pocket.

1,686,364. LENS-BLANK-HOLDING MEANS. WILLIAM BAUSCH and JOHN R. POWELL, Rochester, N. Y., assignors to Bausch & Lomb Optical Company, Rochester, N. Y., a Corporation of New York. Filed June 29, 1926. Serial No. 119,445. 6 Claims. (Cl. 49—82.1.)



1. A device for holding a lens segment in tilted position upon a lens blank, comprising a base for supporting the blank, spaced guides extending upwardly from the base, a bar slidable and tiltable upon the guides and adapted to be frictionally held in adjusted position thereby, said bar having downwardly projecting means adapted to engage the segment rearwardly of said guides to hold it in said tilted position and serving also to prevent its rocking in a direction transverse to the direction of tilting, and a weight connected with said bar and serving to hold it tilted in the desired position of adjustment.

1,686,365. TESTING APPARATUS AND METHOD OF USING SAME. ARMAN E. BECKER, Elizabeth, N. J. Filed Mar. 21, 1921. Serial No. 454,281. 15 Claims. (Cl. 175—183.)



6. In an apparatus for testing lubricants and bearings in combination a frame, a stationary member fixedly mounted therein, but electrically insulated therefrom, a movable

member rotatably mounted therein and having a surface adjacent and conforming to a surface of the said stationary member, means for providing a film of lubricant be-

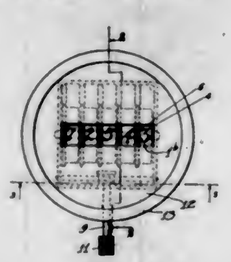
tween the said surfaces, means for varying the force exerted upon the said film and electrical means for determining the thickness of the said film.

1,686,366. INFLATABLE BOAT. JAMES F. BOYLE, Hammondsport, N. Y., assignor to Airships Incorporated, Hammondsport, N. Y., a Corporation of New York. Filed Apr. 2, 1926. Serial No. 99,375. 21 Claims. (Cl. 9—2.)

15. A collapsible boat having an inflatable air compartment extending around the peripheral portion of the boat, and a bottom secured to said air compartment, said bottom having an upwardly inturned outer edge portion, the upper edge of which is secured to said air compartment, and a tape extending around the edge of said bottom portion and secured to the peripheral portion of said bottom and extending outwardly therefrom and having its outer portion secured to the air compartment.

1,686,367. TIRE HOLDER. ALVIN C. BUSBY, Ellensburg, Wash. Filed Oct. 18, 1927. Serial No. 227,038. 4 Claims. (Cl. 224—29.)

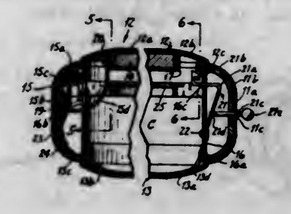
1. A tire holder comprising a trident having arms of invariable lengths extending adjacent to the perimeter of the organization, screw threads formed at the several extremities, yoke applied to some of the screw threaded ex-



tremities, a sleeve applied to one of the screw threaded extremities, a lever fulcrumed to the sleeve, and a yoke carried by the lever.

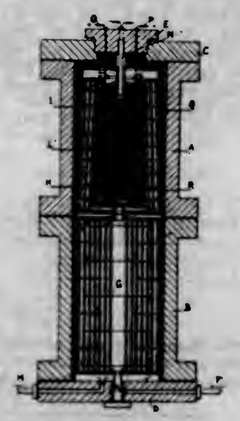
1,686,368. STRETCHING FRAME FOR SHEET MATERIAL. WILLIAM J. CARTER, Jr., Akron, Ohio. Filed June 28, 1927. Serial No. 202,079. 7 Claims. (Cl. 45—24.)

1. A stretching frame comprising two frame bars crossed substantially in contact with each other at a corner of the frame, a corner clamp comprising a unitary, rigid member formed with bar-contacting faces holding the bars in fixed angular relation and hook-bolts mounted in the said member and hooked over the bars to hold the latter respectively against the said faces, one of the bars being formed on its inwardly-facing side with a toe portion, work-anchoring pins mounted on the said toe portion, and work-anchoring pins pivoted on the outer face of the other bar, on axes transverse thereto and parallel with the plane of the frame, the pivotal axis of each of the last said pins being closer to the work-facing side of the bar than the length of the pin.



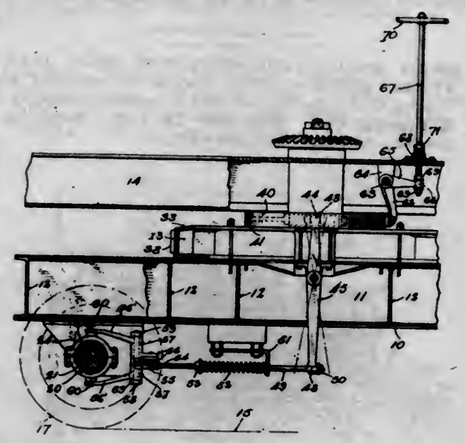
1,686,369. OIL-CHANGE RECORDING DEVICE. FRANCIS A. COOK, San Diego, Calif. Filed Oct. 11, 1926. Serial No. 140,837. 3 Claims. (Cl. 40—68.)

1. In a device of the class described, a casing provided with an opening at its front side, a spindle mounted in said casing in line with said opening, a plurality of drums



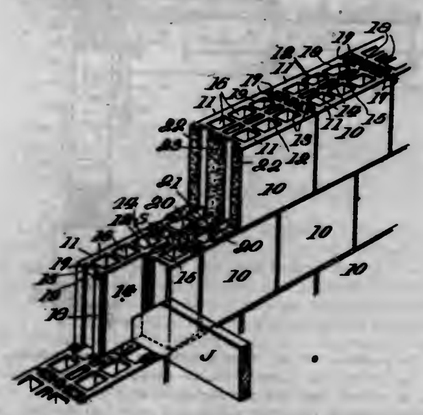
mounted on said spindle and provided with gear teeth near their corresponding edges, said drums being provided on their outer faces with recording numerals, a slide reciprocally mounted adjacent said drums and in line therewith, a spindle reciprocally mounted in said slide and extending toward the axis of said first mentioned spindle, a pinion mounted at the inner end of said last mentioned spindle and adapted to engage the gear teeth of said drums, and a knob provided at the opposite end of said last mentioned spindle.

1,686,370. VANITY CASE. CHARLES ALBERT EYMAN, New York, N. Y. Filed Mar. 14, 1927. Serial No. 175,024. 9 Claims. (Cl. 132—83.)



1. A vanity case of the character described comprising an annular-shaped tubular casing, a bottom closure forming a compartment in the casing, a hinge secured to an interior side of the tubular casing structure and extending through said structure, and a cover forming a closure for the casing supported by said hinge to normally conceal the latter when in closed position.

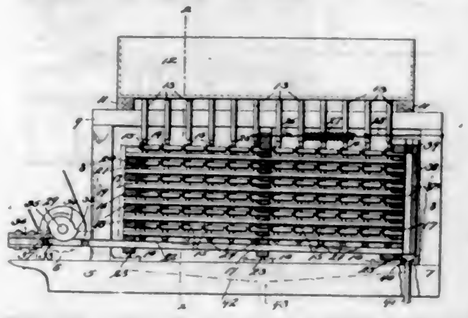
1,686,371. APPARATUS FOR THE PRODUCTION OF SYNTHETIC AMMONIA. GIACOMO FAUSER, Novara, Italy. Filed Aug. 21, 1925, Serial No. 51,705, and in Italy Sept. 24, 1924. 4 Claims. (Cl. 23—289.)



1. An apparatus wherein chemical reactions at high temperature and pressure are conducted, comprising a reaction chamber, an enclosing wall spaced from said chamber and adapted to withstand internal pressure, a heat exchanger in the space between the reaction chamber and said enclosing wall, said exchanger comprising tube sheets and a plurality of tubes extending longitudinally of said reaction chamber, and a body of heat-insulating material surrounding said reaction chamber, the thickness of said body varying directly with the temperature gradient in said heat exchanger.

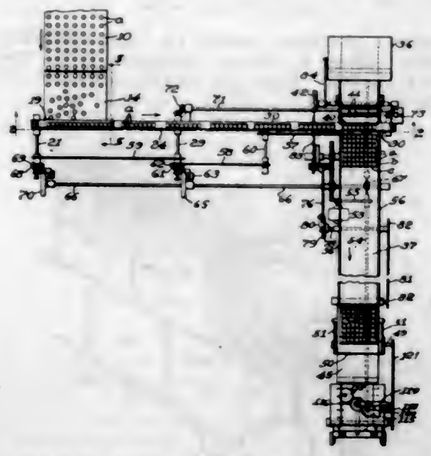
1,686,372. STEERING MECHANISM. MITCHELL L. FYKES, Milwaukee, Wis., assignor, by mesne assignments, to Bucyrus-Erie Company, South Milwaukee, Wis., a Corporation of Delaware. Filed May 31, 1922. Serial No. 565,002. 5 Claims. (Cl. 180—9.2.)

1. In a machine having a base frame and a head frame rotatably mounted thereon, the combination of a creeping traction support for said base frame, means including a clutch mechanism through which power may be applied to said creeping traction support to cause said machine to travel in a straight line direction, actuating mechanism for said clutch mechanism, and a slip connection between said head frame and said actuating mechanism to effect a turning movement of said machine by rotation of said head frame; said slip connection being such as to yield to excessive rotation of the head frame.



1,686,373. BUILDING BLOCK OR TILE CONSTRUCTION. HARRY D. FOSTER, Washington, D. C. Filed June 14, 1926. Serial No. 115,840. 4 Claims. (Cl. 72—41.)

1. In a hollow wall, a plurality of integral hollow units each having mortar-supporting face shells and a plurality of cross and longitudinal shells and webs, said cross and longitudinal shells and webs being individually incompetent to sustain mortar, two of said longitudinal webs being arranged close together whereby to sustain mortar, said units also having end projections on said cross shells

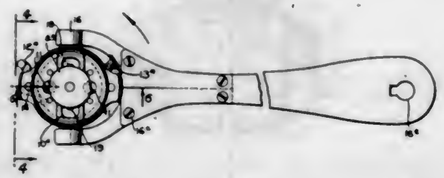


in the line of said face shells and longitudinal webs whereby to support spaced mortar joints, and spaced mortar joints on said face shells and juxtaposed longitudinal webs and on said end projections to connect said units, whereby at least two independently sealed and separate air chambers are formed in the wall intermediate its faces.

1,680,374. MACHINE FOR SEPARATING SEEDS. DAVID FRANKS, Millersburg, Ohio, assignor of one-third to Charles K. Franks and one-third to Samuel Franks, Jr., Millersburg, Ohio. Filed July 29, 1927. Serial No. 209,263. 6 Claims. (Cl. 209—480.)

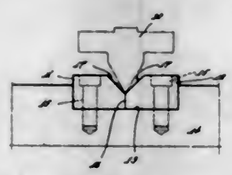
1. In a machine of the class specified, the combination of a reciprocating carrier having spaced flat separator plates fixed therein and spaced apart at the adjacent sides to provide discharge openings, and partition means under said plates.

1,686,375. CONFECTIONERY-PACKING MACHINE. JESSE W. GREER, Cambridge, Mass. Filed July 11, 1927. Serial No. 204,822. 19 Claims. (Cl. 226—16.)



1. In a device of the class described, in combination, a belt for conveying paper spacers along a predetermined path, a second belt for advancing spaced groups of confections toward the first mentioned belt and having the delivery end portion of its upper run positioned over the first mentioned belt and adapted to deposit a group of confections in a row upon each spacer as the successive spacers are advanced under the discharge end portion of the second belt.

5. In a box filling machine, in combination, means for depositing confections upon cardboard sheets, means for supporting a box in a tilted position to receive the loaded sheets, means for depositing the loaded sheets in the box one above the other, and means for gradually lowering the box as the loaded sheets accumulate therein.

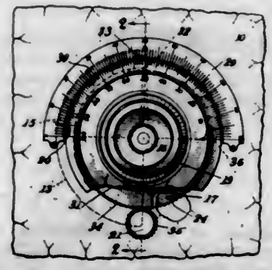


16. In a box filling machine, in combination, means constructed to project under the side edges of a loaded sheet and to support the same so that the supporting means will enter a box as the box is raised to receive the loaded sheet, mechanism for supporting a box and operable to raise the same to receive the loaded sheet, and means for operating the sheet supporting means to cause it to release the sheet within the box.

1,686,376. WRENCH. TRYGVE S. HANNES and RALPH HANNES, San Diego, Calif. Filed Sept. 10, 1926. Serial No. 134,665. 15 Claims. (Cl. 81—185.)

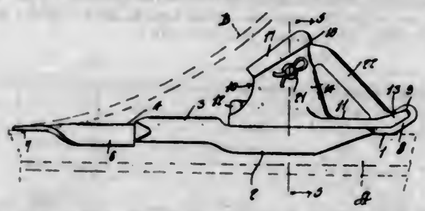
1. In a wrench, an outer socket, a plurality of other sockets mounted within the outer socket, an annular member mounted on said outer socket, reversible ratchet and pawl means operatively connecting said annular member with said outer socket, a handle pivotally connected to said annular member, and means in connection with said handle and said ratchet and pawl means whereby said ratchet and pawl means is reversed when said handle is shifted from one position to its opposite position relative to said annular member.

1,686,377. V REST FOR KNIFE EDGES. BENGT M. W. HANSON, deceased, Hartford, Conn., by Einar A. Hanson, West Hartford, Conn., and Clarence E. Whitney, Hartford, Conn., executors; now by resignation Einar A. Hanson, sole executor. Original application filed July 9, 1923, Serial No. 650,292. Divided and this application filed Nov. 11, 1926. Serial No. 147,758. 2 Claims. (Cl. 308—2.)



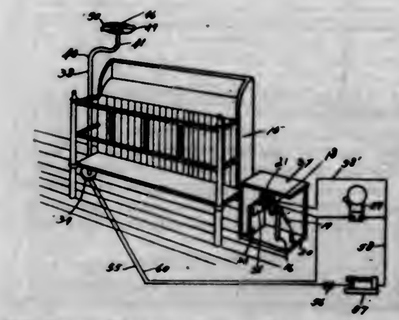
1. A knife rest including a pair of alined blocks positioned end to end and having the adjacent corners at the meeting faces similarly bevelled to form a V.

1,686,378. VARIABLE ELECTRIC CONDENSER. GEORGE W. HEATH, Newark, N. J. Filed May 3, 1924. Serial No. 710,934. 1 Claim. (Cl. 116—124.)



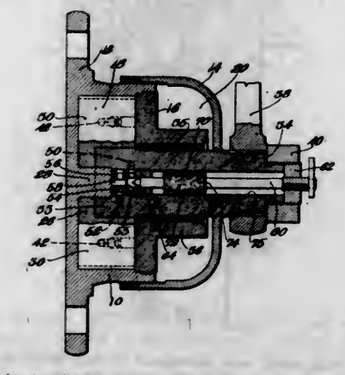
Radio apparatus including a support, two mechanism controlling shafts comprising a main shaft and a secondary shaft eccentrically disposed and offset from each other, and both journalled in the support, a knob on the main shaft provided adjacent its periphery with a main dial, means secured to the support and providing a second dial disposed concentrically of the main shaft and exposed at the periphery of the main dial, a pointer journalled on the main shaft, positioned between the support and the main

knob and having its end exposed exteriorly of the main knob and movable across the second dial to coact therewith, a secondary knob exposed adjacent the periphery



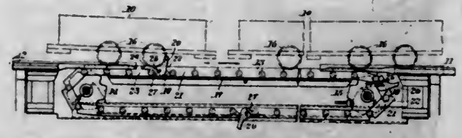
of the main knob and secured to the secondary shaft and a driving connection between the secondary shaft and said pointer.

1,686,379. TRACK CHOCK FOR CAR WHEELS. MARTIN HERREN, Newton, Iowa. Filed Aug. 25, 1927. Serial No. 215,395. 1 Claim. (Cl. 104—260.)



A track chock for car wheels, comprising a channelled member having an upwardly offset portion at one end, the other end of said member up-turned and its extremity rebent to form a hook, a pedestal secured to said channelled member and having an up-turned end to engage the first-mentioned up-turned portion and engaged in said hook, a channelled plate having a tongue secured under the upwardly offset portion of the first-mentioned member, said channelled member and plate being adapted to seat on a railroad rail, the pedestal provided with a recess, a brake shoe, a tongue on said brake shoe engaging in said recess and having a slotted opening therethrough, and securing means engaging said pedestal and through said slotted opening.

1,686,380. ELECTRICALLY-OPERATED SHUT-OFF FOR GAS BURNERS AND ALARMS. JOSEPH HELMBERGER, Philadelphia, Pa. Filed Mar. 8, 1927. Serial No. 173,692. 1 Claim. (Cl. 67—116.)

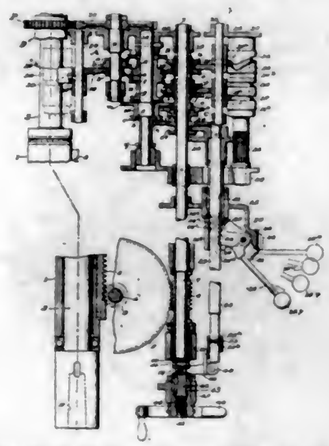


In a device of the character stated, an open flame burner and supply pipe leading thereto, a shut-off valve in said pipe and a lever to operate said valve, an electrically operating holding mechanism, a catch having one end pivoted to the valve lever and the other end co-operating with the holding mechanism, a spring between the lever and catch and another spring having one end anchored and the opposite end connected with the lever to actuate the latter in that direction which will close the valve upon release of the catch by the holding mechanism.

1,686,381. SHOCK ABSORBER. MELVIN R. JENNEY, Melrose, Mass., assignor to James J. Caffrey, trustee, Boston, Mass. Filed July 9, 1925. Serial No. 42,534. 6 Claims. (Cl. 188—100.)

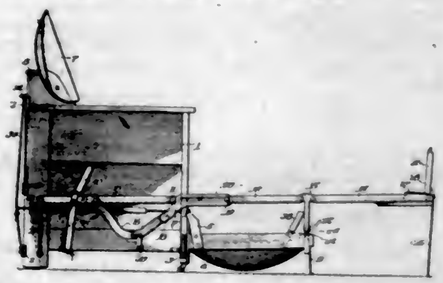
1. A shock absorber for motor vehicles comprising a casing having a chamber adapted to contain a cushioning liquid, a shaft projecting within the casing, an arm connected to the shaft and adapted to oscillate the latter upon spring flexure, a piston connected with the shaft, a partition having a valve controlled orifice through which oil is forced by movement of the piston, and means for automatically adjusting the size of the orifice in accordance with variations in temperature of the cushioning liquid in the chamber.

1,686,382. CAR-TRANSFER APPARATUS. GEORGE M. JOHNSON and KARL HENDRIK SUNDVIK, Jeannette, Pa., assignors to Fort Pitt Mine Equipment Company, Pittsburgh, Pa., a Corporation of Pennsylvania. Filed Feb. 9, 1927. Serial No. 166,977. 8 Claims. (Cl. 104—137.)



1. Conveyer chain structure comprising links, a stop member pivotally mounted on one of said links, a link pivotally connected to the first-named link at a point rearwardly of the stop member, and a seating surface on the second-named link having a projection which extends to a point intermediate the two pivotal points and serving as an abutment for limiting pivotal movement of the stop member in one direction.

1,686,383. CAM-CONTROLLED TWENTY-FOUR-SPEED MECHANISM. DAVID C. KLAUSMEYER, Cincinnati, Ohio, assignor to The Cincinnati Bickford Tool Company, Cincinnati, Ohio, a Corporation of Ohio. Filed May 5, 1925. Serial No. 28,214. 5 Claims. (Cl. 74—57.)



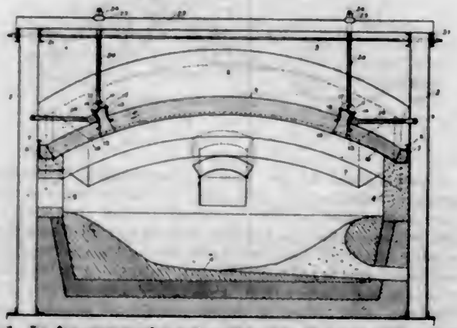
1. A multiple speed mechanism combining a prime-mover; a rotatable member; means operatively connect-

ing said prime mover with said rotatable member, said means including a plurality of shiftable gears; means to shift said gears selectively to produce any one of a plurality of drives between said prime mover and said member, said gear shifting means comprising a lever movable in transverse planes; a rotatably and translatably mounted shaft; two operative connections between said lever and said shaft, whereby movement of said lever in one plane

rotates said shaft and movement of said lever in another plane transiates said shaft; a gear shifter secured to said shaft and adapted to shift one of said shiftable gears by the axial movement of said shaft; a rotatable cam operatively connected to actuate another of said gear shifters; and an operative connection between said shaft and said cam to cause said cam to be rotated by the rotary movement of said shaft.

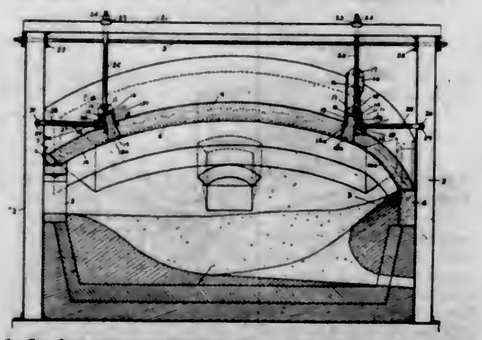
1,686,384. DAVENPORT BED. CHARLES I. LAMB, Nashville, Tenn., assignor to The Seng Company, Chicago, Ill., a Corporation of Illinois. Filed Dec. 4, 1922. Serial No. 604,681. 13 Claims. (Cl. 5—14.)

3. In a davenport bed, a frame, a sectional bed bottom of three or more sections mounted for folding therein, comprising a depending truss member between the two outermost sections, a seat invertibly mounted at the front of the frame independent of any connection with the bed bottom having a fixed support at its outer side when inverted, and means on the underside of the seat at the outer edge thereof for providing an engaging surface for the truss member.



5. In a davenport bed, a sectional folding bed bottom, a frame therefor, and means for pivotally mounting and supporting the bed bottom in the frame, said means comprising an angle lever pivoted at each side of the frame one end of which is connected to the rear bed section, and a slotted member pivoted to the other end of the angle lever and having a sliding connection with another bed section.

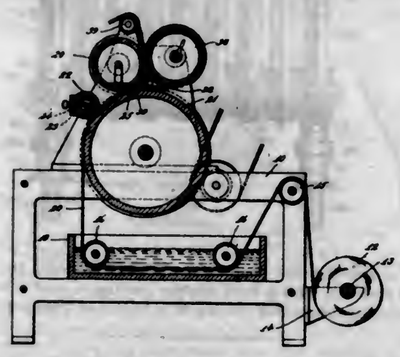
1,686,385. MICROPHONE. HUGO LICHTE, Kiel, Germany, assignor to Signal Gesellschaft mit beschränker Haftung, Kiel, Germany. Filed Aug. 30, 1922, Serial No. 660,114, and in Germany Sept. 7, 1922. 9 Claims. (Cl. 117—386.)



4. A microphone of the type described including a vibrating structure possessing a substantially constant elastic force and microphonic material operating in conjunction with said vibrating structure upon the receipt of a signal possessing a varying elastic force, the said constant elastic force being substantially the greater part of the total elastic force of the said microphone, whereby the frequency of said microphone is at all times substantially unchanged.

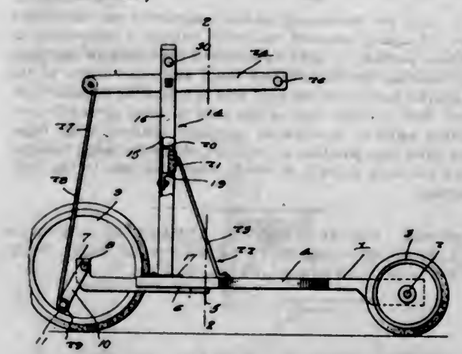
1,686,386. FURNACE-ROOF CONSTRUCTION. FRED H. LOFTUS, Pittsburgh, Pa. Filed Apr. 5, 1927. Serial No. 181,062. 16 Claims. (Cl. 263—46.)

1. In furnace roof construction a roof portion of chemically neutral material adjacent a wall of the furnace, and means interposed between said portion and the remainder of the roof arranged to assume the load and thrust of the remainder of the roof.



1,686,387. ROOF AND WALL CONSTRUCTION FOR OPEN-HEARTH FURNACES. FRED H. LOFTUS, Pittsburgh, Pa. Filed May 24, 1927. Serial No. 193,784. 12 Claims. (Cl. 263—46.)

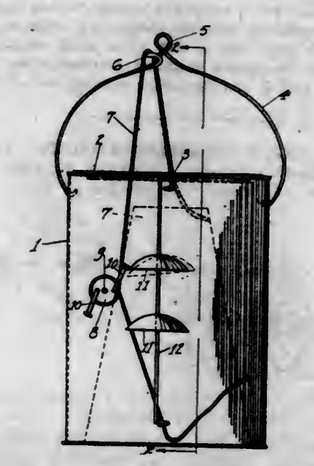
1. In furnace construction the combination of an abreviated wall, an independently supported roof section proper, and a wall and roof portion of refractory material



rising from the abbreviated wall and meeting the roof portion at a point inwardly of the furnace and at such height that said wall and roof portion takes the place of the deleted portion of the abbreviated wall.

1,686,388. PAPER-CRINKLING MACHINE. WILLIAM A. LORENZ, West Hartford, Conn., assignor to The Otaka Fabric Company, West Hartford, Conn., a Corporation of Connecticut. Filed Mar. 18, 1927. Serial No. 176,424. 14 Claims. (Cl. 92—69.)

1. The herein described method of making paper elastic in all directions, which consists in crinkling a wet paper web laterally and forming longitudinally extending grooves in the crinkled paper while it is still wet.

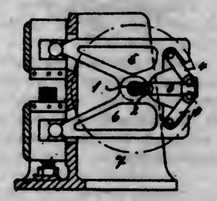


1,686,389. TOY VEHICLE. BERT B. MARTIN, Marion, Ohio. Filed Apr. 7, 1927. Serial No. 181,780. 5 Claims. (Cl. 208—33.)

1. In a toy vehicle of the class described, a comparatively low platform, an axle at the rear end thereof, comparatively small wheels mounted for rotation on the ends of the axle and on opposite sides of the platform, a single and comparatively large steering wheel located in advance of the forward end of the platform, and a steerable connection between the front wheel and said platform, said connection comprising a block located on the under side of the platform, straps carried by and extending beyond said block, said straps being provided with bearings, and said front wheel having a shaft rotatable in said bearings.

1,686,390. ADVERTISING DEVICE. FRANK C. MEYERS and HANS S. OBRENDORFER, Cincinnati, Ohio. Filed July 19, 1926. Serial No. 123,427. 1 Claim. (Cl. 242—146.)

A string dispenser comprising a container for string, a supply of string, a guide for said string from the container to a dispensing position, a rotatable member disposed in the path of said string about which said string is looped and an alarm operatively connected with said

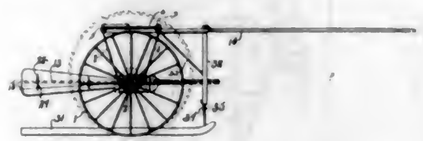


rotatable member, said alarm comprising at least one bell, and clappers carried by said rotatable member adapted to strike said bell.

1,686,391. PROCESS OF PRECIPITATING HEAVY METALS FROM AMMONIACAL SOLUTIONS. CARL MÜLLER, Mannheim, and LEO SCHLECHT and WALTER SCHUBARDT, Ludwigshafen-on-the-Rhine, Germany, assignors to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany, a Corporation of Germany. Filed Mar. 11, 1927, Serial No. 174,696, and in Germany Apr. 9, 1926. 6 Claims. (Cl. 75—600.)

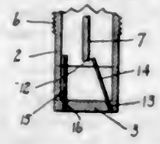
1. The process of precipitating heavy metals from ammoniacal solutions of heavy metal compounds which consists in treating the solution with a reducing gas under elevated pressure and at an elevated temperature so as to effect a substantially complete separation of the heavy metals.

1,686,392. SHEARS FOR CUTTING BLOCKS OR BARS. ALBERT NÖLL, Duisburg, Germany. Filed Dec. 31, 1924, Serial No. 759,066, and in Germany Jan. 19, 1924. 4 Claims. (Cl. 164—41.)



1. In block and bar shears of the kind in which the cutters have a rectilinear movement in opposite directions to cut the blocks or bars, the combination of two cutters adapted to have a rectilinear movement imparted to them, two levers to adjacent ends of which respectively the cutters are connected, a common shaft upon which the said levers are mounted to have movement on a common axis, and toggle lever mechanism for imparting movement to the said levers, substantially as described.

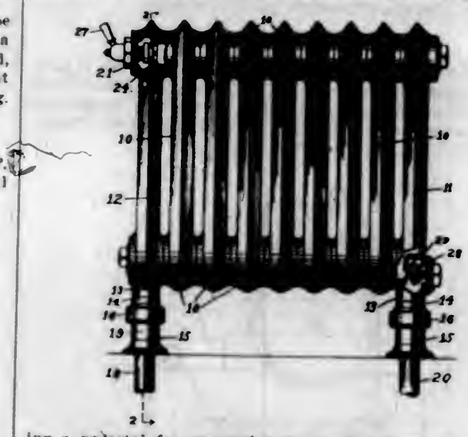
1,686,393. METHOD FOR PREVENTING THE BLACKENING OF TINNED FOODS. KOKICHI OSHIMA, Sapporo, Japan. Filed Feb. 19, 1927, Serial No. 169,679, and in Japan Mar. 1, 1926. 3 Claims. (Cl. 99—8.)



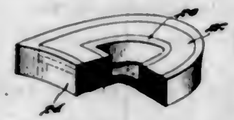
2. A method which comprises adding to fish food to be canned, a regulating mixture comprising common salt, a weak organic acid and a salt of a weak organic acid, which mixture is capable of giving a hydrogen-ion content equal to pH 4 to 7, and thereafter canning and sterilizing.

1,686,394. INSECT-GATHERING MACHINE. JAMES P. OWENS, Weatherford, Tex. Filed Oct. 26, 1925. Serial No. 64,783. 4 Claims. (Cl. 43—142.)

1. An insect destroying machine having a receptacle for receiving insects, relatively long revolving shafts, front blades pivotally connected together at their front ends and rear blades pivotally connected together at their front ends and having their rear ends relatively wide and tapering towards the front and all operatively connected to said shafts, means for adjustably attaching said blades to said shafts at their rear ends for varying the taper of said blades, the distribution of said blades in front and in the rear serving to balance the machine and affording extended agitation of the plants.



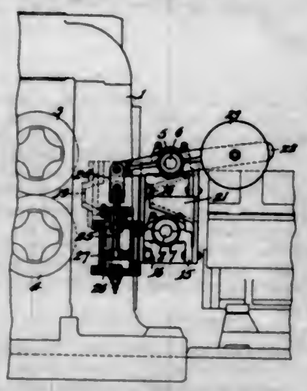
1,686,395. SPARK PLUG. GEORGE H. RICKE, Cincinnati, Ohio. Filed Dec. 16, 1927. Serial No. 240,589. 3 Claims. (Cl. 123—169.)



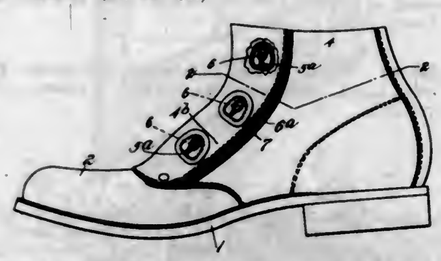
2. A spark plug, including a metallic shell having a depending skirt, arms depending from the skirt, an imperforate disk-shaped baffle carried by the arms in spaced relation to the lower edge of the skirt, a central electrode extending into the skirt and terminating within the latter, and a pair of malleable electrodes attached to said disk-shaped baffle and projecting upwardly and terminating within the skirt, one of said malleable electrodes having its upper end arranged in close proximity to the lower end of the central electrode.

1,686,396. RADIATOR. THOMAS A. RIDDER, Wollaston, Mass. Filed Mar. 6, 1926. Serial No. 92,896. 2 Claims. (Cl. 257—151.)

1. A radiator, comprising in combination, a series of connected heat radiating sections, one of said sections being divided vertically by an interior wall to form a separate conduit at one side of the section, a vertically disposed inlet port formed centrally of the lower end of said section, said wall being bent at its lower end to form a curved passage communicating with the vertically disposed inlet port, a valve at the upper portion of said conduit for controlling the passage of fluid from the conduit into the remaining portion of the section, a hollow leg having a pedestal for supporting the section from the floor and provided with a fluid passage leading to said port, and means for connecting the leg to a source of fluid supply.

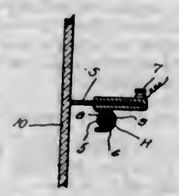


1,686,397. HEEL FOR BOOTS AND SHOES. CLIFFORD ROBERTS, Reigate, England. Filed Mar. 5, 1924. Serial No. 697,153. 1 Claim. (Cl. 36—35.)



A heel for boots and shoes comprising an unyielding core of nail-penetrable material having a generally U-shaped portion, a body of resilient vulcanizable material surrounding the bottom and inner and outer sides of the U-shaped portion of the core, and terminating substantially flush with the top face of the core to form upwardly projecting walls of substantial thickness bonded to the inner and outer side portions of the core, the walls being integral with the body portion to firmly unite the core to the body portion.

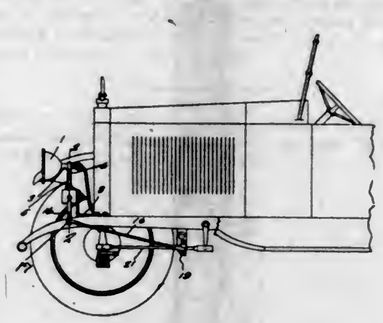
1,686,398. METAL-SCRAPING APPARATUS. WILLIAM J. STOOP, Wheeling, W. Va. Filed Nov. 24, 1925. Serial No. 71,241. 3 Claims. (Cl. 29—81.)



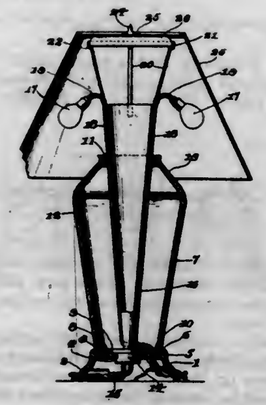
1. A sheet bar scraper comprising a pair of aligned rotary shafts mounted each upon opposite sides of the path of travel of sheet bars to a set of reducing rolls, a forwardly extending arm carried by each of said shafts and having ends extending inwardly at right angles to the path of travel of said bars, said ends of the arms forming opposed jaw members, scraper blades carried by said jaw members, and means to rotate the shafts and thereby the arms toward each other and into engagement with said sheet bars whereby to exert a scraping action to remove foreign matter from said bars.

1,686,399. WORK SHOE. ALBERT L. ROHRBACHER, JR., Boston, Mass. Filed Nov. 20, 1926. Serial No. 149,612. 2 Claims. (Cl. 36—50.)

1. A safety shoe embracing in its construction an upper cut to form mutually overlapped flaps to close a vent opening therein extending downward from the top edge of the upper on the outer side of the shoe, a stud-carrying strip secured to the outside face of the underneath flap with said flap interposed between the studs and an inserted foot, a plurality of coacting quickly releasable fastener members secured to the exterior flap of the upper in position to releasably engage the studs carried by said strip, and a vent-sealing tongue whose inner edge portion is secured to the outside face of the underneath flap and whose outer edge portion is secured to the inside face of the exterior flap.



1,686,400. WINDSHIELD WIPER. GLENN P. TREGO, Mexico, Pa. Filed Nov. 8, 1927. Serial No. 231,941. 1 Claim. (Cl. 15—255.)

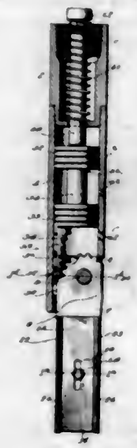


In combination, a windshield wiper blade comprising a frame, a squeegee in the frame, an elongated heat insulating shield on the frame longitudinally thereof, said shield being U-shaped in cross section and having one side secured to the frame, a tube in said shield longitudinally thereof, a core with a resistance coil wound thereabout disposed in the tube and means for placing the resistance coil in an electric circuit.

1,686,401. DIRIGIBLE HEADLIGHT. JOHN NELSON ARMSTRONG, New Castle, Pa. Filed June 3, 1927. Serial No. 196,348. 1 Claim. (Cl. 240—62.)

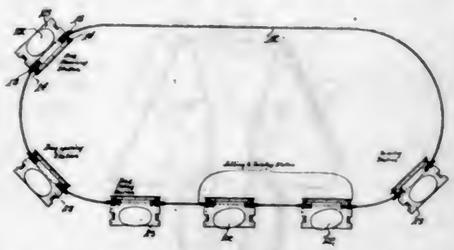
A dirigible lamp for vehicles comprising a casing, means for attaching it to a vehicle, said casing having a threaded hole in its top, an exteriorly threaded bushing passing through said hole, a lamp standard rotatably supported in the bushing and held against longitudinal movement therein, a lamp, a clamp engaging a part thereof, a horizontal pivot connecting the clamp with the upper end of the standard, a horizontal shaft rotatably arranged in the casing, gears connecting said shaft with the lower end of the standard, one end of the shaft extending through the casing and having a split socket therein, an arm fitting in the socket, clamping means for holding the arm in the socket, said arm having its outer end bent and a link connecting the bent end of the arm with the drag link of the steering mechanism of the vehicle.

1,686,402. LAMP AND LOUD SPEAKER. HAROLD O. BAKER, Pontiac, Mich. Filed Apr. 16, 1927. Serial No. 184,379. 4 Claims. (Cl. 181—27.)



1. In an article for the purpose set forth, supporting means, a horn mounted therein and extending thereabove, a set of upstanding arms secured to and projecting above the upper end of said horn, illuminable elements suspended adjacent the upper end of the horn, a band connected to said arms, and means mounted on the arms and surrounded by the band for suspending a lamp shade.

1,686,403. ROTARY REAMER. ALEXANDER BOYNTON, San Antonio, Tex. Filed May 13, 1925. Serial No. 30,014. 9 Claims. (Cl. 255—76.)



1. A reamer for use in wells comprising a casing, a reamer blade pivotally mounted on the casing, fluid pressure operated means for swinging the reamer blade com-

prising a piston, said casing having a cylinder in which the piston is fitted, motion tranamission means between the

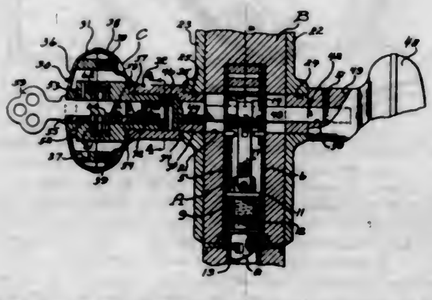
piston and the blade, and lubricating means for the piston having a feed member directly exposed to and actuated by the fluid pressure in the casing.

1,686,404. SACK FILLER. ROBERT LEE CALLAHAN, Louisville, Ky. Filed Sept. 18, 1926, Serial No. 136,295. Renewed Apr. 11, 1928. 23 Claims. (Cl. 226—55.)

1. A sack filler comprising a movable carriage, means thereon to support the mouth of the sack, and a vibrating platform on the carriage on which the bottom of the sack continually rests.

4. A sack filler comprising a movable carriage, means on the carriage for holding the mouth of the sack, and an oscillating platform on the carriage for receiving the bottom of the sack and for twisting the same about the axis of the sack.

23. A sack filler comprising a carriage, a track for the carriage having an undulating portion, means for holding the mouth of the sack in open position, a movable mounted hopper on the carriage above the sack, an oscillating platform on the carriage below said means and for receiving the bottom of the sack, and means for oscillating said platform when the carriage is passing over the undulating part of the track.

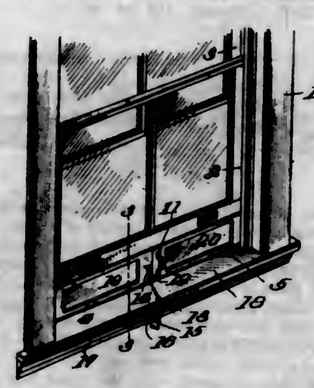


1,686,405. MANUFACTURE OF CONTAINERS OR CAPSULES. ROBERT HUNTER CAMPBELL, Upper Edmonton, England. Filed July 13, 1928, Serial No. 292,498, and in Great Britain July 11, 1927. 3 Claims. (Cl. 29—148.2.)

1. In the manufacture of containers or capsules of the kind referred to from thin metal, the steps of making the body part and at the same time forming a neck part of thickened wall section, weakening the neck part by forming an annular groove on the exterior of the neck, and applying pressure at the outer end of the neck thereby causing it

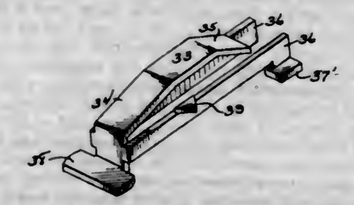
to collapse and turn inwardly at the weakened part thus forming an internal shoulder adapted to act as a seat for a closing part.

1,686,406. LOCK. ISADOR A. CAPLAN, Pittsburgh, Pa. Filed Apr. 4, 1927. Serial No. 180,876. 6 Claims. (Cl. 70—91.)



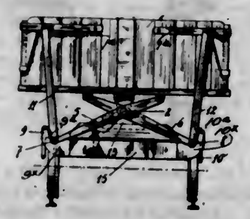
1. A key operated closure lock actuator comprising a spindle having a head formed at one end thereof provided with a transverse slot opening at the outer face of the head, a grip portion swivelly coupled to the spindle head, a cylinder lock mounted in the grip portion and embodying a rotatable key released plug in axial alignment with the axis of said spindle, said plug having a lug projecting from its inner end, a keeper mounted against rotation between the plug and spindle head and embodying a cam face in confronting relation with the inner end of the lug and a shank portion movable by contact of said lug with the cam face into the slot of the spindle head for coupling the grip portion for rotation with the spindle, and spring means for normally urging the shank portion out of coupled engagement with the spindle head.

1,686,407. WINDOW VENTILATOR. EDWARD L. CLARKE, Scranton, Pa. Filed Dec. 30, 1925. Serial No. 78,405. 1 Claim. (Cl. 98—88.)



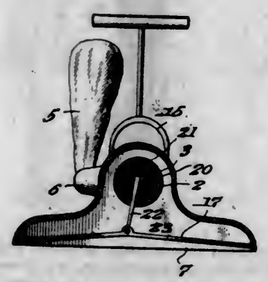
A ventilator for application to a window frame having side grooves for a sash and a transversely slanting longitudinally shouldered sill, said ventilator comprising two sections hinged together on their outer faces and adapted to be positioned beneath said sash with the ends of said sections seated in said grooves; a flexible connection attached to the inner face of one of said sections adjacent its hinged end and adapted for attachment to a support, said connection constituting a means for breaking said ventilator at the hinge point whereby the section ends may be removed from said grooves, said connection further preventing said ventilator from falling out of the window when inserting or removing the same; said ventilator sections being rounded top and bottom whereby to meet and tightly contact against the adjacent sash rail bottom and the sill regardless of the transverse angle the same may have whereby to tightly seal the space between the said sash rail and window sill and permit the admission of air into the room between the top rail of said sash and the bottom rail of its companion sash; and the hinge of said sections being arranged to permit movement of the connected

ends of the sections into the room upon elevation of the ventilator to clear the lower edge from said shoulder, said hinge preventing movement of the ends of said sections outwardly of the plane of said opposed frame grooves



whereby the said grooves and the sill shoulder cooperate with said sections to hold the ventilator in place and against falling outwardly from said window when put in place.

1,686,408. ALARM ATTACHMENT FOR CLOCKS. GILBERT J. DIETRICH, Beaumont, Tex. Filed Sept. 20, 1926. Serial No. 136,631. 1 Claim. (Cl. 200—36.)

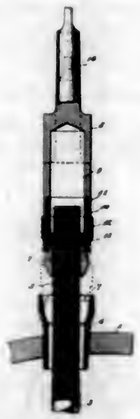


In a device of the class described, an insulated annular channel element having inturned flanges, a movable contact element mounted in the channel and adapted for cooperation with an element movable in a circular path, said contact element comprising a plurality of arms, foot members carried by the arms and engaging the flanges of the channel element, and a resilient element connected with the arms, the resilient element being free at one end thereof and being downwardly deflected, and one of the arms including a laterally extending pointer.

1,686,409. BODY-TIPPING WAGON. KARL GRUER, Bad Oeynhausen, Germany. Filed June 16, 1927, Serial No. 199,368, and in Germany June 21, 1926. 3 Claims. (Cl. 105—277.)

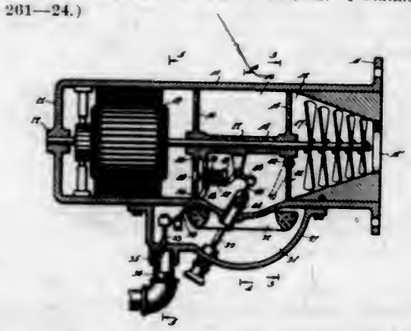
1. In a dump car, a car body having movable sides, each movable side having end bars pivoted to the ends of the car body, a truck, a pivotal mounting between the car body and the truck, arms pivoted to the truck, one end of each arm arranged to engage the bottom portion of the body when the latter is in normal position, the other end of each of said arms having a pivot, levers having their lower ends mounted on the pivots and their upper ends pivoted to the bars on the movable sides, and locking devices pivoted on the truck to engage the pivots between the arms and levers to lock the body in normal position.

1,686,410. VACUUM CLEANER. ERNEST CORAL KILLEBREW, Evansville, Ind. Filed Nov. 19, 1926. Serial No. 149,370. 3 Claims. (Cl. 15—13.)



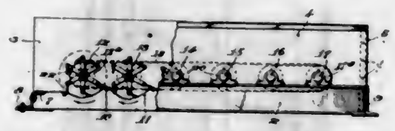
1. In a vacuum cleaner provided with a motor, a motor shaft, and a nozzle having a suction mouth, an elongated, flexible beating device whose end parts are connected to the suction mouth and whose intermediate part is free to vibrate within said suction mouth, a crank on the motor shaft, and a rod connecting said crank and said intermediate part of the beating device.

1,686,411. UNION OVERALLS. CLAUDE S. KOHLER and MAX N. KOHLER, New Orleans, La. Filed Mar. 7, 1928. Serial No. 259,849. 2 Claims. (Cl. 2—237.)



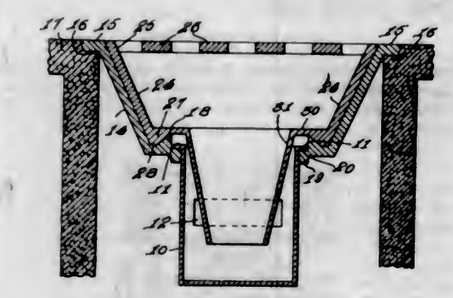
1. A union garment comprising a shirt, trousers having a waist band of inner and outer sections clamped about, and secured to, the lower gathered portion of said shirt, and a pair of tabs secured at each side of said waist band and each composed of inner, wide portions and outer narrow elongated tongues, the inner wide portions abutting together and having oppositely overlapped end portions folded in against the trouser band, lines of stitching passing through said tabs and the folded over end portions and also through the waist band, said tabs having relatively offset vertically elongated button holes upon the inner portions of the tabs and having horizontally elongated button holes at the outer tip portions of the tongues, and pairs of buttons secured to the waist band for engaging said button holes, a pair for engaging each tab, the inner buttons being spaced on the waist band from the points of attachment of the tabs at greater distance than the inner button holes from the same point of attachment, each pair of buttons being spaced apart on the waist band at greater distance than between corresponding button holes on the tabs and tongues even when the inner buttons are engaged with the inner button holes.

1,686,412. DRIVER CHUCK. HARRY A. LACERDA, Watervliet, N. Y. Filed July 8, 1927. Serial No. 204,396. 1 Claim. (Cl. 81—120.)



A chuck adapted for turning stay-bolt expansion nuts, comprising a tubular member having an internally tapered toothed or serrated outer end for engagement with a stay-bolt expansion nut, a body coupled to the member, said body and member having a longitudinal bore of a diameter and length to freely accommodate a stay bolt while the device is engaging a nut on the stay bolt.

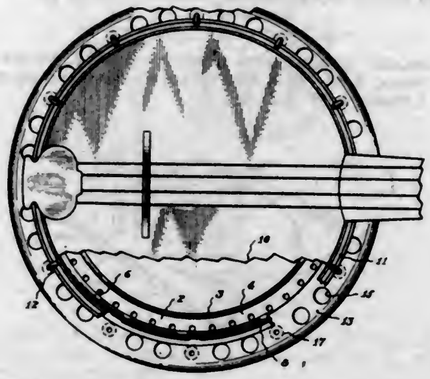
1,686,413. FUEL-MIXING AND SUPERCHARGING DEVICE. PHILIP JOSEPH LARONDE, Manchester, N. H. Filed Mar. 29, 1927. Serial No. 179,381. 1 Claim. (Cl. 261—24.)



A carburetor comprising a casting, a plurality of partitions dividing the casting into an intermediate chamber and end chambers disposed in alinement, a pair of fuel nozzles projecting into the intermediate chamber, one of the partitions having an opening in the lower portion, a throttle valve closing the opening, a fan mounted in the end chamber adjacent the throttle for aiding in forcing a combustible mixture from the intermediate chamber and through the end chamber, means located in the other end chamber for causing rotation of the fan, the partition adjacent the second end chamber having openings adjacent the lower end thereof, an opening being in line with a nozzle, a casting adjacent the second mentioned chamber and provided with a valve controlled air inlet, a valve controlling one of the openings in the second mentioned partition and automatically moved by the air to open position, a valve controlling the nozzle adjacent the last mentioned opening and actuated in accordance with the position of the air actuated valve.

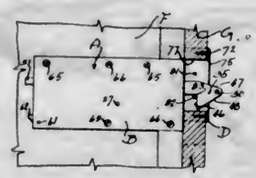
1,686,414. COTTON CLEANER. RUFUS EDWARD LEE, Wichita Falls, Tex., assignor of one-half to The Panhandle Steel Products Company, Wichita Falls, Tex., a Corporation of Texas. Filed Apr. 20, 1928. Serial No. 271,589. 2 Claims. (Cl. 19—35.)

1. A machine unit for cleaning cotton, comprising a flat rectangular base frame composed of a pair of parallel elongated side members of structural steel connected by a pair of end members rigidly and integrally secured thereto, the upper faces of the two parallel side members lying in the same plane, a rectangular vertical enclosing body composed of side and end members of relatively thin metal coterminous with the side and end members of the base frame and secured within and upon the same, a series of journal bearings mounted upon the upper horizontal face of each side member of the base frame, outside the thin metal body, said journal bearings being in pairs on opposite sides of the base frame, each pair having a common axis and all of said axes lying parallel to each other and transverse to the upper faces of the base frame, a series of parallel driving shafts, one for each pair of bearings, extending across the inside of the body above the base frame with their ends passing through the body on both sides and journaled in said bearings, a plurality of sleeves fitted upon each shaft within and between the sides of the body, a plurality of spider arms upon each sleeve, and a flailing arm pivoted upon the outer end of each spider arm, a plurality of cross bars extending from side to side of the base frame between and below the respective adjacent pairs of driving shafts, and parallel therewith, a foraminous metal bed extending across and within said base frame from one side to the other and from one end to the other, said bed being supported upon said cross bars and formed into cylindrically curved sections between the same, each section concentric with and underlying a driving shaft at a radial distance therefrom greater than the length of its spider arms, driving means mounted upon the ends of the shafts, means interconnecting said driving means, and means for applying power thereto.



1,686,415. TRAP FOR DRAINS AND SEWERS. JAMES LYES, New York, N. Y. Filed Sept. 20, 1926. Serial No. 136,645. 3 Claims. (Cl. 182—20.)

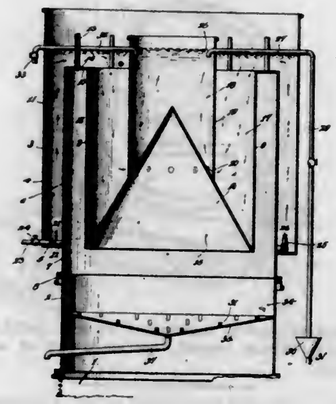
1. In a device of the class described, a container having an opening in the side wall thereof, a funnel-shaped device extending into the container below the opening thereof, providing a water seal, an upwardly and outwardly flared element projecting from the upper edge of the funnel and offset from the wall of the funnel to provide an inwardly



extending portion, and a dished member receiving the flared element and having a flange for engaging the container at a point below the inwardly extending portion of the flared element.

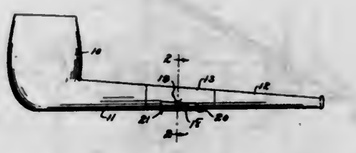
1,686,416. BANJO. HERMAN F. MIETZ, Franklinville, N. J. Filed Apr. 30, 1925. Serial No. 27,022. 2 Claims. (Cl. 84—269.)

1. In a banjo, a supporting head rim, a skin head and clamping ring therefor, a sound outlet ring operatively carried by the supporting head rim and being located beneath the skin head, a skin head carrying ring with means for supporting it on the sound outlet ring, the skin head being clamped between the skin head carrying ring and the clamping ring, said sound outlet ring having a plurality of outlet openings, and means for retaining and holding said parts on said rim.



1,686,417. DOOR CATCH. WILLIAM NORMAN, Norman, Nebr. Filed Apr. 20, 1927. Serial No. 187,605. 5 Claims. (Cl. 292—108.)

1. In a latch structure of the class described a case providing a compartment therein and an opening forwardly therethrough with ribs projecting laterally and inwardly of the compartment adjacent said forward opening, and a bolt pivoted in the compartment of said case including shoulders adapted for cooperation against the ribs of said case and a reduced forward head portion provided with a recess therein which projects through said forward opening between the ribs.

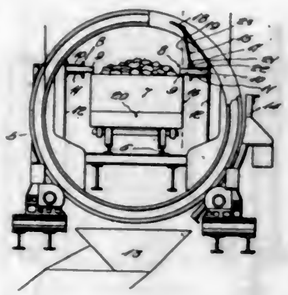


1,686,418. WATER STILL. ERNON V. OLIVER, Pasadena, Calif. Filed Dec. 29, 1923, Serial No. 683,358. Renewed June 14, 1928. 9 Claims. (Cl. 203—5.)

1. A still condenser comprising an upwardly tapered condensing chamber, a wall surrounding the said chamber and constituting, in combination with the wall of the condensing chamber, a cooling water chamber, means for supplying water to the cooling water chamber, and means for effecting circulation of the water in an upward direction over the surface of the wall of the condensing chamber, the said

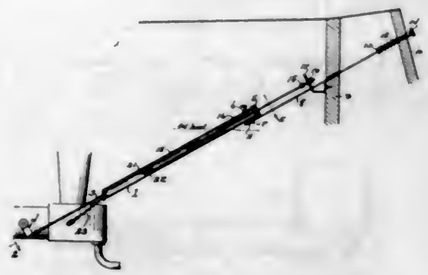
means comprising a circulating chamber surrounding the upper portion of the condensing chamber and having water inlet openings near its bottom.

1,686,419. SMOKER'S PIPE. JOHN JOSEPH PAPSON, Dickson City, Pa. Filed Sept. 23, 1927. Serial No. 221,553. 1 Claim. (Cl. 131—12.)



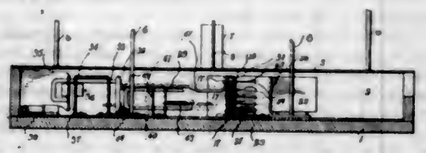
A tobacco pipe including a bowl, a stem extending from the bowl, a mouth piece, a sleeve connecting the stem and mouth piece and holding said stem and mouth piece in spaced relation to provide a chamber, said sleeve having an opening therein and a closure for the opening, a continuous smoke tube extending longitudinally through said chamber and having its opposite ends extending into the stem and mouth piece and having an opening to provide communication with the chamber.

1,686,420. ROTARY MINE-CAR DUMP. JOHN S. REPKO, Scranton, Pa., assignor to The Hudson Coal Company, Scranton, Pa. Filed Dec. 22, 1927. Serial No. 241,909. 3 Claims. (Cl. 214—52.)



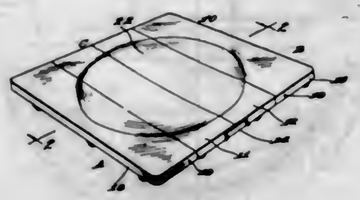
1. In a rotary mine car dump embodying a cradle to receive a car to be dumped, a receiver under said cradle, and a stationary coal guide plate at one side of the cradle, substantially concentric therewith and extending to said receiver; a coal check plate rigidly secured to said cradle in position to extend longitudinally of and to project above one side of a car in said cradle, said coal check plate having its upper portion inclined inwardly beyond the plane of said one car side and terminated a distance from the cradle axis slightly less than the distance between said axis and said coal guide plate; whereby said coal check plate will hold the coal from sliding against said coal guide

plate until the car has turned substantially ninety degrees, will then permit the coal to gradually slide against said coal guide plate and will then co-act with said coal



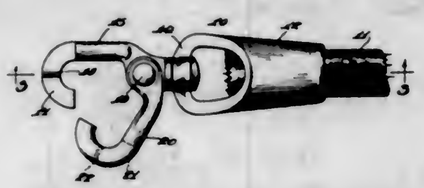
guide plate to prevent dumping of the coal until said coal check plate travels beyond the lower end of said coal guide plate.

1,686,421. CARBURETOR-CHOKER CONTROL. ROBERT GALBRAITH RUSSELL, Burgettstown, Pa. Filed Nov. 4, 1927. Serial No. 231,138. 2 Claims. (Cl. 74—39.)



1. A choker device for an internal combustion engine comprising a cylinder connected with the choker valve, means for normally holding the cylinder in a position with the valve open, a choker rod for moving the cylinder to close the valve, a piston in the cylinder having its rod connected wtih a stationary part, fluid in the cylinder and valve means for permitting the fluid to pass by the piston when the cylinder is being moved upwardly but to prevent such movement when the cylinder is being moved downwardly.

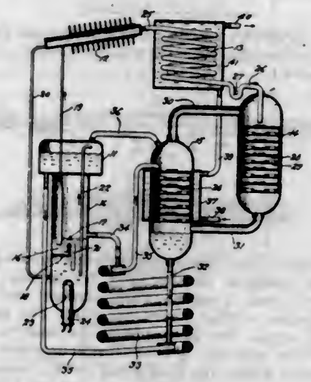
1,686,422. LEAF TURNER. GUSTAV SCHOENFELD, Great Falls, Mont. Filed Nov. 5, 1927. Serial No. 231,240. 8 Claims. (Cl. 84—490.)



6. A leaf turning mechanism comprising a plurality of leaf-turning arms, a plurality of latches arranged to engage the respective arms, a trip plate engaging the latches and constructed to successively release them from the respective turning arms, a pull rod arranged to engage the trip plate, a cross head carrying said pull rod, a guide arm extending from the cross head, a bracket supporting and guiding said arm, an abutment on the guide arm in spaced relation to the bracket, an inflatable bulb disposed between and bearing against the guide bracket and the said abutment, yieldable means for holding the abutment toward the bracket, and means for inflating the bulb and thereby moving the abutment in opposition to said yieldable means whereby to reciprocate the pull rod and impart step by step movement to the trip plate.

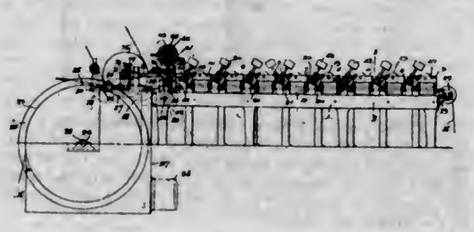
1,686,423. EXERCISING DEVICE. JOHN M. THOMSON, Bronx, N. Y. Filed May 14, 1927. Serial No. 191,396. 2 Claims. (Cl. 252—57.)

1. An exercising device comprising a pair of hingedly connected sections, a pair of separable sections, means for detachably connecting the respective separable sections to the respective hingedly connected sections, said means including hooks extending from one of the sections, pins provided on the next adjacent section for engagement by the respective hooks, and roller elements on the underside of the sections.



1,686,424. FASTENING DEVICE. JOHN MALCOLM THOMSON, Long Island City, N. Y., and PETER HARDY, Bridgeport, Conn. Filed Feb. 1, 1928. Serial No. 251,169. 2 Claims. (Cl. 24—232.)

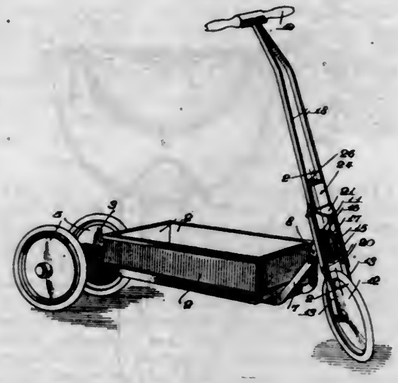
1. In combination with an elastic cord, a resilient ring fixed adjacent one end thereof, a fastening device including a sleeve member having a converging bore therein, spaced ribs extending from the walls of said bore, said elastic cord being pulled through said sleeve member to cause the resilient ring to be compressed by reason of engagement with the converging walls of said bore for locking engagement behind one of said ribs, and an eye swivelly connected to said sleeve member.



1,686,425. REFRIGERATION. BALTZAR CARL VON PLATEN and CARL GEORG MUNTERS, Stockholm, Sweden, assignors to Electrolux Servel Corporation, New York, N. Y., a Corporation of Delaware. Filed Mar. 5, 1927, Serial No. 172,944, and in Sweden Apr. 29, 1926. 23 Claims. (Cl. 62—178.)

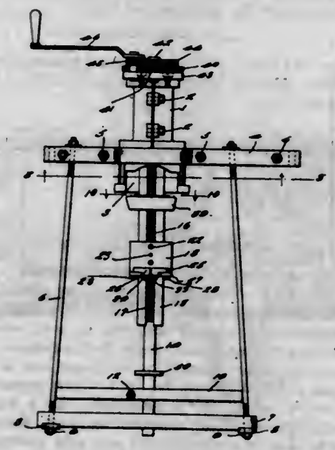
1. That improvement in the art of refrigeration through the agency of an absorption system including a generator and an absorber which consists in alternately and periodically producing flow of weak absorption liquid in direction from the generator to the absorber due to pressure

and gravity and periodically producing flow of strong absorption liquid in direction from the absorber to the generator due to gravity.



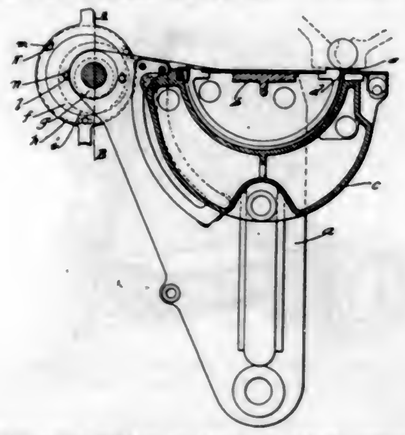
1,686,426. COATING MACHINE. WILLIAM H. WALDRON and LYNN B. CASE, New Brunswick, N. J., assignors to John Waldron Corporation, New Brunswick, N. J., a Corporation of New Jersey. Filed Oct. 9, 1926. Serial No. 140,496. 5 Claims. (Cl. 91—12.)

1. In a coating machine, a reservoir for the coating material; a feed roll rotatably mounted in said reservoir; a supporting rod substantially parallel to said feed roll; delivery spoons adjustably secured to said supporting rod and adapted to engage said feed roll; means on said rod for maintaining said spoons in either a roll engaging or disengaging position; and a drip trough underlying the delivery end of said spoons when in their said disengaging positions.



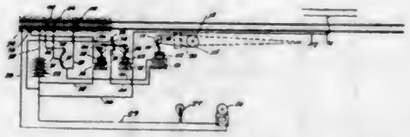
1,686,427. WHEELED TOY VEHICLE. PAUL THEODORE WALLGREN, Chicago, Ill. Filed Oct. 24, 1927. Serial No. 228,465. 1 Claim. (Cl. 280—87.5.)

In a wheeled toy having a low hung longitudinally extending platform mounting, and a box body at the forward end thereof, the combination of a pair of stabilizing wheels at the rear end of the platform, a hanger for the front end of the platform, a front wheel having a forked mount pivotally connected to the hanger and constituting a steering post, said forked mount including a pair of spaced bars, and an arcuately shaped plate secured to the upper end of said bars, the plate being provided with perforations and extending rearwardly and over the pivotal mounting, a handle consisting of a pair of spaced bars pivotally connected to the bars of the forked mount, at a point below the pivotal connection between the hanger and the



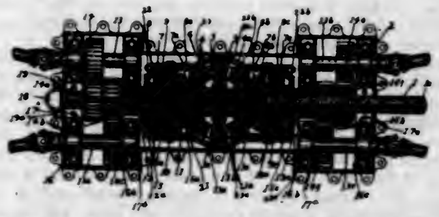
forked mount, a spring pressed pin adapted to engage a perforation for locking the handle in a predetermined position.

1,686,428. BORING BAR. ARCHIE CALVIN WENAK, Muscatine, Iowa. Filed Nov. 5, 1923. Serial No. 672,919. 1 Claim. (Cl. 77—2.)



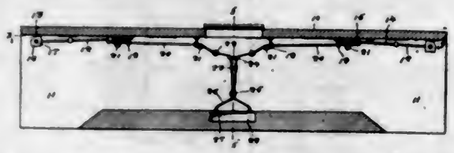
A device of the character described comprising spaced supporting members, said members being provided with communicating semi-circular portions, a housing member supported within the enclosure defined by the semi-circular portions, a tubular member split for an appreciable portion of its length being carried within the housing, a reduced extension depending from the lower end of the tubular member, a bearing block split for an appreciable portion of its length and having communication with an opening adapted to accommodate the lowermost end of the extension, a shaft extended centrally of and threaded within the tubular member, a tool head carried by the tubular member and adapted to receive the threaded portion of the shaft to move the head longitudinally of and upon the tubular member, a cutter member carried by and horizontally disposed from the tool head, and means for imparting rotary movement to the tubular member and tool head.

1,686,429. MACHINE FOR CASTING STEREOTYPE PLATES. CARL WINKLER, Bern, Switzerland. Filed Feb. 5, 1927, Serial No. 166,227, and in Germany May 18, 1925. 3 Claims. (Cl. 22—2.)



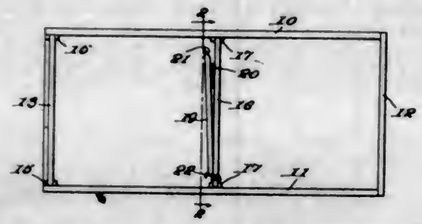
1. A casting machine for stereotype plates, comprising in combination a furnace, a melting pot in said furnace, having a slot opening in the lower part thereof, a mould adapted to be brought into contact with said pot so that the outlet opening of said pot registers with the inlet opening of said mould, a frame to carry and move said mould, and an eccentric bush to pivot said frame, seated in the wall of said furnace on each side of the machine, substantially as, and for the purpose, set forth.

1,686,430. SAFETY GATE. CHARLES WRIGHT, Evanston, Ill. Filed May 27, 1927. Serial No. 194,758. 5 Claims. (Cl. 246—125.)



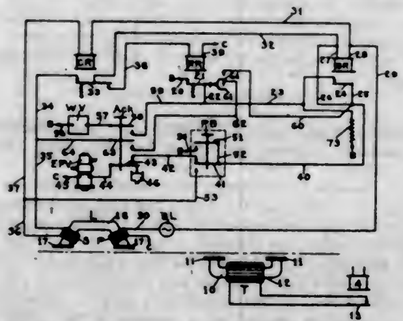
1. A device of the class described including a crossing gate mounted on a rockable shaft, means tending to hold said gate in raised position, a housing in which said shaft is mounted, another shaft mounted in said housing, and means connecting said shafts, an electro-magnet having a movable core, means connecting said core and said second mentioned shaft, a circuit for said electro-magnet including, a source of energy, a resistance, and a plurality of switches operated by an approaching train, said switches being arranged to gradually cut out said resistance from the circuit.

1,686,431. DIFFERENTIAL. CHARLES O. WYMAN, Anoka, Minn. Filed Nov. 5, 1925. Serial No. 67,074. 6 Claims. (Cl. 74—99.)



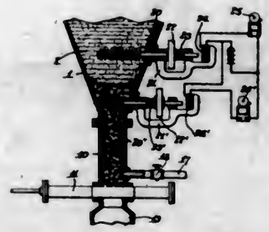
1. In combination, a drive shaft, a primary differential having a middle gear section keyed to the shaft, said differential including side gears loose upon the shaft, and a differential casing carried by each side gear, each casing having a middle gear section connected therewith, and two side gears, and sleeves independently rotatable upon the shaft in superposed relation, and connected with side gears of the last mentioned differentials.

1,686,432. ANIMAL TRAP. HERMAN BLECK, Hammond, Ind. Filed July 19, 1926. Serial No. 123,521. 6 Claims. (Cl. 43—61.)



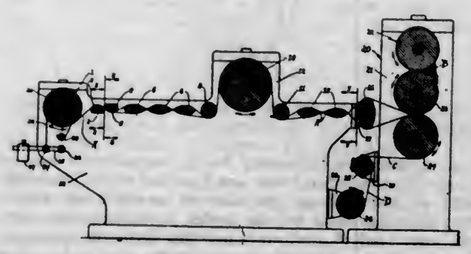
1. An animal trap comprising a casing open at one end, a pivotally mounted gravity door for closing the open end of the casing, a substantially straight rod mounted for longitudinal sliding movement within the casing and adapted to engage the underside of the door to hold the latter in open position, a horizontally disposed pivotally mounted plate within the casing and means connecting the plate and rod to hold the plate elevated when the rod is in door engaging position and to disengage the rod from the door when the plate is depressed.

1,686,433. DIVISION BOARD FOR TRUCK BODIES. MARY E. BOUSTEAD, Minneapolis, Minn. Filed Apr. 30, 1926. Serial No. 105,838. 2 Claims. (Cl. 296—1.)



1. A division board for a vehicle body, comprising a substantially flat element, a brace hinged to this element near one end, and having its upper edge below the top of said element, and an engaging device connected with the board and adapted to contact with the end of the brace opposite to the hinged end thereof.

1,686,434. INTERMITTENT INDUCTIVE TRAIN CONTROL. CHARLES S. BUSHNELL, Rochester, N. Y., assignor to General Railway Signal Company, Rochester, N. Y. Filed Apr. 16, 1925. Serial No. 23,572. 17 Claims. (Cl. 246—6.3.)

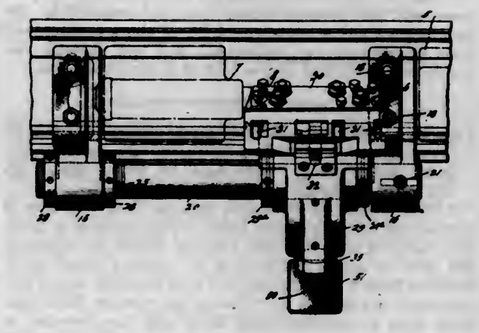


1. In an automatic train control system; the combination of an electro-responsive device which if in its retracted position restricts the movement of the train; a source of energy; a ballast lamp; a circuit including said device, said source and said lamp in series; and an inductive influence communicating means located in inductive relation with the trackway for changing the flow of current in said circuit.

1,686,435. METHOD AND APPARATUS FOR DETECTING ACCUMULATIONS OF MATERIALS IN COAL WASHERS AND ORE CONCENTRATORS. THOMAS M. CHANCE, Philadelphia, Pa. Filed Aug. 5, 1924. Serial No. 730,160. 3 Claims. (Cl. 209—173.)

1. A method of separating materials of different specific gravities which consists in immersing said materials in an agitated mixture of liquid with comminuted solids heavier than the lighter of said materials and heavier than said liquid and substantially insoluble therein and constituting a fluid mass having a specific gravity intermediate the heavier and lighter of said materials, in introducing liquid under pressure through an accumulation of said heavier materials below said fluid mass, whereby said fluid is agitated by said upwardly rising liquid and its fluidic properties and its specific gravity are maintained and controlled, in supplying a source of energy extraneous to said accumulations, in applying a force of predetermined intensity in counteracting said energy, in applying said energy so counteracted to said accumulation, whereby the presence of said accumulation is indicated by its resistance to said energy, in indicating the locus of application of said force by said resistance, in downwardly removing some of said accumulation when the quantity of said accumulation exceeds a predetermined maximum and in limiting the quantity of said accumulation so removed, whereby a predetermined quantity of said accumulation is maintained below said fluid mass.

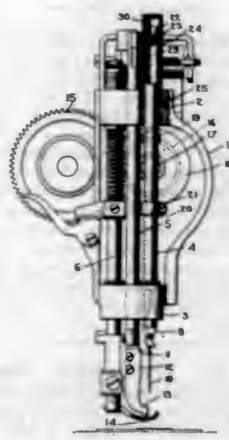
1,686,436. APPARATUS FOR FORMING CORD SHEET MATERIAL. JOHN W. CLARK, Providence, R. I. Filed Mar. 12, 1923. Serial No. 624,479. 10 Claims. (Cl. 154—1.)



1. The method of making rubberized cord sheet material for use in the manufacture of cord ties, which comprises, progressively withdrawing a plurality of unwoven cord ends from a holding member, passing said cord ends over a stationary tensioning member having a longitudinally convex surface for imparting progressively increased tension to the cord ends from the edges towards the center, vertically displacing adjacent cord ends in opposite directions from their normal plane of travel while guiding the same to insure a proper relative spacing of said cords from each other in a direction transversely of their direction of travel, returning said cords into a substantially common plane and frictioning unvulcanizing rubber into and between said unwoven cords while the said cords are in a substantially common plane.

1,686,437. REMOVING AMORPHOUS WAX AND ASPHALTIC MATERIAL FROM OIL. THOMAS CLARKSON and HAMMOND R. HEAL, Coffeyville, Kans. Filed Oct. 29, 1921. Serial No. 511,476. 3 Claims. (Cl. 196—19.)

1. A process of treating lubricating oil containing amorphous wax and asphaltic material, which comprises the steps of adding a light petroleum distillate in amount sufficient to lower the viscosity of said oil, refrigerating the solution sufficiently to cause the solidification of a substantial portion of the amorphous wax and asphaltic material, and subjecting the refrigerated solution alone to pressure-filtration through a filtering element of at least as close a texture as fine filter paper, until a substantial quantity of the solidified material has accumulated therein, and thereafter dissolving out such solidified material with a hot solvent.

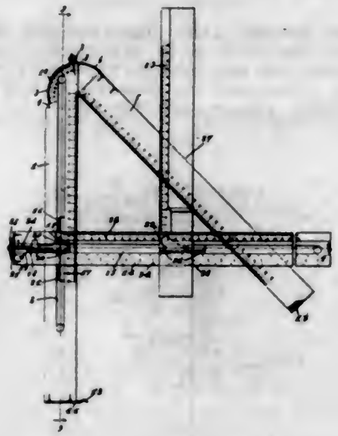


1,686,438. FACING ATTACHMENT FOR LATHES. FRANCIS B. COCKBURN, Cincinnati, Ohio, assignor to The Lodge & Shipley Machine Tool Company, Cincinnati, Ohio, a Corporation of Ohio. Filed Dec. 5, 1925. Serial No. 73,505. 1 Claim. (Cl. 82—25.)

In combination with a lathe including a bed, and work supporting centers on the bed, a carriage operable between the work supporting centers, brackets upon the top of the bed on each side of the carriage aligned in direction of carriage travel and spaced to permit travel of the carriage therebetween, a pivot shaft spanning the carriage and translatably non-rotatively supported in the brackets, said bar threaded at one end with the threads disposed at opposite sides of the brackets, collars one at each side of said bracket having threaded engagement with the threads of the pivot shaft for translating the shaft when the collars are turned, said collars engageable with opposite sides of the bracket for locking the pivot shaft against translation in an adjusted position, an arm non-translatably pivoted at intermediate point upon the non-rotatable pivot shaft, said arm having a tool engageable with the work carried between the centers and further having a roller at the opposite end, said tool and roller respectively at opposite sides of the

pivot, a templet movable with the carriage having a longitudinally disposed face, engageable by the roller for rocking said arm for a tool feed movement in synchronism with carriage movement.

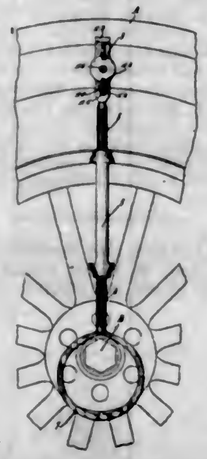
1,686,439. BLOWER ATTACHMENT FOR MACHINES. JOHN McP. COOKE, Revere, Mass., assignor to Nicholas W. Mathey, Boston, Mass. Filed Mar. 7, 1923. Serial No. 623,355. 13 Claims. (Cl. 112—218.)



1. In a machine of the character described, a hollow reciprocable bar with a tool and a restricted orifice at the lower end, and means acting upon and induced by the reciprocation of the bar to compress air above said bar and force it through the hollow bar and out through the orifice, in the vicinity of the field of action of the tool.

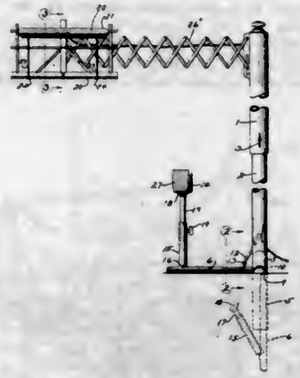
1,686,440. RECOVERING SUCROSE FROM MIXTURES CONTAINING REDUCING SUGARS. HENRY W. DAHLBERG, Denver, Colo. Filed Sept. 23, 1926. Serial No. 137,379. 11 Claims. (Cl. 127—47.)

1. The process of recovering sucrose from mixtures of sucrose and reducing sugars which process consists of treating a mixture of sucrose and reducing sugars by regulating the ratio of amount of sucrose to reducing sugar to include at least 2.8 of sucrose to 1.0 of reducing sugar, precipitating the sucrose by treating the mixture thus regulated with an alkaline earth metal and thus forming an alkaline earth metal saccharate, and separating saccharate into an alkaline earth metal compound and sugar syrup.



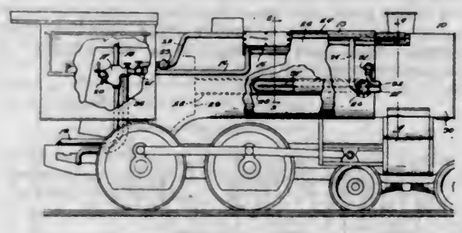
1,686,441. FRAMING TOOL. ALFRED B. DAUGER and RUTH M. DAUGER, Sacramento, Calif. Filed Sept. 3, 1927. Serial No. 217,480. 3 Claims. (Cl. 33—92.)

1. A roof and truss framing gage tool of the character described comprising a rise rule formed with a groove longitudinally arranged therein, a hypotenuse rule secured adjacent one end of the rise rule, means for retaining said hypotenuse rule at desired angles with respect to the rise rule, a run rule formed with a longitudinal disposed groove terminating in a slot at one end, means secured in said slot for moving the run rule transverely of the rise rule and including a block member having a square opening in one end, a screw having one end secured in the square opening, a nut threadedly mounted on the screw, a member formed with said means and disposed at right angles thereto, said member being mounted in the groove of the rise rule for slidable movement and carrying the run rule accordingly, a jack rule provided with a recess receiving the run rule, and resilient means secured to the jack rule



and disposed in the groove of the run rule for slidable movement, and said rules being graduated as and for the purpose specified.

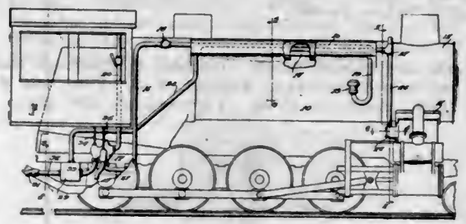
1,686,442. FENDER-STRAIGHTENING DEVICE. MART DO RAN, Lincoln, Nebr. Filed Dec. 21, 1926. Serial No. 156,161. 5 Claims. (Cl. 153—32.)



1. A fender straightening device comprising a pair of oppositely extending stems, one provided at its inner end with an abutment and the other at its outer end with a straightening clamp for the fender, means engaging with the outer end of that stem provided with the abutment and the inner end of that stem provided with a clamp for adjusting said stems relative to each other, said clamp including a stationary and an adjustable jaw, said adjustable jaw being pivoted to that stem carrying the clamp, said jaws coacting to clamp the fender therebetween

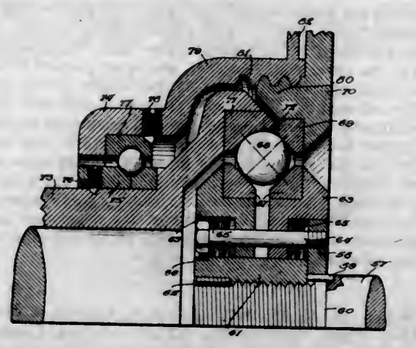
1,686,443. READING STAND. ADA MARIAN ELLIS, Oakland, Calif. Filed May 10, 1926. Serial No. 107,985. 7 Claims. (Cl. 45—121.)

1. A device of the type described comprising an extensible support, collapsible legs for holding said support in operative position, said legs being movable into said support, a collapsible book-holder, collapsible means for supporting said book-holder at different positions from said support, and means for adjustably securing said device to a bed, means on said support for bracing it on the floor.



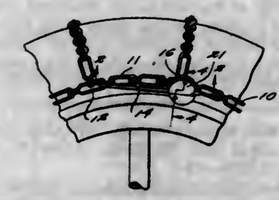
1,686,444. TRIPLE PREHEATER FOR BOILERS. LEE O. GARRAWAY, Memphis, Tenn. Filed Oct. 1, 1924. Serial No. 741,073. 2 Claims. (Cl. 122—422.)

1. A feed water heater system for locomotives comprising a continuous water conduit leading from a source of supply near the rear end of the locomotive forwardly upon the shell of the boiler, then into the smoke box of the boiler, then back and forth within a boiler flue and thence into the front end of the boiler, a casing upon the boiler shell housing the portion of the water conduit lying on said shell, a pipe extending from the steam exhaust of the locomotive engine through the smoke box into the front end of said casing, and means for conveying exhaust steam from the rear end of the casing and delivering it into the water conduit at the source of supply in rear of the casing.



1,686,445. PREHEATER ATTACHMENT FOR BOILERS. LEE O. GARRAWAY, Memphis, Tenn. Filed Oct. 16, 1924. Serial No. 744,091. 2 Claims. (Cl. 122—441.)

1. A feed water heater system for locomotives comprising a tank arranged below the fire box and in rear of the locomotive boiler and receiving water by gravity from a source of supply, a casing secured upon the boiler and extending longitudinally thereof, a water coil within the casing extending longitudinally thereof, a pipe extending from the front end of the water coil into the water space of the boiler, a connection between the rear end of the water coil and the outlet of the tank, means in said connection for causing flow of water from the tank through the water coil into the boiler, means in said connection preventing flow from the boiler to the tank, a conduit leading exhaust steam from the locomotive engine into the



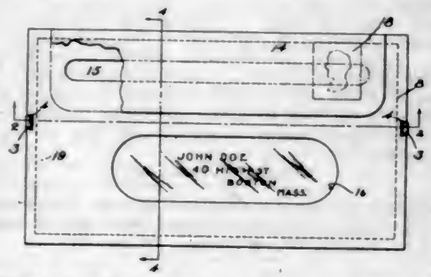
front end of the casing, and a conduit leading exhaust steam from the rear end of the casing and delivering said exhaust steam into the water in the tank to be condensed therein.

1,686,446. PLANETARY TRANSMISSION MECHANISM. JOHN A. GILMAN, Seattle, Wash. Filed Apr. 15, 1926. Serial No. 102,251. 2 Claims. (Cl. 74—34.)

1. A transmission comprising a drive member, a collar fixed to said member, race carriers encircling the drive member at one side of the collar, bolts and springs cooperating with said collar to maintain said race carriers against relative rotation and urge them toward each other, races carried by said carriers, a plurality of rolling elements seating in said races, a non-rotatable race disposed about and engaging the rolling elements, a rotatable race disposed about and driven by the rolling elements, and operative means for effecting axial movement of one of the races.

1,686,447. CHAIN-FASTENING DEVICE. LOUIS HANSEN, Calgary, Alberta, Canada. Filed Dec. 9, 1927. Serial No. 238,937. 3 Claims. (Cl. 24—69.)

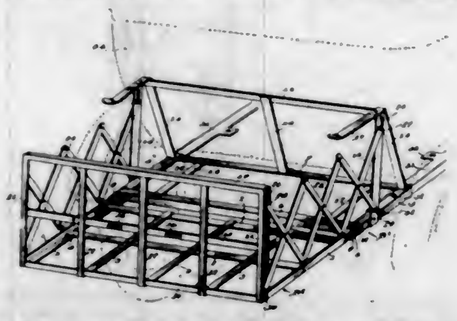
1. A chain fastening device comprising in combination a locking lever having connection with one end link and adapted to be passed through the other, of a locking ele-



ment having a recess adapted to receive the free end of the lever, a closure plate carried by the locking element being adapted to hold the lever against displacement within the recess, and a locking finger carried by the closure plate being adapted for engagement with an appropriate portion of the locking element.

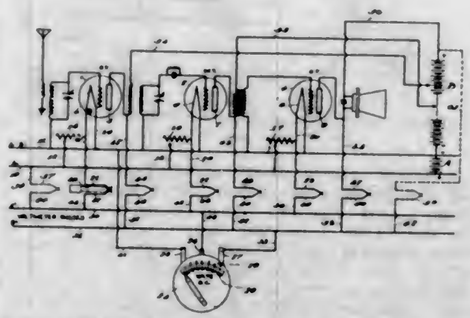
1,686,448. LOOM REED. ORLANDO P. HARGROVE and MICHAEL FITZPATRICK, Wayland, N. Y. Filed Aug. 6, 1925. Serial No. 48,586. 1 Claim. (Cl. 139—192.)

A reed for single shuttle race looms, the reed embodying an upper frame member, and a lower frame member, and dents connected at their ends, to the upper frame member and to the lower frame member, the upper portion of each dent being approximately double the length of the lower portion of each dent, the upper portion of each dent being straight, and the lower portion of each dent being straight, the upper portion of each dent being vertical, and being located in one plane, and the lower portion of each dent being located in another plane at an obtuse angle to the first-specified plane, the frame members being arranged out of vertical alinement, to permit the upper and lower portions of the dents to be disposed at an angle to each other, as aforesaid.



1,686,449. MAILING BOX. RALPH L. HARDEN, Attleboro Falls, Mass., assignor to The Mason Box Company, Attleboro Falls, Mass., a Corporation of Massachusetts. Filed Mar. 26, 1926. Serial No. 97,581. 11 Claims. (Cl. 229—6.)

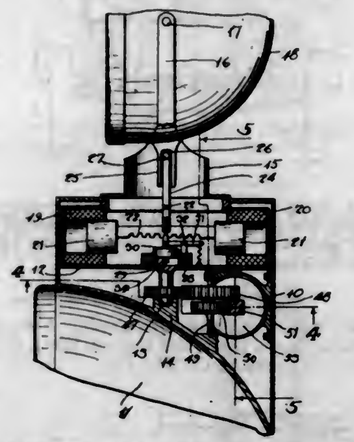
8. An article of the character described comprising a container and a cover, flexible metal clips extending from the container through the cover, and an envelope on the cover, said clips also extending through marginal portions of the envelope.



1,686,450. LUGGAGE CARRIER. WILLIAM HENRY, Rockford, Ill. Filed Mar. 28, 1925. Serial No. 19,138. 2 Claims. (Cl. 224—29.)

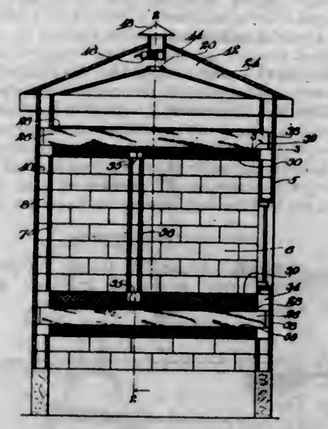
1. A luggage carrier comprising a bottom comprising an inner end section and an outer end section, each having a pair of side bars and connecting and brace bars, the adjacent end portions of corresponding side bars of the two sections being juxtaposed and being connected by alined horizontal pivot elements, said sections including cooperative means for preventing downward swinging movement of the outer section about the axis of said pivot elements beyond the plane of the inner section, a pair of uprights rigid with the inner section of the bottom at opposite sides of and adjacent to the inner end of the latter, an outer end for the carrier, said outer end being free from the bottom, and lazy tongs connecting the respective uprights with opposite ends of said outer end members,

said lazy tongs supporting said outer end member at the outer end of the bottom when the lazy tongs and the bottom are extended and permitting swinging of the outer section of the bottom upward and inward from the plane of the inner section of the bottom, said outer end member having an inwardly extending horizontal supporting flange at its lower edge on which the outer end portion of said outer end section of the bottom rests when said bottom and the lazy tongs are extended.



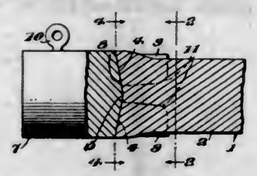
1,686,451. VOLTAGE-TESTING APPARATUS. JOHN WILLIAM HILL, Salt Lake City, Utah, assignor of forty-nine one-hundredths to John T. Caley, Salt Lake City, Utah. Filed June 3, 1926. Serial No. 113,533. 1 Claim. (Cl. 250—27.)

Voltage testing apparatus for radio receivers and the like comprising a voltmeter having a pair of positive terminals and one negative terminal, a pair of positive voltmeter busses connected with the respective positive terminals, an electron-emission tube including a filament and a plate, a normally open positive potential conductor connected with the plate and having a connection leading to one of the positive voltmeter busses, a double-pronged jack interposed in said connection at which said conductor is open, positive and negative filament busses, a connection between one end of the filament and the negative filament bus, a rheostat connected between the other end of the filament and the positive bus, a normally open connection leading from the rheostat to the other positive voltmeter bus, a double pronged jack incorporated in and at which said last connection is open, and a connection between the negative voltmeter terminal and the negative filament supply bus, either of said jacks being capable of



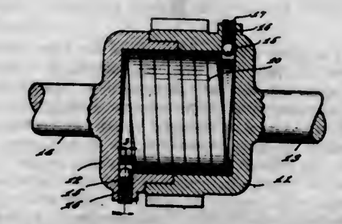
receiving a plug for closing a circuit involving either one or the other of the positive voltmeter terminals and the negative terminal, thereby to test either the plate or filament voltage.

1,686,452. HEADLIGHT. CARL PERRY HOEFLER, Syracuse, N. Y. Filed Sept. 20, 1926, Serial No. 136,601. Renewed Mar. 6, 1928. 5 Claims. (Cl. 240—61.)



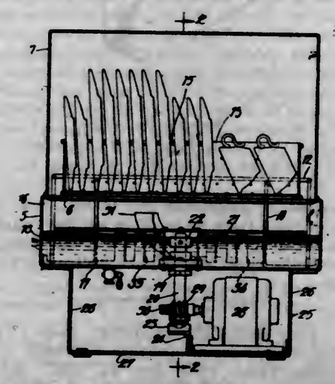
1. In a device of the kind described, a supporting member including a yoke, a lamp pivoted in said yoke for tilting movement, a pair of alined and spaced solenoids carried by said member, a core bar adjustable longitudinally in accordance with the energization of respective solenoids, a lever mechanism connecting the bar and the lamp to tilt the latter as the bar moves, releasable means to hold the bar in adjusted position, a third solenoid operatively connected to said means to release the same upon energization, and means to effect successive energization of the third solenoid and a selected solenoid of the first pair.

1,686,453. VENTILATED BUILDING. PETE JARNOWSKI, Chicago, Ill. Filed Aug. 20, 1925. Serial No. 51,451. 1 Claim. (Cl. 72—1.)



In a ventilated building, supporting walls formed of laid blocks provided with vertically registering communicating air passages, hollow floors carried on intermediate joists supported in opposite walls, said joists being disposed in parallel spaced relation, and floor level blocks in said walls, said floor level blocks being three sided with one open side in communication with the spaces between said floor joists for establishing unbroken ventilating communication between all walls and floors in the building.

1,686,454. DRESSING DIE. FOSTER H. LEIDECKER, Marietta, Ohio, assignor to The Leidecker Tool Company, Marietta, Ohio, a Corporation of Ohio. Filed June 12, 1925. Serial No. 36,741. 1 Claim. (Cl. 76—95.)



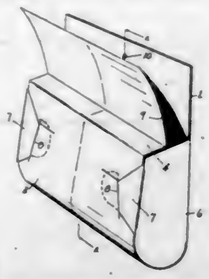
A dressing die for cable drill bits which have a plurality of spiral blades making less than a complete turn throughout the length of the bit, said dressing die having spiral fingers projecting outwardly therefrom, the twist of the fingers corresponding to the spiral twist of the spiral blades of the bit for interfitting with the blades.

1,686,455. OVERRUNNING SPRING CLUTCH. ALBERT LIEBER, Indianapolis, Ind., assignor to L. G. S. Devices Corporation, Indianapolis, Ind., a Corporation of Indiana. Filed Nov. 25, 1925. Serial No. 71,281. 5 Claims. (Cl. 192—41.)

1. In combination, two relatively rotatable members having alined circular recesses, a coil-spring located in said recesses, and a ratchet device operating between said spring and one of said members to prevent relative rotation of said spring and such member in a direction to unwind said spring, whereby to cause said spring to expand into gripping engagement with the walls of its associated recesses.

1,686,456. DISHWASHING MACHINE. ARTHUR G. KOHLER, New Rochelle, N. Y. Filed Mar. 15, 1926. Serial No. 94,963. 5 Claims. (Cl. 141—9.)

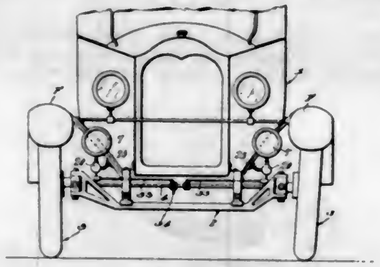
1. A dish washing machine comprising a liquid holding tank, a rotary disk member in said tank, a dish holding tray therein and nozzles carried by and extending through



the disk member for projecting the liquid in the tank vertically in streams and said nozzles being so shaped that their portions disposed beneath the disk are elongated vertically and above the disk are elongated horizontally.

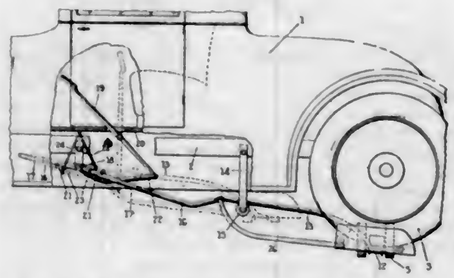
1,686,457. BURGLAR ALARM. THADDEUS S. MCCLINTOCK, Pittsburgh, Pa. Filed Oct. 26, 1926. Serial No. 144,313. 3 Claims. (Cl. 177—314.)

1. In a burglar alarm, pairs of contact bars adapted for disposition on opposite sides of an opening to be protected, means insulating the bars of each pair from each other, pairs of concentric coiled springs connected at their ends to the respective bars and disposed before the opening, means for sounding an alarm whenever one spring comes in contact with its adjacent concentric spring, means normally retaining the contact bars of each pair out of electrical communication, and means for automatically connecting the bars to sound an alarm upon bodily movement of the bars.



1,686,458. PAPER HOLDER. ARCHIBALD I. MCCOLL, Kalamazoo, Mich., assignor to Helen McCalmont Stone McColl, Kalamazoo, Mich. Filed Oct. 3, 1925. Serial No. 60,192. 7 Claims. (Cl. 206—57.)

4. A paper holder comprising rear, bottom, front and top walls, the rear and front walls diverging downwardly and the top wall having an inwardly projecting sheet holder adapted to engage within the fold of a body of sheets folded upon itself.



1,686,459. DIRIGIBLE HEADLIGHT. FRED Y. MCKENNEY, Chattanooga, Tenn., assignor to Robert C. Lynn, Chattanooga, Tenn. Filed Aug. 18, 1927. Serial No. 213,921. 4 Claims. (Cl. 240—62.)

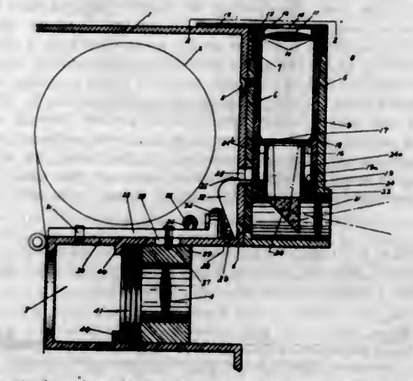
2. Operating mechanism to swing a dirigible headlight from the swinging arm of the steering gear of an automobile comprising a tie rod, a connection between said tie rod and steering gear, a lamp support mounted to rotate, a member fixed to and depending from said support, a cam

located in the path of said member, and a connection between said cam and said tie rod whereby turning of the steering gear will operate to simultaneously turn the lamps in the same direction.

1,686,460. VEHICLE PARKING DEVICE. JOHN H. MOFFAT, Indianapolis, Ind. Filed Nov. 12, 1927. Serial No. 232,806. 3 Claims. (Cl. 180—1.)

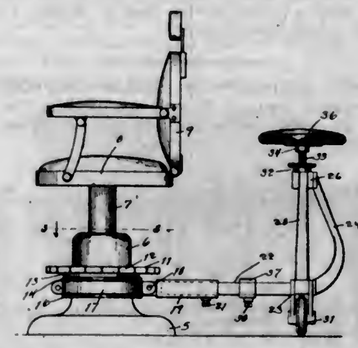
1. In a parking device for vehicles, a pair of runways adapted to receive the driving wheels of a vehicle; a pair of bars in one runway for receiving a vehicle driving wheel when entered therein, said bars holding said wheel against rotation; a pair of rollers in the other runway on which the driving wheel entered therein will rest; supporting wheels on said runways; a gear attached to the supporting axle of one set of the supporting wheels, a worm attached to one of said rollers and intermeshing with said gear, adapted to impart rotating movement to said set of suporting wheels when the vehicle wheel thereon is rotated, for causing said runways to move laterally in either direction, as desired; means for predetermining the position of said runways; and means for backing said runways in operative positions.

1,686,461. GIRDER. STUART B. MOORE, La Porte, Tex. Filed July 24, 1923. Serial No. 653,556. 2 Claims. (Cl. 72—61.)



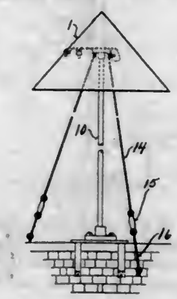
1. A girder comprising in combination, a concrete web and flanged compression and tension members joined at their ends, the flanges of said members being disposed outwardly and forming an enveloping loop around the web longitudinally.

1,686,462. PHOTOGRAPHIC FILM AND MAGAZINE THEREFOR. FREEMAN H. OWENS, New York, N. Y. Filed Aug. 25, 1926. Serial No. 131,393. 15 Claims. (Cl. 95—9.)



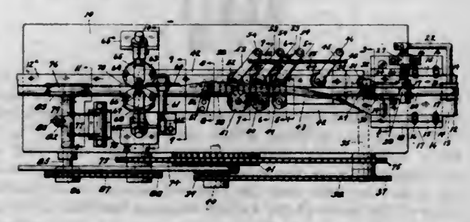
1. A photographic film cartridge comprising a double strip of film wound upon a single support.

1,686,463. FOCUSING DEVICE FOR CAMERAS. FREEMAN H. OWENS, New York, N. Y. Filed Aug. 25, 1926. Serial No. 131,394. 15 Claims. (Cl. 95—45.)



1. A focusing device for cameras comprising a view finder provided with a ground glass and a lens, a camera lens, said finder being movable to focus, and means co-operating with said finder and said camera lens whereby the camera lens is focused upon movement of said finder to proper focus on said ground glass.

1,686,464. CRAFTSMAN'S STOOL. JAMES LYMAN PERRY, Honolulu, Territory of Hawaii. Filed Aug. 10, 1927. Serial No. 212,071. 1 Claim. (Cl. 155—81.)

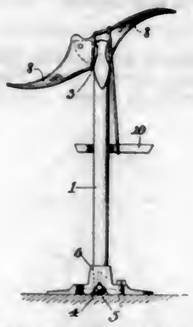


In combination with an operating chair having a base and an upstanding portion, a flange secured to said upstanding portion and having depressions formed therein, a race-way formed in close proximity to said flange, a stool spaced from said chair, a support extending between said stool and said chair, a band positioned in said race-way and secured to said support.

1,686,465. ANTENNA FOR RADIO RECEIVING SETS. LOUIS C. POIRIER, Merrill, Wis. Filed Feb. 14, 1927. Serial No. 168,040. 3 Claims. (Cl. 250—33.)

1. An antenna for radio work comprising an extensive sheet metal member having an insulated coupling located on its underside, a metal support secured to said coupling, and a plurality of bolts attaching said member to said coupling and adapted to receive guy wires, said bolts being electrically connected to said member and insulated from said coupling.

1,686,466. BEAD-COVERING MACHINE. EDWARD D. PUTT, Akron, Ohio, assignor to The Firestone Tire and Rubber Company, Akron, Ohio, a Corporation of Ohio. Filed Feb. 28, 1925. Serial No. 12,243. 7 Claims. (Cl. 154—9.)

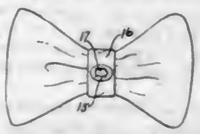


1. Apparatus for continuously folding a strip of fabric about and pressing it onto a strip of bead material comprising a support including a series of rollers on which said strips are carried, means for guiding the strips into contact with each other on said support, means for driving the composite strip thus formed over said support, means for progressively folding and pressing said fabric strip onto said bead strip said means including a series of rollers whose axes are perpendicular to said support, whose peripheries are positioned to be tangential to the bead material and formed with flanges for overlying said composite strip, said flanges being of progressively increasing diameters, and means for pressing the bead strip against said rollers.

1,686,467. SHOE-REPAIRING STAND. THOMAS RENDLE, Ottawa, Ill. Filed June 28, 1926. Serial No. 118,988. 1 Claim. (Cl. 12—123.)

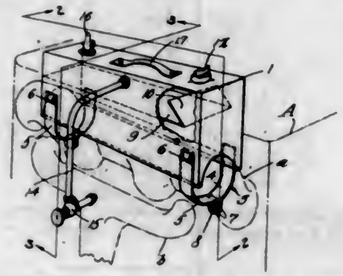
The combination in a shoe repairing stand, of a standard provided with a tapered circular last mount rigidly fixed at one side, and a special tapered circular last mount rigidly fixed at the opposite side, divided by a tapered slot, in lieu of the heel cleat, at one end, and a tapered circular base spindle at the opposite end, to co-operate with the socket of a whole last, and a two sole last mount positioned between the circular mounts, the base spindle being provided with four angular grooves and a transverse

perforation, a base provided with an open tapered circular socket having a set of four angular ridges and a transverse perforation, a channel passing through the diameter of the



socket and the base in the under side between two perforations, whereby the spindle and base may be locked from rotation and a pin passing through the perforations in the spindle and the base to fasten the base and the standard.

1,686,468. FASTENER. HEYMAN ROSENBERG, New York, N. Y. Filed Dec. 22, 1923. Serial No. 682,270. 6 Claims. (Cl. 85—19.)

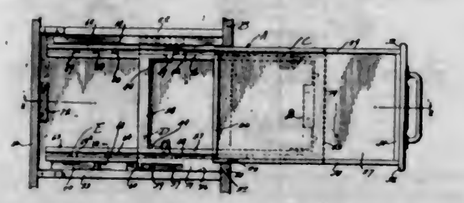


1. A fastener of the class described comprising a pin-like body having straight ribs outstanding laterally and extending lengthwise of the body, the ribs being hardened sufficiently for entering metal, such as soft iron or soft steel, substantially without injury to the ribs, and a cylindrical pilot at the entering end of the body outstanding a distance less than the ribs and beyond the extended lines of the bases of the valleys between the ribs, so as to present shoulders at the entering ends of said valleys located to be overflowed by material entered by the ribs, whereby said shoulders are adapted to interlock with such material.

1,686,469. NECKTIE RETAINER. JOSEPH ROSMAN, New York, N. Y. Filed Mar. 1, 1928. Serial No. 258,177. 2 Claims. (Cl. 24—64.)

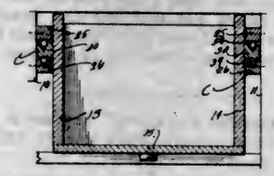
1. A tie retainer comprising in combination, a collar button having spaced flanges spaced apart by a shank portion non-circular in cross section and adapted to be engaged by a collar band so that said collar button is held against angular movement relative to said band, a tie, and interengaging head and socket means between the forward end of said collar button and rear face of said tie, one of which is resilient, the co-operating portions of said socket and collar button being non-circular in cross section and being resiliently engaged, whereby said tie is held against angular movement about said collar button.

1,686,470. HUMIDIFYING DEVICE FOR INTERNAL-COMBUSTION ENGINES. DAVID SCHWEBTNER, Leipsic, Ohio. Filed Nov. 17, 1924. Serial No. 750,404. 1 Claim. (Cl. 123—25.)



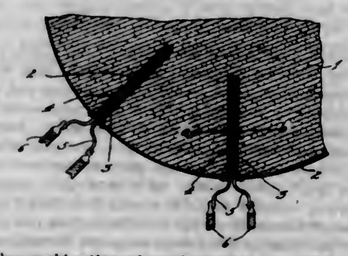
In a humidifying device for an internal combustion engine, a tank adapted for seating upon the exhaust manifold of the engine, a baffle extending across the tank from one end thereof to within a short distance of the other end of the tank and dividing the interior of said tank into a lower water compartment and an upper steam space, said baffle being provided at its inner end with a flange extending above the baffle and inclined downward toward the adjacent end of the tank, the tank being provided with a filling neck above the flange, said flange acting to direct into the water compartment water poured through said neck and to prevent water from said compartment from splashing onto the upper surface of the baffle, an outlet tube connecting with the steam space of the tank, and means for controlling discharge of steam from said tube.

1,686,471. LAUNDRY-ASSORTING APPARATUS. CYRUS G. SEWELL, Abilene, Tex. Filed Feb. 5, 1927. Serial No. 166,267. 4 Claims. (Cl. 209—90.)



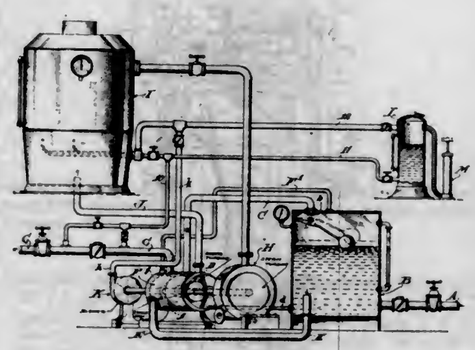
2. An assorting apparatus comprising a plurality of receptacles open at the top, spaced distributor bars supported above the receptacles, carriers engageable with and movable longitudinally of the bars and adapted to carry the articles to be distributed, means to move the carriers and means controlled by the engagement between the carriers and bars to permit certain of the carriers to engage only a particular bar and to deposit a carrier within a particular receptacle.

1,686,472. ANTIFRICTION BEARING SUPPORT FOR DRAWERS. CHARLES W. SIMPSON, La Feria, Tex. Filed May 27, 1926. Serial No. 112,118. 7 Claims. (Cl. 45—77.)



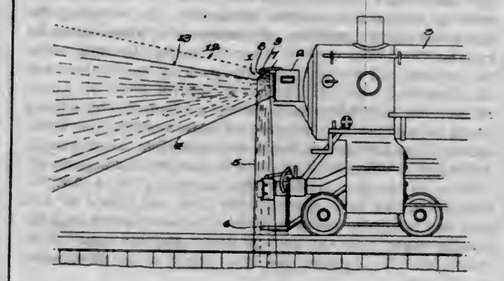
1. In a drawer construction of the class described the combination of a casing having a compartment therein and including a bottom wall and spaced side walls and a front wall with an opening therein to said compartment, tracks stationary on the bottom wall of the casing, retaining flanges connected at the inner sides of the side walls in spaced relation above the tracks, a sliding tray operating on the stationary tracks of the bottom wall for extension into the compartment or extension therefrom through the opening of the front wall of the casing, said sliding tray having lateral extensions at opposite sides thereof below the side wall flanges to prevent the tipping of the tray from a horizontal position, said extensions at the sides of the sliding tray being disposed at the rear end of the sliding tray to limit the forward extended movement of the tray from the casing by abutment against the front wall, and a drawer slidable on the tray.

1,686,473. ANTIFRICTION-BEARING SUPPORT FOR DRAWERS. CHARLES W. SIMPSON, La Feria, Tex. Original application filed May 27, 1926, Serial No. 112,118. Divided and this application filed Nov. 26, 1926. Serial No. 150,851. 2 Claims. (Cl. 45—77.)



2. In an anti-friction supporting drawer construction the combination of a casing having side walls, a drawer adapted to slide between the side walls of the casing including side walls also, spaced parallel tracks at the inner sides of each of the casing side walls defining a channel therebetween, the lowermost of said tracks having an upwardly facing V-shaped groove along the length thereof subdivided by a stop block to provide a forward groove portion and a rearward groove portion, ball bearings in the forward groove portions of said lower tracks, ball bearings in the rearward groove portions of said tracks, a track attached to the outer side of each side wall of the drawer and slidable in the channel between the adjacent tracks of the side walls of the casing, said tracks of the side walls of the drawer in the upper surfaces thereof having substantially V-shaped grooves therealong at the rear portions thereof only, means subdividing each of said last mentioned grooves into a forward groove portion and a rear groove portion, and anti-friction bearings in each of said groove portions, the tracks of the side walls of the drawer bearing such a relation to the uppermost track of the side walls of the casing that the ball bearings of the tracks of the side walls of the drawer will engage the under surfaces of said uppermost casing side wall tracks.

1,686,474. SELF-BAKING ELECTRODE. CARL WILHELM SÖDERBERG, Oslo, Norway, assignor to Det Norske Aktieselskab for Elektrokemisk Industri of Norway, Oslo, Norway. Filed Sept. 18, 1926, Serial No. 136,275, and in Norway Sept. 19, 1925. 17 Claims. (Cl. 266—1.6.)

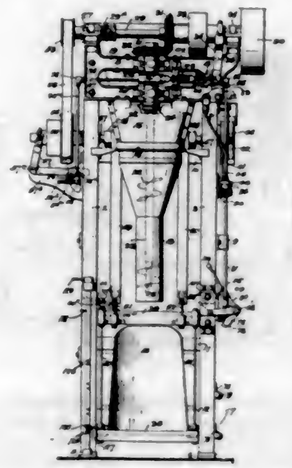


1. The combination of an electrode baked while in use in the electric furnace, an electrode holder, and a current-carrying contact movable relatively to the electrode and the electrode holder.

1,686,475. METHOD OF AND APPARATUS FOR CAUSING OIL TO FLOW THROUGH PIPE LINES. LOUIS W. SOUTHGATE, Washington, D. C. Filed Apr. 11, 1925. Serial No. 22,454. 14 Claims. (Cl. 137—78.)

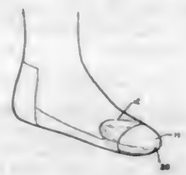
1. The method of causing oil to flow through a pipe line system, which consists in sucking the oil along at the end of a section thereof, permanently removing the air or gas from the system and then forcing the oil along the next section.

1,686,476. REFLECTOR. DAMON E. STINSON, Portland, Oreg. Filed Mar. 23, 1926. Serial No. 96,797. 1 Claim. (Cl. 240—7.3.)



A reflector for illuminating the foot boards of a locomotive comprising a back having lugs, mounted upon a mirror, supporting means attached to the lugs and to a headlight to sustain the mirror in position to intercept and reflect a portion of the light beam, a frame surrounding the mirror and facng the back, means to clamp the back and frame together, and packing means interposed between the mirror, back and frame.

1,686,477. AUTOMATIC SACK PACKER. CHARLES M. STONER, Chambersburg, Pa., assignor to The Wolf Company, Chambersburg, Pa., a Corporation of Pennsylvania. Filed Dec. 29, 1925. Serial No. 78,174. 18 Claims. (Cl. 226—25.)



1. In an automatic sack packer, the combination of a vertically movable platform, means including a clutch for elevating the platform, a bell-crank lever for engaging and disengaging the clutch, means for maintaining said lever in its clutch engaging position, trip means carried by the platform for engaging the bell-crank lever to move it out of engagement with its maintaining means and disengage the clutch when the platform moves upward to a predetermined position, one arm of said bell-crank lever being immediately connected to said clutch and the second arm

thereof lying in the path of said trip means, a packing mechanism, and automatic means operable by the platform for starting the operation of the packing means.
